THE VETO POWER AND ITS RELATIONS.

HOWEVER inopportune and groundless may be the motive of the present agitation in Congress, it is gratifying to observe that the occasion has been seized for the resumption of parliamentary discussion and constitutional debate. By giving a free vent to discussion on the subjects now placed at issue before the country the Democrats may be said to have "builded better than they knew" when, at the close of the last session, they threw out wide lines of circumvallation in the guise of besieging the Presidential stronghold, and of thereby coercing President Hayes into an act of capitulation to their mandates. The constitutional relations of the Legislative and Executive departments of the Government have been passed under review with a thoroughness which must have been instructive to large masses of the people, who, during the period of the late Civil War, had little taste and less opportunity for such discussions.

It is instructive, for instance, to observe that the conflicting attitude assumed respectively by the Republican and Democratic Parties on the constitutional questions now put in issue between them, is determined rather by the conceived exigencies of their present position than by the drift of the political ideas in which they have been nurtured. The Democratic Party, since the days of Jackson, has rejoiced in the Executive veto as one among the choicest flowers of the Presidential prerogative, and yet to-day the Democratic leaders are found inveighing against the possible exercise of that power in terms of opprobrium and menace borrowed from the exploded rhetoric of a past generation. The Republican Party, largely recruited as it was, at the date of its origin, from the adherents of the old Whig Party, and hence predisposed to share with the old Whigs in their hostility to the veto power, has made no secret of this hereditary hostility whenever that power has stood in the way of its wishes. A "corrupt use of the veto power" figured among the counts of the indictment formulated by the Republican majority of the House of Representatives in their impeachment of President Johnson, and the freedom with which that contumacious Executive "buried defiance" at Congress in the shape of veto messages exposed him to constant animadversion at the hands of his Republican censors. Yet to-day the Republican Party is found contending in Congress for the largest liberty on the part of President Hayes in signifying his dissent from the pending legislation of the Democratic majority. And, as if it were not enough to maintain the rightful prerogative of the President in the premises, a few of the Republican leaders have met the unseemly menace of the Democrats by importing an unseemly counter-menace into the pending debate. As some incautious Democrats have discounted their future proceedings by threatening to "withhold supplies" if the President should interpose a check on their movements, so a few incautious Republicans have discounted the future deliberations of the President by not only predicting but boldly assuming that the President can do nothing less than answer the expectations of his political friends in Congress.

We need not say that such political assumptions and presumptions are as much out of place in the balanced relations of the Executive and Legislative departments as the revolutionary threats of the Democratic zealots. The free deliberations of Congress are not to be forestalled by the shadow of a veto cast before the coming event which is held to justify it. In the whole history of our Government there has been only one occasion when the menace of a veto was openly interpolated into the proceedings of Congress as a controlling force to give shape and pressure to a particular statute. We allude to the passage of the Confiscation Act in 1862, when Senator Clark of New Hampshire was "authorized" to say that President Lincoln had constitutional objections to a particular feature of the pending Bill, and when Senators avowed on the floor that they changed their views of public policy in order to avoid a foreseen conflict with the Executive. However just and conclusive the objections of the President may have been, they were wrongly invoked in advance of their formal delivery, and Senator Preston King of New York did but speak in language worthy of a Senator when he exclaimed against such an indecorum as involving a gross derogation from the constitutional manner in which such communications should take place between independent and co-ordinate branches of the Government in the exercise of their respective powers.

It is equally violative of constitutional order and equally insulting to the just independence of the President, whether his political friends or his political opponents seek to eliminate from our civil system the honest, deliberate and unbiased opinion which the President is called by the Constitution to form on all new measures of legislation. When Senator Blaine proclaims, in the fervor of his oratory, that President Hayes, on being asked to sign the pending Appropriation Bills, with the political "riders" annexed, "should say, with all the scorn befitting his station, 'Is thy servant a dog, that he should do this thing?'" that impulsive Republican statesman commits an indignity against the Presidential Chair and its incumbent no less gross than that of Mr. Beck, when, at the close of the last session of Congress, that impulsive Democrat threatened the Government with "starvation" if the President should presume to exercise his constitutional right in vetoing the Bills that came before him. Fortunately for President Hayes, he is known to preserve a large measure of serenity amid the smoke and stir of the political conflicts which are waged around him, and it is fortunate also for the country that he is little likely to be frightened from his propriety by the present crossfire of his friends and his adversaries in Congress.

RUSSIAN NIHILISM.

NIHILISM in Russia is becoming a terribly formidable menace to the safety of the Government. It permeates all ranks, defies all restraints, and every day grows more audacious and resolute. For seventeen years—ever since 1862—all the conspiracies and political prosecutions in that country have been connected with Nihilism, which may be said to have had its origin and gathered its chief stimulus from the despotic and cruel punishments imposed upon the liberal leaders in the revolution of 1825, and the conspiracy of 1848-9. The exile and banishment of Pushkim, Lermontoff, Gogol, and other distinguished writers, only deepened the popular sympathy with their doctrines; the young men in the universities and public schools, resenting the espionage of the State, eagerly adopted the teachings of modern materialistic philosophy; and Vogt, Buchner, Fornier, Proudhon and Saint-Simon became the theological, philosophical and social idols of the more enlightened portion of the population. Since 1870 the Nihilists, or believers in nothing, have been especially aggressive. The young men have traversed the provinces, propagating the new ideas among the peasantry, presenting them with books and instigating them to revolution. Young ladies, even of the highest ranks of society, have dressed themselves as peasants and sought menial employments, that they might instruct others in their peculiar views. Tomboyskole, a wealthy princess, and moving in court circles, was discovered among peasant washerwomen, with a like object. In the schools the young girls nearly all become converts, and it may be said that, as a result of this system of proselytism, the whole body politic has been inoculated with the spirit of sedition and disaffection. The nobility and the gendarmerie, rich and poor, the humble and the distinguished, the ignorant and the learned, have one common belief, a negative one, to which they cling the more desperately because they have nothing else left to believe in. "They are absolutely convinced that the present state of things is utterly rotten; that society is marching, or rather drifting, in the wrong direction; that no reforms but revolutionary reforms can be of the slightest avail. Deprived of the ordinary European modes of political expression, without the safety-valves of free newspapers and constitutional discussion, the Nihilists live apart, a nation within a nation. Like an oppressed people under alien sway; like Greeks under Turks, or Venetians under Austrians, they are fanatically attached to their own society, and obey its dictates in the face of law and recognized morality." The late attempt to assassinate the Czar was undoubtedly the outcome, either directly or remotely, of this revolutionary tendency, just as the recent assassinations were inspired by the Nihilist organization.

It is impossible to resist the conclusion that the Government itself is largely responsible for the prevalent unrest and discontent. Its pitiless rigor and merciless repression, in recent as in former years, have reinforced the very propaganda it has aimed to suppress. It has shown only too palpably its fears of free and enlightened discussion, and every fresh measure of severity being accepted as an indication of weakness, has loosened its hold upon the populace, while it has emboldened the active revolutionists to new deeds of violence.

The treatment received by the Nihilists in the Russian courts has been, in many cases, absolutely brutal. In the decade ending with 1877, over 1,000 Nihilists were arrested, 300 of whom were imprisoned and held for trial. Many of these perished in prison, some by suicide, others by disease, and some by insanity induced by their sufferings. Some had been in prison for six years when, finally, in 1877, the 200 who still survived were brought to trial. From the moment of their arraignment, even the commonest privileges accorded in civilized countries to men on trial for their lives were denied them. The trial was conducted with the utmost secrecy, and the accused, confronted by witnesses who were either spies or persons under intimidation, found all attempts at defense utterly useless, their conviction having been plainly determined upon in advance. So apparent was this, that only thirty of the entire number assented to even the form of a trial, the remainder refusing to recognize the court as anything better than "a shameful farce." As the result of the proceedings, thirty-seven of the prisoners were exiled to Siberia, sixty-three were ordered to preliminary imprisonment, and the remainder were permitted to go unpunished. Subsequently these sentences were increased in severity by the Emperor, who reviewed the findings of the court. This one act has probably done as much, if not more, than any other to intensify the Nihilist hostility to the Government, and to modify the popular feeling as to the assassinations which have recently signalized the progress of the revolutionary movement.

Nihilism cannot be extinguished by a policy of violent and brutal repression. The integrity of personal opinion must be respected up to the point at which it becomes positive sedition, and then it must be dealt with by just and orderly methods. No Government in this age can withstand the logic of democratic ideas or the demand for the recognition of indisputable individual rights. Let the Czar give his people a just and humane Government, lifting from their shoulders burdens too grievous to be borne, and diffusing among all classes the blessings of education and absolute protection in every personal right, and he will not only put an effectual end to conspiracy, but secure to his Empire that decisive influence in the affairs of the Eastern World which it has so long been his ambition to acquire.

A GREAT GOVERNMENT LOAN.

ON the 16th of April, Secretary Sherman issued a circular announcing that he was ready to receive bids for $150,000,000 four per cent. bonds at one-half per cent. premium and accrued interest to the date of subscription, the proceeds to be applied to the redemption of the ten-forties. On the 17th a syndicate composed of nineteen banks and banking firms of this city and Boston submitted a bid for the entire amount of four per cents. and for $40,000,000 of the funding certificates, making the total subscription $190,000,000. The bid was accepted as to the bonds, but Secretary Sherman declined to award the $40,000,000 funding certificates, which are intended for popular subscription.

This is, perhaps, the largest subscription to a Government loan ever made in one day in this or any other country, and, as affording an illustration of the confidence of our ablest and most sagacious financiers in the management and condition of the national finances, cannot but exert an important influence upon the future of our industry and trade.

The practical effect of this great subscription will be that the Treasury Department will be out of the market for the next year and a half—there remaining no other United States bonds to be funded until December 31st, 1880, between which date and June 30th, 1881, twenty millions of six per cents. will be redeemable. The annual saving of interest by the disposal of this great loan will equal $1,950,000, and it may be added that the sum saved yearly to the Government by Secretary Sherman's funding operations since September, 1877, aggregates nearly $15,000,000, or $41,000 a day. As to the general bearings of this last grand transaction, a prominent banker and a member of the syndicate expresses himself as follows:

"One of the happiest effects of this large subscription will be to advance the price of four per cent. bonds in the English market, and make them a much sought-after investment. When the price here advances to par, the English people will begin to take them. These enormous subscriptions only illustrate the great material development of wealth in the United States during the last three years, which passes the understanding not only of Europe but of our own financial men. The evidence of it is in our ability to import and pay for, with our surplus exports, practically all the $500 United States securities held abroad; so that the amount held there, which five years ago was estimated at from $500,000,000 to $1,000,000,000, cannot now be over one-fifth and possibly one-sixth of that amount. The entire importation of bonds has taken place without any material export of gold, and has been paid for altogether in our products. The current of feeling and expectation in London a month ago was that when we came to the April settlement there would be a crash, another suspension, and a call upon England for help. They argued that the subscriptions of January were so largely speculative and fictitious that the Treasury Department would find it difficult to make collections from its subscribers. Now that one-half of April has gone without the slightest difficulty, and the new impulse exceeds the expectations even of the most sanguine experts, the English will begin to realize the greatness of this country, and our bonds will be taken in preference to any others in the world. The subscription of to-day ought to educate even the most rabid Greenbacker to see the value and economy of having the highest credit. The transactions by Secretary Sherman since January alone will save the Government $10,000,000 a year."

CONGRESS ADMONISHED.

THERE is an evident determination on the part of certain Senators and Representatives in Congress to attack and break down, if possible, the national banking system. The banks stand in the way of an unconstitutional issue of Government paper; their managers refuse to be used in furthering the silver delusion, and so they are marked for destruction.

We shall not enter into any defense of the national banking system. But before Congress attempts to lay violent hands upon the legislation under which the national banks have been organized, we desire, for its admonition, to recall certain historical facts connected with a former monetary institution and its overthrow.

The Bank of the United States received its charter from a Democratic Congress during the Democratic Administration of James Madison. It came into existence upon the recommendation of a Democratic Secretary of the Treasury. The ablest, wisest, and most patriotic statesmen of that period, both Democrats and Federalists, supported the measure. The system then established widely differed from the present one, and the institution was not a national bank in the sense in which we now employ that term. By the terms of its charter Congress could incorporate no other bank. It possessed power to establish branches wherever needed, and thus enjoyed a monopoly. Under the present system the privilege of banking is open and free to all having the requisite capital.

The Bank of the United States was admirably managed. At home and abroad its issues were at par with gold. As a stable regulator of the currency it was unequaled, and inspired the people with confidence. It gave a healthful impetus to all sorts of industries, to commerce and internal trade. The people prospered and were happy. As a fiscal agent, the Government, in its operations, found the bank useful, prompt and inexpensive, while the National Treasury greatly benefited by the receipt of interest on its deposits.

But at length, when it was found that it would not prostitute its offices to partisan purposes and become an agent for the spoliation of the public, political demagogues determined upon its overthrow. By measures which need not be recapitulated here the Bank was finally persecuted out of existence; but from the time that the Government deposits were removed from its vaults and lodged in those of Jackson's "Pet Bogus Banks," as they were not inappropriately called, clouds of misfortune began to settle upon the country. Such banks began to multiply in all directions, and clamorously demanded a share in the spoils—the national revenues, degraded into the *fiscal patronage* of the Treasury, being used as partisan rewards.

What followed? Parasites of the Administration, looking for plunder, set up their "bogus banks" in every direction and flooded the country with "wildcat money." Expansion and speculation ran riot. The clouds spread and darkened, but men unheeding, recklessly plunged into all sorts of speculative schemes. By-and-by the storm burst upon the country, as in 1873. The pet banks collapsed, millions were lost to the Government, and thousands of business men sank hopelessly into the vortex of ruin. "In three weeks, in 1837," says a writer, "one thousand financiers, merchants, manufacturers, and shipowners broke down in New York, and forty thousand more throughout the country." failures which entailed a loss of private capital amounting to not less than $500,000,000. The United States Almanac enumerates five lines of business which suffered a loss of $782,000,000, while a reviewer of the period estimates the losses on cotton, wool, grain, foreign and domestic merchandise, on capital invested in stocks, bonds, city real estate, slave labor, manufactures, and the price of labor, at $5,930,000,000, a sum greatly in excess of the moneyed cost to Government of the late civil war.

Distress attendant upon universal bankruptcy filled the land. The people of the West, with abundant harvests, were unable to raise means wherewith to pay taxes. Their stock and crops were subjected to seizure and sale. Sheriffs sold the farmers' horses at prices as low as $1.50 each, cows

Digitized by Google

at $1, sheep at twelve cents, hogs at prices varying from one cent to six cents each, and implements and crops proportionately. Such was the scarcity of money that, in various parts of the country, the people divided the bank bills obtainable into parts, and agreed to use them as currency. The wreck was complete and appalling. "In this great reversion of trade and finance," says Carroll, "the social calamity was unparalleled. The wealthy fell into penury; widows and orphans, left with a competency, were driven to want. Honest workingmen, who supported their wives and children upon their daily labor, were thrown out of employment. The savings of years were swept off at a blow, and the prospects of many were ruined for ever."

Such, in brief, is the history of the old Bank of the United States, and the disasters which attended its enforced downfall. The lesson which it teaches is full of admonition, and we commend it to the careful attention of the majority in Congress. It warns them to let the present banking system alone. That system forms a part of the warp and woof of our monetary fabric. It is identified with every industrial pursuit, and sustains the closest relations with the interests of commerce, production and labor. It has stood the test of years, and meets the wants and the approbation of the vast body of the great American public. It cannot be destroyed without entailing disaster and ruin upon every interest of the Government and people. It is a philosophic principle that like causes beget like effects; to repeat, then, an experiment fraught with direful results to a whole country is worse than folly—it is madness.

IN THE OLD WORLD.

THE principal event of the week in Europe was the attempted assassination of the Czar of Russia, which is elsewhere referred to. It turns out that Solovieff, the assassin, is the son of a groom in the household of the Grand Duchess Catharine, and has latterly been a schoolmaster of Torzpez in the government, or district, of Pleskov. He will be tried by the highest criminal tribunal. In replying to the congratulations of Lord Beaconsfield, the Czar expressed the belief that the maintenance of good feeling between Russia and England is essential to the best interests of Europe. This is the most important direct result of Solovieff's mad and foolish attempt, so far as it affects the foreign relations of Russia. Its effect upon the internal policy of the Czar will be, no doubt, the adoption of terribly repressive measures. That such measures had already been contemplated is manifest from the recent plan for building six "political prisons" in different parts of Russia, each capable of holding 6,000 inmates. "A nice lookout for the aspirants after liberty—36,000 political prisoners!" The Governor of Charkoff has been abducted by Nihilists, who hold him as a hostage for the treatment of the prisoners. It is reported that the heads of the secret police at St. Petersburg have offered to resign, having discovered that three-fourths of the force are in league with the Nihilists. The chief of police at Archangel has been stabbed. The chief of police at Yalta, in the Crimea, has been arrested as a revolutionist.

The attempt on the Czar's life has silenced the London gossip about his alleged demi-matrimonial alliance with a fascinating lady of his court, and overshadowed even the rumor of the plague's return to St. Petersburg, and the surrender of Kuldja to China. A shell exploded a few days ago as Prince Milan of Serbia was walking along the road in which it was buried, near Nish, wounding his aide-de-camp and starting suspicions of a plot to assassinate the Prince. Aleko Pasha, a native of Bulgaria, is to be Governor of Roumelia for five years, with the approval of the treaty powers. The Turks are fortifying the coast of Epirus. The Sultan, on receiving an envoy from the Khédive, disapproved of his conduct, but said he did not intend to dethrone him. Business is at a standstill in Cairo, where a destructive fire has just occurred. Garibaldi has held half-an hour's interview with King Humbert, in the carriage which carried the Hero of the Red Shirt to the Quirinal. A meeting of Italian Republicans is to be shortly held at Garibaldi's house in Rome, where manhood suffrage will be one of the subjects discussed.

In France, the difficulties foreseen by Gambetta as likely to accompany the triumph of the French Republic, threaten to begin with the discussion of Jules Ferry's Education Bill, Blanqui's possible election as Deputy for Bordeaux, and Dr. Clemenceau's prospects of becoming Premier in place of M. Waddington. M. Villemessant, founder of the *Figaro*, is dead, and the *Parisien*, a rival to *Galignani*, has been started. In Germany, Bismarck's protective schemes meet with stubborn opposition. General Manteuffel has declined the proffered Governorship of Alsace-Lorraine; and a new geographical expedition has been sent to Central Africa, under the direction of the great explorer Rohlfs. At Vienna, the Imperial silver wedding takes place on the 23d instant. The latest fashion there is that of "Boccacio stockings," a white silk one on the left leg and a pink silk one on the right, as worn by Fraulein Link (lately married), in the last act of Suppe's new opera. A Hungarian village has been swept by a flood, and four other towns are threatened. At Szegedin, fresh disasters are apprehended from another rise of the river Theiss.

The Queen of Portugal is pronounced out of danger, but the Infanta Christina of Spain is dying. In England, which is expecting the speedy return of Queen Victoria from Italy, Her Majesty's Ministry has been violently denounced by John Bright at Birmingham as "imbecile at home and turbulent abroad. I leave them," added the gentle Quaker, "to the judgment of their constituencies and the heavy condemnation of history." Many of the Durham colliery strikers talk of migrating to the United States. By an explosion of fire-damp in the Agrappe coal-pit, near Mons, in Belgium, the woodwork of the shaft caught fire on Thursday last. Only eighty-nine of the two hundred and forty men who were in the mine have been rescued.

The situation in Zululand remains without material change. A relieving column of 6,000 British troops is moving to the relief of Colonel Pearson's command at Ekowe, which is surrounded by a force of 20,000 Zulus. A force of British captured a quantity of Zulu cattle on March the 28th, but they were retaken the same day. A bloody battle followed the next day, in which the English loss was seventy-seven. The Zulus were defeated. The Boers have decided almost unanimously never to rest satisfied with less than their independence. It is thought they will adopt a course of passive resistance.

From Afghanistan it is reported that a bad feeling is growing against the British among all the tribes interested in the Khyber Pass. They complain that the British are acting as though they intended to keep the pass in spying out the hill fastnesses. Emissaries from Yakoob Khan doubtless have also been busy among the tribes. A correspondent at Lahore telegraphs that "unless the British conduct and intentions shall be explained and the frontier affairs placed in the hands of the most capable officials, we may have a combination against us which, at the present moment, would be most inconvenient."

There is great financial depression in Turkey. The caimie—paper money—has depreciated to an alarming extent, falling 400 per cent. in one week, the rate now standing at 900 per cent., or $10 paper for $1 of gold. The country is represented as being little better than bankrupt.

There is a possibility that England may soon have another petty war on her hands. It was announced in the House of Commons, April 18th, that the Chilian fleet in Peruvian waters had seized several British ships, and fears are expressed in the London clubs that unless the naval authorities in the Pacific are more prudent than the Viceroy of India and the Governor-General of Natal have been, another war will be made inevitable.

HON. S. S. COX, of this city, succeeds, in the reconstruction of the committees of the House of Representatives, to the Chairmanship of the Committee of Foreign Affairs, a position for which he is admirably qualified, and in which he will, no doubt, earn fresh distinction.

THE total number of failures in the United States during the first quarter of the present year was 2,524, with a total liability of $43,112,655. The failures for the same period last year were 3,355, with liabilities amounting to $82,070,826. The improvement in the business situation, therefore, judged by this standard, is equal to twenty-five per cent. as to the number of failures, and to over forty per cent. in the decrease of liabilities.

IT IS mentioned in Philadelphia papers as an indication of returning prosperity and activity in commercial pursuits, that the business of that port for March was the largest ever transacted at the Custom House in one month. The only month that ever approximated it in amount of business was March, 1876, when Centennial goods were being brought in quite largely. The receipts for that month were $1,028,581, the foreign entrances 160 vessels, and the clearances 136, while for March of this year the receipts amounted to $1,077,808, the foreign entrances were 230 vessels, and the clearances 159.

THE indications now are that Congress will continue in session until the heat of Summer makes its further stay at the Capitol impossible. The majority seem determined to accomplish the repeal of the political legislation which they regard as obnoxious, while the Republicans manifest a disposition to interpose every possible obstacle in the way of the achievement of that end; and unless the President shall fall into line with the Democracy and give his prompt approval to such measures as they may pass, the contest must inevitably be prolonged beyond the middle of May. It is, indeed, by no means improbable that, should general legislation be attempted, the session will extend to the first of July.

DURING the eight months ending with the 4th of March last, the expense account of the United States Senate amounted to $632,836, of which $301,000 was for mileage and salary of Senators, $134,620 for salaries of officers, $20,469 for clerks of committees and pages, and $143,557 for contingent expenses. The Teller Investigating Committee cost $18,174; the committee to reorganize the Army cost $5,232, and the commission to consider the transfer of the Indian Bureau to the War Department cost the Government $5,882, and was a waste. At the rate named for eight months the cost of the Senate per year is nearly one million of dollars, which, for a body of only seventy-six members, certainly seems excessive.

THE Police Commissioners have taken an important and commendable step in directing the Police Superintendent to report the number of gambling-houses in operation in this city, the number which have been closed between this date and the date of the report, the number of arrests made after this date for keeping gambling-houses or assisting therein in violation of law, together with suggestions as to what steps may be taken by him to suppress gambling-houses in the metropolis. It is well known that there are many houses of this description, especially in the upper portion of the city, which are not only not molested by the police, but appear to be under their protection, and it is high time that the authorities should employ all the means at their command for the suppression of the growing evil.

THE movement looking to a World's Fair in this city in 1883 is gathering strength. A national convention of Governors of States and Mayors of cities will be held in this city in June next, to consider measures of finance and legislation. Hon. Richard C. McCormick, who so creditably represented this country at the Paris Exposition, suggests in a published letter that at least three years should be allowed for the construction of the buildings and the adornment of the grounds, and that the administration of the Exhibition should be intrusted to a very small commission, with absolute powers, who should be well paid for their services. He thinks that the Exhibition grounds should have a water front, where heavy and bulky goods may be unloaded directly from vessels without onerous terminal charges. It is stated that the site of the Exhibition has been already selected, but the committee decline to make it known at present.

THE women suffragists of Great Britain are apparently no less resolute than those of our own country. Notwithstanding the rebuffs they have received from Parliament on the question of the franchise, the leaders of the movement are preparing themselves not only to obtain Parliamentary votes, but to take part personally in the House of Commons debates. It was recently announced that Mrs. Fawcett had been elected president of a ladies' debating association. The best debaters are those who hold their opinions strongly, and it is pretty well known that most women have notions of their own on a wide variety of subjects. Women in general do not trouble their heads much with politics; but the lady politician, as experience in many ages and countries has proved, is not quite such a *rara avis* as some ignorant people suppose. The late Miss Martineau was an able expounder of the soundest principles of political economy, and her advice was often eagerly sought for by Ministers of the Crown. And in this country some of our most distinguished statesmen have found their wisest and ablest advisers in the women of their households.

UPON the trial in Philadelphia of the suit of Mr. Weigley against Frank Leslie, Mr. Weigley having testified in the most positive manner, that the circular published under the title of "Caution," which I considered a direct attack upon my good name, was not published until some time after he had withdrawn from the firm of De Bergue & Co., and that he did not advise nor consent thereto, and as my action and comments adverse to Mr. Weigley were based upon information to the contrary, I cheerfully, in view of this exculpation, publish the following:

Com. } Court of Q.S.
vs. } Libel.
Leslie. }

April 18th, 1879.

I DESIRE to say, in vindication of Mr. Weigley, that I have done him injustice in the publication complained of in this action, and that the true facts connected with the history of our business relations, as I now understand them, do not warrant or justify any imputation upon the character or integrity of Mr. Weigley.

FRANK LESLIE.

NEWS OF THE WEEK.

Domestic.

GENERAL JOHN A. DIX is lying at the point of death at his residence in this city.

THE Iowa Republicans will meet in State Convention June 11th, to nominate a candidate for Governor and other State officers.

THE official returns of the recent State election in Michigan, though not complete, make certain a Republican majority of about 4,000.

THE Board of Trade of Portland, Oregon, has sent to President Hayes an address strongly condemning Chinese immigration to that State.

THE Rev. W. R. Davis has been installed pastor of the Church of the Disciples, in this city, in the place of Rev. George H. Hepworth, resigned.

CONSIDERABLE commotion has been created in railroad circles by the acceptance of the presidency of the Wabash Railroad Company by Cyrus W. Field.

STORMS of rain and snow visited Massachusetts and parts of Pennsylvania and New York last week, the snow in some places falling to a depth of six inches.

THE case of the Virginia judges indicted by Judge Rives's court, for refusing to place negroes on juries, has gone over until the October term of the Supreme Court.

THE issue of $500,000 bonds for the Brooklyn Bridge has been authorized by the New York Board of Apportionment, and work on the structure has already been resumed.

AFTER a long fight, the Pennsylvania Legislature has rejected the Bill providing for the payment of $4,000,000 by the State for damages caused by the railroad riot in Pittsburg.

IN connection with the Hazen-Stanley court-martial, an attempt will be made to bring out the alleged suppressed evidence before a committee of the Forty-third Congress in regard to post-traderships.

RESOLUTIONS have been introduced in the New York and Pennsylvania Legislatures proposing the appointment of committees to visit California and welcome General Grant on his return to this country.

THE Treasury Department has issued its ninety-eighth call for the redemption of bonds. The call is for $160,000,000, 10-40 bonds of 1864, of which $46,775,000 are coupon bonds, and $113,225,000 are registered bonds.

GOVERNOR ROBINSON has approved Mayor Cooper's removal of Police Commissioner Nichols, and the Mayor has appointed Charles F. MacLean, for the past six years counsel to the Police Board, in place of Mr. Nichols.

A FIRE at Eureka, Nev., has destroyed half of the town, including the heaviest business houses, the hotels, etc. Three hundred families are destitute, and 2,000 people are without shelter. The loss is roughly estimated at $1,500,000.

THE Citizens' Relief Committee of Wyandotte, Kan., to which point the Southern colored emigrants are being despatched from St. Louis, have made an appeal for immediate financial aid. There are 1,500 destitute negroes there now to be provided for, and more thousands are on their way.

AMONG passengers sailing from this port for Europe, April 19th, were Rev. Charles Ewell Craik, Rector at the American Legation in Geneva; Miss Genevieve Ward, the actress, and John Ennis, the pedestrian, and family. Ennis will walk in the six days contest for the Astley Belt, in London, on June 5th.

THERE was a reconciliation between Mr. Talmage and Mr. Hathaway, April 17th, and the Brooklyn Presbytery spent much time in discussing a motion to drop the fourth specification in consequence, but by a vote of 15 to 16 decided not to strike it out. General disorder continued to characterize the trial.

THE six days' walking match at Gilmore's Garden, in this city, terminated on the night of April 19th. The final score of the ten men who walked the entire six days was: Patchot, 480 miles 1 lap; Merrill, 475.5; Krohn, 454; O'Brien, 435; Byrne, 427; Noden, 426; Brodie, 375; Willis, 310.5; Stanley, 279.7; Day, 242.5.

A DESPATCH from Victoria, British Columbia, says that Captain Brown, of the United States steamer *Alaska*, which arrived there from Sitka on the afternoon of April 17th, reports the Indians quiet. He does not anticipate any trouble, and attributes the excitement to fright. This judgment is challenged by residents of Sitka and the Collector of the Port, who still profess to entertain great alarm.

AMONG recent deaths are those of General Henry Brewerton of the Army Retired List, aged 78 years; Rev. Charles West Thompson, rector of St. John's Church, at York, Pa.; Charles Johnson, of Norwich, Conn., a prominent bank president, and General William S. Pierson, of Windsor, Conn., a lineal descendant of the first rector of Yale College, in his sixty-fourth year. The latter was for years a lawyer in New York.

MR. THURMAN has been elected President *pro tem.* of the United States Senate. The Committee on Privileges and Elections is considering the validity of the election of Senator Kellogg of Louisiana. Speeches on the Army Bill were made last week by Senators Blaine, Wallace, Logan, Beck, Dawes, Hoar and others. The debate will close April 24th. The House will terminate the discussion of the Legislative Appropriation Bill April 25th. Speaker Randall has decided that the Banking and Currency, Coinage, and Ways and Means Committees may make reports based upon petitions which go into the box and find their way to the committee rooms through an official channel, without being formally presented to the House. Under this ruling, a number of Bills have already been insinuated into the possession of the Committee on Coinage, including one to make subsidiary silver coin a legal tender to the amount of ten dollars, and providing for the interchange of such coins with greenbacks.

Foreign.

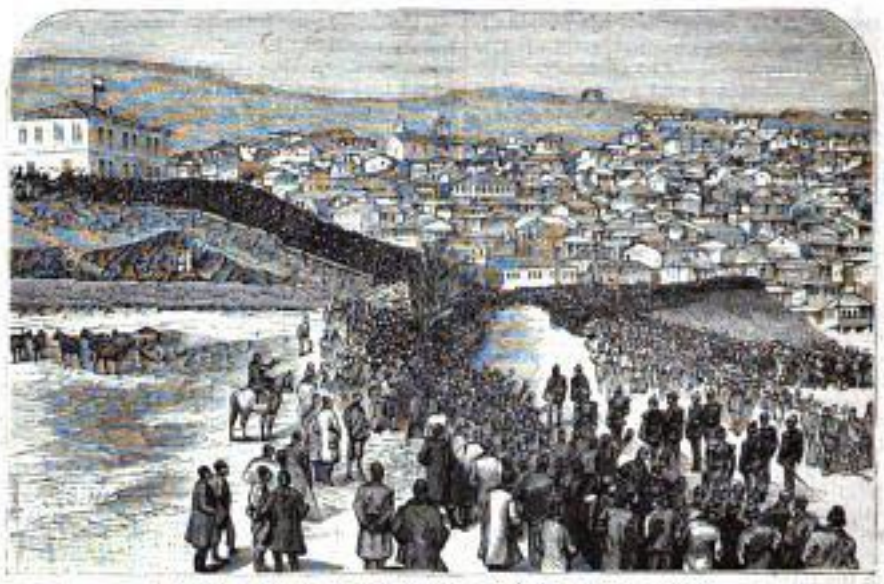
MR. PIERRE LORILLARD'S American-bred horse Parole won the Newmarket (England) handicap, April 16th.

A PETITION has been presented in the Dominion Parliament from British Columbia, praying for repressive measures against the Chinese.

WORK has been stopped on the Mexican Exposition building, Treasurer Garcia having refused to furnish money in advance of appropriations.

COUNT SCHOUVALOFF, deferring to the Czar's wish, has withdrawn his request to retire to private life, and will probably remain as Russian Ambassador at London.

ON account of the special repressive measures by Russia, it is expected that a large proportion of the 5,000 to 10,000 suspected persons now in custody will be sent in chains to the northeast.



THE South Wales colliers have decided to reject all the proposals of the masters for a reduction of wages, and have submitted counter proposals. From twenty to twenty-five thousand men are affected by this movement.

A LOVE SONG.

KISS me, darling. Let your lips
Be a rose that breaks apart,
And I'll be the bee that sips
Honey from the rose's heart.
Ah! the scarlet leaves unclose
Of this blossom blown for me,
Happy fate to be a rose!
Happier fate to be a bee!

Kiss me, darling. Let your eyes
Be the violets on the hill;
I will be the wind that flies
Hither, thither, at its will.
When my kiss upon them lies
Then the blossoms, sweet and shy,
Must look up in swift surprise
While the laughing wind goes by.

Kiss me, darling. Let my heart
Be a warm and pleasant nest;
Come and swing its doors apart,
Enter in and be my guest.
Love stands just within the door....
Tender shall his welcome be;
There, my darling, evermore
Sing your song for him and me.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXII.

THE influence of the cool night air completed Simple Sally's recovery. She was able to eat now. Amelius proposed retracing his steps to the provision-shop, and giving her the best food that the place afforded. She preferred the bread-and-butter at the coffee stall. Those thick slices, piled up on the plate, tempted her as a luxury. On trying the luxury, one slice satisfied her. "I thought I was hungry enough to eat the whole plateful," said the girl, turning away from the stall, in the vacantly-submissive manner which it saddened Amelius to see. He bought more of the bread-and-butter, on the chance that her appetite might revive. While he was wrapping it in a morsel of paper, one of her elder companions touched him and whispered, "There he is, sir!" Amelius looked at her. "The brute who calls himself her father," the woman explained, impatiently.

Amelius turned, and saw Simple Sally with her arm in the grasp of a half-drunken ruffian, one of the swarming wild-beasts of Low London, dirtied down from head to foot to the color of the street mud—the living danger and disgrace of English civilization. As Amelius eyed him, he drew the girl away a step or two. "You've got a gentleman this time," he said to her; "I shall expect gold to-night, or else——!" He finished the sentence by lifting his monstrous fist and shaking it in her face. Cautiously as he had lowered his tones in speaking, the words had reached the keenly-sensitive ears of Amelius. Urged by his hot temper, he sprang forward. In another moment he would have knocked the brute down, but for the timely interference of the arm of the law, clad in a policeman's greatcoat. "Don't get yourself into trouble, sir," said the man, good-humoredly. "Now, you Hell-fire (that's the nice name they know him by, sir, in these parts), be off with you!" The wild-beast on two legs cowered at the voice of authority, like the wild beast on four; he was lost to sight at the dark end of the street in a moment.

"I saw him threaten her with his fist," said Amelius, his eyes still aflame with indignation. "He has bruised her frightfully on the breast. Is there no protection for the poor creature?"

"Well, sir," the policeman answered, "you can summon him, if you like. I dare say he'd get a month's hard labor. But, don't you see, it would be all the worse for her when he came out of prison."

The policeman's view of the girl's position was beyond dispute. Amelius turned to her gently; she was shivering with cold or terror, perhaps with both. "Tell me," he said, "is that man really your father?"

"Lord bless you, sir!" interposed the policeman, astonished at the gentleman's simplicity, "Simple Sally hasn't got father or mother—have you, my girl?"

She paid no heed to the policeman. The sorrow and sympathy plainly visible in Amelius filled her with a childish interest and surprise. She dimly understood that it was sorrow and sympathy for *her*. The bare idea of distressing this new friend, so unimaginably kind and considerate, seemed to frighten her. "Don't fret about me, sir," she said, timidly; "I don't mind having no father nor mother; I don't mind being beaten." She appealed to the nearest of her two women-friends. "We get used to everything, don't we, Jenny?"

Amelius could bear no more. "It's enough to break one's heart to hear you and see you!" he burst out—and suddenly turned his head aside. His generous nature was touched to the quick; he could only control himself by an effort of resolution that shook him, body and soul. "I can't and won't let that unfortunate creature go back to be beaten and starved!" he said, passionately addressing himself to the policeman. "Oh, look at her! How helpless, and how young!"

The policeman stared. These were strange words to him. But all true emotion carries with it, among all true people, its own title to respect. He spoke to Amelius with marked respect.

"It's a hard case, sir, no doubt," he said. "The girl's a quiet, well-disposed creature—and the other two there are the same. They're of the sort that keep to themselves, and don't drink. They all of them do well enough, as long as they don't let the liquor overcome them. Half the time it's the men's fault when they do drink. Perhaps the workhouse might take her in for the night. What's this you've got, my girl, in your hand? Money!"

Amelius hastened to say that he had given her the money. "The workhouse!" he repeated. "The very sound of it is horrible." "Make your mind easy, sir," said the policeman; "they won't take her in at the workhouse with money in her hand."

In sheer despair, Amelius asked, helplessly, if there was no hotel near. The policeman pointed to Simple Sally's threadbare and scanty clothes, and left them to answer the question for themselves. "There's a place they call a coffee-house," he said, with the air of a man who thought he had better provoke as little further inquiry on that subject as possible.

Too completely preoccupied, or too innocent in the ways of London, to understand the man, Amelius decided on trying the coffee-house. A suspicious old woman met them at the door, and spied the policeman in the background. Without waiting for any inquiries, she said, "All full for to-night"—and shut the door in their faces.

"Is there no other place?" said Amelius.

"There's a lodging house," the policeman answered, more doubtfully than ever. "It's getting late, sir; and I'm afraid you'll find 'em packed like herrings in a barrel. Come, and see for yourself."

He led the way into a wretchedly-lighted by-street, and knocked with his foot on a trap-door in the pavement. The door was pushed open from below by a bright-eyed boy with a dirty nightcap on his head. "Any of 'em wanted to-night, sir?" asked the bright-eyed boy, the moment he saw the policeman. "What does he mean?" said Amelius. "There's a sprinkling of thieves among them, sir," the policeman explained. "Stand out of the way, Jacob, and let the gentleman look in."

He produced his lantern, and directed the light downwards, as he spoke. Amelius looked in. The policeman's figure of speech, likening the lodgers to "herrings in a barrel," accurately described the scene. On the floor of a kitchen, men, women and children lay huddled together in closely-packed rows. Ghastly faces rose terrified out of the seething obscurity, when the light of the lantern fell on them. The stench drove Amelius back, sickened and shuddering. "How's the sore place on your head, Jacob?" the policeman inquired. "This is a civil boy," he explained to Amelius, "and I like to encourage him." "Better, thank you, sir," said the bright-eyed boy. "Good-night, Jacob." "Good-night, sir." The trap-door fell, and the lodging-house disappeared like the vision of a frightful dream.

There was a moment of silence among the little group on the pavement. It was not easy to solve the question of what to do next. "There seems to be some difficulty," the policeman remarked, "about housing this girl for the night."

"Why shouldn't we take her along with us?" one of the women suggested. "She won't mind sleeping three in a bed, *I* know."

"What are you thinking of?" the other woman remonstrated. "When he finds she don't come home our place will be the first he looks for her in."

Amelius settled the difficulty in his own headlong way. "I'll take care of her for the night," he said. "Sally, will you trust yourself with me?"

She put her hand in his, with the air of a child who was ready to go home. Her wan face brightened for the first time. "Thank you, sir," she said; "I'll go anywhere along with you."

The policeman smiled. The two women looked thunderstruck. Before they had recovered themselves, Amelius forced them to take some money from him, and cordially shook hands with them. "You're good creatures," he said, in his eager, hearty way; "I'm sincerely sorry for you. Now, Mr. Policeman, show me where to find a cab—and take that for the trouble I am giving you. You're a humane man, and a credit to the force."

In five minutes more Amelius was on the way to his lodgings, with Simple Sally by his side. The act of reckless imprudence which he was committing was nothing but an act of Christian duty, to his mind. Not the slightest misgiving troubled him. "I shall provide for her in some way," he thought to himself cheerfully. He looked at her. The weary outcast was asleep already in her corner of the cab. From time to time she still shivered, even in her sleep. Amelius took off his great-coat and covered her with it. How some of his friends at the club would have laughed if they had seen him at that moment!

He was obliged to wake her when the cab stopped. His key admitted them to the house. He lit his candle in the hall and led her up the stairs. "You'll soon be asleep again, Sally," he whispered. She looked round the little sitting-room with drowsy admiration. "What a pretty place to live in!" she said. "Are you hungry again?" Amelius asked. She shook her head, and took off her shabby bonnet; her pretty light brown hair fell about her face and her shoulders. "I think I'm too tired, sir, to be hungry. Might I take the sofa-pillow and lay down on the hearthrug?"

Amelius opened the door of his bedroom. "You are to pass the night more comfortably than that," he answered. "There is a bed for you here."

She followed him in and looked round the bedroom with renewed admiration of everything that she saw. At the sight of the hair-brushes and the comb she clapped her hands in ecstasy. "Oh, how different from mine!" she exclaimed. "Is the comb tortoiseshell, sir, like one sees in the shop-windows?" The bath and the towels caught her eye next; she stood looking at them with longing eyes, completely forgetful of the wonderful comb. "I've often peeped into the ironmongers' shops," she said, "and thought I should be the happiest girl in the world if I had such a bath as that. A little pitcher is all I have got of my own, and they swear at me when I want it filled more than once. In all my life I have never had as much water as I should like." She paused and thought for a moment. The forlorn, vacant look appeared again, and dimmed the beauty of her blue eyes. "It will be hard to go back, after seeing all those pretty things," she said to herself, and sighed, with that inborn submission to her fate so melancholy to see in a creature so young.

"You shall never go back again to that dreadful life," Amelius interposed. "Never speak of it, never think of it any more. Oh, don't look at me like that!"

She listened with an expression of pain, and suddenly lifted both her hands to her head. There was something so wonderful in the idea which he had suggested to her, that her mind was not able to take it all in at once. "You make my head giddy," she said. "I'm such a poor, stupid girl—I feel out of myself, like, when a gentleman like you sets me thinking of new things. Would you mind saying it again, sir?"

"I'll say it to-morrow morning," Amelius rejoined kindly. "You are tired, Sally—go to rest."

She roused herself and looked at the bed. "Is that your bed, sir?"

"It's your bed to night," said Amelius. "I shall sleep on the sofa in the next room."

Her eyes rested on him for a moment in speechless surprise; she looked back again at the bed. "Are you going to let me sleep by myself?" she asked, wonderingly. Not the faintest suggestion of immodesty—nothing that the most profligate man living could have interpreted impurely—showed itself in her look or manner, as she said those words.

Amelius thought of what one of her women-friends had told him. "She hasn't grown up, you know, in her mind, since she was a child." There were other senses in the poor victim that were still undeveloped besides the mental sense. He was at a loss how to answer her with the respect which was due to that all-atoning ignorance. His silence amazed and frightened her. "Have I said anything to make you angry with me?" she asked.

Amelius hesitated no longer. "My poor girl," he said, "I pity you from the bottom of my heart! Sleep well, Simple Sally—sleep well." He left her hurriedly, and shut the door between them.

She followed him as far as the closed door, and stood there alone, trying to understand him, and trying all in vain. After a while she found courage enough to whisper through the door. "If you please, sir——" She stopped, startled by her own boldness. He never heard her; he was standing at the window, looking out thoughtfully at the night, feeling less confident of the future already. She still stood at the door, wretched in the firm persuasion that she had offended him. Once she lifted her hand to knock at the door, and let it drop again at her side. A second time she made the effort and desperately summoned the resolution to knock. He opened the door directly.

"I'm very sorry if I said anything wrong," she began faintly, her breath coming and going in quick, hysteric gasps. "Will you please forgive me, and say good night?" Amelius took her hand; he said it with the utmost gentleness, but still he said it sorrowfully. She was not quite comforted yet. "Would you mind, sir——?" She paused awkwardly, afraid to go on. There was something so completely childlike in the artless perplexity of her eyes that Amelius smiled. The change in his expression gave her back her courage in an instant; her pale, delicate lips reflected his smile prettily. "Would you mind giving me a kiss, sir?" she said.

Amelius kissed her. Let the man who can honestly say he would have done otherwise, blame him. He shut the door between them once more. She was quite happy now. He heard her singing to herself as she got ready for bed.

Once, in the wakeful watches of the night, she startled him. He heard a cry of pain or terror in the bedroom. "What is it?" he asked through the door, "what has frightened you?" There was no answer. After a minute or two the cry was repeated. He opened the door, and looked in. She was sleeping, and dreaming as she slept. One little thin white arm was lifted in the air, and waved restlessly to and fro over her head. "Don't kill me!" she murmured, in low moaning tones—"Oh, don't kill me!" Amelius took her arm gently, and laid it back on the coverlid of the bed. His touch seemed to exercise some calming influence over her; she sighed, and turned her head on the pillow; a faint flush rose on her wasted cheeks, and passed away again—she sank quietly into a dreamless sleep.

Amelius returned to his sofa, and fell into a broken slumber. The hours of the night passed. The sad light of the November morning dawned mistily through the uncurtained window, and woke him.

He started up and looked at the bedroom-door. "Now what was to be done?" that was his first thought, on waking; he was beginning to feel his responsibilities at last.

CHAPTER XXIII.

THE landlady of the lodgings decided what was to be done.

"You will be so good, sir, as to leave my apartments immediately," she said to Amelius. "I make no claim to the week's rent, in consideration of the short notice. This is a respectable house, and it shall be kept respectable at any sacrifice."

Amelius explained and protested; he appealed to the landlady's sense of justice and sense of duty, as a Christian woman. The reasoning which would have been irresistible at Tadmor was reasoning completely thrown away in London. The landlady remained as impenetrable as the Egyptian Sphinx. "If that creature in the bedroom is not out of my house in an hour's time, I shall send for the police." Having answered her lodger's arguments in those terms, she left the room, and banged the door after her.

"Thank you, sir, for being so kind to me. I'll go away directly—and then perhaps the lady will forgive you."

Amelius looked round. Simple Sally had heard it all. She was dressed in her wretched clothes, and was standing at the open bedroom-door, crying.

"Wait a little," said Amelius, wiping her eyes with his own handkerchief; "and we will go away together. I want to get you some better clothes: and I don't exactly know how to set about it. Don't cry, my dear—don't cry."

The deaf maid-of-all-work came in, as he spoke. She too was in tears. Amelius had been good to her in many little ways—and she was the guilty person, who had led to the discovery in the bedroom. "If you had only told me, sir," she said, penitently, "I'd have kep' it secret. But, there, I went in with your 'ot water as usual, and, oh, Lor'! I was that startled I dropped the jug, and run downstairs again——!" Amelius stopped the further progress of the apology. "I don't blame you, Maria," he said; "I'm in a difficulty. Help me out of it; and you will do me a kindness." Maria partially heard him, and no more. Afraid of reaching the landlady's ears, as well as the maid's ears, if he raised his voice, he asked if she could read writing. Yes, she could read writing, if it was plain. Amelius immediately reduced the expression of his necessities to writing, in large text. Maria was delighted. She knew the nearest shop at which ready-made outer clothing for women could be obtained, and nothing was wanted, as a certain guide to an ignorant man, but two pieces of string. With one piece, she measured Simple Sally's height, and with the other she took the slender girth of the girl's waist—while Amelius opened his writing-desk, and supplied himself with the last sum of spare money that he possessed. He had just closed the desk again, when the voice of the merciless landlady was heard, calling imperatively for Maria. The maid-of-all-work handed the two indicative strings to Amelius. "They'll 'elp you at the shop," she said, and shuffled out of the room.

Amelius turned to Simple Sally. "I am going to get you some new clothes," he began.

The girl stopped him there; she was incapable of listening to a word more. Every trace of sorrow vanished from her face in an instant. She clapped her hands. "Oh!" she cried, "new clothes! clean clothes! Let me go with you."

Even Amelius saw that it was impossible to take her out in the streets with him in broad daylight, dressed as she was then. "No, no," he said, "wait here till you get your new things. I won't be half an hour gone. Lock yourself in if you are afraid, and open the door to nobody till I come back!" Sally hesitated; she began to look frightened. "Think of the new dress, and the pretty bonnet," suggested Amelius, speaking unconsciously, in the tone in which he might have promised a new toy to a child. He had taken the right way with her. Her face brightened. "I'll do anything you tell me," she said. He put the key in her hand, and was out in the street directly.

Amelius possessed one valuable moral quality which is exceedingly rare among Englishmen. He was not in the least ashamed of putting himself in a ridiculous position, when he was conscious that his own motives justified him. The smiling and tittering of the shop-women, when he stated the nature of his errand, and produced his two pieces of string, failed to annoy him in the smallest degree. He laughed too. "Funny, isn't it," he said, "a man like me buying gowns and the rest of it? She can't come herself—and you'll advise me, like good creatures, won't you?" They advised their handsome young customer to such good purpose that he was in possession of a gray walking costume, a black cloth jacket, a plain lavender-colored bonnet, a pair of black gloves, and a paper of pins, in a little more than ten minutes' time. The nearest trunk-maker supplied a traveling-box to hold all these treasures; and a passing cab took Amelius back to the lodgings, just as the half-hour was out. But one event had happened during his absence. The landlady had knocked at the door, and called through it in a terrible voice: "Half an hour more!" and had retired again without waiting for an answer.

Amelius carried the box into the bedroom. "Be as quick as you can, Sally," he said, and left her alone to enjoy the full rapture of discovering the new clothes.

When she opened the door and showed herself, the change was so wonderful that Amelius was literally unable to speak to her. Joy flushed her pale cheeks, and diffused its tender radiance over her pure blue eyes. A more charming little creature, in that momentary transfiguration of pride and delight, no man's eyes ever looked on. She ran across the room to Amelius, and threw her arms around his neck. "Let me be your servant!" she cried; "I want to live with you all my life. Jump me up! I'm wild—I want to fly through the window." She caught sight of herself in the looking-glass, and suddenly became composed and serious. "Oh," she said, with the quaintest mixture of awe and astonishment, "was there ever such another bonnet as this? Do look at it—do please look at it!"

Amelius good-naturedly approached to look at it. At the same moment the sitting-room door was opened, without any preliminary ceremony of knocking, and Rufus walked into the room. "It's half after ten," he said, "and the breakfast is spoiling as fast as it can."

Before Amelius could make his excuses for having completely forgotten his engagement,

Digitized by Google

Rufus discovered Sally. No woman, young or old, high in rank or low in rank, ever found the New Englander unprepared with his own characteristic acknowledgment of the debt of courtesy which he owed to the sex. With his customary vast strides, he marched up to Sally and insisted on shaking hands with her. "How do you find yourself, miss? I take pleasure in making your acquaintance." The girl turned to Amelius with wide-eyed wonder and doubt. "Go into the next room, Sally, for a minute or two," he said. "This gentleman is a friend of mine, and I have something to say to him."

"That's an active little girl," said Rufus, looking after her as she ran to the friendly shelter of the bedroom. "Reminds me of one of our girls at Coolspring—she does. Well, now, and who may Sally be?"

Amelius answered the question, as usual, without the slightest reserve. Rufus waited in impenetrable silence until he had completed his narative—then took him gently by the arm, and led him to the window. With his hands in his pockets and his long legs planted wide apart on his big feet, the American carefully studied the face of his young friend under the strongest light that could fall on it. "No," said Rufus, speaking quietly to himself, "the boy is not raving mad, so far as I can see. He has every appearance on him of meaning what he says. And this is what comes of the Community at Tadmor, is it? Well, civil and religious liberty is dearly purchased sometimes in the United States—and that's a fact."

Amelius turned away to pack his portmanteau. "I don't understand you," he said.

"I don't suppose you do," Rufus remarked. "I'm at a similar loss myself to understand you. My store of sensible remarks is copious on most occasions, but I'm darned if I ain't dried up in the face of this! Might I venture to ask what that venerable Chief Christian at Tadmor would say to the predicament in which I find my young Socialist this morning?"

"What would he say?" Amelius repeated. "Just what he said when Mellicent first came among us. 'Ah, dear me! Another of the Fallen Leaves!' I wish I had the dear old man here to help me. *He* would know how to restore that poor, starved, outraged, beaten creature to the happy place on God's earth which God intended her to fill!"

Rufus abruptly took him by the hand. "You mean that?" he said.

"What else could I mean?" Amelius rejoined, sharply.

"Bring her right away to breakfast at the hotel!" cried Rufus, with every appearance of feeling infinitely relieved. "I don't say I can supply you with the venerable Chief Christian, but I can find a woman to fix you, who is as nigh to being an angel (barring the wings), as any she-creature that ever put on a petticoat." He knocked at the bedroom door, turning a deaf ear to every appeal for further information which Amelius could address to him. "Breakfast is waiting, miss!" he called out; "and I'm bound to tell you that the temper of the cook at our hotel is a long way on the wrong side of uncertain. Well, Amelius, this is the age of exhibitions. If there's ever an exhibition of ignorance in the art of packing a portmanteau, you run for the gold medal, and a unanimous jury will grant it, I reckon, to a young man from Tadmor. Clear out, will you, and leave it to me."

He pulled off his coat, and conquered the difficulties of packing in a hurry, as if he had done nothing else all his life. The landlady herself, appearing with pitiless punctuality exactly at the expiration of the hour, "smoothed her horrid front" in the polite and placable presence of Rufus. He insisted on shaking hands with her; he took pleasure in making her acquaintance; she reminded him, he did assure her, of the lady of the captain-general of the Coolspring Branch of the St. Vitus Commandery; and he would take the liberty to inquire whether they were related or not. Under cover of this fashionable conversation, Simple Sally was taken out of the room by Amelius without attracting notice. Rufus followed them, still talking to the landlady, all the way down the stairs and out to the street-door.

While Amelius was waiting for his friend outside the house, a young man driving by in a cab leaned out and looked at him. The young man was Jervy, on his way from Mr. Roscald's tombstone to Doctor's Commons.

(*To be continued.*)

AMERICAN MULES SHIPPED TO AFRICA.

DURING the past week an unusual scene was witnessed at Pier 44, North River, in the shipment on board the British transport *Ontario*, No. 19, of 500 mules for the Cape of Good Hope, to do service in the Zulu war. The steamer, a large iron vessel, was sent here from Liverpool by order of the English Government for the special purpose of transferring these mules to Africa, their purchase by an agent having been effected in Missouri and Kentucky. They were brought by rail to West Albany and there put on board of several river steamers and finally landed at Pier 44, belonging to the National Line. A space of about one hundred and fifty feet from the end of the pier was devoted to the mule emigrants, and they were driven thence on board the *Ontario* over a slightly inclined gangway in couples, and on reaching the main deck were placed in stalls on the port and starboard sides. When the main deck was filled a wide elevator was employed to lower them to the deck below or raise them to the deck above, three decks in all being devoted to their accommodation. The ship was completely fitted up for this kind of live-stock. Each mule stood in a stall, separated from his companions by a board at either hand, fitting into a cleat on the side of the ship. His head was turned to the interior of the vessel and his tail to the bulwarks. Beneath his head on the deck was a sloping trough for feed, and from the roof depended canvas-incased halter-hooks, and the beams above his back were provided to receive broad and heavy canvas bands to pass under his belly in case of stormy weather, so as to prevent him from being injured by the rolling of the ship. The steamer sailed on Saturday for the Cape of Good Hope.

OREGON INDIANS IN WASHINGTON.

WE give on page 133 the portraits of the principal members of the delegation of Nez Percé Indians, who have recently visited Washington for the purpose of conferring with the President and Secretary Schurz in reference to certain land matters in the vicinity of the Columbia River, in Oregon. The full delegation consisted of Chief Moses, of the Okanogan Indians; Homlie, chief of the Walla-Wallas; Howlishswamp, chief of the Cayuses; Winnamsmoot, chief of the Umatillas; Young Chief and Umapine, Cayuse Indians; Himminy, a Walla-Walla Indian; Jim, a nephew of Moses, and Abraham Lincoln, a Okanogan Indian. The Indians were accompanied by Major W. A. Connoyer, agent of the Umatilla reservation in Washington Territory; Major W. H. Boyle, U. S. A.; Miss M. C. Connoyer, Captain John McBan, a United States scout, who acts as interpreter, and Dr. J. A. McGowan, the party's physician. They are all fine-looking specimens of manhood. Moses is especially intelligent, as well as muscular.

On the 18th of April, Secretary Schurz completed negotiations with Chief Moses, and the President has, by an Executive order, set aside a very large reservation in Washington Territory for Moses and his people, with such Indians as may affiliate with them, and such other Indians as the Secretary of the Interior may send to the reservation. Moses's people number not more than a thousand, but his influence with the neighboring Indians is very great, and he could probably command more than a thousand warriors in the event of hostilities.

A REMARKABLE CHESS EXHIBITION.

THE entertainment provided by the Manhattan Chess Club at the Academy of Music, New York, on Wednesday evening, April 16th, embraced the most gorgeous representation of a game of chess with living pieces that has ever been seen. The first part of the programme was made up of music by the United States Marine Band, and a tableau showing Mephistopheles playing with the Prince for his soul. For the game of chess, which was played by Captain Mackenzie and Eugene Delmar, the stage was covered by alternate squares of black and white Canton flannel, the whole board being thirty-two feet square and each square four feet. A red border was tacked around the board.

Following are the names of the ladies and gentlemen who were the "living chessmen":

Piece.	*Red, Mackenzie.*	*Blue, Delmar.*
King	A. Ettlinger	Leon Block.
Queen	Rachel Barrett	Miss Muller.
Queen's Bishop	G. Wielisaky	James Wolff.
Queen's Knight	Gus. Rino	John Dempster.
Queen's Rook	Julius Benwit	A. Risner.
King's Bishop	H. W. Dinsmore	D. G. Baird.
King's Knight	Lucile Bruce	Nic. Gedalia.
King's Rook	S. Soldin	Charles Gedalia.
King's Pawn	Emma Hoffman	Stella Muller.
K. B. P.	Lena Wolff	Carrie Andersen.
K. Kt. P.	Fanny Latz	Clara Andersen.
K. R. P.	Rosa Schwatzwald	Lesh Andersen.
Queen's Pawn	Eleonora Gay	Lottie Adler.
Q. B. P.	Dora Pearlberg	Sophie Markheim.
Q. Kt. P.	Jettie Marks	Minnie Pimon.
Q. R. P.	Annie Latz	May Gay.
Queen's Page	Pauline Wolff	Esther Adler.
Crier	C. M. Saulson	Louis Conn.
Pursuivant	Charles Mahle	W. M. De Visser.

Their costumes deserve especial comment. The bishops were arrayed in ecclesiastical robes decorated with gold and silver lace. They bore mitres and crosiers, and a thorough-going churchman could not question the accuracy of their dress. Their long beards gave them a patriarchal appearance. Their step was slow and measured. The knights wore bright armor that made a dazzling sight. Heavy pikes were in their hands, and they seemed lineal descendants of the time of Henry V. Castles rested on the heads of the rooks; castles also covered their breasts.

The pawns were sixteen pretty girls in Amazonian dress. Helmets of gold or silver, and shields and spears were manfully carried by them, and, like their comrades, they wore blue or red, according to the side on which they were arrayed. Their height was uniform, and, altogether, they made a very interesting barrier of defense when marshaled in line. The costume of Charlemagne was the dress of the king. A crown of gold and a crown of silver was worn by each respectively, and over their bright and handsome robes were jewels of greater or less value. Costumes of the historical period were worn by each queen, and jeweled coronets sat on their graceful heads. A little page tastefully dressed accompanied each.

Mackenzie, and Delmar sat on raised platforms on either side of the stage, with chessboards on a table before them. Whenever a move was made the crier announced it, and the pursuivants conducted the pieces to their proper squares. Captain Mackenzie's crier first called, "Pawn to King's 4th." A dainty miss of sixteen, whose long black hair hung loose over her helmet, was led to her square, and when Mr. Delmar's crier also made the same move, the two misses, standing face to face, suspended hostilities for the nonce and exchanged smiles. The following move brought the captain's knight to the king's bishop's third square, and Delmar made a similar move with his knight to his queen's bishop's square. Delmar's fourth move was the capture of a red pawn by a bishop. Her rosy cheeks assumed a scarlet hue of mortification at being captured at such an early stage of the game, and as the pursuivant led her off the board she pouted petulantly. But the pouting was repeated on the sixth move when Delmar, who seemed to take a great fancy to the pretty pawns, plited a blue-eyed pawn against a red, and she, too, had to retire. The next move was another match of maiden against miss, and the queen's bishop's pawn of the gallant Captain was the third victim. Mackenzie's tenth move, after fine strategic manœuvres, was a capture of a blue pawn, and three moves later his bishop vanquished a stately knight. The panoplied descendant of Henry V.—twirling his mustache—sought consolation among the charming prisoners behind the wings. On his twenty-first move Delmar made a brilliant sacrifice of his bishop, which afterwards proved unfortunate. His thirtieth move gave the Captain the checkmate. The game throughout brought out very happily the merits of the various costumes.

A Destructive Tornado.

A TORNADO swept over South Carolina, April 16th, causing great destruction of life and property. In the village of Waterboro more than 100 dwellings and all the churches were swept away. Three-fourths of the inhabitants are homeless. Fifteen persons were killed, and many more wounded. At Oakley all houses occupied by colored people were leveled, and one negro was killed, and many were hurt. Similar casualties are reported from various points in the track of the tornado. At Pocahontas, Ala., twenty dwellings were destroyed by the same storm, and the crops in that State and Georgia sustained great injury. At Fernandina, in Florida, a number of houses were blown down and many damaged. Cars standing on the track were started and blown into the river, and vessels were torn from their moorings.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Submission of the Ameer's Brother to the British.

Wali Mahomed is the last prominent Afghan chieftain who has surrendered to the British. He is rather a big man and bears a great likeness in feature to his brother, the late Ameer. He dies his beard red and paints his eyelashes black. In passing through Jamrood after a durbar or conference with General Maude, he put up an umbrella to protect himself from the sun on the road to Ali-Musjid.

Reception of Prince Dondukoff-Korsakoff at Tirnova.

Prince Dondukoff-Korsakoff, the Russian Governor of Bulgaria, who opened the first Parliament of Bulgaria at Tirnova, on February 22d, has been spoken of more prominently than any other person as the future ruler of the principality. His moderation, thoughtfulness and congenial manners since he was appointed to his present position have made him very popular with the nobles and masses. His future will, to a great extent, depend upon his action at the present time. There are two strong parties among the delegates, holding radically different views, yet it is significant that so far all of the articles of the new Constitution that have been adopted are characterized by an extremely liberal spirit. That the Prince-Governor is very popular is shown by the demonstration on his arrival at Tirnova to open the Parliament, of which we give an illustration.

The International Hurdle Race.

The sketch of the International Hurdle Race at Croydon, England, on Wednesday, February 12th, does not include the winner of the race, for the reason that the Bear, inspired by the pint of whisky with which he had thoughtfully been provided by astute friends, and carefully humored by Marsh, was at the moment represented in the sketch some lengths to the good. Comfortable odds of 100 to 12 were always forthcoming up to the last moment, but the chances of the Bear were not highly esteemed. Singleton held the position of favorite, though Boniface and Blue Rein, on the strength of their performances in December at Sandown Park, were much fancied; and that the public were not far wrong is shown by their having finished second and third. The rumor as to there being, or having been, something wrong with the better of Captain Machell's pair—arising from reasons which those who started the report can best guess—was speedily dissipated, and although Boniface was beaten easily after Cannon had done his best, the performance must rank as a good one.

A New Spanish Military College.

This admirable establishment has been instituted at Guadalajara for the purpose of affording a first-class military education to the orphans of officers who have died while in the service. It has been founded from the proceeds of a surplus of the national subscription raised to aid the widows and orphans of the brave men who laid down their lives for their country during the late disastrous civil war. The right wing is the department for boys, the left for girls, the education of the latter being superintended by Ursuline nuns. Our illustration represents the scene of inauguration at the moment when the Archbishop of Toledo has concluded his elegant discourse and His Majesty the King is about to address the earnest and thoughtful pupils. His Majesty expressed himself much pleased with the organization, and the working details of the establishment.

The Emperor of Austria at Szegedin.

On Monday, March 17th, His Majesty the Emperor of Austria arrived at Szegedin, with the Hungarian Prime Minister, Herr Tisza. After receiving an address from the Mayor, His Majesty stepped into a pontoon, and was rowed through the ruins of the town. He stopped at some of the larger buildings which still stand, and spoke to some of the unfortunate females, telling them to bear up well in their misfortune, that help was coming, and everything possible would be done for them. After the inspection the Emperor returned direct, via Pesth, to Vienna. The Empress of Austria has quitted her fox-hunting Winter residence in Ireland, and has returned to aid in the work of affording relief to the sufferers from the inundation. The Lord Mayor of London has responded to an appeal from the Austrian Ambassador in London, and opened a subscription list at the Mansion House. Subscriptions are also being made throughout Europe and the United States for the relief of the sufferers.

Fatal Demonstration of Russian Students in St. Petersburg.

The confession of Solovieff that he had been chosen by lot to murder the Czar of Russia, and the rumor that General Zuroff, the Prefect of St. Petersburg, had resigned because of threats to assassinate him, have led to the adoption of most extreme measures in the Government's dealing with the Nihilists. Most people outside of Russia, judging from the reports in the daily papers, would believe the regulations already in force sufficiently severe to paralyze any revolutionary movement. The continued assassinations and threats of assassination, the exhibitions of mob violence, such as the students' fight before the palace of the Czarowitz, show that the Nihilists are powerful, well-organized, determined and extremely aggressive. A reign of terror certainly exists in St. Petersburg to day, but different from the historical one in Paris: it is the Imperial family and the authorities who stand in fear of a secret, insidious foe.

Attempt to Rescue Colonel Pearson at Ekowe.

The latest intelligence from the seat of war in Zululand is extremely momentous. Since January last Colonel Pearson has been invested at Ekowe, having 1,250 men, but only 500 in a condition to aid the advancing army, for whom a force of 35,000 Zulus are lying in wait. A column was started on March 28th for his relief. It is composed of 6,000 men, two Gatling guns, two cannon, several rocket tubes, 113 wagons and 56 pack mules. The wagons are escorted by two companies of mounted natives and a battalion of native foot. Major Pemberton commands the rear guard, composed of 200 men from the *Boadicea*, the Fifty-seventh Regiment, a battalion of the Sixtieth Regiment, and the mounted natives. Lord Chelmsford and staff are with the rear guard. Colonel Wood attacked Umbelini's stronghold on the 28th of March and captured a quantity of cattle. Subsequently 2,000 Zulus retook the cattle, and on the 29th attacked Colonel Wood's camp. The Zulus were repulsed after four hours' fighting, but the British loss was heavy. Seven officers and seventy men were killed, including Captain Campbell, and Piet Uys, the leader of the detachment of mounted Boers, who has several times been mentioned in dispatches for distinguished services.

AT HOME AND ABROAD.

—THERE are still two feet of snow in the Adirondack region.

—PRIVATE advices from St. Petersburg state that 1,140 revolutionists have been arrested in Russia within the last fortnight.

—THE St. Louis Grand Jury has indicted all owners, venders and attachés of the Missouri State Lottery, some sixty in number.

—THE municipality of Paris propose to change the names of the Rue St. Arnaud and the Rue Abbatucci to Rue Lincoln and Rue Washington respectively.

—PERSONS of the higher classes in Spain receive copies of the Gospels in paper covers through the mails. The Spanish Evangelization Society sends them.

—THE TEXAS Senate has adopted a resolution taxing commercial travelers from other States $100 a year in addition to $10 for each county visited on business.

—IT is expected that on the occasion of the German Emperor's golden wedding in June next the monarchs of Russia, Austria and Spain will be the guests of His Majesty.

—THE Ultramontane newspaper *Germania*, of Berlin, doubts the authenticity of the favorable accounts respecting an approaching amicable settlement between Germany and the Vatican.

—THE Michigan Legislature has passed a resolution asking Congress and the Canadian Parliament to authorize the construction of a bridge across the Detroit River, at or near Detroit.

—THE veteran aeronaut, Professor John Wise, insists that the proposed balloon expedition to the North Pole is entirely feasible, and that he is perfectly willing to risk his life in the enterprise.

—MINERS in the Durham (England) collieries are beginning to emigrate, mainly towards the mineral districts of this country. Immigration agents are taking an active part in the movement.

—WOODEN shoes are still in common use among the French peasantry. It is said that about four million pairs are made in France yearly. They are made of maple, and are cheap and serviceable.

—THERE are 490 vessels, aggregating 28,615.22 tons, in the Gloucester fishing fleet. The decrease the past year was 26 vessels. The loss during the past three months was 20 vessels of 1,543.12 tons.

—THE Chinese Six Companies at San Francisco are daily in receipt of applications for laborers to go to Southern States, notably Mississippi and Louisiana, to take the place of the negro labor now emigrating.

—THE latest fashion in Vienna is the so-called "Boccachio" stockings—*i. e.*, a white-silk stocking on the left leg, and a pink one on the right. The idea was taken from the charming costume which Fräulein Lind wore in the last act of Suppé's new opera.

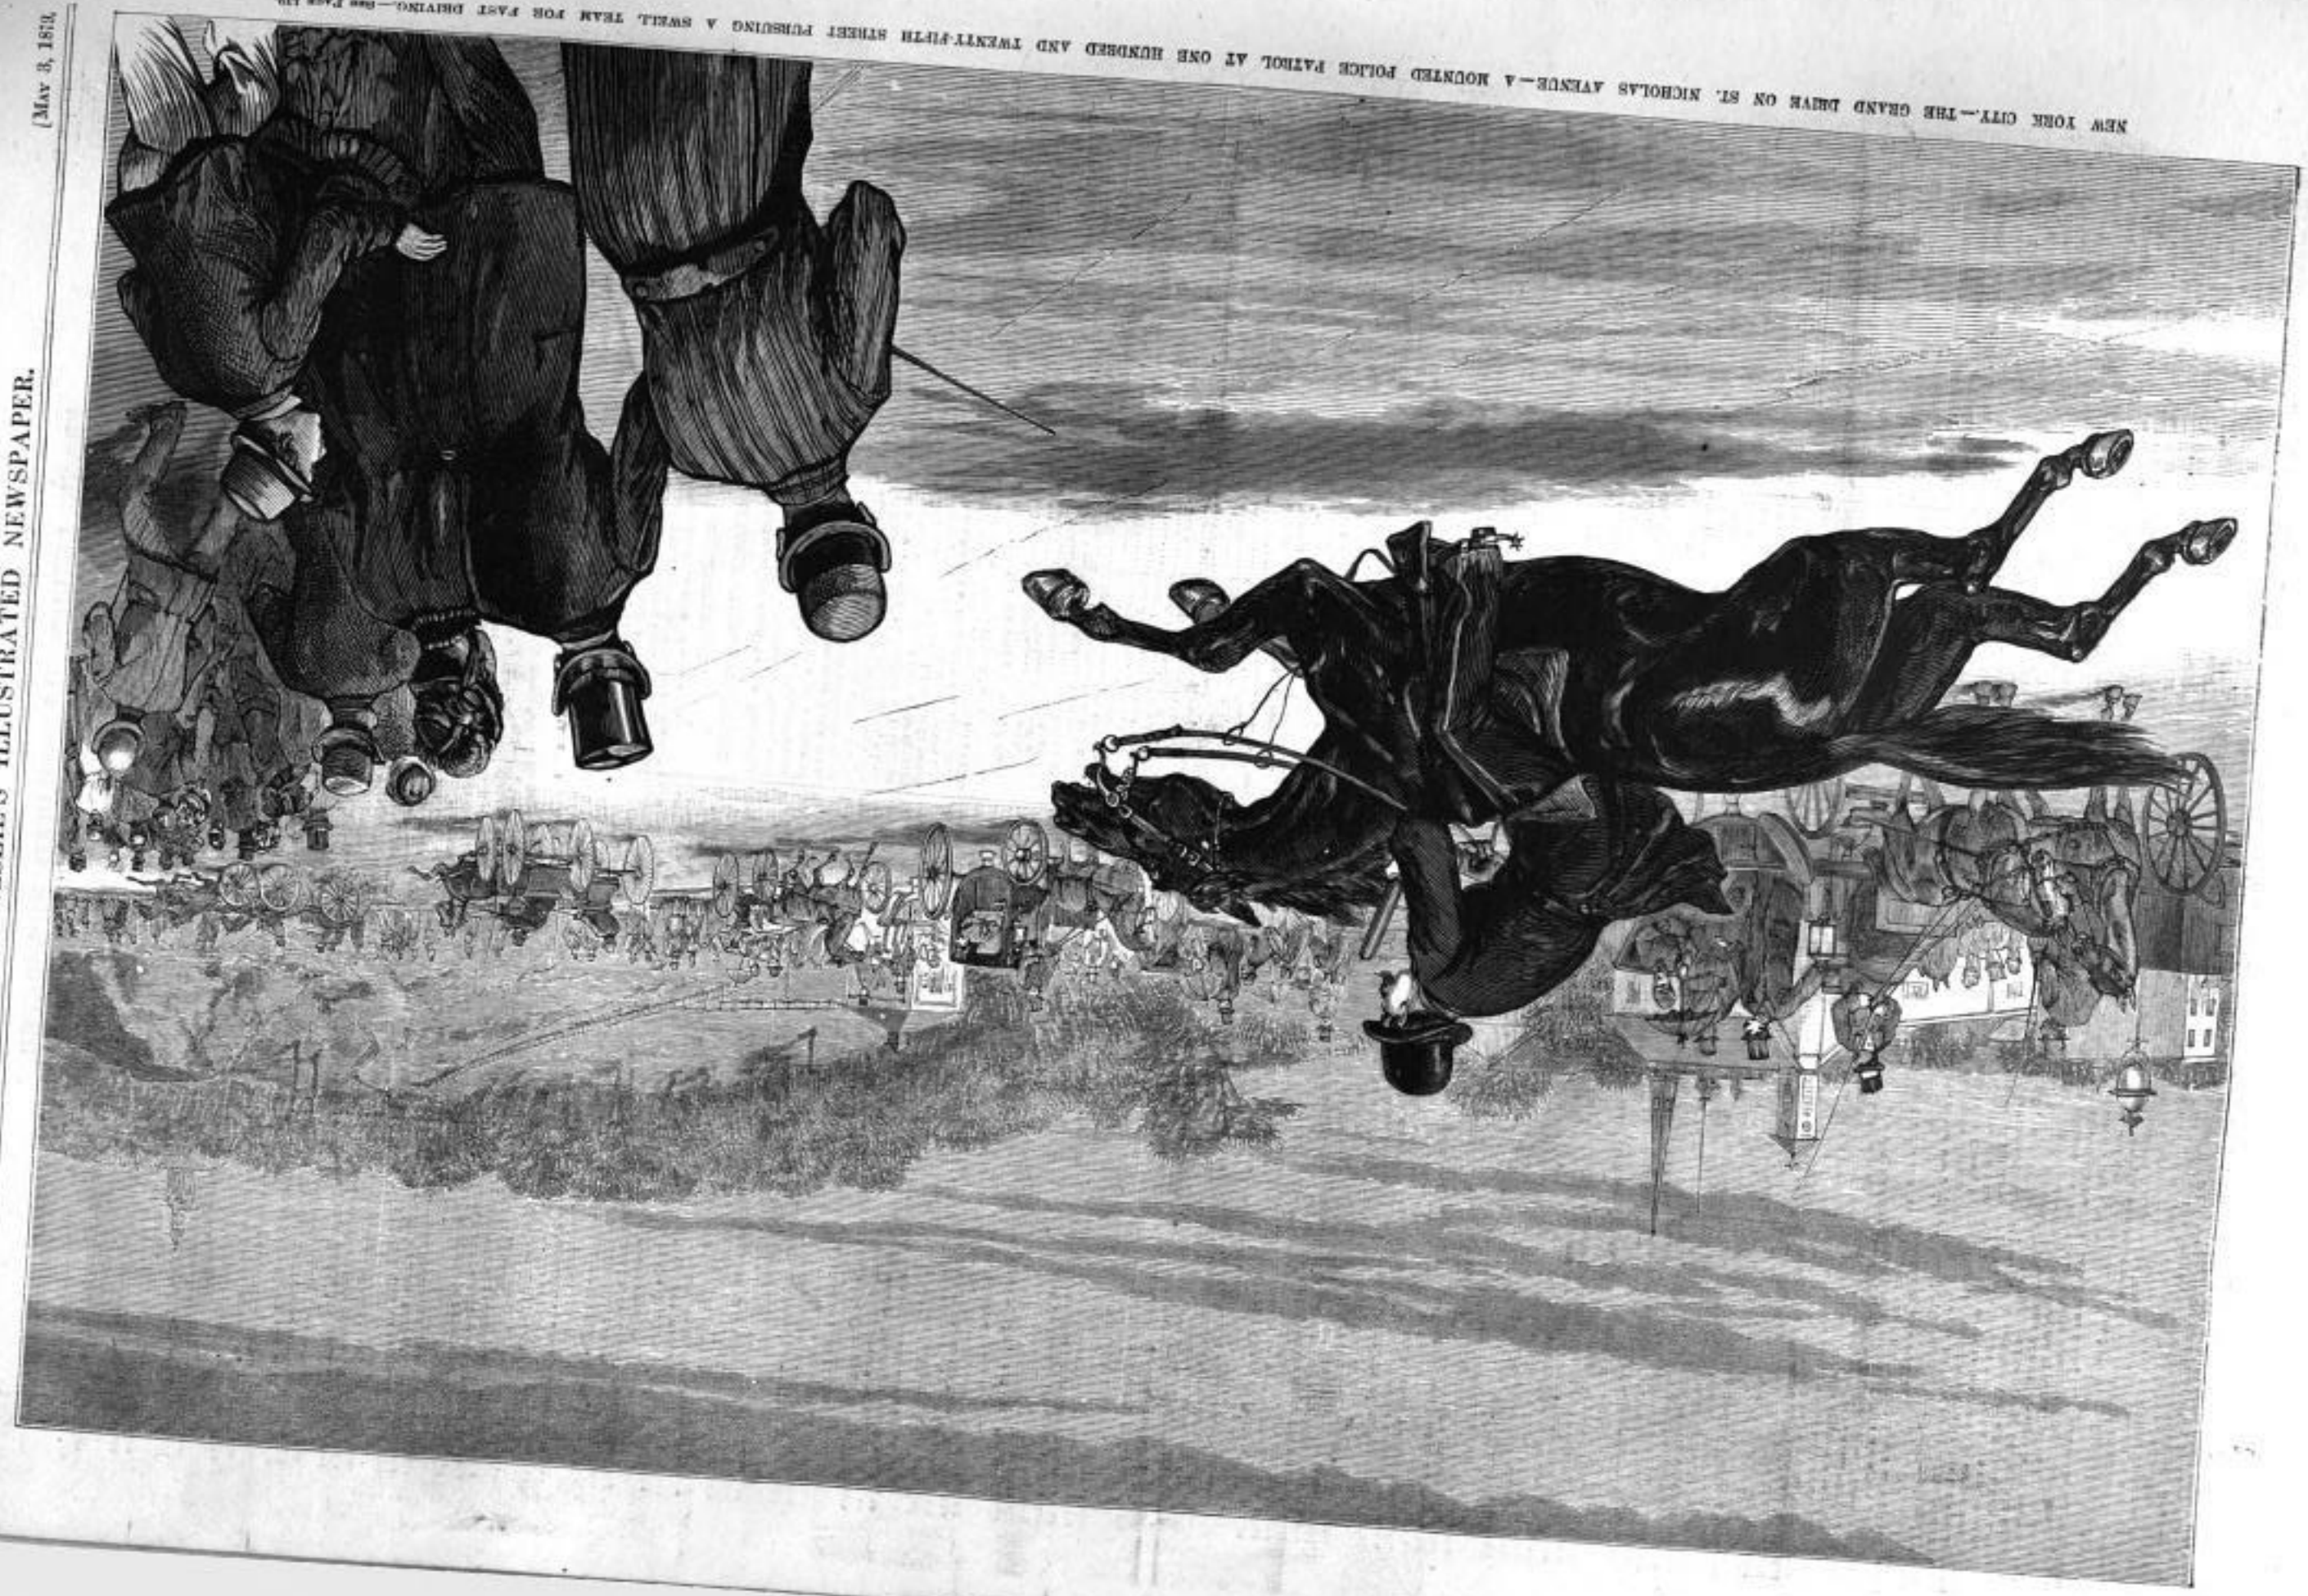
—JOHN BROWN, JR., son of Ossawattamie Brown, publishes a letter in which he declares his intention of volunteering his services to aid the suffering colored refugees of the South. He states that in his opinion the time has come for another grand rescue of the colored race, and, although he is fifty-eight years old, he is ready to devote his remaining energies to the cause which was so dear to his father.

—LONDON has more Roman Catholics than Rome, more Jews than all Palestine, more Irish than Belfast, more Scotch than Aberdeen, more Welsh than Cardiff; its beer and gin shops, placed one after another in a line, would reach sixty-two miles, and one entire quarter of the city is inhabited by three hundred thousand of the most miserable wretches and worst thieves to be found on earth.

—THE Supreme Court of South Carolina has ordered a mandamus to issue compelling the State Treasurer to pay out of the funds now in the treasury the interest for 1879 on the recognized public debt of South Carolina. The payment has been hitherto withheld in obedience to an injunction obtained in the United States Court by holders of unrecognized bonds, the status of which is still in litigation.

—A YOUNG American of nineteen, at Christ Church, Oxford, passing the second examination there a few days ago with much credit, was publicly complimented therefor by the Dean. He also won the "Oxford University champion foils," never before won by an American. There were twelve contestants. The young man is named Edwards Pierrepont, and is the son of the late American Minister to England.

—THERE are in Milan, Italy, some hundred and fifty English and Americans of both sexes studying music and endeavoring to get fitted for the operatic career. Two or three years ago there were nearly two hundred Americans, mostly young ladies, studying in the stately Lombard capital; but for various reasons this number is reduced at the present time, or was during the Winter, to only seventy or eighty.



—THE Connecticut fire insurance companies' increase in gross assets for 1878 is $605,045, in surplus as regards policy-holders, $668,846, and in surplus over all liabilities, $408,847. The total gross assets of the State companies are $17,654,915; surplus as regards policy-holders, $12,702,598; liabilities, including capital, $13,153,316; surplus over all liabilities, $4,401,598. Most of the Hartford companies did a better business last year than in 1877.

—AN organization, called the St. Dominic Colonization Society of the City of New York, has been formed for the purchase of lands in Kansas, to be sold at cost price to members actually settling there. They propose erecting a large colony building on the tract, for use until families are able to provide separate shelter. They also will loan money to colonists when embarrassed through sickness or failure of crops. The whole movement is in the interest of Irish laborers, under the guidance of the Catholic Church, and is supposed to be backed by Irish capitalists.

—THE Governor-General of Canada and Princess Louise will stay for three weeks in Quebec after leaving Montreal. Lord Lorne's father, the Duke of Argyll, is expected to arrive in Quebec the second week in June for a four months' visit to his son and royal daughter-in-law. A week later they will greet Rear-Admiral His Royal Highness the Duke of Edinburgh at Halifax, who is to succeed Admiral Inglefield in the command of the North American squadron. From Halifax the party, accompanied by a number of English notables, will proceed on a salmon fishing-expedition to the Saguenay River.

—PLANS have been submitted to Sir John Macdonald, the Canadian Premier, and the Minister of Public Works, for the construction of a bridge across the Detroit River, at a point above Windsor on the Canadian side, where Belle Isle divides the river into two channels. The bridge will extend from Hamtramck on the Michigan shore to Belle Isle, and will have a draw of 300 feet; and from the island it will extend to Walkerville on the Canadian shore, a distance of 2,500 feet. The bridge will place the Grand Trunk Railway in communication with Windsor, and give Canada an uninterrupted road to the West.

A MESSENGER ESCORTING CHILDREN TO SCHOOL.

"CALL ME IN THE MORNING, EARLY."

THE DISTRICT TELEGRAPH SYSTEM.

THE CURIOUS USES TO WHICH MESSENGER BOYS ARE PUT.

OUR modern life and customs tend more and more in the direction of economy—not so much in the mere matter of money as in what represents money's worth—time and exertion. To accomplish desired results with absolute certainty, with as much rapidity and with as little personal labor as possible, is becoming the great desideratum in the thousand and one departments of everyday existence. It is on a knowledge of this fact that the District Telegraph system, as it is called, is based.

This system, though of comparatively recent origin, has grown into proportions far beyond the original ideas of its projectors. There are now thirty-nine different District Telegraph companies in the United States, the principal and parent company being located in New York, and embracing the entire metropolis in its radius, from the Battery to the Harlem River, or 132d Street. The central office, or headquarters, of this company is on Broadway, corner of Fourth Street, and a visit to this building will give a vivid idea of the magnitude, yet minuteness, of the system. The headquarters, or central offices, occupy the whole of the second and third floors of the large building, and comprise some twenty or more rooms, large and small, which are devoted to separate, and sometimes peculiar, purposes.

Boys are the instruments, the agents, the all in all, of the District Telegraph; and it is perhaps not the least of the commendable features of this institution that it gives useful and fairly paid work to hundreds of boys, who, without it, would probably be deprived of employment, and who, through its means, are trained in habits of industry, energy and obedience.

Among the features of the headquarters building are a printing office, where the various tickets used in the operations of the system are printed; a repair shop, where the telegraphic instruments are

kept in order; a tailor shop, where the uniforms worn by the messengers are preserved in their integrity, and a canvassing room, where the theatre ticket and seats for the opera department are carried on. This branch of the District Telegraph transactions is becoming quite a feature. From this canvassing room a telephone is connected with the box office of the Academy of Music, so that an operator at his desk in Fourth Street can communicate directly with the operatic ticket-seller in Irving Place.

Then there is a supply room, an odd sort of curiosity shop, in which all the miscellaneous articles used in the District Telegraph operations are kept on hand in considerable quantities. In this apartment, messenger's boots, at $1.10 a pair, and messenger hats, at $8 a dozen, lie alongside of batteries and tickets; and all sorts of contrivances for recording and registering messages are displayed beside huge maps of the various districts of the metropolis, on which maps every District Telegraph instrument in the city is marked, the maps of the down-town districts, along Wall Street, presenting a series of lines crossing and recrossing so closely that only an expert can decipher the exact locality of any one particular instrument.

But the most interesting feature of the building is the large room known as the instruction or training room for boys. This is a schoolroom in which the boys who wish to become messengers are educated in the philosophy and practice of the craft. The room itself is large and airy, and presents the ordinary aspects of a schoolroom, with benches, books, pegs, an elevated desk for the instructor at one end, etc. Here the boys are designated not by name but by number, and the books are all of one kind, tariff books, time books, etc.,—books dealing only with street distances, allowances of time and rate of charges, which serve the would-be messenger-boy in lieu of geography, history, grammar and arithmetic.

From ten to eighty boys are daily instructed in this room—the roll being called at half-past eight in the morning. A boy who is five minutes late is detained after the termination of school hours at three o'clock.

At first the District Telegraph Company experienced difficulty in procuring its boys. Now its principal difficulty is to keep within reasonable limits the number of applicants. Every boy applying for a situation must give his name, address and state who and what his parents are. This statement is examined, and if found correct, and if his references for character are acceptable, he is then given what is called a "special" or transitory number, which designates him while in training-school. It was formerly the custom to send "the new boy" to accompany some regular messenger on his routine tour, but this practice is no longer followed. It is claimed by Mr. Taguer, the Superintendant of the Training School, that when a boy leaves his care he is fully qualified for any department of the messenger service, and needs not to be shown anything which properly comes under his duties. The boy is first taught the supreme importance of being on time. The value of time as a factor in transactions is known to no man living better than to the messenger boy. He must be on time or be off altogether. The boy is next instructed in the importance of obedience. Absolute, unquestioning, yet not unreasoning, obedience. He must obey implicitly, first, the general rules of the office, and second, the particular instructions of the party who requires his services. He is also taught the danger of delay and the necessity for all possible haste in the discharge of his messages. He must travel as fast as he can; he must get to and from a place as soon as possible; he must use his legs; he must also use his wits. He must be a machine, but he must not suffer his machinery to be utilized for evil purposes. He must keep his eyes and ears open. He must suspect where suspicion should be excited. He must know whether "everything is all right" or whether "something is wrong." He must know just when to invoke the aid of a policeman.

At the time of the writer's visit to the training-school a couple of bright lads, Nos. 945 and 913, were being "interviewed" in regard to certain portions of the District Telegraph catechism, for the benefit of some of the "new boys."

"What is the first thing you are to do when told by a subscriber or patron to go on a message for him?" asked the teacher of No. 948.

"I am to ask him three questions," was the boy's reply.

"What are these three questions?"

"'Am I to deliver the message to any one else if the party to whom it is addressed does not happen to be in?'—'Is there to be an answer?'—'If so, how long am I to wait?'"

"If you are stopped by any one or interfered with in the performance of your duty, what are you to do?"

"Call a policeman; or, if no policeman is at hand, do the best I can, but deliver my message as directed, at all events."

"What is the great principle which must guide you in all your messages?"

"To find the right person in the right place."

No. 948 evidently understood his business. Nor was 913 behind his companion.

"How would you find the right person in the right place," asked the teacher of No. 913, "in the business portion of the city, if there was any doubt?"

"I would consult the nearest directory."

"How would you find the right person in a hotel?"

"By going to the office and asking the clerk on duty."

"How in a store?"

"By asking the bookkeeper or floor walker, or some clerk who was on duty."

"How in a tenement-house?"

"By inquiring of a janitor, if there was one on the first floor; if not, I would look for the party on all the floors."

"Suppose a gentleman was to deliver you his carpet bag, with instructions to meet him at the Grand Central Depot at a certain time, what would you do?"

"I would take care of the carpet-bag, would be at the depot precisely on time, and give the gentleman his carpet-bag."

"Suppose some other party were to ask you to deliver to him the bag?"

"I would refuse."

"If the other party persisted in this demand?"

"I would call the aid of a policeman on duty, or any one of the officials."

"But suppose a party were to come to you and show you a note which he says is from the gentleman who gave you the bag, requesting you to deliver the bag to him?"

"I would refuse to give him the bag."

"But supposing the note was really from the gentleman—what would you do then?"

"Still I would refuse to give up the carpet bag, unless the gentleman who gave me the bag had told me at first that he might send a note for the bag, and had given me a specimen of his handwriting."

"If you are sent with a letter to a lady, would you give the letter to any other person, who claimed to be a relative, etc.?"

"No, sir, unless I had been told so; otherwise, if the party was not in, I would bring the letter back."

"Do parties to whom messages are addressed ever refuse to sign the receipt?"

"Yes, sir."

"What do you do then?"

"I ask them respectfully to sign, because it is one of the rules of the office, and I tell them that if I were to deliver a message without getting a receipt for it, I would be punished."

"Then, if they still refuse to sign it?"

"I would refuse to deliver the message, and would take it back to the office. No signature, no delivery."

"Suppose the party to whom a message or package is delivered cannot write?"

"Then I would see that he made his mark, and that somebody, if possible, witnessed his making it."

"If you are delayed in getting an answer, what would you do?"

"I would tell the party delaying me the rules of the office, charge according to the time tariff for my delay, get a voucher from the party who delayed me, and collect when I delivered the answer."

"If the party addressed don't live where he is addressed, what do you do?"

"If I think there may be a mistake in the exact number, I ring four door-bells each side of the house addressed, and also inquire on the opposite side of the street."

Boy No. 948 was once more catechized.

"Suppose you were sent to deliver unaddressed circulars, what would you do?"

"I would put the circulars under the front door, push them under as far as they would go, ring the bell, and then run down the steps, and do the same way with the next house."

"How would you deliver circulars at tenement-houses?"

"I would deliver them on all the floors—to all the people I met in the halls—and I would knock at every door and hand a circular to the person answering the knock."

"How would you deliver circulars in a hotel or depot?"

"I would ask permission at the desk of the clerk, or anybody in charge, to deliver the circulars."

"If permission was refused?"

"Then I would stand by the door or entrance, and distribute my circulars to parties passing in or out."

"If you ran short of circulars, would you borrow any from another messenger?"

"No, I would not. It would be against the rules. I would return to the office and ask for more."

"If you had more circulars than were needed, would you throw them away, or hand them round indiscriminately?"

"No, sir. I would bring them back to the office and account for them. There is a punishment for wasting or destroying circulars."

So there is, under what is called "malicious mischief act;" and the boy knew all about that "act." In fact, the two boys evidently knew all about their business, and were looked upon by the rest of the boys in training with mingled awe and admiration.

A third boy, who was even further advanced in the mysteries of his craft than those just examined, was then asked by the teacher:

"What he would do in case he had to deliver stock certificates or certified checks to a certain broker or banker with whose precise business address on the street he was unacquainted?"

"Why, I would run as fast as I could to one of the two regular boys on the street, and ask him where to go, and then as soon as he told me, I would go where I was told."

"Where are these regular boys on the street stationed?"

"One boy is stationed at the corner of Broad Street and Exchange Place, the other at the corner of Wall Street and Broad."

"What is the duty of these regular boys on the street?"

"They know by being down there all the time where every banker and broker does business, and so they are able to tell all the other messengers who want to know."

This boy was also thoroughly posted about the different kinds of tickets used in the system. The red ticket for cash, the white and yellow ticket for burglar and fire-alarm, the white or subscriber's ticket, the extra ticket to non subscribers in offices, the reporter's ticket, the green or deadhead ticket, etc. He was also familiar with all kinds of "free service," as it is called, in which subscribers are charged nothing by the company, the remuneration being obtained from the express company, or stable or telegraph office patronized.

As soon as the boy passes his examination satisfactorily in the training-school, he is given a new number on the regular force, is furnished also a hat, a uniform, and a pair of boots, rubber overalls, etc.

A record is then opened for him on the books of the company, and whenever he violates the rules or misbehaves, his misdeeds are written in this record. A system of marks is maintained to denote his average conduct, ranging from 1 (the best) to 13 or so (bad); he is fined for misconduct (either in money or overtime), and, finally, if incorrigible, he is dismissed.

As a class, the District Telegraph messengers are model boys. Toiling ten hours a day, and earning from $3 to $7 a week, they manage to be very useful, support themselves, and generally help to support others. Medals are given to the best boys in the District Telegraph service.

A gold medal was awarded to William Rooney, who, by his shrewdness, caused the ultimate capture of two noted forgers. He was but sixteen years of age, but evinced qualities which would have done credit to a man of forty. A silver medal was also awarded to E. T. Donelly for brave conduct.

It is a fact that may be mentioned in passing, that rainy days are the harvests of the District Telegraph. A wet week will increase the average receipts of the business $500. It is also a fact that the vast majority of messages sent are for short distances and for small charges—ten and fifteen cents. When great trouble or considerable time is to be taken, people seem to prefer taking it for themselves; but "the little bothers" of life seem to be delegated in the metropolis to the District Telegraph.

On particular occasions messenger-boys can be "massed" into any particular locality. In a Wall Street panic hundreds of boys, say five from each office in the city, can be thrown into the street in five minutes by "unloading" from the office nearest Wall Street, then from the next nearest office, and so on.

Many curious uses have been found in the course of years for the messenger-boys. They are used as a species of two-legged express. On and about Thanksgiving Eve hundreds of messenger boys are seen carrying a turkey or turkeys. On Christmas Eve they carry boxes and gifts—young and prosaic editions of Santa Claus. On New Year's Day they are deputed to pay their patrons calls by proxy, and leave their cards at houses where they do not choose to call in person.

Messenger boys are also in demand now to escort young children, especially young girls, to school, and to escort them home again. They are even employed to watch babies and their nurses, and to notify a policeman if any stranger approaches them.

Patrolmen in the employ of the District Telegraph Company are of late years put to a peculiar use. The more gentlemanly of the force are often sent for to escort maiden ladies and elderly ladies to the opera or theatre. In these cases the men are furnished with white gloves and even dress coats, if desired and paid for. One evening recently there were eight ladies at six different theatres, including Booth's during the Kellogg opera season, whose escorts were furnished "to order." Men, as well as women, employ escorts for various purposes. Many, in fact most of the men, too, who require the services of the messengers are strangers, who wish for guides to show them the "sights."

Cases are not unknown where a messenger has been summoned and sent in search of a missing husband, who was supposed to be at one or his favorite haunts. It is related that in one instance a messenger started out with a complete list of the places in which the truant was likely to be found, and at last discovered him. But he was unable to persuade him to come home, and so reported. It is not an uncommon thing for a messenger to be sent home with an intoxicated person. In one instance of this kind, recently, a man was labeled and sent home, and when the messenger gave him up he obtained a receipt for "one drunken man." The important application of the District Telegraph Company to the prevention of burglaries and fires can only be hinted at in the compass of this article. These departments embrace a wide-spreading system of night and day-patrols intrusted to competent men who watch and are in their turn watched, and whose movements are recorded and guarded by electric communication. An illustration of a night-patrol sending in a signal will give a general idea of the system.

A COLORADO EXPERIENCE.

ONE tempest-tossed night, weather bound at a small hotel on the stage-route from Santa Fé, we met a fellow-traveler in whom we became greatly interested. The howling gale and elemental uproar intensified the cozy cheer of our snug little parlor. The genial warmth from the heaped-up ruddy coals in the grate and spicy exhalations steaming from an earthen mug brewing in front, out of which, from time to time, we replenished our glasses, stimulated conversation, and we were soon launched upon a stream of startling adventure.

Among others, my companion, a finely-built, athletic fellow, narrated an experience of the previous season, which, he said "made every hair stand on tip-toe."

"How?" we asked. "You were in great peril?"

"One of those imminent risks that meet you at every turn. Four of us came in the stage from Santa Fé, the last of June, I think. A young lady—governess in an officer's family—her escort, a wealthy merchant, reputable, with a guarantee of honor inscribed on every line of his earnest face, and myself, were acquaintances; the other was the horseshoer of the company, bound for the stables at Denver.

"The lady—among the twenties—was so happy in the thought of going East and seeing her widowed mother—was so interested and full of life, that her joy rippled through our conversation like a merry warble.

"You'd like a personal description?

"Well, rather tall and willowy, eyes as black and full of sparkle as a frosty night, and hair commonly called *red*, but with a glint of gold in lines and dashes wherever the sunlight glanced across it. I saw it fully when she dropped her hat, and a stylish, neat affair *that* was, too—but I have not come to *that* yet.

"I'm sure you're aware of the brigandage for which that route is noted. Marvelous tales are told of the robbers. I suspect the mountain-passes of the Apennines hold no more mystery of crime than do the rocky passes of this fresh continent. Constantly facing danger, the pioneer acquires a hardihood that fits him for every fresh encounter of peril, however unusual. The periodic robbing of stages has become so much of a fact that the express company will take no more risks, and specie and treasure have to be taken East by private parties.

"As a Government expert, I was well known to the bankers of Santa Fé. They never hesitated to intrust me with large amounts of gold, and this time was no exception. So I was loaded, partly by means of an inner belt around my waist, partly by a false bottom, improvised in my valise by gumming strong wrapping paper over the precious parcels and inner lining of the bag.

"The day would have been intolerable but for the cool currents that swept down the declivities, and through the mountain ravines. Frequently during the day, up the steep ascents, we would get out and walk. It rested us and relieved the tedium of the drive. The lady was most charming, rattling her words like fine shot against our sallies of wit and wisdom, and turning into sport and jest our serious fears. She became confidential, and told us 'she expected to return a *widow*, with a military escort—if she returned at all. Her *fiancé* was a lieutenant, stationed now in the Indian Territory; but when he received his furlough—well, very soon, perhaps—then we might expect to hear of wedding bells.'

"'I would like to be a little richer,' she added, with a sigh, 'but we must take what the good God gives us, and my treasure happens to be not in gold.'

"'How much of a *do* have you?' said the practical merchant.

"She laughed merrily. 'Are you a bandit in disguise?' then added, 'the fruits of my industry amount to the heavy weight of one thousand in gold!'

"'You haven't it with you?' he inquired, so quickly and earnestly that I was surprised.

"'Come, you are accounted shrewd, just try and find out! I will answer all relevant questioning.'

"He blushed and stammered an apology, and she sat for a moment on a rock that projected from the side of the road over the mountain edge. She had gathered stray flowers on her walk, diving under bushes and behind rocks, and was fastening them on her hat and mantle. A scarlet creeper ran round the base of the rock down the side of the mountain.

"'Oh, that suits me, I must have it,' she said, rising to her feet, and dropping hat and flowers in the excitement. Just then a sudden eddy of wind came twisting round the corner of a fissure, and whirled hat and flowers round and round, lodging them beyond her power of recovery, on a narrow ledge of perpendicular rock, jutting out and inaccessible from the road.

"'How, now, what will you do?' I said, half in sport at the possibility of a bareheaded companion for the rest of the trip.

"To my surprise, she looked the image of despair and grief; the color had faded out of her rosy cheeks, even her lips were ashy and pale. Her hands were clasped in the most agonizing expression, as she mutely gazed at the slender shape below, mocking her with its airy grace of blooms.

"'Oh, my friends! can't you recover that hat for me? Do, in pity, and I will thank you to my dying day!'

"No mother, appealing for a lost child, could have been more piteous, while tears stood in her eyes. I was half angry that any woman could be so metamorphosed by the loss of a hat. The merchant whistled, looked bewildered, but evidently didn't choose to risk his life. The driver and horseshoer came to her rescue; they fastened a hook on to the end of a coil of rope, saying:

"'Don't fear miss, nor look so anxious; we'll rig something an' get yer hat!'

"The driver, stretched at full length, with only his head and an arm over the precipice, and anchored firmly by the rest of the party, threw his rope, harpoon fashion, with an unerring aim. It caught in the rim, the hat was drawn up carefully and restored to the young girl, who, with exhilarating color and sparkling eyes, thanked the men most profusely. They cut short her rhapsodies by jumping on the driver's box and telling us to 'pile in.'

"Once inside, she said:

"'As you are all my friends, I must let you into the secret of my hat. All the money I possess is hidden in the lining—quilted in—and no man, not even a *highwayman*, would ever suspect the treasure hidden in *such* a cell, now would they?'

"We, of course, praised her ingenuity.

"'A good thousand, is it?' said the merchant.

"'The very sum,' she replied.

* * * * * *

"It was about two o'clock in the morning. We were well out of the most formidable passes, driving briskly towards the Canadian fork. The full moon lightened our way, making the bushes and trees adjacent cast sharp, decided shadows across the road. I had exchanged places with the horseshoer. Inside they were dozing, but I was wakeful and alert. We beguiled the dreary hour by story-telling. Suddenly, I saw something moving in the shadow of the road on beyond us.

"'What is that?' I said.

"The driver looked, his eyes rounding like the moon.

"'Nothing but a *burro!*' referring to the pack mules that frequently strayed down the the mountain-side. It disappeared quickly in the shade, and from thence, instantly, as if by magic, jumped out into the road *two men*. They were hidden in huge slouched *sombreros* and army cloaks. The stoutest caught the bridle of leaders; the other, covering us with his rifle, shouted:

"'Don't stir, or you are dead men!'

"Advancing closer, and keeping us within the range of his muzzle, he cried out:

"'Pitch out the treasure box, quick! We are in a hurry!'

"The driver began to stammer a reply, shaking as if he had an ague-stroke, but I hushed him with a whispered:

"'Stop, stop! let me talk to these men! There is no treasure aboard to-night!' I said this coolly, at the same time swaying my body to and fro, backwards and forwards, to get out of the range of the muzzle; the man was evidently very nervous, as well as very near.

As I intended he should, he took me for an express-messenger, and, as neither driver nor messenger are supposed to possess any valuables, they are seldom molested.

"'None of your nonsense!' replied the bandit. 'Hand out the treasure, or you'll see trouble.'

"The man at the reins evidently enjoyed my endeavor to get out of range, for he squeaked in a high, falsetto voice:

"'Do them bar'ls look big?'

"'Yes,' I said, echoing the old joke current among the miners. 'Yes, I can read all the advertisements on the waddling.'

"He chuckled a rough chuckle.

"'Come, come, heave out that specie-box,' shouted the man holding the rifle.

"I insisted there was none.

"'Here, look at the way-bill; if there is any such thing aboard it will be among the items,' and I made a move to get down, holding it in my hand.

"'Stay where you are, or I'll shoot you on the spot!'

"I threw him the way bill. He dropped his rifle and picked it up, perusing the items in the moonlight. Profiting by this action, I undertook to slip my portmonnaie into my boot, and moved my hand round to get at the pocket. The driver misunderstanding the movement, whispered:

"'Have you got one?' The man at the reins noticed the conferring, and hallooed at us. The other instantly raised his gun:

"'None of that! Hands up!'

Digitized by Google

"We threw up our hands, and he again turned to the way bill. I did manage, though, to secrete my money, slipping it into my boot.

"'You see there's no mention made of the treasure, and if it was sent it would be noted on the bill. However, you can get up and look in the box and satisfy yourself.'

"He hesitated but a moment, and then jumped up and looked in the box; in doing so he kicked my valise.

"'Open this!' said he. I did so, taking out carefully its contents and letting him look inside; the wrapping paper deceived him.

"'No,' he cried, 'there's no treasure on this stage, but we've sworn to have a hundred dollars to-night, and if we can't find it in the treasure-box, we may find it in the baggage. Who's inside?'

"'Two men and a lady. None of them rich; one is the horseshoer, going to Denver to shoe the company's horses.'

"'We'll look out for 'em. Whatever happens, don't stir, on your peril. We may find the money on them, or in the baggage.'

"I felt terribly for the young girl. The perspiration stood in great beads of agony all over my body.

"It was evident they were sleeping. The man rattled the door and roused them. Presenting his gun, he ordered them out to be searched. They obeyed, half asleep. He placed them in a row. 'Hands up!' he said. 'Now for your pockets!' The horseshoer had but two dollars in silver, the merchant's portemonnaie showed but a five, and the young lady's nothing but her papers and a little change. The girl, I was sure, looked as if she would swoon.

"'You're a mean crowd, to have so little with you,' said he, 'and I've a mind to send you to heaven this very night. A hundred dollars we must have, so we'll go for your baggage.' This was uttered with infinite disgust.

"The merchant then spoke. 'You'll find nothing of account in our baggage, but if you will ask this young lady for *her hat*, and carefully rip out the lining, you will find something worth your pains.'

"The girl turned toward him with blazing eyes, and uttered but the one word:

"'*Traitor!*'

"There was no escape; the hat was secured. After the lining was very carefully ripped out it was returned with thanks.

"'In luck, in luck!' said the highwayman. 'Jump in, all. I'm sorry for your loss, miss, but we are bound to take whatever is sent us. We have no treasure, but this will do. Drive on!'

"'I want the way-bill!' I said excitedly, for the scene we had just witnessed had increased my indignation to a fever-heat.

"He handed it to me, but it fluttered under the horses' feet, and again I demanded it. Mechanically he picked it up, mounted the wheel, and handed it to me. Then, touching his hat to the lady, said:

"'But for *this lining* you might have been lying in yonder ditch. No treasure on board! Come this way next time without it, and we'll finish *your* accounts. Drive on!'

"We gladly followed this advice, but could not find language vigorous enough to express our contempt for the meanness of the merchant. The driver swore at him in Spanish, and the young lady answered all attempts at consolation with hysterical sobs. The merchant alone preserved his cool equanimity of temper.

"Arriving at Denver, he begged very earnestly of the young lady, with me as her friend, to grant him a few moments for explanation, in a private parlor. He was so in earnest that the young girl yielded a reluctant consent.

"He closed the door and bolted it, which looked strangely.

"'Don't fear,' he said, as I fumbled for my revolver. Sitting in a chair, he pulled off his boot, and, from the toe, pulled out a roll of greenbacks. Said he, 'A few days before leaving, I was lucky enough to find an opportunity to exchange my doubloons for these. My poor child, let me make restitution. Here are two thousand in bills for the one thousand secured by the robbers'—handing her that amount—'your lining was a Godsend to me; if they had searched me further they would have secured twenty instead of one thousand. Concealed in my baggage are diamonds and precious stones, which, if they had secured, would have beggared me.' Taking a solitaire from his vest-lining, he presented that also for her acceptance. 'I should have explained in the stage, but "walls have ears," and why should I trust the others with my secrets?'

"Of course, as it turned out, I was highly pleased at the sagacity of the gentleman; the more so as I recollected the responsibility of specie I, too, had assumed.

"I need not tell you, that the lady's tears were transmuted into rare smiles, and she was sent to her home rejoicing."

FAST DRIVING ON A FASHIONABLE AVENUE.

ON the afternoon of a fine Sunday in the Spring or in the Fall, the sidewalks of the Boulevards are crowded by gaping sightseers. What do they come to see? Why are necks craned as at a racecourse? Why are excited exclamations heard upon all sides? New Yorkers of sporting proclivities turn out to have a look at the teams—and such teams! Horses, thoroughbred as Bucephalus, fleet as the wind, with coats of satin, and limbs delicate as those of the gazelle; the vehicles with wheels of gossamer, and bodies consisting chiefly of a cushion, or a shell. Characters well-known in the horsey world—and is it not growing space?—come dashingly to the front, and, as at the Olympian games, each puts his coursers to the uttermost limits of their mettle in a fierce spurt on the few hundred yards allotted to fast driving. Here Greek meets Greek; here comes the tug of war. But it often happens that when Greek meets Greek, so eager are both for the fray, so resolved are they that neither shall "collar" the other that, before arriving at the allotted trotting-ground, they burst into contest, to the imminent danger of the lives and limbs of the owners of less ambitious teams going "easy four miles" in the same direction. To prevent a practice so fraught with peril, mounted police are stationed at, or near, the boundary line, whose duty it is to see that no racing takes place until the Rubicon is passed. Our illustration represents an officer in frantic pursuit of a couple of delinquents who have broken bounds. Don't he wish he may catch them?

THE "BLACK CROOK" AT NIBLO'S.

AN Arabian Nights' Entertainment—an *ensemble* of gorgeous coloring, outvieing in sheen and splendor the glow of an Arctic sunset! A *mise en scène* worthy of the Chatelet. Costumes only to be seen in Fairyland; a dream of fair women; a vision of handsome men; music, now breathing "upon a bank of violets," now *chic*, and full of that wild abandon which Jacques Offenbach loves so well; dancing, from the dreamy motions of wavelets, to the mad whirl of La Vie Parisienne, with ballets recalling the glories of Lotier and Taglioni—in a word, a spectacle such as an artist alone could conceive, such as only a bullion-laden speculator would dare to produce. Of such is the "Black Crook," whose revival is nightly drawing thousands to Niblo's Garden. To the Kiralfy Brothers is due the triumph of producing the "Black Crook" in a manner worthy of Paris, Vienna or Naples. The vast resources of this splendid theatre have been taxed to their uttermost limits, and from the Stalactite Cave to the grand Ballet of Demons, every detail is as complete as the mounting of a comedy at the Français. From the rising of the curtain to its fall the eye is voluptuously banqueted upon glorious combinations of color. Scene follows scene, tableau follows tableau, and ballet follows ballet in bewildering succession, each outshining its predecessor in *bizarre* or gorgeous effect. The Palace of Lace is a triumph of art; the Illuminated Terrace another superb *ensemble*; while the Demon Combat and the Grand March of Amazons, 160 people being on the stage in the one scene, extract rapturous expressions of approval. The ballets are exquisitely put on, that of All Nations being charmingly conceived with regard to general effect. Such dancing as that of Mesdemoiselles de Rosa and Paglieri is seldom to be witnessed outside of Vienna or Naples. Their "steps are of light," their "home is the air," and above all, they possess that graceful elegance of movement, the veritable poetry of motion.

To place the "Black Crook" upon the stage at Niblo's has cost the Kiralfy Brothers the sum of $55,000, but as they are well aware that the public will pay for the best of everything, they have wisely resolved upon providing the best. Their menu is so rich, so delicate, and so varied, as to suit the most exhausted palate, while high art exhausts itself in wondrous and harmonious conceptions. A synopsis of the scenes and incidents in the "Black Crook" will afford but a meagre idea of the strength of the piece. In the first act we have the village, with its village festive dance and its bright chorus; a pass in the Hartz Mountains; the laboratory of the *Crook;* a wild path in the terrible Brocken, with its cascade of real water; a demon fight; a walking skeleton—a marvel of mechanism; the incantation scene and a grand tableau infernale. In the second act, in addition to other scenes, appears the Grotto of Stalacta, reminding one of the mysterious halls in the now celebrated Luray Cave. The great Demon Ballet, the music by Jacques Offenbach, is thoroughly Dantesque, and may be thus technically described: 1. Entrée Diablotins, by ladies of the ballet. 2. Entrée Diablotins, by coryphées. 3. Les Salamandres, by danseuses secondas. 4. Grand Entrée by the premières danseuses absolutes. 5. Grand Adadie. 6. Entermede Brillante, by coryphées. 7. Variations d'Art, by the premières. 8. Finale Ensemble Infernale, by the entire corps de ballet. The third act opens with the Palace of Lace, designed and modeled by Fromont of Paris. In connection with the superb tableau of a bridal festival we have dancers, equilibrists, acrobats and minstrels. And then the Ballet of All Nations designed by the Messrs. Kiralfy, consisting of Tartar, Italian and Austrian corps de ballet, with a Normandy, a British and South American dance, L'Amerique, by Mademoiselle de Rosa. In the grand *finale*, China, Japan and all nations are represented, while the ballet is enlivened by the performance of the Japanese combination in their eccentric pantomimical movements. One of the most attractive features of the entertainment, if not the most attractive, is the grand staircase of the Illuminated Terrace, designed by Irme Kiralfy, and painted by Mery. Anything to surpass the *mise en scène* it is scarcely possible to conceive, while the grand Manœuvre d'Amazon, by 120 ladies of the ballet, forms a fitting picture to so superb a frame. This scene we have selected for illustration, but its color-glories can only be realized by a visit to the theatre. The grand transformation concludes one of the most magnificent spectacles that has ever been presented to any public. In a few weeks an entire change of ballet takes place, with some other alterations, so that those who would enjoy a story from the "Arabian Nights," as told by the Brothers Kiralfy, should lose no time in visiting Niblo's Garden.

The Equine Population of the Globe.

A RECENT number of Petermann's *Mittheilungen* contains information regarding the number of horses in the world. This is estimated at about 58,000,000, of which number the contingent of Russia is about 21,750,000; that of the United States, 9,504,000; the Argentine Republic, 4,000,000; Germany, 3,352,000; Canada, 2,264,000; Great Britain, 2,255,000; Hungary, 2,179,000; Austria, 1,367,000; Turkey, 1,100,000; France, nearly 3,000,000, etc.

What Slipper-throwing Means.

THE ancient custom of throwing an old slipper after the bride as she leaves her home is still in many places believed to bring luck to the happy couple. But it may be questioned, whether the old shoe was thrown for luck only. It is stated in Holy Writ that "the receiving of a shoe was an evidence and symbol of rejecting or resigning it." The latter is evinced in Deuteronomy, twenty-fifth chapter, where the ceremony of a widow rejecting her husband's brother in marriage is by loosing his shoe from off his foot. And in Ruth we are told that "it was the custom in Israel concerning changing, that a man plucked off his shoe and delivered it to his neighbor." Hence the throwing of a shoe after a bride was a symbol of renunciation of dominion and authority over her by her father or guardian, and the receipt of the shoe by the bridegroom, even if accidental, was an omen that the authority was transferred to him.

SCIENTIFIC INTELLIGENCE.

The Emperor of Germany has confirmed the election of Sir G. B. Airy as a foreign member of the Berlin Academy.

A Petroleum Spring, one boring of which has yielded 2,000 kilos in twenty-four hours, has been discovered at Pobar, in Austrian Poland.

Professor Edward Morse, of Tokio, announces that he has discovered undoubted evidences of the practice of cannibalism among the early inhabitants of Japan. These evidences he describes in a paper read at the Biological Society of the Tokio Dai Gaku.

Dr. Miclucho Maclay, the eminent Russian naturalist and New Guinea explorer, has been trying to rouse the Linnean Society of New South Wales and the scientific public of Sydney to the necessity of founding a zoological station, similar to that of Naples.

Russian Astronomers seem determined to outstrip their *confrères* in other countries in the matter of telescopes; we are informed that funds have been subscribed for the construction, for Pulkowa Observatory, of a refractor of thirty-two inches aperture.

In the Present Year the eighteen centuries will be complete which have elapsed since Pompeii, Herculaneum, and some neighboring cities were destroyed by a rain of ashes and torrents of lava from Mount Vesuvius. The directors of the excavations at Pompeii intend to commemorate the event in a scientific manner in November next, and have issued invitations to the most eminent Italian archæologists to participate in the celebration.

It is Stated in an Italian newspaper that the Duke of Genoa will shortly go on an exploring expedition, and will sail from Venice in the *Vettore Pisani*. The programme of the route is to be Port Said, Suez, Aden, Ceylon and Singapore, where a longer sojourn will be made. Afterwards the traveler will proceed to the Chinese and Japanese coasts; in 1880 he will visit Australia and direct his special attention to the exploration of New Guinea.

Chemical Treatment of Hemp.—Leisbure's method of removing the extractive and gummy matters from hemp and flax does away with rot-steeping, which is so noxious in flax-growing districts. The outer coating is removed by a machine. The flax is then subjected to a bath of soda, which dissolves the gum in a few hours without injury to the fibre. Flax or hemp thus treated is finer, stronger and more regular than that made from the same raw material by the putrefaction plan.

M. Ferry, the French Minister of Public Instruction, has presented a project for the reorganization of the Superior Council of Universities. According to the proposals of the minister, which are sure to be adopted by the Assembly, the bishops and other religious members are to be excluded, and the Council exclusively composed of persons belonging to the teaching profession. Moreover, it is proposed that all degrees be henceforth granted by the State, and only to those who have taken the curriculum of a recognized university.

A Scheme is on Foot to collect all the articles of value which the bed of the Tiber is supposed to contain. The golden candlesticks taken from the Temple of Jerusalem, and the gold and silver cups and ornaments which once decorated the palaces of Roman emperors, are imagined to lie beneath the Tiber's yellow mud. By means of drags it is thought all this buried wealth may be recovered and restored to form a national museum of extraordinary value. A committee of distinguished archæologists has been appointed to consider the best means of fishing up the legendary statues, coins, and other articles which for centuries have been covered by the sands of the Tiber.

The Swiss Meteorological Stations have adopted a system of weather warnings. All the territory of Switzerland will be divided for that purpose into eight regions, each of which will have its central station. The information on the state of weather in Europe, received at these stations, will be graphically represented on maps, and these maps will be exhibited between four and five P. M. at a central point of the town, under glass for public use. Besides there will be given a prognostic of weather for the following day; and this information will be sent to each commune and person who will pay monthly the sum of fifteen francs. This system is already introduced in Zurich and Berne, and the prognostics are correct in eight cases out of ten.

During Last Year the following journeys were made by Russian explorers in Central Asia: Generals Stolyetoff and Hangeroff were accompanied during their mission to Cabul by several topographers and explorers; M. Ochanin has made explorations in Korategin and Hissar; M. Maissoff in Badakshan and Eastern Afghanistan; M. Grodekoff in Western Afghanistan and Herat; M. Bykoff has explored the Amu-darya River from Kelaadan to Khiva; M. Yavarsky has traversed for the fourth time the region between Tashkend and Cabul; M. Mayeff has visited for the second time the hilly track between Karshi, Kelif (on Amu-darya), Kolaadan and Hissar; and, finally, the steamer *Samarcand* has navigated the Amu from Petro-Alexandrovsk to Khodja Sala.

A Remedy for Diphtheria.—An English surgeon, writing to the London *Times*, says that, having seen sulphur recommended in cases of diphtheria, he tried the remedy and found it to be remarkably efficacious. He mixed as much sulphur as he could with glycerine to a creamy consistence and directed that each child attacked should swallow slowly, according to age, a teaspoonful or more of the liquid three or four times a day; also that a little should be applied to the nostrils with a sponge. He states that he never lost a case when the remedy was used at the earliest stage of the infection. For infants he used the milk of sulphur and for older children and adults the stronger flowers of sulphur; and when it could not be swallowed, some of the powder was blown into the throat and nostrils through a quill.

The Manufacture of Grape Sugar Syrup.—Mr. S. H. Johnson, of London, digests the grain (rice, corn, etc.) in two per cent. muriatic acid, and then, in order to remove nitrogenous and bitter principles, washes thoroughly until there is no longer an acid reaction. The residue is again treated with one or two per cent. acid, the strength of the acid, the temperature and the time, being dependent upon the nature of the grain. The grain saturated with acid is digested under three to five atmospheres in steam in a bronze or enameled vessel, and thus converted into glucose, which with rice only requires five to fifteen minutes. The syrup thus obtained has none of the bitter taste peculiar to the glucose obtained in the usual way. It is neutralized and condensed in vacuo the same as ordinary glucose.

Prizes to Manufacturers.—The French Society for the Encouragement of Manufactures has offered the following prizes for the year 1879. An award of 2,000 francs will be made to any one who succeeds in manufacturing sulphuric acid free of arsenic from pyrites; one of 4,000 francs for the discovery of methods of forming useful organic substances such as quinine, cane sugar, etc., by chemical transformations. The manufacturer who shall discover a means of making cast iron or steel possessing special useful properties by the incorporation of a foreign metal, will receive 3,000 francs. Two prizes, one of 2,000 francs and one of 1,000 francs, are reserved for the industrial manufacture of fuming sulphuric acid; one of 1,000 francs for an economical motive power for small workshops; lastly 2,000 francs for improvements in photography.

PERSONAL GOSSIP.

ADELINA PATTI is said to be worth $3,000,000.

A MONUMENT to Calhoun is to be erected in Charleston, S. C.

EX-CONGRESSMAN KEIGHTLEY, of Michigan, has been nominated for Third Auditor of the Treasury.

THE Regents of the New York State University have conferred the degree of LL.D. on Thurlow Weed.

THE 136th anniversary of Thomas Jefferson's birthday was celebrated at Charlottesville, Va., April 14th, by a large procession.

GENERAL FRANCIS A. WALKER has taken the oath of office as Superintendent of the Census, and entered upon the preliminary work of the office.

MR. MARK TWAIN is busy writing a book in the Paris studio left to him by his friend Mr. Millet. The book, it is said, will be completed in about three months.

THE Bey of Tunis has opened an Arabic printing office, and the editor of the *Raid of Tunis*, the only newspaper printed in Tunis, has been made director of it.

THE little Grand Duke Michael Alexandrowitch, youngest child of the Czarowitz, has at four months old an allowance of $16,000 for his table and a household of fifteen persons.

REV. DR. DURYEA, late of Brooklyn, will receive a salary of $4,000 as pastor of the Boston church by which he was recently called, with the privilege of two months' vacation.

THE London *Queen* says that during the visit of Lord Lorne and his wife to New York in May they will reside in twelve rooms at the Windsor Hotel specially decorated for their reception.

DR. L. COLIN, of Val de Grace, France, has received the prize of $2,000, awarded to him by the medical faculty of Paris for his investigation regarding typhoid fever and pulmonary complaints.

CONGRESS has passed a joint resolution authorizing the printing of a portrait of the late Professor Joseph Henry, to accompany the memorial volume heretofore ordered, and appropriating five hundred dollars to defray the cost.

DR. ISAAC HAYS, editor of the *American Journal of Medical Science*, died in Philadelphia, April 13th aged eighty-three years. He had been the editor of the same journal for fifty-one years and was an author of several standard medical text-books.

THE death is announced of Dr. Lawrence Edmonstone, of Unst, the most northern of the Shetland Isles. The deceased gentleman, who was in his eighty-fourth year, did good work as a naturalist, and contributed a number of papers to the Wernerian Society. He also wrote a "History of Shetland."

PRINCE BISMARCK has a decidedly princely appetite. On one occasion, when he was recovering from an attack of indisposition, the Chancellor made part of his dinner on beer, champagne, turtle soup, boar's head and raspberry jelly. He can easily dispose of a dozen hard-boiled eggs at a sitting.

THE Grand Duke Nicholas Constantinovitch who a short time ago was expelled the Russian Army for marrying the daughter of the Policemaster at Orenburg against the wishes of the Emperor, has left the latter place for Central Asia. It is understood that occupation is to be found for him in surveying the proposed railway route from the Sea of Aral to Tashkend.

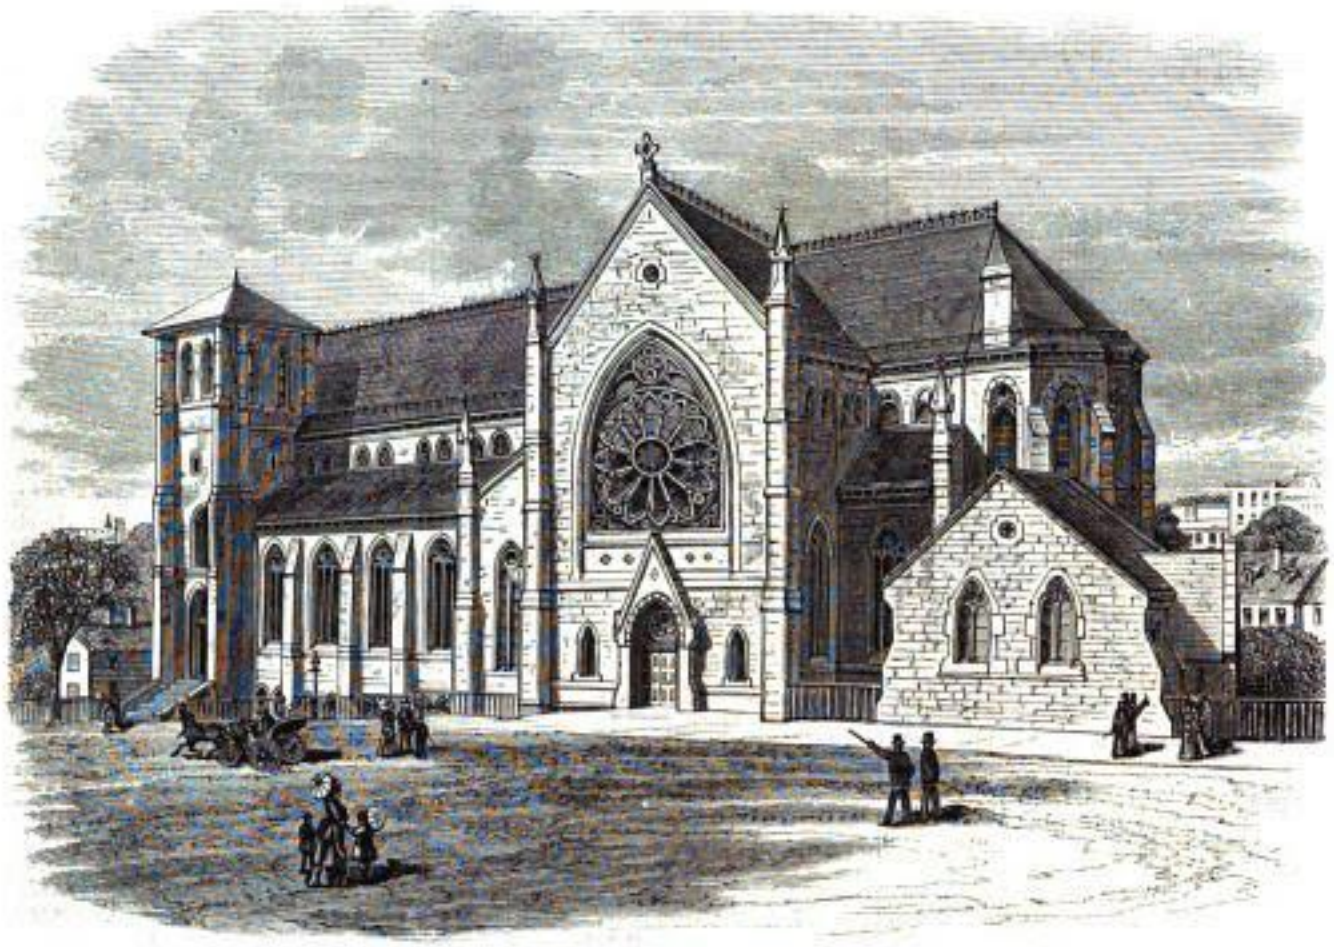
GENERAL GRANT had a taste of elephant-riding while in India. Mrs. Grant preferred to travel in a sedan-chair. The elephant ridden by one of the General's party had been sixty years in the royal stables. It is not long since there died at Calcutta the elephant which carried Warren Hastings, when Governor General of India—a century ago.

MISS MOSHER, of Chicago, one of the graduates of the Women's Hospital College, has been successful in winning, by competitive examination, a place as assistant physician to the County Insane Asylum. This is the first competitive success of a lady in securing a hospital position in this country where doctors of both sexes have met in competition.

QUEEN OLGA of Greece has been appointed by the Czar *chef* of the second equipage of the Baltic fleet, and she congratulates herself on commanding a detachment "so famous in the annals of Greece." The second equipage took a leading part in the battle of Navarino; and since its reorganization in 1863 has been under the honorary command of Prince Henry of the Netherlands, recently deceased.

SENATOR BRUCE, who has been appointed chairman of a special Senate committee to investigate the affairs of the defunct Freedmen's Bank, announces that he will begin his labors as soon as Congress adjourns, and will not stop till he finds out what has become of the missing millions. Thousands of defrauded colored men will naturally desire to see Senator Bruce make good his promises.

AT the centennial celebration of the City of Lexington, Ky., the other day, the venerable General Leslie Coombs appeared upon the stage. He referred to his extreme youth, and, supported by his huge walking-stick, six feet long, he spoke the well-known piece beginning:



"You'd scarce expect one of my age
To speak in public on the stage,"

amid roars of laughter.

THE Academy of Sciences in session at Washington, last week, elected Professor W. B. Rogers, of Boston, President of the Massachusetts Institute of Technology, President, to fill the vacancy caused by the death of Professor Henry. The other officers are: Professor O. C. Marsh, Vice-President; Professor J. H. C. Coffin, Home Secretary; Professor F. A. Barnard, Foreign Secretary; Mr. Fairman Rogers, Treasurer, and Professors Baird, Agassiz, Gibbs, Newcomb, Hall and General Meigs, the council.

ON the morning of April 14th, while the Emperor of Russia was taking his customary walk near the palace in St. Petersburg, a respectably dressed man, named Solovieff, wearing a military cap with a cockade, fired four shots at his Majesty's person, none of which, however, took effect. The assassin was promptly captured, but soon became insensible, having, it is supposed, taken poison. No papers were found upon him. Throughout the following night all suspected houses were searched. The previous week the revolutionary committees issued a proclamation threatening the life of the Emperor and a second St. Bartholomew. The great throng of people which had assembled enthusiastically cheered and congratulated the Emperor, who thanked them for their proofs of fidelity on such a painful occasion. He said he knew he had the support of all respectable people. He hoped God would grant that he might complete his task, which consists in promoting the welfare of Russia. The Emperor, after the foregoing speech, drove to the palace without escort. Afterwards he drove, still without escort, to the Kasan Cathedral to return thanks for the preservation of his life.

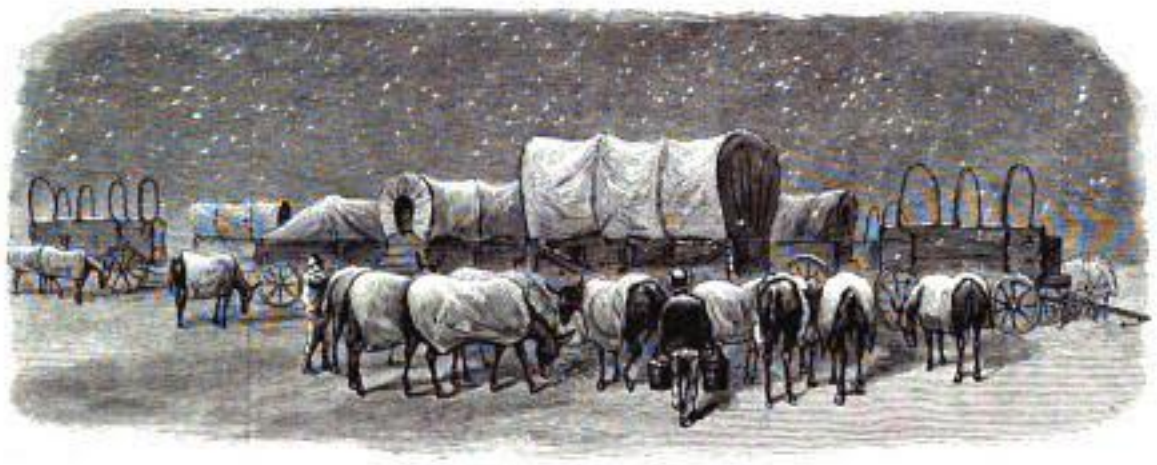
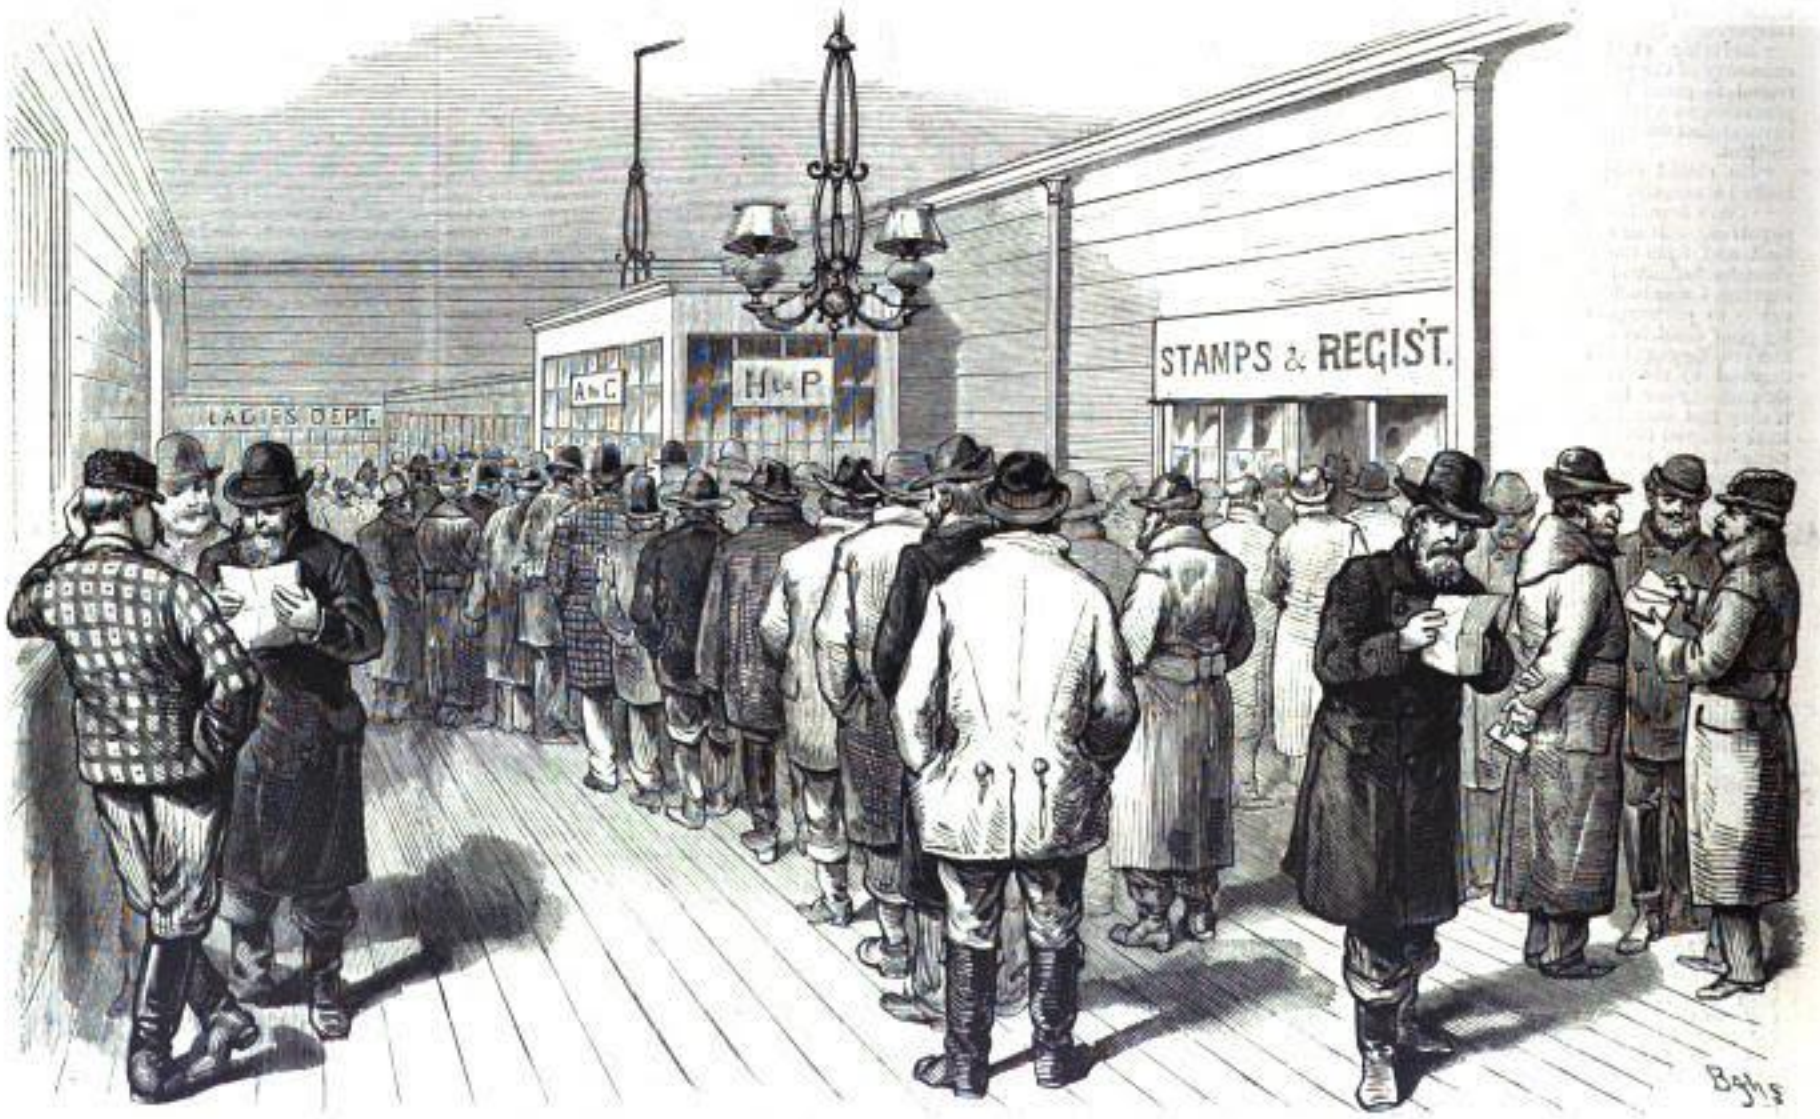
MASSACHUSETTS.—CHURCH OF THE IMMACULATE CONCEPTION, LOWELL.



A TESTIMONIAL VASE TO D. DRAKE SMITH.



A WONDERFUL POST-OFFICE.

ONE of the conspicuous marvels of Leadville, the new mining centre of Colorado, is the post-office. No matter at what hour it may be visited, the visitor will find a line of men at each of the four delivery-windows, closely wedged and reaching out upon and turning up and down the sidewalk, each eager to reach his turn at the window to get news from home. It generally takes about two hours to get to the window. The postmaster is a very courteous, upright and pleasant gentleman; although there is a great deal of trouble and disarrangement about the mail, no one can attach any blame to him or any of his force. In fact, the business of the office has increased so rapidly that it has overwhelmed him. Six months ago two men transacted the business of the office with ease; three months ago it only required three men working during daylight to do all the work: but now it requires ten men working eighteen hours per day to distribute and deliver the mail, and the mail from necessity lies over one day undistributed. There are from three to four thousand letters sent daily, while there are about six thousand received and distributed. Besides the regular paper mail sent out, there are about one thousand transient papers mailed daily at this office.

Eight thousand people are waited upon at the general delivery daily; eleven be-sacks of papers

MINERS, EN ROUTE TO LEADVILLE, CAMPING OUT AT NIGHT.

COLORADO.—THE WONDERFUL POST-OFFICE IN THE NEW MINING CITY OF LEADVILLE.—FROM SKETCHES BY E. JUMP.

Digitized by Google

and packages are received daily. In addition to this work at the windows of the general delivery, there are in use one thousand six hundred private boxes, with a demand for one thousand more. The money-order department runs from $1,200 to $2,400 daily. All of this business is done in a house 36x100 feet, and in an office that rates as fourth-class, and by a postmaster whose salary, including a allowance for clerk-hire, only amounts to about $3,000. The salary will not pay the expenses of the office for three months, yet he carries it on with his private means, and, withal, is not sour or crispy, but affable and pleasant. He certainly is one among a thousand, and deserves great honor. We give an illustration of this remarkable office, and another of a company of Leadville emigrants putting up for the night.

A HANDSOME TESTIMONIAL.

WE give on the opposite page an illustration of a handsome vase, presented on the evening of March 19th, by the Commercial Mutual Insurance Company, to Mr. Daniel Drake Smith, who for some forty-one years has been connected with the business of marine insurance in this city. Mr. Smith was born in New York, and began a mercantile education by entering in 1831, at an early age, as a clerk in the counting-room of a firm extensively engaged in the importation of French and other European drygoods. The great fire in 1835, which swept away the larger part of the then business portion of the city, followed by a period of speculation and inflation resulting in the financial crash of 1837, brought down, with hundreds of others, the mercantile house in which he was employed, and in January, 1838, he was transferred to the office of the old Atlantic Insurance Company, succeeded in 1842 by the present Mutual Company of that name, of which Mr. Smith subsequently became the secretary. In 1852 he organized the Commercial Mutual Insurance Company, and was elected its President, which office he continued to hold until he declined a re-election in February, 1879. Mr. Smith was also, for several years, Vice-President and President of the Board of Underwriters of New York.

The elegant dinner given in his honor at Delmonico's, on the 19th of March, preceded by the presentation of the testimonial, was a graceful compliment paid to him by his associates and friends on his retirement from office, and must have been as pleasing to him as to those who participated in it. Commerce, banking, insurance, the law and the press were ably represented among the assembled guests. The presentation was made by E. L. Hedden, Esq., on behalf of the committee, and interesting speeches were delivered by S. D. Babcock, President Chamber of Commerce; Geo. S. Coe, President American Exchange Bank; Joseph H. Choate, Esq.; C. Dennis, Vice-President Atlantic Mutual Insurance Co.; Isaac H. Bailey, Esq., General Horace Porter, David M. Stone, editor *Journal of Commerce*, and others.

The presentation piece is a Roman *amphora* in bronze, and of the most beautiful proportion and embellishment. It stands about four feet in height, and is sixteen inches in its widest diameter. The most striking part of the decoration is that which encircles the upper part of the body. It represents an Autumnal procession in honor of a successful harvest. Here are the joyous husbandmen, the *amphorae* of wine, the baskets and vehicles laden with fruit and grain; beneath this is a border composed of one endless line of water-fowl and olive sprays; below this again is a wider border composed in a miscellaneous manner of musical instruments, symbols of plenty, fruit, the olive and the laurel—in fact, everything of a joyous nature. The handles are graceful, terminating in rams' heads. The ornamentation of the whole vase is as beautiful and refined as it can well be. It stands upon a rosewood base about three feet high, with a top of red marble, and has two borders of bronze matching the color of the vase—the upper one being a severely conventional representation of fire, and the other the well-known classical water border. These have reference to the marine and fire elements of insurance. On the base there is also a suspended shield with the following inscription: "Presented by the Commercial Mutual Insurance Company to Daniel Drake Smith, President, 1852 to 1879. Ability and Fidelity." The vase was furnished by Tiffany & Co.

COMMANDER A. P. COOKE, U. S. N., IN CHARGE OF THE "GENERAL WERDER," OF THE WOODRUFF EXPEDITION.

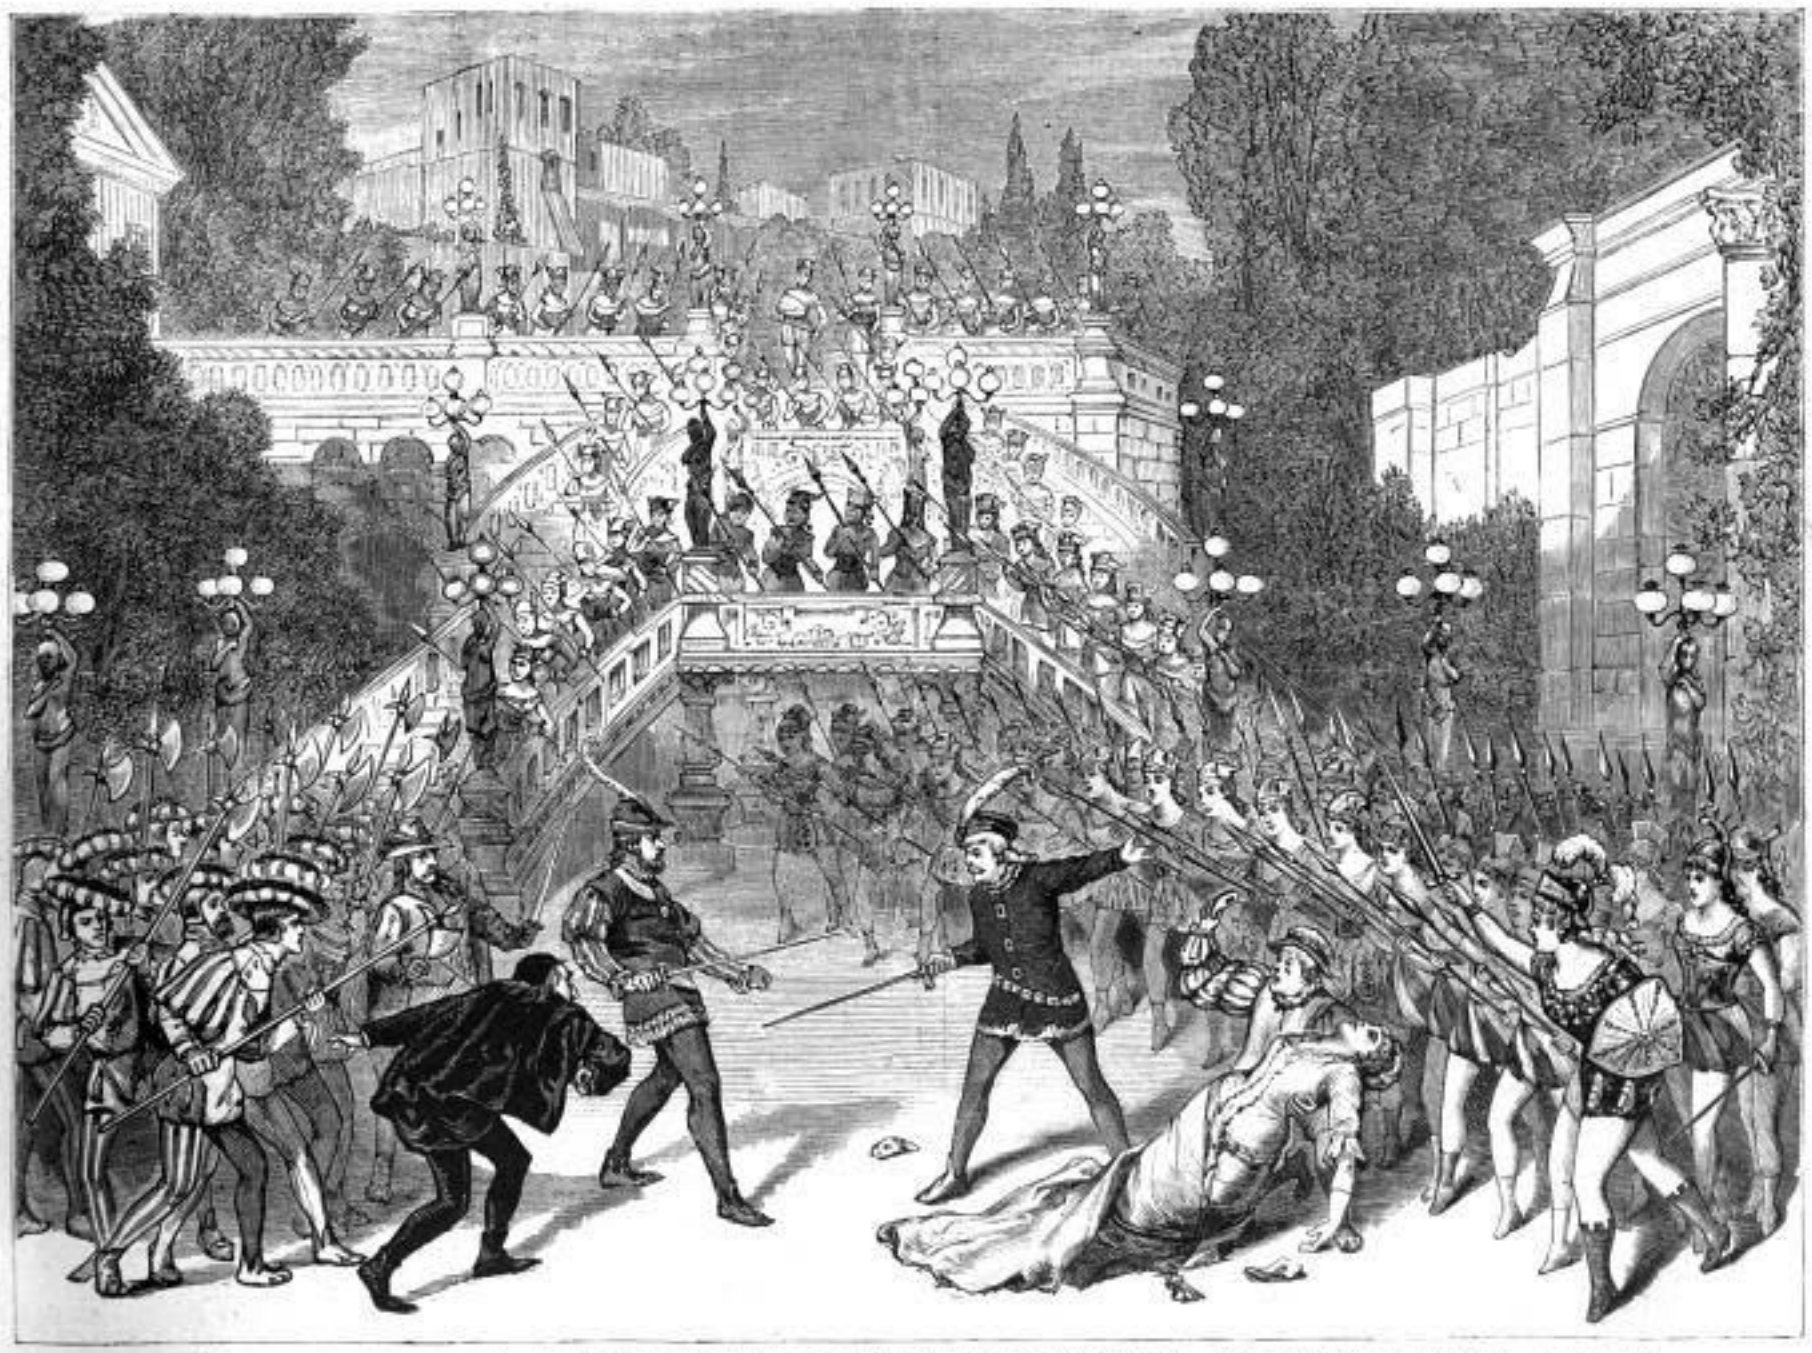
CHURCH OF THE IMMACULATE CONCEPTION,

LOWELL, MASSACHUSETTS.

THIS edifice, the largest of its kind in New England, except the Cathedral in Boston, was dedicated June 10th, 1877, by the Most Rev. Archbishop Williams of Boston, assisted by Bishops O'Reilly of Springfield and De Goesbriand of Burlington, Vt., besides a large number of prominent clergymen from all parts of New England.

Six years were occupied with the construction of the building. The chief material is black granite, the style of architecture early English gothic, and the whole edifice cruciform in construction. The basement of the structure, which is reached by a wide and lengthy stairway, will seat nearly two thousand persons, and is used chiefly for Sunday-school purposes and miscellaneous church meetings.

The entrance to the church proper is by an easy, wide and short flight of stone steps at the southerly end of the building. Two large double doorways open into the spacious vestibule, and there are three entrances to the auditorium from the vestibule, under the gallery. There is a double doorway leading directly to the auditorium, in the east transept, but it is the purpose not to use it except as a means of egress. Two winding stairways lead from the vestibule to the choir and organ gallery. All the doors swing outward.



The auditorium commands the admiration of the visitor, affording, as it does, one of the most attractive views of massive architectural design and brilliant conception to be seen in the country. Its length is 192 feet, breadth in the transept 100 feet, in the nave 96 feet, and the height from floor to ceiling is 70 feet. It has three aisles running lengthwise, and contains 322 pews of six seats each—a seating capacity of 1,932 persons, aside from the large choir gallery.

The grand altar is most elaborately and attractively finished in marble, and was erected at a great expense. The varieties of marble used in it are Bardiglio, Eliotte, Sicilian, Belgian black, Irish black, Italian statuary and American fossil. It has eighteen feet frontage at the base, has a table three and a half feet wide and is eighteen feet high. The altar rail is of cherry, tastily carved, and extending along the entire altar front. The floor of the sanctuary is covered with a rich carpet. The chancel is located in an apse, in which is the high altar.

The organ is, next to that in Music Hall, Boston, the largest in New England.

COMMANDER A. P. COOKE, U. S. N.

COMMANDER COOKE, who has been detailed to the command of the iron steamship *General Werder*, which is to convey the Woodruff Scientific School on the expedition around the world, is a native of New York State, from which he was appointed to the Navy, May 27th, 1852. He was at the Naval Academy from 1852 to 1856, and on graduation served two years on the steam-frigate *Wabash*, of the home squadron. In 1859 he was promoted to Master, and in 1861 received his commission as Lieutenant, and was ordered to the steam sloop *San Jacinto*. He was on the steam-gunboat *Pocola*, of the Western Gulf Squadron, 1862-3, during which period he was commissioned as Lieutenant-commander. In 1864 he was in command of the steamer *Estrella*, of the Western Gulf Squadron. At the close of the war he was sent to the Naval Academy, which he left in 1867.

NEW YORK CITY.—KIRALFY BROTHERS' GRAND SPECTACULAR PRODUCTION OF THE "BLACK CROOK" AT NIBLO'S GARDEN.—FINAL TABLEAU OF THE THIRD ACT.—SEE PAGE 139.

Digitized by Google

for service on the steam-frigate *Franklin*, the flag-ship of the European Squadron, where, in 1868, he was transferred to the steam-sloop *Tuscarora*, of the European Squadron, returning to the Naval Academy in 1869. He was recently in command of the steam-sloop *Seminole*, in which he made an eventful cruise of over 60,000 miles. At the time of his appointment to the command of the *General Meade* he was in charge of the receiving-ship Wabash, at Philadelphia.

THE SUMNER STATUE.

THE statue of Charles Sumner, made by Ball, the sculptor, and erected near the Boylan Street Mall, in the public garden of Boston, was unveiled by Governor Rice on December 24th last, in the presence of some 3,000 persons. The work, which represents the famous Senator in his characteristic attitude while delivering a speech, faces to the north, and stands nine and a half feet high on a square pedestal of Quincy granite twelve feet high. J. Barbe Dilorne, of Paris, cast the statue, and the entire work cost the memorial committee $13,986.79, leaving a balance of $2,291 in their hands from the subscriptions.

FUN.

THE early burr catcheth the small boy's hair.

WHEN a youth is punished in the old-fashioned lap fashion, he can be easily seen through. Because he is transparent.

A TEXAS jury arose after the evidence was in, and requested that the case go to them without "any lawyers' speeches," and it did.

"MY dear," said a gentleman to his wife, "our club is going to have all the home comforts." "Indeed," replied the wife; "and when, pray, is our home to have all the club comforts?"

APPALLING PROSPECT. — *First Subaltern* reads: "Lord Feeseeme recommends athletics to increase the physical strength and activity of the officers." *Second Subaltern*—"What! Athletics in addition to all our brain work! Good heavens! What is the service coming to?"

A COLORED child had a fall from a second-story window the other day, and his mother, in relating the incident at a grocery store, said: "Dere dat child was a-coming down feet fust, wid every chance of being killed, when de Lawd He turned him over, de chile struck on his head, and dere wasn't so much as a button flew off."

MR. —— comes to be the victim of an accident, and as they are placing him on a stretcher to carry him up-stairs from the hack, he summons the servant-girl, an honest young peasant, and tells her: "Hurry up-stairs and let my wife know about this accident to me, but don't give her a shock—put on a cheerful face while you are telling her." The faithful domestic discharges her mission with enthusiasm, and remarks in a husky voice, "My master sent me—he! he! he—to tell you that—ha! ha! ha! he had—he! he! he!—he had—(there, I've burst my stay-laces; he had—it was too funny, and I've laughed till my sides are sore—he had broken his leg—ho! ho." (Rolls over upon the carpet in ecstasies of laughter.)

A LUCKY TRIO OF PRINTERS.

THEY WIN $5,000 APIECE IN THE APRIL DRAWING OF THE LOUISIANA STATE LOTTERY.

(*New York World, April 11th, 1879.*)

THE Louisiana State Lottery wheel of fortune has again smiled upon New York. It will not be forgotten that Judge Zachariah Voorhies, of Brooklyn, won only last December $50,000 in the semi-annual grand distribution, and now three humble printers have been paid $15,000 for ticket No. 65,923, which they held in common, and which drew one-half of the capital prize in Class D of the regular monthly drawing, held on April 8th at New Orleans. The names of the fortunate winners are John B. Jackson, publisher of the *Good Templars' Gem* (the official organ of the new Templar Order in this city); William J. Heaney and Patrick J. O'Brien. They all three work in the job-printing office of Macgowan & Slipper, 30 Beekman Street, of which Jackson is foreman and O'Brien has charge of the Spanish copy.

Mr. Macgowan was beaming with smiles yesterday afternoon when the *World* reporter called to verify the stroke of fortune that had befallen his three faithful employés. In the midst of the busy hum of printing presses Mr. Macgowan explained that next to securing the prize himself he could not have wished it to have been bestowed upon more deserving men. He spoke very highly of the character of the three men. Foreman Jackson was a strict temperance man, had been in his employ going on nine years, and earned a good salary. Heaney was employed on general work at $17 per week and O'Brien earned $16. He had given the men a half-holiday and they had left the office at nine yesterday morning. Mr. Macgowan referred the reporter to the men themselves to obtain a full account of their interesting experience.

Mr. John B. Jackson lives at No. 302 Rivington Street, where he occupies the two lower floors. He is about twenty-nine years of age and has been a hard-working as well as thrifty man for the past ten years. In 1875 he married and by dint of economy had already accumulated about $4,000. When the *World* reporter saw him comfortably ensconced in his neat little front parlor, with his eldest little girl playing on the hearth-rug with a box of sugar-plums which papa had bought for her, he had already calmed down from the excitement of the day. With a submissive nod of acquiescence from his amiable wife, he gave the following graphic account of how it all came about: "It was quite a novel thing for me," he began, "to buy a lottery ticket. O'Brien had made several investments before, but neither I nor Heaney had thought much about such things until we read the *World's* story of 'Uncle Bob's $30,000 prize.' The whole thing started from my friend Heaney being given to practical joking. You see, O'Brien, I regret to say, is not the steadiest man I have seen in a printing-office. He required excitement all the time to keep him at work. We first tried one thing and then another. He was first coaxed to believe that we would get up an athletic entertainment in his behalf; then again it was suggested that the *Scientific American* was about to print its entire edition in Spanish and that O'Brien would undoubtedly be chosen compositor in chief. By these innocent subterfuges we succeeded in keeping O'Brien at his post. The last dodge of giving a grand amateur dramatic entertainment and selecting O'Brien to play the principal part in 'The Stranger,' was too much for him. He became very excited, and when a friend impudently informed him that it was all a joke we had to resort to the lottery proposition on the supposition that it was a favorite investment of O'Brien. It acted like a charm. We agreed to club together $2 and Heaney was to select the tickets. Heaney and I each paid 67 cents and O'Brien 66 cents towards the pool. This odd cent was a sore point with O'Brien, and even up to the last moment he was afraid we were going to claim a larger proportion of the winnings. Well, to cut the story short, Heaney went up to the office of B. Frank Moore & Sons, the agency of the company, at No. 319 Broadway. He boldly stepped up to the window and, placing his $2 on the counter, asked for two half tickets in the next drawing. This was two weeks before the drawing was advertised to take place. One of the clerks handed Heaney an assorted package of tickets. Heaney turned his back, and pulling one from the centre and selecting the topmost one of all, folded them up in his pocket and returned to the printing-office. It was agreed that I should be holder of the precious property. Heaney and I never thought any more about it, and O'Brien appeared greatly pacified."

"Did not the tickets burn in your pocket when you learned the result of the drawing by telegraph in the morning papers, on Wednesday, April 9th?" asked the reporter.

"No, not at all. I was sitting quietly at breakfast when my brother-in-law, who also held a ticket, asked me what our numbers were. I told him, and he immediately gasped out, 'Why, 65,923 has drawn the capital prize. Good luck to you, John.' I could scarcely believe my senses, but when I went down to the office that morning my partners, Heaney and O'Brien both knew of their good fortune. The former was dazed, and O'Brien, who was 'setting up' an ordinary commercial circular, took three hours to complete his task when it ought only to have taken one. Later in the day we all got leave of absence and went up to see Mr. B. Frank Moore, at 319 Broadway, to confirm the news and inquire as to the best way to cash our ticket. Mr. Moore acknowledged that we had drawn one-half of the capital prize and straightway took us down to the National Park Bank and introduced us to its cashier, Mr. E. K. Wright. That gentleman gave us a receipt for the ticket in our joint names, and promised to forward the ticket to New Orleans for collection and notify us when the money arrived. We received the notification late Tuesday afternoon, after banking hours, and only went this morning to get our money. We again elicited the services of Mr. Moore to identify us at the bank."

The visit to the National Park Bank is best told in the language of Mr. Moore whom the *World* reporter saw earlier in the afternoon: "The three men called upon me at eleven o'clock, as previously arranged, accompanied by Mrs. O'Brien, a sprightly little woman thirty years of age, and a native of Washington. We stormed the bank in a body and were ushered into a private room by Cashier Wright. The latter said he had received the money all right from New Orleans without deduction, and asked how the $15,000 should be paid. I asked him to draw a check for that amount less the bank's commission of ½ per cent. ($75) to the order of the three owners of the ticket No. 65,923. As soon as the check was made out, Jackson, Heaney and O'Brien wrote their names on the back and I certified to the indorsements. The paying teller divided the $14,925 into three separate amounts. Jackson was given $4,975 in nine $500 bills and the remainder in smaller denominations. Heaney received also $4,975 in four $1,000 bills and small notes. O'Brien was persuaded to have the bank grant a certificate of deposit in his wife's name for $4,875, and the remainder, $100, was handed him in cash, as he was desirous of entertaining some of his friends in honor of the auspicious occasion. He kindly ceded $50 to Mrs. O'Brien, who left her certificate of deposit for $4,875 in the care of her landlord, an officer of the Shoe and Leather Bank, so that it would be out of harm's way. I have obtained regular certificates from all three gentlemen that they were paid the $15,000 in full without any deduction."

There is always some curiosity as to how a fortunate winner of a prize in the Louisiana State Lottery disposes of his winnings. The *World* reporter asked Mr. Jackson, who fully confirmed Mr. Moore's version of the manner in which the money was paid, and said: "Heaney and I had agreed to act in concert and deposit the bulk of our winnings in several savings banks. We accordingly jumped upon the Metropolitan Elevated road and rode up to the Union Dime Savings Bank where we each deposited $500 in our individual name. We visited the following banks in succession on our way down town, where we each made the same amount of deposits: At the Dry Dock Savings Bank, $500; Bleecker Street Savings Bank, $1,000; East River Bank, $300; Emigrants, $500; Seaman's $1,000, and $500 at the Bowery in our own names and $500 in the names of our wives, Mrs. Anna Heaney and Mrs. Clara Jackson. This made a total of $4,800, and the remaining $175 we retained in cash to buy certain little necessaries and add to the comfort of our homes."

Mrs. Jackson asked the reporter if he did not think she had a very dutiful husband, and he replied in the affirmative. Little Miss Clara was still keeping tight hold of her bon-bon box as the reporter patted her on the head and, reiterating his personal congratulations to the happy Jackson family as a whole, went over to 49 Sheriff Street to see Mr. William J. Heaney. The latter was puffing away at a well-seasoned meerschaum pipe and was in high glee. He is forty-four years old, but looks ten years younger. A bright, blue-eyed little girl was nursing her favorite doll in a diminutive rocking-chair, while her younger sister, a laughing brunette, played a game of marbles at her side. Mr. Heaney spoke of his good fortune without reserve, and said he was determined to make good use of his winnings. He said the interest would enable him to add to the comforts of his home, and that was all that he had to live for. Mr. Heaney showed the reporter his eight pass-books, seven in his own name and one in that of his wife, amounting in all to $4,800. He said he should be obliged to take an interest in the next monthly drawing of the Louisiana State Lottery on May 13th, because his friends had begged him to join a pool and instructed him to buy the tickets under the impression that he might again prove fortunate. Mr. Heaney related the old saying that "lightning never struck twice in the same place" with some sarcasm, and remarked that if he did not win something back in the next drawing he should rest on his laurels with perfect satisfaction. At that moment Mrs. Heaney, with a flaxen-haired one-year-old babe, entered the room and joined with her husband in expressing their gratitude to Mr. Moore, who, in behalf of the company, had showed so much courtesy in obtaining the money so promptly for them.

Mr. Patrick J. O'Brien, the fortunate holder of one-third interest in the half-ticket No. 65,923, lives with his wife and five children at No. 1 Pike Street. The $4,975 which he received will perhaps be of greater benefit to him than his associates, as his home has not been always dotted with a silver cloud. Mrs. O'Brien said she would make every effort to retain the money for a rainy day and would not touch her certificate of deposit for $4,875 unless absolutely required. She hoped that her husband would return to his work at Macgowan & Slipper's without delay. Jackson and Heaney promised to be at their posts at 7:30 this morning sharp, and said last night that they would not fail to be on time.

HOW TO BE BEAUTIFUL.

MANY hundred thousand dollars are annually expended by ladies for "artificial" appliances to hide the shrunken and wasted form, or the sallow skin, blotches, or liver spots, which are due to female weakness, dyspepsia, torpid liver, and constipation. If a small per cent. of this sum were invested in Dr. Pierce's Favorite Prescription, ladies would soon really be what they now seem to be. It really corrects those weaknesses and diseases upon which debility and emaciation depend. It cures dyspepsia by toning up the system, and when used in connection with Dr. Pierce's Pleasant Purgative Pellets, speedily overcomes all irregularities of the liver and bowels. No "bloom of youth," no "beautifier of the complexion," can impart such permanent beauty of face and form as Dr. Pierce's health-giving Favorite Prescription.

COMPOUND OXYGEN.

IF what is claimed for this new treatment for chronic diseases be true—and it challenges the closest investigation—then has suffering humanity reached a happy era. Drs. Starkey and Palen, of 1112 Girard Street, Philadelphia, have published a small treatise, which is sent free to any one who will write for it, in which they give a history of this new agent, the mode and scientific basis of its action, and a detailed account of the results which have followed its administration during the past ten years. These results are of so remarkable a character in many instances as to have created much surprise where they occurred; and their authentication is so clear that none but the most incredulous who examine the testimony can doubt. Taking the character of the cases presented, many of them of long standing and regarded as incurable, no such a series of brilliant results as are given in this little book can be found recorded in medical literature. Among the names of patients who have been treated, and whose unqualified testimonials are presented, will be found men well known to the public, and whose word cannot fail to inspire the largest confidence. This new treatment is by simple inhalation. All of its effects are said to be gentle, pervading and pleasant. As it cures by giving a larger supply of oxygen to the system, thus acting as a revitalizer, its operations are general. Consumption, neuralgia, asthma, catarrh, bronchitis, rheumatism and all chronic forms of nervous and organic diseases alike yield, it is said, to its influence, because its action is upon the vital centres, and the result a new influx of life into the whole body. Claims like these certainly demand public attention. If a new element of healing has been discovered the fact cannot for the sake of suffering humanity be too widely made known.

GIGANTIC OFFERS.

YOUR attention is called to the mammoth new advertisement of Mr. Daniel F. Beatty, of Washington, New Jersey, in this week's paper. Mr. Beatty's celebrated Pianos and Organs are so well known throughout the civilized world that they require no word of commendation from us. Lowest prices, superior workmanship and complete satisfaction have brought this house prominently forward until today he stands the only man in his trade who dares to ship his instruments on test trial, and if unsatisfactory refunds not only the price, but all freight paid. No fairer offer can ever be made or even suggested. His sales now amount annually to several millions of dollars, and when it is taken into consideration that a few years ago he was only a poor plow-boy, it must be evident to every reader that Mr. Beatty is the possessor of rare talent in his vocation. A saving of 5 per cent. can be made when two instruments are ordered at the same time, therefore talk over among your friends and neighbors these unparalleled offers on the celebrated Beatty Pianos and Organs, and try to secure for yourself this special discount.

MANUFACTURERS can save 25 per cent. of customary outlays by use of H. W. Johns' Asbestos Liquid Paints, which are of a higher grade than any other paints for structural purposes. Samples and price-lists sent free by mail.

YOUNG and feeble mothers with frail children will both become strong by the use of Hop Bitters.

We believe the cause of the wonderful success of our MURRAY & LANMAN'S FLORIDA WATER may be found in the fact that the principal aim in its preparation has always been to give the simple natural *perfume of flowers*, without any chemical addition whatever, and to avoid, by all means, the great error of making a heavy, sickly, sweet perfume.

THE stranger often finds himself needing to inquire which is the best of the New York hotels. Probably nine out of ten of the answers of the connoisseurs of New York life and enjoyment would reply, "the ST. NICHOLAS." The guest here finds all the elegancies and comforts of a home provided on a lavish scale.

TO PRODUCE real, genuine sleep and childlike repose all night, take a little Hop Bitters on retiring.

Stuttering cured by BATES'S APPLIANCES. Send for description to SIMPSON & Co., Box 2,236, New York.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"BY a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Frank Leslie's
SUNDAY MAGAZINE
FOR MAY.
REV. CHARLES FORCE DEEMS, D.D., LL.D., Editor.

"FRANK LESLIE'S SUNDAY MAGAZINE for May strikes us as being an excellent number of a great family favorite. We are glad to note that the opinion of leading papers and periodicals concerning it is so much in harmony with what we have often said in these columns. It contains more reading-matter and more illustrations than any other similar publication in the world, and is extremely cheap at $3 a year. It is really doing a notable and noble work in supplying such an edifying and pleasing monthly publication at such a low figure. It deserves a much greater circulation than it has, although its success is marked. Dr. C. F. Deems, editor. Address Frank Leslie's Publishing House, 53, 55 & 57 Park Place, New York."—*Morning Star, Wilmington, N. C.*

CONTENTS OF MAY NUMBER:

DESCRIPTIVE ARTICLES: "The Ainos of Northern Japan," by William Elliot Griffis, 14 illustrations; "Culture," by Mrs. Elizabeth L. Brooks; "Gather the Fragments," by Rev. T. B. Adams, D.D.

SERIAL AND SHORT STORIES: "David Fleming's Forgiveness," illustrated; "My Fortune and Misfortune," illustrated; "Forecastle Jack," by Frank H. Converse, illustrated; "Brother and Sister," an Australian sketch, illustrated; "The Erard Pianette," illustrated, etc., etc.

SKETCHES: "Professor Joseph Henry," by Hon. S. S. Cox; "A Mother's Influence," by the late ex-Senator Pratt; "The Friends and Temperance"; "Washington and his Mother," illustrated; "Uncle John Vassar," by H. A. Seyguers, illustrated; "My Dream," by R. N. Stodd, D.D.; "A Syrian Lawsuit," illustrated; "Beauty and the Beast," illustrated; "A Wonderful Cat," illustrated; "Jerry's Housekeeping," illustrated, etc., etc.

HOME PULPIT: Sermon by the Editor—"Jesus, our Martyr King"; "Popular Exegesis."

POEMS: "Conquered at Last" (prize poem), by Maria L. Eve; "Always with You," by S. Gibson Foster; "Comfort," by James C. Lamb; "The Legend of the Windows," by Luther D. Bradley, illustrated; "To Will and to Do of His Good Pleasure," by Helen Marr; "The Maiden's Dream," illustrated; "Sympathy"; "Idlings with Nature," illustrated; "The Day of Rest," by James Grahame, illustrated; "Blowing Kisses," illustrated; "White Roses," by Margaret E. Sangster; "Canute and his Courtiers" (a legend), illustrated, etc., etc.

"The Invalid's Portion, and Thoughts for the Afflicted"; "Wit and Wisdom of Childhood," etc.

MISCELLANY: "Dying Prayer of King Edward VI."; "Ruskin's Bible Lessons"; "The Cross-Bearer a Negro"; "The Friends and Temperance"; "Good for Evil"; "Twelfth Day"; "The Kiosk of Ahmed, at Serkhej, India"; "Barbara Heck and the Card-players"; "Mr. Corbet and Mrs. Dick"; "Peasants of Courland"; "A Prayer Answered"; "George and Robert Stephenson"; "Prayer of the Modern"; "St. Cecilia"; "Tender-hearted"; "All Kiss the Baby," etc.

At Home and Abroad; Editor's Portfolio; The Calendar of the Prayer-book; Music, etc.

128 Quarto Pages. 100 Engravings.

The Great Illustrated Family Paper
Frank Leslie's
CHIMNEY CORNER.
Unrivaled in its Brilliant Literary Attractions.
FOR THE PAST
FOURTEEN YEARS
THE
CHIMNEY CORNER
Has maintained its
SUPERIORITY OVER ALL ITS RIVALS.

No more attractive reading can be found in any journal than is offered in

Frank Leslie's
CHIMNEY CORNER.
It occupies a field that no other journal attempts to fill. It is essentially a paper for high-toned families. While it gives healthy fiction for the entertainment of its readers, and well-written, agreeably instructive articles for the home circle, it gives no inconsiderable space to biographies of the good and great, anecdotes, art, invention, travels, curiosities of foreign life, the tastes of the day, the marvelous in nature and art, essays, attractive reading for the little ones at their mother's knee, and for those of larger growth, combined with pictures that attract the eye and fix impressions vividly on the mind.

Each Number contains sixteen pages of reading matter, with eight pages of admirably executed illustrations.

The Serial Novels (and new ones appear in rapid succession) are by such eminent writers as John Habberton, author of "Helen's Babies"; N. Robinson, author of "That Mother-in-Law of Mine"; Etta W. Pierce, Christian Reid, Meta Victoria Victor, author of "The Dead Secret"; M. T. Caldor, Frank Lee Benedict, J. W. De Forest, Corry Carew, author of "Belle Bodkin of Ballyboden," and others equally celebrated.

The Short Stories, completed in each number, are of various descriptions—domestic, dramatic, historical, love, humorous, sentimental, etc., etc., appealing to every age, station and taste—written by authors of acknowledged talent.

The Miscellaneous Contents embrace Biographies, Adventures, Essays, Travels, Curiosities of Foreign Life, Marvels in Nature and Art, Legends, Anecdotes, Poetry, etc., etc.

The CHIMNEY CORNER is published every Monday, price 10 cents at all newsdealers'.

ORGAN BEATTY PIANO
BEST IN USE — BEST IN USE

A $375 13-Stop Parlor Organ for only **$97.00**

ONLY $97.00

The price of this beautiful Grand Parlor Organ is $375 or, in other words, this is about the price asked for such an instrument by the **Monopolists** Agents. I have been offering it at wholesale at **$105**, as my very lowest net cash price. I am determined that all shall see my celebrated instruments and judge for themselves, and therefore I offer this beautiful, neat design, to the readers of this paper, **FOR ONLY $97.** Order the instrument, and **pay only after you have tested it at your own home.** Don't want the money until you are entirely satisfied. This is a very fair offer for you. ☞ Description of this magnificent instrument is as follows: **Beatty Organs, Style No. 2100.** A beautiful **Celtic** style of architecture in this case strikes the eye of the connoisseur and stamps it at once as the most beautiful case extant. Dimensions: Height, 74 in.; Width, 49 ins.; Depth, 24 in.; Weight, when boxed, over 350 pounds. **Three (3) Sets of Reeds. Five (5) Octaves. Thirteen (13) Stops. (1) Grand Organ** (2) Principal Forte; (3) Dulcet; (4) Bourdon; (5) Hautboy; (6) Principal; (7) Vox Humana; (8) Flute; (9) Violina; (10) Diapason; (11) Echo; (12) **Vox Celeste**; (13) Clarionet. Beatty's Celebrated **Grand Organ** Knee Swell, and Beatty's New and Improved Tremolo Stop Knee Swell. The case of this instrument is solid Walnut, full Panel, Serpentine, and finished in the **highest style of art.** The musical combination excelled by none. All things considered, it is the most desirable style that can be selected. I challenge its equal. ☞ Regular Retail price asked for such an instrument by the Monopolists' Agents, about **$375.00**
I will sell this beautiful Organ to the readers of this paper, in order that it may be introduced, boxed and delivered on board cars, **FOR ONLY $97.00**
Please send your order by letter or telegraph. **No money required until you are entirely satisfied.** Payer the instrument only after you have tested it at your own home. If it is not as represented, return at my expense. I paying freight, charges both ways. This certainly is a fair offer. I positively will not deviate from this price. ☞ **Fully warranted for 6 years.** I want this instrument introduced here this unparalleled offer. Remember, I have no agent, but sell direct, hence this remarkable low price. **You can order direct from this Advertisement, which will not appear again.** Nothing can be saved on this instrument by correspondence. **Order at once,** if you do not want one yourself, order one and make your friend a handsome present. Every Beatty Organ when introduced into a new locality, sells others, **as it is a standing advertisement.** Please remember, the above unparalleled offer is good for a **limited** period only, and is made solely with a view of introducing this superb instrument. Trusting that by offering it at this very low price, I shall induce very many to buy this beautiful new style, thereby building up a demand that will eventually repay me for this sacrifice. **New Rosewood Pianos, $125, $135, $145 and upward.** Large Illustrated Newspaper, about cost of Pianos and Organs, sent free, post-paid.

Address, **DANIEL F. BEATTY, Washington, New Jersey, U. S. America.**
☞ PLEASE SHOW THIS SPLENDID OFFER TO YOUR NEIGHBOR. 21

BEATTY

—The most successful business man in the world. BEATTY'S Celebrated PIANOS and ORGANS are acknowledged to be the best and most perfect instruments on the globe. More Beatty's celebrated Pianos and Cabinet Organs have been sold during the last four months than nearly all the other manufacturers combined. No wonder they are jealous of his great success. While other manufacturers are crying hard times, Beatty can hardly fill his orders, so great is the demand for his celebrated Pianos and Cabinet Organs. Mr. Beatty commenced business only eight years ago without a dollar, a poor and unknown shoe-boy. He is to-day the most successful man in his line in the world, doing a business of several millions annually. This is the result of that attention to business, liberal, judicious advertising, plenty of pluck, and, above all, strictly first-class Pianos and Cabinet Organs, selling them at the very lowest net cash wholesale prices to the public direct, avoiding all middlemen, agents, etc. Read his unparalleled offers for a limited period.—*Extract from the Star.*

☞ P. H. Bates, Cashier First National Bank, Washington, N. J., (Piano); J. L. Everitt, Cashier National Broadway Bank, New York City, (Organ); Wm. Underdown, Cashier Mechanics National Bank, Phila., (Organ); Rev. Joseph Swain, D. D., Highgate, Vt., (Piano); Rev. J. R. Good, D. D., St. Joseph, Mo., (Piano); A. J. Lowery, of Wells, Fargo & Co's Express, Placerville, Cal., (Organ); and thousands of others throughout this country and Europe, are now using in their families Beatty's Celebrated Pianos and Cabinet Organs. ☞ Send at once for long list of testimonials from persons, some of whom you may know.

CLUBS—Where two or more Pianos or Organs are ordered at one time, I will make a discount of 5 per cent. from this unparalleled offer.

In no case will I make a discount from these offers on a single instrument. Those who desire and will forward the cash with the order, will receive with the instrument free of charge a fine Stool and Beatty latest instruction book. I will not give away a Stool and Book when parties pay only after testing the instrument at their own houses. Those do not ask it.

$1,000 3-String Grand Square Piano for Only $255.00.

$1,000 PIANO FOR ONLY $255.

$1,000 PIANO FOR ONLY $255.

BEATTY PIANO *SQUARE GRAND, Style No. 2023.* Magnificent Rosewood Case, 10s. Scrolls and cow-third returns. Full upright scale. Rosewood case, all round corners, beautiful carved legs and lyre, heavy full iron frames, harp and extra braces, improved new scale, overstring bass, French grand action, fret desk, carved pedal, rolled rosewood mouldings, ivory key fronts, capped hammers, agraffe treble, and every improvement which can in any way appear fashions, but I mean every word of it. It is a special offer, more liberal than any other manufacturer can safely make to justify in making it. In presenting this instrument to the world at this very low price, I do so with an eye to the future, knowing that its introduction into any locality will result in making many sales. Its style must be admired and its intrinsic qualities highly endorsed. Fully warranted for six years. Sent on half month test trial. No money required until the Piano is fully tested at your own home. I want this beautiful Piano more generally introduced, hence this unparalleled offer. Order at once, as every Piano when introduced in a new locality sells others. We all know a good article is a standard advertisement. **Regular retail price asked for such an instrument by the monopolists' agents, about $1,000.** ☞ I will sell this **magnificent Piano, boxed and delivered on board cars, to the readers of this paper, in order to have it more generally introduced, for only $255.** You may forward your order by letter or telegraph and the instrument will be shipped at once. No money required until the Piano is fully tested at your own home. If in any way unsatisfactory you are under no obligation whatever to keep it, as I will cheerfully take it back and pay freight charges both ways. ☞ New Parlor Organs $65, $75, $85, to $100. Latest Illustrated Newspaper, with latest information about cost of Pianos and Organs sent free.

Address, **DANIEL F. BEATTY, Washington, New Jersey, U. S. America.**

FRANK LESLIE'S
ILLUSTRATED
NEWSPAPER

Entered according to the Act of Congress, in the year 1879, by FRANK LESLIE, in the Office of the Librarian of Congress at Washington.

No. 1,232—Vol. XLVIII.] NEW YORK, MAY 10, 1879. [Price, with Supplement, 10 Cents. $4.00 Yearly. 13 Weeks $1.00.

THE FUNDING CERTIFICATES.

THE popularity of the Ten-dollar Funding Certificates is very conclusively shown by the experience of the depositories where they are offered for sale. At the Post Office, in this city, last week, the sales amounted to from $20,000 to $45,000 daily, and they would have swollen to much larger figures but for the rule of the Treasury Department which prohibits the sale of more than $100 to any one investor. At times the Cashier's Department of the Post Office was thronged with intending purchasers. Among those who early sought an opportunity to make an investment was the venerable Thurlow Weed. The persons who seek these certificates are chiefly of the laboring class, and among the applicants are many women, who desire to place their savings in trustworthy securities capable of being converted into currency in any sudden emergency.

In other parts of the country the purchase of these certificates has been no less active than in the metropolis. They are generally recognized as a safe, desirable investment, and there is no doubt that the entire issue of $40,000,000 will be taken up by popular subscription within the next sixty days. If Congress will only abstain from interference with the national finances, and permit the natural laws of trade and finance to assert themselves without artificial restraints of any sort, we may anticipate confidently that the public credit will be established upon a basis second to that of no other country in the world in point of solidity and security.

FAC-SIMILE OF THE UNITED STATES TEN-DOLLAR FUNDING CERTIFICATE.

NEW YORK CITY.—THE GREAT POPULAR DEMAND FOR GOVERNMENT SECURITIES—INVESTORS PURCHASING THE TEN-DOLLAR FUNDING CERTIFICATES AT THE POST-OFFICE.

FRANK LESLIE'S
ILLUSTRATED NEWSPAPER,
53, 55 & 57 PARK PLACE, NEW YORK.
FRANK LESLIE, EDITOR AND PUBLISHER.

NEW YORK, MAY 10, 1879.

CAUTION.

Subscribers, in ordering our publications, should be careful to write the name of FRANK LESLIE *in full, and direct their letters to 53, 55 and 57 Park Place, New York, from which address all our publications are issued.*

THE GREAT NEGOTIATION.

THE facility and celerity with which the Secretary of the Treasury has been able to refund the outstanding five-twenty and ten-forty six per cent. bonds of the United States into United States Consols, bearing an annual interest of four per cent., are without example in the history of national financiering. Since Mr. Sherman became Secretary of the Treasury he has sold $735,000,000 of the latter, and with the proceeds has redeemed a corresponding amount of the former—thus effecting a reduction of two per cent. on the annual interest payable on this great sum. That on one day he should have received a bid of $195,000,000 for the purpose of "clearing out" the ten-forties, and absorbing the "ten-dollar refunding certificates," is a splendid tribute at once to the credit of the National Government and to the financiering skill of the Secretary who has conducted this vast negotiation to such a successful consummation. That the Secretary should find himself compelled to put a restriction on the bids of great capitalists, in order to afford to people of small means the privilege of investing their savings, during the next two months, in the "ten-dollar certificates" and their multiples, is a gratifying incident which could have been little foreseen a few years ago. On the 17th of June next this privilege will come to an end, and the offers already made for four per cent. bonds sufficient to cover the ten-forty bonds then outstanding will be accepted by the Department. And with that transaction the great refunding process initiated by Secretary Sherman will come to an end for the want of material on which at present to operate. The next bonds upon which a reduction of interest is to be effected do not fall due until the 30th of June, 1881, and at that date the credit of the Government will have been established on such a strong and stable foundation that his successor will find the problem proposed to him not only simplified, but practically solved in advance by the successful administration of his predecessor.

As this great financial achievement marks an important epoch in the civil history of the country, we are called to consider some of the phenomena which it presents in the light of their causes and their probable consequences. Among the causes which have contributed to this successful result we may undoubtedly cite the existing depression of business, which has left a vast amount of idle capital ready to be embarked in the securities of the Government until such time as a general revival of productive industry shall offer the prospect of larger returns for business investments. The maladministration of the savings banks in some parts of the country has also so seriously shaken the confidence of depositors in them that multitudes have withdrawn their savings from those institutions and placed them in Government bonds, where the sense of security is ample if the rate of interest is small. But neither of these considerations can sufficiently account for the thoroughness and dispatch with which this refunding operation has been performed, for at the bottom of the whole movement has been a strong and growing confidence in the credit of the Government. It is this *confidence* which has made the negotiation possible, and it is the *strength* of this confidence which has made the negotiation a splendid event in the annals of finance.

The rate at which a Government is able to borrow money offers an accurate criterion by which we may gauge the estimate of the world with regard to its honesty and its resources. Indeed, the Governments of Europe are often classified according to this scale, and, tried by its standard, we have no reason to be ashamed of the rank that must hereafter be assigned to the public credit of the United States. And all who have contributed in any way to the attainment of this great end may worthily find in it a just source of congratulation as well as of national pride; for this confidence in the credit of the Government has been "a plant of slow growth." The occasions are many when it seemed in danger of being nipped in the bud, but every epoch of peril has been successfully passed, until in the end from "the nettle of danger" we have been able to "pluck the flower of safety." Such an epoch of peril was successfully passed in the year 1869, when, by the Act to strengthen the public credit, it was declared that "the faith of the United States is solemnly pledged to the payment, in coin or its equivalent, of all the obligations of the United States," including as well the United States notes as the interest-bearing debt of the Government. Such an epoch of peril was successfully passed in 1873, when the faith of the Government was publicly pledged to the resumption of specie payments at the opening of the year 1879, and the "sharp corner" of the emergency was successfully turned on the 1st of January last by the punctual fulfillment of the pledge made in 1873. The schemes of repudiation, whether openly pursued or pursued under the disguises of the Greenback Inflationists, have been visited with confusion and overthrown by the final triumph of a financial policy which has brought honor to the Government and security to the business enterprises of the people.

It would be a deplorable fact if a boon like this, so deeply concerning the welfare of the whole nation, could be said to redound wholly to the credit of any single party in the country; but candor compels the admission that if the Republican Party is to be held responsible for many of the mistakes and hesitations committed by its leaders at different stages of the march towards this grand *dénouement*, it should also receive due praise for the pre-eminent share it has had in placing this capstone on the edifice of the national credit. Hanging on the flanks of this forward movement as an obstructor and reactionary force, a large part of the Democracy, especially in the West and South, have done their utmost to embarrass the operations of the Treasury, and can, therefore, claim no legitimate share in the end which has come to crown the work. But if this be a ground of just rejoicing on the part of the Republicans, it should put to shame the senseless cry of the political leaders who are finding in the present partisan complexion of Congress a pretext for the cry of "revolutionary designs" hostile to the stability of the Government. There is nothing more timid than capital, and it is plain that the capital of the country is not at all frightened by the presence of the "Confederate brigadiers" in Congress.

OUR CHANGED COMMERCIAL RELATIONS.

THERE can scarcely be a doubt that this country has entered upon a new commercial era, and that our future will be marked by a wholesome progress and genuine prosperity. There are no shrewder, more sagacious business men than those who manage our great railway system, and all the movements made by them indicate a perception of a rising and swelling tide in our commercial affairs. Thus we find the trunk line managed by Mr. Garrett, of the Baltimore and Ohio, struggling to get a foothold on the Hudson, in order that it may enjoy the superior shipping advantages of our superb harbor. Thus we have Mr. Vanderbilt perfecting the permanent way of his line to the West, erecting elevators and making other terminal improvements in this city, and establishing an ocean freight-line to Europe. Not to be behind in the matter, we find Erie, under Mr. Jewett, reducing its gauge, perfecting its connection to the West, and making extensive preparations for such terminal improvements as will preserve to it a fair share of domestic and foreign freights.

None the less suggestive and important is the action contemplated by the Pennsylvania Railroad Company. The lines of this great corporation traverse eleven States of the Union and cover nearly one-twelfth of the iron highways of the country. It possesses elevators and other first-class shipping facilities in Baltimore and Philadelphia, and runs an ocean line from the latter city. The managers of the Pennsylvania are second to none in discernment, and have not failed to read in the new order of things the necessity for creating more extensive facilities for the accommodation of commerce, both domestic and foreign. Owning an extensive water-frontage at Jersey City, and having their grand terminus at that point, the company are now about to expend more than a million of dollars additional to meet the existing and future wants of transportation. The property hitherto known as the Cunard docks is to be largely improved and made available for the use of the Wilson and Red Star lines of European steamers. Plans are being considered and matured by which the transfer of freight from cars to the steamships will be made direct, and *vice versa*. At Harsimus's Cove the improvements will be on an extended scale. The so-called Union Line Pier at that point is to be wholly remodeled, and so arranged as to give increased track room for the delivery and reception of cars from floats plying between the Jersey and New York sides of the river. A new grain elevator, with a storage capacity of one and one-half millions of bushels, is to be constructed within the bulkhead line, the grain to be carried by mechanical means to vessels waiting to receive it. One hundred and eighty feet above the pier mentioned, a new two-storied pier will be built to accommodate import and export freights. This will be 1,500 feet in length, and 175 feet in breadth. On either side of this pier will be a ship-canal 1,500 feet long and 180 feet wide, both having a uniform depth of water of twenty-six feet. The arrangements will be such that steamers lying in these canals will be loaded and unloaded with great expedition without removal from their first mooring. The company contemplates other important improvements, but as they are not immediately connected with the matter under discussion they need not be mentioned here.

The movements of the trunk lines, and their preparations to ship merchandise from remote sections of the country direct to Europe, and to deliver European freights on one bill of lading to importers scattered along their several routes, are just so many evidences of our changed commercial relations. The growing export trade of the country has called for new action on their behalf. That they are taking such action, supplemented by most generous outlays of money, would seem to warrant the belief that they regard the new order of affairs as likely to be stable and permanent. Every additional million added to our exports means an enlarged market for the farmer, heavier orders to the manufacturer, and a wider field for the employment of labor.

RUSSIA'S REPRESSIVE MEASURES.

THE extraordinary severity of the repressive measures adopted by the Russian Government must very largely alienate the sympathy with the Czar in his struggle with Nihilism which has been felt in this and other countries. The proclamation of martial law in six of the great centres of population is a resort to terrorism which cannot possibly be justified. Under the terms of the ukase, the military officials in the six districts are given the right of imprisoning for an indefinite time all suspicious persons, of transporting to Siberia, without trial, as many as they choose, and of executing, in conformity with sentence passed, those they may happen to regard as especially guilty. Even ordinary offenders, not suspected of plotting against the State, are to be made subject to martial law; and, what is still worse, the decree is retrospective, the Governors-General being expressly empowered to try prisoners arrested before their appointment. Under this authority, the 8,000 or 10,000 persons who have recently been imprisoned in the disaffected districts may be disposed of at one fell swoop if such shall be the pleasure of the agents of the Government. Up to the 23d of April, 2,000 persons had already been arrested in St. Petersburg under this order, and suspected agitators in all parts of the Empire, including officers of the Army, are being taken into custody almost hourly. The well-known novelist, Turguenieff, has been expelled from the country, not, so far as appears, from any actual complicity with the revolutionists, but simply because of his liberal views. The distinguished writer and scholar, by this act of the Government, will be elevated in the affections of his enlightened countrymen to a place alongside of Pushkin and Gogol who, twenty-five years ago, were banished for the same offense of daring to express their faith in the doctrines of self-government. The latest announcement of the Government policy shows that civilians who may be arrested will be tried by court-martial without preliminary examination, and that appeals against judgment will not be permitted unless lodged within twenty-four hours, and even then the discretion of a military governor as to their acceptance will be absolute.

Such a policy as this is simply murderous barbarism, and its outcome cannot be otherwise than disastrous to the Government. Nihilism cannot be suppressed by an appeal to brute force and a suspension of all the orderly and humane methods of Government; its venom will rather be deepened and its seditious tendencies sharpened by the cruel and merciless injustice which, treating the innocent and guilty alike, denies to the citizen the commonest rights inhering in the subject of a Christian State, and ignores all the moral forces which constitute the life and soul of civilization.

COLONIZING THE UNEMPLOYED.

IN discussing the question as to what New York shall do with its unemployed poor, we have on several occasions suggested that it might be well to try the experiment of transferring them in colonies, under a system of modified guardianship, to the unoccupied lands of the South and West. We are glad to see that this method of solving a serious problem is at length receiving attention at the hands of some of our leading citizens. Recently at a private conference of gentlemen of wealth and acknowledged public spirit, an association was formed, to be known as the Co-operative Colony Aid Association, the object of which will be to further the colonization of the unemployed, and so to correct the evils now experienced from the stagnant and depressed state of labor. In outlining the plans of the Association, and illustrating the importance of the work it proposes to itself, a member of the executive committee, at a recent meeting, remarked:

"It was evident that there is at present an increase in the volume of emigration to this port—a new tide seemed to have set in this way, and the people of this city were always liable to feel its effects in the depression of labor, because a large amount of this emigrant influx remained in this city. Again, the enactment by various States and counties of stringent laws against the tramp class would have the effect of driving that class into large centres like New York, and it was time that the solution of the problem was seriously and effectively undertaken. The present condition was all traceable back to one root—to the defects in our social system. To insure the normal and most unvarying conditions of material progress there must be a full and general cultivation of the soil, for it was in this form of material production that the highest prosperity was assured. In France, about one in two of the people were engaged in cultivating the soil. It was said that there are in that country about 6,000,000 persons exercising rights of ownership over the soil, as against about 250,000 in England, and in this country it was computed that only one in five of the population was engaged in cultivating land. The rush to the professions, the commercial, mechanical, and other industrial avocations, in fact to all pursuits except agricultural pursuits, had been unprecedented and abnormal, and it had wrought its logical results by contributing largely to the present distress. The practical question was, what could be done to avert it, and it was to meet this question that those meetings had been called. The plan was to put the advantages of colonization before the people, to aid such as were willing to go if possible, and that eventually, if deemed advisable, the Association should take the form of a joint-stock concern, with a capital of say $50,000, to purchase land in the West, to induce people to colonize these lands and cultivate them, either as employés or as prospective owners by gradual methods of purchase."

The plan here outlined is almost identical with that proposed in these columns in July last, and we have the same confidence now, as then, that if vigorously and intelligently prosecuted, most beneficent results will accrue. Private enterprise having demonstrated the feasibility of this plan of relief, say to the extent of planting one or two colonies of 100 or 200 persons each, making them self-sustaining and ultimately independent, the aid of the Government might properly be demanded, at least in grants of desirable land, and thus in time a population of tens of thousands of honest, industrious, temperate persons, who are now in no sense contributors to the general prosperity, might be established in comfort and plenty and become factors in the development of the national wealth, in communities altogether free from the vices and untoward conditions which surround the metropolitan poor.

THE LATE GENERAL DIX.

IN the death of General John A. Dix one of the most conspicuous figures of American public life disappears from view. Born while Washington was still living, and dying full of honors eighty-one years afterwards, the life of the venerable publicist and patriot covered the whole period of the progress of the country from meagre beginnings to the position of a first-class and imperial State in population and influence. Starting upon his career while the nation was still governed by the men who fought the war of the Revolution, he participated for fifty years in all the great conflicts by which liberty, law and sound government were incarnated more and more distinctly in the polity of the Republic—displaying in every supreme crisis a fidelity to public trust and a courage in the support of right principles which made him a most potential factor in the formation and maintenance of sound conclusions. Such a man needs no studied eulogy, no marble shaft to commemorate his virtues. The narrative of the more salient features and events of his life, fully given elsewhere, constitutes in itself a memorial more honorable than any monument that human hands can build; and we may not doubt that the example of the upright citizen, true patriot and blameless servant of the people, deeply impressed upon the record of his times, will be scarcely less beneficent in its influence, now that he has passed to his reckoning, than it was while he yet remained upon the stage of active duty.

THE FLOODGATES OPENED.

THE floodgates of legislation have been opened in Congress in genuine earnest. On one day recently 1,385 Bills and Resolutions were introduced—the largest number, by 600, ever presented at one sitting. A majority of the Bills presented were of a private nature, to grant pensions and pay claims, and most of the public Bills introduced had failed in the last Congress. Among the measures proposed is a large number relating to the currency, embracing all the schemes upon this subject which have been occupying the attention of the Greenbackers and those who are in sympa-

Digitized by Google

thy with them—such as the unlimited coinage of silver; the issue of Treasury notes to take the place of national bank notes; the issue of fractional currency and recoining of subsidiary silver into silver dollars; the retirement of the trade dollars, etc. Several Bills to impose a tax on incomes were included in the list, with others to provide for the distribution of the unexpended balance of the Geneva award; to enforce the eight-hour law; to provide a constitutional amendment against the payment of rebel claims, and to restrict Chinese immigration.

How far the introduction of this enormous volume of business will effect the determination of the House as to general legislation is yet to be seen. But it is obvious that the supporters of special projects now have it in their power by combinations among themselves to control, more largely than before, the policy of the House, and it will be somewhat unusual, to say the least, if they shall neglect to improve their opportunity.

EVENTS IN SOUTH AFRICA.

THE British forces in South Africa have at length achieved a decisive success over the Zulus, having relieved the garrison at Ekowe, after fighting a desperate battle at Gingialova, where the enemy attacked the relieving column of 6,000 men. The Zulus are represented to have had 10,000 men in the engagement, and fought with great courage and enthusiasm, advancing within thirty yards of the British intrenchments. Their loss is estimated to have amounted to 1,200 men. Ekowe was subsequently abandoned by the English, and a new post established on the coast road, with which communication can be more easily maintained. On the 28th of March, a column of British troops under Colonel Wood was surprised by a heavy force of Zulus near Luneberg, and in the engagement which ensued lost 220 men in killed and wounded, including several officers. The Zulu loss is reported at 2,500, which is, perhaps, an exaggeration.

Meanwhile, fresh complications are threatening the British authority in the Transvaal. The Boers, who have always chafed under the annexation of their territory to the British possessions, are insisting upon a restoration of their independence, and the latest reports indicate that they will take up arms unless their demands shall be complied with. Should such a policy be finally determined upon, the difficulties of the British situation would be greatly aggravated, and a temporary prostration of their power in South Africa might ensue, involving a general reconstruction of the administration of the so-called Republic. However this may be, it is quite certain that Disraeli will not be able for some time to come to announce that he has "brought peace with honor" from the bloody fields of Zululand.

IN THE OLD WORLD.

THE events of the week in Zululand and Russia, deserving of special mention, are referred to in another column. From Afghanistan, there is a renewal of the rumor that Yakoob Khan is disposed to treat with the British; it is also said that Mohamed Hasham, son-in-law of Shere Ali, now the only avowed claimant to the Afghan throne, is endeavoring to excite an insurrection and has opened negotiations with the invaders. The promised advance upon Cabul does not seem to have been as yet commenced, and the British Government apparently begins to realize that such a movement will be, under any circumstances, a perilous undertaking. The Manchester *Examiner* says of the situation:

"It is clear from our experience at Candahar that a British force in possession of any of those Afghan towns is in the position of a besieged garrison. It would take a large force to hold Cabul, and the possession of the town would give us no command of the surrounding country. A semi-barbarous capital is not like London, where, if an invader seized the bank, the post-office, the telegraphs and the shipping, he would paralyze the rest of the land. The seizure of Cabul would simply be like lighting a beacon blaze to tell the country where the enemy was to be found and tens of thousands of eager clansmen would rush to the fray. We are already experiencing this evil on a small scale. We have been told again and again of the friendly attitude of some of the tribes, and great hopes have been built upon the probable breaking out of intestine divisions, but every day affords proof that these hopes are imaginary. The truth is that the people are all against us, and that they are ready any day to combine in what would be called in Europe "a war of liberation."

The King of Burmah continues as obstinate in his resistance to British demands as Cetewayo himself, or the late Ameer of Afghanistan, but it is unlikely that he will be as difficult to subdue. The Khédive of Egypt is another ugly customer, but it is improbable that he will be able to extricate himself from the triple cords with which English, French and Turkish influences are binding him. The Khédive has issued a decree creating a mixed Council of State, composed equally of natives and Europeans, under a native President. There will be two European Vice-Presidents and five European and five native members, with two native lawyers. The Turkish Ministerial crisis is over. Osman Pasha, the Turkish Minister of War, has promised Serbia to send troops to the frontier to check the incursions of the Albanians. Turkish troops, it is said, had already joined the army of 8,000 Serbians sent against the Albanians, who had entered and had been devastating Serbia. The invaders have been driven from Kurshumlie. One of the atrocities alleged against them is carrying off a wounded Serbian and roasting him alive. Even more than the Albanians, the Turks dread the Garibaldians, against whose anticipated invasion they have been fortifying the coasts of Epirus.

The visit of Garibaldi to Rome has started many wild rumors of the plans of the veteran revolutionist, both as to Greece and as to Italy. The Italian Government, however, has given Austria satisfactory explanations relative to the Garibaldian agitation, and has dispatched men-of-war to prevent any landing of Garibaldians on the Albanian coast. It has also instructed the authorities of Ancona and Otranto to keep strict watch on all departures. But all these measures might easily prove ineffectual if the enthusiastic old chief has really determined to repeat in behalf of Greece his marvellous exploits in South America and Italy. It was Garibaldi who made Italy what it is to-day, and it is by no means impossible that he still cherishes, if only as a dream, his early ambition of making both Italy and Greece republics before he dies. Ordinary men might well be satisfied with the laurels which the Hero of the Red Shirt has already won; but Garibaldi is, pre-eminently, an extraordinary man. He is one of those providential men whose course in history may be wondered at and chronicled, but not predicted. At a meeting over which Garibaldi presided, in Rome, on April 21st, composed of representatives of Republican associations, it was resolved to agitate for universal suffrage in Italy, and for the abolition of the Deputies' oath of allegiance; and on the 23d, replying to a deputation of the "Italia Irredenta" Committee, Garibaldi declared, says the *Capitale*, that he would sacrifice everything to accomplish the national task. He has opened, adds the same journal, a subscription for the purchase of a million rifles to arm the nation.

While such volcanic fires are kindling in the South of Europe, in the North despotism seems to be freezing into icier forms than ever. In addition to the Government precautions against Nihilism, elsewhere noted, it is announced that the further step of increasing the Russian army by 150 battalions is in contemplation. It is said that Prince Bismarck is conferring with the Russian Ambassador on the expediency of adopting common measures against the Socialists. Meanwhile, the Czar is preparing to go to Berlin in June to attend the golden wedding of the Emperor and Empress of Germany.

The French Republic has encountered one of the annoying "difficulties" predicted by Gambetta—the election of the convict conspirator Blanqui at Bordeaux, in flagrant defiance of both law and order. Perhaps it might have been wiser to have flanked this difficulty by first releasing Blanqui from prison, and thus extracting all poison from his fangs. Another difficulty is the agitation caused by M. Jules Ferry's Education Bill, but the Government is determined to prevent the controversy from taking the shape of political discussions in religious worship by way of pastorals to be read from the pulpit.

Queen Victoria has returned from her continental tour with Princess Beatrice, who has a new, although rather hopeless, suitor in the Duke d'Aosta, the widowed ex-King Amadeus of Spain. But the return of Her Majesty has been less of a sensation in England than the three-fold victory of Mr. Pierre Lorillard's little brown gelding, Parole, on the English turf.

The social event of the week in Europe was the celebration, on Thursday, of the silver wedding of the Emperor and Empress of Austria. Religious ceremonies were held in the beautiful Votive Kirche in Vienna, the city was illuminated, and the whole population united in doing honor to the occasion. On the following Sunday the *fêtes* culminated in a grand procession of the trades, consisting of 30,000 persons and several thousands of horses, and divided into thirty historical groups, in costumes of the fourteenth, fifteenth and sixteenth centuries.

THE German Government has made haste to deny, officially, the statement that it has violated the sanctity of the mails by opening and detaining letters from Americans supposed to be in sympathy with the Socialists. The alleged offense seems never to have any existence outside the imagination of a sensational newspaper correspondent.

THE Government has shown an unexpected clemency in its treatment of the 700 violators of the Internal Revenue laws arrested in Tennessee. In the cases of all the prisoners who entered pleas of guilty and paid the costs of suit, sentence was suspended during good behavior, and it is believed that the result will be in every way salutary, so far as illicit distilling in that State is concerned. Already many legal distilleries have been started in place of the illicit concerns destroyed, and there is no doubt that the public revenues, as the result of the vigorous enforcement of the law, will be sensibly increased.

COMPLAINTS are made from nearly all the fishing towns on the New England coast that our fisheries are declining. Reports and statistics are said to show that there is not one-half the number of vessels belonging to the fishing fleet hailing from the States as formerly, while, on the other hand, the Provincials have started up with renewed vigor, and have done more the year past to extend this branch of industry than for the ten years previous. The decay of this interest would be a very serious matter to our New England fishermen, but we are scarcely prepared to believe that they will permit themselves to be permanently eclipsed in enterprise in so important a field.

THE Government service absorbs the educated intellect of the country to a much greater extent than is generally supposed. A canvas of the departments at Washington shows, it is said, that there are sixty-one graduates of Yale, thirty-five of Princeton, and thirty of Dartmouth, occupying clerkships and other positions in the service, and an equally strong representation from the other leading colleges of the country. These clerkships command salaries of from $1,200 to $1,800, and it is stated that very many of the incumbents, if dismissed, would be wholly helpless. It would seem that any man with a good college education should be able to command higher prizes in life than any in the gift of the Government Bureaus at Washington.

IT will strike the country as a little remarkable that the Democrats of the Senate, while insisting that United States soldiers shall be kept away from the polls, refused to adopt an amendment to the Army Bill, making it a penal offense for any other person to "appear armed with a deadly weapon of any description, either concealed or displayed, within a mile of any polling place where a general or special election for Representatives to Congress is being held." Are we to conclude that party means to exclude from the polls only representatives of the Federal Government who may be sent there in the interest of law and order, and to impose no prohibition whatever on partisan clubs or partisan bullies who may seek, by armed violence or menace of violence, to prevent free and fair elections?

ONE of the Greenback Representatives introduced in the House, recently, a Bill providing for the issue of one billion of dollars in paper money, to aid in building canals and the construction of other internal improvements. The Bill appears to have been introduced without any examination on the part of the illustrious Greenback legislator, and no sooner was it pounced upon by the press as an enormous job and absurdity, than he hastened to repudiate his own child, and declare that he would never, never give it his sanction. It would seem from this incident that the wonderful Greenback reformers who propose to revolutionize our finance and cure all existing business disorders, are in the habit of proposing panaceas which they have never themselves analyzed and about which they personally know nothing whatever. It may be doubted whether the country will manifest much eagerness to submit itself to the treatment of quacks who do not even know the constituent qualities of their own prescriptions.

IT IS announced that Edison's labors and experiments in the matter of electric illumination have at length culminated in success, and that he has taken out letters patent covering two distinct inventions by which, it is claimed, the electric current can be so regulated and distributed as to afford a perfect light at a minimum cost to a great number of burners in one circuit. The precise points in these inventions are thus described by the *Herald*: "First, a means of regulating automatically the electric current passing through an incandescent conductor, so as to prevent the temperature of the latter from rising to a melting or fusing point. Second, by causing the heat generated by the incandescence of the conductor to expand the air or fluid filling the chamber of the lamp, and thus move a diaphragm or other yielding material, which operates so as limit the passage of the current through the conductor to a degree no more or less than will be sufficient to produce a given amount of light by the incandescence of the conductor."

NEWS OF THE WEEK.

Domestic.

EX-JUDGE GEORGE G. BARNARD died at his residence, in this city, April 27th.

MINISTER STOUGHTON is on his way home from Russia, and his resignation is not improbable.

POLICE CAPTAIN WILLIAMS has been acquitted by the Commissioners on all charges preferred against him.

THE summing up in the Talmage case before the Brooklyn Presbytery will commence on Thursday of this week.

CHARGES against Sheriff Reilly, of New York, have been submitted to Governor Robinson by the Bar Association.

TWO FATAL cases of hydrophobia have occurred in Brooklyn, N. Y., one victim dying, April 23d, the other on the 24th.

BY order of the Treasury Department 50,000 ounces of silver per week will hereafter be purchased for coinage at the New Orleans Mint.

ON account of a defect in the information, Judge Bond has ordered the jury to return a verdict of not guilty in the Barnwell (S. C.) case.

EXTENSIVE forest fires are raging in northern Michigan, and much valuable timber is being destroyed. The weather is hot and the woods dry.

THE Massachusetts Legislature has passed a Bill making liquor-sellers responsible for all damages accruing from the sale of intoxicating beverages.

THE Government has issued an order prohibiting the occupation of the Indian Territory by intending settlers, the lands not being open to settlement.

SHOULD the President veto the Army and Legislative Appropriation Bills, it is believed Congress will adjourn without voting money for the current expenses of the Government.

GENERAL PATRICK has prohibited the importation into New York State of any cows or other stock cattle from New Jersey, because of the prevalence of pleuro-pneumonia in that State.

THE Notre Dame Catholic University, near South Bend, Ind., which was enriched with gifts from the late Napoleon III., has been destroyed by fire, together with the valuable library.

THE New York Assembly has passed resolutions according General Grant a welcome on his return, and censuring Congressional obstructionists. The Legislature passed the Civil Code on April 25th.

SIX men were buried by the caving in of No. 10 colliery at Sugar Notch, near Wilkesbarre, Pa., on April 23d. A large rescue force was set to work at once, but at last accounts the entombed miners had not been reached.

THE United States Senate, April 26th, rejected a resolution that no Union soldier shall be dismissed from office in the Senate Chamber without cause, and that no Confederate soldier shall take the place of a dismissed Union soldier.

THE Senate passed the Army Bill, April 26th, by a vote of 40 to 31, all amendments being rejected. The House, last week, was occupied in the debate of the Legislative Appropriation Bill, which was passed, April 26th, by a vote of 149 to 119.

THE body of Colonel Dwight, who had insurance to the amount of $250,000 on his life, has been exhumed at Binghampton, N. Y., at the instigation of the insurance companies interested for a new investigation into the cause of death.

THE council of foreign bondholders, through their New York agents, have notified Governor Holliday of Virginia of their acceptance of the plan of settlement of the Virginia State debt as provided in the Bill recently passed by the General Assembly.

A COMMITTEE of Arbitration having been selected by the Joint Executive Committee of the trunk lines and their Western connections, a decision was reached on April 24th that inland rates on all goods for export from the West should be maintained.

SEVEN hundred violators of revenue laws appeared before the United States Circuit Court in Nashville, April 21st, and 175 accepted Attorney-General Devens's amnesty. It is believed that all the others against whom suits are pending will likewise yield.

MR. AUGUST BELMONT was thrown from his carriage, April 22d, at Sixth Avenue and Fifty-ninth Street, by a carelessly-driven grocer's cart, and was dragged for some distance over the pavement. He was severely but not dangerously hurt. The driver of the wagon was arrested.

GOVERNOR ROBINSON refused to sign and would not veto the Apportionment Bill passed by the Legislature of New York, and it accordingly became a law on the night of April 22d, by lapse of time. In vetoing a Bill on the 25th, the Governor expressed his disapproval of representation on a party basis.

Foreign.

SIXTEEN professors in different Russian Universities have resigned.

THE widow of Walter Savage Landor, the poet, died recently in Florence.

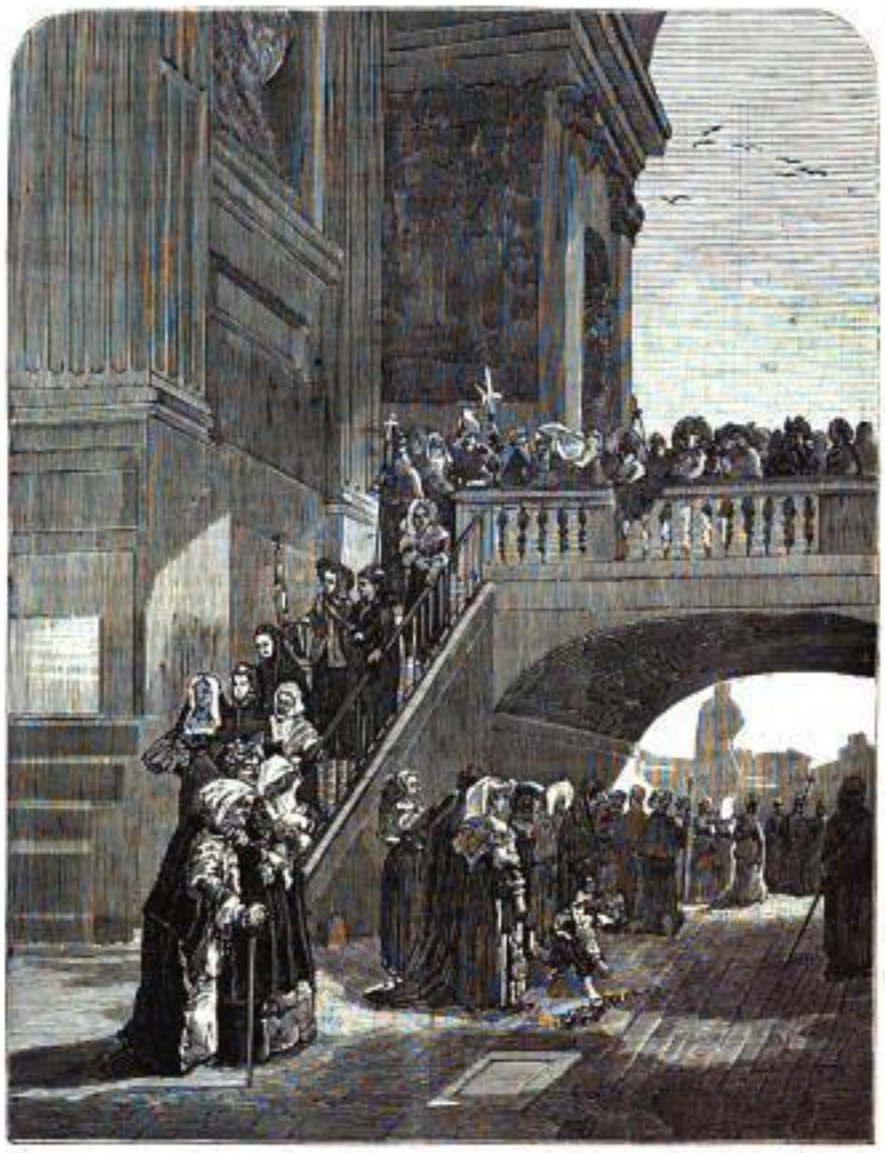
A CONGRESS of English miners will be held in May to decide upon the question of stopping all mining for a month.

THE Kaiser Wilhelm has raised General Von Werder to the rank of Count, and permitted him to retire from active service.

FRANCE has issued a circular to the Powers recommending them to jointly take up the question of the Greek claims for settlement.

THE six days' walking match in London, terminated April 26th. The score stood: Brown, 542 miles; Corkey, 492; Hazael, 473, and Weston, 464. Brown has beaten the fastest record by 21 miles.

THE number of persons killed by the fire-damp explosion in the Agrappe coal pit, near Mons, Belgium, April 17th, is ascertained to be 117. Only forty-seven corpses have so far been recovered.



PIERRE LORILLARD'S Parole won the City and Suburban Handicap at Epsom, on April 23d, and the Great Metropolitan Stakes on the 24th. The horse is also entered for the Ascot stakes.

THE town of Pisagua, in Peru, has been bombarded by the Chilians, Iquique is still blockaded, and the business of the country is entirely disorganized. England is contemplating the advisability of declaring neutrality in the war.

THE returns from the Spanish elections show the following: Ministerialists elected, 275; Constitutionalists, 32; members of other parties, 38. Among the Deputies elect are Señors Castelar, Sagasta, Echevarrey and Martos. A great number of electors abstained from voting.

THE LATE MAJOR-GENERAL JOHN A. DIX.

GENERAL JOHN A. DIX, who died at his residence in New York City, April 21st, was born on the 24th of July 1798, at Boscawen, N. H. His father was a soldier of the Revolution, and he afterwards commanded in the war of 1812. At an early age young John A. Dix was sent to the academy at Salisbury and afterwards to that at Exeter, where he was under the care of the well-known Dr. Abbott. In 1811, when, only thirteen years of age, he entered a college at Montreal which was under the direction of the Fathers of the Sulpician Order. His academic career was terminated by the war of 1812, and his father being placed in command at Baltimore, the son was appointed a cadet in the United States Army and joined his father's command. His duties were those of an assistant clerk, and his leisure hours he devoted to study in St. Mary's College. In history, literature and the languages he became proficient, and found much employment in later years. He made a translation of the "Dies Iræ," which many Latin scholars consider the best of the many that have been made.

In March, 1813, the Secretary of War offered young Dix, without solicitation, the choice of a scholarship at West Point or an ensigney in the Army. He chose the latter, and entered the Fourteenth Infantry, of which his father was Lieutenant-colonel, and immediately went with him to Sackett's Harbor. He was now the youngest officer in the Army. In 1813 he was appointed an adjutant in an independent battalion, with which he descended the St. Lawrence River and shared with his comrades in the perils and disasters of that unsuccessful expedition. In the same year his father died, leaving eight other children and the mother living. He remained in the Army until 1826, when he married and retired. Settling at Cooperstown, in this State, he entered into political life as a Democrat, quickly rising into prominence. He was first made Adjutant-General of the State; in 1833 he was elected Secretary of State for New York, which office then made the incumbent a Regent of the University, a member of the Board of Public Instruction, of the Canal Board, and a Commissioner of the Canal Fund. He was warmly interested in educational affairs, and by his forethought and energy school libraries were introduced into the public and district schools, and the School laws of the State were codified and systematized.

His services as a State officer had made him well-known to the people of Albany, and they elected him in 1841 and 1842 to represent that county in the Legislature. General Dix, in his Albany career, was one of the famous "Albany Regency," and not one of the least among that coterie, which included such men as Van Buren, Marcy, Croswell, Bronson, Dickinson, Wright, Flagg, Beardsley, and others of that stamp. In 1844 he was elected to the United States Senate, to fill the unexpired term of Governor Silas Wright, who had resigned his seat in order to run for Governor and by his popularity save the State to his party. He took his seat in the Senate in January, 1845; was made Chairman of the Committee on Commerce, and a member of the Committee on Military Affairs. It was in these times that the slavery question came forward as the question of the day. General Dix took the Free Soil side of it, and became in the end the leader of that wing of the Democratic Party in this State; but as its nominee for Governor against Hamilton Fish, he was defeated in the Fall of 1848. His Senatorial term expired in March of the following year, and he was succeeded by Senator Seward. We next find Governor Dix taking an active part in the Presidential campaign which ended in the election of General Pierce, he being a warm supporter of that gentleman. When Pierce was elected, he tendered the office of Secretary of State to his eminent New York supporter; but General Dix's free-soil opinions were exceedingly distasteful to the Southern Democratic leaders, and they so managed matters as to force General Dix to decline the office in favor of Governor Marcy, and the appointment of Minister to France, which was subsequently offered to him, he was by the same means compelled to decline. He, however, when Pierce became President (March, 1853), accepted the position of Assistant United States Treasurer in New York; but when John Y. Mason was immediately after appointed to the French mission, he resigned the office, apparently disgusted with the insolent intolerance of the slave power.

From this time he devoted himself to the duties of his profession until 1859, when he was appointed by President Buchanan Postmaster of New York, in place of Isaac V. Fowler, who had absconded. In the latter part of 1860 Howell Cobb, of Georgia, resigned the office of Secretary of the Treasury. The finances of the Government were then in a deplorable condition. It was found impossible to do anything without the aid of capitalists in New York. In a few weeks a delegation hastened to Washington from this city and insisted with President Buchanan that the Treasury Department must be placed in the hands of one in whom they had confidence, and avowed that they would not be satisfied unless the appointment fell upon Mr. Dix. In the following January Mr. Dix assumed the duties of the office. Not long after this, Major Anderson made his famous movement from Fort Moultrie to Fort Sumter, which so excited the indignation of Secretary Floyd that he threatened to resign if Anderson was not ordered back. Thereupon Mr. Dix at once told the President that the recall of Major Anderson would

THE LATE MAJOR-GENERAL JOHN A. DIX.—FROM A PHOTOGRAPH BY SARONY.

Digitized by Google

be a signal for the immediate resignation of himself and Messrs. Stanton and Holt, also members of the Cabinet. This decided the wavering Executive, and Mr. Floyd left the Government.

On the inauguration of President Lincoln in March, 1861, Mr. Dix retired from the Cabinet. Not long after this the great Union Square meeting was held in this city, and organized the Union Defense Committee, with him as its chairman. From this time on for several years Mr. Dix's public services were transferred from legislation and the affairs of State to the seat of war in the South. Early in May he was appointed Major-General of Volunteers, and in the following June President Lincoln gave him a similar position in the regular Army. On July 20th he was appointed to the command of the Department of Maryland, and ordered to Baltimore, where he took up his headquarters. This was at a critical period in the breaking-out of the Rebellion, and General Dix's command made the first successful military movement of the war. He sent General Lockwood into the Counties of Accomac and Northampton, Va., known as the Eastern Shore, with orders to occupy it and drive out the few rebels that might remain.

By the mildness of General Dix's government these counties were restored to the Union, while every other part of Virginia was in arms and became desolated with war. In 1862 General Dix was transferred to Eastern Virginia, and made his headquarters at Fortress Monroe, commanding the Seventh Army Corps. In June, 1863, at the junction of Pamunky with the York River, he threatened the safety of Richmond and interrupted communications with General Lee, who was then advancing along the Peninsula. About this time President Davis wrote to General Lee that the movement had "rendered him more anxious for the city than at any former time." In July of the same year the Department of North Carolina was added to that of Virginia, and General Dix placed in command of both. He soon afterwards commanded the Department of the North, with headquarters at New York, where he remained until 1866. His command thus covered the period of the draft riots. In 1866 he resigned his office. During the stormy controversy of President Johnson with leaders of the Republican Party he supported the President. In August, 1866, he was temporary chairman of the National Union Convention which met in Philadelphia. A few months later the President nominated him for Naval Officer at New York, and soon after for Minister to France, in place of the Hon. John Bigelow, who had resigned. The latter he accepted, and was presented to the Emperor in January, 1867. In 1868 he resigned the French mission, and returned to the United States. He became president of the Pacific Railroad when it was organized, and at the time of the overthrow of the directors of the Erie Railway, in 1872, he was made provisional president. In 1872 the Republican Party nominated him for Governor of New York against Francis Kernan. He was elected by a majority of nearly 53,000, and during his two years of office instituted many reforms in the financial affairs of the State. Renominated in 1874 against Samuel J. Tilden, he was defeated.

General Dix was nominated for United States Senator in 1874, but the Legislature being Democratic, it was only as a compliment. He took an active part in the campaign of 1876, doing very effective work in the organization of "Boys in Blue." General Dix became, in the same year, the Republican candidate for Mayor of this city, but was defeated by Smith Ely.

In the last years of his life his health was well preserved, and the absorbing interest he always took in politics did not appreciably diminish with the approach of old age and its infirmities. General Dix was the author of several books, among them "Resources of the City of New York" (1827), "Decisions of the Superintendent of Common Schools of New York and Laws Relating to Common Schools" (1837), "A Winter in Madeira" (1851), "A Summer in Spain and France" (1855), and two volumes of "Speeches." In person he was of medium height, with a closely built, though not robust, frame. His bearing on military occasions was commanding and soldierly in an eminent degree.

Official notice of General Dix's death was taken by the President and by Governor Robeson of this State, the former of whom issued an Executive order commanding all proper respect to be shown to the memory of the deceased by the Government Departments with which he was formerly identified; while the latter, in a message to the Legislature, urged that body to give expression to the universal sorrow felt by the people. The courts of the State and various public bodies also took formal notice of the sad event. Mayor Cooper transmitted an appropriate message to the Common Council, in response to which appropriate action was taken. One of the first messages of condolence received by the family was from Secretary Evarts, on behalf of the President of the United States, addressed to Mrs. John A. Dix, and couched in these terms: "The President desires me to express to the family of General Dix his sincere sympathy in their bereavement and his cordial participation in the universal respect for his life and character." In addition to the official notice of the event, a message was received from the White House addressed to Mrs. Dix, and running as follows: "The President and Mrs. Hayes wish to assure you of their sincere sympathy."

The funeral of the deceased General took place on Thursday, April 24th. The services were held at Trinity Church, and were marked by the utmost simplicity, the venerable patriot having left a letter requesting that he should be buried simply as a private citizen and a member of that church. He expressly commanded that no eulogy should be delivered over his remains, and that no address whatever should be made at his funeral. The attendance embraced persons eminent in all branches of business and professional life. The pall-bearers were Chief Justice Charles P. Daly, the Hon. John Jay, the Hon. Edwards Pierrepont, ex-Governor E. D. Morgan, Major Cooper, John J. Cisco, Thurlow Weed, Charles O'Conor, General Cullum, Dr. Rufus H. Gilbert, A. A. Low and Cyrus W. Field. The remains were inclosed in a casket covered with black velvet and decorated with heavy silver handles. The inscription on the casket was on a very thick silver plate, and read:

JOHN A. DIX.
Born, July 24, 1798.
Died, April 21, 1879.

There was no pall over the casket. In its place was the American flag, which completely enveloped the top, and was arranged in graceful festoons at the sides. There were no flowers, the deceased having expressly requested that no floral display should be made. The chief mourners who followed the casket were the Rev. Dr. Morgan Dix, Mr. and Mrs. Blake, and Mrs. Walsh, the two ladies being daughters of General Dix. The services were conducted by Bishop Potter, assisted by Rev. Drs. Weston and Swope. The organ selections were played by Mr. Henry Carter.

The remains were deposited in the Morgan vault in the churchyard, the sad rites terminating with brief prayers and the Episcopal benediction.

A NIGHT IN DELHI.

I HAD been detailed by the colonel commanding the post to guard, with my company of cavalry, one of the approaches to the celebrated Black Hills, with peremptory orders to turn back all whom I might find trespassing upon the forbidden ground.

I selected for my camp a beautiful little plateau, some three hundred feet above the vast plain, and as the sun disappeared in the west the smoke of the camp-fire curled and twisted through the pure atmosphere, while the men picketed their horses, impatient for the evening meal.

Giving a few words of caution to the sergeant, an old and efficient soldier, I strolled off from my quarters, leaving orders for the bugler to sound a note or two when my coffee and hardtack was ready.

It was a varied, hilly country, marked by canyons with steep sides, pleasant dells and rolling plateaus. The mighty expanse of plain like a vast sea stretched out before me, the outlines softened by distance, while the soft hue of the shadows, the shimmering glimmer of vapor, covered it with a thousand tints and changing aspects. The mirage is a common apparition to the locality, and the sheen of the air often causes glistening sheets of water to appear, as they do in the Desert of Sahara to the despairing traveler, only to disappear upon closer inspection.

With my field-glasses I was sweeping the horizon, which was barely perceptible in the soft twilight, to discover, if possible, any signs of the white-canvased wagons, well termed the "schooners" of the prairies, when a cry, sharp but tremulous, penetrated the deep, unbroken silence of that vast solitude.

In an instant I was on the *qui vive*, glasses slung and sabre drawn, as I bent forward, listening intently, my heart beating with increased rapidity as the suspense and twilight deepened around me.

Sad, almost despairing, was the cadence of the voice which echoed through the canyons and gullies. There was no mistaking that cry—it was that of a fellow-creature, a man, and he in danger.

I started off at the top of my speed, keenly on the alert, closely scanning every tree, rock and clump of shrubbery that lay scattered on either side of my path.

The steep, precipitous sides of a precipice, running at right angles to the path I was pursuing, arrested my progress, but from the misty depths below came a hoarse shout for assistance.

Did my ears deceive me, or was it possible that the voice came from the depths below?

Stretching myself at full length along the brink of the chasm, I glanced downward.

Suspended in mid-air by a lariat so fine as to be scarcely distinguished from the dark, gray sides of the canyon, was the body of a man, swaying to and fro, at the mercy of every blast which drew down through the gulch.

For an instant I must confess that my self-possession was at fault. I was incapable of moving or uttering a sound.

But my wretched indecision was but momentary.

Another instant and the horse-hair rope was firmly grasped in my hands.

"Below there! Help yourself all you can, and I'll land you on the plateau here! Look out for yourself now! Here goes!"

And with these words I planted my army boots firmly against a fallen log deeply rooted in the earth, applying all my strength to the difficult task before me.

I was counted one of the strongest men in the corps, stood six feet two in my socks, and took an especial pride in my endurance and muscle; but I never had any feat or trial of strength put me to my mettle as that did.

Slowly, inch by inch, the lariat was coiled in writhing folds at my feet, my arms ached, muscles cracked, and every cord and sinew in my body stood out like whip-cords; but I accomplished it, and had the satisfaction of landing the stranger beside me on the edge of the cliff.

No wonder he had weighed down so heavily. The poor fellow had fainted.

He was attired in the ordinary hunting garb of a frontiersman, but the long, fair side-whiskers, blonde mustache, light complexion and aristocratic features were sufficient proof that he whom I had rescued was no common miner or borderer.

Then his hands were small, symmetrical and delicate as a woman's, but lithe and sinewy, as could be readily seen, despite the bronzing they had received from exposure.

On the little finger of his right hand sparkled a ruby of such rare brilliancy and large proportions as to excite both my wonder and admiration.

Who the deuce could he be, and what brought him with his ruby to the Black Hills?

Both of my questions be answered fully and to my entire satisfaction.

He opened his eyes as the night dew fell refreshingly on his bared breast. They were blue—unmistakably so—and sharp as the point of my sabre.

"Ha! What, am I still in the land of the living? Am I saved? Ah, I see it all, now!" and the stranger passed his hand slowly across his brow, as he struggled to a sitting posture.

"Do not distress yourself—rest easy. I am happy to say you are safe," and I kicked the slippery lariat from my path with an aversion I could not repress.

"You are a soldier, sir, and to you I owe my life," exclaimed the owner of the magnificent ruby, as he rose to his feet, displaying proportions that would have driven a recruiting-officer half-wild with delight.

"Lieutenant Jack Trunnion, at your service," I replied, lifting my army-beaver involuntarily.

And I——" here he fumbled in his pocket for a card; then, as if realizing where he was, broke in with an impatient exclamation, "Pshaw! I am not in Regent Square. My name is Charles Arthur Howard, Lieutenant-colonel of Her Majesty's Tenth Hussars."

"Colonel, I am happy to make your acquaintance, still more so to have met you at such an opportune time," and I pointed significantly to the cliff.

"Gad, Trunnion, you may well say that. Perhaps you would like to learn how I got there?"

"Exactly; but suppose you give me the particulars as we walk down the plateau to my camp. I hear the signal for supper, and I can give you a soldier's welcome if you will share a soldier's fare."

"My dear fellow, spoken like a true knight of the sword;" and as the Englishman's hand grasped mine I received sufficient proof that his strength had not suffered by his mishap.

"I am on leave, you know. Came over to see my cousins across the water and look at the country. I have broiled on the plains of India during the Sepoy rebellion—in fact 'twas there I got this," and he displayed the ruby. "I have wandered over the dreary wastes of Australia, hunted in the jungles of Africa, but, 'pon my soul, I never had such a narrow escape from death as that from which you rescued me.

"I joined a party at St. Louis who organized for the purpose of prospecting these hills. I did not care for the gold, you know, but I was anxious to see the country. We got here all right, but in the excitement that followed, the greed of gain and general distrust, the party broke up, leaving me to pursue my way alone. I wished myself well out of the scrape, but here I was.

"Yesterday afternoon I fell in with six fellows who looked upon me as an interloper. They were as precious a set as ever escaped a gallows, and before I could bring my Manton to my shoulder, they had me foul, you know—they did, by gad! Well, I was robbed in the twinkling of an eye, everything was taken from me but this ring, which escaped their notice, and deuced glad I was of it, for not only do I value it for its intrinsic worth, but more especially for the reminiscences connected with it.

"But I smell the savor of your camp-kettle, and I'll cut my yarn short. Some of the fellows were for cutting my throat, others suggested blowing my brains out as the easiest method of disposing of me, but it was finally compromised by hanging me over the cliff, leaving me to dangle to and fro with the assurance that buzzards would pick my bones. But you helped me out, Trunnion, and, by gad, I'll not forget it, you know. But here we are amongst your fellows, and, hang me, but I feel as if I had a new lease of life!"

I suggested to Colonel Howard the propriety of capturing the scoundrels, and, calling the sergeant, I gave him the particulars, with orders to beat up the bush with twenty files. Five minutes afterwards the detachment left the camp.

Stretched on the bright greensward in the fitful blaze of the cheerful camp-fire, with a canteen of whisky and a brace of pipes in full blast, my friend appeared to be in his element. The wild scenery, situation and influences of the hour were in perfect keeping with his restless spirit.

"Who would exchange this life for the humdrum life of a country gentleman, or a seat in the House of Lords? Hang it, but I've a mind, you know, to resign all pretension to my title of nobility, and join the Stars and Stripes. Blood—pshaw! I for one am not a believer in it. But, Trunnion, come, fill your pipe; pass the canteen over here till I brush the cobwebs out of my throat, and I'll give you a reminiscence of the siege of Delhi, together with the history attached to this ring."

Unbuttoning my uniform jacket and casting my sabre to one side, I assumed an easy attitude, while Sir Charles, after running his fingers through his luxuriant whiskers as if refreshing his memory, began as follows:

"I was captain in the Queen's Dragoon Guards, which was attached to the army under General Sir Henry Barnard, who had invested the city of Delhi, which was full of the cruel mutineers of Bareilly, Moradabad and Shahjehanpore.

"For weeks and months the siege went on, the men suffering from the terrible heat, sunstrokes, cholera, jungle fever and wounds. But by night and by day the incessant boom of cannon was heard, the sharp crack of Enfield rifles resounded from broken walls, ruined villas and detached tombs, while Delhi, with its marble domes and minarets, glowed in the scorching sun by day, and shimmered in the moonlight by night. By Jove, it makes me dry even now to think of what we endured, with the atmosphere like the air of a furnace, the clouds of whirling white dust, and musquitoes thick as sand on the sea shore. Ah, thank you, Trunnion, I prefer this to all the sparkling wines ever made, you know. But to resume. Our uniforms soon vanished, and I found myself rigged out in a loose, white, cotton blouse, a pair of red, baggy pants, long buff Cawnpore boots, and a cork solar topee, ornamented with a silk scarf of crimson hue. It was a curious-looking army, but we looked more uniform when the scarlet of fresh European regiments, together with the fancy dresses of the Sikhs and Rampore cavalry, who still remained loyal, joined us. I occupied an old deserted temple to the extreme left of the main army, and my company, dismounted, performed picket duty in good rifle distance from the outer walls of Delhi.

"One night, near the middle of September, as I sat beside a broken pillar watching the lofty peepul-trees and date-palms waving in the breeze, I was startled by the hoarse challenge of the vidette, followed by the ominous rattle of his accoutrements as he brought his musket to a charge. By gad, it startled me, so much so that I drew my sabre, but sheathed it again when I found myself confronted by a slender Hindoo girl whom the sentry had detected stealing towards the outposts from the city.

"'Who and what are you?' I demanded, 'and what do you want here at this hour?'

"'Salaam, sahib,' responded the girl, meekly. 'I come from Delhi, and I am the *ayah sahyah* of Mem'r Pearl Stanly.'

"'And who may she be?' I inquired, indolently, as I leaned against the trunk of a palm.

"'She is a beautiful Feringhee, sahib, the daughter of a sahib now murdered. But she lives. I hid her from the terrible men, the Sepoys, who killed all. But to-day she was discovered, dragged to the presence of a Mahratta chief, and unless you save her she will surely perish.'

"'What would you have me do, girl?' and the blood began to course through my veins as I anticipated her answer.

"'Follow me into Delhi and save your country woman and my mistress, sahib.'

"My mind was made up in an instant—it was, by Jove!—so calling the first lieutenant, I told him my object, and left the command in his hands, despite his efforts to restrain me.

"Ten minutes afterwards I was gliding along in the shadow of the great wall, with the Hindoo girl slightly in advance.

"We halted on the banks of the Jumna, where with dexterous hands the girl dyed my face with the juice of a beetle-nut, and throwing a loose mantle over me, which completely hid my dress and weapons, she pressed her finger to her lips in token of silence, then motioned for me to enter a light shallop floating at our feet. I must confess that I felt rather nervous. Trunnion, by Jove, you know it was decidedly a ticklish adventure. But it was too late to turn back, for the next instant we shot through a narrow gateway, and I found myself inside the city, in the very midst of the cursed Sepoys. By gad, it was enough to try the nerves of the strongest. For aught that I knew, the girl might be luring me to destruction. But it was in a good cause, and if I could but aid one of my poor country women who had suffered so much from the hands of the demons, I would be satisfied with the exertions I had made and the risk I had run. Hugging the bank, the boat floated on unnoticed by the round towers of the Selinghur Fort, the glittering towers of the palace, and the line of boats which formed a bridge, under which flowed the broad river. All was still save the howling of some hungry jackal, even the shrill voice of the *chowkeydar* (watchman) was silent. A slight movement of the paddle and the bow of the shallop grated on the terraced shore of a high bank in the rear of a building surmounted by a tower, which shone with a dead white lustre in the pale starlight. The boat was carefully secured; then, keeping well in the obscurity, gliding from tree to tree, I followed my trusty little guide, my hands grasping both revolver and sabre. A click of a door-latch, and we were inside the house. I was involved in darkness. I hesitated for a moment, but a soft hand grasped mine, a low voice whispered:

"'Remember *mem* sahib.'

"'Lead on,' I replied; but, by gad, Trunnion, I would have given a month's pay for a trifle of light.

"'Let the sahib remain still until I return,' whispered the Hindoo, and before I could ask for an explanation my guide had disappeared.

"Left to my own reflections, which were none of the pleasantest, I can assure you, I thought seriously over the adventure I had so madly engaged in. The silence was oppressive, the darkness still more so. My blood began to boil with impatience, and another instant would have found me forcing my way out, revolver in hand. But it was lucky I did not act upon the impulse of the moment, you know, or I might not have been here with you to-night. As it afterwards proved, I was in the private dwelling of Koodeu Sing, a distant relative of the old King of Delhi.

"Again I felt the soft pressure of the girl's hand. In an agitated whisper, she said, 'Come, sahib, you have no time to lose.'

"We ascended several flights of steps, which I knew to be marble, from the peculiar sensation I experienced as I walked. The faint glimmer of a light, some distance in advance, greeted my eyes. A faint sob burst from the girl as she pointed towards it. 'Your duty is there, sahib,' and the next instant I was alone.

"'Cool, by gad!' I muttered, as I stole forward cautiously, with my drawn sabre ready for use.

"At the end of the passage I paused behind a pillar of stone, which served as a support to the roof above. The apartment was empty, but my keen eyes detected a pair of rose-colored curtains which were suspended from the ceiling, behind which I heard the low murmur of voices.

"The stone pillars formed a complete circle round the hall, while I stole from one to the other until I found myself close beside the heavy folds of silk. I listened, and, by gad, the soft, musical tones of a woman's voice fell upon my ear. She was pleading to one who answered in the harsh, guttural tone so common to the native of India. Cautiously I pulled the curtains aside, for I realized, you know, that I was treading on dangerous ground; and—must I confess it, Trunnion?—I felt a most uncomfortable feeling about my throat.

"Imagine, if you can, an apartment built of snow-white marble, ornamented with mosaic-work, arabesques and sculptures in relievo. A ceiling of rose-colored silk covered the roof, and the air was heavy with the perfume of attar-of-roses. Sandalwood and the sweet-scented grass of cashmere were burning in silver brackets, and the entire room was redolent with voluptuous perfumes.

"On a howdah covered with a cloth of gold reposed the form of a woman, and by the light

Digitized by Google

from the wax tapers, I could see she was both young and handsome. I can describe a charger better than I can a female, Trunnion, so spare me on that subject.

"Before the pale girl stood a native, who instantly attracted my attention. He was tall, lithe and powerful, his muscular frame partially displayed by the fine tight-fitting shirt of muslin which he wore. His pants of crimson silk were girded by a cashmere shawl, while a snow-white turban, with this ruby and a feather of the same hue, surmounted his head, contrasting strongly with the dark, copper-colored and ferocious visage which glowed beneath the voluminous folds of his head-gear. His coal-black beard swept his breast, and, taken all together, by gad, he was no foe to be despised, especially as I had noted a fine Coorg sabre by his side.

"'Speak to me, light of my soul! Smile upon me once, and, beautiful Feringhee, I would rob the city of jewels to lay at your feet,' and he tried to insinuate his arm around her waist. But she started up with a scream of terror. A scowl of fearful import passed over the native's face as he folded his arms and fell back a pace.

"'Hear me,' he hissed, with difficulty restraining his anger. 'I have saved your life when it hung by a thread. I have honored you with an offer of my love when I might have abandoned you to the *bunnaishes* of the city, and the *kudalas* of the gutters. Too long I have trifled with you, and now Koodsu Sing claims his slave,' and the next instant the helpless girl was struggling in his powerful embrace.

"By gad, that was more than I could stand, you know; and, dashing the curtains aside, I bounded forward. But the quick ear of the prince had detected the ring of my heel on the marble flagging; he turned with the rapidity of a tiger, pistol in hand, glaring at my rig as if to satisfy himself that I was worthy of his august wrath.

"Quick as lightning his weapon was leveled, the dark tube looked me full in the face; there was a report, the ball spun the cork helmet from my head, which it cleared by a hair's breadth. 'Touch and go, you black nigger!' I shouted, as I sheathed my Sheffield in his carcass. He fell on the pavement dead. I tore the turban from his head, slipped into his red pants, and just had time to extinguish two-thirds of the candles when a Mahratta warrior drew the curtains aside.

"It was a fortunate idea of mine, by gad, in personating Koodsu Sing. The shadow of the howdah hid the body of the prince, and I haughtily waved the intruder back. With a low salaam he obeyed, and I was left alone with the unconscious girl.

"'Quick, sahib, your life and hers depend upon your haste. The palace is alarmed. In ten minutes all will be known.'

"With the girl I had rescued in my arms, I lost no time in following the footsteps of my faithful guide, who had not deserted me. She seemed to fly so great was her terror and anxiety. You may depend, Trunnion, I felt better when the cool rush of the morning breeze fanned my heated brow. We had gained the garden; at the same instant the harsh clang of an immense gong boomed through the air.

"'Hasten, hasten, by the holy Ganges, I conjure you!' almost shrieked the Hindoo, as I started on a run for the bank of the river. Another moment and the boat would be reached. Lights were flashing from every window, the shouts of men echoed on all sides, and the alarm spread like wildfire through the city. There was a commotion on the water further up the stream. I expected to be hemmed in on all sides. Suddenly a tremendous cannonade, the resounding shouts of men which I recognized as the well-known British cheer, greeted my ear. I knew what was up in a moment, and, by gad, the blood tingled in every vein. Our army had made the long-expected assault on the city. But I have already exhausted your patience, Trunnion, and talked myself hoarse, so I'll wind up short, you know. Under cover of the confusion attendant upon an assault, I effected my escape with the fair Miss Stanly, and soon after I was invalided home. Six months afterwards she became my wife. The turban I threw aside when I reached my bungalow, having entirely forgotten the ruby. But I recovered it, and it's no small relic, not only of the adventure in which I found a wife, but also of the rebellion.

"The Hindoo? What became of her? Oh, she is with my wife yet. But here comes your sergeant, and, by gad, he has the rascals, you know, who left me to dangle about, like the tuft on the top of a date-palm."

Soon after my company was relieved, and I marched to camp with my prisoners who were summarily disposed of. The English lord accompanied me, and when I bade him adieu, a tear stood in the depths of his clear blue eye.

"Farewell, Trunnion, you saved my life—by gad, you did—and Pearl will remember you in her prayers for the deed. When you get a furlough, you must come to old England. Charles Arthur Howard will stand ready to welcome you. In the meanwhile accept this little packet, but do not open it until I am gone. It will, I trust, prove a pleasant souvenir of our meeting, the dawn of our friendship, and a remembrance of the night I put in at Delhi. Farewell!"

In due time I opened the package, and before me lay the ruby.

A MAGNIFICENT OCEAN STEAMER.

THE Cunard Steamship Company has just added a new steamer to that popular line which is in every respect one of the finest, if not the very finest, ocean vessel ever built. The steamship is called the *Gallia*. At the Paris Exhibition her model received the first prize gold medal. The *Gallia* was built by Messrs. James & George Thomson, of Glasgow, who have constructed most of the vessels added to the fleet of late years. She was completed at a cost of over $500,000. She is a bark-rigged screw propeller, built something after the general design of the *Scythia* and *Bothnia*, but is longer and wider than either of these. Her length is 450 feet over all, her molded width 44 feet, and her depth of hold 36 feet, with a measurement capacity of 4,809 tons. Her machinery is of the finest description, and includes the latest improvements. She has three compound direct-acting cylinder engines, two of them being 84 inches in diameter and the third 61 inches, the piston-stroke being 60 inches, affording a nominal force of 700 horse-power, which, however, can be increased, should necessity demand, to over 3,000 horse-power.

She has stateroom accommodations for 480 first-class passengers, should an emergency call for so large a number, and has equally large accommodations for steerage passengers. The cabin-fittings and arrangements are of the first class, and the staterooms are unusually fine. The principal dining-saloon is situated on the spar-deck, and is superbly furnished, and lighted by a series of top and side lights. It is floored with oak parquetry of Belgian manufacture, and the walls are inlaid with Japanese paneling upon a ground of red jasper, with gold tracery. There are sideboards and mirrors, a piano, and a large library. The second dining-saloon (on the main-deck) is furnished with taste, and both have revolving soda-chairs at the tables. On the upper deck there is a "ladies' boudoir," and a "ladies' cabin" on the spar-deck, the latter being paneled with Brazilian onyx and richly upholstered in blue. A commodious and beautifully-fitted smoking-room for gentlemen is also on the main-deck. The state-rooms and berths are large, well-ventilated and fitted with many improvements, including stationary wash-basins and steam-heaters of new pattern. They all communicate by means of pneumatic bells with the steward's department.

The vessel has a crew of 130 men, and the following is the list of her officers: Captain, Mr. Cook; first officer, Mr. Elder; second officer, Mr. Dean; extra second officer, Mr. Inman; third officer, Mr. King; extra third officer, Mr. Croft; fourth officer, Mr. Mills. There are six engineers, of whom the chief is Mr. Watson. The surgeon is Dr. Hill, the purser Mr. Fleming, and the chief steward, Mr. Allsitter. The *Gallia*, which arrived here, April 15th, made her first voyage from this port to Liverpool, Wednesday, the 23d ultimo, having 177 first-class passengers.

MEMORIAL DAY IN ATLANTA, GA.

MEMORIAL DAY in the Southern States was pretty generally celebrated on Saturday, April 26th, by the suspension of business and military displays. At Columbus, Ga., the new Confederate monument was unveiled in the presence of 10,000 people from different sections of the State and from Alabama. State and national flags were displayed, and Governor Colquitt delivered a non-political address.

The observance at Atlanta was the most noticeable however. Several thousand visitors poured into the city early in the morning, and military from all the neighboring States met there for the exercises of Decoration Day. Six thousand Confederate soldiers were buried there, and their remains were honored as never before. The band of the Fifth Artillery, United States, played at the head of the procession, followed by military organizations from half a dozen Southern cities. The cemetery was filled with thousands of spectators, who cheered as the Government band came in at the head of the procession. General Fitzhugh Lee delivered the address, in which he extolled Southern bravery and heroism, and appealed for the perpetuation of such services as were then being conducted. Great enthusiasm followed the speech. A banquet, in honor of General Lee and the visiting military was given in the evening, at which several United States officers were present.

The leading military organizations reached the city on the 25th, when a tilt was had at Oglethorpe Park, between the Richmond Hussars, of Augusta, the Edgefield Hussars and the Burke County Hussars, in which the Edgefield men were victorious.

At Augusta, the day was observed by the suspension of business and a parade of the military. The monument was decorated with garlands, and the statues of Lee, Jackson, Cobb and Walker were crowned with laurel wreaths.

From all the accounts that have reached us the formal speeches were free from political reflections and sectional bitterness. They were replete with the liberal, conciliatory, manly ideas that are always expressed when the survivors of the war meet to honor the heroic dead of their own side or of their opponents.

Death of Bishop Ames.

BISHOP EDWARD R. AMES, D.D., LL.D., of the Methodist Episcopal Church, died in Baltimore, April 25th. He had a long illness, suffering from diabetes and pulmonary troubles. Bishop Ames was not only the best known bishop of the Methodist Episcopal Church, but the ablest counselor in its fold, and one of the best executive officers which it was ever the good fortune of that church to possess. He was born in 1806, and entered the ministry in 1830 in Illinois. Ten years later he came prominently before his church as a delegate to the General Convention of that year from the Indiana Conference. The slavery question was agitating the church, and the General Conference having attempted to discipline one of its Southern bishops for owning slaves, the separation between the Northern and Southern churches took place. Dr. Ames worked hard to prevent the step, and never ceased to do all in his power to heal the breach, in spite of the small encouragement which he received from Southern Methodists. In the same year he was elected by the Conference as Missionary Secretary, his work lying chiefly in the West. By virtue of this office he had the supervision of the German and Indian Missions of the Church. He filled the position for four years, and traveled during that time about 25,000 miles—this, too, in the ante-railroad days, when traveling was slow and laborious. In one tour he traversed the entire frontier line, from Lake Superior to Texas, camping out most of the time. At one time during this journey, his party was so destitute of provisions that for two days the only food was a little moistened maple-sugar. He was the first man ever elected as a Chaplain by an Indian Council, having been appointed such by the General Council of the Choctaw Nation in 1842. While acting as Chaplain Mr. Ames drew up the school law of the Choctaw Nation, by request of the Committee on Education. By the provisions of that excellent Bill a larger amount for each scholar was appropriated for educational purposes than in any one of the States. He was elected Bishop in 1852, and from that time to the day of his death his labors were incessant.

Marrying Men.

HAVING once tasted the sweets of married life, men cannot, it seems, remain single. It appears that of 1,000 single men of from twenty-five to thirty-five years of age, 110 or 112 marry each year. On the other hand, the corresponding number for widowers is 356, or three times as many. At other ages the difference is still greater. Widowers marry four times more than bachelors of the same age, and in the case of young men (twenty-one and under) the numbers are 230 and 4 respectively. In the case of females, M. Bertillon (who has produced folios of figures) obtains similar results, though less decided. From twenty-five to thirty years of age, when Dutch girls marry most, widows are found to marry about twice as much, and a corresponding difference appears throughout similarly in Switzerland and England. There are two exceptions to this rule, however. In Berlin widows past thirty marry almost exactly in the same proportion as spinsters, and in France they marry a little less. The state of young widowhood seems to press the same everywhere. Is the state of things in France, then, to be explained by saying that French husbands are wickeder than others? "I prefer to believe," says M. Bertillon, "that they are, on the contrary, too good, and that they leave widows absolutely inconsolable."

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Procession of Pilgrims in Rome.

Rome, the Eternal City, is ever full of color, full of strange, fascinating and bizarre scenes. Our illustration represents a number of devout and pious pilgrims engaged in ascending and descending a stairway in the Vatican. Some have been to a shrine in the Church of the Trinity of the Mount, where they have poured forth their orisons; others proceed thither having a similar object in view. All are solemnly silent while within the precincts of the structure whose name implies so much.

Sketches from Afghanistan.

On Monday, March 31st, a squadron of the Tenth Hussars, following one of the Eleventh Lancers across the Cabul River, near Jellalabad, missed the ford and were carried away by the current, and presumably drowned, Sub-Lieutenant Harford and fifty men being reported missing. Nothing further has been ascertained respecting the accident, but it is supposed that a sudden spate or wave came down, as the column, 140 yards long, were simultaneously washed off the ford, which was recrossed by some men shortly afterwards without accident. Our illustration shows the Royal Engineers laying a bridge over the river near the scene of the mishap to avoid a future disaster of a similar character. The incident of the Ninety-second Highlanders crossing the Sababa happened on the march from Lawrencepur to Kohat. The Scots reached the river Sababa early in the morning, but found no bridge, and the ferry-boat lying on the shore broken. The water was from three to four feet deep, dreadfully cold, and the stream was exceedingly swift. As the troops, however, were unincumbered with trowsers, the crossing was pretty easy.

Sketches from Zululand.

Our illustration of Zulu troops crossing a river may find a suitable commentary in the following extract from the pamphlet which was lately compiled by order of Lord Chelmsford and published in Natal, giving an account of the enemy's military system: "When a Zulu army on the line of march comes to a river in flood, and the breadth of the stream which is out of their depth does not exceed from ten to fifteen yards, they plunge in in a dense mass, holding on to one another, those behind forcing them forward, and thus succeed in crossing with the loss of a few of their number." In contrast with this is the view of some men of a Native Contingent Regiment attached to the Northern Column in Zululand crossing the Blood River on January 5th, under the command of Colonel Evelyn Wood, V. C. The river is only thirty feet broad, but deep and swift, and after heavy rains impassable for days by wagons, so that everything has to be ferried over on small pontoons. All natives know how to swim, and they carry their shield with clothes aloft in one hand. Lord Chelmsford's expedition for the rescue of Colonel Pearson's forces, which had been besieged in at Ekowe since January last, has been successful. It defeated about 11,000 Zulus on the 3d instant, and next day entered Ekowe. The troops found that the garrison had plenty of food. Twenty-eight of the number had died during the investment. Ekowe has been abandoned, and a new intrenchment camp is to be formed. In the fight between Colonel Wood's command and the Zulus, on the 28th of March, the retreat of the Zulus was cut off, and a hand-to-hand fight ensued. The total of the British losses in both engagements is estimated at 220 killed and wounded. The Zulus lost 2,500 men. It is rumored at Pretoria and Natal that the Boers intend investing Pretoria, and threaten to detain Sir Bartle Frere as a hostage unless their demands are complied with. It is rumored also that Sir Bartle Frere is returning to Natal.

Disembarkation of General Martinez Campos in the Bay of Cadiz.

The city of Cadiz is noted as ever being the foremost of the cities of sunny Spain in patriotic demonstrations, and, true to her reputation, she has just received General Martinez Campos, the pacificator of Cuba, as the Spaniards love to call him, with honors worthy of being tendered to a prince of the blood royal. At seven o'clock on the morning of the 27th of February the tower of La Viga hoisted the signal that the steamer bearing the valiant little General was in sight, and a tender, with all the notabilities of the city on board, immediately steamed out to meet him. The Captain General of Andalusia, the Mayor of Cadiz, with Generals Balon and Prendergast, and the Marquis of Santo Domingo y Guzmans, tendered to Campos the warmest expressions of welcome upon his return to his native shores—a return especially grateful to his country, since, by valor tempered with clemency, he had brought about a peace as honorable to the Cubans as it was creditable to the arms of Spain.

Italian Pyramid for the Bones of the Slain at Novara.

There has recently been inaugurated a grand pyramidal structure at Novara, in the Italian province of the same name, bordering on Switzerland, in which have been gathered the bones of the soldiers who fell in the memorable battle there in March, 1849. The engagement was between the Sardinians, under the Polish General Chrzanowski, and the Austrians, under Radetsky, and resulted in the complete rout of the former. This led to the abdication of Charles Albert, in the evening following the disastrous battle, in favor of his son, the late King Victor Emmanuel, who succeeded in obtaining from Austria terms less humiliating than those imposed on his father. The pyramid was inaugurated with great state and ceremony by King Humbert in the view of a vast concourse of military, ecclesiastics and citizens.

AT HOME AND ABROAD.

—ABOUT 100,000,000 logs are expected to enter the Penobscot boom this Spring.

—CHARLESTON is shipping daily by express 32,000 quarts of strawberries to New York.

—THE Germans, Italians and French are preparing for extensive exhibits at the Mexican Exhibition of 1880, with a view of interrupting the growing trade between the United States and Mexico.

—THE Swiss Council of State has appointed a committee on the proposal for introducing such modifications into the Federal Constitution as will admit of the Cantons re-establishing capital punishment.

—THE foundation-stone of a Russian monument was laid on April 14th on the summit of the Shipka Pass. This structure will be a pleasant subject for contemplation by the Turkish garrison of the Balkans.

—UNDER the law passed by the last Legislature of Mississippi all officers of a county are required to be present at the organization of a grand jury, that they may listen to the charge of the Judge and be advised.

—THE Pennsylvania Railroad Company has informed such of its tenants as are engaged in the liquor business in Exchange Place, Jersey City, that after the 1st of May their leases will not be renewed for barrooms.

—THE Government of Brazil has nearly completed the negotiations with capitalists for the establishment of a great bank of loan to planters, under the law of 1875, guaranteeing interest and redemption of the bank issues.

—THE services of the late Mr. J. A. MacGahan, the American newspaper correspondent, are to be gratefully commemorated by the Bulgarian authorities, June 9th, the anniversary of his death. They will hold formal public ceremonies.

—IT is proposed to establish a permanent weather observatory on or near the top of the celebrated mountain Ben Nevis, in Scotland. The summit is the highest in Great Britain, being 4,406 feet above the level of the sea.

—ACCORDING to the official report, more than $30,000,000 are paid annually by the United States for imported fibres—flax, hemp and jute—and this, too, notwithstanding the fact that in no other country in the world can these fibres be grown so well and cheaply.

—NAPOLEON'S portable printing-press, which fell into the hands of the Russians during the retreat from Moscow, is at present in the possession of the Lehmann foundry at St. Petersburg, and is offered for sale at the price of 1,000 roubles.

—IN Mississippi there are 348,244 pupil children—158,156 white, and 190,088 colored. Of these, 103,676 whites and 104,779 colored attend school. The school fund for the past year amounted to $616,268—per capita in average daily attendance, $3.42.

—THE April returns of the Department of Agriculture show that the acreage of Winter wheat is about one and a half per cent. greater than last year. This increase is due mostly to the transfer of Spring sowings to Fall sowings in the West and Northwest.

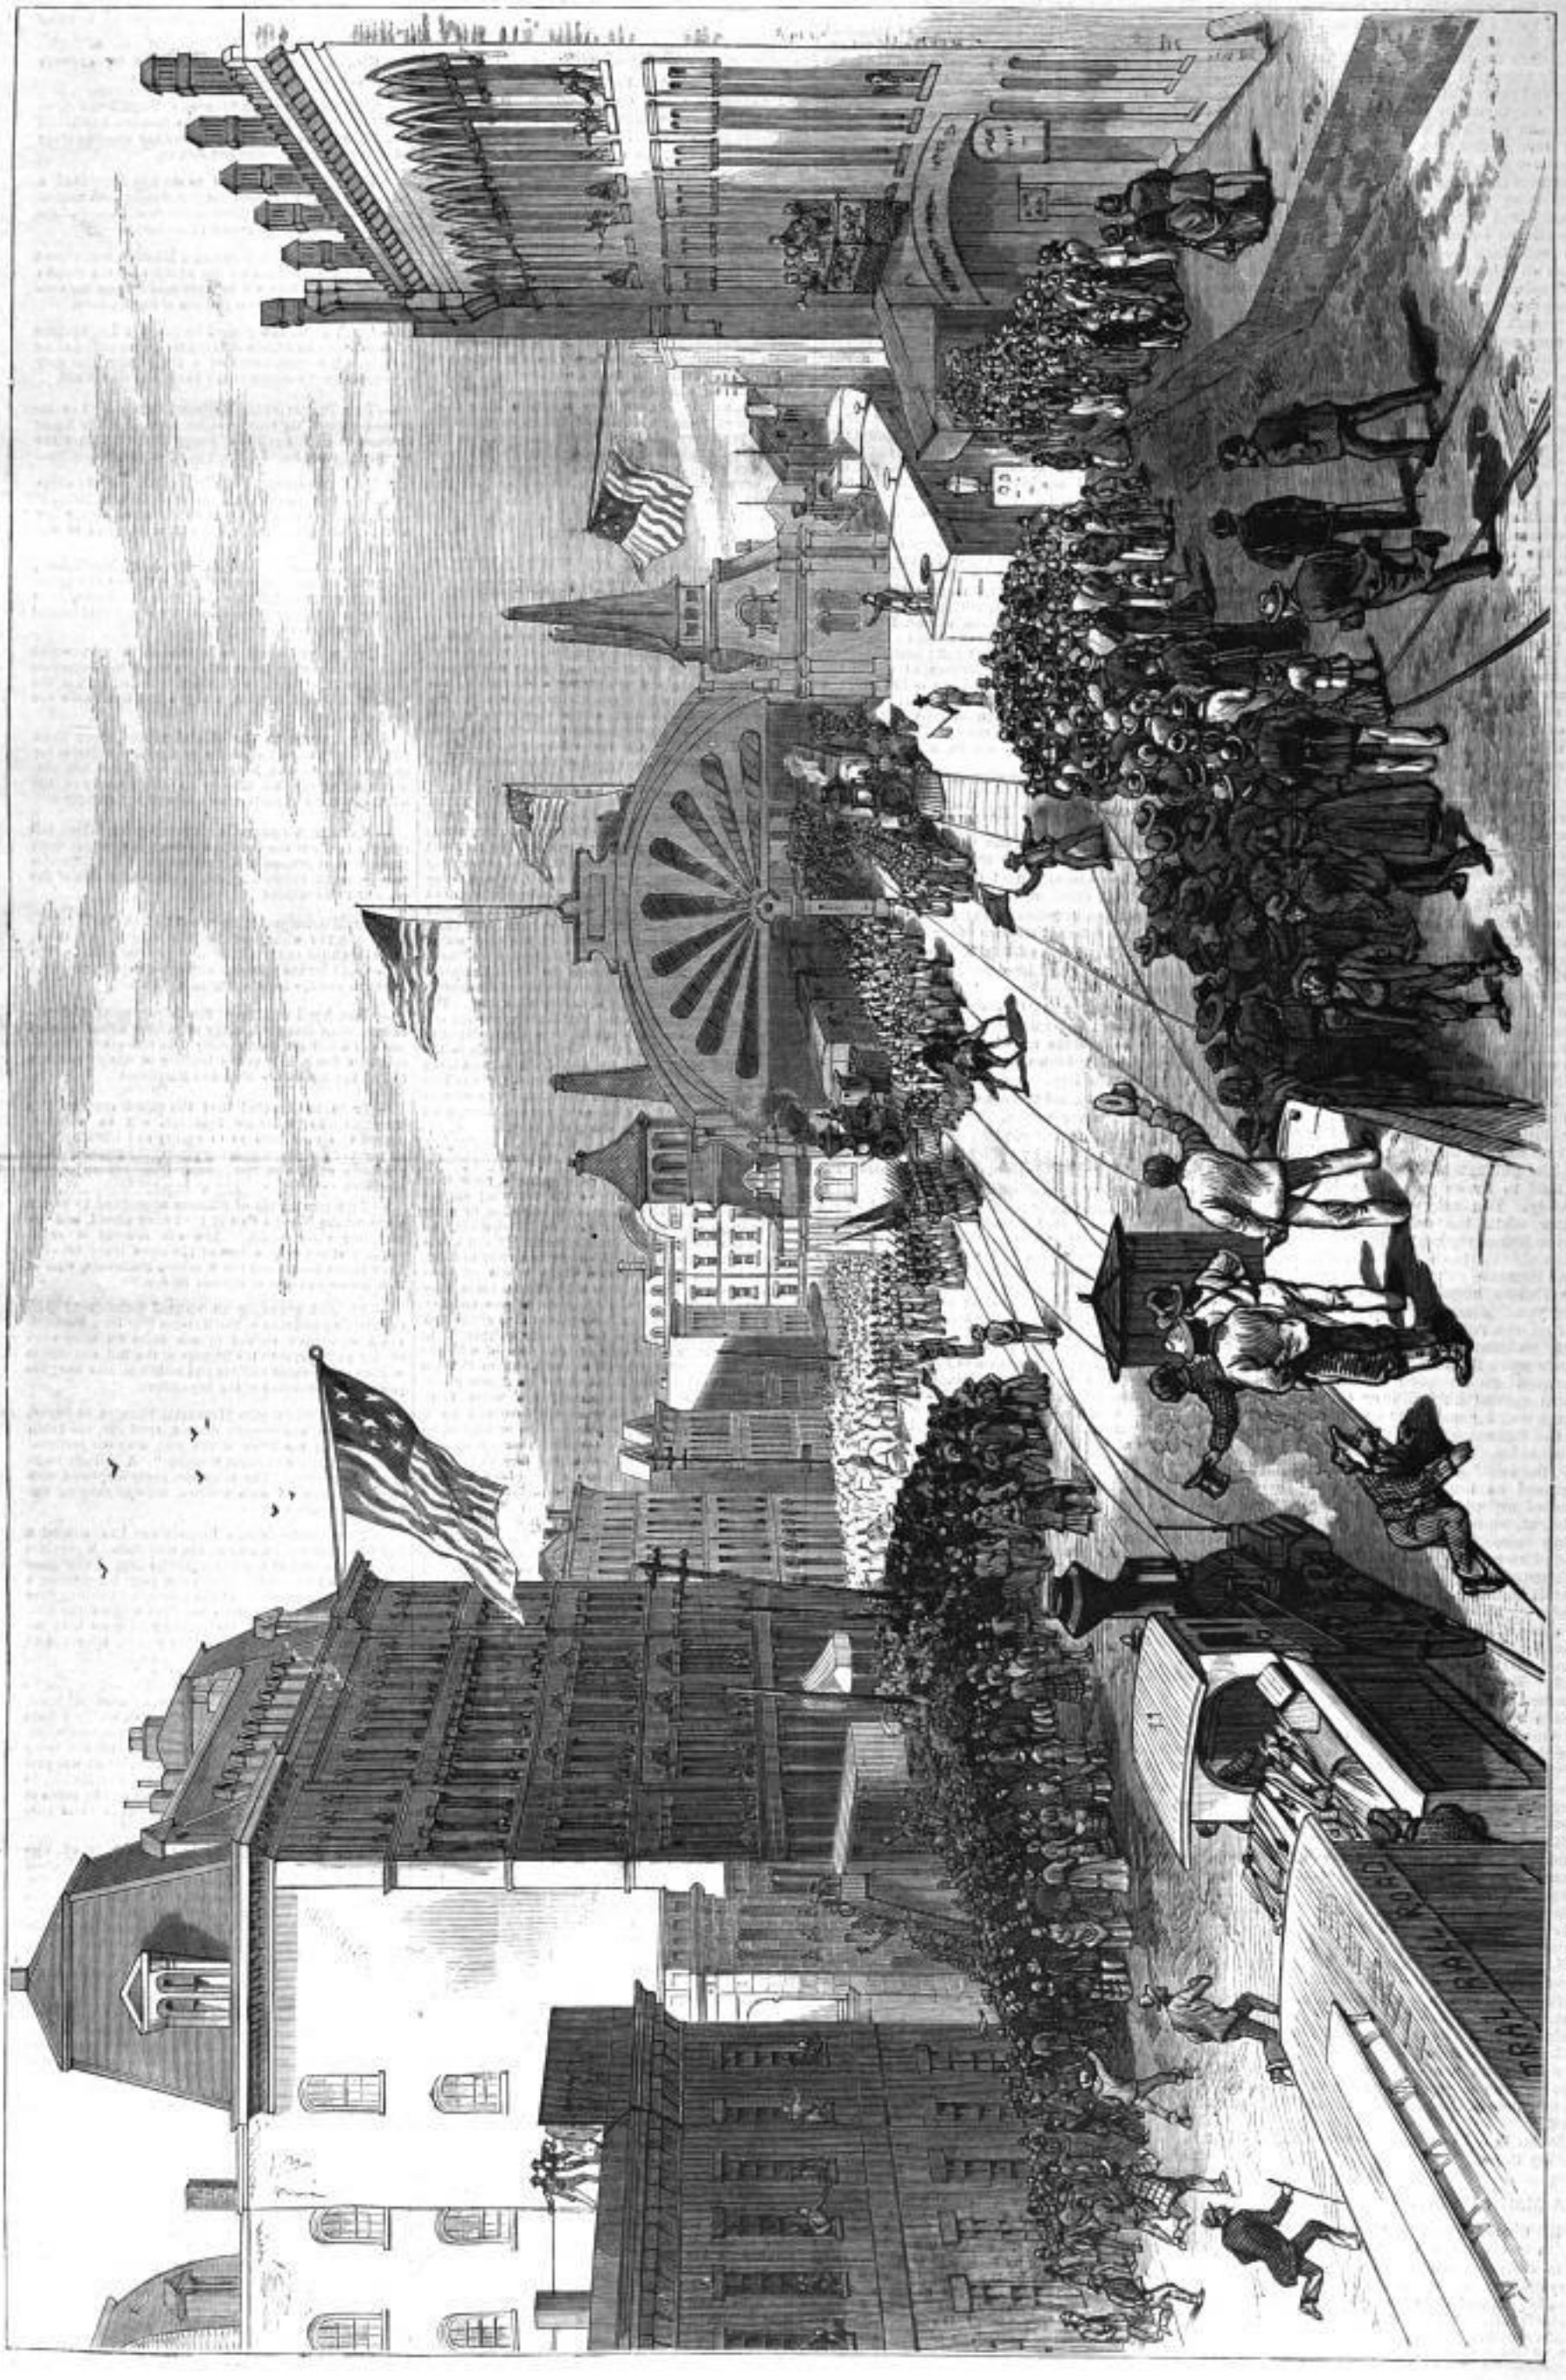
—IT is anticipated that the peach crop on the Maryland and Delaware Peninsula will be unprecedented this year both as to quality and quantity. In all parts of the peach-growing district the most flattering prospects exist, and information from every point is favorable.

—THE committee of citizens appointed to select a site for the World's Fair in 1883 have agreed, and are preparing their report. The site selected is semi-officially stated to be a tract of 170 acres lying between Long Island Sound and the Southern Boulevard, west of Port Morris and east of Harlem Bridge.

—AN Act granting an annual pension of $75 to surviving veterans of the Mexican War from Pennsylvania who have resided in the State for more than twenty years prior to the passage of the Bill, and also to widows of deceased soldiers and sailors of said war, has passed both branches of the Legislature.

—THE Shakespeare Memorial Theatre, at Stratford-on-Avon, was formally opened, April 23d, the 315th anniversay of the birth of the poet, with the performance of "Much Ado about Nothing." A brilliant audience was present. The town was gayly decorated with flags and crowded with visitors, notwithstanding unfavorable weather.

—THE Pennsylvania Legislature has passed a Bill to mitigate the tramp evil in that State. It provides an imprisonment of twelve months for begging to acquire money or a livelihood, and of three years for entering a dwelling against the will of the owner, for kindling fires upon the highway or upon any land without the consent of the owner, and for carrying firearms with intent unlawfully to do injury to any person. It applies to males over sixteen years old.



—MR. SICKLES, United States Consul at Bangkok, Siam, in a dispatch to the Department of State, announces that the project of sending an embassy from Siam to the United States has been finally agreed upon. He also describes the gorgeous style in which the letter of the Supreme King of Siam to General Grant was prepared. It contained an invitation from His Majesty to ex-President Grant to visit the kingdom as the guest of the Government. The letter was inclosed in royal purple satin.

—THE Washington and Lee University of Virginia has, through its representatives, conferred upon Mr. Beresford Hope the honorary degree of LL.D. Mr. Hope is one of the ripest scholars in England, and has represented the University of Cambridge in Parliament continuously since 1865. He is the youngest son of the late Thomas Hope, of Deepdene, Surrey, was born in 1820, and is consequently now about sixty years of age. He was educated at Harrow and at Trinity College, Cambridge, where he graduated in 1841.

—A NEW project for the creation of an inland sea has been advanced and advocated by General Fremont, at present Governor of Arizona. The removal of a barrier bridge, he affirms, would admit the waters of the Gulf of California into an ancient basin, and would create a navigable inland sea 200 miles long, 50 miles broad, and 300 feet deep. This piece of engineering, he claims, would convert what is now a desert region into a commercial highway, and would greatly improve the climate of Southern Arizona and California.

—THE anniversary of the proclamation of Greek independence was celebrated in Athens on the 6th of April. The King and Queen, accompanied by the members of the diplomatic body in Athens and the principal civil and military authorities, attended a Te Deum in the cathedral. In the afternoon a number of Epirotes made a demonstration before the palace, calling upon the King to insist on the cession of Janina to Greece. A banner was carried at the head of the demonstration, inscribed with the words "Union or Death." An aide-de-camp of the King having announced that His Majesty was absent from the palace, the people dispersed quietly.

MAGNETIC ATTRACTION.

WHY is it, Paul, that you and I
Can never pass each other by?
Why is it that in crowded street,
In shop or theatre we meet?
Nor find that all our virtue shown
Can for one day the power disown
Of that mysterious, unseen czar,
Who rules our lives, whose slaves we are!

Were I to sail for Iceland's shore,
And you pluck dates at Singapore—
Did I sail east, and you sail west,
To each avoid we did our best—
Some hand our plans would complicate,
Throw open wide some Golden Gate,
And thither lead our captive feet—
Do what we would, we still should meet.

There is a reason, Paul, you know,
Why I should be as cold as snow.
You loved me once, and praised my eyes,
Spoke of their "changeful, glad surprise,"
And quoted for me that old time,
The York and Lancaster sweet rhyme—
"How the red rose placed on her breast
Grew white, from contact with the rest."

There were no words of love unsaid,
Yet 'mid their promises you fled,
And left me to a dry despair.
Now when the Spring comes, with the air
Of violets, lilacs, blossoms blest,
I suffer from some vague unrest—
All I have conquered flees away,
You spoiled for me the month of May.

I was not one to sit and pine,
Life holds too much that's rare and fine;
I stuffed my wound with stiff brocade,
And no one saw my blushes fade;
But oft at night my pillow knew
The blinding tears I shed for you.
Then came a heart that did not roam,
But folded me to him and home.

I told him all; he gayly smiled,
And many an hour the way beguiled
By stories of loves past and o'er.
"Life is an ocean, love the shore,"
Said he, "and outward go the sails,
Trusting to treacherous waves and gales",
But saying thus, he clasped my hand,
"Here is one, dear, has come to land."

You wed unhappily, I hear;
Of her great wealth you stand in fear;
You find that now you hold in fee
Houses and lands, but wanting me,
Your wine is sour, your gold alloyed,
And all your title-deeds are void—
That is your payment, that your part
Of the great blow you gave my heart.

What is the power which baffles—rules—
Which quells our will and makes us fools?
Must memory grow a monster bold
And all our energies enfold,
As Juno's serpents bind in one
The struggling group, Laocoon?
Lie still, dead love, and wholly die
Are we Fate's puppets, you and I?

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXIV.

WITH a rapid succession of events the morning had begun. With a rapid succession of events the day went on.

The breakfast being over, rooms at the hotel were engaged by Rufus for his "two young friends." After this, the next thing to be done was to provide Simple Sally with certain necessary, but invisible, articles of clothing which Amelius had never thought of. A note to the nearest shop produced the speedy arrival of a smart lady, accompanied by a boy and a large basket. There was some difficulty in persuading Sally to trust herself alone in her room with the stranger. She was afraid, poor soul, of everybody but Amelius. Even the good American failed to win her confidence. The distrust implanted in her feeble mind by the terrible life that she had led was the instinctive distrust of a wild animal. "Why must I go among other people?" she whispered piteously to Amelius. "I only want to be with you." It was as completely useless to reason with her as it would have been to explain the advantages of a comfortable cage to a newly-caught bird. There was but one way of inducing her to submit to the most gently-exerted interference. Amelius had only to say, "Do it, Sally, to please me." And Sally sighed, and did it.

In her absence Amelius reiterated his inquiries in relation to that unknown friend whom Rufus had enthusiastically described as an angel—barring the wings.

The lady in question (the American briefly explained) was an Englishwoman—the wife of one of his countrymen, established in London as a merchant. He had known them both intimately before their departure from the United States, and the old friendship had been cordially renewed on his arrival in England. Associated with many other charitable institutions, Mrs. Payson was one of the managing committee of a "Home for Friendless Women," especially adapted to receive poor girls in Sally's melancholy position. Rufus offered to write a note to Mrs. Payson, inquiring at what hour she could receive his friend and himself, and obtain permission for them to see the "Home." Amelius (after some hesitation) accepted the proposal. The messenger had not been long dispatched with the note before the smart person from the shop made her appearance once more, reporting that "the young lady's outfit had been perfectly arranged," and presenting the inevitable result in the shape of a bill. The last farthing of ready money in the possession of Amelius proved to be insufficient to discharge the debt. He accepted a loan from Rufus until he could give his bankers the necessary order to sell out some of his money invested in the Funds. His answer, when Rufus protested against this course, was characteristic of the teaching which he owed to the Community. "My dear fellow, I am bound to return the money you have lent to me—in the interest of our poor brethren. The next friend who borrows of you may not have the means of paying you back."

After waiting for the return of Simple Sally, and waiting in vain, Amelius sent a chambermaid to her room, with a message to her. Rufus disapproved of this hasty proceeding. "Why disturb the girl at her looking-glass?" asked the old bachelor, with his quaintly-humorous smile.

Sally came in with no bright pleasure in her eyes this time; the girl looked worn and haggard. She drew Amelius away into a corner, and whispered to him. "I get a pain sometimes where the bruise is," she said; "and I've got it bad now." She glanced, with an odd furtive jealousy, at Rufus. "I kept away from you," she explained, "because I didn't want *him* to know." She stopped, and put her hand on her bosom, and clinched her teeth fast. "Never mind," she said, cheerfully, as the pang passed away again; "I can bear it."

Amelius, with his customary impetuosity, instantly ordered the most comfortable carriage that the hotel possessed. He had heard terrible stories of the possible result of an injury to a woman's bosom. "I shall take her to the best doctor in London," he announced. Sally whispered to him again—still with her eye on Rufus. "Is *he* going with us?" she asked. "No," said Amelius; "one of us must stay here to receive a message." Rufus looked after them very gravely, as the two left the room together.

Applying for information to the mistress of the hotel, Amelius obtained the address of a consulting surgeon of great celebrity, while Sally was getting ready to go out.

"Why don't you like my good friend upstairs?" he said to the girl, as they drove away from the house. The answer came swift and straight from the heart of the daughter of Eve. "Because you like him?" Amelius changed the subject; he asked her if she was still in pain. She shook her head impatiently. Pain or no pain, the uppermost idea in her mind was still that idea of being his servant, which had already found expression in words before they left the lodgings. "Will you let me keep my beautiful new dress for going out on Sundays?" she asked. "The shabby old things will do when I am your servant. I can black your boots, and brush your clothes, and keep your room tidy—and I will try hard to learn, if you will have me taught to cook." Amelius attempted to change the subject again. He might as well have talked to her in an unknown tongue. The glorious prospect of being his servant absorbed the whole of her attention. "I'm little and I'm stupid," she went on; "but I do think I could learn to cook, if I knew I was doing it for you." She paused, and looked at him anxiously. "Do let me try!" she pleaded; "I haven't had much pleasure in my life—and I should like it so!" It was impossible to resist this. "You shall be as happy as I can make you, Sally," Amelius answered; "God knows it isn't much you ask for!"

Something in those compassionate words set her thinking in another direction. It was sad to see how slowly and painfully she realized the idea that had been suggested to her.

"I wonder whether you can make me happy?" she said. "I suppose I have been happy before this—but I don't know when. I don't remember a time when I was not hungry and cold. Wait a bit. I do think I was happy once. It was a long while ago, and it took me a weary time to do it—but I did learn at last to play a tune on the fiddle. The old man and his wife took it in turns to teach me. Somebody gave me to the old man and his wife; I don't know who it was, and I don't remember their names. They were musicians. In the fine streets they sang hymns, and in the poor streets they sang comic songs. It was cold, to be sure, standing barefoot on the pavement, but I got plenty of halfpence. The people said I was so little it was a shame to send me out, and so I got halfpence. I had bread and apples for supper, and a nice little corner under the staircase to sleep in. Do you know, I do think I did enjoy myself at that time?" she concluded, still a little doubtful whether those faint and far-off remembrances were really to be relied on.

Amelius tried to lead her to other recollections. He asked her how old she was at that time.

"I don't know," she answered; "I don't know how old I am now. I don't remember anything before the fiddle. I can't call to mind how long it was first; but there came a time when the old man and his wife got into trouble. They went to prison, and I never saw them afterwards. I ran away with the fiddle, to get the halfpence, you know, all to myself. I think I should have got a deal of money, if it hadn't been for the boys. They're so cruel, the boys are. They broke my fiddle. I tried selling pencils after that; but people didn't seem to want pencils. They found me out begging. I got took up, and brought before the what-do-you-call-him—the gentleman who sits in a high place, you know, behind a desk. Oh, but I was frightened, when they took me before the gentleman! He looked very much puzzled. He says, 'Bring her up here; she's so small I can scarcely see her.' He says, 'Good God, what am I to do with this unfortunate child?' There was plenty of people about. One of them says, 'The workhouse ought to take her.' And a lady came in, and she says, 'I'll take her, sir, if you'll let me.' And he knew her, and he let her. She took me to a place they call a Refuge—for wandering children, you know. It was very strict at the Refuge. They did give us plenty to eat, to be sure, and they taught us lessons. They told us about Our Father up in Heaven. I said a wrong thing. I said, 'I don't want him up in heaven; I want him down here.' They were very much ashamed of me when I said that. I was a bad girl; I turned ungrateful. After a time, I ran away. You see it was so strict, and I was so used to the streets. I met with a Scotchman in the streets. He wore a kilt, and played the pipes; he taught me to dance, and dressed me up like a Scotch girl. He had a curious wife, a sort of half-black woman. She used to dance, too—on a bit of carpet, you know, so as not to spoil her fine shoes. They taught me songs; he taught me a Scotch song. And one day his wife said *she* was English (I don't know how that was, being a half-black woman), and I should learn an English song. And they quarreled about it, and she had her way. She taught me 'Sally in our Alley.' That's how I come to be called Sally. I hadn't any name of my own—I always had nicknames. Sally was the last of them, and Sally has stuck to me. I hope it isn't too common a name to please you? Oh, what a fine house! Are we really going in? Will they let *me* in? How stupid I am! I forgot my beautiful clothes. You won't tell them, will you, if they take me for a lady?"

The carriage had stopped at the great surgeon's house; the waiting-room was full of patients. Some of them were trying to read the books and newspapers on the table; and some of them were looking at each other, not only without the slightest sympathy, but occasionally even with downright distrust and dislike. Amelius took up a newspaper, and gave Sally an illustrated book to amuse her, while they waited to see the surgeon in their turn.

Two long hours passed before the servant summoned Amelius to the consulting-room. Sally was wearily asleep in her chair. He left her undisturbed; having questions to put relating to the imperfectly-developed state of her mind, which could not be asked in her presence. The surgeon listened, with no ordinary interest, to the young stranger's simple and straightforward narrative of what had happened on the previous night. "You are very unlike other young men," he said; "may I ask how you have been brought up?" The reply surprised him. "This opens quite a new view of Socialism," he said. "I thought your conduct highly imprudent at first—it seems to be the natural result of your teaching now. Let me see what I can do to help you."

He was very grave and very gentle when Sally was presented to him. His opinion of the injury to her bosom relieved the anxiety of Amelius; there might be pain for some little time to come, but there were no serious consequences to fear. Having written his prescription, and having put several questions to Sally, the surgeon sent her back, with marked kindness of manner, to wait for Amelius in the patients' room.

"I have young daughters of my own," he said, when the door closed; "and I cannot but feel for that unhappy creature, when I contrast her life with theirs. So far as I can see it, the natural growth of her senses—her higher and her lower senses alike—has been stunted, like the natural growth of her body, by starvation, terror, exposure to cold, and other influences inherent in the life that she has led. With nourishing food, pure air, and above all, kind and careful treatment, I see no reason (at her age) why she should not develop into an intelligent and healthy young woman. Pardon me if I venture on giving you a word of advice. At your time of life, you will do well to place her at once under competent and proper care. You may live to regret it, if you are too confident in your own good motives in such a case as this. Come to me again, if I can be of any use to you. No," he continued, refusing to take his fee, "my help to that poor lost girl is help given freely." He shook hands with Amelius—a worthy member of the noble order to which he belonged.

The surgeon's parting advice, following on the quaint protest of Rufus, had its effect on Amelius. He was silent and thoughtful when he got into the carriage again.

Simple Sally looked at him with a vague sense of alarm. Her heart beat fast, under the perpetually recurring fear that she had done something or said something to offend him. "Was it bad behavior in me," she asked, "to fall asleep in the chair?" Reassured so far, she was still as anxious as ever to get at the truth. After long hesitation, and long previous thought, she ventured to try another question. "The gentleman sent me out of the room—did he say anything to set you against me?"

"The gentleman said everything that was kind of you," Amelius replied, "and everything to make me hope that you will live to be a happy girl."

She said nothing to that; vague assurances were no assurances to her—she only looked at him with the dumb fidelity of a dog. Suddenly she dropped on her knees in the carriage, hid her face in her hands, and cried silently. Surprised and distressed, he attempted to raise her, and console her. "No!" she said, obstinately. "Something has happened to vex you, and you won't tell me what it is. Do, do, do tell me what it is!"

"My dear child," said Amelius, "I was only thinking anxiously about you in the time to come."

She looked up at him quickly. "What! have you forgotten already?" she exclaimed. "I'm to be your servant in the time to come." She dried her eyes, and took her place again joyously by his side. "You did frighten me," she said, "and all for nothing. But you didn't mean it, did you?"

An older man might have had the courage to undeceive her; Amelius shrank from it. He tried to lead her back to the melancholy story—so common and so terrible; so pitiable in its utter absence of sentiment or romance—the story of her past life.

"No," she answered, with that quick insight where her feelings were concerned, which was the only quick insight that she possessed. "I don't like making you sorry; and you did look sorry—you did—when I talked about it before. The streets, the streets, the streets—little girl, or big girl, it's only the streets; and always being hungry and cold; and cruel men when it isn't cruel boys. I want to be happy! I want to enjoy my new clothes! You tell me about your own self. What makes you so kind? I can't make it out—try as I may, I can't make it out."

Some time elapsed before they got back to the hotel. Amelius drove as far as the city to give the necessary instructions to his bankers.

On returning to the sitting-room at last, he discovered that his American friend was not alone. A gray-haired lady with a bright, benevolent face, was talking earnestly to Rufus. The instant Sally discovered the stranger, she started back, fled to the shelter of her bedchamber, and locked herself in. Amelius, entering the room after a little hesitation, was presented to Mrs. Payson.

"There was something in my old friend's note," said the lady, smiling and turning to Rufus, "which suggested to me that I should do well to answer it personally. I am not too old yet to follow the impulse of the moment, sometimes; and I am very glad that I did so. I have heard what is—to me—a very interesting story. Mr. Goldenheart, I respect you! And I will prove it by helping you, with all my heart and soul, to save that poor little girl who has just ran away from me. Pray don't make any excuses for her: I should have run away, too, at her age. We have arranged," she continued, looking again at Rufus, "that I shall take you both to the Home this afternoon. If we can prevail on Sally to go with us, one serious obstacle in our way will be overcome. Tell me the number of her room. I want to try if I can't make friends with her. I have had some experience, and I don't despair of bringing her back here, hand-in-hand with the terrible person who has frightened her."

The two men were left together. Amelius attempted to speak.

"Keep it down," said Rufus; "no premature outbreak of opinion, if you please, yet awhile. Wait till she has fixed Sally, and shown us the Paradise of the poor girls. It is within the London postal district, and that's all I know about it. Well, now, and did you go to the doctor? Thunder! what's come to the boy? Seems as though he had left his complexion in the carriage? He looks, I do declare, as if he wanted medical tinkering himself."

Amelius explained that his past night had been a wakeful one, and that the events of the day had not allowed him any opportunities of repose. "Since the morning," he said, "things have hurried so, one on the top of the other, that I am beginning to feel a little dazed and weary." Without a word of remark, Rufus produced the remedy. The materials were ready on the sideboard—he made a cocktail.

"Another?" asked the New Englander, after a reasonable lapse of time.

Amelius declined taking another. He stretched himself on the sofa; his good friend considerately took up a newspaper. For the first time that day he had now the prospect of a quiet interval for rest and thought. In less than a minute the delusive prospect vanished. He started to his feet again, disturbed by a new anxiety. Having leisure to think, he had thought of Regina. "Good heavens!" he exclaimed; "she's waiting to see me—and I never remembered it till this moment!" He looked at his watch; it was five o'clock. "What am I to do?" he said, helplessly.

Rufus laid down the newspaper, and considered the new difficulty in its various aspects.

"We are bound to go with Mrs. Payson to the Home," he said; "and I tell you this, Amelius, the matter of Sally is not a matter to be played with; it's a thing that's got to be done. In your place, I should write politely to Miss Regina, and put it off till to-morrow."

In ninety-nine cases out of a hundred, a man who took Rufus for his counselor was a man who acted wisely in every sense of the word. Events, however (of which Amelius and his friend were both ignorant alike), had so ordered it that the American's well-meant advice, in this one exceptional case, was the very worst advice that could have been given. In an hour more, Jervy and Mrs. Sowler were to meet at the tavern-door. The one last hope of protecting Mrs. Farnaby from the abominable conspiracy of which she was the destined victim rested solely on the fulfillment by Amelius of his engagement with Regina for that day. Always ready to interfere with the progress of the courtship, Mrs. Farnaby would be especially eager to seize the first opportunity of speaking to her young Socialist friend on the subject of his lecture. In the course of the talk between them, the idea of which, in the present disturbed state of his mind, had not struck him yet—the idea that the outcast of the streets might, by the barest conceivable possibility, be identified with the lost daughter—would, in one way or another, be almost infallibly suggested to Amelius; and, at the eleventh hour, the conspiracy would be foiled. If, on the other hand, the American's fatal advice was followed, the next morning's post might bring Jervy's first letter to Mrs. Farnaby, and would lead to this disastrous result. At the first words spoken by Amelius, she would inevitably destroy all further interest in the subject, on his part, by telling him that the trace of the lost girl had been found already, and found by another person.

Rufus pointed to the writing-materials on a side table, which he had himself used earlier in the day. The needful excuse was, unhappily, quite easy to find. A misunderstanding with his landlady had obliged Amelius to leave his lodgings at an hour's notice, and had occupied him in trying to find a new residence for the rest of the day. The note was written. Rufus, who was nearest to the bell, stretched

Digitized by Google

out his hand to ring for the messenger. Amelius suddenly stopped him.

"She doesn't like me to disappoint her," he said. "I needn't stay long—I might get there and back in half an hour, in a fast cab."

His conscience was not quite easy. The sense of having forgotten Regina—no matter how naturally and excusably—oppressed him with a feeling of self-reproach. Rufus raised no objection; the hesitation of Amelius was unquestionably creditable to him. "If you must do it, my son," he said, "do it right away—and we'll wait for you."

Amelius took up his hat. The door opened as he approached it and Mrs. Payson entered the room, leading Simple Sally by the hand.

"We are all going together," said the genial old lady, "to see my large family of daughters at the Home. We can have our talk in the carriage. It's an hour's drive from this place—and I must be back again to dinner at half-past seven."

Amelius and Rufus looked at each other. Amelius thought of pleading an engagement and asking to be excused. Under the circumstances it was assuredly not a very gracious thing to do. Before he could make up his mind one way or the other, Sally stole to his side and put her hand on his arm. Mrs. Payson had done wonders in conquering the girl's inveterate distrust of strangers, and, to a certain extent, at least, winning her confidence. But no earthly influence could shake Sally's dog-like devotion to Amelius. Her jealous instinct discovered something suspicious in his sudden silence. "You must go with us," she said; "I won't go without you."

"Certainly not," Mrs. Payson added; "I promised her that, of course, beforehand."

Rufus rang the bell and dispatched the messenger to Regina. "That's the one way out of it, my son," he whispered to Amelius, as they followed Mrs. Payson and Sally down the stairs of the hotel.

* * * * * *

They had just driven up to the gates of the Home when Jervy and his accomplice met at the tavern, and entered on their consultation in a private room.

In spite of her poverty-stricken appearance Mrs. Sowler was not absolutely destitute. In various underhand and wicked ways she contrived to put a few shillings in her pocket from week to week. If she was half-starved, it was for the very ordinary reason (among persons of her vicious class) that she preferred spending her money on drink. Stating his business with her, as reservedly and as cunningly as usual, Jervy found to his astonishment that even this squalid old creature presumed to bargain with him. The two wretches were on the point of a quarrel which might have delayed the execution of the plot against Mrs. Farnaby but for the vile self-control which made Jervy one of the most formidable criminals living. He gave way on the question of money, and from that moment he had Mrs. Sowler absolutely at his disposal.

"Meet me to-morrow morning to receive your instructions," he said. "The time is ten sharp, and the place is the powder-magazine in Hyde Park. And mind this! You must be decently dressed—you know where to hire the things. If I smell you of spirits to-morrow morning I shall employ somebody else. No, not a farthing now. You will have your money to-morrow at ten."

Left by himself, Jervy sent for pen, ink and paper. Using his left hand, which was just as serviceable to him as his right, he traced these lines:

"You are informed, by an unknown friend, that a certain lost young lady is now living in a foreign country, and may be restored to her afflicted mother on receipt of a sufficient sum to pay expenses and to reward the writer of this letter, who is (undeservedly) in distressed circumstances. Are you, madam, the mother? I ask the question in the strictest confidence, knowing nothing certainly but that your husband was the person who put the young lady out to nurse in her tender infancy. I do not address your husband, because his inhuman desertion of the poor baby does not incline me to trust him. I run the risk of trusting you—to a certain extent. Shall I drop a hint which may help you to identify the child in your own mind? It would be an inexcusably foolish action, on my part, to take you into my confidence just yet. The hint must be a vague one. Suppose I use a poetical expression? Suppose I say that the young lady is enveloped in mystery from head to foot—particularly the foot. In the event of my addressing the right person, I beg to offer a suggestion for a preliminary interview. If you will take a walk on the bridge over the Serpentine River on the Kensington Gardens side at half-past ten o'clock to-morrow morning, holding a white handkerchief in your left hand, you will meet the much-injured woman, who was deceived into taking charge of the infant child at Ramsgate, and will be satisfied so far that you are giving your confidence to persons who really deserve it."

Jervy addressed this infamous letter to Mrs. Farnaby, in an ordinary envelope, marked "Private." He posted it that night with his own hand.

(To be continued.)

CONTRASTS OF THE NEGRO EXODUS.

THE exodus of the negroes from the South towards Kansas continues, and meetings to express sympathy and raise funds to relieve the distress are being held in the larger cities of the North. A relief-meeting was held in Cooper Institute on the evening of April 23d, at which speeches were made by Thurlow Weed, the Rev. Henry H. Garnet, the Rev. Dr. J. P. Newman, and others, while letters were read from William Lloyd Garrison, Wendell Phillips, Mayor Cooper and District-Attorney Phelps. The most interesting feature of the meeting was the address of C. H. Tandy, a young colored man, who has had charge of the movement in St. Louis to relieve the refugees who made that city their rallying-point. As a rule the immigrants are young and vigorous men and women who are accompanied by vast numbers of children. From St. Louis they journeyed by boat to Wyandotte, the Kansas suburb of Kansas City, on the Missouri River, and it is at this point that thousands are now camping out, awaiting the funds they firmly believe "the Lord will provide" to enable them to reach the interior of Kansas and go to work. The scene of the rendezvous is described as being extremely animated and curious. The depot is built partly on a bluff, so that one side of it, next to the river, is supported upon a platform—a style of building incomprehensible to one who has not visited Kansas City. Under this platform the "darkeys" have made themselves a sort of shelter where they can crawl in to sleep at night. Here they have deposited their household goods, hung up their blankets, and stowed most of their smallest "pickaninnies"; and such a conglomeration of old clothes and parti-colored humanity it would be hard to find elsewhere. They seem to have brought with them every rag and patch which they ever owned, and here they flutter and wave as if conscious that they had at last found an atmosphere in which they were free to wave as long as there was a thread left. Further down on the bank of the river, the people are gathered in little groups, each having for its centre a tiny fire of dry sticks, and offering many a glimpse of the picturesque as well as many touches of humor to the appreciative eye.

The most intelligent of the negroes now at Wyandotte declare that more will follow them, and this is borne out by the statements of recent travelers from New Orleans, who assert that the banks of the Mississippi are lined with colonies of them awaiting an opportunity to get away. Application has been made to the Secretary of War for issues of Government rations to accommodate the negroes, but the Secretary replied that he has no authority to order such an issue, and suggested an appeal direct to Congress from which such necessary authority emanates.

On April 22d a telegram from Governor St. John, setting forth the condition of the negroes, and urging the Government to provide tents and rations until arrangements can be made to enable them to provide for themselves, was filed as a petition by Congressman Haskell, and referred to the Committee on Appropriations.

It is pleasant to turn from such statements as these and such illustrations of the hegira as we have published from St. Louis to the spirited engraving in this number. Here we have a portion of a well-to-do colored family in Virginia, whose thrift, or "good luck," has enabled them to maintain themselves in comfort, and who, in consequence, find no occasion in their surroundings for joining in the general exodus.

Living in the vicinity of Newmarket, they are shown journeying leisurely, nay, quite luxuriantly, from a shopping tour of that place to their home. If their horses have not the speed nor the beauty of *Parole*, it matters little to the riders; they really are docile and safe for all domestic uses. Contentment beams from the old folks, and positive happiness from the son and heir. Perhaps, too, there is a shade of a feeling of superiority to the average run of the Virginia negroes, such as might be justly borne by a landed proprietor of the interior, and something also of the assumptions of aristocracy.

There can be no doubt but that they are far better off than those of their race now curled up for shelter beneath the platform of the railroad depot at Wyandotte.

Red Tape in Italy.

RED-TAPEISM is not a plant special to any country, and it thrives on Italian soil vigorously, if we are to believe the ghastly story which is just reported from Naples. A family of well-to-do merchants had made, in their own carriage, the pilgrimage of Monte Vergine, when, on coming back to town, they were hurled down into a precipice. No less than seven persons—father, mother, daughters and sons—lost their lives by the dreadful occurrence, and it was only after three days that their remains could be hauled up from the fatal spot and brought down to the city. Now, what do you think the gentry at the custom-house did under the circumstances? They alleged that, whereas there was no exception for "human meat" on the list of duties, the seven corpses could not be allowed to enter the town gates except on payment of the general duty on fresh meat! The relatives of the dead family objected, and disputed the case, but it was of no use; they had to submit, and to pay down 350 lire for gaining admittance.

Religious Statistics.

ACCORDING to Hübner's "Statistical Tables of all the Countries of the Earth," there are in the German Empire 25,800,000 Evangelical Christians, 14,900,000 Roman Catholics, 28,000 Orthodox Greek Christians, 512,000 Jews, 6,000 of all other denominations or of none. In Austria-Hungary there are 23,900,000 Roman Catholics, 3,600,000 Evangelical Christians, 7,220,000 Greek and other Christians, 1,375,000 Jews, 5,000 Mohammedans and others. In France there are 35,190,000 Roman Catholics, 600,000 Evangelical Christians, 118,000 Jews, 24,000 Mohammedans and others. In Great Britain and Ireland there are 26,000,000 Protestants of various denominations, 5,600,000 Roman Catholics, 26,000 Greeks, etc., 46,000 Jews, 6,000 Mohammedans and others. In Italy there are 26,650,500 Roman Catholics, 96,000 Evangelical Christians, 100,000 Greeks, etc., 36,000 Jews, 25 Mohammedans and others. In Spain there are 16,500,000 Roman Catholics, and 150,000 adherents of other denominations (details not given). In European Russia there are 56,100,000 Orthodox Greek Christians, etc., 2,680,000 Evangelical Christians, 7,500,000 Roman Catholics, 2,700,000 Jews, and 2,600,000 Mohammedans and others. In Belgium there are 4,920,000 Roman Catholics, 13,000 Reformed Church, 2,000 Jews, and 3,000 belonging to other denominations. In the Netherlands there are 2,601,000 members of the Reformed Church, 1,235,000 Roman Catholics, 64,000 Jews, and 4,000 of other denominations. In Sweden and Norway there are 4,162,000 members of the Evangelical Church, 4,000 Greeks and other Christians, and 2,000 Jews. The number of Roman Catholics is not officially given; it is estimated at less than 1,000. For every 10,000 inhabitants there are yearly in—

	Births.	Deaths.	Marriages.	Children in School.
The German Empire	466	292	90	1,500
Austria-Hungary	402	352	88	800
Great Britain and Ireland	346	220	77	800
France	267	231	86	960
Italy	360	306	80	708

Russia has the smallest proportionate number in elementary schools, about 150 per 10,000 inhabitants, and the United States of America the largest, 2,180 for every 10,000 inhabitants.

SCIENTIFIC INTELLIGENCE.

Mr. Ouless, A. R. A., has painted a fine portrait of Doctor Darwin for the next exhibition of the Academy.

The Widow of the celebrated Michael Faraday died early in January at an advanced age. She never had any children.

M. Lauth, chemist, has been appointed Manager of the National Manufactory of Sèvres, in place of M. Robert, who is placed on the retired list.

Henry St. Claire Deville, who first made the metal aluminium in quantity, was born in 1818. He is still as active as a young man of twenty-five, and is constantly engaged in chemical researches.

Herr J. M. Hildebrandt is about to start on a scientific tour through Madagascar, at the request of the Berlin Academy of Sciences. He will direct his principal attention to the botany, zoology and topography of the island.

The Geographical Society of St. Petersburg intends awarding its large gold medal this year to M. Nordenskiöld, the well-known Swedish explorer, who is at present ice-bound on board the steamer *Vega*, to the northeast of Siberia.

Electric Light on Locomotives.—An electric light has been tried on a locomotive on the Vienna Railway system. The apparatus was designed by Mr. Whitehead, the inventor of the celebrated torpedo, and is said to have worked satisfactorily.

The "Academy" hears that steps are being taken at Manchester with the view to the foundation of a Society of Commercial Geography in that city, and it expresses the hope that the good example will be followed by Liverpool and other large cities.

At a Recent Meeting of the Chemical Section of the Philosophical Society of Glasgow, Mr. R. A. Tatloch announced the discovery of a magnetic iron sand in the Kyles of Bute. This contains, according to the analysis of Mr. R. Thomson, 83.52 per cent. of true magnetic oxide of iron.

History of Physics.—The late Professor Poggendorf, whose name is so closely associated with the *Journal of Physics*, of which he was for more than fifty years editor, left in a nearly completed state a history of physics. This posthumous work is shortly to be published and will contain much interesting matter collected by its author.

Improvement on the Telephone.—Mr. Gower, who accompanied Mr. Bell on a lecturing tour, has made an interesting improvement on Bell's instrument. The new telephone differs mainly in the form of the magnet, which has been calculated so precisely that the sounds can be heard at any distance from the speaker in a large room. The telephonic current is so powerful that the contact of a magnet can be worked by it, and a signal given in a central telephonic office.

Employment of Insane Patients on the Farm.—The employment of insane patients in farming operations has been found to be particularly successful at Zadrasa, in Saxony. The farm is about twenty minutes' walk from a large lunatic asylum. The stock consists of 30 milch cows, 30 to 50 pigs, 6 to 8 oxen, and 5 horses. The farm has 162 acres, and is wholly worked by the lunatics; and when they are not required at home the patients are employed as paid laborers on neighboring farms, repairing roads, etc. The cost of keeping the patients is one-third of the expense of the usual confined way. One guardian to seventeen patients is all that is required under the new system.

A New Galvanic Battery.—M. Herard has invented a new voltaic element, the exciting liquid of which is chloride of ammonium, and the depolarizing body calomel. The sal ammoniac in presence of zinc gives chloride of zinc with ammonia and hydrogen. The hydrogen reduces the calomel, giving metallic mercury, hydrochloric acid, and consequently chloride of ammonium. To prevent depositions of ammoniacal oxychloride of zinc on the zinc, the solution of sal ammonia acid is diluted one-tenth with liquid ammonia. The zinc is suspended by a coated copper plate about the middle of the liquid. The positive electrode is carbon in a canvas bag. One element after 248 days retained 0.65 of its original intensity.

The Metal Didymium.—The metal didymium appears to be a compound of two or more different substances. M. Soret has been examining it before the spectroscope, and has compared the didymium occurring in the mineral samarskite with that found in the cerite. He could not detect any appreciable difference in the rays furnished by the two spectra in the portion from the red to the green, but the identity was not continued in the blue and indigo. Two rays are here visible in the spectrum of the didymium from samarskite, while they are wanting in that from cerite. M. Delafontaine has already observed that difference, and has founded upon it a claim to the discovery of a new metal associated with didymium. M. Soret is disposed to come to a similar conclusion, as the didymium of samarskite shows in the indigo, violet and ultra violet, rays of considerable intensity which are absolutely wanting in the other. M. Lecoq de Boisbaudran is also examining the minerals, and his report on the subject is looked forward to with great interest.

A Cyclone in Switzerland.—A very violent tempest passed over a portion of Switzerland on the 20th of February last. During the day a complete calm had succeeded to a southwest wind which had been blowing steadily since the 16th. Towards evening a storm of exceptional violence broke out very suddenly, which spread itself over a width of five to ten miles, and scattered or demolished tiles and glass, blew down chimneys, tore off roofs, uprooted isolated trees or whole tracts of forests and swamped numerous boats on Lake Geneva. On the sides of the cyclone's path a relative calm prevailed. Owing to the abruptness of the outbreak peculiar facilities were afforded of testing the force of the wind. The anemometer of the Berne Observatory recorded the following rates of movement: From 5 to 6 o'clock P. M., perfect calm; from 7 to 8, a speed of 2.39 miles the hour; from 8 to 9, 33 miles; from 9 to 10, 36 miles; from 10 to 11, 38 miles; from 11 to 12, 36.4. The average rapidity of the wind was therefore from 65 to 75 feet per second, a most unusual velocity. The general direction of the storm was from the northeast.

Aniline Black.—This dye, which produces a deep and lustrous tint, is so costly that it can only be used for the very highest classes of silk goods. The reason of its high value is that it is produced by the action of vanadium (an extremely rare metal), in a solution of a salt of aniline (one of the gas tar products). To the colorless liquid in which the salt is dissolved, a small portion of some compound of vanadium is added, and a black precipitate is then formed. It is now stated that a method of producing the black dye in an economical manner by the use of salts of chromium, in presence of chlorates of potash, soda, etc., has been discovered by M. Grawitz. This chemist says that 75 grammes of chlorate of potash, 150 grammes of aniline salt, and one milligramme of neutral chromate, with a trace of ammonia, will produce an ink which remains perfectly limpid and colorless at first, but any writing with that liquid after the lapse of twenty-four hours becomes a very fine black. The advantage of this ink is that it is absolutely permanent and not acted upon by the bleaching agents which are used to remove ordinary writing fluid. The goods colored with it have a brilliant black, and the texture of the tissue is absolutely unaltered.

PERSONAL GOSSIP.

THE estate of the late Richard Henry Dana is appraised at $118,957.20, of which $71,500 are in real estate.

SIR JOSHUA REYNOLDS'S chair, in which so many of his celebrated sitters were painted, is to be presented to the Royal Academy by its President.

PROFESSOR THOMAS, the Illinois State entomologist, has just refused the position of Entomologist of the Agricultural Department at Washington.

CHARLES S. BRADLEY, ex-Chief Justice of Rhode Island and Bussey Professor of Law in the Harvard Law School for the last four years, has resigned.

A COPY of the marriage service, separately bound, was presented at the Duke of Connaught's wedding to every invited guest, to be kept as a memento of the occasion.

THE Synod of the Presbyterian Church of England has resolved to appoint the Rev. Dr. Patton, of Chicago, to the Chair of Apologetical Theology in the Presbyterian College of London.

GOVERNOR ROBINSON has appointed Miles Beach, son of William A. Beach, the distinguished lawyer, as Judge of the Court of Common Pleas in New York, to succeed the late Judge Robinson.

LIEUTENANT ZUBOVICS, the heroic officer who saved over one hundred persons from drowning during the inundation of Szegedin, is likely to die from an illness brought on by over-exertion on that occasion.

ALEXANDER H. STEPHENS was so poor when he first commenced the practice of law that he had to live on $6 a month. This is said to be the secret of his assistance to poor young men, over fifty of whom he has assisted to a liberal education.

TWO PISTOL-SHOTS were fired at Edwin Booth on the evening of April 23d, while he was playing in "Richard II." in McVicker's Theatre, Chicago, by a man who gave his name as Mark Gray, and asserted that he had tried for three years to kill the tragedian.

THE health of the King of Italy causes considerable anxiety to his family. The doctors have advised him to abstain from smoking, a piece of advice to which he pays little or no attention. They have also advised an operation, which, however, has so far not been decided upon.

THIS time it is reported that a marriage is arranged between His Spanish Majesty and the Archduchess Maria of Austria, daughter of the late Archduke Charles Ferdinand. The Princess was born on the 21st of July, 1858. The marriage will not take place until after midsummer.

THE late James Smith, of Philadelphia, bequeathed to the American Home Missionary Society and the American Missionary Association, $20,000 each; to the American Board of Commissioners for Foreign Missions, $15,000; to the American Educational Society at Boston and the American Congregational Union, $2,000 each.

NILSSON is a devotee of Liebig. When she is about to appear in opera she rests, after rehearsal, the entire day on the sofa, abjures solid food, but has a cupful of her favorite essence of meat every two hours. This is her unvarying regimen, and she finds that it nerves her for the effort and triumph of successive nights.

MRS. PARNEL SIDWAY, one of Buffalo's oldest residents, has just died, aged seventy-eight years. She leaves an estate valued at $1,000,000. She was a resident of Buffalo during the burning of what was then the village of New Amsterdam by the British and Indians in 1813, her parents' house being the only one saved from destruction.

MR. GLADSTONE has received a very touching expression of gratitude from the President of the first Bulgarian Assembly. "In the darkest moments of our national life," says the message, "in the moments of suffering and neglect, all the Bulgarian nation, with joy and enthusiasm, heard from you a word of compassion, protection and consolation."

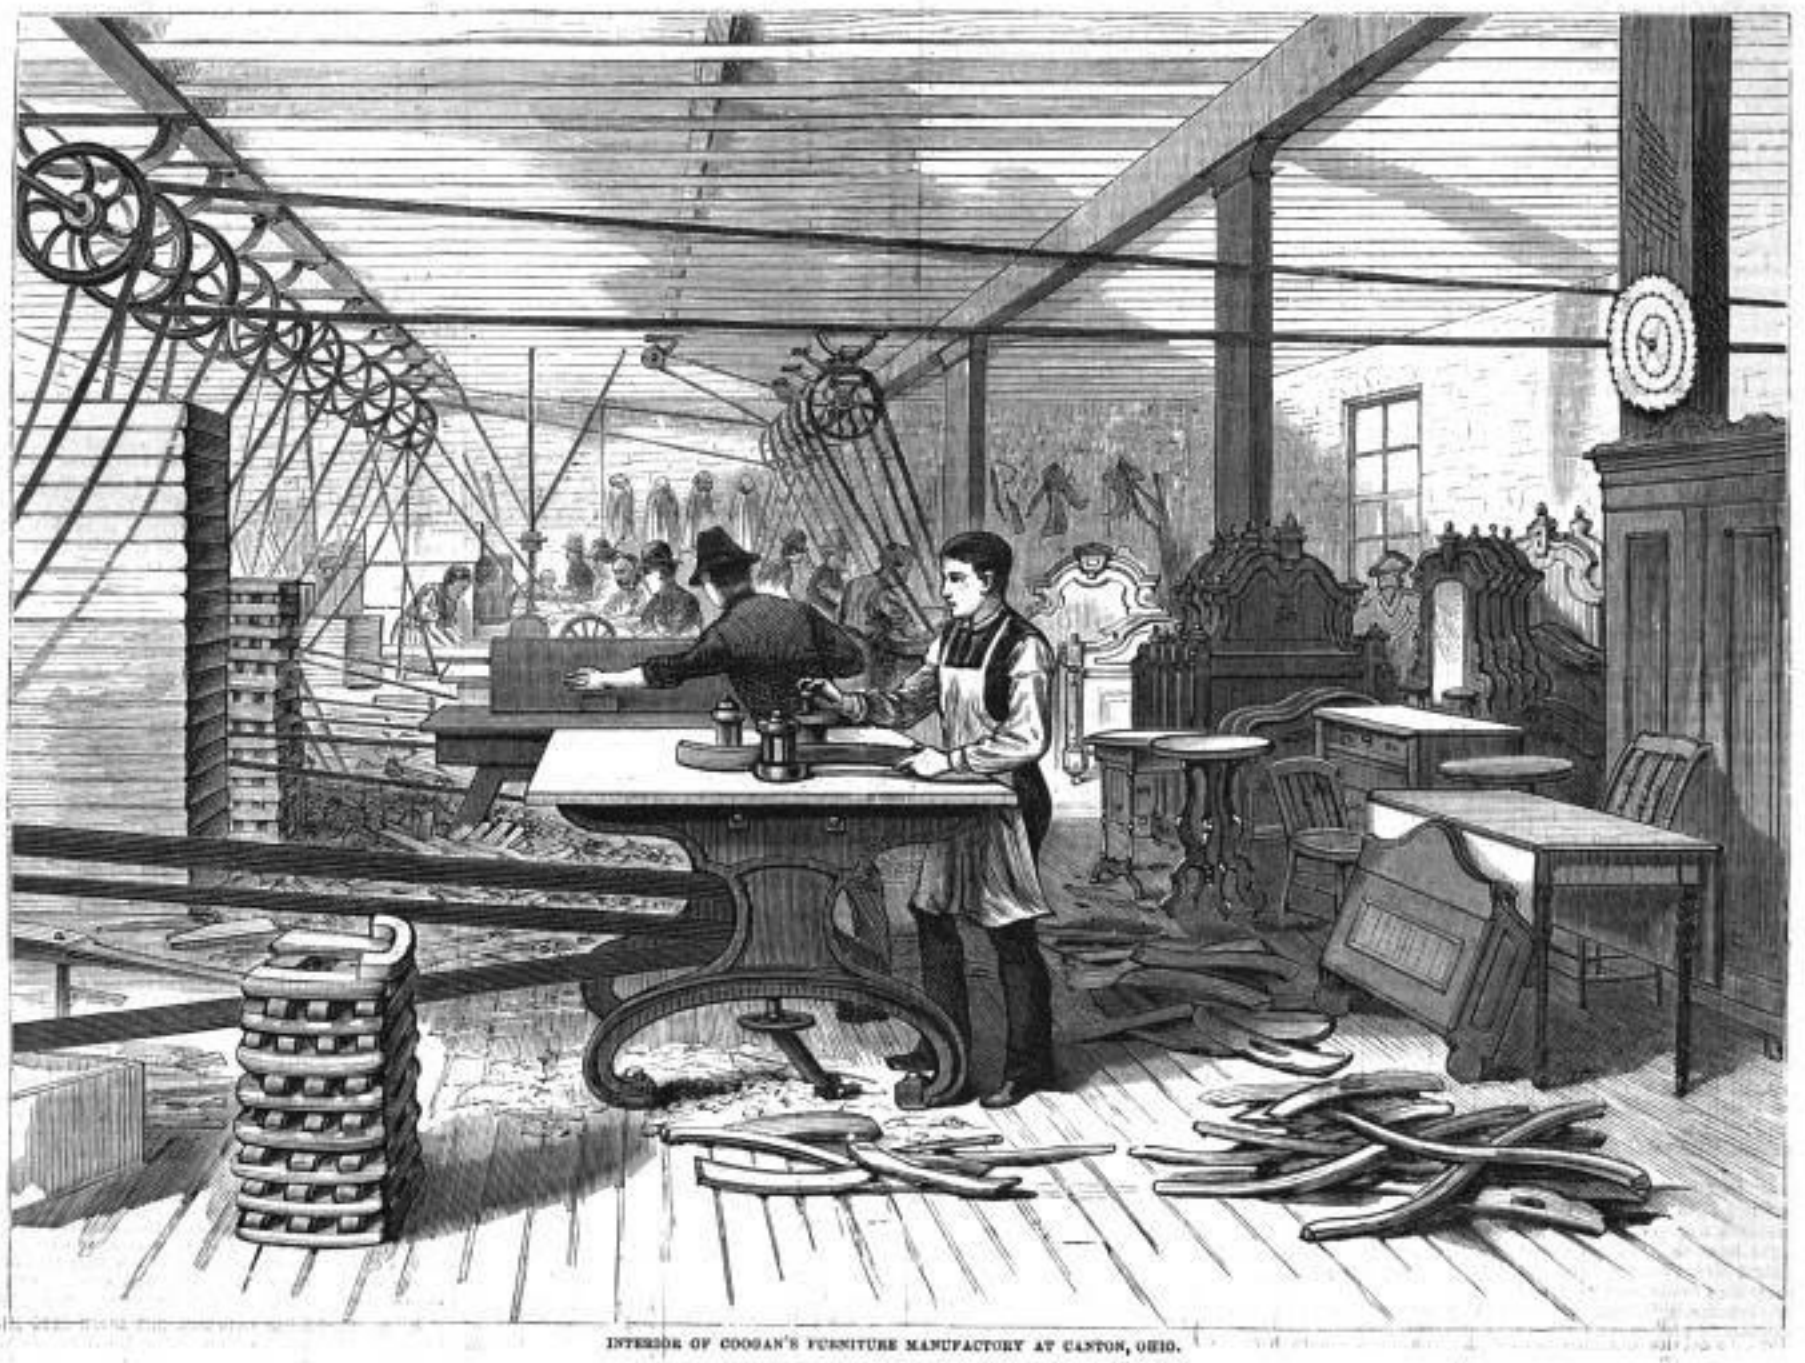
THE distinguished foreign guests who are expected to arrive in Japan during the present year, viz., General Grant and two Princes of Germany and Italy, will be intrusted especially to the care of three ex-daimios of once powerful and influential provinces. They are all young men, and thoroughly conversant with Western usages, having resided in Europe and America.

MR. PETER COOPER has received from Dr. C. W. Siemens, President of the British Iron and Steel Institute, a letter announcing that the Council of the Institute have unanimously resolved to confer upon him the Bessemer gold medal of 1879, in recognition of his prolonged and eminent services in the promotion of metallurgical science. The medal will be conferred at the annual meeting of the Institute, in May.

DR. CHARLES RAU, archæologist of the Smithsonian Institution, has recently been elected a member of the Royal Society of Northern Antiquaries at Copenhagen. He received his diploma of membership, signed by the King of Denmark, as president of the society. Professor J. Lawrence Smith, the eminent American chemist of Louisville, Ky., has also just been elected a member of the Academy of Sciences of France.

PRESIDENT WHITE will occupy, at Berlin, the residence in which his two predecessors, Mr. Bancroft Davis and Mr. Bayard Taylor, lived. It comprises a series of commodious apartments, is situated in the Behrenstrasse, close to Unter den Linden, and has now become familiar to Berliners as the American Legation. He will be accompanied by Mrs. White and by his daughter, Miss Clara White. The new Minister has been tendered a farewell dinner by his old fellow-townsmen of Syracuse.

THE Pope has raised the Chief of the Order of Malta to the dignity of Grand Master, thus giving him the style of "serene highness" and the rank of a sovereign prince. This restoration of the historical Grand Masters of St. John of Jerusalem, or Malta, will attract much attention in Prussia, where there is an Order of St. John, which is Protestant and conferred by the King of Prussia, who holds the Grand Priory of Brandenburg, formerly belonging to the Order of St. John. The Grand Master is Count Ceschi di Santa Croce, an Italian, but an Austrian peer.



MR. EUGENE SCHUYLER, American Consul at Birmingham, has received from the President of the National Bulgarian Assembly a telegram, of which the inclosed is a copy, thanking him for his services in the cause of Bulgarian freedom:

"TIRNOVA, April 4th, 1879

"At the time that European diplomacy was toying with all possible means to conceal the sufferings of the Bulgarian nation in consequence of the Turkish atrocities perpetrated two years ago, you, through your famous report, brought the truth to light and helped to remedy the evil. The free Bulgarian nation hastens to thank you heartily for your great service, and to assure you that your honored name will hold an enviable place in the history of the liberation of our nation.

"ANTHIM OF WIDIN,
"President of the National Assembly."

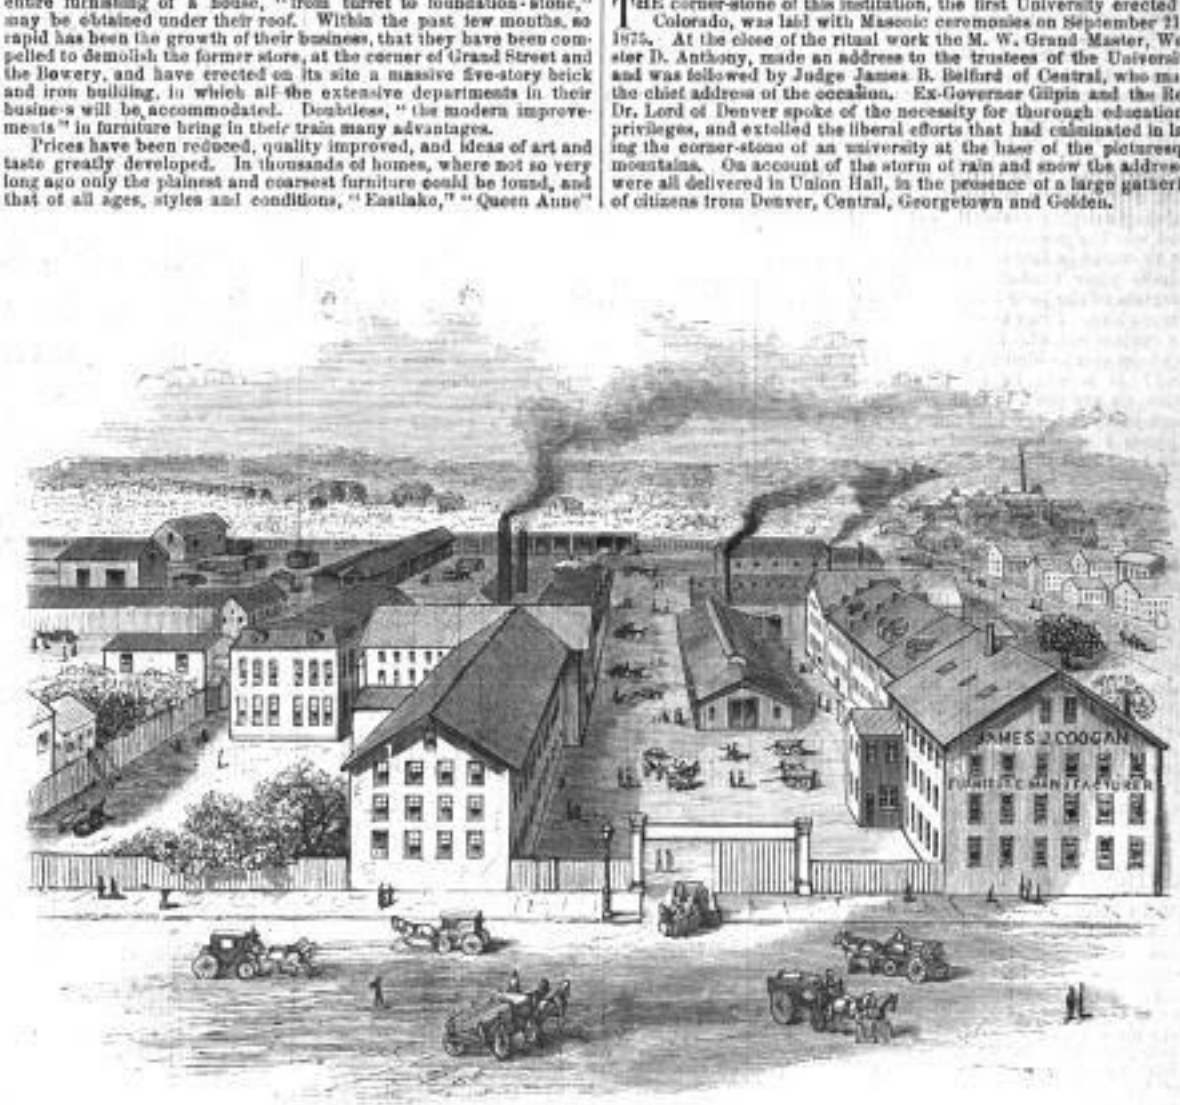
INTERIOR OF COOGAN'S FURNITURE MANUFACTORY AT CANTON, OHIO.



A GREAT FURNITURE MANUFACTORY.

THE manufacture of furniture by machinery has within the past few years come to be one of the most important of industries. We illustrate in this week's issue one of the leading houses engaged in this branch of business, Messrs. Coogan Brothers, of this city, employing in it a large amount of capital and a small army of workmen. The introduction of machinery has wrought in furniture manufacture and sale almost a complete revolution. Processes which formerly could be done only by hand and with tedious labor are now turned off with lightning-like rapidity, and a dozen or a score chairs or tables made in less time than one of the olden school. In the modern furniture much style and taste is shown. Rare woods from all lands are employed, and artists of exquisite skill design new forms and combinations. Much of the labor is done at manufactories distant from the city, and the furniture is merely "assembled" and finished by the dealer. Coogan Brothers, besides their large warerooms in this city, control an extensive manufactory at Canton, Ohio, and have at other points a large amount of work manufactured. Included in their business are carpet and floor-covering departments, so that almost the entire furnishing of a house, "from turret to foundation-stone," may be obtained under their roof. Within the past few months, so rapid has been the growth of their business, that they have been compelled to demolish the former store, at the corner of Grand Street and the Bowery, and have erected on its site a massive five-story brick and iron building, in which all the extensive departments in their business will be accommodated. Doubtless, "the modern improvements" in furniture bring in their train many advantages.

Prices have been reduced, quality improved, and ideas of art and taste greatly developed. In thousands of homes, where not so very long ago only the plainest and coarsest furniture could be found, and that of all ages, styles and conditions, "Eastlake," "Queen Anne" and "Louis XIII." are to-day familiar household terms. Taste and even elegance appear in the furnishing of the home, and use and beauty are brought into effective combination. In every sense the change is desirable and commendable. Homes are made more inviting, more beautiful, and the beginnings of a household which shall be permanent are brought within the reach of those of limited means.

PROGRESS OF AMERICAN INDUSTRIES.—THE MANUFACTURE OF HOUSEHOLD FURNITURE.

UNIVERSITY OF COLORADO.

THE corner-stone of this institution, the first University erected in Colorado, was laid with Masonic ceremonies on September 21st, 1875. At the close of the ritual work the M. W. Grand Master, Webster D. Anthony, made an address to the trustees of the University, and was followed by Judge James B. Belford of Central, who made the chief address of the occasion. Ex-Governor Gilpin and the Rev. Dr. Lord of Denver spoke of the necessity for thorough educational privileges, and extolled the liberal efforts that had culminated in laying the corner-stone of an university at the base of the picturesque mountains. On account of the storm of rain and snow the addresses were all delivered in Union Hall, in the presence of a large gathering of citizens from Denver, Central, Georgetown and Golden.

The building is a plain but massive and substantial structure, supplied with all the requirements of a practical education of the present day; is most delightfully situated, and worthy in every respect of the rich Centennial State.

NEW CIVIL SERVICE REFORM AT THE CUSTOM HOUSE.

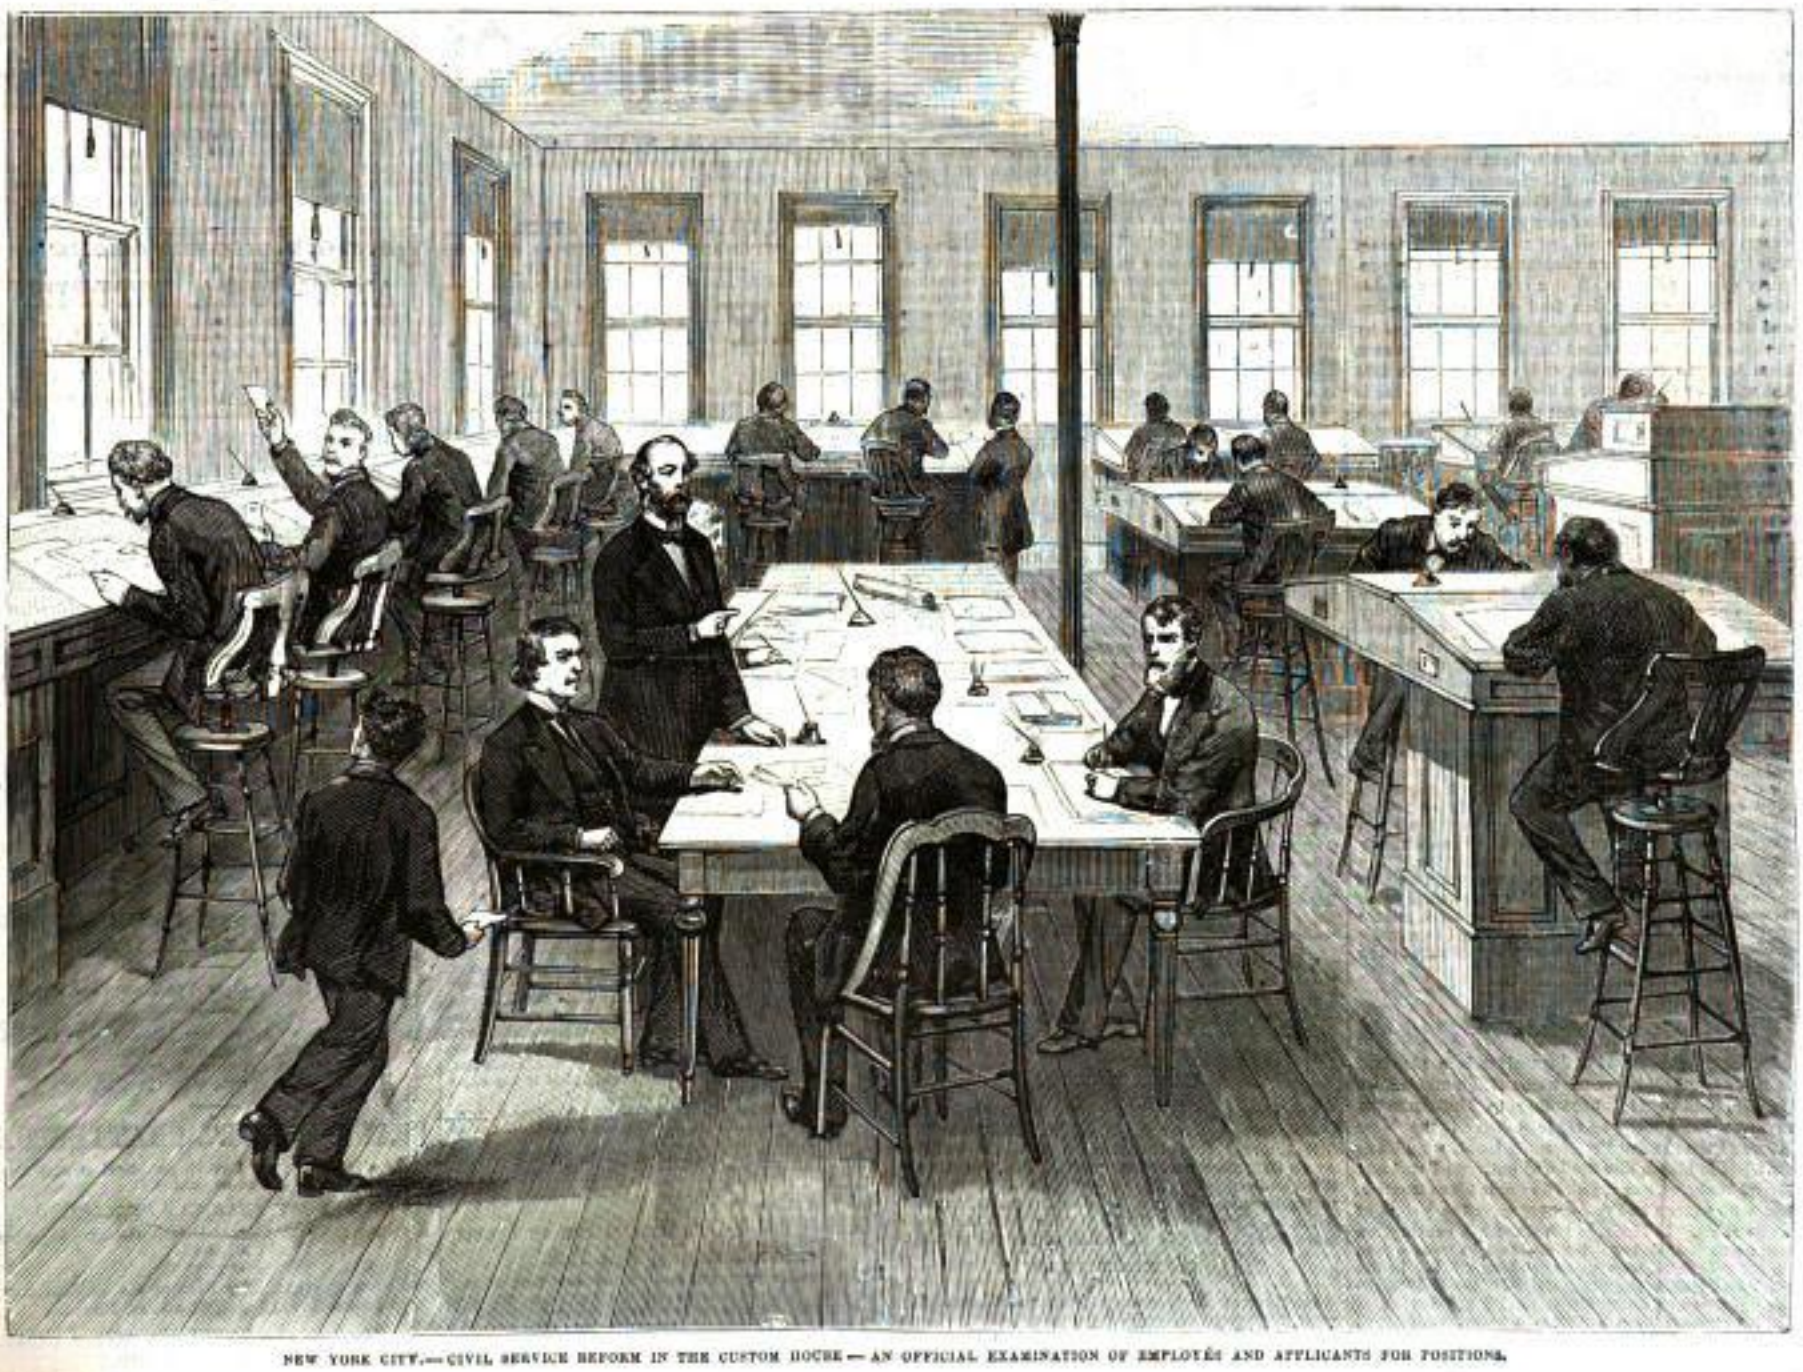
UNDER the new regulations prepared by Collector Merritt, the Civil Service Commission of the New York Custom House was organized on March 18th, by the selection of General Charles K. Graham, Surveyor of the Port, as president, and H. W. Gourley, Secretary for the Naval Office, and William H. Stillwell, Secretary for the Collector's Department. A Board of Appeals was also formed for the settlement of any misunderstandings that may arise, consisting of Collector Merritt, Naval Officer Burt and Surveyor Graham, whose place as president, when acting as a member of the Board of Appeals, shall be filled by an alternate. The examination-rooms are on the top floor of the Custom House, and are the same as were used by the Civil Service Commission of 1872. Thirty desks have been provided for the use of persons undergoing examination. Applicants for positions wishing to go through the examinations are tested regardless of vacancies, and will be rated according to their proficiency. Then, when vacancies occur, present employés are given the preference for advanced positions, while for the lowest ones, outside applicants who have obtained the required percentage will be summoned to pass a second or competitive examination. The problems are submitted on blank forms prepared at Washington. There is no set time for these examinations, as the necessity for holding them arises only when vacancies occur.

Twenty-eight candidates for two places as Storekeeper in the Custom House, at $4 per day, were examined on April 23d, under the civil service rules, in presence of Professor Hitchcock and ex-Collector Barney. The result will not be known for several days. On the following day another competition took place for two $1,200 clerkships in the Naval Office.

COLORADO.—UNIVERSITY OF THE STATE OF COLORADO, AT BOULDER.

HON. DANIEL F. BEATTY.

DANIEL F. BEATTY, the newly-elected Mayor of Washington, N. J., was born in Lebanon Township, Hunterdon County, August 14th, 1848, and received only the ordinary education afforded by a country school. The community which has honored him with election to its highest office is indebted to him more than to any other person for the prosperity it now enjoys, by reason of the immense piano and organ trade he has centralized there. His generous donations of orders upon the largest local stores to supply flour to the needy during the past Winter, and his liberal contributions to the various religious organizations, without regard to denomination, are indicative of but a few of the many incidents that are continually transpiring, and which have made him exceedingly popular among his fellow-citizens.



Men who have won for themselves honorable distinction in their particular avocations in life, and which we denominate as the successful self-made men of the day, are apt to possess all the qualifications necessary for the high positions of public trust, and form the nucleus from which the nation draws its best supporters. Mayor Beatty's career thus far has been marked by untiring perseverance, indomitable will, acute perception, and good, sound common sense.

HON. DANIEL F. BEATTY, MAYOR OF WASHINGTON, N. J.

BURIAL CUSTOMS IN BURMAH.

BURIAL customs in Burmah have both a serious and an absurd side. The coffin containing the deceased is carried to the place of interment or cremation, for both are practiced, to the sound of music; occasionally muskets are fired off; refreshments are freely handed about, and all relatives and friends contribute to defray the funeral expenses, and seven days after the funeral the same persons reassemble to hear "the law" expounded. Immediately after death, every fire in the house is extinguished, and when

NEW YORK CITY.—CIVIL SERVICE REFORM IN THE CUSTOM HOUSE.—AN OFFICIAL EXAMINATION OF EMPLOYÉS AND APPLICANTS FOR POSITIONS.

Digitized by Google

the procession leaves the house every vessel is emptied of its water. An ordinary funeral differs widely from that of a ploongyee, or monk, of high reputation. In the latter case a huge pile is erected, weeks and even months after death, in the middle of a large plain, to construct which the whole country is laid under contribution. When the time comes, men and women turn out in their gayest dresses; amidst shouts and yells the coffin is dragged on a huge car by a shouting crowd to the place of cremation, and the pile is fired, not, as in India, by the loving hand of the nearest male relation, but by a discharge of rockets, some nine to twelve feet in length, scientifically arranged on batteries four or five hundred yards off. Many of the fireworks explode ineffectively halfway before they get near the pile, and some are almost dangerous, fizz backwards, or will not move at all. But at last one rocket does the work of ignition, and happy is the village that has contributed the fortunate shot when so many have failed.

JOHN DUC,

MISSING BOY OF BUENOS AYRES, S. A.

INFORMATION is wanted of the whereabouts of John Duc, aged eleven years, who disappeared from his home in Buenos Ayres, South America, about the 25th of October, 1878. About the time of his disappearance several circuses were exhibiting in the vicinity of his home, and there is reason to believe that he was either enticed away or forcibly abducted by some of the members of these troupes and brought to this country. His parents have communicated with the New York Society for the Prevention of Cruelty to Children, whose officers have sent photographs of the lad to similar societies throughout the United States, with a request that their agents endeavor to ascertain his location, that he may be returned to his grieving parents. Any information should be forwarded to the office of the New York Society, No. 50 Union Square, E. Fellows Jenkins, Secretary.

The Richest of German Cities.

FRANKFORT-ON-THE-MAIN, now containing a population of about 100,000, is reputed to be the richest city of its size in the whole world. If its wealth were equally divided among its inhabitants, every man, woman and child would have, it is said, 20,000 marks, or some $5,000 apiece. There are, as may be supposed, a good many poor people in the town; but the citizens are, as a whole, in unusually comfortable circumstances, more so, probably, than the citizens of any other capital in Germany or Europe. It is asserted that there are 100 Frankforters worth from $4,000,000 to $5,000,000 each, and 250 who are worth $1,000,000 and upwards. The city is one of the great banking centres of the globe. Its aggregate banking capital is estimated at $200,000,000, more than one-fourth of which the famous Rothschilds, whose original and parent house is there, own and control. The annual transactions in bills of exchange are in excess of $100,000,000. Its general trade and manufacturing industries have greatly increased since the formation of the German Empire, to which Frankfort was originally averse, being a free city and an opponent of Prussia until coerced, in July, 1866, by General von Falckenstein, who entered it at the head of an army and imposed a fine of 31,000,000 florins for its insubordination. Frankfort is such a place for conventions and assemblies of all sorts that it is very apt to be full of strangers, and is consequently very expensive and by no means satisfactory to tarry in.

A New Article of Commerce.

AN American has brought to light a curious little insect, which, though long known and utilized in Central America, has not hitherto attracted the attention which, from its description, it undoubtedly deserves. This is the nin, or neen, a small insect allied to the well-known cochineal, having the property of producing an oil of a remarkably valuable kind. The insects, which feed on the mango-tree and other plants of the same kind, are collected by the inhabitants of Yucatan during the rainy season from April to September, and either thrown into hot water or placed over a fire, when the grease is easily collected. The insect itself is about an inch long, of a yellow color; and the fat is a yellowish brown substance, with a peculiar oily odor, in consistency resembling lard or suet according to the temperature in which it is kept. Its melting point is considerably higher than that of butter, and, when exposed to a great heat, it changes its condition, having evaporated a portion of its oil, till it becomes a tough but flexible gelatinous mass, insoluble in turpentine, and unaffected by heat or cold, which might be very valuable in mixing paints or as a lacquer or varnish. By burning this product a thick resinous oil is produced possessing remarkable adhesiveness, resembling a solution of india-rubber, which retains its semi fluidity for several days. In its natural state, when first collected, and at an ordinary temperature, the grease is easily soluble. Besides being used by the natives of Yucatan as a varnish and for similar purposes, it is said to be highly valued as a medicinal oil for outward application. The suggestions for its employment are very various. It might be used as a material for rendering paper or textile fabrics waterproof, or as a mucilage in many cases where glue or gum are unsuitable, or, as already suggested, for both painting and varnishing. The insect is said to exist in enormous numbers, and, as it feeds on plants which are of commercial value themselves, without injuring them, the neem grease ought to become as important a product as shellac or cochineal, which are produced by insects of the same genus.

Rose Legends.

In the neighborhood of Jerusalem is a pleasant valley, which still bears the name of Solomon's Rose Garden, and where, according to Mohammedan myth, a compact was made between the Wise Man and the genii of the Morning Land, which was writ, not in blood, like the bond between Faust and Mephistopheles, nor in gall like our modern treaties, but with saffron and rose-water upon the petals of white roses. In Paris, in the sixteenth century, an edict was issued requiring all Jews to wear a rose on their breasts, as a distinguishing mark. In the Catholic Tyrol, in the present day, betrothed swains are expected to carry a rose during the period of their betrothal, as a warning to young maidens of their engaged state. Roses have played, and still play, an important part in popular usages in many other parts of the world. In Germany, young girls deck their hair with white roses for their confirmation, their entrance into the world, and when, at the end of life's career, the aged grandmother departs to her eternal rest, a last gift, in the shape of a rose-garland, is laid upon her bier. Julius Cæsar, it is recorded, was fain to hide his baldness at the age of thirty with the produce of the Roman rose gardens, as Anacreon hid the snows of eighty under a wreath of roses. At Mid-Lent, the Pope sends a golden rose to particular churches or crowned heads, whom he designs especially to honor. Martin Luther wore a rose at his girdle. In these instances the rose serves as a symbol of Ecclesiastical Wisdom. A rose was figured on the headsman's ax of the Vehmgericht. Many Orders, fraternities, and societies, have taken the rose as their badge. The "Rosicrucians" may be instanced.

The "Society of the Rose," of Hamburg, an association of learned ladies of the seventeenth century, is a less known example. It was divided into four sections—the Roses, the Lilies, the Violets and the Pinks. The holy Medardus instituted in France the custom of "La Rosière," by which, in certain localities, a money-gift and a crown of roses are bestowed on the devoutest and most industrious maiden in the commune. The infamous Duke de Chartres established an "Order of the Rose," with a diametrically opposite intention, the avowed object being the undermining of female virtue. At Treviso, a curious rose-feast is or was held annually. A castle was erected with tapestry and silken hangings, and defended by the best-born maidens in the city against the attacks of the young bachelors, almonds, nutmegs, roses, and squirts filled with rose-water being the ammunition freely used on both sides.

FUN.

THE first person singular—Adam.

IS THE blarney-stone the same as the sham-rock?

"WHAT is that man yelling at?" said a farmer of his boy: "he is yelling at the top of his voice."

"I DON'T like Winter," said one pickpocket to another. "Everybody has his hands in his pockets."

A MAN who bought a box of cigars, when asked what they were, replied, "Tickets for a course of lectures from my wife."

WHICH is the merriest place in the whole world?—That above the atmosphere, because there all bodies lose their gravity.

AN old miser, having listened to a powerful discourse on charity, said, "That sermon so strongly proves the necessity of alms-giving that—I've almost a mind to beg."

CAREFUL housewife (lifting a shoe from the soup-tureen): "La, who'd a-thought baby's shoe would turn up in the soup? But I know it wasn't lost; I never lose anything!"

A HOME-RULE editor writes: "It is evident that the apple of discord has been thrown into our midst, and, unless nipped in the bud, it threatens to burst forth into a conflagration that will deluge the whole land."

A RESTAURATEUR at Berlin has devised an ingenious plan for keeping his place free from beggars, street nuisances, dead beats and other undesirable customers. He just puts a policeman's hat on a table near the door, and when the undesirable customer looks in it meets his fascinated gaze, and he closes the door gently and departs, holding his breath.

"It's bad enough," said the oldest Miss Crabapple to her seven sisters: "it's bad enough for pa to talk about marrying again at his time of life; but when he excuses himself by saying that that peet, made-up young thing will help us girls out by attracting men to the house, it's a little too outrageous to stand, so it is." And they passed a resolution to enter a nunnery in a body.

"IT seems to me your loaves are not of the same weight," muttered a fault-finding housewife to a baker, as she poised a couple of loaves from his basket: "do you suppose you can cheat me?" "I don't want to cheat you," replied the man of bread, not relishing such an insinuation; "I know the loaves were weighed, every soul of them, and one weighs just as much as t'other, by gracious! and more too, I dare say, if the truth was known!"

A COLORED minister in Georgia was brought to trial before his church on a charge of stealing bacon. After a number of witnesses had been examined the deacons retired, and soon afterwards returned the following verdict: "The Rev. Moses Bledso am ackwitted of de sinuations dat he actual stole de pork, as 'twas not shode dat sumbody else mitsn't have been wearin' his close; but de brudder is heerby 'fectionately warned dat in de future he must be more keerful."

THE CULTIVATION OF ROSES.

"Roses are her cheeks,
And a rose her lips."

THE best way for ladies to cultivate this rare species of roses is by studying and practicing the rules of hygiene, as taught in the "People's Common Sense Medical Adviser," only $1.50. Address the author, R. V. Pierce, M. D., Grand Invalids' Hotel, Buffalo, N. Y. If suffering from those painful weaknesses incident to the female organism, use Dr. Pierce's Favorite Prescription—a never-failing remedy for these complaints.

A FRETFUL mother and cross child indicate ill-health, requiring only Hop Bitters to remove.

THE ASBESTOS ROOFING is the only reliable substitute for tin. It costs only one half as much, is fully as durable, and can be easily applied by any one. H. W. JOHNS MANUFACTURING COMPANY, 87 Maiden Lane, N. Y., are the sole manufacturers.

THE "ST. NICHOLAS," the king of New York hotels, has enjoyed a pre-eminent favor during its long and prosperous existence. The most skilful cooks, most accomplished catering, and all the lavish modern conveniences, keep the "St. Nicholas" beyond rivalry among hotels.

THE Grand fair now in progress in Ferrero's Assembly Rooms, Tammany Building, East Fourteenth Street, under the patronage of the ladies of St. Ann's Church, is well worthy of public encouragement and support. The proceeds will be applied to paying the debt on the church and Parochial School. Music is furnished by the Seventh Regiment Band. The fair will close on the 9th of May.

IN MURRAY & LANMAN'S FLORIDA WATER the most debilitated and nervous can find relief. Used freely in the water of the bath, its effect is almost marvelous, so strengthening and bracing, and withal so exquisitely agreeable.

INDIGESTION, DYSPEPSIA, nervous prostration, and all forms of general debility relieved by taking MERIMAN'S PEPTONIZED BEEF TONIC, the only preparation of beef containing its *entire nutritious properties*. It is not a mere stimulant like the extracts of beef, but contains blood-making, force-generating and life-sustaining properties; is invaluable in all enfeebled conditions, whether the result of exhaustion, nervous prostration, overwork, or acute disease; particularly if resulting from pulmonary complaints. CARWELL, HAZARD & Co., Proprietors, New York.

A VERY FINE engraving by John Sartain, and entitled "The Iron-worker and King Solomon," has been published by Bradley & Co., of Philadelphia. It illustrates an old Rabbinical legend connected with the building of Solomon's Temple, and will be especially attractive to Masons. The engraving is executed in the highest style of the art, and the picture, in its groupings, spirit, fidelity to details and general effect, is sure to command wide admiration.

A GREAT many persons become insane from sleepless nights that Hop Bitters would have prevented.

Blair's Pills.—Great English Remedy for Gout and Rheumatism. All Druggists have them.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Frank Leslie's
CHIMNEY CORNER.
The Most Popular Illustrated Family Paper.

The SUCCESSFUL RIVAL of ALL THE WEEKLIES for THIRTEEN YEARS past.

The CHIMNEY CORNER presents a constant succession of brilliant attractions.

The Best Writers in the country contribute to its columns; and new serial stories of the most absorbing interest, of great power, true to life, and embracing a wide range of subjects, are constantly appearing.

The Continued Novels are by such eminent writers as John Habberton, author of "Helen's Babies"; N. Robinson, author of "That Mother-in-Law of Mine"; Etta W. Pierce, Christian Reid, Meta Victoria Victor, M. T. Caldor, Frank Lee Benedict, J. W. De Forest, and others equally celebrated.

Short Stories are completed in each number; and the miscellaneous contents embrace Biographies, Adventures, Essays, Travels, Curiosities of Foreign Life, Marvels in Nature and Art, Legends, Anecdotes, Poetry, etc.

Beautiful Steel Engravings are frequently presented to the subscribers, far exceeding in value the price of a year's subscription.

Published every Monday, and for sale by all newsdealers, price 10 cents. Annual subscription, $4. Three months, $1. Sent postpaid.

Frank Leslie's
SUNDAY MAGAZINE
FOR MAY.

REV. CHARLES FORCE DEEMS, D.D., LL.D., Editor.

"FRANK LESLIE'S SUNDAY MAGAZINE for May strikes us as being an excellent number of a great family favorite. We are glad to note that the opinion of leading papers and periodicals concerning it is so much in harmony with what we have often said in these columns. It contains more reading matter and more illustrations than any other similar publication in the world, and is extremely cheap at $3 a year. It is really doing a notable and noble work in supplying such an edifying and pleasing monthly publication at such a low figure. It deserves a much greater circulation than it has, although its success is marked."—*Morning Star, Wilmington, N. C.*

CONTENTS OF MAY NUMBER:

DESCRIPTIVE ARTICLES: "The Ainos of Northern Japan," by William Elliot Griffis, 14 illustrations; "Culture," by Mrs. Elizabeth L. Brooks; "Gather the Fragments," by Rev. T. S. Adams, D.D.

SERIAL AND SHORT STORIES: "David Fleming's Forgiveness," illustrated; "My Fortune and Misfortune," illustrated; "Forecastle Jack," by Frank H. Converse, illustrated; "Brother and Sister," an Australian sketch, illustrated; "The Erard Pianette," illustrated, etc., etc.

SKETCHES: "Professor Joseph Henry," by Hon. S. S. Cox; "A Mother's Influence," by the late ex-Senator Pratt; "The Friends and Temperance"; "Washington and his Mother," illustrated; "Uncle John Vassar," by H. A. Seyguern, illustrated; "My Dream," by R. N. Sledd, D.D.; "A Syrian Lawsuit," illustrated; "Beauty and the Beast," illustrated; "A Wonderful Cat," illustrated; "Jerry's Housekeeping," illustrated, etc., etc.

HOME PULPIT: Sermon by the Editor—"Josus, our Martyr King"; "Popular Exegesis."

POEMS: "Conquered at Last" (prize poem), by Maria L. Eve; "Always with You," by S. Gibson Foster; "Comfort," by James C. Lamb; "The Legend of the Windows," by Luther D. Bradley, illustrated; "To Will and to Do of His Good Pleasure," by Helen Marr; "The Maiden's Dream," illustrated; "Sympathy"; "Idlings with Nature," illustrated; "The Day of Rest," by James Grahame, illustrated; "Blowing Kisses," illustrated; "White Roses," by Margaret E. Sangster; "Canute and his Courtiers" (a legend), illustrated, etc., etc.

"The Invalid's Portion, and Thoughts for the Afflicted"; "Wit and Wisdom of Childhood," etc.

MISCELLANY: "Dying Prayer of King Edward VI."; "Ruskin's Bible Lessons"; "The Cross-Bearer a Negro"; "The Friends and Temperance"; "Good for Evil"; "Twelfth Day"; "The Kiosk of Ahmed, at Scrikhi, India"; "Barbara Heck and the Card-players"; "Mr. Corbet and Mrs. Dick"; "Peasants of Courland"; "A Prayer Answered"; "George and Robert Stephenson"; "Prayer of the Moslem"; "St. Cecilia"; "Tender-hearted"; "All Kiss the Baby," etc.

At Home and Abroad; Editor's Portfolio; The Calendar of the Prayer-book; Music, etc.

128 Quarto Pages. 100 Engravings.

THE EUROPEAN SHOOTING GALLERY.
Crowned Heads as targets for the Nihilists.

Important to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP is the only thing that mothers can rely upon for their children. It corrects acidity of the stomach, cures wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. During the process of teething its value is incalculable. It softens the gums, reduces inflammation and allays all pain, thereby giving rest to the child and comfort to the mother.

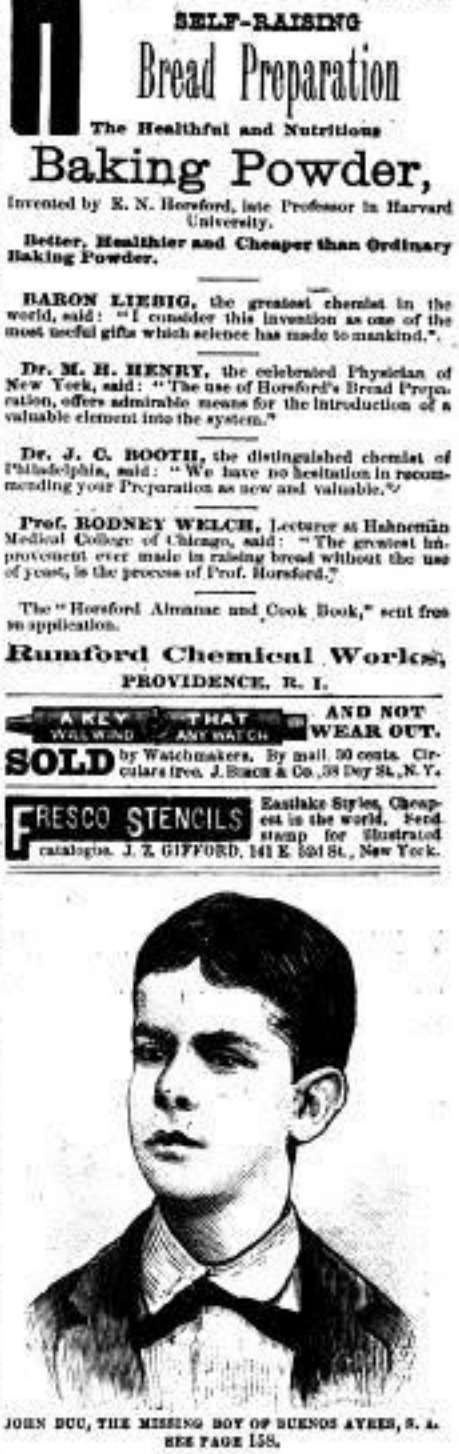
Bread Preparation
The Healthful and Nutritious
Baking Powder,
Invented by E. N. Horsford, late Professor in Harvard University.
Better, Healthier and Cheaper than Ordinary Baking Powder.

BARON LIEBIG, the greatest chemist in the world, said: "I consider this invention as one of the most useful gifts which science has made to mankind."

Dr. M. H. HENRY, the celebrated Physician of New York, said: "The use of Horsford's Bread Preparation, offers admirable means for the introduction of a valuable element into the system."

Dr. J. C. BOOTH, the distinguished chemist of Philadelphia, said: "We have no hesitation in recommending your Preparation as new and valuable."



Prof. RODNEY WELCH, Lecturer at Hahnemann Medical College of Chicago, said: "The greatest improvement ever made in raising bread without the use of yeast, is the process of Prof. Horsford."

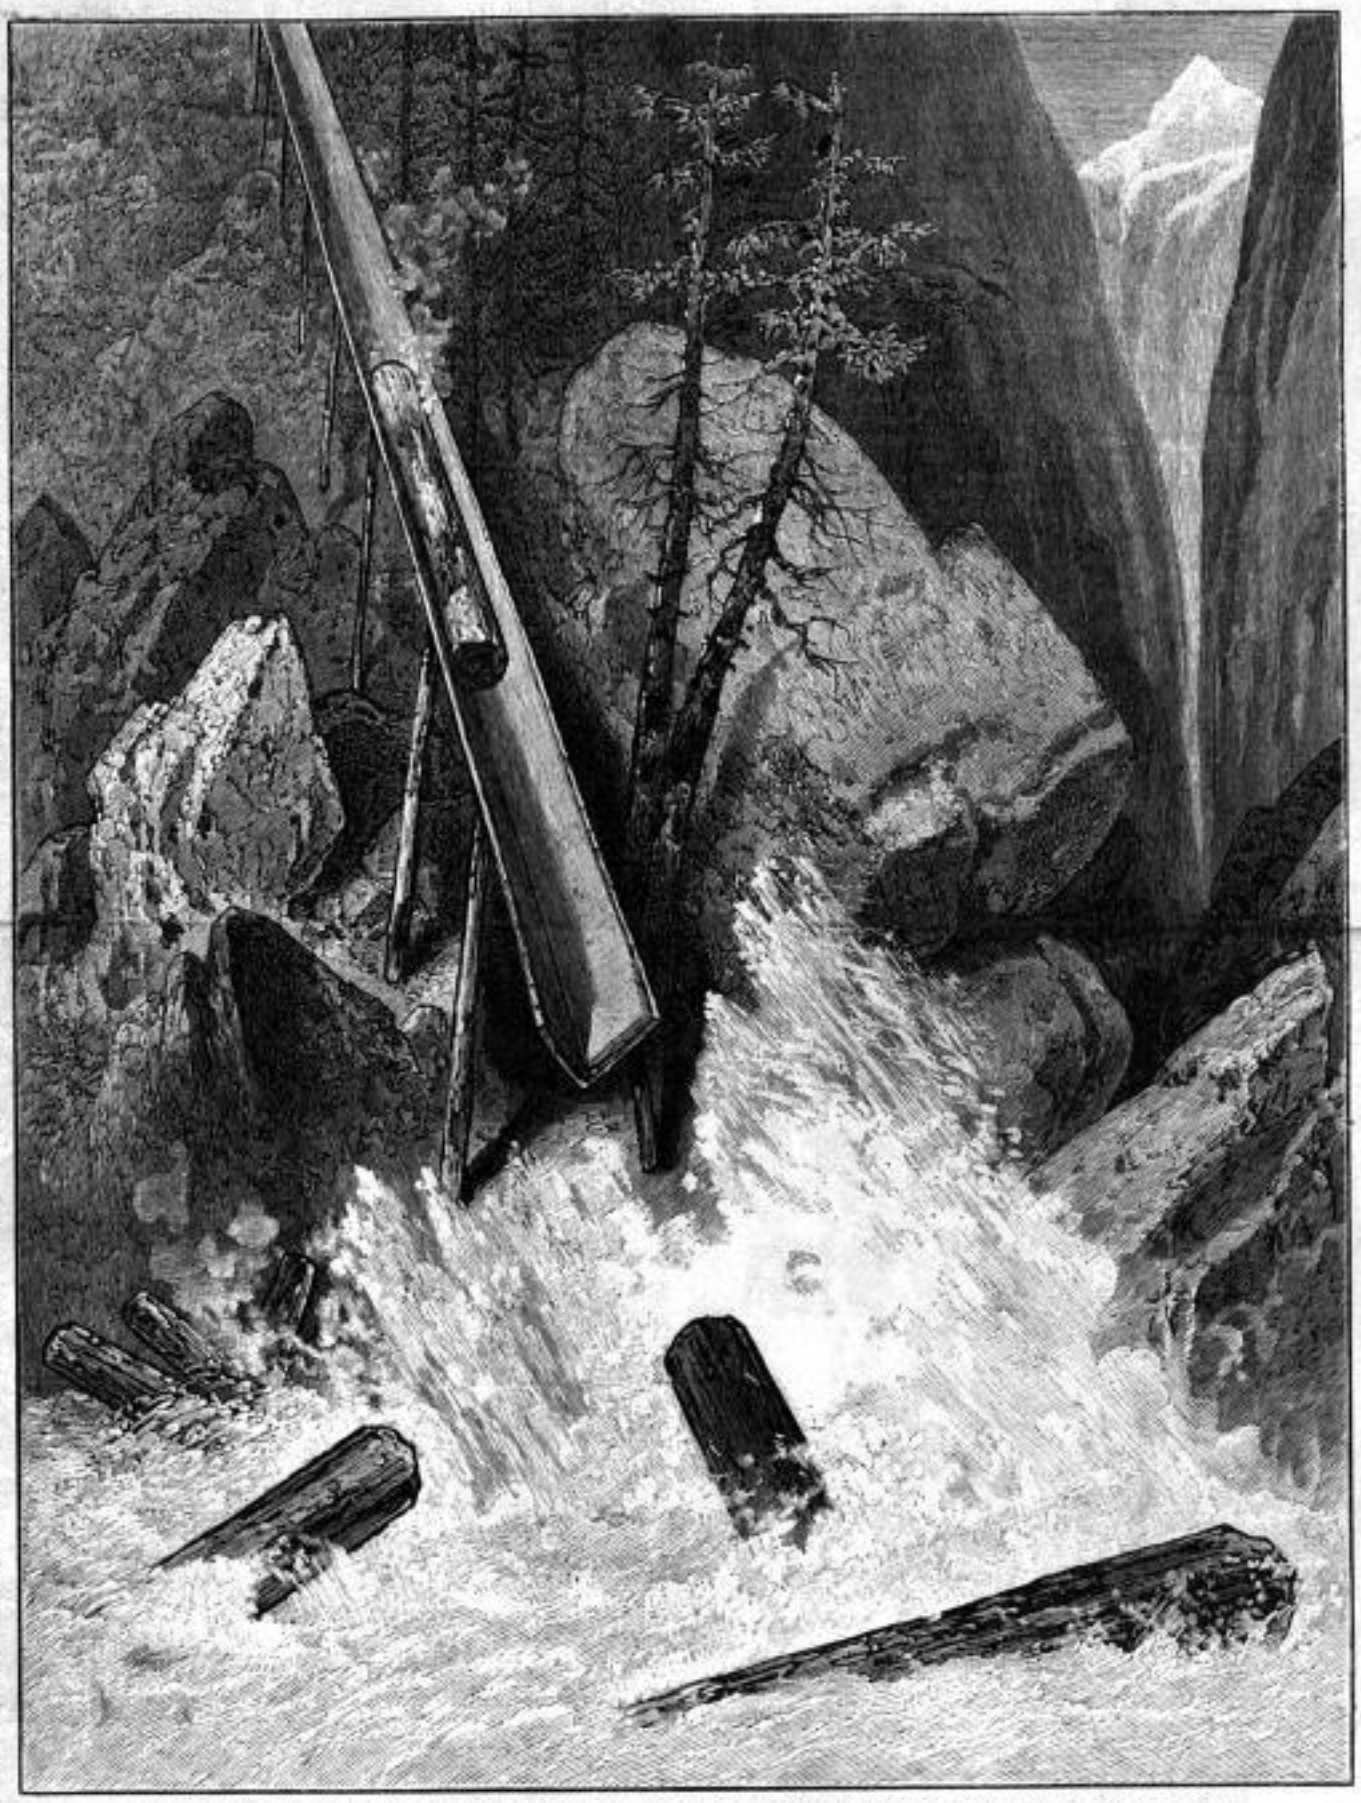
SHOOTING LOGS DOWN THE SIERRA.

WE give on this page an illustration of the method of getting out logs in the mountains of Nevada—a subject which is full of interest and color. In preparing for the work, a chute is laid from a river's bank up the steep mountain to the railroad by which the logs are brought from the forests; and down this declivity they are precipitated with thunderous roar, rushing with the speed of thunderbolts let loose from the hand of Jove. A track of fire and smoke follows them—fire struck out by their friction with the chute-logs. A Truckee journal says that they descend the 1,700 feet of the chute in fourteen seconds. In doing so they drop 700 feet perpendicularly, and strike the deep water of the pond with a report that can be heard a mile distant. Logs fired from a cannon could scarcely have a greater velocity than they have at the foot of the chute. Their average velocity is over 100 feet in a second, throughout the entire distance, and at the instant they leap from the mouth their speed must be fully 200 feet per second. A sugar-pine log sometimes weighs ten tons. What a missile! How the water is dashed into the air! Like a grand plume of diamonds and rainbows, the feathery spray is hurled into the air to the height of two hundred feet. It forms the grandest fountain ever beheld. One log having spent its force by its mad plunge into the deep waters, has floated so as to be at right angles with the path of the descending monsters. The mouth of the chute is perhaps fifteen feet above the surface of the water. A huge log hurled from the chute cleaves the air and alights on the floating log. The end strikes with a heavy shock, but glides quickly back for a short distance, then with a crash like the reverberation of artillery, the falling log springs one hundred and fifty feet vertically into the air, and with a curve like a rocket falls into the pond seventy yards from the log it struck.

SUNDAY MUSIC.

IT was not so many years ago but that those now living can remember it, that the performance of any music on Sunday, except such as is represented by the tunes "Dundee," "Martyn," "China" and others of the same class, was esteemed to be among the greatest of sins. And a couple of generations ago even an instrument of music of any kind was not allowed to be opened on Sunday, the churches even having no organ or melodeon, and depending on the leader, or precentor as he is now called. There exists in the City of New York to-day a church on Fifth Avenue, filled every Sunday with a wealthy and fashionable congregation, which has no organ, never did have one, and never will, owing to the last will and testament of its founder and principal benefactor, who died long, long ago, which provided that the church should forfeit all of his bequests to it should a musical instrument of any kind ever be played in it.



But though Galileo recanted in sackcloth and ashes his error of having taught the revolution of the earth around the sun, he muttered as he rose from his knees, "*E pur si muove*," and although this church remains without instrumental music, we very much doubt that the example will be followed by others. Religion has ceased to be gloomy and foreboding, and is daily more and more becoming bright and beautiful, and all the artistic resources are drawn upon to enhance the beauty of our churches, and the attractiveness of religious worship. In some of the Roman Catholic and Episcopal churches, full orchestras have been employed, while in very many churches throughout the entire country, the flute, cornet, or violin, has been effectively used to aid the organ in accompanying the singers. Arbuckle's cornet is almost as much a feature of the Brooklyn Tabernacle as Talmage himself.

But outside of the church the great change in Sunday music is also noted. It would take too much space and time to here attempt to discuss the cause of this change; we can only record the fact. It may not seem in New York to be such a great thing to have Sunday concerts, for New York is a cosmopolis, where members of all nationalities bring their habits and customs; but in Boston, the home of the Puritans, and the first representative in this country of the austere and severe in religion, for a Sunday evening concert to be given there, with a programme of secular music, is indeed wonderful. And yet this has been done for several years past; nay, even further than this has been attempted, and Sunday afternoon free concerts on the historic Common have been had, sanctioned by the municipality, and recently there have been Sunday evening concerts in Parker Memorial Hall, on Berkley Street. An admission fee of twenty-five cents was charged, and programmes of a high order were executed. As a specimen, the following programme is selected from among a number:

1. Overture, "Semiramide".....*Rossini.*
2. Andante, Symphony in A No. 4.....*Mendelssohn*
3. Violin Solo, Legende.....*Wieniawski*
4. Fantasia, Mosaic.....*Riviere*
   (Introducing variations for violin, 'cello, flute, oboes, cornets, horns, trombones, clarionets, bassoon and glockenspiel.)
5. Reverie.....*Vieuxtemps.*
6. Cornet Solo, "Alexis".....*Hartmann.*
7. Overture, "Raymond".....*Thomas.*
8. Paraphrase, "How Fair Art Thou"...*Nevadba.*
9. Oboe Solo.....*De Ribas.*
   (Played by the composer.)
10. Grand Selection, "Lohengrin".....*Wagner.*

The conductor of the orchestra was Mr. John C. Mullaly; the cornet soloist, Mr. Thomas Mullaly, and the violin soloist, Mr. John O. Mullaly.

The concerts were very successful and gave much pleasure to all, and it was not noticed that the morality of the City of Boston was at all injured by them.

NEVADA.—SHOOTING LOGS DOWN THE SIERRA MOUNTAINS—THE LOGS LEAPING FROM THE MOUTH OF A CHUTE INTO THE RIVER.

GOSSIP ABOUT CARLYLE.

A CHARMING companion with his friends, he has no love of promiscuous acquaintances, and firmly holds to his famous article of belief that most men are fools—at all events most Englishmen; but he thinks at heart that most Germans are, to say the least of it, good fellows. As to his opinion of Americans, it is briefly expressed in the pithy saying that American institutions have simply produced a population of 40,000,000 bores. Frenchmen he dislikes with an unreasoning aversion. He does not believe in them, not even in M. Gambetta. He never did believe in them. Being in a Paris drawing-room on the 24th of February, 1848, a Deputy rushed in, almost wild with excitement, to announce the proclamation of the Republic. Instead of exhibiting a proper amount of awe at the tidings, Mr. Carlyle burst out into an immoderate fit of laughter, and almost immediately after took leave of his host, still laughing. Mr. Carlyle was singularly happy in his marriage—a fact of which he gives somewhat caste evidence in his chivalrous defense of what all other biographers have considered the greatest blunder in Johnson's life. "Marry, by all means," is Mr. Carlyle's advice to young men; "well if you can, but in any case marry." Obviously, on this reasoning, Samuel Johnson was perfectly right to marry a lady old enough to be his mother, since he could get no one else to take care of him. In his habits Mr. Carlyle is above all things regular and temperate to a degree. He has none of what are fairly enough described as "the minor vices," at least "hardly any"; for he loves a pipe, and could not, therefore, qualify for admission into that most virtuous of societies, the Anti-Tobacco League. So far from being an epicure, he rather disconcerted the company at a memorable supper-party, given by Sir William Hamilton, by refusing to take anything more than a potato. He excuses himself by saying that in those days a potato constituted an excellent supper, and regrets that potatoes, like other things, have since degenerated. We all know he is a worker; but not all men know to how severe a test his industry, patience and courage were once put. He lent his manuscript of the French Revolution to the late Mr. Mill, who in turn lent it to Mrs. Taylor. She, through some unaccountable carelessness, allowed it to drop from her hand to the floor (the lady cannot have slept over that most glowing and picturesque of narratives!) without picking it up, and the next morning a housemaid duly lighted the fire with the priceless leaves. Mill went to recount the mishap to his friend, and looked so thoroughly miserable that Carlyle, so far from uttering a syllable of reproach, was at much pains to console him. But the loss was a real calamity, for Carlyle had kept no copy, and the re-writing of the work he has described as "anguish." It was accomplished in six months.

THE PRINCE OF WALES.

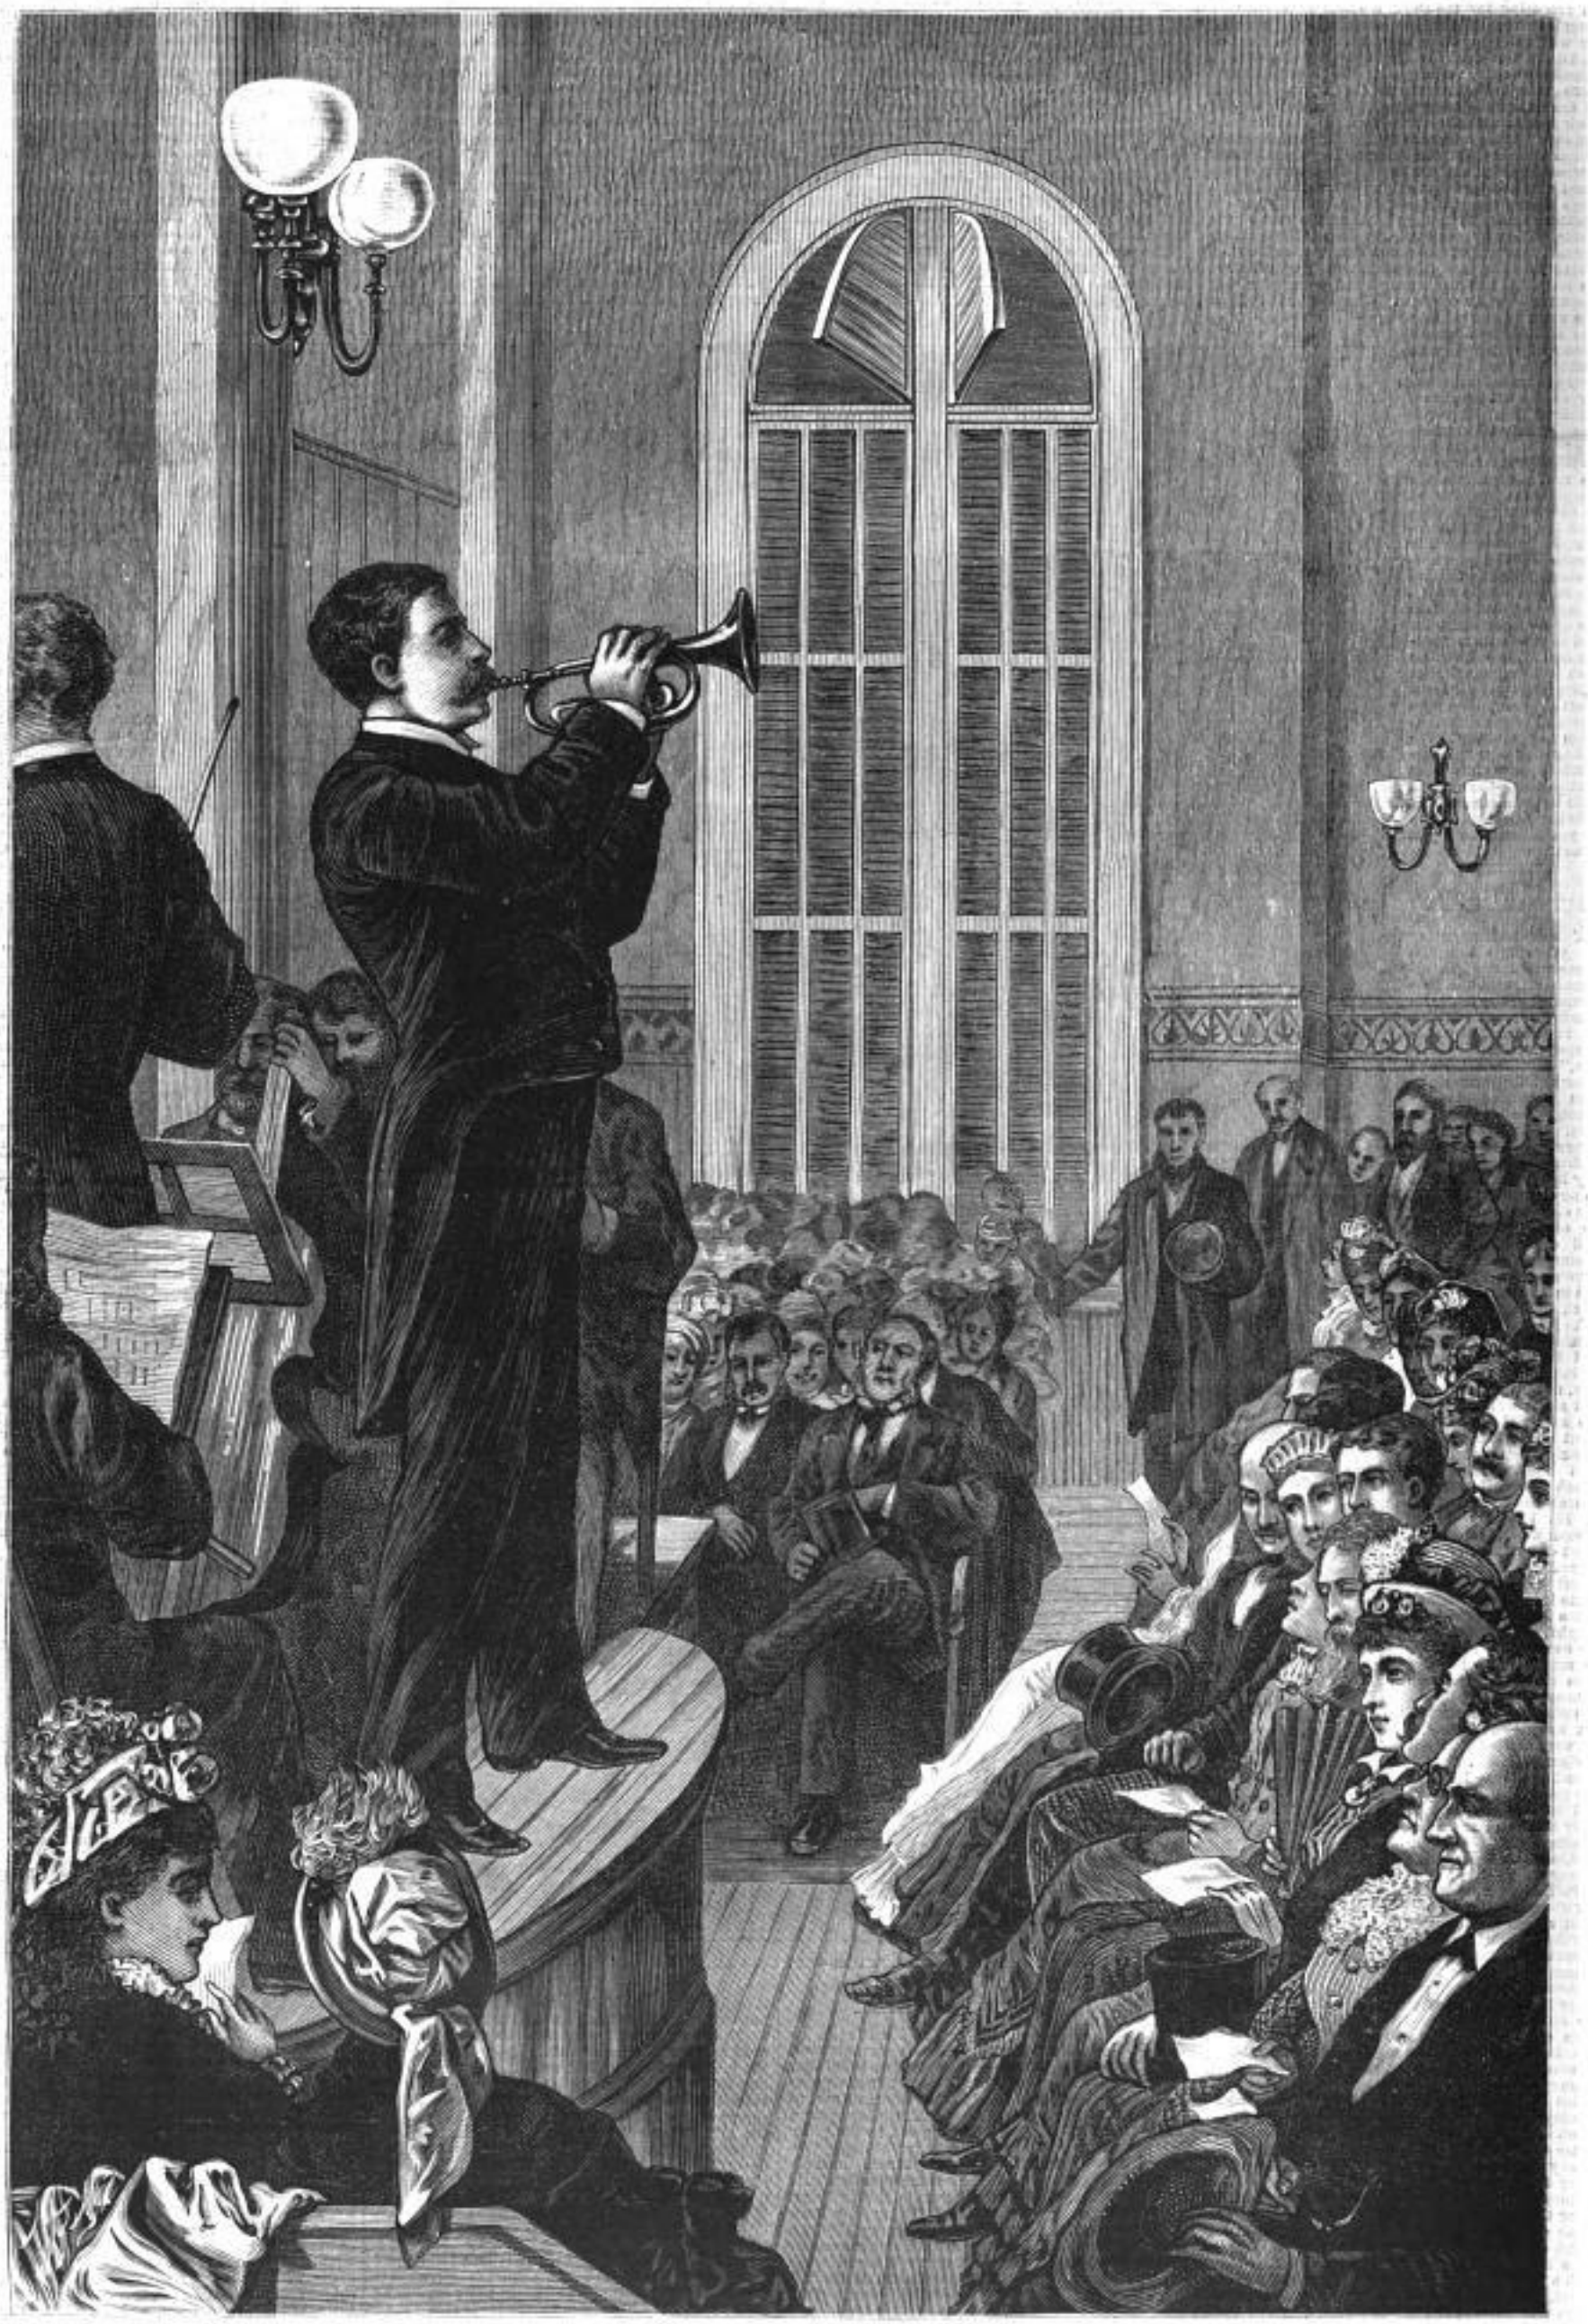
THE Prince of Wales is an excellent father, and very desirous that his sons should receive a substantial education, "and be taught to do something with their hands," as he puts it. He is also a good son, and sets the example of treating the Queen's slightest wish as a command. It is out of deference to her will that he never attends horse-races on Sundays whilst traveling abroad. He once begged by letter that this rule should be relaxed so as to enable him to accept Marshal MacMahon's invitation to see the "Grand Prix" run; but a negative answer was returned by telegraph, and the Prince did not go to the race.

Mitocra canamus. The Prince is a *bon vivant*, and very few Englishmen know so much about the philosophy of dining as their future king. He has, indeed, very great taste in this most important matter, and has labored with some success to reduce the inordinate length of modern menu. He has all the First Napoleon's horror of interminable banquets.

He is fond of late hours, but no matter how late he may go to bed, he rises early the next morning. He is a keen sportsman and a very fair shot. At whist he plays an excellent hand. And whether the occupation of the moment be whist, sport, or dancing, he enters into it with a hearty relish which contrasts strangely with the *blasé* airs of the golden youths of the day. His constitution is an excellent one. He rarely has a day's illness, and he is a living proof that no amount of tobacco can enfeeble either mind or body.

His education, by-the-way, was about as serious as can be the education of a man who is born to everything worth having on this earth, who becomes a Colonel at eighteen and a General at twenty-one. The Queen made a brave effort to bring up her sons in Spartan simplicity. Their table was of the plainest kind; they were made to do a fair amount of work, and they were required to take out-door exercise every day, in wet as in sunny weather. But once at Oxford, the Prince was virtually his own master, and he certainly distinguished himself more by a universal urbanity than by too exclusive an attention to the classic authors. There is a rather ludicrous tradition at Oxford of how the Prince, when an undergraduate, went "up to town" one bright afternoon, *incognitus*, as he fondly deemed, as well as *incognito*. What was his disgust on arriving at the Great Western terminus to find an equerry in attendance and a royal carriage awaiting his orders. Whether the Prince, despairing, requested to be driven to Exeter Hall to pass a quiet afternoon, the legend relateth not.

The Prince is admirably informed on an extraordinary number of questions. Of late, too, he has shown a taste and capacity for work from which one augurs that he will scarcely be the *Roi fainéant* which certain persons have prophesied and hoped he would be.



There is no doubt that on questions of foreign affairs he will insist on having a voice. His interest in them is, of course, of a twofold nature. He is a thorough Englishman, and very enthusiastic about the necessity for the maintenance of the British prestige; he is also a German prince. His German sympathies, however, did not carry him so far as to enable him to approve of the spoliation of Denmark; and he even expressed himself with unwonted bitterness on the subject. But his feeling was rather personal than political. A member of his household who spoke incautiously about the matter to the Princess received what is vulgarly called "a wigging" for his pains.

When the war of 1866 broke out, the Prince was at pains to establish a special line of telegraphic communication between Marlborough House and the seat of war. Similar arrangements were made in 1870. Nevertheless, beyond the expression of some very decided opinions, the Prince can scarcely, as yet, be said to have taken a serious part in politics.

The royal traditions of most countries exclude the heir-apparent from the active exercise of power. Like the last Prince of Wales, too, the present Prince has in vain demanded military employment. If he is a Field Marshal without ever having seen a skirmish, that is not his fault. The hereditary courage of his race he has been enabled to display in more ways than one. Every one knows how readily he plunged his hand into boiling lead the other day when Dr. Playfair told him he could do so. Another family quality he possesses is that of never forgetting a face he has once seen.

Few men have been more unscrupulously libeled than he. On one occasion he was much pained by a cartoon in a comic paper, which likened him to George IV. "I hope I'm not quite so bad as that," rather naively observed His Royal Highness, throwing over his illustrious great-uncle without any ceremony at all. When one subject of scandal began to pall on the public taste another was tried, and we were told that the Prince was head over ears in debt. As a matter of fact, the Prince has always known perfectly well what he was about. He is very generous, giving away far more than the public is aware of, and a model landlord.

HON. I. G. HARRIS,

UNITED STATES SENATOR FROM TENNESSEE.

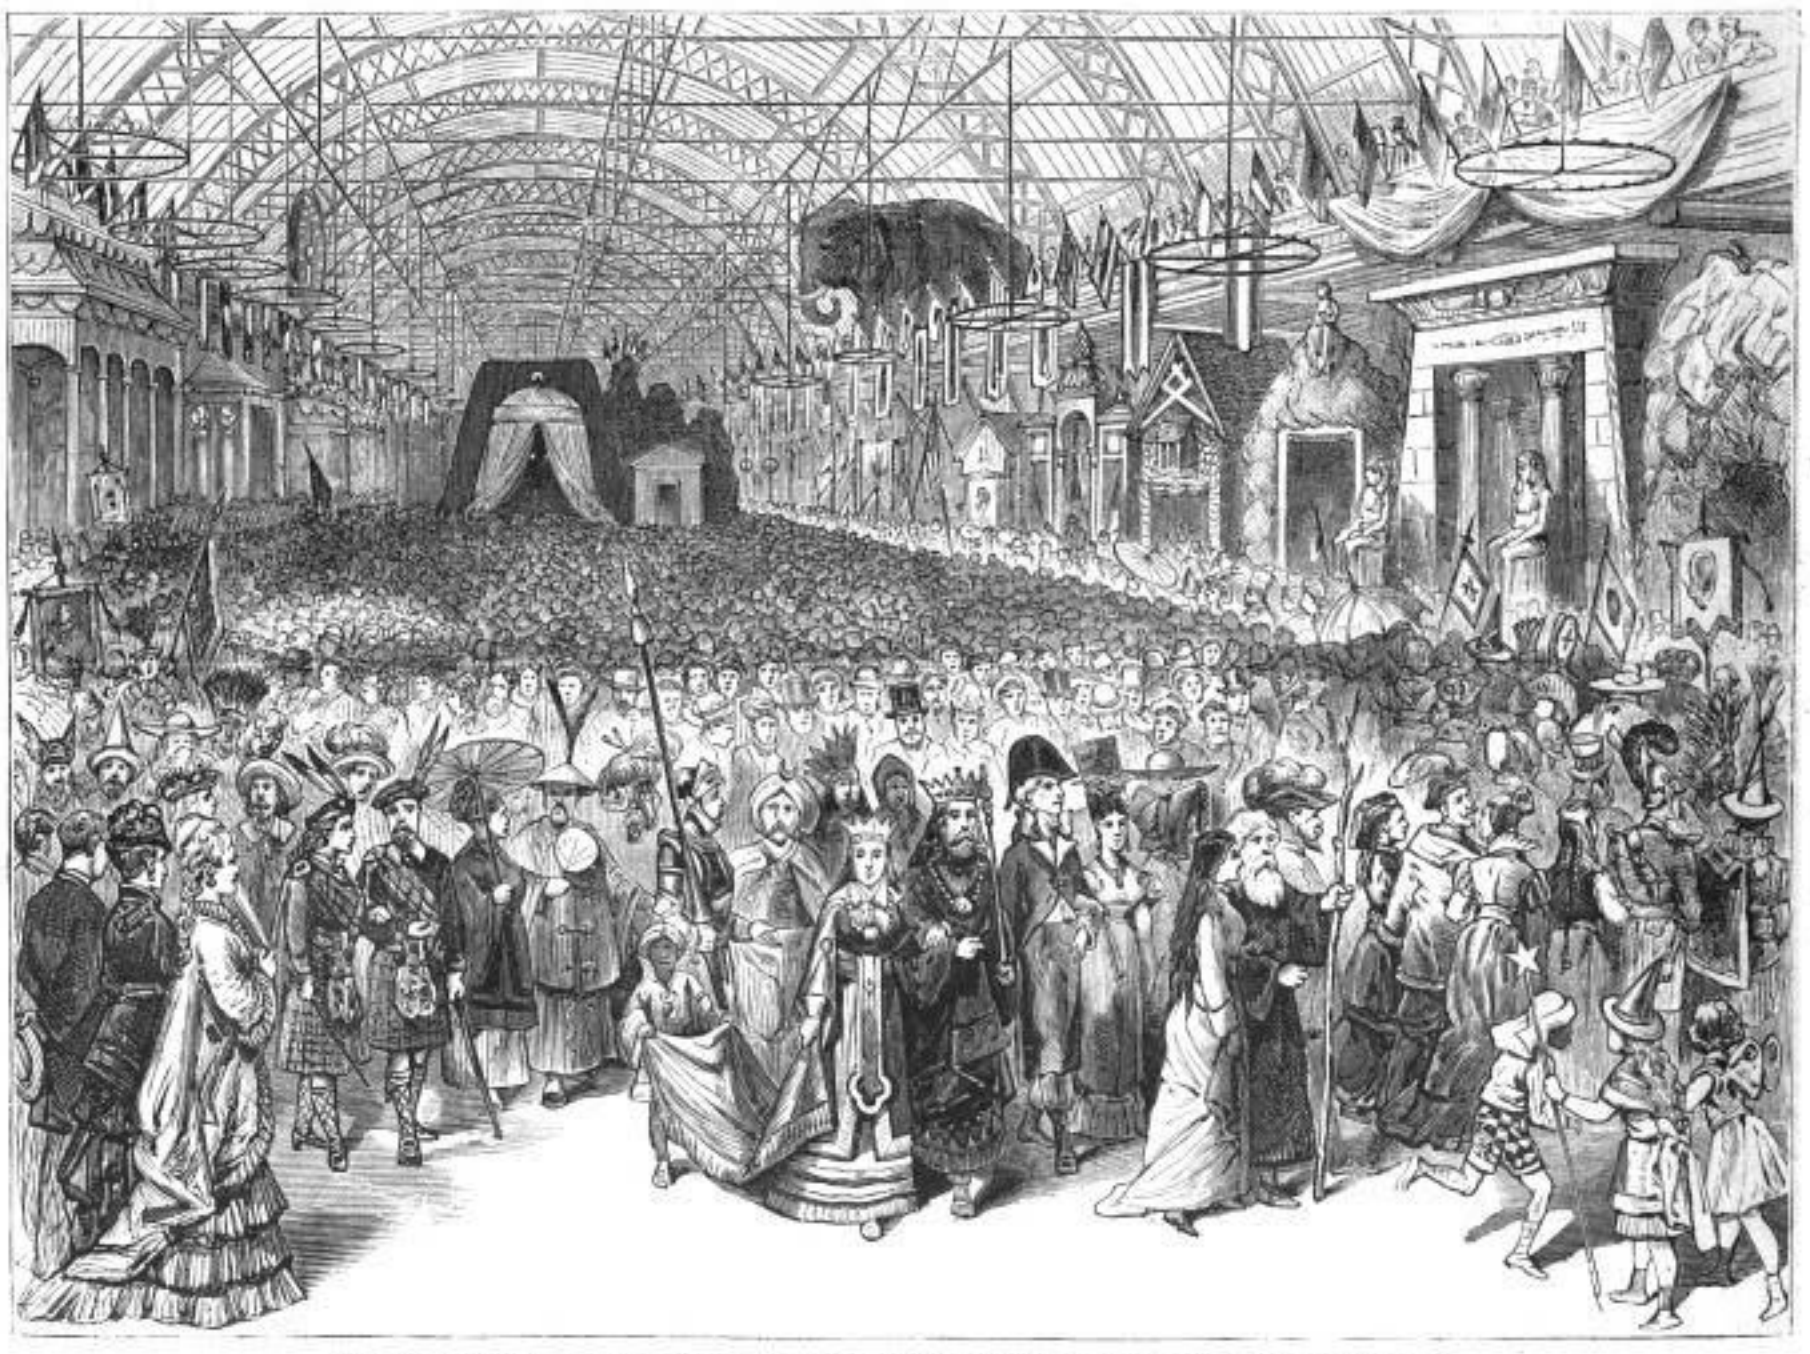
HON. ISHAM G. HARRIS, United States Senator from Tennessee, and Chairman of the Committee on the District of Columbia in the Forty-sixth Congress, was born in Franklin County, Tennessee, in 1818. He was educated at the academy at Winchendon, studied law, was admitted to the Bar and began practice at Paris, Henry County, Tenn., when twenty-three years of age. Six years later he was elected to the State Legislature as a Democrat from the Counties of Henry, Weakley, and Obion, and in 1849 was elected to Congress from the ninth district, winning a second term in 1851. After serving his second term he removed to Memphis, resuming the practice of law. In 1856 he was a Presidential elector for the State at large; in 1857 he was elected Governor of Tennessee; in 1859, and again in 1861, was re-elected. During the last three years of the war he was a volunteer aid upon the staff of the commanding general of the Confederate Army of Tennessee. He returned to the practice of law in Memphis in 1867, and while so engaged was elected to succeed the Hon. Henry Cooper in the United States Senate, and took his seat March 5th, 1877.

In the Forty-fifth Congress Senator Harris was a member of the Standing Committees on Claims and the District of Columbia, and of the Select Committee on the Levees of the Mississippi. In the present Congress, besides being advanced to the chairmanship of one of his old committees, he is a member of those on Claims and the Improvement of the Mississippi River, Chairman of the Select Committee to investigate and report the best means of preventing the introduction and spread of epidemic diseases, and a member of the Committee to make provision for taking the Tenth Census.

HON. I. G. HARRIS, CHAIRMAN OF THE SENATE COMMITTEE ON THE DISTRICT OF COLUMBIA.

THE CHICAGO AUTHORS' CARNIVAL.

THE Carnival of Authors which opened in the Exposition Building at Chicago, April 15th, was an exceptionally brilliant entertainment. It was under the patronage of many of the leading ladies of the city, who are interested in the prominent charitable associations, and embraced a grand exhibition of dazzling lights, beautiful girls, tinseled knights, portly dowagers, stately squires, armored warriors, kings, queens, princesses, pages, murderers, knights of the road, Indians, Turks, infidels and Jews, Greeks, Romans, Yankee Doodles and Hindoos. The Carnival opened with a grand reception on the part of a thousand individuals who had assumed the characters made immortal by certain of the world's greatest authors—a procession, as it were, in flesh and blood, straight from the pages of history and romance, and fiction and poetry. The procession marched around and around the building, and as it drew its endless self again and again past a given point, the full beauty of the costumes and wearers, the address of characterization and the faithfulness of impersonation, were made visible to all of the immense throng of spectators. The militia took part in the procession, their bright arms and martial equipments giving no small addition to the general effect. A band of four Highland pipers played "the air that never was sounded for retreat" in a manner that caused the closing of many a delicate ear. The marching of the procession lasted for more than an hour, to the intense satisfaction of all present.



The booths represented scenes and characters of many of the standard authors, living and dead, and all were very attractive. Dickens's "Old Curiosity Shop" attracted more visitors and observers than any booth in the Carnival. The booth was in itself an old curiosity shop. The furnishings antedated the present century, and were as profuse as ancient. The most marked fidelity to detail was everywhere visible. There were chairs more than 250 years old, and other oddities too numerous to mention. The characters represented at the booth were not by any means all contained in the "Old Curiosity Shop." Nearly all of Dickens's works were impersonated. Little Nell and her Grandfather were admirably portrayed. Then there were the Marchioness, Quilp, Barnaby Rudge and his raven, the Artful Dodger, Fagin, Oliver Twist, Smike, the Fat Boy, Squeers, Nicholas Nickleby, Lady Deadlock, Bill Sikes, and hosts of others.

ASPECTS OF LIFE IN INDIA.

A CORRESPONDENT, who accompanied General Grant's party on its recent visit to Jeypore, India, writes:

"We remark, as we drive through Jeypore, that there are gas lamps. This is a tremendous advance in civilization. One of the first things we heard in India was that in Jeypore lived a great prince, a most enlightened prince, quite English in his ideas, who had gas lamps in his streets. Wherever we stopped this was told us, until we began to think of the Maharajah not as a prince descended from the gods, but a ruler who had gas lamps in his streets. We are told also that he has a theatre almost ready. What strikes us vividly is not the gas in the streets or the theatre, but the Indian aspect. It is all so new and strange that the gas lamps seem to be out of place. These long streets of rose-colored houses, with turrets and verandas and latticed windows, that look so warm and picturesque and glowing—this is what your fancy told you might be seen in India. The bazaars, in which dealers are crouching, the holy men and ascetics covered with ashes, the maidens with green and scarlet drapery, carrying huge water-pitchers on their heads, the beggars, the brown, naked children rolling in the earth, the calico-covered soldiers, and the odd costumes, the marks of rank and caste—from the holy Brahmin, who belongs to a sacred race, down to the water-bearers and scavengers—all this is new and strange. An attendant leads a cheetah along the street, and you shudder for a moment at the idea of a wild menagerie animal being at large, but you learn that the cheetah is quite a harmless animal when tamed, and good for hunting.

"We come to the edge of the town, which suddenly ends, and are in a valley. The hills are covered with a brown furze, which looks as if it would crackle and break under the burning sun. The roads are lined with cactus, and the fields are divided by mud-fences which would not last a week in our rainy regions. We pass gardens—walled gardens with minarets. Here the ladies of the Hindoo gentleman's house may take their recreation, but their life is seclusion. The camels pass us carrying heavy burdens, and the trees are alive with monkeys. The monkey is a sacred animal, and no Hindoo would take its life. Monkeys skip over walls and sit on the trees and watch us as we pass. I do not know what would become of India with the monkey as a sacred protected animal but for the leopard. In a short time he would swarm over the land. But the leopard and other wild beasts keep him down. Wild peacocks swarm and beautify the hard brown hills with their plumage. The peacock is also a sacred animal, and they were as plentiful on our road to Amber as sparrows on the road to Jerome Park. The hills are now and then crowned with castles, the strongholds of old chiefs who took to the cliff and the fastness for protection in the days when might made right in India—the days before the Englishman came and put his strong hand upon all these quarreling races and commanded peace. We pass a lazy pool, in which alligators are lazily swimming, and on the banks are two or three wild pigs drinking the water. The beating sun pours its rays over you, and you shrink from it under the shade of your carriage and wonder how these lithe and brown Hindoos, who run at your carriage-wheels, can fight the sun. There is no air, no motion; and now, that we are out of Jeypore and away from the cool and freshened streets, all is parched and arid and dry."

FRANK LESLIE'S
ILLUSTRATED
NEWSPAPER

Entered according to the Act of Congress, in the year 1879, by FRANK LESLIE, in the Office of the Librarian of Congress at Washington.

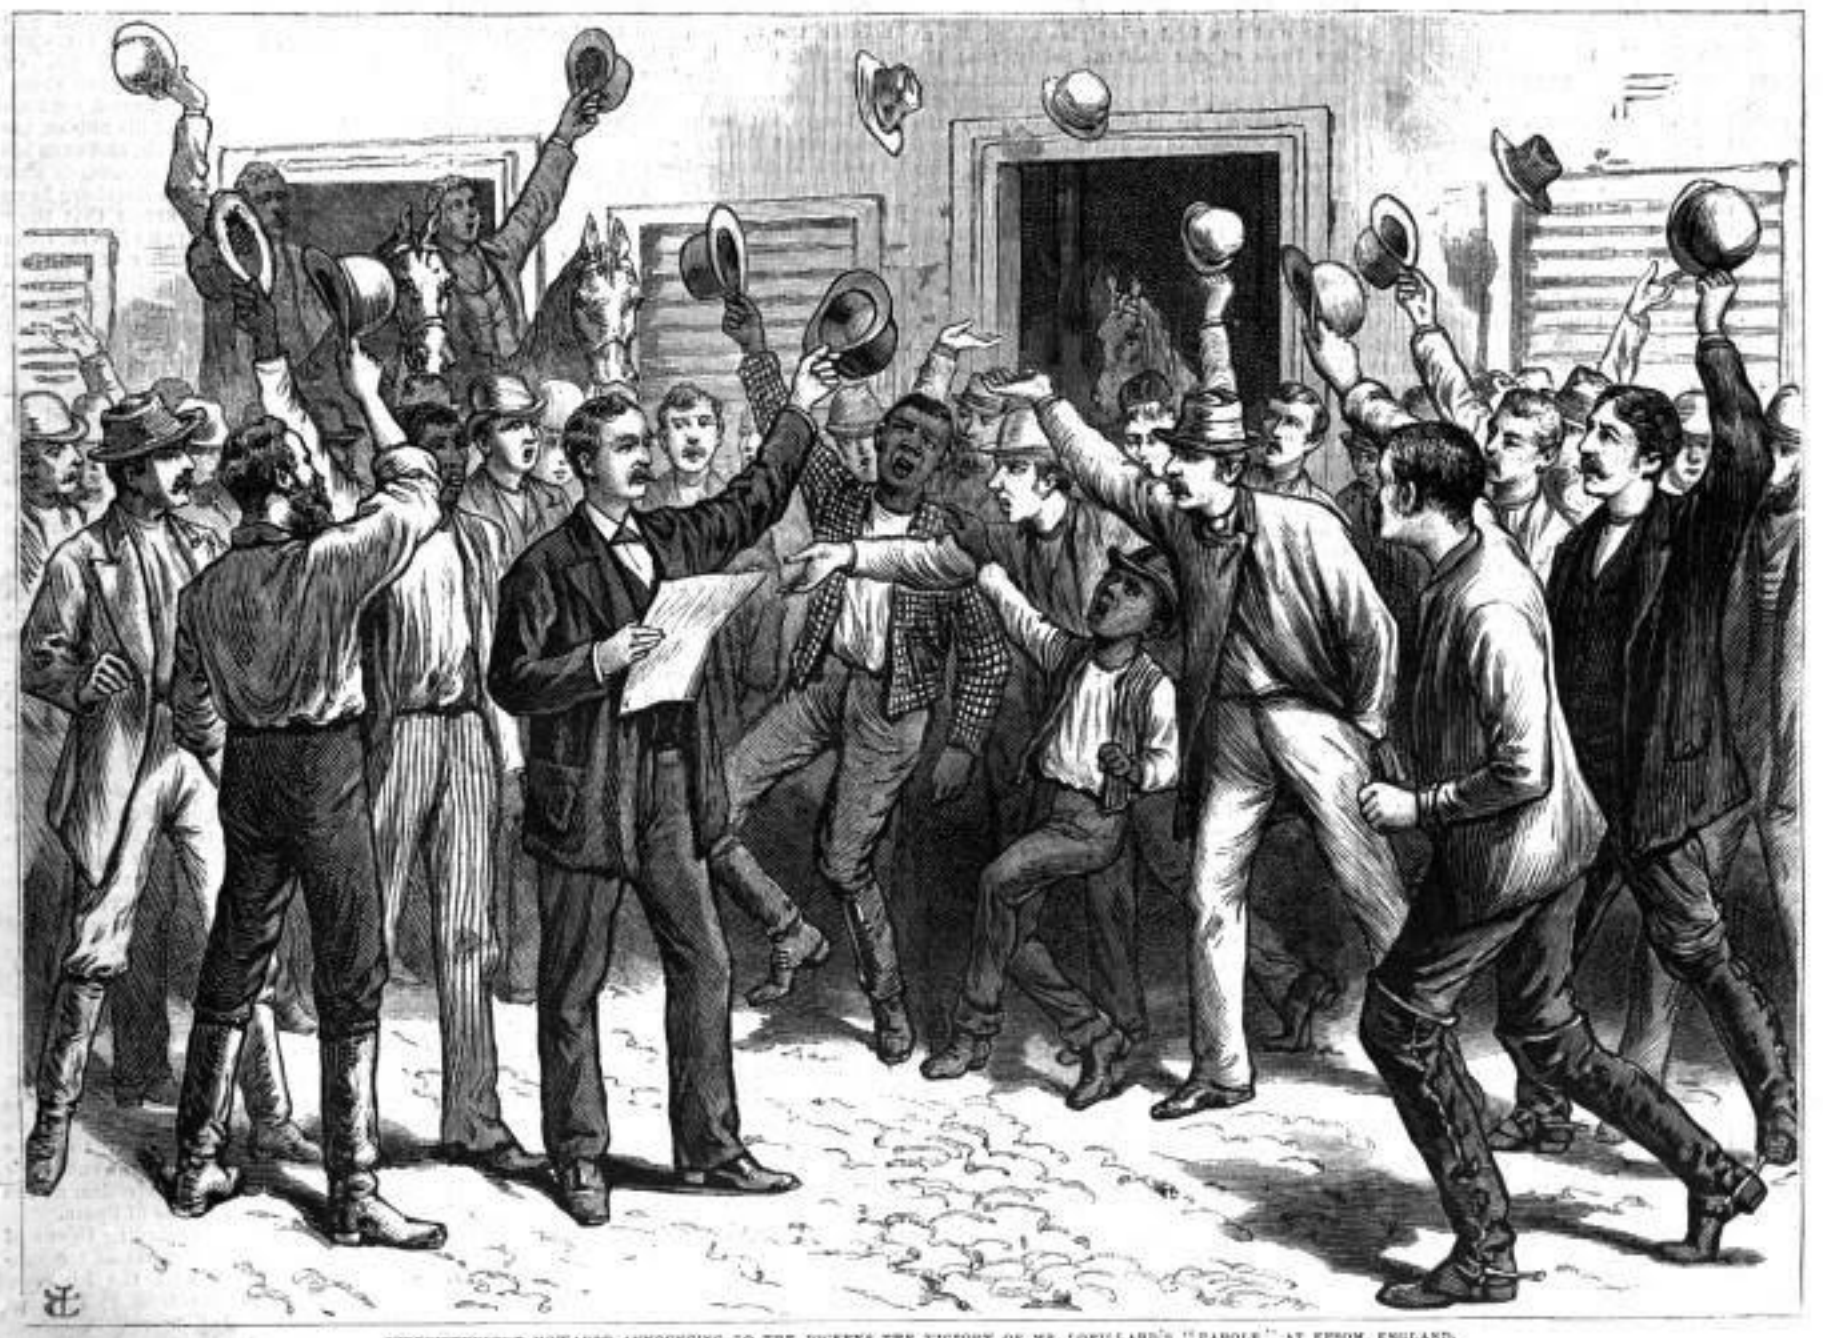
No. 1,233—Vol. XLVIII.] NEW YORK, MAY 17, 1879. [Price 10 Cents. $4.00 Yearly. 14 Weeks $1.00.

"PAROLE'S" HOME.

Mr. Pierre Lorillard's Model Stock-farm.

THE stock-farm of Mr. Pierre Lorillard, owner of the now famous "Parole," at Jobstown, N. J., covers 1,000 acres of ground and comprises every convenience and requirement of a model American farm. Our illustrations on the double-page are drawn in such a manner that by attaching the end of one to that of the other an accurate panoramic view of the entire domain may be obtained, with all the objects of interest.

The mansion is a handsome three-storied, semi-gothic building, and is used by Mr. Lorillard as a country-seat. It is magnificently furnished, and trophies of the chase, portraits of famous race-horses, and many *chefs-d'œuvre* from the hands of the most distinguished masters, adorn the walls.



Near by is the coach-house, with accommodations for twenty-four horses, a gothic structure, now in course of erection. Adjoining the mansion is a circular wooden structure, surmounted with a large bell weighing 940 pounds, and used for calling the hands to work or sending them to their meals. In this building are kept the draught-horses and carts, wagons, etc. In the centre of the yard belonging to this establishment is an enormous food-bin with forty shoots.

A broad and well-kept road leads from this part of the estate to the farm-buildings. This is the largest department of all, over five hundred head of stock being housed in the numerous out-buildings. The feeding-room is a marvel in itself. A railroad, upon which are mounted numerous trucks, runs from this department all over the buildings, and thus affords an easy means of conveying the large quantities of food necessary to supply the cattle and pigs. Seven men are kept constantly employed mixing and preparing the various descriptions of food required. The hog-pen is one of the largest in the country, being 345 feet long, and well filled with grunters of every sort.

FRANK LESLIE'S
ILLUSTRATED NEWSPAPER,
53, 55 & 57 PARK PLACE, NEW YORK.
FRANK LESLIE, EDITOR AND PUBLISHER.

NEW YORK, MAY 17, 1879.

In the next number of FRANK LESLIE'S ILLUSTRATED NEWSPAPER, *we shall resume our pictorial history of the "Frank Leslie Transcontinental Trip," completing the series of illustrations of San Francisco, its Harbor, Racecourse, Seal Rocks, etc., with views of Chinese life and industries, and following these with sketches of the route by way of the Napa Valley to the Geysers, thence south to the mammoth trees and Southern California. The illustrations will portray the picturesque scenery with which that whole region abounds, as well as the customs and manners of the people, and, with the sketches already published, will form an admirable pictorial exhibit of all the conspicuous attractions of the Golden State.*

THE VETO MESSAGE.

THE Veto Message with which President Hayes has arrested the passage of the Army Appropriation Bill is a clear, temperate and forcible document. The President explains that his first objections attach to the sixth section of the Bill amendatory of the statute now in force, as adopted in 1865, in regard to the authority of persons in the civil, military and naval service of the United States, "at the place where any general or special election is held in any State." The President intimates that he has no objections to so much of this proposed amendment as relates to the presence of soldiers at the polling-places, but he considers it entirely needless in view of the fact that, by the Act of June 18th, 1878, already approved by him, it is made unlawful to

"Employ any part of the Army of the United States, as a posse comitatus, or otherwise, for the purpose of executing the laws, except in such cases and under such circumstances as such employment of said force may be expressly authorized by the Constitution or by Act of Congress."

The President accepts this clause, in the light of its contemporaneous exposition, as having for its object to "take away the idea that the army can be used by a general or special deputy-marshal, or any marshal, merely for election purposes," and having signed the Bill with this understanding, he holds that "under existing laws there can be no military interference with the elections."

But the President avows his invincible opposition to so much of the proposed legislation as would deprive the civil authorities of the United States of all power to keep the peace at Congressional elections. He truly says that the Congressional elections in every district are justly regarded as "a matter of political interest and concern throughout the whole country," and in this matter of national concern Congress has been charged with a rightful and obligatory jurisdiction by that clause of the Constitution which authorizes the National Legislature, with a single exception, to alter the regulations of the State Legislatures with regard to "the times, places, and manner" of holding elections for Senators and Representatives, as also by the terms of the Fifteenth Amendment to the Constitution, which gives to Congress the power of protecting colored citizens of the United States from any abridgment of the right of suffrage "on account of race, color, or previous condition of servitude."

As the proposed legislation passed by the majority of both Houses in Congress has for its object to prevent the execution of the existing laws under this head, without, however, formally repealing those laws, the President takes exception both to the matter and the form of such legislation—to the *matter* of it, because he is unwilling to see the Federal Government evicted of the rightful jurisdiction with which it is clothed in the premises under the Constitution; and to the *form* of it, because the laws now in force on the subject are not repealed by the proposed enactment, but made inoperative and void by the obstructions put in the way of their execution.

The exceptions of the President, it seems to us, are well taken on both of these grounds. He who would deny to Congress its ultimate jurisdiction over the conduct of Congressional elections in all the States must have read to no purpose the debates that were had on the adoption of the Constitution in 1788. Those debates swarm with recognitions of this constitutional right. The enemies of the Constitution, especially those of the extreme "State rights" school, found in the clause which gives Congress the power of altering the State regulations under this head a ground of alarm for the freedom and independence of the States in the choice of Representatives. The friends of the Constitution frankly admitted the Federal jurisdiction which is given by the Constitution in the premises, and just as frankly defended not only its rightfulness, but its indispensable necessity in certain possible conjunctures. We might fill whole columns with citations in proof of this statement, but we must satisfy ourselves with the following words of Mr. Madison, the father of the Constitution, as spoken by him in the Virginia Convention:

"It was thought that the regulation of the time, place and manner of electing the Representatives should be uniform throughout the continent. Some States might regulate the elections on the principles of equality, and others might regulate them otherwise. This diversity would be obviously unjust. Elections are now (1788) regulated unequally in some States, particularly in South Carolina, with respect to Charleston, which is represented in the State Legislature by thirty members. Should the people of any State by any means be deprived of the right of suffrage it was *judged proper that it should be remedied by the general Government.*"—[4 *Elliot's Debates*, p. 267.]

In the presence of such testimony as to the intent of the Constitution, it cannot be doubted that the Congress has a legitimate jurisdiction over all Congressional elections, and that jurisdiction having been expressed in the shape of existing enactments, it does seem paradoxical to leave the enactments on the statute-books, but to nullify their execution by the United States civil authorities. Such crookedness in the form of legislation is more suggestive of sinister designs than of open and frank dealing with the true relations of the question; and we do not wonder that the President objects to this indirection, as well as to the substance, of the legislation by which it is sought to weaken "the power of the National Government to protect the Federal elections by the civil authorities." If the existing statutes need amendment, let them be amended by a straightforward Act in the usual way.

And this narrower question of form and substance assumes a much broader aspect when the President comes to consider the shape under which the proposed legislation is submitted to him as a mere "rider" on an Appropriation Bill, and a "rider" avowedly placed there, as some of its supporters admit, in order to wrest from the Executive an assent which expresses his submission to moral coercion rather than his submission to a sense of public duty. The President justly argues that such a theory of legislative predominance on the part of Congress is subversive of the checks and balances lodged in the Constitution for the protection of the Executive and of the Judiciary in the independence with which they are charged in the performance of their respective duties. The reasoning of the President under this head is so conclusive, and revolves so completely in the sphere of the first principles which lie at the basis of our Federal polity, that the only ground of our surprise at their statement is found in the fact that their statement should be made necessary by the blatant speech of the Democratic zealots who have so heedlessly committed their party to this untenable issue in our current politics. The sooner the party extricates itself from the *cul de sac* into which it has been driven the better it will be for its credit; and, as a clew by which to guide its steps in regaining the solid ground of wisdom and law, we commend its leaders to the following opinion, announced by Mr. Tilden in his letter accepting the Democratic nomination for the Presidency:

"In my opinion, an amendment to the Constitution ought to be devised separating into distinct Bills the appropriations for the various departments of the public service, and excluding from each Bill all appropriations for other objects, and all independent legislation. In that way alone can the revisory power of each of the two Houses and of the Executive be preserved and exempted from the moral duress which often compels assent to objectionable appropriations, rather than stop the wheels of Government."

AN UNPOPULAR WAR.

"EVERYBODY, from the general down, is tired of the war, which brings endless discomforts and little or no glory." Such is the announcement which comes from the Afghanistan correspondent of the London *Times*. There appears to be the very best of reasons for the dissatisfaction thus expressed. Dispatches report the complete break-down of the quartermaster and commissary departments of the Khyber column, now at Jellalabad, which, in consequence of the lack of transportation, is incapacitated for offensive operations, and must remain inoperative. The garrison at Candahar is in the same condition, and the indications are that, as a result of this incompetency in a most important department, the whole Indian military system must undergo a radical change. It is not to be wondered at that thoughtful Englishmen are beginning to inquire, in view of the misadventures in Afghanistan and Zululand, whether the Government is not fairly amenable to the charge recently made by John Bright, namely, that it is a Government which in five years "has done nothing whatever that is useful at home, and everything you can imagine that is mischievous abroad."

The latest information as to the attitude of Yakoob Khan represents him as still negotiating with the invaders, who have formally demanded the cession of the Khyber and Kuram Passes, and permission to maintain a Resident at Cabul. It may be doubted whether this demand will be complied with; and if it shall be rejected, the British may find the troubles of the future even greater and more serious than those which have gone before. The *Saturday Review* hints at these when it says:

"If only there were sound political reasons for attempting to occupy Cabul, the result of the enterprise might be anticipated with reasonable confidence. It may be practicable to deprive Yakoob of his capital, but not to force him to surrender, or to compel his acceptance of terms of peace. Both his father and his grandfather retired from Cabul in consequence of English invasion; and Dost Mahommed afterwards voluntarily constituted himself a prisoner, while Sheer Ali died in exile. The present Ameer may at his pleasure retire into distant parts of his territory where it will be impossible to follow him, and the English army must sooner or later evacuate Cabul. The fate of Shah Soojah and of his patrons will probably serve as a sufficient warning against any attempt to govern Afghanistan through a pretender. Any nominee of the invader would be justly hated by the people; and it would be necessary to maintain his power by a permanent occupation of the country. It is but an additional objection to the proposed movement that it will contradict Lord Beaconsfield's statement that the main object of the war was already accomplished by the rectification of the frontier."

The views here expressed are no doubt those of the educated conservative sentiment of Great Britain; and the Government, unless success shall speedily crown the British arms in the invaded territory, will scarcely be able to resist the demand for a more vigorous but less pretentious policy.

IMPORTANT TREASURY DECISION.

A DECISION recently rendered in a Georgia case by the Treasury Department virtually releases the Southern States from obligations to the General Government amounting to millions of dollars. It will be remembered that at the beginning of the civil war the Government levied an assessment of $20,000,000 upon the States for the purpose of conducting the war. The seceded States were regularly charged with their proportion, which in the case of Georgia amounted to $584,000, and about the same for Kentucky, Tennessee, Virginia, etc. Six per cent. interest was charged to this amount for each year from its assessment. After the war special agents were sent into the various States to collect it, and all have paid more or less on this claim—South Carolina having paid the whole amounted exacted. Some years ago the work of collection was suspended, the Government, however, still holding the States liable for the balances remaining unpaid. Whenever appropriations have been made to these States, or claims set up by them have been allowed by Congress, the amounts have been credited against the State indebtedness to the Federal Treasury—the aggregate so withheld amounting to nearly $2,000,000.

Some time since Congress made an appropriation of $72,000 to the State of Georgia in settlement of the old Creek war account. The Secretary of the Treasury ordered this amount to be credited on Georgia's indebtedness of $584,000 under the assessment levied for carrying on the civil war, with interest for eighteen years, or over $1,000,000 in all. The fiscal agent of Georgia resisted this proceeding of the Secretary, and in support of his position submitted an elaborate argument on the nature and relations of direct taxes, holding that a State could not be assessed or taxed in its sovereign capacity, but that all assessments must lie against the individual taxpayers. After a careful examination of this argument by Secretary Sherman and the legal officers of the Treasury, the previous ruling in the case was reversed, and on the 26th of April the money previously withheld was formally paid into the State treasury, the charge of over $1,000,000 against Georgia, on the war account, being at the same time marked off the Government books.

This decision will affect every Southern State which has suspended claims against the Government, and will, no doubt, exercise an important influence upon the financial condition of some of them. A large amount due to Tennessee, for instance, but hitherto withheld, will now be paid over in accordance with the new ruling, and may very properly be applied to the liquidation of obligations which the State has too long avoided. Whether the principle upon which the assessment was successfully resisted by the Georgia counsel is a sound one, or would be sustained by the courts, only a formal test will determine, and that, perhaps, will not, under the circumstances, be invited.

IN THE OLD WORLD.

RUSSIA is so vast an empire, both in territorial extent and in population, as to oppress the mind with vague ideas. In speaking of it, the temptation to exaggerate is almost irresistible. At this critical moment in the history of the Russian Empire, the Government, and its sworn enemies, the Nihilists, have alike the strongest—although entirely different—motives to represent the internal agitations of Russia in as gloomy and portentous colors as possible. The Russian Government would fain justify its extreme repressive measures. These, like the sufferings that were endured in consequence of State persecutions in Neapolitan prisons, and that provoked a successful appeal to the British Government a few years ago, when Mr. Gladstone was Prime Minister, have led Sir Robert Peel, in the House of Commons, to ask whether Her Majesty's Government will take any steps in the interests of humanity to mitigate the horrors and atrocities amidst which a reign of terror is now being carried on in Russia over 80,000,000 of people. On this occasion, Sir Robert Peel was decidedly snubbed by Lord Beaconsfield's Government, no Minister being present on Wednesday, April 30th, to answer the question; but on Friday night, May 2d, in answer to Sir Robert's inquiry, the Chancellor of the Exchequer said the Ministry declined to interfere in the internal affairs of Russia. Manifestly, Lord Beaconsfield is not ready to undertake war with the Czar, or even to dictate to Alexander II. what should be, on humanitarian principles, his domestic policy. Doubtless also, the British Prime Minister takes a cooler view of the situation in Russia than the Czar himself, and is not disposed to give full credit to the wild stories with which the Nihilists, and their affiliated sympathizers, the German Socialists—having shrewdly gained in advance the ear of the European and American press—are now filling all the newspapers. It is the avowed object of the Nihilists to excite alarm.

In St. Petersburg, since the attempt on the Czar's life, troops have been held in readiness day and night for any outbreak, and police regulations as to watch at the entrance of houses, visits and searches by night, are more stringent than ever. People are arrested at all hours by batches. The Czar no longer goes out without an escort, and most high dignitaries, having been anonymously threatened, like the porters at the doors, with assassination, also have escorts. Bill-stickers, in spite of the utmost vigilance, persevere in covering the walls with seditious placards. A peasant was arrested on the 16th ultimo with a detailed plan on his person for a revolutionary outbreak that very night, and the troops were consequently kept ready, night and day, for immediate action, until the whole story proved to be an intentional mystification.

So far as the people at large are concerned, they are by no means accomplices of the Nihilists, but they are, so far, mere apathetic spectators of the drama, or rather the tragedy, enacted before them. Yet the Czar is not without good reasons for distrusting the loyalty of his nobles, his *tchinovniks*, or civilian officials, and even his army. Two regiments of foot-guards and a brigade of artillery at St. Petersburg have lost so many officers by arrest that they have been obliged to draw officers from other regiments. The number of political prisoners throughout the empire is increasing fearfully. Four thousand seven hundred were lately removed in one night from Fort Petropaulovski to Kuzan, Saratoff, and other eastern prisons. It is said that 12,000, with their families, will be sent this Summer from Novgorod to Siberia. And an idea may be formed of the apprehensions of the Czar from the extraordinary precautions deemed indispensable during his late journey to Livadia. Sentinels were stationed the whole length of the line, traffic was stopped, and all access to the line was prohibited for twenty-four hours before the departure of the imperial train. From Livadia the Czar is expected to go direct to Berlin, where he will "assist at" the golden wedding of the Emperor and Empress of Germany, and to reach St. Petersburg on the 18th of June. He intends to pass the Summer at Petertroff, and to return to Livadia in Autumn.

The Emperor and Empress of Russia have thanked the Assembly of Bulgarian Notables for the election of Prince Alexander of Battenberg, on the 29th of April, to the throne of Bulgaria. The new Prince, who was elected by acclamation, is the third child and second son of Prince Alexander of Battenberg, and a first-cousin of the Grand Duke Louis of Hesse, who married the late Princess Alice of England. He is a favorite nephew of the present Empress of Russia. A bachelor, twenty-two years of age, his name will now be added to the short list of marriageable sovereigns. The death of Princess Christina, which took place on Monday week, puts an end to the ambitious plans of her father, the Duke de Montpensier, who is supposed to have hoped that she might become the successor of her late sister, Queen Mercedes, as the second wife of King Alfonso of Spain.

France and England, according to one of the many contradictory reports on the subject of their relations with the Khédive, have addressed to that refractory Prince a joint note, threatening him with strong measures in case he does not comply with

Digitized by Google

their demands that he shall replace Mr. Wilson and M. de Blignières with an English and a French Minister in his Cabinet, and not dismiss them in turn without the consent of those two Powers. But the Khédive declines to be bullied. *Punch* sums up the attitude of the Khédive, thus: "Ismail Khéd-ive (the Egyptian donkey-driver)—'Clar de way, you Ginours! He's a berry fine donkey when I'm 'lowed to ride him myself, and plenty stick!'"

Garibaldi's scheme to arm Italy with a million rifles having collapsed (if it ever really existed), he has founded a democratic league to obtain universal manhood suffrage by pacific means. It is announced that he will soon return to Caprera. The Pope has at last decided in favor of Catholics voting at the Italian elections. There is a prospect of a bitter conflict in France, in consequence of the determination of the French Ministry to prevent the discussion of Jules Ferry's Education Bill in the pulpit by pastoral letters from bishops and archbishops. The German Reichstag began on Friday the tariff debate, and Prince Bismarck earnestly defended protection. The British House of Commons has twice sustained Lord Beaconsfield's foreign policy by decisive votes during the past week—once in relation to the increase in national expenditure, and once in relation to commercial treaties.

The situation in South Africa remains unchanged, with the indications pointing to a collapse of Cetywayo's authority. Many of the chiefs are said to have proffered submission, and Cetywayo himself is reported as being now disposed to peace. Sir Bartle Frere telegraphs that, with the exception of a small and violent minority, the Boer leaders are inclined to pursue a reasonable course.

A great fire has devastated the town of Orenburg, in Russia. Nine hundred and forty-nine dwellings were burned, together with one mosque, two churches, four mills, 292 shops, several tar, coal and firewood stores, timber-yards, the meat-market, fruit-market, woman's gymnasium, the club-house, the workhouse, police station, and justice's court, and many public buildings. The loss was enormous, and there is great suffering—more than one-half the population, or 15,000 persons, being destitute of food and shelter. In Hungary there have been fresh floods, causing great damage.

A STRANGE PROCEEDING.

THE courts in South Carolina—Federal as well as State—have a very comprehensive method of clearing their dockets. Recently a batch of alleged "bulldozers" were indicted upon charges of having interfered with and obstructed voters in the exercise of the franchise. They were placed on trial in the United States District Court, and, after protracted and embarrassing delays, two or three of the accused were convicted. At this stage, the Democratic leaders proposed to the United States District-Attorney to continue the cases until the November term of the court, promising that if he would do so the State would immediately pardon ex-Congressman Smalls and ex-Treasurer Cardozo, grant a new trial to one Samuel Lee, a colored postmaster, convicted in his absence on a trivial charge, and then enter a *nol. pros.* in his case; and further, the State would continue the case against ex-Governor Chamberlain and all the other vexatious prosecutions now pending in the State courts against Republicans, with the understanding that they would be finally dropped, the State pledging itself also never to institute any new proceedings against Republicans for any offenses alleged to have been committed while the Republican Party was in power in the State. Upon these conditions the District-Attorney actually took upon himself the responsibility of continuing the cases, and the Democratic officials at once fulfilled their part of the bargain by pardoning Cardozo and Smalls and securing a new trial for Lee.

Certainly this is, in every way, a most extraordinary proceeding. If the persons indicted for violation of the election laws were guilty, they should be punished; at any rate, being indicted, they are clearly entitled to the speediest possible trial. So as to the Republican officials, who for years have rested under the gravest charges of corruption and maladministration. These charges are either true or false. If true, the offenders should be made to suffer the penalty of the law; if innocent, they should be given a chance to show the fact and vindicate their good name. For a cabal of politicians, altogether outside of the methods known to the law, and in defiance of the authority of the courts, to enter into a bargain for the release of the accused, on condition that certain other criminals shall be suffered to go scot free (for that is the outcome intended), is an offense against decency and justice which is only equaled by that of the Federal official who humiliates the Government he represents by consenting to a compact which makes it the protector and champion of conspicuous offenders against the laws. When the execution of the penalties of the law in South Carolina or elsewhere is subordinated to the exigencies of partisanship, and the command of the party caucus is deliberately substituted for the order and authority of the courts, thus paralyzing the arm of society for its own defense, we may well begin to inquire whether our civilization is not, after all, deficient in the essential quality of reverence for law.

A MEMPHIS paper proposes a bargain in which all the profit would be on its side. It wants to trade off a few thousand Southern politicians for a few thousand New England cotton-spinners.

EX GOVERNOR SEYMOUR has formally declined to allow his name to be used as a candidate for the office of Governor of this State, for the reason that "his impaired health makes it impossible for him to perform the duties of any official position or to continue to take an active part in public affairs." Having thus decisively expressed his determination in the matter, it is to be hoped that the politicians who are seeking, for their own purposes, to drag the ex-Governor from his well-earned retirement, will show him a proper and deserved respect by abstaining from further importunity.

THERE seems to be a good deal of doubt whether General Grant would accept a nomination for the Presidency, should it be tendered him. Those who are nearest to him say that he is strongly averse to again shouldering the responsibilities of public life. It is certain that he has nothing to gain by re-entering the political field, and he will establish a fresh claim upon the popular respect by refusing to do so. There is, no doubt, a strong and influential element of the Republican Party which desires his nomination in 1880, but there is also a numerous body of thoughtful Republicans who would prefer the nomination of any other representative man of the party.

A NEW telegraph company, with a capital of ten millions of dollars, has just been incorporated under the name of the Union Telegraph Company, which will, it is said, extend its lines from the Atlantic to the Pacific coast. The nucleus of the enterprise is the Central Union Company, which has about fifty miles in actual operation. Mr. Jay Gould has subscribed for one-half of the stock, the remainder being taken by two other capitalists. The railroad companies owning lines of telegraph are expected to co-operate with the new company. There is plenty of room for an enterprise devoted to cheap telegraphy, but whether the proposed company will meet the want admits, perhaps, of doubt.

THE United States Supreme Court has just rendered a decision which practically annuls the Jurors' Test Oath Act. The point of the decision is that a juror is no more obliged than a witness to disclose on oath his guilt of any crime, or of any act which would render him infamous in order to test his qualifications as a juror. Justice Field, in a separate concurring opinion, went still further, declaring: "I do not think that the Act of Congress, which, by requiring a test oath as to past conduct, excludes a great majority of the citizens of half the country from the jury box, is valid. In my judgment, the Act is not only oppressive and odious and repugnant to the spirit of our institutions, but is clearly unconstitutional and void."

THE President has taken a step in the right direction in his proclamation warning intending settlers against the appropriation of lands in the Indian Territory. This territory is only subject to occupation by Indian tribes, officers of the Indian Department, military posts, and such persons as may be privileged to reside and trade therein under the intercourse laws of the United States; and a failure to interpose the national authority for the protection of the treaty rights of the Indians would have justly exposed the Government to severe censure. We have only too often winked at flagrant invasions of these rights in the past, and it was high time that something should be done to vindicate our good faith in the eyes of the tribes we are seeking to civilize.

THE "fiat money" doctrine has invaded the Dominion Parliament, where a discussion of the national currency system is now in progress. In the House of Commons, the other day, a speaker insisted strongly upon the issue of paper money as the best means of promoting the public prosperity, adding that a national currency, based upon the labor and public works of the Dominion, had a sounder basis than the promises to pay now in circulation, only twenty-five per cent. of which could actually be redeemed by the banks of the Dominion. These views are strongly combatted by various members, who point to the action of the United States in resuming specie payments as an evidence that the experiment of an irredeemable paper currency has proved unsatisfactory.

THE generosity of the last Congress in the matter of pensions appears to have stimulated the greed of all sorts of claimants. Already, at the present session, twenty-eight Bills relating to bounties and pensions have been introduced in the House, and the end, probably, is not yet. Of the twenty-eight Bills, ten grant pensions to soldiers of the Seminole, Black Hawk, Mexican and other wars. The familiar measure for the equalization of bounties is represented by six different Bills, and there are ten for the amendment of that section of the Revised Statutes which prohibits payments to pensioners who have been disloyal. It is about time that the sentiment of the country in denunciation of these schemes for depleting the Treasury should find forcible and decisive expression.

THE demand for the ten-dollar funding certificates grows in urgency. Last week the sales in this city reached $110,000 a day, the supply on hand being on one or two occasions exhausted by midday. With a view of preventing the absorption of the certificates for speculative purposes, Secretary Sherman has issued a circular stating that where the law is evaded, or where one person claims more than $100 for himself or others, the certificates will be refused. The authority of the designated depositary who fails to enforce this rule will be withdrawn, and commissions for sales will not be allowed him. As an illustration of the confidence of the masses in these securities, it may be mentioned that a large city clothing firm last week requested Postmaster James to send an agent to their factory to take subscriptions among their work-people, said to be 1,200 in number, who wished to invest in the certificates.

THERE is a marked increase in immigration. One steamer, which arrived last week, brought 759 immigrants—the largest number, with a single exception, arriving by any one steamer since 1869. This and other large arrivals are only drops of the coming flood. The emigrant societies having branches in Norway and Sweden report that unusual preparations are making for a Scandinavian movement in this direction. There is also expected a large influx of immigrants from Ireland and England, where thousands of mill-operatives declare that, being unable to make a living, they must emigrate. Emigration companies are forming also in Southern Germany, where much distress prevails. Thousands of Russian Mennonites are also expected to emigrate to the United States during the year, owing to the fact that a Russian edict has been promulgated which compels them to do military duty after 1880. Probably our population from foreign sources will be increased before the close of the year by at least 100,000.

THERE is one fact in connection with the negro invasion of Kansas which has not, we fear, received the attention it deserves. It is said that the bedding and furniture of many of the emigrants from Mississippi came originally from the yellow fever hospitals at Vicksburg and elsewhere, and it is by no means impossible that contagion may in this way be spread to a region never before visited by the scourge. At all events, the matter is of sufficient importance to provoke thorough investigation, and the medical authorities of the States to which the negroes are flying will be without excuse if they shall fail to set on foot at once the necessary inquiries. The exodus continues unabated; thousands of blacks are said to be preparing to follow the thousands who have gone before; and destitute as many of them are—herding together in droves without sufficient food and shelter—it is the dictate of humanity that every possible sanitary precaution should be adopted for their protection and that of the communities of which they become a part.

SECRETARY SHERMAN proposes to investigate the alleged abuses connected with the fur-seal fisheries in Alaska, where it is said that the Government has for years been defrauded by the American Trading and Fur Seal Company out of immense sums of revenue. Charges are freely made that the companies have been killing thousands of seals in excess of the limitations of their contract, that the resident and special agents representing the Government have failed to report the true condition of affairs, and that, in general, there is the utmost need of a thorough inquiry as to the fisheries and their value. This inquiry Secretary Sherman will now make, sending out a revenue-cutter with necessary officers for the purpose. If, as is alleged, the Government has been defrauded out of any portion of the revenues it is entitled to, and the contract has in any way been violated, it is proposed not only to annul the contract of the present company, but to prosecute them for whatever losses have been sustained.

NEWS OF THE WEEK.

Domestic.

THE wife and daughter of General Sherman sailed for Europe May 1st.

THE Union Telegraph Company has been incorporated, with a capital of $10,000,000.

THE public debt statement for April shows an increase of $19,932 during that month.

THERE was a still further decline in prices at the monthly coal sales in this city, April 30th.

THE Lower House of the Pennsylvania Legislature has resolved to extend an official welcome to General Grant on his return.

SEVERAL thousand 'longshoremen engaged on the piers along the North River, in New York City, went on a strike May 1st.

REV. O. B. FROTHINGHAM closed a ministry of twenty years in New York on April 27th, and will take a prolonged rest in Europe.

CHARLES F. FREEMAN, in a freak of religious frenzy, murdered his daughter Edith, five years old, at Pocasset, Mass., on May 1st.

NEW charges have been preferred against Police Captain Williams, and the New York Police Commissioners have ordered another trial.

IN the Talmage trial before the Presbytery of Brooklyn, Friday and Saturday last were occupied by the summing-up of the counsel on each side.

IN consequence of the speculation by brokers in the $10 funding certificates, Secretary Sherman has issued a second circular concerning their disposal.

CYRUS W. FIELD gave a dinner on May 1st in celebration of the consolidation of the New York and Metropolitan Elevated Railroads under one management.

GOVERNOR ROBINSON sent eight vetoes to the Legislature on April 28th and one on the 29th. On the 30th the Procession Bill was passed by the Assembly over the veto.

A SUGGESTION that the World's Fair building should be located at Port Morris, N. Y., has been considered by the Executive Committee, who, however, have reached no decision.

THE Kentucky Democratic State Convention has nominated Dr. Luther P. Blackburn for Governor, James E. Cantrell for Lieutenant-Governor, and P. W. Harden for Attorney-General.

IN the House of Representatives, May 1st, the message vetoing the Army Bill was taken up, and without debate the House refused, 120 to 110, to pass the Bill—a two-thirds vote being required.

SEVEN men, imprisoned by the caving-in of a coal-mine near Wilkesbarre, Penn., were rescued April 28th, five days after the accident. They were all in good condition, having subsisted on a mule.

INTENSE excitement prevails throughout Georgia in consequence of the trial of Cox for the murder of Alston, at Atlanta. The prosecution have closed and the defense opened. There is a vast array of eminent lawyers engaged in the case.

THE President's proclamation, ordering settlers to keep out of the Indian Territory, is said to be disregarded by large numbers of people, and 1,200 troops have been placed at the disposal of the Interior Department to protect the lands.

TWO-THIRDS of Tennessee's bondholders having accepted the compromise of fifty cents on the dollar and four per cent. interest, Governor Marks has issued a proclamation calling an election by the people, August 7th, to ratify the proposition.

THE convention of American Medical Colleges met in Atlanta, Ga., May 2d, and elected Dr. Gross, of Philadelphia, President, and Dr. Loring, of Columbus, O., Secretary. A resolution fixing three courses of lectures for three separate years was passed.

A JOINT caucus committee of the Democrats in Washington has resolved to report in favor of amending the sixth section of the Army Bill, so as to permit the civil authorities to preserve the peace at the polls, and of passing the section as a separate Bill.

THE Mexican Government has appointed Colonel David V. Whiting, of Chicago, as Commissioner to the United States for the Industrial Exposition to be held in the City of Mexico next January. Colonel Whiting has also been appointed Consul at Chicago, and will furnish intending exhibitors with copies of the regulations and full particulars regarding each position.

THE English promoters of the project to oppose the leasing of the Atlantic and Great Western Railway by the Erie Railway Company announce that so many adhesions have been received that Sir Henry Tyler, Sir Charles Young and Captain Douglas Galton have already consented to act on the committee to carry out the scheme, relying on the requisite majority being secured.

Foreign.

THE latest communication from Burmah to the Indian Government is said to be very conciliatory in tone.

Mr. P. LORILLARD'S horse Papoose won the race for the First Spring Two year old Stakes at Newmarket, England, on May 1st.

AT the suit of Mr. McHenry, a temporary injunction has been issued in England against the proposed lease of the Atlantic and Great Western to the Erie.

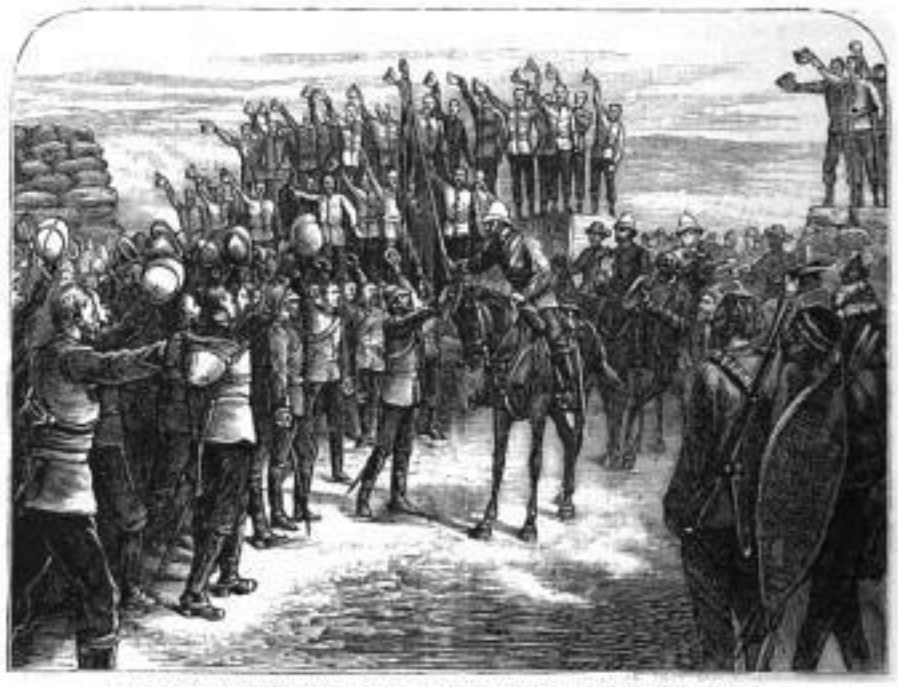
IT is stated that Mr. Stanley will act as guide and interpreter to the Belgian exploring expedition in Africa, under M. Dutalis. The plan of operations is unknown.

THE champion sculling race between Hanlan and Hawdon at Newcastle-on-Tyne, England, was won by the former on May 5th, by one length, amidst intense excitement.

THE Chilian fleet has retired from the Peruvian coast to protect Valparaiso and other Chilian ports, now threatened by the Peruvian fleet. The Peruvian Government has called the nation to arms.

AN earthquake took place in Mianeh (Persia) on the 22d of March. Twenty-one villages were totally destroyed. Nine hundred and twenty two persons, 2,660 sheep, 1,125 oxen, 124 horses and 53 camels were killed.

CHARIBERT won the Two Thousand Guineas Stakes at Newmarket, England, on April 30th, and Wheel of Fortune, the One Thousand Guineas Stakes at the same place, on May 1st. Both horses were ridden by Fred Archer.



A DISPATCH from Victoria, British Columbia, says the secession difficulty has been tided over by Parliament, which was prorogued immediately upon satisfactory assurances of the intention to begin the railway this year having been received from Ottawa.

A CONGREGATION IN THE METHODIST CHURCH.—MINERS SINGING THE OLD-TIME HYMNS.

CONTRASTS OF LIFE IN LEADVILLE, COLORADO.

ALTHOUGH Leadville is a very young town, it has already in full operation two evidences of modern civilization, generally supposed to be antagonistic in their influence—the gambling-hell and the church. The former might almost be called a distinct feature of mining centres, for drinking and gaming are the usually unvariable occupations of these men when not engaged in the mines. The north side of Chestnut Street for a block has little else but drinking-saloons, in which every foot of space not occupied by the bar is devoted to some game and its crowd of votaries. Some contain as many as four faro-tables alone, with short faro, high-ball poker, roulette, vingt-et-un, and an indefinite variety of other games thrown in to fill up corners. Other saloons give precedence to keno, on account of the space required for it, but faro, poker, and other games usually fill up the crevices, and no space that can be put to so profitable a use is long left vacant. These places are filled night and day by eager players and drinkers, and double-shifts of dealers and bar-keepers are required to meet the ceaseless demand. State Street, or two blocks of it, has the monopoly of the dance-houses, where the privilege of dancing with a worn and haggard creature is accorded for half a dollar. In addition to these, several variety theatres in the same locality furnish the intellectual entertainment required by those who are neither gamblers nor dancers, and these are open almost continuously, with long scenes, in which the lowered curtain is the chief actor, until a howl from the audience indicates that its patience has been exhausted. These long lapses are supposed to give the opportunity to the waiter-girls to supply the occupants of the box-gallery with drinks.

The gala night is Saturday night, when the tunnels, shafts, and levels of Fryer Hill, Carbonate Hill, and the other mining localities, send down their throng of miners and "timber men," with their week's wages in their pockets. Saloons, gambling-hells, variety-theatres, and dance-houses overflow, and the sidewalks are all too narrow for the crowds that stream along.

In strong contrast with these scenes are others, participated in by many of the same persons. On Sundays the churches are crowded. The Methodists, Episcopalians and Roman Catholics have buildings of their own, and a Baptist congregation hold services in the school-house during the building of their church. In the Baptist and Methodist churches, where congregational singing is practiced, the preponderance of the basso element in the music over the soprano is significant. Some philanthropic ladies are engaged in soliciting subscriptions for a hospital, which is to be under their sole charge and direction, and several thousand dollars have been collected. The Roman Catholic Sisters of Charity have already a large building well advanced towards completion, which is to be devoted mainly to the sick.

Leadville is like all our large cities in one respect—more people flock thither than can possibly find employment. Values of all kinds of goods are exorbitantly high. Men go there with money, get swamped in a few weeks, and either lead a precarious life until they can leave the place or sink down the grade of humanity until they become—to use a vulgar but most expressive definition—"common bummers." As a rule, wages are low, boarding

INTERIOR OF A DANCE-HOUSE ON STATE STREET.

COLORADO.—A NEW ELDORADO—THE WONDERFUL MINING TOWN OF LEADVILLE.—FROM SKETCHES BY OUR SPECIAL ARTIST.

Digitized by Google

and other necessities very high. Buildings are being constructed rapidly, and, although the population is now estimated at 11,000, a proof of the steady rush of people is found in the fact that not a half-dozen houses there can boast the possession of a spare-room.

A LIFE GRIP.

CHIEF OF POLICE MERWIN was scratching away with his pen as if his life depended on the rapidity of its advance. He was evidently in bad humor, for every time he reached a period he emitted a sound that was a sort of a compromise between a groan and a growl. One of the patrolmen lounging in the ante-room expressed the condition of affairs when he remarked, "The old man's in his tantrums this morning, and somebody's going to catch fits." The fact was, everything had gone wrong. The men were getting slovenly in dress and inattentive to duty, and the newspapers had taken their condition in hand and were making sharp criticisms. The chief was both writing and fighting mad. It was while in this mood that some one touched his arm and at the same time put upon his desk a visiting-card. The chief looked up with a frown. A short, thick-set gentleman, with long brown side-whiskers dashed with gray, and with his vest buttoned nearly to the white necktie under the chin, regarded him with a complacency that, in the chief's mood, was exasperating.

"I really ask your pardon," began the gentleman, with a sort of apologetic gesture of his hands. "I see you are very busy, but I was told outside to come and see you, and I was told inside," with a motion of his head towards the ante-room, "that I must not disturb you. I'm sorry to intrude, but really I could not wait."

The chief's red face grew a shade redder, and his heavy eyebrows had a more ominous droop over his puffy eyes, as, with a light flip of his finger, he turned the card so as to read the name, written in a bold hand, of

REV. BARTLEY HEATH.

"What is it you want, sir?" he asked, finally, after his eyes had traveled several times from the card to the visitor and back again. "My time is very much occupied."

The minister's face grew flushed at his bluff reception, and he hesitated in his speech.

"I will try to be considerate and—that is to say, brief. Old Mr. Winship of our town has been dead three months. His death was the the result of——"

"What's the name of the town, Mr. Heath?" asked Merwin, abruptly.

"San Diego."

"Ah! And was this Winship murdered?" asked the chief.

"Oh, dear, no! His death was natural, perfectly natural. I preached his funeral sermon."

"Body stolen?"

"No."

"Then why don't you tell me what you want? I haven't the patience or time to pump out your needs."

He whirled round to his desk, took his pen from behind his ear, and prepared to resume his writing.

The Rev. Heath was white with passion.

"I never heard of such brutal insolence," burst from his lips.

"If you've any business to present, present it; if not, I'm too busy to hear you talk," said Merwin, his pen beginning to race over the paper.

"Here is my business," and the divine once more spoke calmly. "Winship left a daughter Mary, and I want to find her son. Is that plain enough?"

"Plain? No!" dashing down his pen. "Who did the woman marry? What's her son's name?"

"The woman married a Joslyn, and her son's name is Samuel. Property is left the son, the mother being dead, and I'm executor of the estate."

Merwin drew towards him a city directory, and began to run over the leaves.

"I've looked there," suggested the visitor.

"Name's not there," as if to himself, and giving no attention to the minister's remark. Then he opened a thick index book at J, "Jopper, Jockey, Jones, Jonge, Josephs. Ah! Here it is! Joslyn, messenger. Don't believe he's the person you want. Officer Tuttle"—to a man lounging near the door in citizen's dress—"bring in Colonel Joslyn. This gentleman wants to interview him."

"Colonel Joslyn!" exclaimed the minister. "An officer in the army?"

"Commissioned by the people," was the reply. "How old ought your man to be, sir?"

"Thirty-six."

"This person looks as if he were fifty. There he comes!" as Officer Tuttle entered the outer room with a man whose clear, rosy complexion was in startling contrast to his gray hair and shambling gait. "Step into that little room there, if you please, where you will be undisturbed. Colonel, this gentleman wants to talk with you."

Alone in the room, and with the door closed behind them, the Rev. Bartley Heath held out both his hands, saying:

"Samuel Joslyn, I'm glad I've found you. Let me congratulate you!"

For a minute the "colonel" hesitated. His hands were behind his back and no movement was made to indicate that he would accept the proffered grasp of the minister. The flush on his face deepened in color and the lids drooped over his eyes. The attitude was pitiful.

"What!" cried the doctor, heartily, "will you not shake hands with me, an old friend of your mother's—that is, if you are the man I want?"

Joslyn opened his honest eyes and looked squarely in the face of the other.

"Ye talk good, an' ye look good," he said, deliberately, "an' ye'll not be shocked, I hope, at my misfortune," and with that he put out his arms as if to clasp hands with the minister. Mr. Heath stepped back, startled, for a second, beyond expression.

The fingers on both hands of the colonel were missing.

"Never mind, we'll shake, anyhow," cried Mr. Heath, recovering himself, grasping the colonel's wrists, and giving them a hearty swing. "Here, sit down! I've all day for my work. Smoke, colonel? Yes? These are not remarkable cigars, but they are good enough for a minister who is so weak as to use the weed. Let me light it?"

"So ye're a minister, eh?" asked Joslyn. "I'm glad of that. Didn't know but ye were a detective. The chief gets 'em after me once in a while, just for deviltry, I s'pose. Queer man, the chief! Doesn't like me because of those things," holding up his stumps. "Yes, the fingers are all gone."

"It is terrible. How did you lose 'em, Mr. Joslyn? Were they——"

"Well, they was an' they was not. To begin——" here he stopped, leaned back for a meditative smoke, closing his eyes and giving himself up to the ecstasy of his feast.

"Were they eaten off, colonel?" inquired Mr. Heath, after remaining silent as long as his dignity would permit.

"Was what eaten off?"

"The fingers, colonel?"

"No, no! They wasn't eaten off, or chopped off, or buzz-sawed off, or blown off in the army with me at the head of the column a-holdin' onto the colors. I never chopped wood, tended saw or made a tool of myself by goin' inter the army to give politicians a chance to ride inter office on my shoulders—not a bit of it. No, sir! Them fingers—are ye listening?—them fingers dropped off." He closed his eyes and began to puff again energetically at his cigar.

Rev. Bartley Heath regarded the man with a quizzical look. Here was strange calmness and indifference. Perhaps the Joslyn before him was not, after all, the Joslyn of whom he was in search. He certainly looked twenty years older than the heir he wanted. He had expected to find his man in rags, weighed down with misery, and illiterate, but really this creature exceeded his expectations. Still, he thought that he would wait and hear what the colonel had to say before he disclosed his purpose. He believed that he ran no risk in keeping silent. Besides this, he was as curious as a woman to find out how Joslyn was so mutilated.

"How old do ye think I am?" suddenly inquired the colonel, straightening up in his chair and neatly blowing the ashes from his cigar.

"Fifty."

"Thirty-six. The color of my hair was lost with my fingers. By-the-way, ye sent for me. Why?"

"I'd rather hear your story first, colonel. Mine depends on yours," was Mr. Heath's answer.

"Yours depends on mine? But, man alive, can ye tell me about that devil, Tom Merwin? Do ye know where he is?" shouted Joslyn in a sudden frenzy, springing to his feet, his eyes red hot with passion and the veins on his forehead swollen out like cords. "Let me see him once, and I'll tear him to pieces—with my teeth!" he said.

"I know of no Merwin excepting the man out there, the chief," the minister replied.

"He's Tom's brother, and just as bad. But it's Tom I want. It's him as brought these ter me," shaking his maimed hands towards heaven. "My story begins with Tom Merwin. It will end with him also, I hope."

He had been pacing up and down the room in a state of great excitement, smoking furiously as he walked. Suddenly he seated himself, panting like one who has finished a race.

"I don't like ter talk about it, this business," indicating his arms by a nod of his head, "but I'll tell ye the story. Ten years ago this Tom Merwin an' I were clerks in a large wholesale drygood house. Tom did not like me, for I cut him out when he was a courtin', and married the girl myself, an' she's always been thankful ter me for it. Then I caught the feller a-stealin' silks. I thought I was a-doin' the proprietors a service in tellin' them of it, but Merwin made them believe I was his partner, an' both of us was discharged. He laughed at me when this was done, saying, 'Joslyn, this world is too small for both of us, an' I'll crowd you out of it. Remember that!' He'd done me about all the harm I thought he could do, an' so I paid little heed to his talk.

"I could not get work after that—people seemed afraid of me—an' so I came West. I'd always had a taste for painting, an' when my savings got low, I went into the employ of a house-and-sign painter. This was the next Winter after the fire of '71 in Chicago, an' there was plenty of work in that city."

"Terribly cold Winter that! I was there for a fortnight," remarked Mr. Heath.

"S that so? Perhaps you'll remember my story 'fore I finish tellin' it; a part of it was in the papers. Remember that great building in the 'burnt district' that had Erie Railroad an' so forth on one side of it? No? Well, I painted the better part of that sign. There's scarcely a day or a night, now, that its great big letters don't rise up before my eyes like great pillars. It was a five-story brick, an' my partner an' I had got half-way down the side. One morning he didn't appear at the shop. He was sick. The work must go on, the boss said. The other men in the shop were all busy. There was a great hulking fellow loafing around the stove, a chap all whiskers an' ragged clothes, who said he could paint, an' he just showed 'em how he did it. He did so well they sent him along with me.

"The work was bein' done on a hanging scaffold, swingin' from the roof. We was workin' about forty feet below the coping. Forty feet below us was a cellar filled with ruins, such as burned brick, stones an' bits of iron. It was a mighty resky job, an' light-headed men wasn't wanted onto the platform. I said so to the new man.

"'Ye mind yer end an' I'll mind mine,' he growled. 'I hain't been a sailor for nothin'.'

"Of course, I said nothin' more. I knew what my duty was, an' was prepared ter do it. He didn't speak ter me a dozen times all the forenoon. I liked that, for I don't talk much at my best. Yet in the afternoon I caught him a-lookin' at me. Sometimes he stopped his work ter do it, other times he made pretense, I watchin' him out of the corner of my eye. It made me nervous after a little, though I couldn't say why, except one don't like ter be watched on the sly. Then, too, he got ter fumblin' with the ropes when he thought I wasn't lookin', movin' 'em quietly with his hands, an' sometimes with his foot. That I didn't like, an' I said so.

"'Don't be scared,' he said. 'I'm only a movin' 'em so I won't stumble overboard. By-the-way,' he cried, 'the boss called you Joslyn. Is that yer name?'

"'Yes.'

"'Ever live in New York?'

"'No.'

"'Boston?'

"'Yes,' I answered. 'Why?'

"'Look like it, talk like it, act like it, that's all.' Then he stopped talkin'.

"'Long about four o'clock the wind changed, an' the weather became colder and colder. It's only Chicago people who know what a 'blizzard' is an' how the mercury'll drop thirty degrees in thirty minutes. 'Twasn't long before it got so cold I couldn't handle my brush. I looked at my partner. He was a-puttin' the paint on in great dabs, half ice.

"'Stop that!' I said. 'Yer a-wastin' the stuff. Besides, we must get down or we'll freeze to death.'

"'Joslyn,' he said, pitchin' his brush into the pot, 'can yer climb?'

"'No,' I answered.

"'Joslyn,' he said, again, 'can yer say any prayers?'

"'Yes, of course, I can.'

"'Then, say 'em, Samuel Joslyn, for I'm Tom Merwin, an' have got ye where yer can't get away,' and he pulled off his shoes and stuck them inter his coat-pockets.

"I didn't know what to say or do, sir, it was all so sudden. It looked as though he was a-goin' to try an' pitch me off the scaffold; so I stepped back an' put one arm around the ropes at my end. He burst into a hard, wicked laugh when he saw this.

"'Don't be afraid, Sam: I'll not l—y a hand on ye. But ye married the girl I loved; ye got me turned out of a place, an' I'm goin' to get even with ye, here and now.'

"With that he turned and began to climb up the ropes at his end of the platform, hand-over-hand, clingin' with his knees an' mountin' as only a sailor can mount a rope. When I saw this freak I thought him crazy, sure; an' yet I couldn't help laughin' to see my old enemy goin' skyward for revenge. He heard me, an' stopped for a second.

"'Laugh!' he yelled. 'Laugh till ye split! Ye'll cry soon enough. Ye haven't seen a man along here since noon; ye'll not see another after I'm gone.'

"Then he continued to pull an' shin himself up the ropes till he reached the scantlin' to which our tackle was rigged. He sat astride of this, pulled a piece of rope from his pocket, an' in no time had tied the tackle together. Then he ran to the other block, an' before I scarcely realized what the fellow was a goin' ter do, an' had a chance to act, he had bound the other fall in the same way—an' disappeared.

"His purpose was clear enough to me now. He had left me there ter freeze ter death. The weather must have been ten below zero, an' the wind was a-blowin' a hurricane. The buildin' was aside from the usual line of foot-travel. We hadn't seen a person on the street since noon. The clouds made it dusk already. I saw the trouble before me an' tried to loosen the ropes, but not a hair's breadth would they stir. Then I tried ter climb, and went up perhaps fifteen feet, only ter grow dizzy an' ter feel that my stiffenin' fingers wouldn't hold ter the rope, an' then I came down with a rush that took a big piece of skin out of the inside of each of my hands. The situation began ter look serious then, I tell you, an' it wasn't over-pleasant ter see Merwin on the street just then, a clappin' his hands, an' ter hear him shout:

"'Sam Joslyn, you are as good as dead, an' better dead'n alive.' Then he walked away, turnin' every few feet ter clap his hands or wave his hat, until the darkness shut him out from my sight.

"What ter do I didn't know. It was death ter stand still, an' there certainly wasn't much room for exercise on a three by ten platform, swingin' forty feet from the ground, in a dark evenin', with the weather so cold as ter make the streets crack like pistols, an' not a soul within the sound of my voice. Whatever was ter be done had ter be done at once. I shouted until I couldn't make a noise above a whisper, an' I was as much lost as if I was in a great wilderness. Then I thought for the first time—for the matter hadn't really seemed so serious at first—of my wife an' little Rob a-waitin' for me at home, an' a-wonderin' why papa didn't come home, it being then long past my time for bein' there. Why, sir, a-standin' as I was, away up in the air, I could see them two around the table a-waitin an' a-wonderin' an' a-listenin'. Would I never get there except when I was a-carried in the next day—dead? That's what I wondered, an' from wonderin' began ter dream, an' ter wake up a-droopin' or a-fallin'. I knew what that sleep meant, an' roused myself ter walk back and forth. Then I caught my foot in the coil of loose rope, an' nearly went overboard. But that there angle gave me an idea.

"I could scarcely get out my knife, my hands were so numb; but I did it, an' opened a blade with my teeth. Reachin' high up I cut the loose rope on each fall, tied the ends together an' dropped the line over, after lashin' it firmly ter the stagin'. I judged it would come within a few feet, perhaps five, of the ground. Then I grabbed it an' slid over an' down, down, down, until my legs dangled below the end. I didn't dare ter drop, an' well it was I didn't, for a bit of moonlight through a cloud showed I was hangin' at least fifteen feet above a pile of brick in the cellar. I tried ter go back, but slipped down a few inches lower, for my hands were too stiff to keep hold of the line once they let go. I got a death clutch at last, though, an' prayed as I never prayed before; the wind all the while a-dashin' my body backwards and forwards, now against the buildin' an' then a-swingin' me out into the air as if I was no more than a effigy. I prayed until I forgot where I was, an' all that was dear ter me, an' then, resigned ter death, tried ter let go my hold. But I couldn't. My fingers were frozen in their grip ter that rope."

At this point in his narration Joslyn seemed overcome by his feelings, and sat silent and with his eyes closed. At length he continued:

"There isn't much more ter tell. P'r'aps I hung there ten minutes, per'aps less, in a dozin' sort of a condition, when I heard a woman sniek again an' again, an' I had just life enough left ter turn my head an' see two men with lanterns, an' a woman between 'em.

"'Are you alive, husband?' I heard her cry. But I couldn't make a noise, although I tried my hardest, an' then I went dozin' off again, not ter come back ter my natural self until a week afterwards, when I woke up in bed with my fingers gone—cut off by the doctors—an' my hair changed from black ter what it is.

"No; it wasn't so very strange, my rescue. When a half-hour after my usual time—and I was reg'lar as clock-work—for gettin' home had passed, my wife started for the shop, found the boss surprised that I hadn't got back with my pots and brushes, got him ter get help, an' started for the buildin'. The only way they could get at me was by goin' ter the top of the buildin', one man slidin' down ter the stagin', leaving another man ter cut the fastenin's made by Merwin. Then they lowered the platform. My feet was frozen stiff, but they managed ter save them, thank the Lord! Since then I've earned a livin' as a messenger, runnin' errands, an' that sort o' thing. I earn a little, an' my wife—one o' the noblest women, sir, that ever lived—works out the rest with her needle. There, now, is my story, exceptin' that Chief Merwin doesn't like me, for family reasons. So much bein' said of myself, sir, I ask what ye want of me, for, ye see, I may be losin' a job, an' every cent counts with me."

"My business with you is to ask a few questions. Is your mother alive?"

"No, sir."

"Was her name Mary?"

"No, it was Helen—Helen Trumbull."

"Had she a brother or relative named Winship, who went to California in '49?'

"I never heard of such a man."

"Do you know of any other Joslyn than yourself?'

"I don't."

"Colonel," said Mr. Heath, "it is one of the saddest things I ever said, knowing your story, to tell you that you're not the man I'm looking for. The Joslyn I want had an uncle who died awhile ago at San Diego, and left a handsome estate of which I am the executor. Now, if you were only the Sam Joslyn I'm after, you would be entitled to about $10,000. You ought to have it anyhow, colonel!"

"Oh, no, Mr. Heath. For my wife's sake I might be tempted ter wish myself rich, she is such a good, unselfish, loving an' lovable woman. If I had it, alone, I would be plundered, for fate's agin me. I must go on fightin' out my life. I'm not the man, Mr. Heath, not the man. There comes the chief. Let us go or he will drive us out," and they both moved towards the door, the minister not even giving a look at the surly police official.

On the steps, the colonel said:

"One favor I'll ask, an' that is—if ye ever come across a Tom Merwin, let me know at once."

"That I will do, colonel; but why?"

The man studied for a minute his mutilated hands, and then with a scowl, and a glare of hate in his eyes, as he faced the minister, he replied, in a deep, firm voice:

"Because, sir, I'm a-lookin', a-huntin' for that man. Good-by, sir!"

"PAROLE'S" HOME.

MR. PIERRE LORILLARD'S MODEL STOCK FARM.

(Continued from front page.)

The corn-crib is about three hundred and fifty feet long, and is well stocked with material. The tool-house is crowded with the various instruments and tools used upon such a large estate, and is as complete as the rest of the buildings. The enormous hay-barn, capable of holding three hundred and fifty tons of hay is surmounted by a glass observatory.

In the brood-mares' stable, a square building, there are comfortable stalls for one hundred horses, under charge of Mr. Reilly. He has attained such familiarity with the mares and their colts that, wishing to gather them from the pasture for any purpose, he simply walks up the knoll and whistles, when the entire number run, jump and gallop from all directions towards him.

The breeding-pens, as they are called, are attached to the brood-mares' stable, and are under the personal supervision of Reilly, the stud-groom, whose house is connected with this department. The breeding-pens are comfortable, square horse-stalls, communicating with each other by a window and door. In the centre of this row of stalls is a small room, containing a stove, bedstead, etc. When a mare is about to foal, she is placed in one of the boxes nearest to the "heating-room," as the

Digitized by Google

centre room is called, a large fire is maintained, the window of her stall is opened, and the hot air rushing in furnishes her with a warm temperature, which can be regulated at will. After a few days in this box, she is shifted into the adjoining room, having a cooler temperature, by reason of its being farther from the heating-room, and in this manner is shifted from room to room, until, reaching the last one, she and her foal are turned into the paddock. The stallions are kept in separate stalls of this building, and the noble animals look the picture of everything beautiful in the shape of horseflesh.

In addition to these buildings there are shown in our illustrations the employés' dwellings, the yearling and half-breed stables, the blacksmith-shop, the private track for racing, having a three-quarter mile course, and the racing stable, a circular building capable of housing fifty horses. It is here that the horses in training are kept, and here also are the quarters of the jockeys, their sleeping and saddle-rooms, and a well-appointed school-room. Fifty-one miles of under-drainage and nine miles of open ditch are necessary to carry off the refuse. Well-kept roads, bordered by good fences painted white, lead to the different departments. Studding the green paddock are dozens of octagonal boxes containing stalls for eight horses, and among these buildings is one apart from the rest, called the hospital. If a horse is very sick it is immediately removed to the hospital, and, secluded from his companions, is tended in the most careful manner.

The days from the 22d to the 26th of April were intensely exciting ones on the farm. Every employé shared in the hope that "Parole" would come out victor in the great races in England. When intelligence of his success in the Newmarket, the City and Suburban Handicap and the great Metropolitan Stakes contests was received after each event, the news was given the jockeys, grooms and workmen, who cheered the favorite most enthusiastically.

This proceeding was repeated on May 1st, when a telegram was received to the effect that "Parole's" sister "Papoose" had won the race for the First Spring Two-year Old Stakes at the Newmarket first Spring meeting.

Our engraving of "Parole" is taken from a painting which hangs in the dining-room of the mansion.

The Russian Reign of Terror.

A ST. PETERSBURG correspondent writes under date of April 28th: "The police are openly arresting people by batches at all hours of the day, whereas apprehensions were hitherto made at night. On the slightest suspicion against any person, his whole family are arrested, and domiciliary visits are paid to all their acquaintances, these leading to further apprehensions on the most frivolous grounds. Eighty-three furnished-lodging keepers are in prison for not reporting within twenty-four hours the latest arrivals.

"M. Jackevieff, a prominent official living in the Winter Palace, and his son, an officer in the Guards, are among the persons in custody. Baron Bistrom, Deputy Commandant of the St. Petersburg garrison, and General Gildenstube, Commandant of the Moscow garrison, have been superseded for insufficient enthusiasm toward the new order of things. There are few predestrians or carriages in the streets, but an endless line of porters are seated on stools at every door with stout sticks. Covered prison-vans frequently pass, with a police officer mounted beside the driver, and General Gourko drives round in an open dhrosky, escorted by Cossacks, cracking their whips. The inhabitants are not accomplices of the Nihilists, but apathetic spectators."

Intemperance in Great Britain.

THE report of the Select Committee of the House of Lords, appointed for the purpose of inquiring into the prevalence of habits of intemperance in England, which has just been issued in the form of a document covering nearly fifty pages, will prove a valuable contribution to the literature of the total abstinence party in that country. The evidence taken before the committee proves, beyond the shadow of a doubt, that, notwithstanding the hard times and consequent scarcity of the circulating medium, the vice of drunkenness is on the increase in the old country. In 1860 the amount expended on intoxicating liquors in the United Kingdom averaged $14.63 for every man, woman and child, while in 1876 these figures had increased to $22 25; this, too, in the face of the fact that the temperance agitation carried on between 1868 and 1876 was the most active ever known in the history of the country. Social efforts to correct the evil having failed, the committee has arrived at the conclusion that the existing legislation affecting the drink traffic must be made more stringent. In this spirit they recommend the enforcement of what is known as the Gothenburg system, under which the municipality transfers the traffic to a public company, which undertakes not to derive any profit from the business, but to pay into the city treasury the whole profits beyond the ordinary rate of interest on the paid-up capital. This scheme is now in operation in fifty towns in Sweden, the profits in one of which average two hundred thousand dollars annually. A minority of the committee, however, favor doing away with the company feature and placing the control of the traffic directly in the hands of the City Council. Both of these ideas are worth experimenting with, but it is questionable whether the Conservative party is prepared to father any measure which will lose them the support of the beer-selling fraternity. The Church and the liquor-dealers are the two strong columns of the Tory army.

Progress of Meteorological Science.

THE permanent committee of the Vienna Meteorological Congress has recommended that a proposed second congress shall adopt throughout the world a plan for exchanges of data for simultaneous weather maps, or other purposes similar to the one first organized for the United States by the Chief Signal Officer in 1873, and which has been continuously pursued by the Signal Service to this day. The features of this exchange as set on foot by the United States are as follows: (1.) The Signal Office of the United States asks all countries to make and record daily on land and sea one simultaneous weather observation at the same exact instant of time. (2.) The United States then exchanges with each country, separately making an especial request of each to establish such exchange. (3.) Each country sends to the United States every fifteen days its own observations; all are thus received by the United States. (4.) The Signal Office of the United States then collates and prints all these reports, its own coincident observations included, and returns in this shape to every regular observer who has sent continuously a single report the records gathered from almost the whole Northern Hemisphere. For one report sent regularly by any regular observer anywhere, on ship or shore, he receives 500, and these 500 surround and cover nearly the entire Northern Hemisphere. For nearly six years this exchange, originated and conducted by the Signal Service of the United States, has been perfectly successful, almost every civilized nation north of the equator having taken part in it. It has made possible for the first time in the history of the world the preparation of a daily simultaneous map of the Northern Hemisphere at Washington (this is also sent to each observer), and has probably advanced the study of practical meteorology as far as any one undertaking in the last century.

The Negro Moses.

"PAP" SINGLETON, who is described as the Moses of the negro exodus, lives at Topeka, Kan. He is a little old man—a mulatto—over seventy years of age, with wavy, iron-gray hair, square jaws, full, quick eyes, and a general expression of honesty, courage and modesty. His name is Benjamin Singleton, and he is known among his black friends and followers as "Pap Singleton." He was born and raised in Nashville, Tenn., where he worked in early manhood at cabinet-making, and from whence he was sold a dozen times or more, and went to the Gulf States, always escaping and coming back to Tennessee. Finally, he determined to flee to Canada, and only succeeded after three attempts and through perils and sufferings that only a man with supreme passion for liberty could have surmounted. After reaching Canada in safety he soon returned to Detroit, and remained there through the war, laboring as a scavenger, and keeping a sort of boarding-house where fugitive slaves were fed, hidden and helped on their way. As soon as the war closed he went back to Tennessee, poor as he had left, save that now he was a free man, and entered upon what he calls his "mission."

"I had studied it all out," he says, "and it was cl'ar as day to me. I dunno how it come to me; but I 'spect it was God's doin's. Anyhow, I knowed my people couldn't live thar. It was ag'in nature for the masters and the slaves to jine hands and work together. Nuthin' but de millimium could bring that around. The whites had the lands and the sense, an' the blacks had nothin' but their freedom—an' it was just like a dream to 'em. Bime-by the fifteenth amendment came along, and the carpet-baggers and my poor people thought they was goin' to have Canaan right off. But I knowed better; I knowed better, an' I told 'em so. I said to 'em: 'Hyar you is a-potterin' round in politics, and tryin' to git into offices that you ain't fit for, and you can't see that these white tramps from the North is simply usin' you for to line their pockets, and when they get through they'll drop you, and the rebels will come into power—and then where will you be?'"

It was not until 1869-70 that Singleton could induce his colored brethren to "get it onto their minds," as he expressed it, that they ought to be trying to get homes of their own, lands of their own, instead of depending upon renting from their former masters, or subsisting by days' work. And even then they were averse to leaving the South. Some efforts were made to buy lands in Tennessee, but the landowners laughed at the idea, and refused to sell at any but exorbitant prices. Then it was, in 1872, that an exploring committee was sent to Kansas, and made a favorable report, and several families came out. The next year Singleton himself made a trip to Kansas as President of the "Tennessee Real Estate and Homestead Association" which he had organized, and was so well pleased that he went back to Tennessee and gathered up two hundred or three hundred people, whom he took out and located in Cherokee County, the settlement being called Singleton Colony.

This was the first colonization movement among the negroes, and the forerunner of the present extraordinary exodus. Those who went in 1873 did well, and sent back favorable reports, and others followed. Soon the railroad companies began offering special inducements, and during the last three years there has been a steady immigration to Kansas. Singleton has brought nearly eight thousand of them, all from Tennessee, and several colonies have come from Kentucky, an association similar to Singleton's having been organized in that State. The total number, so far arrived, may safely be estimated at not less than fifteen thousand, and they are coming by hundreds now every week.

The Singleton Colony, in Cherokee County, and one of the same name in Morris County, are the principal colored settlements, though the Kentuckians have quite a colony in Graham County, called Nicodemus, and there are various smaller settlements in Barton and Hodgeman Counties. These colored settlers are industrious and well-behaved, and seem to be getting along as well as white people in corresponding circumstances. Most of them are poor, and all pay their own way to Kansas. Some of them have means enough to buy little tracts of cheap railroad lands; others enter homesteads on the public domain, and still others work by the day for farmers in their neighborhood, or rent small p'ats and farm them "on shares," until they can buy and improve places of their own. Very few of them stop in the towns; Singleton constantly advises against it, and also does his best to keep those from coming who have not a little something to start with. "But, Lord bless you," he says, "you can't keep 'em back now. The movin' fever has got hold of 'em all over the South."

He insists, this quaint old patriarch, that there are thousands of good people among the Southern whites who wish the blacks well, and would be glad to give them a chance, but that the bulldozers are in the majority, and that it is no longer safe for a white man to assist a negro, or show him any special kindness. The ruling class in the South, he says, are plainly determined to reduce the ex-slaves to a sort of helpless and hopeless serfdom, and the negroes understand it, and common sense tells them that their only chance is to quit the country. "Just as I told 'em years ago," he exclaimed; "and now they say Old Pap was right. Of course I was right. De leopard can't change his spots. De men who used to flog their slaves ain't agoin' to ever treat 'em fair, now that they're free. Mebbe it'll be different a hundred years from now, when all the present generation's dead and gone, but not afore, sir, not afore; and what's agoin' to be a hundred years from now ain't much account to us in this present year o' de Lord. It's what is, and not what may be, that I'm thinkin' of. I don't waste no time botherin' about what'll happen when I'm in my grave."

Singleton is in no sense a politician, and lays but little stress upon the political aspect of affairs in the South; his views are wholly of an industrial turn, and his idea of emigration is the finding of homes and the accumulation of property. Upon the whole, he attaches prime importance to the plain, practical business of making a living and securing a home. The old man doubts if the franchise has been more of a blessing than a disadvantage to his brethren.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

A Feature of Holy Week in Spain.

During the week preceding Easter Sunday, in Catholic churches, Thursday is set apart for the commemoration of the institution of the Eucharist. On that day the consecrated Host is removed from the main altar to a special one called the Repository, which is decorated with lights, flowers, lace and tapestry, and here it is visited by the devout from morning till night. The adornment of these Repositories, or, as they were called in English countries, Sepulchres, is, of course, the work of the "devout female sex." In Spain and France a table is generally set out by the door, where ladies or little girls collect alms from the faithful to bear the expense, which is often very great, as no church wishes to be surpassed in splendor by any other, and the comparison is easily made, the pious generally making a round of all, or at least many, of the churches in the town. Our illustration shows the Maundy Thursday Alms-table in a church in Madrid.

The Lost Colors of Isandula.

When the Zulus made their final charge at the battle of Isandula, on the 22d of January, 1879, a desperate attempt at escape was made by some of the mounted officers and men towards the Buffalo River. Lieutenant Teignmouth Melville, Adjutant of the 1-24th Regiment, seized the colors, galloped off, reached the river, plunged in and struggled to get across. His horse reared and plunged amidst the rocks, and, hampered with the colors, he was thrown. Lieutenant Coghill, A.D.C., also of the 1-24th Regiment, who had ridden safely across, went in to assist his comrade. His horse was shot dead before he could reach him. The officers got out, however, and, terribly exhausted, began to climb the steep bank. Here they were either shot or assegaied. On the 4th of February, thirteen days afterwards, Major Black, of the 2-24th Regiment, with a small party of volunteers, went from Rorke's Drift, and buried the bodies where they fell. Five hundred yards below the crossing-place they found first the color-case and then the colors in rags lying in the water. Major Black rode back in triumph with them to the Laager at Rorke's Drift, where they were received with cheer after cheer by the men of the Second Battalion, who lined the walls, made of biscuit-boxes and mealie-sacks.

View of Canada, Italy.

Railroads in all parts of the Old World are bringing before us places of the past long-buried in obscurity. "Passengers for Jerusalem," or "Check your baggage for Soudan" will soon be familiar sounds. A new Italian railroad, the Conegliano-Vittorio, brings into prominence Ceneda, the birthplace of a somewhat remarkable man, well known to old New Yorkers, Lorenzo da Ponte, the founder of Italian Opera in America. He was born in Ceneda and entered the theological seminary in that city, but threw aside the cassock and became a votary of music. He wrote the libretto of "Don Giovanni," and succeeded Metastasio as court poet at Vienna; came to America, and, like many a foreigner, got swindled out of everything; became a teacher of Italian, bookseller, professor of modern languages in Columbia College, wrote poetry, a history of Florence, very amusing memoirs, inspired a taste for the language, music and poetry of Italy, and first introduced to our fashionable world the Italian Opera. Ceneda is an ancient city—in a valley dotted with ruins of the past, churches, factories—not far from a similar city, Serravalle, between which has sprung up, with American promptness, a new city, Vittorio, which, with its broad streets and fine edifices, is likely to absorb the two older towns.

With the British in Afghanistan.

During the short occupation of the Bazar Valley by the division of General Maude, it was necessary to send a strong escort to meet a convoy expected from Ali Musjid, at a part of the road where the Afridis were likely to attack. As fully expected, the Afridis collected in large numbers and tried to intercept the convoy, and so the rearguard began to withdraw flanking detachments from the heights. After the passage of the convoy Captain Steadman and Major Thicklewaite, and a detachment of the Fifth, had returned to take up a fresh position, the high cliffs to the right being covered with Afridis firing long shots, when suddenly four sowars, escorting a post-wallah, appeared running the gauntlet of a hot fire in the nullah, a half-mile in the rear. One fell, horse and man, in the distance. A swarm of Afridis, with their chuggs flashing, instantaneously rushed on the fallen man. Fortunately, by doubling down the small party of the Fifth to point-blank, some most effective volleys not only cleared the river bed, but swept back the Afridis two hundred yards from the exposed position, to which Captains Steadman and Hart ran, and, aided by the cover afforded by some grass in the river bed, succeeded in at last rescuing the body of the sowar, who was frightfully mutilated. In the neighborhood of the Pheel Khana Tope, as well as near Jellalabad, there is a large number of caves and bits of rock containing sculptures of rare interest to archæologists. The caves are perfectly safe for investigation, but not so the rocks in the interior, as may be seen in the engraving, where a hostile native is firing upon a party thoroughly absorbed in the study of some symbolic carvings on a distant spur. When the region is restored to a peaceful status—if it ever is—the specimens here and there discovered by the British troops of archæological treasures will undoubtedly prove an incentive to students.

War Manufactures in Woolwich Arsenal.

The construction of great guns for land and sea warlike service have been described on former occasions. Our illustration this week shows the finishing of big shells to fit some of the largest ordnance for ships or permanent batteries and forts. The casting of the great Palliser shell draws most attention. They are making shells for the 25-ton, the 35-ton, and the 80-ton guns in this foundry. In the next building finished work is stored—rows, piles, heaps of shells of every size, wide mouthed, gaping for their lose, wickedly pointed, lying flat, stacked in rows, and suspended with chains in air.

The Szegedin Disaster.

Great distress still prevails among the survivors of the frightful disaster at Szegedin, Hungary. Relief is pouring into the city from all parts of the world, and contractors are employing large numbers of men in repairing the damages of the flood. It is the poor, of course, who suffer most severely, and for a long time hundreds of families will be unable to acquire comfortable dwellings. Of the illustrations already published none gives as clear an idea of the abject poverty of the humble classes as the one reproduced in this number—of the hivouac of homeless citizens along the railroad track on the bank of the river. It is a mere temporary resting-place, yet for a time it is the home of many families, the location of all the worldly effects spared by the angry, rushing waters. Were it not for the presence of women and children, the scene would resemble an encampment of a body of troops in time of war, relieved by all the makeshifts for comfort and protection from the weather that the material in the neighborhood would permit. A violent hurricane in Szegedin on April 20th destroyed the works prepared for restoring the railroad and filling the breaches in the dams. The barges, filled with building material and earth, were mostly sunk. The storm caused extensive fresh breaches in the railway embankment, and the laborers were in great danger. Relief has been sent to them.

AT HOME AND ABROAD.

—THERE are two hundred convicts for life in the Mississippi Penitentiary.

—THE contributions for the families of Gloucester's lost seamen aggregate $20,000.

—THE only country in Europe where Good Friday is not a legal holiday is France.

—THE Texas Legislature has adjourned without passing the necessary Appropriation Bills.

—THE population of Atlanta, Ga., is said to be increasing at the rate of six thousand a year.

—THIRTY-EIGHT ladies have already received degrees in France as doctors and bachelors of art.

—THE second General Industrial Exposition in Tokio, Japan, is announced for 1881. The last census gives Tokio a population of 1,042,000.

—HOUSTON, Texas, has voted to place herself practically under the control of the Galveston Board of Health, so far as matters of quarantine are concerned.

—THERE are rejoicings in French engineering circles over the fact that the only bridge at Szegedin which resisted the floods was an entirely French work.

—THE different systems of electric lighting are to be exhibited for competition in the Albert Hall, London, next month. The Prince of Wales has promised to attend.

—MISSISSIPPI is to have a convention at Vicksburg in May to take into consideration the present agitation of the labor question. The planters hope to stop the emigration of the darkeys North, and call upon the colored people to send delegates.

—THE Mexican Congress is discussing a Bill abolishing duties on exportations of the produce of the country, including gold and silver. There is considerable opposition to the proposed removal of duties from bullion.

—A PORTION of Newfoundland's share of the Halifax fishery award is to be paid into the Treasury to meet a deficiency in the revenue, and the interest of the remainder is to be used to aid a number of internal improvement schemes.

—THE cultivation of sugar is rapidly extending in New South Wales, Queensland, Western Australia and the northern part of Southern Australia, and the production has increased this year by nearly two-thirds over the production of last year.

—GERMANY and Hanover, to the infinite satisfaction of England, are coming nearer to reconciliation. Prince Bismarck has promised that the annual interest on the private fortune of the Queen and the two Princesses of Hanover shall be paid.

—THE lumbermen have begun rolling in logs about Colebrook, N. H. Some 50,000,000 feet go into the Connecticut River, and 20,000,000 into the Androscoggin this season, which is a larger year's work than was ever done before in this county.

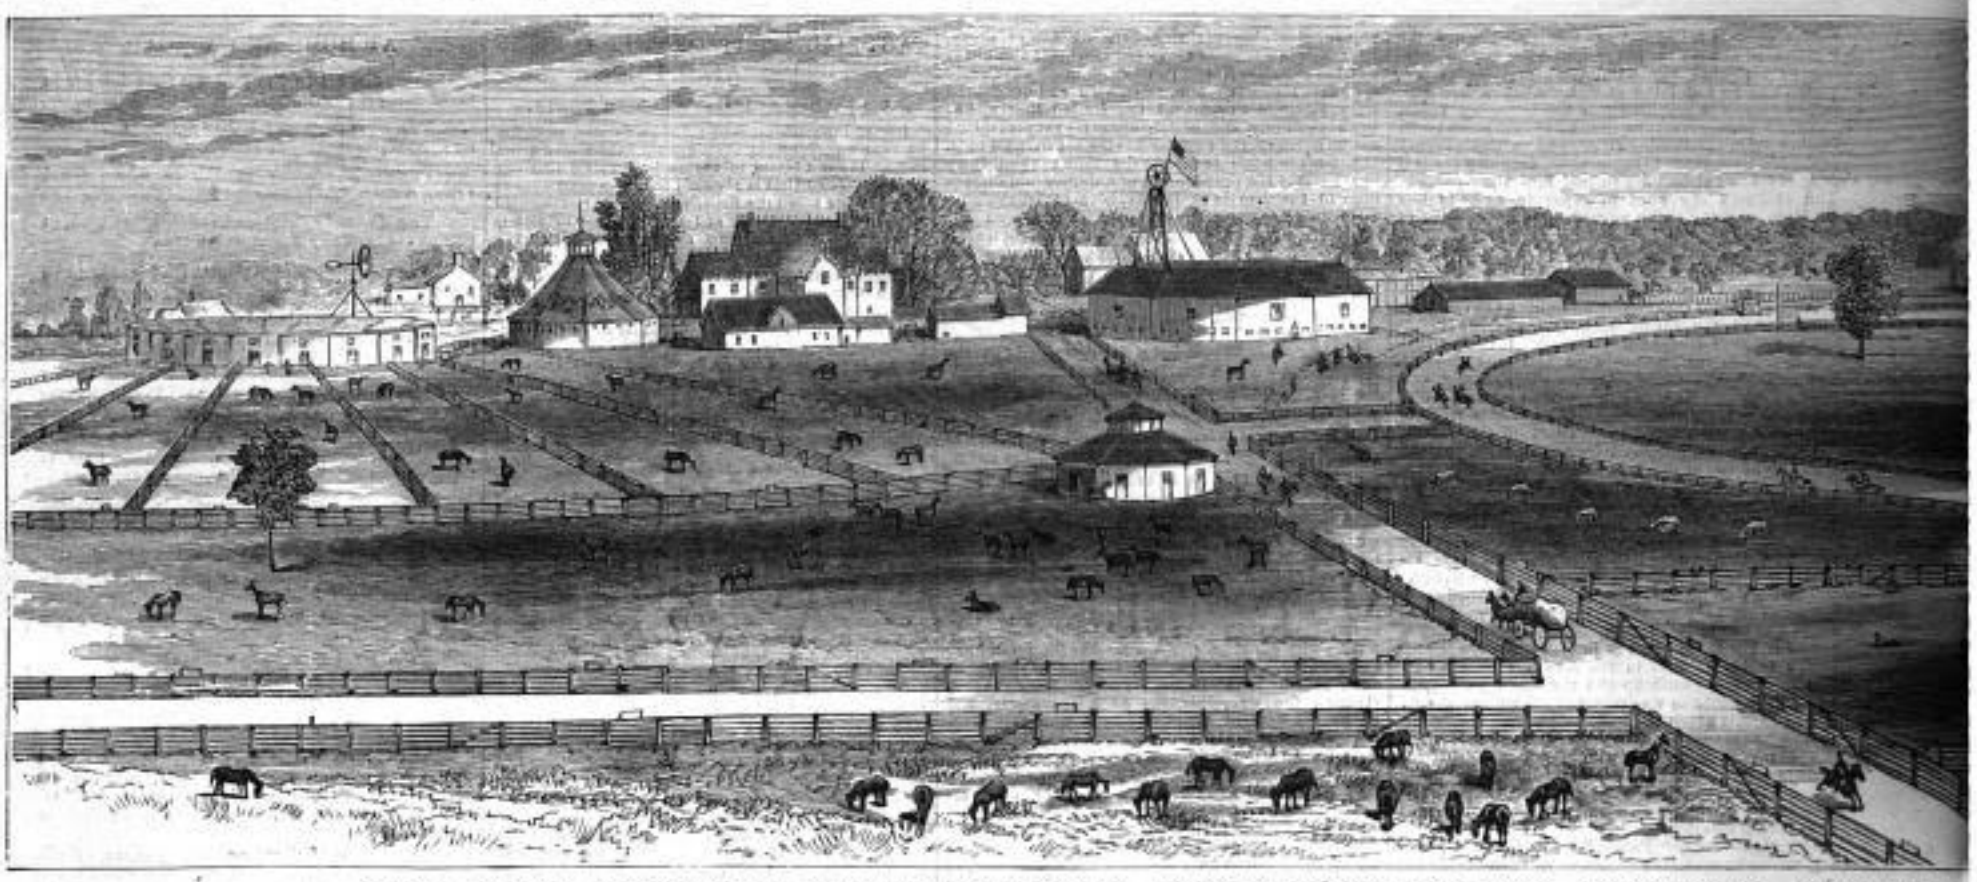
—THE fires in the United States and Canada during March numbered 1,299, the losses being $7,273,200, and the insurance loss $5,728,500. For the three months ending March 31st, the fires numbered 3,537, with an aggregate loss of $25,838,500, and an insurance loss of $16,467,100.

—INDIA pays annually to England 15,000,000 sovereigns for interest on debt, pensions, salaries and other charges. But she has no sovereigns. The coin she possesses, provided by her Government, is in silver rupees. To pay these sovereigns she must buy them in London with her silver rupees. She does this at an annual loss of 3,000,000 sovereigns.

—MANY wealthy Japanese have, for a considerable period, furnished their houses largely in the European style, and have imported furniture from abroad. The Japanese have now decided to make all furniture at home, after imported models, but will still be indebted to foreign countries for the various woods, as well as for carpetings, paperings and tapestries.

—THE Cremation Society of England, a joint stock affair, has received a check. Secretary Cross of the Home Office recently announced in the House of Commons that he will not sanction the proceedings of the company until they are approved by Parliament. English medical and legal circles object to cremation because it destroys evidence of the cause of death.

—RUSSIA has had a great bank-embezzlement case. Mr. Tschestnoff, cashier of the Landed Bank of Mutual Credit, has been sentenced to Siberia for plundering his institution for four years of millions of roubles, which he spent in magnificent living. Like T'Kindt, of Belgium, he went on in his career of theft and extravagance without exciting the suspicions of the Directors of the bank.



—THE excess of exports over imports of merchandise for the month ending March 31st, 1879, was $24,198,963, and for the twelve months ending March 31st, 1879, $283,831,122. The excess of the exports of gold and silver coin and bullion for the month ending March 31st, 1879, was $1,310,240, and for the twelve months ending March 31st, 1879, the excess of exports was $497,121.

—THE balance-sheet of the Paris Exposition shows a deficit of five millions of dollars—about double what the originators expected. The expenditure was considerably larger than the estimates, and amounted to $11,000,000. The deficit, however, is not a very serious matter, as the loss falls upon the country, and it is calculated that the Exhibition has been the cause of an actual increase in the national revenue of close upon fifteen millions of dollars. The increase in the Paris octrois must also have been very great, and have far exceeded the subvention given by the City of Paris.

—IN CHINA, where the opium habit ruins and destroys many men annually, the efforts of the Government to abolish or diminish the use of opium have recently been more energetic than ever. All these efforts have been in vain, as were those of many previous years. The Pekin Government have at last determined to take the final steps in the business, and an edict has been issued, which goes into effect next year, making the use or sale of opium punishable by death. It is hard to say how the edict will be met by the ten million opium victims of the Celestial Empire, or what proportion of them will come to this country to enjoy their fascinating custom.

—M. SIBIRIAKOFF, the wealthy promoter of Professor Nordenskiöld's Arctic voyage, will send two vessels this Spring to render the professor assistance, and extricate him, if necessary, from his present position. One the *Nordenskiöld*, a steamer constructed specially for Arctic navigation, will sail from Sweden by way of the Suez Canal and the Indian Ocean to Behring's Straits; and the other, the *Lena*, which acted as tender last year to the *Vega*, Professor Nordenskiöld's vessel, will descend the Lena from Irkutsk in the same direction. M. Sibiriakoff has generously invited the Imperial Russian Geographical Society and the sister society at Bremen to send scientific delegates, who will be accommodated free of charge.

SPRING.

WINTER has risen to bid his graff good-by.
I feel the first warm touches of the Sun,
As of a mother's hand when work is done.
I hear the first lark's anthem to the sky;
I watch the great white clouds go flying by;
I note the flowers awaking one by one;
And soft airs whisper, "Summer is begun!"
Oh, how the soul leaps up exultingly,
As it would break its heavy prison-bar!
And man seems dearer, God seems nearer, far,
For this is truth, deny it how we may,
That light and darkness make us what we are.
We are the creatures of our moods, and they
Are creatures of the clear or cloudy day.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXV.

"RUFUS! I don't quite like the way you look at me. You seem to think——"

"Give it tongue, my son. What do I seem to think?"

"You think I'm forgetting Regina. You don't believe I'm just as fond of her as ever. The fact is, you're an old bachelor."

"That is so. Where's the harm, Amelius?"

"You don't understand——"

"You're out there, my bright boy. I reckon I understand more than you think for. The wisest thing you ever did in your life is what you did this evening, when you committed Sally to the care of those ladies at the Home."

"Good-night, Rufus. We shall quarrel if I stay here any longer."

"Good-night, Amelius. We sha'n't quarrel, stay here as long as you like."

The good deed had been done; the sacrifice—already a painful sacrifice—had been made. Mrs. Payson was old enough to speak plainly, as well as seriously, to Amelius of the absolute necessity of separating himself from Simple Sally, without any needless delay. "You have seen for yourself," she said, "that the plan on which this little household is ruled is the unvarying plan of patience and kindness. So far as Sally is concerned, you can be quite sure that she will never hear a harsh word, never meet with a hard look, while she is under our care. The lamentable neglect under which the poor creature has suffered will be tenderly remembered and atoned for here. If we can't make her happy among us, I promise that she shall leave the Home, if she wishes it, in six weeks' time. As to yourself, consider your position if you persist in taking her back with you. Our good friend Rufus has told me that you are engaged to be married. Think of the misinterpretations, to say the least of it, to which you would subject yourself—think of the reports which would sooner or later find their way to the young lady's ears, and of the deplorable consequences that would follow. I believe implicitly in the purity of your motives. But remember Who taught us to pray that we may not be led into temptation—and complete the good work that you have begun by leaving Sally among friends and sisters in this house."

To any honorable man, these were unanswerable words. Coming after what Rufus and the surgeon had already said to him, they left Amelius no alternative but to yield. He pleaded for leave to write to Sally, and to see her, at a later interval, when she might be reconciled to her new life. Mrs. Payson had just consented to both requests; Rufus had just heartily congratulated him on his decision—when the door was thrown violently open. Simple Sally ran into the room, followed by one of the women-attendants in a state of breathless surprise.

"She showed me a bedroom," cried Sally, pointing indignantly to the woman; "and she asked if I should like to sleep there." She turned to Amelius, and caught him by the hand to lead him away. The ineradicable instinct of distrust had been once more roused in her by the too-zealous attendant. "I'm not going to stay here," she said; "I'm going away with you!"

Amelius glanced at Mrs. Payson. Sally tried to drag him to the door. He did his best to reassure her by a smile; he spoke confusedly some composing words. But his honest face, always accustomed to tell the truth, told the truth now. The poor lost creature, whose feeble intelligence was so slow to discern, so inapt to reflect, looked at him with the heart's instantaneous perception, and saw her doom. She let go of his hand. Her head sank. Without word or cry, she dropped on the floor at his feet.

The attendant instantly raised her, and placed her on a sofa. Mrs. Payson saw how patiently Amelius struggled to control himself, and felt for him with all her heart. Turning aside for a moment, she hastily wrote a few lines, and returned to him. "Go, before we revive her," she whispered; "and give what I have written to the coachman. You shall suffer no anxiety that I can spare you," said the excellent woman; "I will stay here myself to-night, and reconcile her to the new life."

She held out her hand; Amelius kissed it in silence. Rufus led him out. Not a word dropped from his lips on the long drive back to London.

His mind was disturbed by other subjects besides the subject of Sally. He thought of his future, darkened by the doubtful marriage-engagement that was before him. Alone with Rufus for the rest of the evening, he petulantly misunderstood the sympathy with which the kindly American regarded him. Their bedrooms were next to each other. Rufus heard him walking restlessly to and fro, and now and then talking to himself. After a while these sounds ceased. He was evidently worn out, and was getting the rest that he needed at last.

The next morning he received a few lines from Mrs. Payson, giving a favorable account of Sally, and promising further particulars in a day or two.

Encouraged by this good news, revived by a long night's sleep, he went towards noon to pay his postponed visit to Regina. At that early hour he could feel sure that his interview with her would not be interrupted by visitors. She received him quietly and seriously, pressing his hand with a warmer fondness than usual. He had anticipated some complaint of his absence on the previous day and some severe allusion to his appearance in the capacity of a Socialist lecturer. Regina's indulgence, or Regina's interest in circumstances of more pressing importance, preserved a merciful silence on both subjects.

"It is a comfort to me to see you, Amelius," she said; "I am in trouble about my uncle, and I am weary of my own anxious thoughts. Something unpleasant has happened in Mr. Farnaby's business. He goes to the city earlier and he returns much later than usual. When he does come back he doesn't speak to me—he locks himself into his room, and he looks worn and haggard when I make his breakfast for him in the morning. You know that he is one of the directors of the new bank? There was something about the bank in the newspaper yesterday which upset him dreadfully; he put down his cup of coffee, and went away to the city without eating his breakfast. I don't like to worry you about it, Amelius; but my aunt seems to take no interest in her husband's affairs—and it is really a relief to me to talk of my troubles to you. I have kept the newspaper; do look at what it says about the bank, and tell me if you understand it."

Amelius read the passage pointed out to him. He knew as little of banking-business as Regina. "So far as I can make it out," he said, "they're paying away money to their shareholders which they haven't earned. How do they do that, I wonder?"

Regina changed the subject in despair. She asked Amelius if he had found new lodgings. Hearing that he had not yet succeeded in the search for a residence, she opened a drawer of her work-table, and took out a card.

"The brother of one of my schoolfellows is going to be married," she said. "He has a pretty bachelor cottage in the neighborhood of the Regent's Park, and he wants to sell it, with the furniture, just as it is. I don't know whether you care to encumber yourself with a little house of your own. His sister has asked me to distribute some of his cards, with the address and particulars. It might be worth your while perhaps to look at the cottage when you pass that way."

Amelius took the card. The small feminine restraints and gentlenesses of Regina, her quiet even voice, her serene grace of movement, had a pleasantly soothing effect on his mind after the anxieties of the last four-and-twenty hours. He looked at her bending over her embroidery, deftly and gracefully industrious, and drew his chair closer to her. She smiled softly over her work, conscious that he was admiring her, and placidly pleased to receive the tribute.

"I would buy the cottage at once," said Amelius, "if I thought you would come and live in it with me."

She looked up gravely, with her needle suspended in her hand.

"Don't let us return to that," she answered, and went on again with her embroidery.

"Why not?" Amelius asked.

She persisted in working as industriously as if she had been a poor needlewoman, with serious reasons for being eager to get her money. "It is useless," she replied, "to speak of what cannot be for some time to come."

Amelius stopped the progress of the embroidery by taking her hand. Her devotion to her work irritated him.

"Look at me, Regina," he said, steadily controlling himself. "I want to propose that we shall give way a little on both sides. I won't hurry you; I will wait a reasonable time. If I promise that, surely you may yield a little in return. Money seems to be a hard task-master, my darling, after what you have told me about your uncle. See how he suffers because he is bent on being rich, and ask yourself if it isn't a warning to us not to follow his example. Would you like to see me too wretched to speak to you or to eat my breakfast—and all for the sake of a little outward show? Come, come! let us think of ourselves. Why should we waste the best days of our lives apart, when we are both free to be happy together? I have another good friend besides Rufus—the good friend of my father before me. He knows all sorts of great people, and he will help me to some employment. In six months' time I might have a little salary to add to my income. Say the sweetest words, my darling, that ever fell from your lips—say you will marry me in six months!"

It was not in a woman's nature to be insensible to such pleading as this. She all but yielded. "I should like to say it, dear!" she answered, with a little fluttering sigh.

"Say it, then!" Amelius suggested tenderly.

She took refuge again in her embroidery. "If you would only give me a little time," she suggested, "I might say it."

"Time for what, my own love?"

"Time to wait, dear, until my uncle is not quite so anxious as he is now."

"Don't talk of your uncle, Regina! You know as well as I do what he would say. Good heavens! why can't you decide for yourself? No! I don't want to hear over again about what you owe to Mr. Farnaby—I heard enough of it on that day in the shrubbery. Oh, my dear girl, do have some feeling for me!—do for once have a will of your own!"

Those last words were an offense to her self-esteem. "I think it's very rude to tell me I have no will of my own," she said, "and very hard to press me in this way when you know I am in trouble." The inevitable handkerchief appeared, adding emphasis to the protest, and the becoming tears showed themselves modestly in Regina's magnificent eyes.

Amelius started out of his chair and walked away to the window. That last reference to Mr. Farnaby's pecuniary cares was more than he had patience to endure. "She can't even forget her uncle and his bank," he thought, "when I am speaking to her of our marriage."

He changed color as that bitter reflection occurred to him. By some subtle process of association which he was unable to trace, the image of Simple Sally rose in his mind. An irresistible influence forced him to think of her—not as the poor, starved, degraded, half-witted creature of the streets, but as the grateful girl who had asked for no happier future than to be his servant, who had dropped senseless at his feet at the bare prospect of parting with him. His sense of self-respect, his loyalty to his betrothed wife, resolutely resisted the unworthy conclusion to which his own thoughts were leading him. He turned back again to Regina; he spoke so loudly and so vehemently that the gathering flow of her tears was suspended in surprise. "You're right, you're quite right, my dear! I ought to give you time, of course. I try to control my hasty temper, but I don't always succeed—just at first. Pray forgive me, it shall be exactly as you wish."

Regina forgave him, with a gentle and ladylike astonishment at the excitable manner in which he made his excuses. She even neglected her embroidery, and put her face up to him to be kissed. "You are so nice, dear," she said, "when you are not violent and unreasonable. It is such a pity you were brought up in America. Won't you stay to lunch?"

Happily for Amelius, the footman appeared at this critical moment with a message: "My mistress wishes particularly to see you, sir, before you go."

This was the first occasion, in the experience of the lovers, on which Mrs. Farnaby had expressed her wishes through the medium of a servant, instead of appearing personally. The curiosity of Regina was mildly excited. "What a very odd message!" she said; "what does it mean? My aunt went out earlier than usual this morning, and I have not seen her since. I wonder whether she is going to consult you about my uncle's affairs?"

"I'll go and see," said Amelius.

"And stay to lunch?" Regina reiterated.

"Not to-day, my dear."

"To-morrow, then?"

"Yes, to-morrow." So he escaped. As he opened the door, he looked back, and kissed his hand. Regina raised her head for a moment, and smiled charmingly. She was hard at work again over her embroidery.

CHAPTER XXVI.

THE door of Mrs. Farnaby's ground-floor room, at the back of the house, was partially open. She was on the watch for Amelius.

"Come in!" she cried, the moment he appeared in the hall. She pulled him into the room, and shut the door with a bang. Her face was flushed, her eyes were wild. "I have something to tell you, you dear good fellow," she burst out, excitedly—"something in confidence, between you and me!" She paused and looked at him with sudden anxiety and alarm. "What's the matter with you," she asked.

The sight of the room, the reference to a secret, the prospect of another private conference, forced back the mind of Amelius, in one breathless instant, to his first memorable interview with Mrs. Farnaby. The mother's piteously-hopeful words, in speaking of her lost daughter, rang in his ears again as if they had just fallen from her lips. "She may be lost in the labyrinth of London. * * * To-morrow, or ten years hence, you *might* meet with her." There were a hundred chances against it—a thousand, ten thousand chances against it. The startling possibility flashed across his brain, nevertheless, like a sudden flow of daylight across the dark. "*Have* I met with her at the first chance?"

"Don't deceive yourself with vain hopes!" he answered, warming into sudden excitement on his side. "Promise me that before I speak."

She waved her hand derisively. "Hopes!" she repeated. "I have done with hopes, I have done with fears—I have got to certainties at last!"

He was too eager to heed anything that she said to him; his whole soul was absorbed in the coming disclosure. "Two nights since," he went on, "I was wandering about London, and I met——"

She burst out laughing. "Go on!" she cried, with a wild, derisive gayety.

Amelius stopped, perplexed and startled. "What are you laughing at?" he asked.

"Go on!" she repeated. "I defy you to surprise me. Out with it! Whom did you meet?"

Amelius proceeded doubtfully by a word at a time: "I met a poor girl in the streets," he said, steadily watching her.

She changed completely at those words; she looked at him with an aspect of stern reproach. "No more of it," she said; "I have not waited all these miserable years for such a horrible end as that." Her face suddenly brightened, a radiant effusion of tenderness and triumph flowed over it, and made it young and happy again. "Amelius!" she said, "listen to this. My dream has come true—my girl is living!—my own darling is found, thanks to you!"

Amelius looked at her. Was she speaking of something that had really happened, or had she been dreaming again?

Absorbed in her own happiness, she made no remark on his silence. "I have seen the woman," she went on. "This bright blessed morning I have seen the woman who took her away in the first days of her poor little life. The wretch swears she was not to blame. I tried to forgive her. Perhaps, I almost did forgive her, in the joy of hearing what she had to tell me. I should never have heard it, Amelius, if you had not given that glorious lecture. The woman was one of your audience. She would never have spoken of those past days; she would never have thought of me——"

At those words, Mrs. Farnaby abruptly stopped, and turned her face away from Amelius. After waiting a little, finding her still silent, still immovable, he ventured on asking a question.

"Are you sure you are not deceived?" he asked. "I remember you told me that rogues had tried to impose on you, in past times, when you employed people to find her."

"I have proof that I am not being imposed upon," Mrs. Farnaby answered, still keeping her face hidden from him. "One of them knows of the fault in her foot."

"One of them?" Amelius repeated. "How many of them are there?"

"Two. The old woman, and a young man."

"What are their names?"

"They won't tell me their names yet."

"Isn't that a little suspicious?"

"One of them knows," Mrs. Farnaby reiterated, "of the fault in her foot."

"May I ask which one of them knows? The old woman, I suppose?"

"No, the young man."

"That's strange, isn't it? Have you seen the young man?"

"I know nothing of him, except the little that the woman told me. He has written me a letter."

"May I look at it?"

"I daren't let you look at it."

Amelius said no more. If he had felt the smallest suspicion that the disclosure volunteered by Mrs. Farnaby at their first interview had been overheard by the unknown person who had opened the swinging window in the kitchen he might have recalled Phœbe's vindictive language at his lodgings, and might perhaps have suspected the girl and the vagabond sweetheart who was waiting for her in the street. As it was, he was simply puzzled. The one plain conclusion to his mind was, unhappily, the natural conclusion (after what he had heard) that Mrs. Farnaby had no sort of interest in the discovery of Simple Sally, and that he need trouble himself with no further anxiety in that matter. Strange as Mrs. Farnaby's mysterious revelation seemed, her correspondent's knowledge of the fault in the foot was a circumstance in his favor beyond dispute. Amelius still wondered inwardly how it was that the woman who had taken charge of the child had failed to discover what appeared to be known to another person. If he had been aware that Mrs. Sowler's occupation at the time was the occupation of a "baby-farmer," and that she had many other deserted children pining under her charge, he might have easily understood that she was the last person in the world to trouble herself with a minute examination of any one of the unfortunate little creatures abandoned to her drunken and merciless neglect. Jervy had satisfied himself, before he trusted her with his instructions, that she knew no more than the veriest stranger of any peculiarity in one or the other of the child's feet.

Interpreting Mrs. Farnaby's last reply to him as an intimation that their interview was at an end, Amelius took up his hat to go.

"I hope, with all my heart," he said, "that what has begun so well will end well. If there is any service that I can do for you——"

She drew nearer to him, and put her hand gently on his shoulder. "Don't think that I distrust you," she said, very earnestly; "I am unwilling to shock you—that is all. Even this great joy has a dark side to it; my miserable married life casts its shadow on everything that happens to me. Keep secret from everybody the little that I have told you—you will ruin me if you say one word of it to any living creature. I ought not to have opened my heart to you—but how could I help it, when the happiness that is coming to me has come through you? When you say Good-by to me to-day, Amelius, you say Good-by to me for the last time in this house. I am going away. Don't ask me why, that is one more among the things which I daren't tell you! You shall hear from me or see me—I promise that. Give me some safe address to write to—some place where there are no inquisitive women who may open my letter in your absence."

She handed him her pocket-book. Amelius wrote down in it the address of his club.

She took his hand. "Think of me kindly," she said. "And, once more, don't be afraid of my being deceived. There is a hard part of me still left which keeps me on my guard. The old woman tried, this morning, to make me talk to her about that little fault we know of in my child's foot. But I thought to myself, 'If you had taken a proper interest in my poor baby while she was with you, you must sooner or later have found it out.' Not a word passed my lips. No, no, don't be anxious when you think of me. I am as sharp as they are; I mean to find out how the man who wrote to me discovered what he knows; he shall satisfy me, I promise you, when I see him or hear from him next. All this is between ourselves—strictly, sacredly between ourselves. Say nothing—I know I can trust you. Good-by, and forgive me for having been so often in your way with Regina. I shall never be in your way again. Marry her, if you think she is good enough for you; I have no more interest now in your being a roving bachelor, meeting with girls here, there and everywhere. You shall know how it goes on. Oh, I am so happy!"

She burst into tears, and signed to Amelius with a wild gesture of entreaty to leave her.

He pressed her hand in silence and went out.

Almost as the door closed on him the variable woman changed again. For a while, she walked rapidly to and fro, talking to herself

Digitized by Google

The course of her tears ceased. Her lips closed firmly; her eyes assumed an expression of savage resolve. She sat down at the table and opened her desk. "I'll read it once more," she said, to herself, "before I seal it up."

She took from her desk a letter of her own writing, and spread it out before her. With her elbows on the table, and her hands clasped fiercely in her hair, she read those lines, addressed to her husband:

"JOHN FARNABY—I have always suspected that you had something to do with the disappearance of our child. I know for certain now that you deliberately cast your infant daughter on the mercy of the world, and condemned your wife to a life of wretchedness.

"I know what I am writing about. I have spoken with the woman who waited by the garden-paling at Ramsgate, and who took the child from your hands. She saw you with me at the lecture; and she is absolutely sure that you are the man.

"Thanks to the meeting at the lecture-hall, I am at last on the trace of my lost daughter. This morning I have heard the woman's story. She kept the child, on the chance of its being reclaimed, until she could afford to keep it no longer. She met with a person who was willing to adopt it, and who took it away with her to a foreign country, not mentioned to me yet. In that country my daughter is still living, and will be restored to me on conditions which will be communicated in a few days' time.

"Some of this story may be true, and some of it may be false; the woman may be lying to serve her own interests with me. Of two things I am sure—that my girl is identified by means known to me of which there can be no doubt; and that she is still living, because the interest of the persons treating with me is an interest in her life.

"When you receive this letter, on your return from business to-night, I shall have left you, and left you for ever. The bare thought of even looking at you again fills me with horror. I have my own income and I mean to take my own way. In your best interests, I warn you, make no attempt to trace me. I declare solemnly that, rather than let your deserted daughter be polluted by the sight of you, I would kill you with my own hand, and die for it on the scaffold. If she ever asks for her father I will do you one service. For the honor of human nature, I will tell her that her father is dead. It will not be all a falsehood. I repudiate you and your name—you are dead to me from this time forth.

"I sign myself by my father's name,

"EMMA RONALD."

She had said herself that she was unwilling to shock Amelius. This was the reason.

After thinking a little she sealed and directed the letter. This done, she unlocked the wooden press which had once contained the baby's frock and cap, and those other memorials of the past which she called her "dead consolations." After satisfying herself that the press was empty she wrote on a card, "To be called for by a messenger from my bankers," and tied the card to a tin box in a corner, secured by a padlock. She lifted the box and placed it in front of the press, so that it might be easily visible to any one entering the room. The safe-keeping of her treasures provided for, she took the sealed letter, and, ascending the stairs, placed it on the table in her husband's dressing-room. She hurried out again, the instant after, as if the sight of the place were intolerable to her.

Passing to the other end of the corridor, she entered her own bedchamber, and put on her bonnet and cloak. A leather handbag was on the bed. She took it up, and looked round the large, luxurious room with a shudder of disgust. What she had suffered within these four walls no human creature knew but herself. She hurried out, as she had hurried out of her husband's dressing-room.

Regina was still in the drawing-room. As she reached the door, she hesitated and stopped. The girl was a good girl in her own dull placid way—and her sister's daughter, too. A little act of kindness would perhaps be a welcome act to remember. She opened the door so suddenly that Regina started, with a small cry of alarm. "Oh, aunt, how you frighten one! Are you going out?" "Yes; I'm going out," was the short answer. "Come here. Give me a kiss." Regina looked up in wide-eyed astonishment. Mrs. Farnaby stamping impatiently on the floor. Regina rose, gracefully bewildered. "My dear aunt, how very odd!" she said—and gave the kiss demanded, with a serenely-surprised elevation of her finely-shaped eyebrows. "Yes," said Mrs. Farnaby; "that's it—one of my oddities. Go back to your work. Good-by."

She left the room, as abruptly as she had entered it. With her firm, heavy step she descended to the hall, passed out at the house-door, and closed it behind her—never to enter it again.

(To be continued.)

GATHERING NAMES FOR A CITY DIRECTORY.

AN EPISODE OF EARLY MAY.

A DIRECTORY of the name, occupation and residence of each inhabitant is now regarded as an indispensable annual for every city of importance. In the Western States these works possess more value than attaches to an ordinary volume of reference. They are treated by the press at least as compilations of much historical interest; and there are editors in Chicago and St. Louis, who, jealous of the increase of population in their respective cities, actually find much that is humorous, sarcastic and romantic in their pages. It is claimed in each city that the other, in order to show a larger number of inhabitants, positively give the names and occupations of the long-forgotten dwellers in cemeteries, and reinstates them in the tenements and hovels that abound. Each regards the assertions made in the other as so many slanders; but neither is willing to admit a decrease or numerical inf riority in population.

With these specimens of municipal rivalry and Western humor we have nothing to do, save, perhaps, to question the authenticity of the returns shown in the directories. It is true we have a great diversity of opinion about the directories that are compiled in New York. Some critics even assert that certain compilations made last year contain the same lines exactly as those published five years ago, the only change being the substitution of the year on the back of the volume. But whatever may be the method of composing these elaborate works, the fact of their great utility remains. To citizens anxious to escape jury duty, the payment of taxes, and the visits of creditors, the city directory is a thorough nuisance, and hundreds refuse to give their names to the canvassers in order to preserve a greater degree of "independence."

The canvassing for names begins directly the annual moving season is over. While you are driving carpet-tacks through your fingers, and emptying the soot from refractory stove-pipes all over you, the man with book and pencil rings the bell and demands the name of every occupant of the house, and the occupation of the males and spin-sters. You may or may not give the information as you please, but if you refuse the canvasser will resort to various devices to obtain it, and generally succeeds.

A canvasser among the tenements in the lower wards has certainly anything but an easy, pleasant time in gathering the names. Both men and women detest the men who serve tax-lists, summons to jury duty, installment bills of furniture-dealers—in fact, bills of any kind; and to remove the chances of being found will offer every possible obstacle to the directory-canvasser. In a public sense, the benefits and annoyances of a city directory are about even. In referring to them, one little thinks of the dangers to which the gatherers of names are subjected.

Do Pearls Breed?

DO PEARLS breed? This question (says the London *World*) is exciting no small interest to the scientific mind at the present moment. Mr. Frank Buckland has had some specimens of breeding pearls sent to him from Borneo, and confesses himself fairly puzzled. The pearls resemble the common seed pearls, and are kept in a glass tube with some grains of rice to feed upon. Three or four months have now elapsed since they were dispatched on their journey, and the rice has all the appearance of having been partially eaten. A curious speck in the grain of rice almost suggests that the germ—whatever it may be—is deposited in the rice.

The Polish Language.

THE noblesse of the Polish province of Kovna have addressed a petition to the Czar, begging to be allowed to speak their own language in public. In this the petitioners state that the order forbidding the use of the Polish language in public, issued by Count Mouravieff in 1864, is still rigorously enforced by the authorities, and that at the Kovna clubs and entertainments many peop e are compelled to observe a rigid and painful silence on account of their inability to converse in Russian. Some young nobles at Kovna, who persisted in speaking Polish because they did not know a word of any other language, were recently arrested by the police, and criminal proceedings are now being instituted against them. As the Poles have resigned all hopes of a nationality of their own, the order seems unnecessarily cruel and vindictive.

The Two-headed Eagle.

THE origin of the device of the eagle on national and royal banners may be traced to very early times. It was the ensign of the ancient kings of Persia and Babylon. The Romans adopted various other figures on the camp standard; but Marius (B. C. 102) made the eagle alone the ensign of the legions, and confined the other figures to the cohorts. After the division, the emperors of the western Roman Empire used a black eagle; those of the east a golden one. The sign of the golden eagle is in allusion to the emperors of the East. Since the time of the Romans, almost every state that has assumed the designation of empire has taken the eagle for its ensign. Austria, Russia, Prussia, Poland and France all took the eagle. The two-headed eagle signifies a double empire. The emperors of Austria, who claimed to be considered the successors of the Cæsars of Rome, used the double-headed eagle, which is the eagle of the Eastern emperors, and that of the Western, typifying the "Holy Roman Empire" of which the original emperors of Germany (now merged in the house of Austria) considered themselves as the representatives. Charlemagne was the first to use it, for, when he became master of the whole of the German Empire, he added the second head to the eagle (A. D. 802). The United States adopted the eagle both as a symbol of empire and as a native to the country.

Keats's "Endymion."

ONE day Shelley and Keats grew warm over a discussion on poetry. The end of it was that they agreed each to write a poem and to try which could finish first. In order that he might dedicate himself exclusively to his work, Keats retired to the Isle of Wight, and there, with soft airs breathing round him, amid the scent of flowers and the song of birds, he wrote his "Endymion." Keats completed his work in a rough form in six months. It was, however, much longer than that before he gave it to the world. He lingered over the offspring of his fancy with the anxious fondness of true genius, deepening the coloring here and softening it there. At length "Endymion" was published. It was too marked a work to be passed over by the reviewers as his first little volume had been. Unless it had fallen into the kindly hands of some delicate, discerning critic, who would have pointed out to the young author the faults which were scattered so abundantly among the real beauties of the poem, it was a book which was sure to excite either excessive praise or excessive censure. This latter was its fate. Gifford, a Quarterly Reviewer, a man with about as much poetry in him as a steam-engine, finding that he could not understand Keats's genius, thought that the best thing he could do for his own dignity, and indeed for the world in general, was to laugh at and cut to pieces "Endymion." The lesser reviews echoed the bray of the great Quarterly donkey, and the Press spoke scarcely a good word for Keats's poem. They could not, however, kill what was immortal; "Endymion" found even then many sympathetic readers, and since that time it has found thousands upon thousands more.

SCIENTIFIC INTELLIGENCE.

A Conference on interoceanic canals is to be held in Paris on May 15th.

M. Baillaud, Professor of Astronomy to the Faculty of Sciences of Toulouse, has been appointed director for five years of the observatory of that city.

A Special Congress on the means of creating an interoceanic canal across the Darien Isthmus will be opened shortly by the Society of Commercial Geography of Paris.

The Copernican Society at Thorn has resolved to begin an international collection of funds for the erection of an observatory in that town, as a lasting monument to the great reformer of astronomy.

Technical Studies in England.—It appears likely, says the *Athenæum*, that technical studies will have a chance of development at Cambridge, if the newly proposed scheme for remodeling the examination in Applied Science for the ordinary B. A. degree should be carried.

A Telegram addressed by Gordon Pasha from Abujered, on the White Nile, to the President of the Italian Geographical Society, announces that Signor Matteucci, the leader of the Italian scientific expedition, having received permission to enter Abyssinia, had started from Adowa and landed at Massowah.

Monsignor Lavigerie, Archbishop of Algiers, has informed *Les Missions Catholiques* that it is in contemplation to increase the staff of the French Algerian Missionary expedition in Central Africa to ten priests, one of whom is to found a depot in the neighborhood of Zanzibar for the missions of the interior.

At the Last Meeting of the Société Commerciale de Géographie at Paris, Dr. Raffray gave some particulars respecting his recent explorations in New Guinea, and called attention to the fact that that country offered a vast field for discovery and study to the traveler, especially from an ornithological and entomological point of view.

The Number of Lights for electric light-houses in France is to be increased by two important constructions, one on Planier Isle, off Marseilles, and the other at the mouth of the Gironde. There are at present in existence in France only three, one at Cape Grisnez, and two at Cape La Heve, off Havre. These lighthouses are supplied with Alliance electro magnetic engines.

The Banana as an Article of Food.—The banana-tree keeps the ground moist around it, and this property is utilized in Venezuela to help the coffee plant in dry weather; but as only a little of the fruit is there used as an article of food, it has, therefore, been proposed to export it, as the flour and alcohol obtainable from it are valuable. The flour is a food essentially feculent and is highly nourishing. Considering the vast amount of banana fruit that is allowed to go to waste, it would appear quite worth while to study some method of economizing it.

The Steam Traffic in the Indian Archipelago has so largely increased since the opening of the Suez Canal that the roads of Batavia are found insufficient for the accommodation of the vessels, and the Netherlands Government have accordingly found it necessary to undertake the construction of a new port. This is situated in Cape Tanjong Priok, to the east of Batavia, and is to have communication with that city by means of a canal and a railway. The work of construction was commenced in 1877, and 3,000 men are at present employed on it. The new port, which is to be named after Prince Henry, will, it is expected, be finished in 1885.

Oxygen Gas as a Remedy for Hydrophobia.—A few months since a mad dog bit the head of a child, tearing the skin. The wound was immediately cauterized with nitrate of silver, and healed perfectly in the course of eight days, but after the lapse of nine days all the signs of hydrophobia appeared in their worst form. The physician, Dr. Schmidt (the event occurred in Russia) caused the child to respire oxygen gas for two hours and a half, at the expiration of which time all the symptoms of hydrophobia disappeared, and the patient was perfectly calm. Two days later the difficulty of respiration and convulsions returned, and inhalation of oxygen was repeated, but after forty-five minutes the spasms ceased, and the patient gradually recovered after treatment with monobromide of camphor and the usual tonics.

Some Questions by Professor Asa Gray.—Professor Asa Gray asks why the Pacific forest region, which is rich and in some respects unique in coniferous trees, should be so poor in deciduous trees? And how came California to have the monopoly of the two Big-trees, *sequoiæ*, which have no near relatives anywhere? Why should trees of six related genera, which will all thrive in Europe, be restricted naturally, one to the eastern side of the American Continent, one genus to the western side, and the rest to a small portion of the eastern border of Asia? Why should the northeastern region of Asia have a larger number of trees than any other part of the northern temperate zone? In other words, why should the Pacific and the European forests be so poor in comparison, and why the Pacific poorest of all in deciduous, yet rich in coniferous trees? All answers should be addressed to Professor Gray, at Cambridge, Mass.

The New Writing Telegraph.—At the March meeting of the English Society of Telegraph Engineers, Mr. Cowper read a paper on his newly-invented writing telegraph—a real telegraph, according to the etymology of the word. The writing is done by the operator at one end with a pencil on a paper ribbon which runs on from under his hand as he writes, and the *fac simile* is reproduced at the other end of the wire by a machine which repeats every line and curve, on a somewhat reduced scale, on a similar ribbon. The record at the receiving station is accomplished by a pen known as Bradley's syphon pen, and is a close reproduction of the handwriting of the operator. The pencil is placed in a holder which is connected with two rods, one moving perpendicularly and the other horizontally. The end of each rod passes over an electric resistance arrangement, so that the current is reduced or increased according to its movement. This movement is thus reproduced at the other end of the wire, and corresponding rods are in this way made to move the pen. The pen at the receiving end has all the appearance of being guided by a spirit hand.

The King Vulture in South America.—The deference of the common vulture for their king is mentioned in many works on ornithology, but has been seen by few travelers. The experience of M. Ed. André, who is now making a scientific voyage at the expense of the French nation, is therefore quite worthy of mention. Walking one day in the environs of Cartago, he climbed a high hill to enjoy the fine prospect, and at that time this view included the carcass of a cow, which was covered with vultures who were rapidly tearing it to pieces in their voracious way. Suddenly there was a shrill cry; all ceased and turned their heads towards the sky where M. André observed a bird approaching under full flight. The great company of vultures quitted their feast and took up a post of observation on an adjacent hill. Soon the king vulture descended and began to commandine in true regal fashion. It was an hour before his appetite was appeased, and after this interval he sailed slowly away, and the eager crowd of hungry plebeians returned to their feast. The royal bird is larger and has certain white feathers to distinguish him from the common herd.

PERSONAL GOSSIP.

GENERAL GRANT has arrived at Hong Kong in good health.

THE Countess Florini Mazzanti, the celebrated Italian botanist, is dead.

THE Baroness Burdett Coutts lately gave $15,000 to the Metropolitan and City Police Orphanage in London.

THE CZAR no longer goes out without a military escort, and many high dignitaries who have been threatened also have escorts.

AFTER an illness of several months, Mrs. Sarah J. B. Hale, the popular author and editor, died at her home in Philadelphia on April 30th, at the age of 91.

GENERAL JAMES P. BROWNLOW, late a cavalry officer in the United States Army, and son of ex Senator Brownlow, died at his mother's residence in Knoxville, on April 26th.

PROFESSOR LEWIS SWIFT, of Rochester, N. Y., has been elected a Fellow of the Royal Astronomical Society of England, as a token of appreciation of his astronomical discoveries.

A DISPATCH from Berlin reports that the wife of Professor Botkin has been imprisoned in St. Petersburg on suspicion of Nihilism. The wife of the Chief Military Prosecutor has also been accused of Nihilism.

A SOMEWHAT prominent native of Japan, at Yokohama, Matsumoto Bunkicht by name, has been condemned to ten years' penal servitude for the offense of leading a room to Chinamen for the purpose of smoking opium therein.

COUNT HENRI DE GREFFULHE, a French life Senator, who died recently, was immensely rich, and famous alike for his generous charity and his liberal patronage of the turf. He was an Orleanist, and the Right loses one in the Senate.

DR. WEIDE, of Zurich, editor of the *New Gesellschaft*, was arrested a few days ago in Milan, on an accusation of engaging in a plot to assassinate the Queen of England and the King and Queen of Italy. His friends declare him incapable of such a design.

DON CARLOS and his wife have arrived at Rome, whence they will proceed to visit Archduchess Beatrice, his mother, and the Comte de Chambord. The Pope has consented personally to confirm the pretender's children, whom he has brought for that purpose to Rome.

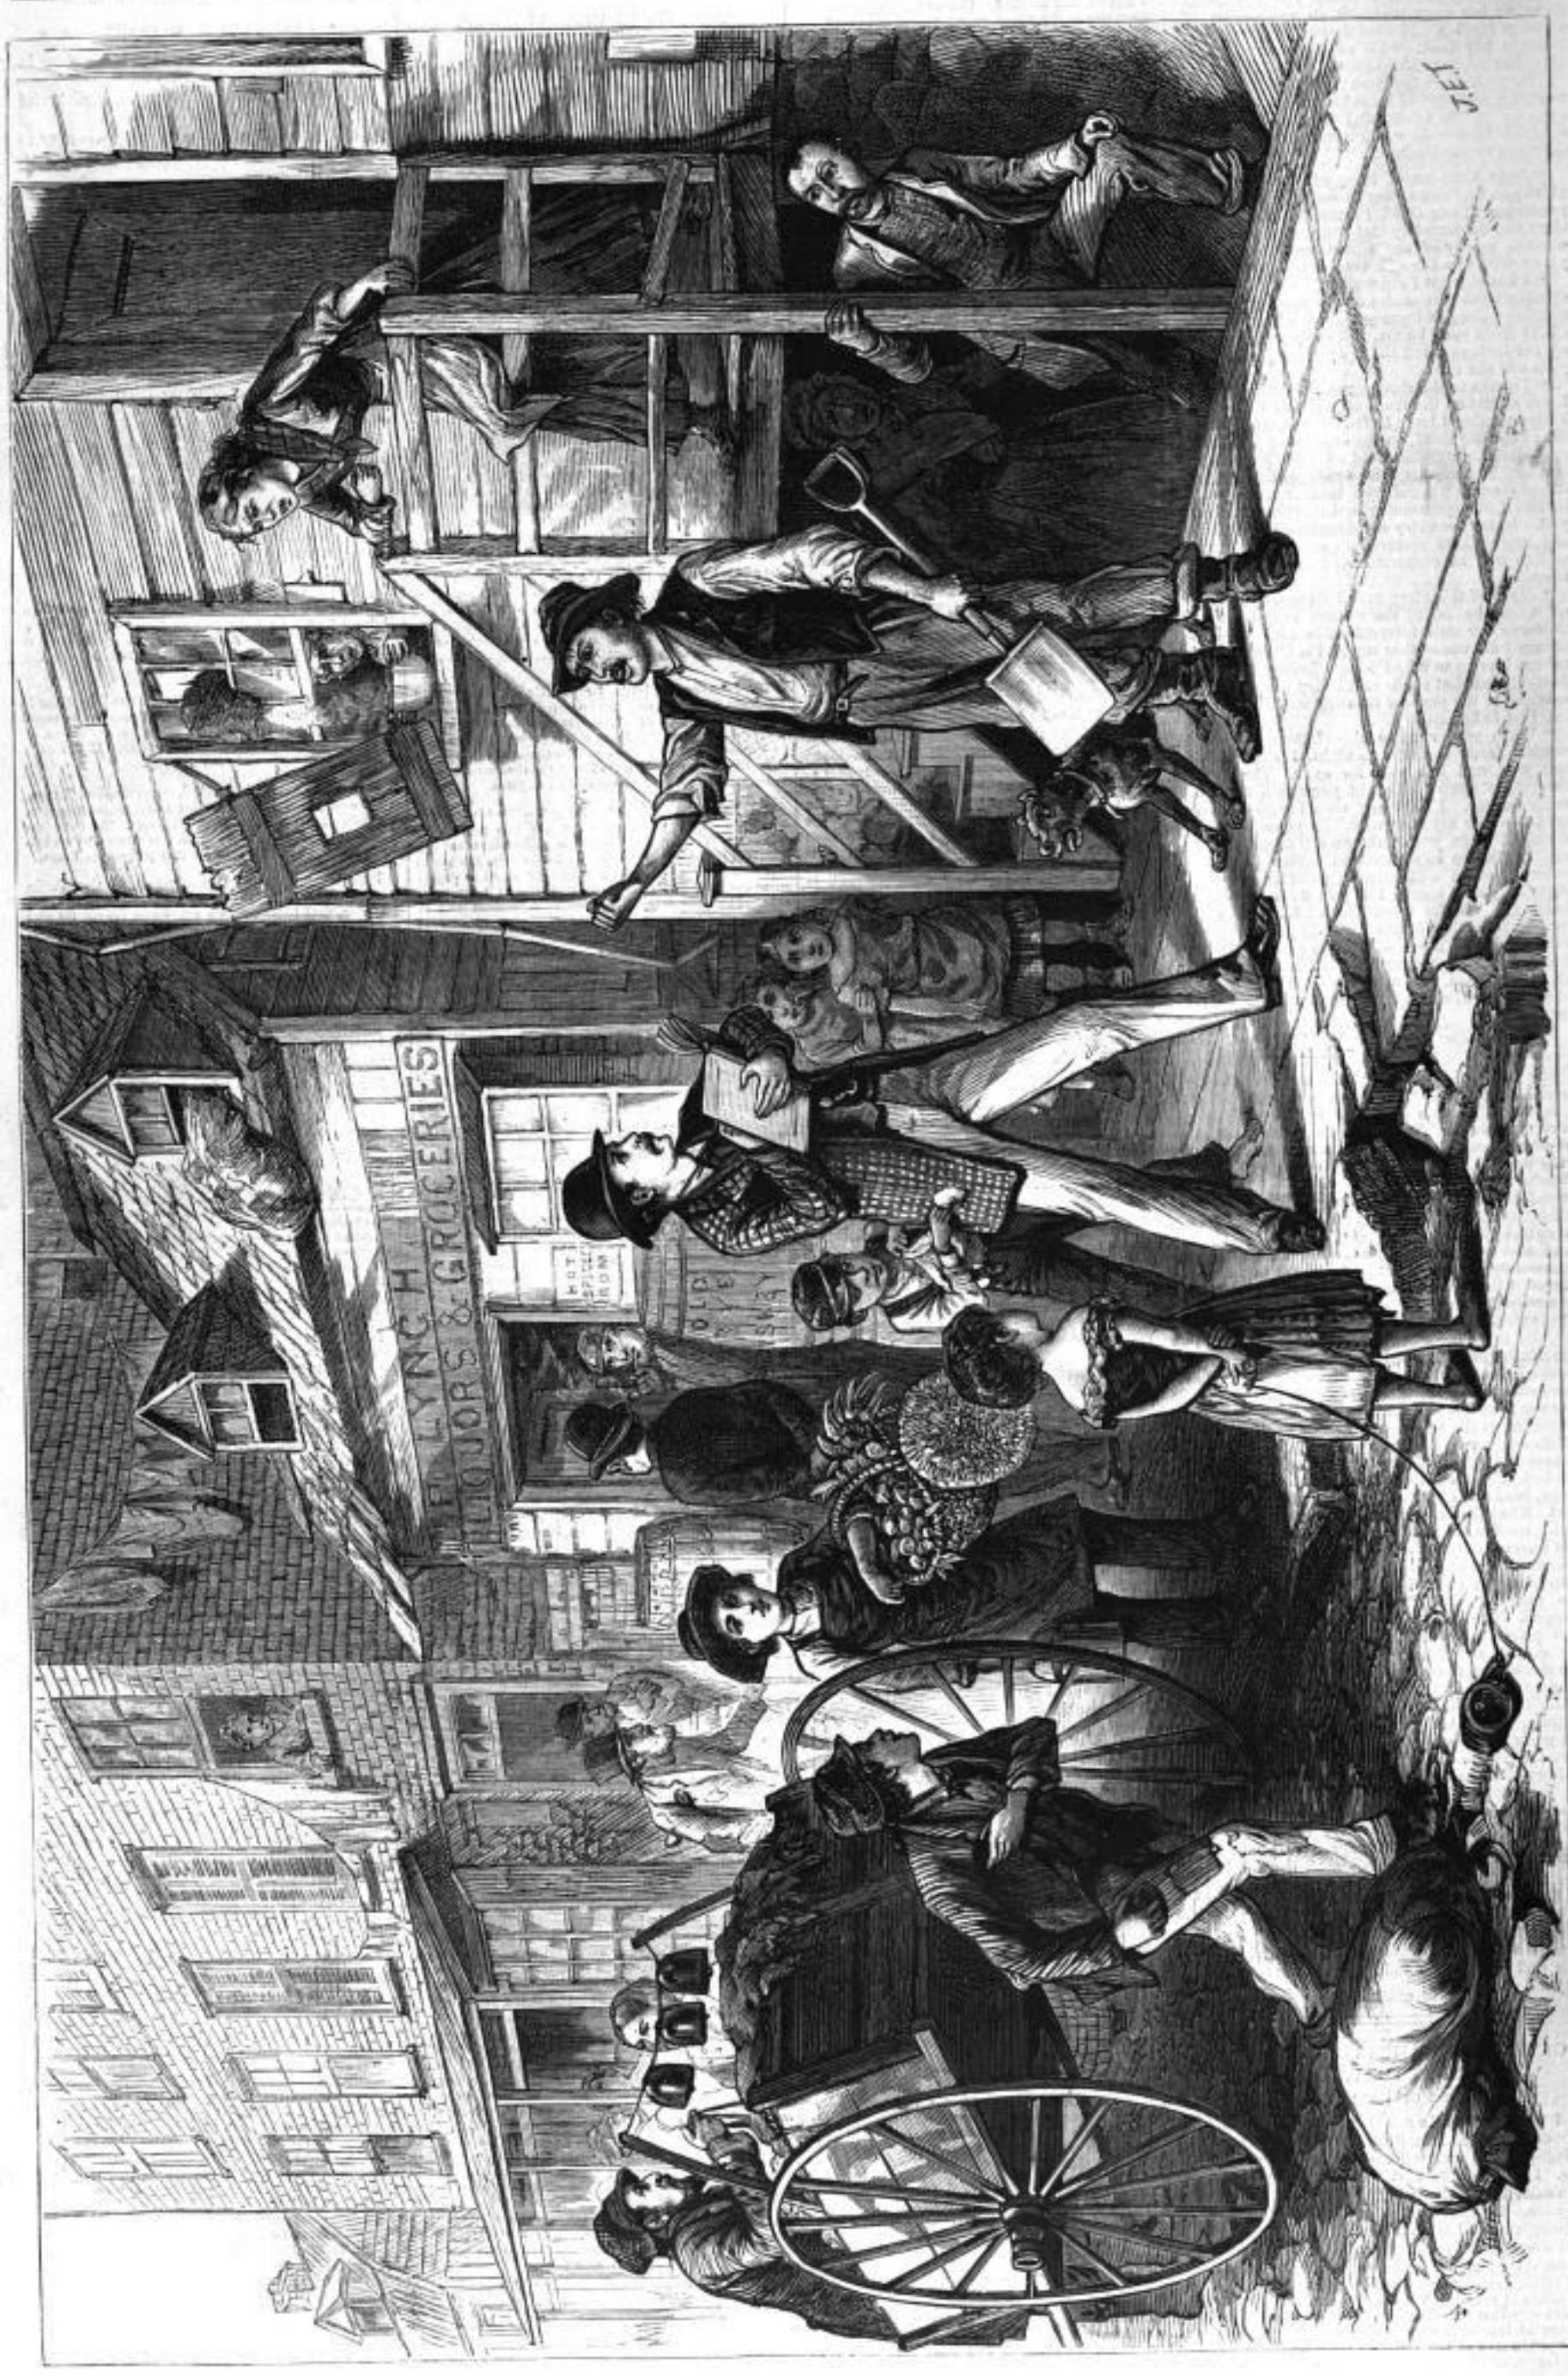
PROFESSOR ANDREA CRESTADORO, of the Turin University, and Chief Librarian of the Manchester Free Libraries, died lately in his seventy-first year. He was the author of various works on indexing and cataloguing, in which he introduced many valuable improvements.

GENERAL ALFRED T. SULLY died at Fort Vancouver, W. T., on April 26th. He was a native of Philadelphia and was the son of Thomas Sully, the famous portrait painter. Young Sully graduated at West Point in 1841, and served in the Florida war, the Mexican war and during the Rebellion.

SENATOR GORDON'S sheep ranche is at Ty-Ty Station, Ga. It comprises 40,000 acres of good land. The Senator's son, Hugh H. Gordon, is the manager of the ranche in his father's absence. He is an enthusiastic sheep farmer, and is just starting with a flock of 1,700. Seven miles of wall have been put up.

AT a meeting of priests and bishops held at the archiepiscopal residence in Cincinnati, the names of Father Spaulding of Peoria, Bishop Chatard of Vincennes and Father Quinn, vicar-general to the Cardinal Archbishop, were recommended to the Pope as coadjutor to Archbishop Purcell, with the right of succession at his death.

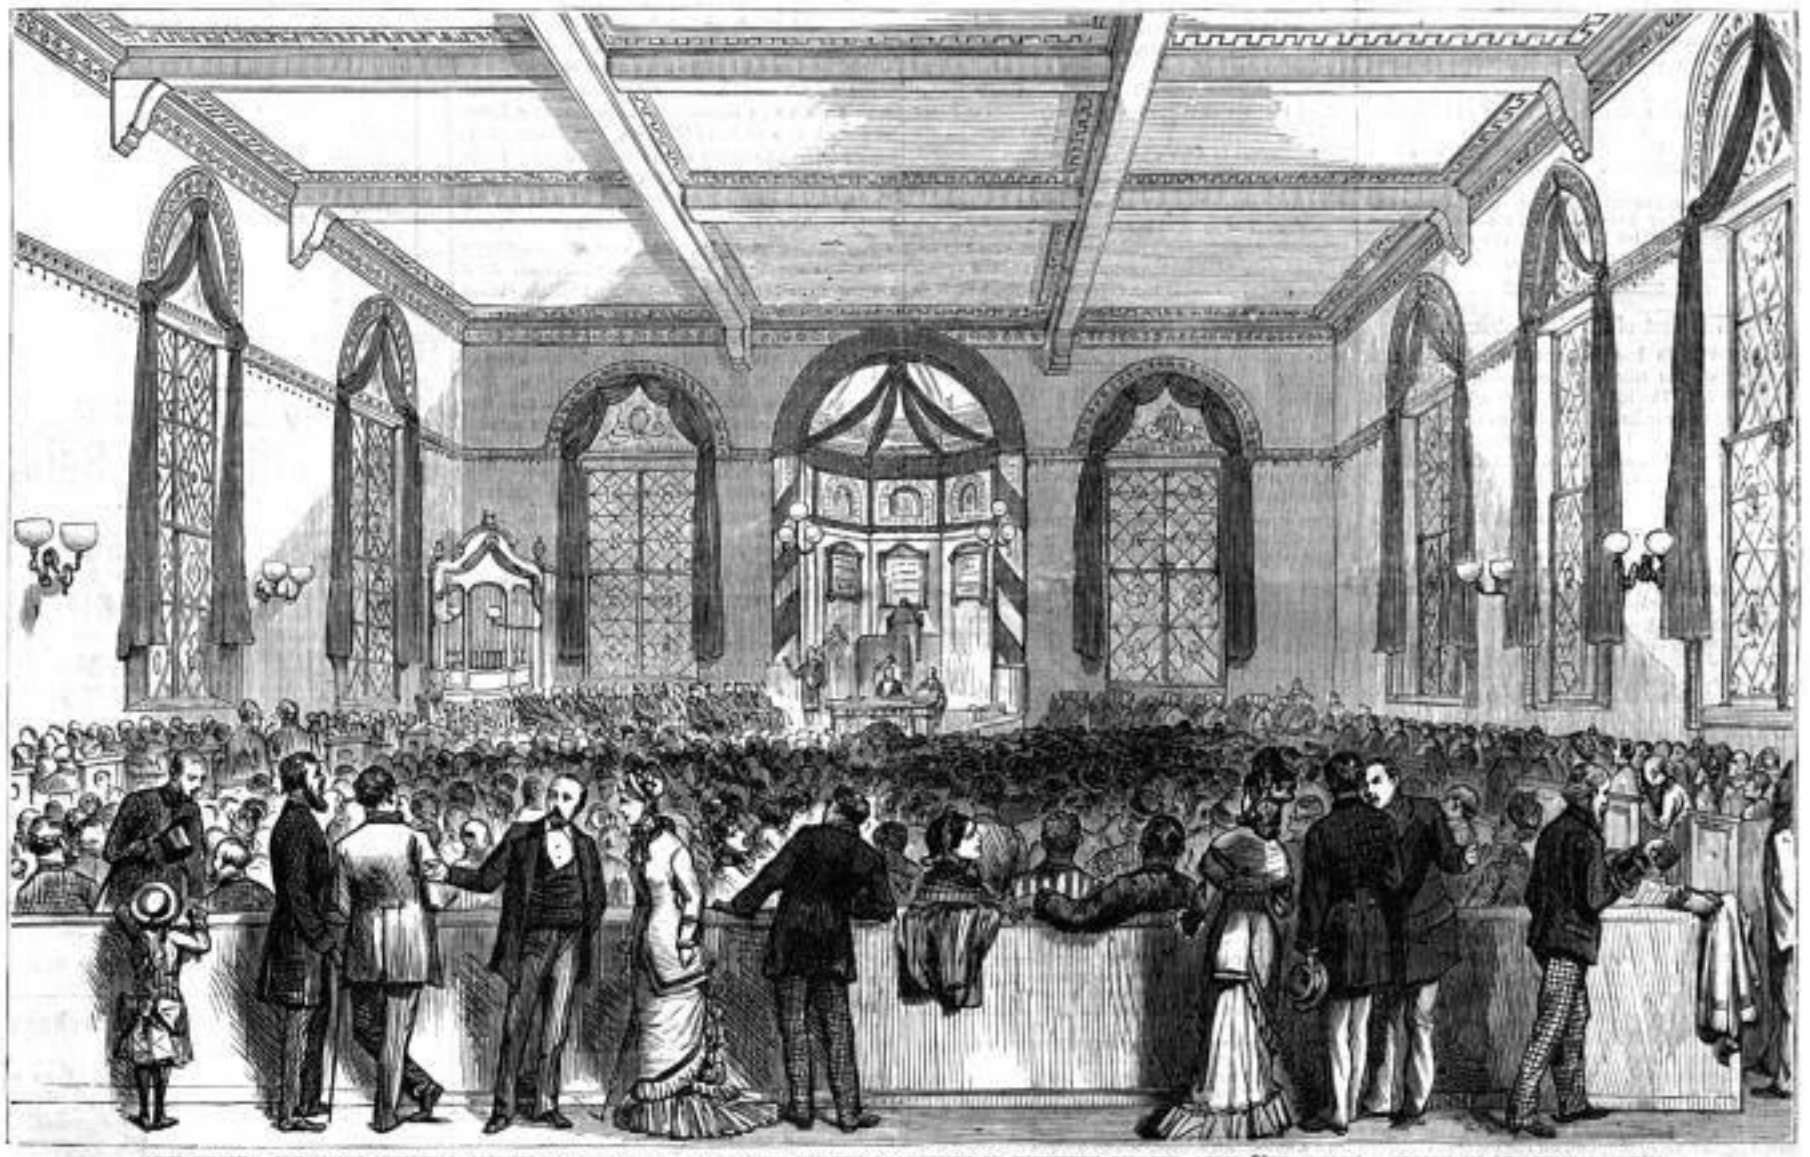
THE Emperor William will return to Berlin on the 8th of May. The Emperor of Russia will go to Berlin to attend the Emperor William's golden wedding direct from Livadia by the way of Warsaw. He will return to St. Petersburg on the 18th of June. He will pass the Summer at Peterhof, the imperial residence, and return to Livadia in the Autumn.



THE Princess Christina, the second daughter of the Duke of Montpensier, and an elder sister by eight years of the late Queen of Spain, died at Seville, April 23th. The Princess, who was born in 1832, has been lying at the point of death for some weeks past. Her death leaves only two of the children of the Duke of Montpensier living—Isabella, married to her cousin, the Count of Paris, and Antoine, a boy of thirteen.

CONGRESSMAN RUSH CLARK, of Iowa, died suddenly at his quarters in Washington April 28th, after an illness of only a few hours' duration, of congestive chill. He was born in Schellsburg, Pa., in 1834, was graduated at Jefferson College in 1853, and became a lawyer in Iowa City. He was a member of the Iowa Legislature for several terms, serving twice as Speaker of that body. His first term in Congress was as a member of the last House.

THE last official act of Sir George Bowen, ex-Governor of Victoria, Australia, previous to turning over the affairs of the Colony to his successor, the Marquis of Normanby, was the laying of the foundation stone of the International Exhibition Buildings in the Carlton Gardens, on the 19th of February last. This exhibition is to be held next year. Lady Bowen held her farewell reception at Government House on the 20th, when, among other souvenirs, she was presented with an elegant diamond tiara and a pearl-studded locket. She was very affected at parting with her host of friends. Sir George and Lady Bowen took their departure from Melbourne on the 22d.



THE Bulgarian Assembly of Notables unanimously elected Prince Alexander of Battenberg to the throne of Bulgaria, with the title of Alexander I., on April 29th. Prince Alexander, who is to rule the Bulgarians, is a Hessian. He is the second son of Prince Alexander of Hesse and the Countess Haucke, the daughter of a former Polish Minister of War. Their children, four sons and one daughter, are known as Princes and Princesses of Battenberg. Prince Alexander, the choice of the Bulgarians, was born April 5th, 1857. He received a military education, and at the outbreak of the Russo-Turkish War received permission from the Czar to join the staff of the Grand Duke Nicholas, commander-in-chief. He was one of the first to cross the Danube, and continued on active duty throughout the campaign. He took part in the defense of the Shipka Pass, the investment of Plevna, and the victorious advance on Constantinople. After the war he returned home to Darmstadt, and in a short time was transferred to the Prussian Garde du Corps, the Emperor William's body-guard. The Prince is likely to be regarded with favor by the reigning houses of Europe. His father, Prince Alexander, is on intimate terms with the sovereigns of Great Britain, Austro-Hungary and Russia. He is a general in both the Russian and Austrian armies, and has some reputation as a diplomatist. His aunt is Empress of Russia, and his cousin, Ludwig IV., Grand Duke of Hesse, was the husband of the late Princess Alice of England. Finally, he is an officer in the Prussian service, and as such must be more or less in sympathy with the imperial house of Germany.

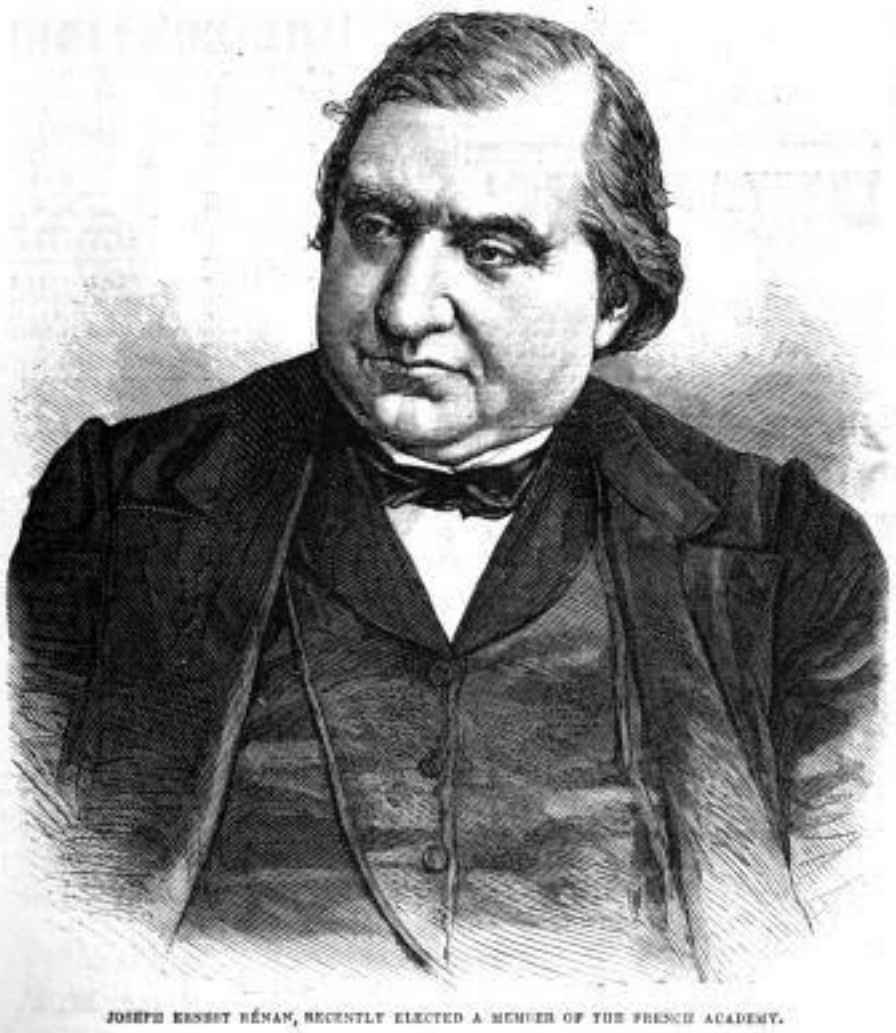
NEW YORK CITY.—AN INCIDENT OF SPRING-TIME.—A CANVASSER FOR A CITY DIRECTORY COLLECTING NAMES IN THE FOURTH WARD.—SEE PAGE 175.

Digitized by Google



NEW JERSEY.—UNVAILING MEMORIAL TABLETS TO THE MEMORY OF THE SIX PIONEER PROFESSORS OF PRINCETON COLLEGE, APRIL 29TH.—FROM A SKETCH BY OUR SPECIAL ARTIST.

M. RENAN.

JOSEPH ERNEST RÉNAN, who was received on April 3d last as a member of the French Academy—one of the forty immortals—was born at Trégnier, Côtes-du-Nord, February 27th, 1823. At the termination of his classical studies for the ecclesiastical profession, he was chosen to follow the course of theology at the Seminary of Saint-Sulpice, but, developing a marked taste for philological study and finding his independence of mind inconsistent with the qualifications necessary for the priesthood, he abandoned the seminary, and devoted himself exclusively to philology and literature. In 1845 his work on the study of Greek in the Middle Ages was crowned by the Institute of France. The Académie des Inscriptions et Belles-Letters sent him on a literary mission to Italy in 1849, and in 1851 he was attached to the manuscript department in the Bibliothèque Nationale. In 1856 he was elected a member of the Académie des Inscriptions. His appointment to the professorship of Hebrew in 1862 was followed by the publication of his famous "Life of Jesus," that so excited the bishops and clergy that he was dismissed from the position.

In June, 1878, he was elected a member of the French Academy to fill the seat of the late Claude Bernard, and in September of the same year he was selected as a delegate to the Congress of Orientalists held in Florence. M. Rénan has been a very prolific writer, and since 1860 has worn the decoration of the Legion of Honor.

JOSEPH ERNEST RÉNAN, RECENTLY ELECTED A MEMBER OF THE FRENCH ACADEMY.

UNVAILING MEMORIAL TABLETS AT PRINCETON COLLEGE.

THE Commencement of Princeton Theological Seminary, on April 29th, at which thirty-two new candidates for the ministry were graduated, was supplemented by the interesting ceremony of unvailing and dedicating memorial tablets to the memory of the six pioneer Professors of the institution. The occasion brought together a large number of distinguished clergymen from New York, Philadelphia, and neighboring cities. The tablets were erected in the seminary chapel, a brick building painted white, that has stood where it now stands for as many years, almost, as the memory of the oldest living clergyman can reach. The interior of the chapel is still in deep mourning for Professor Hodge, who died nearly a year ago, and the tablets were covered with black cloth. The centre one, which is nearly double the size of the others, is devoted entirely to the Alexander family, a name inseparable from the history of the Princeton Seminary. The dedications were as follows:

On the centre tablet:

ARCHIBALD ALEXANDER, D.D., Born April 17, 1772.
Elected Professor A.D. 1812.
Died Oct. 22, 1851.

JAMES WADDEL ALEXANDER, D.D., Born March 13, 1804.
Elected Professor A.D. 1840.
Resigned A.D. 1851.
Died July 31, 1859.

JOSEPH ADDISON ALEXANDER, D.D., Born April 24, 1809.
Elected Professor A.D. 1835.
Died Jan. 28, 1860.

On the left-hand tablet:

SAMUEL MILLER, D.D., Born Oct. 31, 1769.
Elected Professor A.D. 1813.
Died Jan. 7, 1850.

JOHN BRECKINRIDGE, D.D., Born July 4, 1797.
Elected Professor A.D. 1835.
Resigned A.D. 1838.
Died Aug. 4, 1841.

On the right-hand tablet:

CHARLES HODGE, D.D., LL.D., Born Dec. 28, 1797.
Elected Professor A.D. 1822.
Died June 19, 1878.

The panegyric on Archibald Alexander was delivered by Rev. William M. Paxton, D.D.; Rev. Theodore L. Cuyler gave a brief account of the life and public services of James Waddel Alexander, D.D.; the Rev. William C. Cattell, of Joseph Addison Alexander, D.D.; the Rev. J. J. Bullock, of John Breckinridge, D.D.; and the Rev. Henry A. Boardman, of Charles Hodge, D.D., LL.D. Dr. S. Irenæus Prime spoke very felicitously of Professor Samuel Miller. The occasion was one of profound interest to all in attendance.

The necrological report for the last year contains the names of forty-four graduates of the seminary who have died within that period.

INTERESTING MEDALS.

MESSRS. TIFFANY & CO. now have on exhibition a collection of seventy-two medals, which they have just completed on an order from a celebrated firm of English salt manufacturers, Messrs. Thomas Higgin & Co., of Cheshire and Liverpool.

These medals are to be presented to American dairymen, through the Agricultural Societies of the principal dairy States, and are designed primarily to attract the attention of American dairymen to an improved quality of salt, manufactured by Messrs. Higgin, and for the process of manufacture of which the English Government has

HIGGIN MEDAL FOR AMERICAN DAIRY PRODUCTS.

recently granted a patent. It is also thought that the general use of this salt will contribute greatly to improve the excellence of American dairy products, and to the health of consumers of salt

THOMAS HIGGIN, THE GREAT ENGLISH SALT MANUFACTURER.

Digitized by Google

generally, it being equally valuable for household purposes.

The medals are executed in the artistic style for which Messrs. Tiffany & Co. are noted. On one side is a farm scene, showing specimens of choice blooded stock, in connection with the words, "The Higgin Medal for the Improvement of American Dairy Products." On the reverse side are the words, "Presented by H. K. & F. B. Thurber & Co., New York, at the Fair," etc.

Twenty-four of the medals are of gold, twenty-four of silver and twenty-four of bronze—the intention being to offer them in sets of three medals for first, second and third best specimens of butter and cheese, made in the principal dairy States.

The Feet of Parisian Actresses.

A FUNNY squib has just got into circulation in Paris under the title of "Les Indiscrétions d'un Cordonnier." The indiscreet bootmaker, amongst other interesting indiscretions, makes us acquainted with the measures of the feet of several of the best-known *folles actrices de Paris*. The length of Parisian *chaussures* is reckoned by points, on the same system as gloves are measured. It is believed that the discovery has been made of the unity of a point for a lady's *bottine*, so that the following return of the exact dimensions of the length of a number of pedal ornaments very often seen on the Parisian stages may be looked upon as approximatively accurate. Zulmar Bouffar and Paola Marié, "point" 34, or 9¾ inches; Théo Montaland, Donvé, B. Méry, Prelly and Pierson, 35, or 9¼ inches; Thérésa, Judic, Peschard, Gabrielle, Gontaier, Desclausas, Parguel and Masson, 36, or 9⅝ inches; Granier and Léonide Leblanc, 37, or 9¾ inches, while Mlle. Rosine Bloch stands alone on the cordonnier's list on 38 points, or 9⅞ inches.

A Municipal Golgotha.

A NEW ORLEANS paper says: The Locust Grove cemeteries—numbers one and two—occupy two squares of ground in a comparatively thickly settled neighborhood. From these cemeteries there constantly arises an abominable stench which pervades the atmosphere, forces itself into the dwellings near at hand, and, in addition, attracts swarms of flies, which, after feasting in the graveyard, come into the sleeping and dining-rooms of the houses. These cemeteries are the burial-ground of several distinct classes of people; the dead from the parish prison are buried there, the dead from the boys' house of refuge, from the city insane asylum, from the home for the aged and infirm, from the small pox hospital, and from two or three institutions for the colored people; all the pauper dead of the city, all the dead buried by the two coroners, all the coroners' cases and indigent dead from Algiers, and all poor non-Catholic white and colored people whose friends cannot pay for a better place, are there rammed and jammed up together, until not an inch of the ground is unoccupied. Thus, it is seen, these two small graveyards are the only places of interment open to the dead of about 60,000 persons, among whom, for several causes, the mortality is great. Yet, although the two yards are filled to the very gates, the interments continue as rapidly as ever. To make room for the new corpses, the oldest denizens of this city of the dead must be dug up and used to assist in covering others in turn. It is calculated that, in eight or nine months at the furthest, both cemeteries are completely renewed. Accordingly, now the time has come for the resurrection of the victims of the late epidemic.

OUR PLACES OF AMUSEMENT.

A THEATRE organized in such a manner as to represent the interests of the dramatist equally with those of the manager bespeaks the rosy dawn of a new era in affairs theatrical. Mr. Steele Mackay has undertaken this task at the Madison Square, and bids fair to do his spiriting gently. He is thoroughly in accord with the atmosphere of æstheticism abroad under the material veil of the "best thing in the market"; and, while he will serve up a menu possessing in every sense a charm for the palate, will never introduce a dish tending in the slightest degree to cloy. Authors will cull the brightest and purest flowers from the gardens of their fancies at his behest, in the assured knowledge that their offerings will be placed in the hands of artists "thorough" in the best sense of the term—artists who go into art rejecting nothing, selecting nothing, scorning nothing. Why New York should not boast a home for the drama in every detail of management as perfect as the Français has been a matter of earnest comment, and it may not be too much to hope that under Mr. Steele Mackay's *régime* the bijou Madison Square Theatre may, in good time, go from bud to blossom, from blossom to flower, from flower to fruit. Already has Mr. Mackay fulfilled a promise, and fulfilled it well, in the production of "Won at Last," though he has not presented the piece as any indication of what he means to do in the near future. The public should sustain Mr. Mackay in an effort that is eventually certain to raise the standard of the drama and to bring honor to the country in the production of the conceptions of native genius.

"Patinitza" draws at the Fifth Avenue Theatre. It is a genuine operatic success.

At the Union Square "The Lost Children" will continue to be performed to the close of the season, May 17th.

The last three weeks of the "Black Crook" at Niblo's. Those who love spectacle at its best should visit Niblo's.

"Pinafore" at the Globe by a colored troupe! What next? "Pinafore" by prisoners taken by Lord Chelmsford at Rorke's Drift!

At Haverly's Lyceum Theatre the New York Children's Miniature Pinafore Opera Company is likely to prove a brilliant attraction, and should the piece prove a phenomenal success, it is not unlikely that the children may become too big for pinafores ere it is withdrawn.

Wallack's, despite the sweet, seraphic Spring-time, insists upon recalling us to Winter by "The Snowball." This comedy is bright, piquante, and acted à ravir. Mr. Coghlan is seen to considerable advantage in his new rôle. Lilliputian "Pinafore" matinées are announced.

Mlle. Aimée makes her *rentrée* in the *chic rôle* of "Le Petit Duc" at the Park Theatre. Her acting in the second act, when, disguised somewhat after the fashion of a bumboat-woman, she, as the *Little Duke*, enters the young ladies' academy, is just a bit of realization that should be witnessed in order to be appreciated. The kiss snatched through the picture-frame is Aimée to the finger tips.

"The Assommoir," as produced at the Olympic, needs certain radical alterations to render it even bearable. The subject is revolting, the details are revolting, and English veneer, however well laid on, can scarcely conceal the repulsiveness of the action of the piece. That it is a sermon is true, but it is preached in too Hogarthian a manner to suit the sensitiveness of the fag-end of the nineteenth century.

FUN.

HOW to acquire a short-hand—Feel around a buzz saw.

AND now we want to know at what college our thermometers are graduated.

THE circus is on the way, and the small boy and white-haired man are overjoyed.

NOW the ingenious youth whittles the handle of his snow-shovel into a baseball bat.

THE Canadians did not yell for "protection" until they learned that their new Governor-General Lorne wrote Spring poetry.

A LITTLE Hackensack boy, who was looking up at the stars the other evening, exclaimed, "Oh, mamma, mamma, who's a-pinchin' them stars?"

THOUGH the average small boy may steal away and eat a watermelon all by himself, he never refuses to divide his medicine with his little sister.

PHOTOGRAPHER—"You look sober; smile a little." He smiles, and the photographer says: "Not so much, sir; my instrument is too small to encompass the opening."

THE Congressional Committee on Weights and Measures, in giving the chairmanship to Alexander H. Stephens, showed that they knew enough in loading up their wagon to put the lightest weight at the top.

A LITTLE Connecticut girl said her prayers as usual, but happening to remember that there was another girl of the same name in town, added her own street and number, so that no mistake should be made.

WHEN a young smoker, who boasted that his father used the weed up to the day of his death, was asked if he didn't think it shortened his days, he replied, "Not at all. Each one of his days was twenty-four hours long, just the same as if he had not used tobacco."

IN a suburban school, where an examination was conducted on the basis of general intelligence rather than book lessons, the question was asked for what was Prince Bismarck best known, when the ubiquitous "small boy" vehemently declared, "For keeping a big black dog!"

SONG OF THE TRAMP.

"HERE,
With my beer,
I sit,
While the golden moments flit.
Alas!
They pass
Unheeded by,
And as they fly,
I, being dry,
Sit idly sipping here—
My beer."

MR. T. B. REID'S portrait group of Mr. Longfellow's daughter, it will be remembered, was so arranged that the arms of one of the young girls were concealed by those of her sisters, and this gave rise to an absurd story that she had no arms at all. Mr. Longfellow relates that his friend Lowell, while riding past his house one day, heard a lady informing friends in the car that "Longfellow's second daughter had no arms." He at once said, "I beg your pardon, madam, but I am well acquainted with the family and know that such is not the case." "Beg your pardon, sir," said the lady, loftily, "but I live in Boston, and have it on the best authority."

A GENTLEMAN, passing a couple of youngsters who were sitting on a doorstep with slates on their laps, overheard in their colloquy a strange bit of rhetoric brought to bear on the problem: "Take two from one and one remains." The gentleman, not having thoroughly understood the argument, yet convinced of its fallacy, offered something short of a shilling to him who could prove, either rhetorically or mathematically, the solubility of the problem; whereupon they offered him ocular demonstration, and led him through to their mother, who sat in the kitchen with her twins in her arms. Having each deprived her of an infant, they pointed to her who remained to prove that "If you take two from one, one remains!"

CAUGHT AT LAST.

THE notorious depredator Kate-Arrh, who has for so many years eluded the most accomplished and skilful detectives, has been caught at last in Buffalo, N. Y. For further particulars, ask your druggist for a bottle of Dr. Sage's Catarrh Remedy, admitted to be the best remedy for catarrh yet compounded.

RHEUMATISM comes from inactive kidneys. Hop Bitters never fails to cure it. Read advertisement.

THE VERDICT OF HALF THE WORLD.—The entire western hemisphere pronounce Murray & Lanman's FLORIDA WATER the most delicious perfume for the boudoir, the ballroom and the bath, that chemistry has yet succeeded in extracting from living flowers.

THE old patron Dutch saint never had a more stinking honor than in giving name to the St. Nicholas hotel of New York. Still in the van, this hotel unites all the best features of the present with the charming traditions of the past. The reduction of prices in connection with the excellence of accommodations makes it the cheapest hotel in the country.

THAT indigestion or stomach gas at night, preventing rest and sleep, will disappear by using Hop Bitters.

H. W. JOHNS' ASBESTOS ROOF PAINT forms the most durable and economical protective coating in the world for tin roofs, exposed brick walls, iron work, barns, fences, etc., for which it is in every respect equal to the best white lead, while it costs only half as much. It is made in a variety of beautiful colors, samples of which will be sent on application to 87 Maiden Lane, N. Y.

PURE FRUIT SYRUPS.

During the last few years we have noticed a large and increasing demand for Fruit Syrups, with which a refreshing drink could be prepared at short notice. American fruits are proverbial for fine flavor, but the flavors of many brands of syrup heretofore manufactured have been produced by essences and ethers, which are far inferior to the flavors obtained direct from the fruits. Having last season made an arrangement for a full supply of juices, we are now in a position to offer syrups of a very superior quality, prepared in our own laboratory from these and the best steam-refined white sugar. They are put up in full-sized honest-bottomed bottles, each of which has our name blown in the glass, and bears a handsome label, the general style being very attractive, while the intrinsic merit of the syrups insures a permanent demand from the consumers. Our syrups will keep in any climate, and dealers only need try them to be convinced that they are the most attractive and saleable goods which they can put on their shelves.

We pack these Syrups in cases of one dozen each, Quarts or Pints as desired, assorted flavors, as follows:

Assortment No. 1 contains		Assortment No. 2 contains	
3	Bottles Raspberry,	1	Bottle Blackberry,
2	" Strawberry,	1	" Grape,
1	" Pineapple,	1	" Sarsaparilla,
3	" Lemon,	1	" Orange,
2	" Vanilla,	1	" Orgeat,
1	" Ginger.	1	" Sherbet,
		1	" Raspberry,
		1	" Strawberry,
		1	" Pineapple,
		1	" Lemon,
		1	" Vanilla,
		1	" Ginger.

Consumers who are particular about the quality of the Fruit Syrups they use will do well to note the variety of flavors we offer, and get a sample bottle from any first-class retail grocer. Be sure and ask for Thurber's Syrup.

H. K. & F. B. THURBER & CO., Mfrs., New York.

Blair's Pills.—Great English Remedy for Gout and Rheumatism. All Druggists have them.

Stuttering cured by BATES'S APPLIANCES. Send for description to BATES & Co., Box 2,236, New York.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the Civil Service Gazette.

Sold only in soldered tins, labeled,

JOHN HOLLAND'S Patent Record GOLD PEN
Patented Oct. 9, 1877.

Is the highest achievement in the manufacture of Gold Pens and the result of experiments for more than twenty years. The "RECORD" Pen is produced by a skillful combination of the two precious and non-corrosive metals: *14 kr. Gold* and *Platinum*, while the ordinary gold pen contains an alloy of copper, reducing its fineness without yielding that elasticity, density and steel like temper which the costly *Platinum* supplies. The "RECORD" Gold Pen *Points* are of the best *Iridium*. (Diamonds,) indestructible with fair treatment, and polished to glass like smoothness.

Steel pen writers have now every objection to gold fairly overcome, and every requirement in a Pen which will endure and not oxidize, squarely met. The "RECORD" Gold Pen is guaranteed to possess Durability, Permanency of Spring and Perfection of Point. Price, $2.50, sold by all Jewelers and Stationers in the United States. If not found order direct from *JOHN HOLLAND, Manufacturer, 19 W. 4th St., Cincinnati.*

FOR TEN DOLLARS CASH

We will insert a seven-line advertisement one week in a list of 289 weekly newspapers, or four lines in a different list of 337 papers, or ten lines two weeks in a choice of either of four separate and distinct lists containing from 20 to 100 papers each, or four lines one week in all four of the small lists, or one line one week in all six lists combined, being more than 1,000 papers. We also have lists of papers by States throughout the United States and Canada. Send 10 cents for our 100-page pamphlet. Address GEORGE P. ROWELL & CO., Newspaper Advertising Bureau, No. 10 Spruce Street, New York.

Frank Leslie's
CHIMNEY CORNER.

The Most Popular Illustrated Family Paper.

The SUCCESSFUL RIVAL of ALL THE WEEKLIES for THIRTEEN YEARS past.

The CHIMNEY CORNER presents a constant succession of brilliant attractions.

The Best Writers in the country contribute to its columns; and new serial stories of the most absorbing interest, of great power, true to life, and embracing a wide range of subjects, are constantly appearing.

The Continued Novels are by such eminent writers as John Habberton, author of "Helen's Babies"; N. Robinson, author of "That Mother-in-Law of Mine"; Etta W. Pierce, Christian Reid, Meta Victoria Victor, M. T. Calder, Frank Lee Benedict, J. W. De Forest, and others equally celebrated.

Short Stories are completed in each number; and the miscellaneous contents embrace Biographies, Adventures, Essays, Travels, Curiosities of Foreign Life, Marvels in Nature and Art, Legends, Anecdotes, Poetry, etc.

Beautiful Steel Engravings are frequently presented to the subscribers, far exceeding in value the price of a year's subscription.

Published every Monday, and for sale by all newsdealers, price 10 cents. Annual subscription, $4. Three months, $1. Sent postpaid.

FRANK LESLIE'S PUBLISHING HOUSE,
53, 55 & 57 Park Place, New York.

CERTIFICATE AS TO
Bond for Payment of Prizes.

By the conditions of this Act the managers were required to execute TO THE STATE OF KENTUCKY A BOND IN THE SUM OF ONE HUNDRED THOUSAND DOLLARS, conditioned for the prompt payment of all prizes, and the faithful discharge of all duties imposed by said Act, as soon by the certificate of the County Clerk, as below stated.

SUMMONS & DICKINSON, Managers.

STATE OF KENTUCKY, Henry County, } ss.
CITY OF NEWCASTLE,

I, W. W. Turner, Clerk of the County Court in and for said County and State, do hereby certify that the bond to the Commonwealth of Kentucky in the penal sum of one hundred thousand dollars, required to be filed by the Act for the benefit of the Henry Male Academy and Henry Female College, passed by the General Assembly of said Commonwealth, and approved December 9th, 1850, was duly executed, delivered, accepted and approved, and that said bond is duly filed in my office as Clerk of said Court.

Witness my official signature and seal of office at Newcastle, Henry County, Ky., this 25th day of March, A.D. 1879.

(Seal) W. W. TURNER,
County Clerk,
Henry County, Ky.

Frank Leslie's
SUNDAY MAGAZINE
For JUNE.
REV. CHARLES FORCE DEEMS, D.D., LL.D., Editor.

THE CHEAPEST SUNDAY MAGAZINE IN EXISTENCE.

"FRANK LESLIE'S SUNDAY MAGAZINE is a welcome addition to the list of our religious periodicals, and is well worthy a place in all families. . . . . The subscription price is only $3 per annum, which is almost unsurpassed for cheapness."—*Christian Statesman (Minneapolis).*

"We have before expressed our hearty appreciation of the SUNDAY MAGAZINE, edited by Dr. Deems; and every number which we receive bears fresh testimony to its excellence. It contains a very large amount and variety of reading matter, and abounds in illustrations. This magazine will be found in great demand in the family, and not less among the younger members than the elder."—*Boston Congregationalist.*

"FRANK LESLIE'S SUNDAY MAGAZINE for MAY deserves all the encomiums pronounced upon its predecessors, with the additional remark that wherein it differs from them it is in the sense of being still nearer the mark of perfection. Profusely and elegantly illustrated, printed on fine paper, and containing the choicest matter from all available sources, it offers to the reader an investment extraordinary for his three dollars, which is the low subscription price for a year."—*Central Protestant (Greensboro, N. C.)*

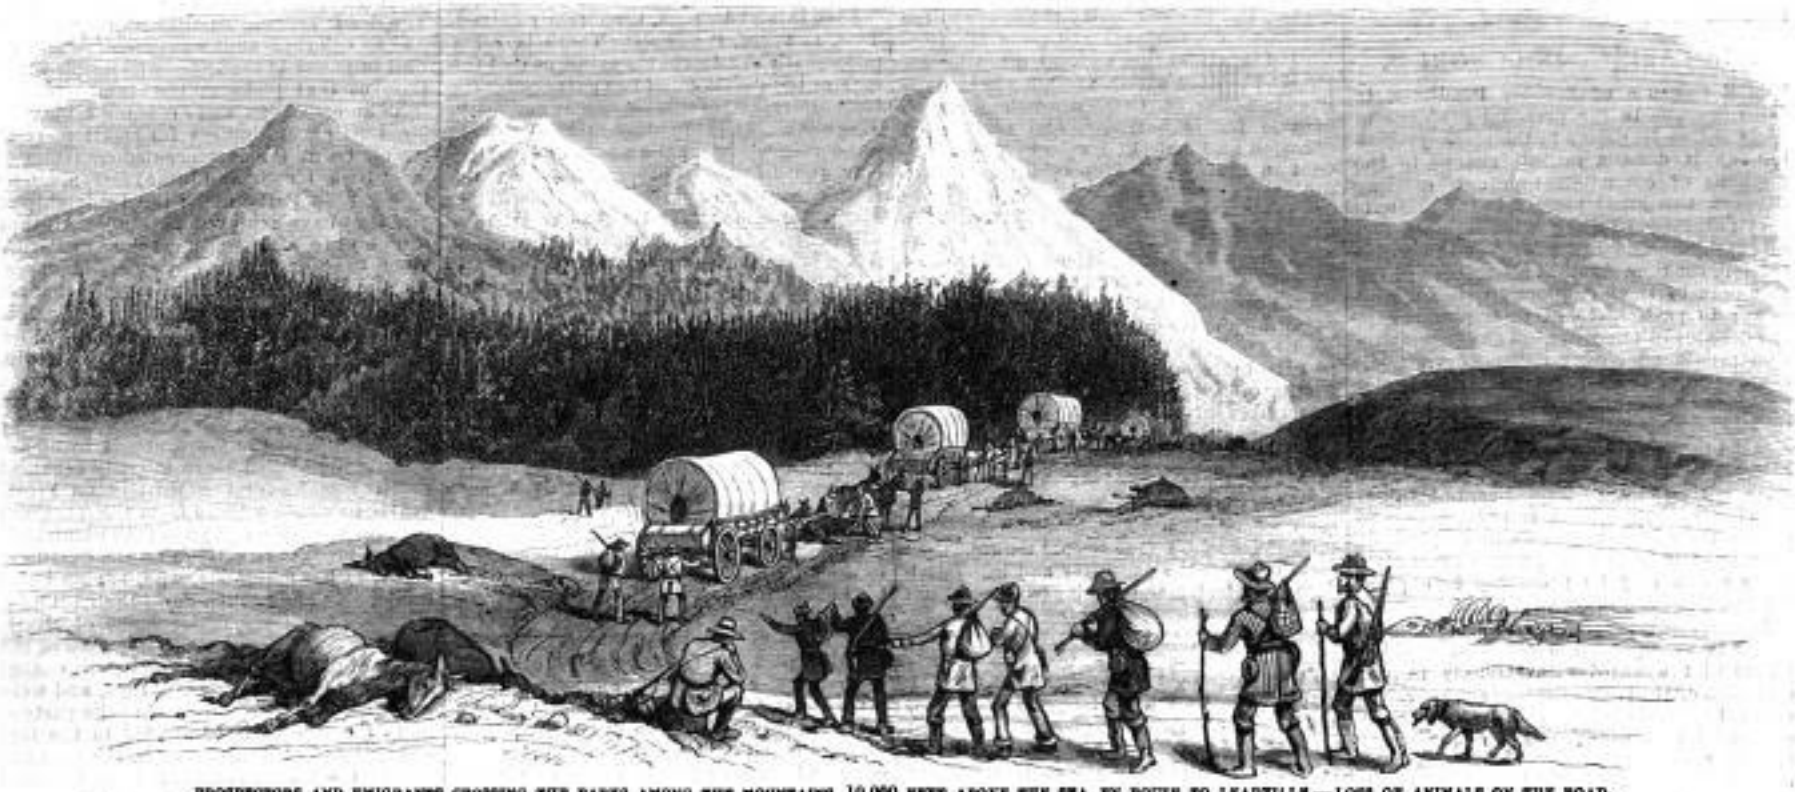
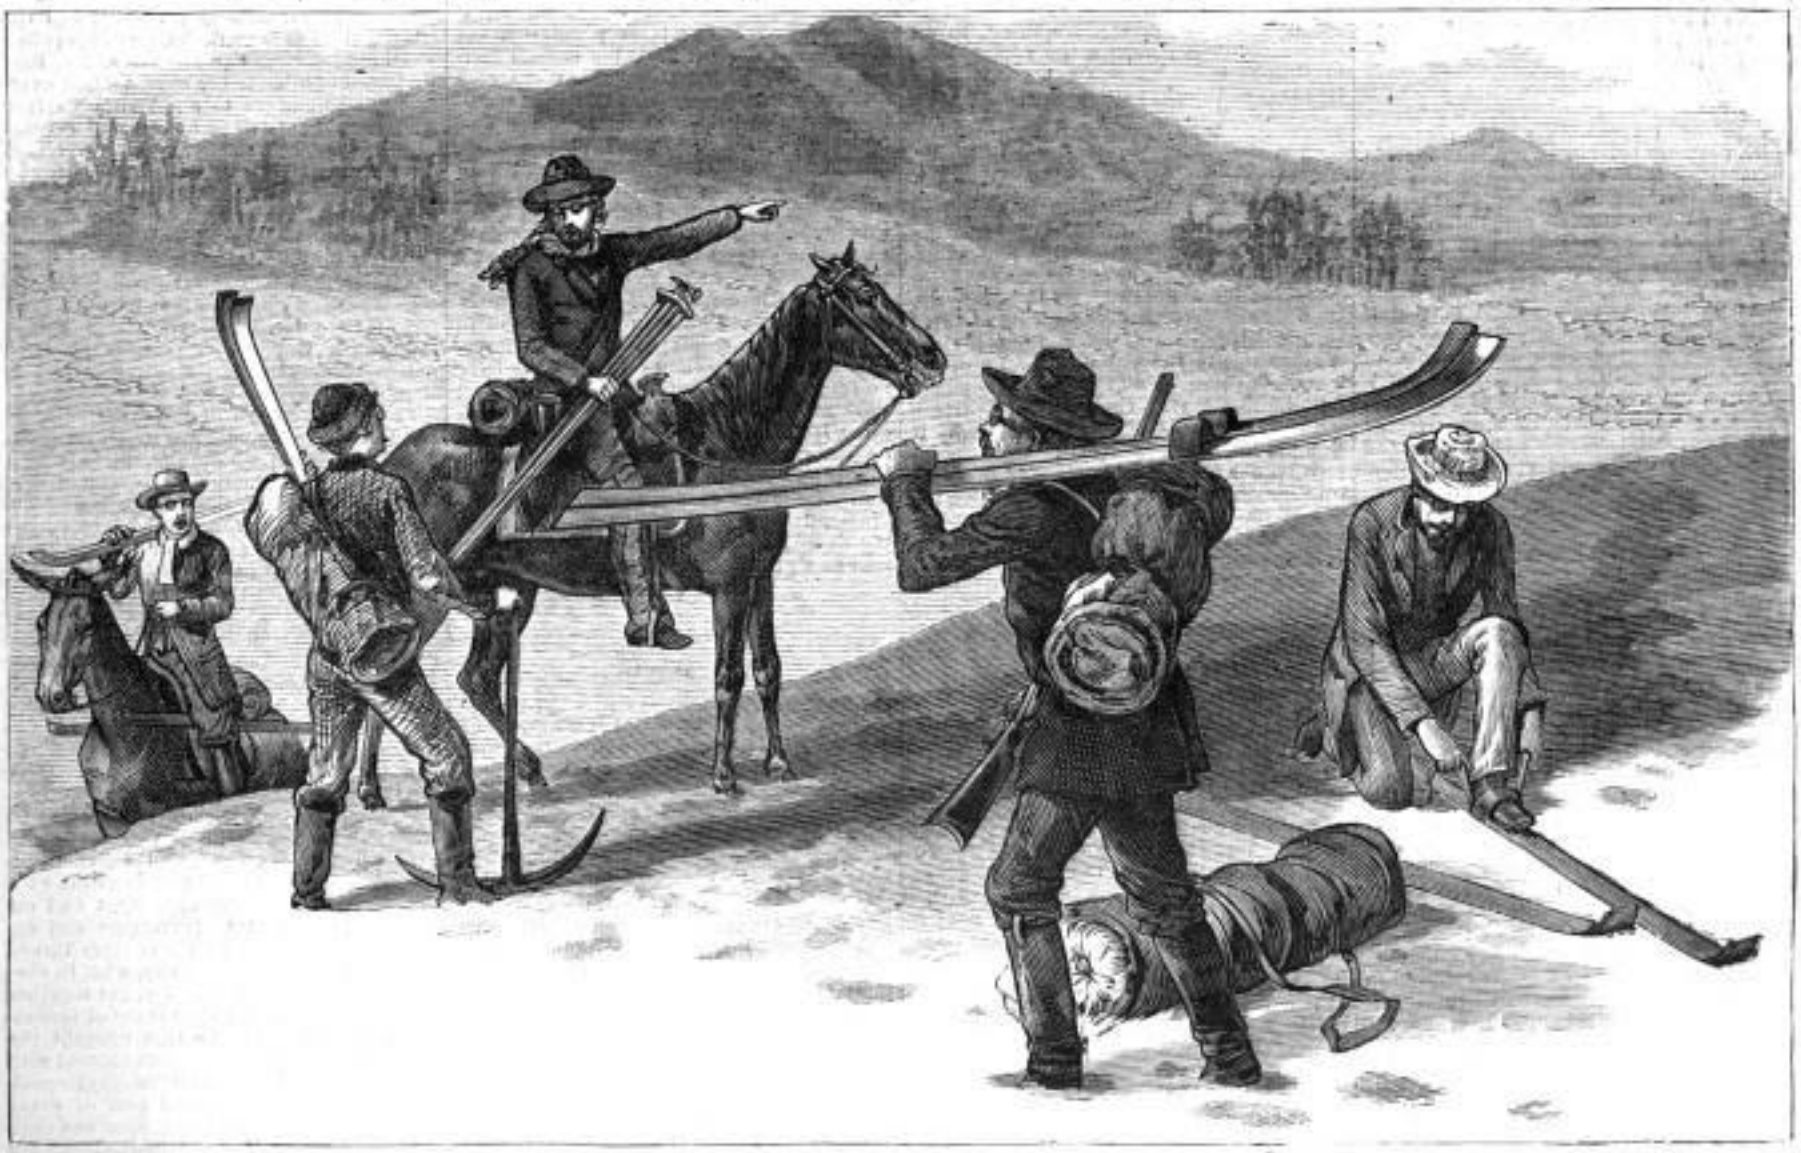
ILLUSTRATED
NEWSPAPER



Entered according to the Act of Congress, in the year 1879, by FRANK LESLIE, in the Office of the Librarian of Congress at Washington.

No. 1,234—Vol. XLVIII.] NEW YORK, MAY 24, 1879. [Price 10 Cents. $4.00 Yearly; 13 Weeks $1.00.



NEW ROCKY MOUNTAIN MINES.

THE thirst of gold is still being slaked at the flowing mines of Leadville. Thousands and tens of thousands eagerly press onwards, parched by the hot breath of the lust of gain. The discovery of every new lode causes the blood to leap, while the stories of fabulous wealth achieved by a single stroke of pick or shovel set the soul aflame. Hope springing eternal in the human breast is bright as the white radiance of eternity, and gold is King—Emperor—God! Across the broad prairies, the track marked by white and bleaching skeletons, through the silent valleys, over flowing rivers, up precipitous mountains, con e the wagons of the madly anxious miners—all pressing forward to drink of the Pierian Spring. Every moment's delay may cost a million.—

(Continued on page 166.)

PROSPECTORS AND EMIGRANTS CROSSING THE PARKS AMONG THE MOUNTAINS, 10,000 FEET ABOVE THE SEA, EN ROUTE TO LEADVILLE—LOSS OF ANIMALS ON THE ROAD.

FRANK LESLIE'S
ILLUSTRATED NEWSPAPER,
53, 55 & 57 PARK PLACE, NEW YORK.
FRANK LESLIE, EDITOR AND PUBLISHER.

NEW YORK, MAY 24, 1879.

"FRANK LESLIE, JR."

A notice having appeared in print that a person assuming the name of "Frank Leslie, Jr.," participated in certain private theatricals at the Union League Theatre, on the night of Saturday, May 3d, it is proper to say that I have but two sons, named respectively Henry Leslie and Alfred Leslie, and that I have never authorized any person whatever to assume or bear the name of "Frank Leslie, Jr."

FRANK LESLIE.

THE CABINET IN CONGRESS.

THE measure of Senator Pendleton in reference to the personal presence of Cabinet Ministers in Congress, proposing, as it does, a radical change in the methods of communication now existing between two great powers in the State, is very naturally eliciting wide interest and discussion. The Bill provides, in its first section, for the voluntary attendance of the members of the President's Cabinet, with power to participate, at their pleasure, in the debates of Congress. The second section provides for their compulsory attendance in order to give information on topics of which they shall have been duly notified by an entry made in the "notice book" of either branch of Congress. No question of this kind is to be called up until after three days' notice to the Secretaries, and in answering such questions it is forbidden to debate the matter that may be in hand, or even to state facts and opinions other than those which may be necessary to explain the answer.

It is not to be denied that the current of usage in nearly all the civilized Governments of the world sets strongly in the direction of the parliamentary change advocated by Mr. Pendleton. The custom is supported by the practice of empires like Germany and Austria; of constitutional monarchies like England and Holland, Denmark and Sweden, Spain and Belgium, Italy and Brazil; and, we may add, of republics like France and Switzerland, of Mexico and the other Hispano-American States. It may seem, too, as Judge Story argues in his commentaries on the Constitution of the United States, that the "open and public responsibility for measures which properly belongs to the Executive in all Governments, and especially in a republican Government, as its greatest security and strength, is completely done away" by our present practice in the premises. It may be admitted, besides, as Judge Story further argues, that "one other reason in favor of such a right is, that it would compel the Executive to make appointments for the high departments of Government, not from personal and party favorites, but from statesmen of high public character, talent, experience and devoted services—from statesmen who had earned public favor and could command public confidence"; while at present "gross incapacity may be concealed under official forms, and ignorance silently escape by shifting the labors upon more intelligent subordinates in office."

And that the present usage is not inherent in the organism of our Federal polity, but is simply the creature of "customary law," would seem inferable from the fact that in the early days of the Government it was not an uncommon occurrence that Secretaries should be called to appear in the presence of the Senate, not only for the purpose of "giving information," but of sharing in the deliberations of that body on topics of executive business. Much stress is also laid by Mr. Pendleton on the fact that by the Act of 1789, organizing the Treasury Department, it is provided that the Secretary "may make report and give information to either branch of the Legislature *in person* or in writing, as may be required, respecting all matters referred to him by the Senate or House of Representatives, or which shall appertain to his office."

And yet, after frankly conceding all due weight to the theoretical considerations which argue in favor of the proposed modification, and after giving due place to the precedents, few and partial, which may be found for it in the early history of the country, we are none the less confronted by the stubborn fact that the almost unbroken usage of our Government has settled the official intercourse between the legislative and the executive departments on its present foundation. The very weight of the considerations adduced by Mr. Pendleton, and the force of the early precedents which he cites, would rather seem to suggest that there must be powerful countervailing arguments in favor of a contrary practice which has been established by the method of "natural selection," and which has been confirmed by the experience of the country. And the secret of the "natural selection" which has established, and of the experience which has confirmed, the existing custom, is not far to seek. It results from the very theory of our executive administration. In countries where the ministry participate in the deliberations of the national legislature it will be found that the members of the ministry are either integral parts of the legislature before the date of their appointment, or are appointed by the Executive to serve as recognized mediators between the executive and legislative departments of the Government. In the first case, their right to participate in parliamentary discussions results from their legislative rather than their ministerial functions. In the second case, the right is a necessary incident of the mediatorial office which they hold between the two powers of the State. But in our country the heads of the executive departments are mere administrative functionaries, appointed to transact public business within certain spheres defined by Congress. Created for the dispatch of this public business, and serving on occasion as hands and eyes to the President in the performance of his executive duties, they are in no sense integral parts of Congress, and in no sense intermediaries appointed to conciliate a difference of opinion and policy between the legislative and executive branches of the Government. They are simple business agents, required, as such, to give information to Congress for its guidance in legislative matters, and to give their opinions to the President in writing or by word of mouth, for his guidance in matters of administration. Participation in public debate on the floor of Congress would rather embarrass than facilitate the performance of their specific duties. It would, in a measure, change their duties without changing the theory of their office or the mode of its tenure. Conflicts between the executive and legislative departments, instead of being pacified, would be intensified, by making the Secretaries a party to them, and by providing a public arena for the combat. Conflicts of this kind are appeased, according to the theory of our Constitution, by frequent elections, and not by compromises of opinion effected through the mediation of Cabinet officers. It may be that our particular policy under this head is not the wisest that could be devised by the wit of man, but that our present practice is in conformity with that policy will be apparent, we think, to all who attentively consider the comparative conditions under which the contrary practice is seen to originate in other countries.

SOME NEW YORK NECESSITIES.

NEW YORK is destined to be the great city of the future—the grand emporium of the world's commerce and enterprise. Already, in some of its external features—in its almost unrivaled Broadway, its wide and extended avenues, its elevated railroads, its Central Park, its churches, its theatres, in the palatial homes of its merchant princes, and in some of its public buildings—it may challenge comparison with any city, at least, on this continent. It is, however, as yet far from perfect. In our streets, our tenement-houses, and in many other features which immediately catch the eye of the stranger, we are really far behind; at all events, there is much of which we have reason to be ashamed. Our water-front, which is the most prominent feature of the city, and which ought to be one of its greatest ornaments, is really a disfigurement and a disgrace. We are not forgetful of the fact that in this direction real, solid improvement is being made, and that the present Commissioners of the Dock Department are gradually giving us specimens of work which may be regarded as foretastes of even better things yet to come. But we write of things generally as they are; and while we admit that there are signs of improvement along our water-front, it must also be conceded that the face which we first present to the stranger is as yet far from attractive—far, indeed, from what it ought to be.

All the matters here referred to are undoubtedly of the very highest importance. It is not, therefore, because we in any way underestimate them that we desire to lay special stress upon another great necessity of the rapidly-growing city. Improved dwellings for the poorer classes, better ordered streets, a beautiful water-front—all these are necessities. But in addition to these, if not above and beyond these, New York, to be worthy of herself, and to be prepared for the great future which is in store for her, must have a larger and more rapidly increasing number of parks and squares—breathing-places for the general community. In this particular this city never had much cause for boasting. It was in many respects better off, in this regard, in the olden time, when the entire city lay to the south of Canal Street, than it is to-day. Central Park, of course, was unknown; but there were the open grounds at the Battery, Bowling Green, City Hall Park, St. John's Park and other close spaces no longer visible. With the growth of the city we have acquired new parks and squares, but not by any means in the proportion needed; and it is a singular and somewhat deplorable fact that, in proportion as the city has extended to the north, a spirit of vandalism has been let loose on the people's property in the lower wards. It is impossible, on any just principle, to justify the policy which robbed the city of St. John's Park, which ruthlessly encroached on that of the City Hall, and which recently, but happily in vain, sought to take from the people and to convert to business purposes the beautiful and health-giving grounds at Washington Park. It is really matter for gratulation that this last movement was successfully thwarted; and it may now, we think, be taken for granted that not for some time to come will there be any further attempts at spoliation.

Something has thus been really gained. This, however, is not all. There is other and equally unmistakable evidence that the tone of the public mind has changed for the better in regard to this particular necessity. There is a noticeable disposition to provide more adequately for the wants of the present, and to make preparations for the future. Three new parks—Riverside Drive, Morningside Park and East Side Park—will soon be added to those already existing. When these are completed, they will prove an ornament as well as a source of health to the city. The different parks and squares, including these just mentioned, with those of the Battery, City Hall, Stuyvesant, Tompkins, Washington, Union, Madison, Reservoir, Central, Manhattan, Mount Morris, High Bridge, will then cover a total area of one thousand one hundred acres. It is, it must be admitted, a respectable figure. But this city grows apace, and the changes introduced by rapid transit render it impossible for us to calculate the rapidity with which it will develop itself in the immediate future. As it is, we are far behind London, which, not to speak of the Crown lands and other property which are thrown open to the public, can boast of two thousand six hundred acres of parks and squares and gardens; and even further behind Paris, which, in addition to other accorded privileges, even in excess of that of London, claims as its own, in the shape of such breathing-places, some four thousand five hundred acres. It is necessary, therefore, for us to be continuously and increasingly active in this one direction. We shall soon have a large population not only beyond Central Park, but beyond Harlem and McComb's Dam. In these new centres, we shall have need of fresh breathing-places; and if we would have the new portions of the city worthy of the city's magnitude and importance—if we wish to compare at all favorably with such cities as London, Paris and Vienna—we must take time by the forelock, and mark out, in advance, the ground which is to be reserved for parks and gardens and squares.

With the interest which is now taken in these matters, and with the good taste which is being displayed in the improvements at Riverside and elsewhere, we have no reason to be dissatisfied. Let the good work go on. Let the new parks be multiplied, let Tompkin's Square be restored, and let the down-town grounds be adequately cared for, rendered scenes of beauty as well as sources of health, and some progress will have been made towards rendering New York a beautiful and attractive, as well as a great and prosperous, city.

CALIFORNIA'S CONSTITUTION.

THE Kearneyites of California have triumphed over the sober sense of the enlightened and substantial classes. The new Constitution, which legalizes the worst theories of Communism, has been adopted by a popular majority of over 10,000, all the agricultural districts and many of the towns declaring largely in its favor. The result is as surprising as it is discreditable. It is true that the new instrument contains some excellent features, but its dominant provisions are simply execrable. It places Chinamen, for instance, alongside of "idiots, insane persons, and persons convicted of infamous crimes," denies them the right of suffrage, provides that no corporation shall employ them in any capacity whatever, and then, having made them Pariahs, brands them as "dangerous," fit only to be hunted down by the minions of authority and the ruffianism of the "sand-lots." It seizes capital by the throat, taxes the producing power of the State almost to the limit of confiscation, imposes restrictions of every sort upon corporations and institutions, and, as to railroads especially, sanctions a policy of spoliation. The best provisions are those which protect the public against stock-gambling and the exactions of transportation companies, and define the responsibility of officers and managers of financial institutions. There can scarcely be a doubt that the banking and mining interests of the State will be seriously affected by the adoption of this remarkable instrument; and it can hardly be otherwise than that, as the result of this election, the confidence of the country in the wisdom and sagacity of the Pacific commonwealth will suffer a shock from which recovery will be both slow and difficult.

ISAAC BUTT AND HOME RULE.

THOSE who are of opinion that the cause of Home Rule in Ireland has received its death-knell through the removal of its leader, Mr. Isaac Butt, by the arrest of the "grim sergeant," will find themselves not a little out of their reckoning. With Mr. Butt at the helm, there was every probability of the wreckage of the good ship on the shoals surrounding the Treasury benches—those fatal quicksands upon which so many an Irish bark has before now gone down to its doom, lured to destruction by the false light of deceitful Treasury smiles. The dead Tribune's policy of conciliation was as colorless as it was dangerous. John Bull in power is the Dives who despises the Lazarus that picks up the crumbs falling from an overladen and groaning table, and Mr. Butt's thankfulness for small mercies merely begat the unconcealed contempt of the "base, bloody and brutal Saxon." The Home Rule Party under the leadership of Mr. Butt have achieved nothing. All they can point to, after seven sessions of Parliament, during which many splendid opportunities were lost, many crying chances utterly and palpably ignored, is a division, in which they were within thirteen of defeating the Government—this, be it said, in a thin House and upon a collateral issue.

The party is composed of three distinct and separate sections. The "Swells," who will not offend the Government by an adverse vote, and who are heartily ashamed of their *confrères;* the Waiters on Providence, to whom a smile from the Treasury benches is ample repayment for unfaithfulness to pledges registered on the hustings; and the Obstructionists, who, having burnt their boats and broken down their bridges, defiantly court the malevolence of Ministers and the martyr-crowning offices of the Usher of the Black Rod. The Swells chafed under the leadership of Mr. Butt, and were independent both of him and of the party—in fact they somewhat gloried in the fact of being occasionally found in the opposite lobby; the Waiters on Providence followed him like sheep, inasmuch as his kowtow to the powers that be suited their parliamentary programme to a nicety; and the Obstructionists flouted him, since his policy was both boneless and bloodless. Mr. Butt preferred fighting in the open against overwhelming numbers to a guerrilla warfare which could not fail to harass and eventually cripple his enemy, and, as a consequence, was miserably beaten in each and every campaign. The Chard and Bromhead of the Home Rule Party, Messrs. Parnell and Biggar, were denounced by their chief, but being enthusiastically supported by their constituents, a more active policy was determined upon—a policy that bore the Dead Sea apple of Mr. Butt's vote for the Government, a vote which caused the Irish nation to stand aghast and to breathlessly inquire, "What next?"

Scarcely one-third of the Irish party in the House of Commons are Home Rulers at heart. Home Rule sprang, Phœnix-like, into existence from the ashes, not of one, but of several Irish fires. The law of defeat separates the vanquished into two or three well-defined parties or sections—one party more bitter in opposition than ever, one party put quietly out of the way, who retire upon their shields, and a little party who recognize no defeat. This is just the outcome in Ireland of '48-'49. The "Young Ireland" movement in '48 was never national in extent or acceptance—the party seceded from O'Connell on the point of the celebrated test resolutions, which declared it would not be lawful to take up arms for the recovery of national rights. The non-acceptance of this declaration led to the Irish Confederation. Smith O'Brien wanted a rose-water revolution, and Mitchel was accused of being a Red, and desirous of a *Jacquerie*. After the '48 movement had exhausted itself in transportations and expatriations, the gaze of the country turned towards Charles Gavan Duffy, who, in obedience to the call of the nation, got together an organization under the banner of tenant-right. This was a move that brought the Presbyterians of Ulster to take counsel with the Catholics of Munster; it brought Repealers and Anti-Repealers, and men of every shade of politics and religion, upon one common platform, but the representatives they sent to Parliament used the new shibboleth to suit their own ends, and the party was

Digitized by Google

almost immediately bought up through its leaders, Sadlier and Keogh. A cohort of the exasperated section of the '48 irreconcilables now leaped to the front, who, seeing the utter and shameful defeat of the Gavan Duffy following, raised their voices for war to the knife, war to the bitter end, till out of their burning cry rose the Fenian movement. The Tory party swung into power during the Fenian scare, and they went to their work in a spirit that would have shamed even Oliver Cromwell. With the war-whoop of "Down with the Irish Church!" Mr. Gladstone bounded into office at the head of a majority only equaled by that of Sir Robert Peel in '41, and, with the faculty of persuading himself into a fervid conscientiousness upon any subject he likes, he flung himself body and soul into the disestablishment of the church established in Ireland. The Protestants, in a craze of indignation, eagerly sought a vent for their feelings of revenge, and at this particular crisis Mr. Isaac Butt came to the front, called from an obscurity into which a wild recklessness had incontinently hurled him. The Protestants, who now chafed under the disestablishment, were many of them Mr. Butt's old comrades and political associates, and to these he turned, urging them no longer to act the secondary *rôle* of an English garrison. The cry of Home Rule was raised, and the pulse of Ireland has ever since beat hot and high. Bitter has been her disappointment, bitter her mortification. Had Mr. Butt's policy of conciliation been one of aggression, it would have at least shown the English nation that Ireland was in earnest; but the Home Rule movement up to the present hour has been, to use the well-known words of Lord Denman, nothing short of "a mockery, a delusion, and a snare."

IN THE OLD WORLD.

THE reports that the Ameer of Afghanistan, who last week proceeded to the British camp, had accepted the proposals of peace tendered him, are not sustained by late dispatches. The negotiations so far have been only preliminary. The British will demand an advance of the Indian frontier-line so as to give them control of the more important passes, and with the right also of maintaining a resident agent at Cabul or Candahar.

The wretched state of affairs in Russia continues. Arrests are frequent and numerous, and the terrorism complete. The Executive Committee of the Nihilists has addressed a circular to the army, imploring officers and soldiers not to become executioners. A Nihilist printing-press is said to have been discovered at the office of the Ministry of Public Communications in St. Petersburg, eight officials being arrested. A well-informed correspondent of the London *Times* represents that the tendency of the so-called repressive measures is towards revolution rather than peace. General Todleben—what an ominous name he bears, death in life—has arrived at Odessa, and assumed command of that Governorship and the Crimea, and the greater part of South Russia under the Czar's ukase establishing martial law. Russian Adjutant-General Obrutschoff, who has arrived at Philippopolis, has published the Czar's proclamation promising strict compliance with the treaty. It is officially announced that Russia has finally agreed to surrender Kuldja to China in return for a revision of the treaties relative to the Russo-Chinese frontier.

The Egyptian crisis is not yet ended, but it is asserted that a compromise has been effected between refractory Ismail and France and England. The intentions of the ministers of the King of Burmah are reported as pacific, and both king and people in that country seem bent upon adding a third war to the wars which England already has on hand. The attempt of Lord Beaconsfield's ministry at imperial aggrandizement in Zululand has been less fortunate than that in Afghanistan. Indeed, the Cape Town correspondent of the London *News* writes as if he had reason to believe that the English campaign against King Cetawayo were going all amiss, and that another campaign is inevitable. This conflicts, however, with the general tenor of the reports from the Cape, and it must be remembered that the *News* is very hostile to Sir Bartle Frere and Lord Chelmsford. The French Prince Imperial (so-called) is suffering from a sharp attack of fever.

The recent anti-Protestant demonstration at Rome indicates, no doubt, a wish that is father to the thought of reviving the temporal powers of the Pope, in order, with other objects, to secure for His Holiness full control of education within the former "States of the Church." Pope Leo XIII. has been induced, by the astonishing progress of Catholicism in the United States, to arrange a complete organization of the American hierarchy with a view to its more intimate union with Rome. New bishoprics will shortly be created, and the establishments of the Society of Jesus will be more satisfactorily regulated.

The Italian Government, in consequence of the undue importance attached to General Garibaldi's late manifesto, has sent a circular to the other Governments, declaring that it will vigorously repress any attempts to disturb the harmony existing between Italy and other nations. Garibaldi has decided to fix his residence on the mainland, abandoning, for the present at least, his island-home on Caprera. He suffers greatly from gouty pains in the stomach. The American sculptor Story has completed, at Rome, his clay model for a statue of Sardanapalus.

The Spanish Senatorial elections have resulted in a large majority for the Government. Señora de Mantilla, the wife of the Spanish Minister at Constantinople, has made a sensation in the fashionable world throughout Europe and America—perhaps a revolution—by wearing at a ball given to the Crown Prince of Sweden a *fac-simile* of an elegant dress which is still remembered as having been worn by her at Washington. It was so greatly admired in this country that Señora de Mantilla, on reaching Paris, took it to Worth's to be copied, and, notwithstanding the decree of that autocratic artist that a dress made over a year ago should not be duplicated, prevailed upon him to have a copy of it made for her. A Spanish event of greater interest to mankind at large than even a lady's dress, is the conclusion by the Spaniards of a convention with the King of Anam (Cochin China) for the purpose of supplying Cuba with Anamite laborers. Mr. George Errington, Liberal and Home Rule member of the British House of Commons for Longford County, Ireland, proposes to ask Mr. Bourke, Under-Secretary of State for Foreign Affairs, whether he knows of such a treaty and whether he will ascertain what provision has been made for its proper treatment. So the philanthropists and Kearney's anti-Chinese hoodlums will have a new phase of the coolie trade to study and declaim about. A more immediate question for the Spaniards themselves is a bread famine in Madrid.

In Germany, Prince Bismarck has lost his temper again in a wordy conflict in the Reichstag with the Socialist Deputy, Herr Laskar, who had accused the doughty Chancellor of fomenting agrarian agitation. The angry Prince quit the House in high dudgeon. Fifty thousand dollars have been appropriated for the German share in the Australian International Exhibition.

In France, the illegal election of Blanqui, the arch-conspirator against all forms of Government, the prosecution of the Archbishop of Aix, the determination and unanimity of the French Cabinet in sustaining Minister Jules Ferry's Education Bill, a new Bill in preparation against press offenses, and the great billiard tournament at the Grand Hotel, in Paris, are the main topics of interest.

In England, the War Office is enlisting volunteers for South Africa.

THE troubles in the central and northern States of Mexico have been suppressed, and there, as well as in other States, the outlook is favorable for continued peace. In some of them steps are being taken for the introduction of important public improvements. The Bill appropriating $500,000 towards the expenses of the proposed Exposition has passed two readings in the National Congress, and no doubt is entertained of its final success. All these indications are gratifying as pointing to a possible establishment of real prosperity and stable government in the republic.

THERE are evidences of improvement in the iron trade. The report of the American Iron and Steel Association shows that the production of pig metal in 1878 was greater than in any previous year since 1874, and indicates that the output for 1879 will equal that of the exceptionally productive years of 1872 and 1873. This gratifying improvement is accounted for by the increasing business of the foundries and machine-shops, and the great growth of the Bessemer steel industry. The production of rails of all kinds in 1878 was 882,685 net tons, which was 117,976 tons greater than in 1877.

THERE are indications of an abatement of the excitement on the Chinese question on the Pacific coast. The more responsible and substantial class of citizens begin to realize that Legislative interference with the provisions of the existing treaty might be regarded by the Chinese Government as a just cause for retaliatory action, which would disastrously affect the commerce of the Pacific slope, and this consideration is moderating the feeling which, for a time, swept everything before it. Another consideration which is influencing the opinion of the more intelligent voters is the conviction that, if restrictions to immigration are necessary or desirable, they can all be as readily accomplished through the enforcement of existing statutes, and by proper instructions to consular officers, as by the more radical method proposed by the Kearneyites. How far the provisions of the new California constitution, in their descrimination against the Chinese, may operate to the prejudice of the trade relations of the State, is yet to be seen.

THE Supreme Court of the United States has sustained the constitutionality of the Thurman Act, which requires that twenty-five per cent. of the net earnings of the Union Pacific and Central Pacific Railroads shall be annually paid into the Federal Treasury to be applied to the payment of interest on the bonds issued by the Government, and to the establishment of a sinking fund for their redemption at maturity. The decision will afford very general satisfaction, since it will defeat the purpose manifestly entertained by these companies of evading the payment of the bonds issued to them by the Government, and secure to the latter a lien on their property for the satisfaction of its claims, after the holders of the first mortgage bonds have been paid.

THE list of usages to which paper is subjected at the present time has grown to be a very long one. Boxes, bricks, wheels, chimneys, roofs, collars, clothing and napkins, are a few of the articles recently exhibited in Berlin. Professor Greene, of Troy, has contributed an important addition in the form of a dome for the astronomical observatory of the Rensselaer Institute. Having occasion to construct a dome thirty feet in diameter, he discovered that the weight would be five or six tons, under ordinary conditions. Such a weight would involve complicated machinery to turn it, and strong foundations to hold it, each involving great expense. He bethought himself of paper, and succeeded in accomplishing his object at a trifling cost and with a weight of scarcely a ton. It is in Troy that the celebrated paper-boats are made, and the vicinity of the factory contributed to the success of Professor Greene's experiment.

AN effort is making in Great Britain to elevate the character of the profession of teaching in the schools. A Bill introduced in Parliament proposes to create a register of the teachers in intermediate schools, on which all teachers employed in intermediate schools at the date of the passing of the Bill may claim to be enrolled. For the future, however, a new teacher in an intermediate school is not to obtain his or her place on the register without gaining a degree, or some other certificate of competence, and teachers not on the register are to lose all legal claim for the recovery of arrears of pay. The adoption of the system here proposed is opposed by some of the journals as premature, but the schools can never be made what they should be until something is done by law, as has been done in this country, to establish a standard of competency to which all teachers must conform.

THE Prince of Wales has produced a genuine sensation in a new direction. It appears that the Prince, who has a seat as a member of the House of Lords, has heretofore abstained from an actual participation in its proceedings. On the 6th instant, however, he startled the House by presenting a petition in favor of the Bill legalizing marriage with a deceased wife's sister, and causing it to be understood that he was in favor of the Bill. Marriages of this sort possessed a quasi-legality in England up to 1835, when they were forbidden by an Act of Parliament, which, spite of efforts renewed every year for its repeal, and successful on some occasions in the House of Commons, has tenaciously held its place on the statute-books. It had been supposed that the personal influence of the Prince of Wales would overcome the opposition of the Lords, and secure the passage of the repealing enactment, but a motion to proceed to a second reading of the Bill was promptly resisted by the Government, and was thereupon rejected by a vote of 101 to 81, the Prince, the Duke of Edinburgh and the Bishop of Ripon voting with the minority, and fourteen of the bishops with the majority.

THE reports that large bodies of emigrants were swarming into the Indian Territory, in defiance of the President's prohibition, appear to have been greatly exaggerated. Under instructions from the Government, General Sheridan has made all necessary dispositions of troops for the prevention of further invasion of the territory and the removal of such unauthorized settlers as may have already crossed the frontier; and, while there may be some difficulty in performing the latter service, it is to be presumed that the Executive order will be faithfully carried out. Every dictate of honesty requires that our pledges must be kept, and that, putting aside all questions of expediency as to the speedy settlement of Western territory, the land set apart for Indian reservations in the Indian Territory must be held inviolate by the Government. Any other course would have a bad effect upon the Indian tribes, and provoke additional trouble for the Interior and War Departments in protecting the Indians in their ceded rights.

NEWS OF THE WEEK.

Domestic.

FORTY students were graduated from the Union Theological Seminary, May 5th.

THE recent elections in the towns and cities of Indiana show Republican gains.

A PASSAGE through the ice at Buffalo was forced on May 6th, and navigation fully opened.

THE annual meeting of the National Women's Suffrage Association was held in St. Louis, May 7th.

IN the inter-collegiate athletic games, held May 9th, Columbia secured seven prizes and Princeton four.

A BANQUET was given at Syracuse, N. Y., May 8th, to Hon. Andrew D. White, United States Minister to Berlin.

IN the Protestant Episcopal Diocesan Convention at Philadelphia, May 6th, a resolution condemning ritualism was adopted by a majority of 125 votes.

ANOTHER coroner's jury in the case of Colonel Dwight, of Binghamton, N. Y., whose life was heavily insured, has decided that he did not commit suicide.

AFTER pronouncing decisions in mining claim, Pacific Railroad, and many other cases, the United States Supreme Court adjourned for the term on May 5th.

No action has been taken on Mayor Cooper's nominations by the New York Board of Aldermen, two adjournments having been had since the nominations were sent in.

THE single-scull race on Lake Quinsigamond, between W. N. Goddard, of Harvard, and E. F. Livingston, of Yale, on May 9th, was won by the former by six lengths.

THE firm of Whittemore, Peet, Post & Co., one of the oldest firms in the drygoods and woolen commission trade in New York, has failed, with liabilities of $1,000,000.

THE Pope has named the Very Rev. Lawrence S. McMahon, V. G., of Providence, to be Bishop of Hartford, and the Rev. John Vertin, of Negaunee, Mich., to be Bishop of Marquette.

THE fortieth anniversary of the foundation of the Beta (Yale) Chapter of the Psi Upsilon Society, and the forty-sixth convention of the fraternity, were held at New Haven, May 6th and 6th.

THE "Woodruff Scientific Expedition Around the World" is abandoned, and those who have paid their booking fee to Messrs. Drexel, Morgan & Co., may withdraw their money on application.

IN the United States Senate, on May 8th, the House Bill to enlist 750 boys in the navy annually was passed, and in the House the Bill to enforce the eight-hour law was killed by a vote of 52 to 103.

AN international cricket match between an English and an American team was played on the St. George's Grounds, Hoboken, May 7th and 8th, and resulted in a victory for the former by one inning and 114 runs.

SENATOR HOUSTON and other Alabamians have asked that the prosecution of persons who have violated the election laws in Alabama be suspended at present, on account of farm work; but the Attorney-General refuses.

GOVERNOR ROBINSON'S vetoes of the Code and Processions Bills have been sustained in the New York Legislature, through the failure of the opponents to muster a two-third vote. Six more vetoes were sent in on May 9th.

REAR-ADMIRAL ENOCH G. PARROTT died suddenly at the Fifth Avenue Hotel, in this city, May 16th, of heart disease. He was sixty-four years of age, and for thirty-three years had been identified conspicuously with the naval service.

A CONVENTION of colored men, with representatives from fifteen States, was held in Nashville, Tenn., May 6th. Resolutions were adopted favoring compulsory education and emigration. It is proposed to organize a permanent society for the protection of the colored men.

DESTRUCTIVE forest fires are raging in the mountains in the northern and western parts of Pike County, Pa., and vast quantities of valuable timber, bark, railroad ties, and other property are being destroyed. Several settlements are threatened with destruction.

AT the close of the anniversary exercises of the Hartford Theological Seminary at Hartford, Conn., on May 8th, there were interesting ceremonies at the laying of the corner-stone of Hosmer Hall, a new seminary building which is being erected, the expense being defrayed by a gift of $100,000 from the late James B. Hosmer.

THE exercises of Anniversary week in New York were opened on May 4th, with the Rev. Dr. Withrow's sermon before the American Home Missionary Society. On the 5th were held the services of the American Seamen's Friend and the Women's Union Missionary Societies, and on the 6th those of the American Sunday-school Union.

A BILL prohibiting the use of troops on election days has passed both Houses of Congress. The President will veto it, because it repeals, upon days of general and special elections, all laws which make it the duty of the President to employ the Army and Navy, if necessary, to collect the revenues, preserve neutrality with other nations, enforce quarantine regulations, etc.

Foreign.

THE cholera is increasing in India.

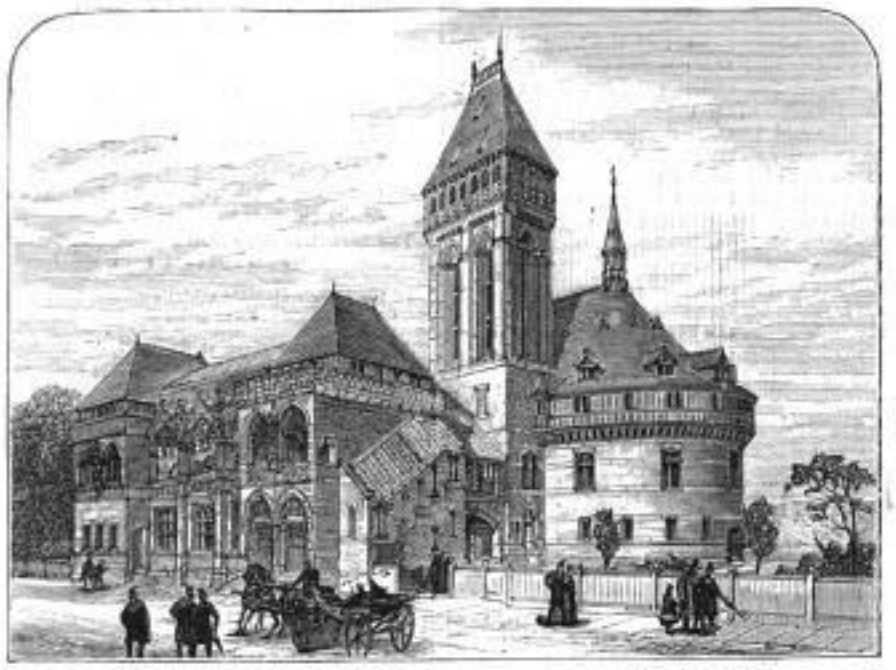
DISCORD has again risen in the French Cabinet.

A CHINESE Legation is to be established at Madrid.

EDISON'S second patent for electric candles has been filed in London.

MR. WHISTLER, the American artist, has been declared a bankrupt. His liabilities are $22,500.

IT is announced that the British Government has no intention of dissolving Parliament this year.



PERE HYACINTHE has petitioned for the recognition of his sect by the State equally with other denominations.

GERMANY will be represented officially in the Australian International Exhibition, which, it is thought, will be visited by the Prince of Wales.

AT the annual meeting of the Iron and Steel Institute, at London, last week, the Bessemer Medal was awarded to Peter Cooper, of New York.

ILLINOIS.—HEADQUARTERS OF THE UNION CLUB, LAFAYETTE PLACE AND DEARBORN AVENUE, CHICAGO.—FROM A SKETCH BY J. R. BEALE.

THE UNION CLUB OF CHICAGO.

THE club-house of the Union Club of Chicago, at which the first formal reception was given on April 24th, is admirably adapted to the uses for which it is designed. It was formerly known as the "Ogden Mansion," and thus resembles in its exterior a palatial private residence rather than a club resort. On the first floor there are commodious reception and reading rooms, also a chess-room, card-rooms, billiard-room, and pool-room. On the second floor there are five rooms for general purposes, and on the third floor, there is a magnificent ballroom about fifty by seventy feet, with fourteen feet ceiling, which is used also for theatrical purposes. All the rooms are handsomely furnished and finely decorated.

The Union Club was organized in February, 1878 and already numbers two hundred and twenty-five members, representing the very best elements—social, professional, and business—of the city's population. The officers are as follows: President, Henry W. Bishop; Vice-President, Henry W. Raymond; Treasurer, Albert W. Cobb; Secretary, W. P. Conger; Directors, George L. Dunlap, John T. Noyes, Alfred B. Mason, Frank S. Wheeler, Thomas C. Edwards, John De Koven, R. Hall McCormick, V. C. Turner, James J. Hoyt. Among the honorary members are Rt. Rev. Thomas Foley, Lieutenant-General Phil. H. Sheridan, the Rev. Robert Collyer, and Professor David Swing.

At the opening reception of the club, between six and seven hundred persons were present. The reception-rooms on each side of the main hall were arranged for the dancers, while the billiard-room in the rear was improvised into a banqueting-room for the occasion. The scene from the grounds was one of great brilliancy.

HON. MILES BEACH.

HON. MILES BEACH, recently nominated by Governor Robinson to fill the vacancy occasioned by the death of Judge Robinson, of the Court of Common Pleas, comes of an honorable stock, being the son of William A. Beach, the well-known and distinguished lawyer. He was born at Saratoga Springs in 1833, and is thus in the very summer of his years and the prime of his intellectual and physical strength. After a course of study in other institutions, he entered the Sophomore Class of Union College in 1851, graduating with honor three years later. Subsequently, having determined upon a legal career, he entered the Albany Law School, having in his studies the benefit of his father's ripe experience. In 1860 he located in Troy and commenced the practice of law, associated with his father and Levi Smith. He served terms as Alderman and School Commissioner, and was twice elected Mayor. The second time he polled a unanimous vote. He came to New York in the Winter of 1870, and since then has been a member of the firm of Beach & Brown. Loving his profession, he has confined himself to his practice, and given only slight attention to politics. He is a member of the Union and Manhattan Clubs, and well known to the better circles of the city, public and private. Mr. Beach is stout and healthy, has clean-cut features, and wears an iron-gray mustache. His manners are genial and affable, and on the bench he will, no doubt, prove himself, as he has done in all other relations, the true gentleman. As a sound lawyer and upright citizen his appointment is matter for public congratulation, and we may predict with entire safety that all the confident expectations as to his career which are entertained by those who know him best will be amply justified

NEW YORK.—HON. MILES BEACH, NEWLY-APPOINTED JUDGE OF THE COURT OF COMMON PLEAS.—FROM A PHOTOGRAPH BY KURTZ.

CUSTOM OF CHRISTENING SHIPS.

THE present custom of "christening" ships may be considered a relic of the ancient libation practiced when they were launched. The action of "blessing" ships is alluded to by the monks of St. Denys. In July, 1418, the Bishop of Bangor was sent to Southampton to "bless" the King's ship, the *Grace Dieu*, and received five pounds for his expenses. In the fleet commanded by John de Outremarins against the Tunisians, according to ancient custom, and to insure success, the ships were blessed by the priests; and being afterwards exposed to storms, the captains desired the soldiers and sailors to invoke the Lord, and while they were at prayer the wind became suddenly favorable.

In 1242, when Henry the Third was at war with France, a fleet was prepared in which that monarch embarked, after visiting the shrines of many saints, to propitiate their influence against storms, and to insure success to his arms.

Before the Reformation, it was usual for the priests at Yarmouth to give a blessing to the fishing-vessels yearly, and it was afterwards customary for the minister of the parish to preach a "fishing" sermon.

NEW ROCKY MOUNTAIN MINES.

(Continued from front page.)

Every hour on the road means a fortune gone forever. It is a feverish race, a frantic struggle to be first at the winning-post. A roadway up through a gulch is thronged with pilgrims to this Mecca of gold—some on foot, some on horseback, some in wagons. Like ants to a trysting-place toil the seekers for wealth, many of them accompanied by wife, children and household gods. Rough enough are some of these embryo miners, hard, stern, lawless men, who go forth with their lives in their hands, while others are soft and gentle and white-skinned. No man looks back. Every face is set to Leadville as true as needle to the pole. When a wagon upsets, or is hurled with its occupants over the sheer precipice, but few will stop to aid in the rescue. Life is too short now; life has been compressed into a few working hours—and then wealth, dazzle, rapture! The hills are honeycombed with mines, and every hour finds mining experts, laden with the instruments of their craft, paddling about on snow-shoes, who are paid fabulous fees, exploring the country for "finds." A prospector locates his claim and sinks his shaft. As soon as he finds mineral in the place—that is, adhering to the sides or bottom of the shaft—no matter of what nature or quality, he has an assay made, after which he employs a Government surveyor to survey his claim. The latter fact is placed on record, and his title is established. A search for the carbonate treasure now commences, which he may find at the depth of a few feet, or at several hundred. A small streak of dark-reddish earth of less than an inch wide is his road to Aladdin's cave.

A carbonate vein is found in what is called the "contact" between porphyry rock and limestone. In the California days, miners called their log-cabins with what they supposed was mud, but which was really carbonate, worth $400 a ton. In January last there were twenty paying mines in Leadville. At the end of April there were forty-nine. In the Judge Pendry Mine, 360 feet below surface, a second layer of carbonate has just been discovered, parts of which assayed in the fabulous proportion of 14,000 ounces of silver to the ton.

The silver product in this region is estimated for 1879 at $30,000,000 against $2,700,000 in 1878; fifteen per cent. only of prospectors tap ore, while eighty-five fail. Three lines of railroad are aiming at Leadville—the Colorado Central from Georgetown, the Denver and South Park from Webster, and the Atchison and Santa Fé from Cañon. Each of these companies expects to blast its way to El Dorado, and to arrive there during the coming Summer. Each employs its thousands of navvies at from $2 to $3 per head per diem. Leadville is now a city; how soon it is to be "petered out," to use a mining phrase, is a question of time; but, with its enormous number of claims, many a long Summer day is likely to pass ere it becomes enrolled amongst the "things that were."

A warm bath in the mining-camp is a luxury but rarely indulged in. Cold water, as a rule, is not freely patronized, and, save for potable purposes, hot water is unknown. Our illustration represents a miner who has borne the heat and burden of the day, and who is anxious to divest himself of the clinging brown clay which, while it is the road to fortune, is also an enemy to personal cleanliness. The miner, seating himself in a caldron used for smelting purposes, his chum, from the boiling kettle, pours the scalding liquid that is knife-like to cut away the clay armor in which the bather's body is incased; and, despite the yells, expostulations, and curses loud and deep of the parboiled individual, the scalding liquid does its grim and stern duty to the letter. This is a marked man in Leadville next day. Everybody knows that he has been indulging in the emasculating luxury of a warm bath.

TWO STRATAGEMS.

CHAPTER I.

"IT'S no go, Clara! Our Irving of the intermediate won't favor us."

"I wish *I* could talk to him," said the young lady, regretfully, as she took her cousin's proffered arm and paced the deck with him again.

"Never mind, cox. Sing one extra song yourself, and no one will regret our Irving's heroics. Shall we take a look at the sunset?"

"If you will get me my shawl, Charlie; the wind is really bitter. Who would think we are making a Summer passage?"

Charlie Belmont handed his fair cousin to a ship chair, and dived into the saloon entrance, where he soon found the desired object, enfolding the feet of his young wife. She was lying, pale and languid, in the companionway.

The Belmonts were well-to-do English people, on a Summer trip to the New World, to that part of it which is dominated by the Stars and Stripes; and Clara Syndon, Mrs. Belmont's cousin, was traveling with them. She was an orphan, and free to come and go. Plump and blooming was Clara, with frank blue eyes, a sweet mouth and firm dimpled chin. Just now, her pretty head was quite full of two kindred subjects—the contemplated entertainment in the saloon, and the young actor who would take no part therein.

Presently Mr. Belmont reappeared, his stalwart figure shrouded in a very comprehensive ulster, and the two young people were soon leaning over the railing with faces turned westward.

"Now, Charlie, tell me all about your interview. What is he like and what did he say?"

"Irving?"

"Nonsense! That's not his name."

"Well, no, it is not. His name is Melville Brandon, and his line appears to be the juvenile-tragic. I fear what's-his-manse—Melpomene—has not favored her votary. He is handsome enough—that slender, dark, Italian sort of beauty—but he looks half starved, and coughs ominously. Such a threadbare coat, Clara."

"I dare say all these cold winds have affected his lungs. *He* has no ulster." And the blue eyes glanced almost reproachfully at the one beside them.

"Then you can see the poor devil is so proud and sensitive," Belmont went on, compassionately. "I opened my business in all due form; told him a ten days' voyage was a tedious thing; that we in the saloon were suffering terribly from boredom, and that we proposed breaking the dullness of life by a small entertainment to-morrow night—a sort of Penny Readings; that we had heard of his professional abilities, etc., and should feel deeply indebted if he would come and help the thing along. It would be a favor—a real boon."

As her cousin talked comfortably on, Clara's lip curled somewhat scornfully. Belmont's tone and manner were making clear to her the reason of his failure.

"But it was wasted breath, Clara. He told me, had he a legitimate—no, that was not the word—a *pecuniary* right to be in the saloon, he would gladly contribute his humble share to our amusement; but, as things were, he must decline the honor. Then I said that the barkeeper was coming in by the captain's permission (have you noticed him, Clara, a very fine-looking man, and plays the piano capitally). But he would not budge, and his dark eyes began to look rather venomous. Pride and poverty, you see, with conceit added on. He thinks he is Henry Irving."

The sunset had nearly faded, and the cousins resumed their walk. As they approached the rail separating the saloon passengers' region from the steerage and intermediate, a young man came strolling up to the slender barrier, with eyes bent on a small book.

"Clary," whispered Belmont, "speak of the — you know the rest! Here comes our willful genius."

The young girl scanned the approaching figure eagerly; in fact, she looked one moment too long, for, when but a few paces separated them, the actor glanced up and met her curious gaze. What dark, distinctive eyes! They illumined the pinched face; they gave it life and individuality.

Mr. Melville Brandon bestowed upon the cousins a cursory regard of very slight interest, then turned on his heel and resumed the study of Constable's "British Drama."

"I'm tired; take me to a seat."

Her tone was sharp, her voice had a strange quiver in it. Charlie Belmont looked astonished.

"Tired already! Well," as he piloted her to the nearest ship chair, "what do you think of Ir——"

The young lady interrupted him, that irritable accent more pronounced.

"You wear your jokes threadbare, Charlie, I think—I think he looks half-starved. And now we will talk of something else."

Belmont colored, and suddenly remembered his wife must be feeling lonely. So he lifted his cap and departed with a brief word or two of explanation and good-night. And as he went he decided that Miss Clara was not quite so sweet-tempered as she looked, or as he had deemed her hitherto.

But she sat on in the thickening twilight, pale and trembling. She had recognized the eyes that glanced at her so carelessly. She continued to watch their owner, and the first keen conviction strengthened into a settled certainty. How frail and worn he looked! Her heart ached, her eyes filled; but the last bitter words he had given her, five long years ago, effectually kept her silent.

CHAPTER II.

FIVE years before Clara Syndon was no orphan, but keeping her father's house to admiration—a solid, dingy red brick mansion, standing back from the market-place of Barton, one of the loveliest little townlets in the North of England. Being the only lawyer in the place, Mr. Syndon, of course, knew everybody worth knowing, and all were unanimous in Clara's praise. She had been back from school only six months, yet already proved herself a good housewife and pleasant little hostess. Much more enthusiastic was young Harry Ludlow, her father's ward and articled clerk, the only son of Mr. Syndon's oldest and dearest friend, who had lived under his roof ever since that friend's death in Harry's tenth year.

He was now just twenty, and a slender, graceful young fellow; very romantic, rather reserved, and more than rather conceited.

That Winter a company of strolling players found their way across the moors to Barton, unharnessed the lean horses from their caravans just outside the town, and set up their canvas theatre. The opening night was one of pouring rain, and the curtain rose on "Hamlet, Prince of Denmark," before nearly empty benches. But one deeply-interested spectator was there, placed honorably in the front row. No weather could keep young Ludlow away.

The manager, a stout, sallow man, by no means young, personated the fair-haired Danish prince, in a scant wig of glossy black curls, considerably worn at the crown. *Ophelia's* voice was shrill and nasal, and her h's at times misplaced; while the murdered king's ghost wore ancient breeches of dingy brown leather, and flourished a truncheon of rolled-up paper. Yet Harry, seeing these defects, sat entranced; came the next night, and the next; sought the actors in the idle day hours—in short, was completely stage-struck.

The manager, despite his bloated figure and sallow, unwholesome face, was a really good tragic actor. Causes other than the lack of ability had kept him so low in the profession. He remembered old Kean, and loved to tell about a certain evening at Drury Lane, many years ago—his first within its famous walls. How, while seated quietly in the pit, a murmur came thrilling to his ears, first low, then louder, like the sound of rushing waters. He stared around; the whole house was rising to its feet. Before them stood a slight and graceful figure, a small unit indeed on that vast stage, bowing profoundly with most gracious reverence to the public, while the whispered "Kean! Kean!" from many thousand voices explained the mystery.

"That was the first time I saw him as *Sir Giles Overreach*," added the manager. "A great actor, sir—sublime! Rather your style of face and figure."

The company staid a fortnight at Barton, and then the last performance was announced—"positively the last." About eleven o'clock that night, Clara Syndon sat by the fire in her father's study, half-asleep. She occupied his own armchair, for Mr. Syndon was on a business visit to London; she was waiting up for Harry Ludlow. At seventeen her face was much paler and thinner than at twenty-two, for hers had been a delicate childhood; it was framed, too, by abundant curls of fair hair.

"Oh dear!" sighed Clara, "I wish papa was here to keep Harry at home. It's very bad for him to sit in that damp booth, night after night, and he only gets cross if I tell him so. Puss, wake up and keep me company."

But puss only blinked one eye, and her mistress was stooping to lift her bodily from the hearth-rug, when the front door closed and hasty steps approached the study.

"He has not put up the bar," was Clara's mental comment. "What a good thing I waited for him."

"So you are here still, Clara; I am very glad." The young man's face was flushed, his dark eyes were glowing with excitement. Clara looked at him in utter astonishment, and for a moment puss was poised unheeded in mid-air.

"I am glad you are here," he went on, "because this night is a turning-point in my life;"—her face sobered into anxious gravity—"so sit down and hear me out."

Clara was beginning to tremble nervously. She obeyed without a word, her fair face lifted in expectation. Harry stood before her, leaning one elbow on the mantel-piece, with downcast eyes. He seemed to be trying to frame some sentence.

"My darling," he said, suddenly, his voice tender and musical, "have you never guessed it? Don't you know that I love you?"

Instead of blushing, the young girl grew pale. Then, with that maidenly instinct which will not believe the first declaration of passion unless very clearly expressed, she answered quietly:

"Why, of course, Harry. We are just like brother and sister."

"What if we were even more than that, some future day, when I am rich? Would the thought be pleasant to you, Clara?"

Her eyelids were drooping now, and the blush that had been long in coming suffused all her face.

"My darling, tell me."

"I never thought of such a thing," very shyly.

"But now that you do think?" persisted her lover, and she looked up at him to reply. The blue eyes were tearful, but a happy smile flickered round her mouth. Lips and eyes together gave an answer without words, and Harry sealed it with a kiss.

"You had better sit down, Harry," said Clara demurely; "it's tiring to stand so long."

So he sat down beside her, and again seemed plunged in anxious thought. She was quick to see there was something still untold.

"What made you say all this to-night?" she asked.

Allow me to remark, *en passant*, that the little maiden's "all this?" was a very significant expression. If ever lover told his tale concisely, surely had hers; yet to Clara's apprehension the beginning of their conversation was already far away. It is always thus when great excitement or strong emotion divides our lives.

"Because by this time to-morrow," said the young man slowly, "I shall be far away from dull old Barton and my desk in your father's office. Clara, I hate the law. I am going to achieve fame and fortune by a grander profession—I am going to be a great tragedian."

"What do you mean, Harry? How can you go and be an actor when you are articled to papa? and how can you act at all when you don't know how to? Surely, you remember our private theatricals last Christmas?"

"I understand what you mean," said Ludlow, with a slight flush. "I *did* murder my part, but then it was a comic one. Genteel comedy is not my line, nor low comedy either, but tragedy, tragedy, my darling! As for my articles, when the cat's away the mice will play. Your father is not here to keep me back, and I shall change my name while I am merely strolling in the provinces. He won't be able to track me out. You keep true to me, dearest girl; he will forgive me fast enough when I am rich and famous."

Clara felt bewildered. This strange, sudden resolve threw an air of unreality over their whole conversation.

"What is it you mean to do?" she asked, "and what has put such a notion into your mind. Oh, Harry, it seems so strange and miserable!"

"Don't cry, darling!" and he carried one little hand to his lips. "I have not come to this resolve without much thought and many consultations with my friend, the manager. He says I have all the materials of a first-class tragic actor; that in me London will recognize a second Edmund Kean. Of course there will be plenty of drudgery, but he knows that at last I shall succeed—perhaps in five years, perhaps in less. He pledges his honor to it."

His enthusiasm woke no echo in Clara, for she had frequently passed Mr. Aubrey St. Aldegonde (this was the stout manager's euphonious cognomen), and had always experienced no pleasant sensation from the sight of him. His face, walk and whole manner were peculiarly disagreeable to her.

"But, Harry," she said, pleadingly, "it can't be right for you to take such a step without papa's knowledge, can it?"

"'Circumstances alter cases,'" replied the young man loftily. "Don't you know that is true in law? Your father would never let me break my articles, and I should lose precious time dawdling on in that hateful office. The sooner I go the sooner I can return to claim you; remember that, dearest."

Observant of the change in his tone, Clara ceased to argue. She let him talk on and unfold his hopes (of his exact plans he was reticent) till the market-house clock chimed the quarter to twelve.

"I must start very early in the morning," said Harry, as she rose. "When shall we meet again?"

"When you are famous!" rejoined the girl, her voice low and nervous; and then they parted in lover-like fashion. Harry went to pack his valise and Clara sought her own room. She closed the door with considerable force.

Five minutes later that same door opened and closed again, very softly this time. Wrapped in a perfectly plain waterproof cloak, and with a thick vail twined round her simplest and oldest hat, Clara stole down the stairs and gained the hall. Some heavy drops of Autumn rain came splashing against the glass over the front door. She took one of her father's umbrellas from the stand and quietly let herself out of the house.

It was a model English November night. Fog and rain had it pretty nearly to themselves in Barton market-place. A few oil-lamps glimmered faintly round the circle of quaint houses, like signal-lights that hint at the shore-line of some misty bay. Not a soul was about to speculate why Miss Syndon was hurrying down to the railway-station at that time of night.

Arrived there she put up her vail and went composedly to the telegraph office. The sleepy clerk in charge brightened considerably at sight of the young lady. Was he about to be the medium of arranging an elopement? Alas, no. The telegram ran as follows:

"*Clara Syndon to John Syndon, 18 Haverstock Hill, London, N. W.*

"Come home at once, but do not be alarmed. I am well, but want you. Wire reply."

"Shall I send the answer up, miss?" asked the clerk.

No. Miss Syndon would wait for it. In due time it came:

"By next train."

"By Jove!" mused the clerk, as he watched her out of the office, "old Syndon must be pretty completely under his daughter's thumb to come hopping out of bed in the small hours without a reason given. What's up, I wonder?"

Clara got quietly back home again and into her own room. Once there, she threw herself on the bed, sobbing bitterly. She was dreading lest her lover should discover that his guardian's sudden return was not the result of accident, for she knew how deeply Harry would resent her interference.

"He must not know," thought the poor girl, "and he need not. Of course he will be gone long before papa's train comes in, for he said he must start very early—with that manager, of course! Papa will be here about eleven o'clock. I will meet him at the station and explain things, and he will follow them directly. But then I shall warn him to say nothing about the telegram, and Harry will never think of it himself, for he knows papa's movements are always very uncertain."

Thus she tried to reassure herself, yet without entire success, and that night was the first sleepless one in the little maiden's life. About five o'clock in the gray dismal dawn, she heard the front door close, and going quickly to the window got a good view of the would-be Kean's departing figure, as he trudged briskly away, valise in hand.

At the actor's temporary location Harry found a disappointment awaiting him. The booth stood untouched, the attenuated horses were browsing languidly, and no member of the dramatic corps was visible save Mr. St. Aldegonde himself, who sat tranquilly smoking a cigar, on the second step of his own special house on wheels, and yet an early hour had been fixed for departure. But a few words explained this change of plan, and Harry learnt that last night's crowded house had convinced Mr. St. Aldegonde that Barton would support another "last performance."

* * * * * *

The first train from London got in punctually, bringing within it a somewhat anxious old gentleman, in the person of Mr. Syndon. One of the first objects that met his eyes on the home platform was his own clerk lounging at the book-stall intent on an illustrated paper. Finding his departure delayed for a day, and disdaining to set foot again within the detested office, Harry had strolled down to the station to amuse himself with the *Dramatic News*. In three seconds the lawyer was beside him, eagerly asking an explanation of Clara's extraordinary telegram, while she, poor child, came up at the very same moment.

There was no help for her, she had to explain. Mr. Syndon pooh-poohed the whole scheme, and reminded Harry in no gentle terms of his condition of legal infancy as well as of his obligations as an articled clerk. The conversation took place in the library at home, if conversation it deserved to be called, for Harry said very little; it was his way to be quiet in strong excitement. But Clara noticed the slight tremble of his hands, and the steady, passionate light that burned in his dark eyes. At length the announcement of dinner terminated the lecture, for Mr. Syndon would never discuss unpleasant subjects at meals. Later, he resumed his reasonings, and, as Harry now seemed quite calm and listened respectfully, the old gentleman went to bed that night quite hoarse indeed with so much talking, yet sure that his ward was coming round to reason. But next morning, when the house-maid tapped at Harry's door, she got no answer; he had settled the mooted point by running away, and Mr. Syndon would take no steps to follow him.

"There is no need whatever to make a fuss," he said, decidedly; "the foolish boy will come home again when he has experienced something of the realities of country strolling."

But Spring and Summer came and went, and

Digitized by Google

the prediction remained unfulfilled. One frosty Winter's day during the Quarter Sessions, Mr. Syndon sat something too long over his fine old port, hurried down to the magistrate's office nearly on a run, and was brought home in a fit of apoplexy from which he never recovered. And thus it happened that Clara went to live with the Belmonts.

Now Harry had written no word of farewell to his guardian. The only note discovered on his dressing-table was directed to Miss Syndon.

"I never knew before what it is to despise a woman. You have now given me that mental experience. HENRY LUDLOW."

Crude, brutal and inflated as the words were, they had positively scorched poor little Clara as she read. Even now, as she sat in the twilight aboard the *Kentucky*, and watched their writer, they returned again. Thrice, as he approached, her lips parted to speak; then she hesitated, afraid to venture. At last he went below, and the opportunity was lost for ever.

CHAPTER III.

THE much-talked-of Penny Readings never took place. At the hour it was to have begun, the *Kentucky* was staggering over mountainous billows through the very thickest of a storm whose area stretched right across the northern Atlantic. The hatches were, of course, fastened down, and nearly all the frightened passengers clustered in the saloon, where most of the lamps were broken, the piano lay prostrate, and both tables and floor were strewn with fragments of glass—blue, red and white—poor *débris* of the cruets and wine-glasses usually swinging blithely above.

Clara was in the ladies' room with her cousins, trying to soothe Mrs. Belmont and avert hysterics. Charlie looked pale, but was composed, and he noticed a strangely absent manner about Clara. Her thoughts were evidently elsewhere, and, directly his wife grew a little calmer, she dropped her hand, and walked out into the passage, straight towards the stairs leading up on deck. Just as she reached them the purser rushed down.

"On deck all of you. To the boats!"

"Clara!" shouted Belmont, as she vanished up the steps. "Clara, keep with us!"

But the girl was gone, and his wife's hysterical cries and clinging arms reminded him of a nearer claim.

How Clara crossed the rolling deck in the gray stormy twilight it would be difficult to tell. But it was done, and quickly too. Several of the boats had been washed away; the rest were being launched, each one watched by an eager crowd. At the steerage end no efforts of the officers could preserve entire order. In each group the strongest stood foremost, and Clara found the object of her search quite to the back of one of them.

"Harry!"

The actor looked up with a cry; then each was clasped to the other's heart.

"Have you forgiven me?" she whispered presently, when the convulsive tightness of his grasp relaxed.

"Forgiven? your dear little stratagem? Oh, Clara, *Clara!* if it could have been successful! But how come you here, darling girl? Am I to see you die, too?"

His voice was feebler than of old, but to Clara just as musical.

"Nothing of the sort," she answered cheerily, raising her head from his shoulder and actually smiling into his eyes. "This line of steamers is generously provided with boats, and I am sure there are enough left to hold us all."

Then her face saddened, and the golden head went down again.

"Harry, if you should be saved without me, will you give up the stage and do something better with your life?"

"I never *shall* be saved without you; do you think I will lose you again?"

By this time the boat was got fairly afloat.

"The women first!" shouted an old sailor.

Clara separated herself from her lover and moved to the other side of a huge cask. Clinging to this, she stood with eyes fastened on the boat. She was trying to calculate its capacity—no easy task in the thick-coming darkness.

"Now, miss!" and a seaman's hand was laid on her shoulder. She looked up imploringly into its owner's weather-beaten face.

"Is there room for all?"

The sailor shook his head doubtfully.

"Then I will wait."

"No time to argify," said the man, shortly, and turned to another woman.

As he turned, Clara sank on her knees behind the cask; and Harry, confused by the dim light and crowding figures, thought she had been passed overboard. The boat filled rapidly; women, children, then a rush of men. The poor actor was hustled back, and at last stood apparently alone on the deck. The boat seemed full.

"Room for one more!"

He leaped in; the heavily laden boat moved off, being, as it happened, the last in getting clear; and Clara, still kneeling, hid her face that she might not see the water, and thanked God that her second stratagem had been successful.

Queen Victoria.

THE Queen of England has a very nice dairy farm, which is thus described by one who has examined it. It is a mile from Windsor Castle: The dairy is a beautiful cottage, with a marble-paved and frescoed vestibule. The interior is a room about thirty feet square, the roof supported by six octagonal columns of white marble, with richly-carved capitals. The floors are of white porcelain tiles, the windows stained glass, bordered with hawthorn-blossoms, dahlias, buttercups and primroses. The floors are lined with tiles of porcelain of a delicate blue tint, with rich medallions inserted of the Queen, Prince Consort, and each of the children. Shields, monograms of the royal family and bas-reliefs of agricultural designs, representing the seasons, complete the ornamentation of this exquisite model dairy. All around the walls runs a marble table, and through the centre two long ones, supported by marble posts, resting on basins, through which runs a perpetual stream of spring water. By this means the slabs of tables are always cold, and the temperature of the dairy is chill, while the white-and-gilt china milk and butter dishes, resting on the tables, are never placed in water. The delicious milk is brought into the room in bright metal buckets, lined with porcelain, the Queen's monogram and crest glittering on the brass plates on the covers. In the room where the butter is made, milk skimmed and strained, the eyes may be feasted on the rows of metallic, porcelain-lined cans of every size, made to lock, and sent to the royal family, even as far as Scotland, or wherever they may chance to be, so they always have good milk and butter. The churn is of metal also, lined with porcelain, and made into two compartments. The outside chamber surrounding the cylinder can have warm or cold water poured in to regulate the temperature. The lid is screwed on, and the stationary stand on which the whole is turned makes the work easy and rapid. But while over sixty cows are daily milked, and as many more are out grazing, the royal family are more than satisfied, and the Londoners growl that the overplus is sold, and the money pocketed by their money-making sovereign.

German Books.

THE official list of German books published during last year has just been issued by the Leipsic Booksellers' Association. The total number of novelties, together with new editions, was 13,912, against 13,925 in the preceding year. In 1868 the number began to exceed 10,000, and since then there has been a steady increase. The class entitled "pedagogic works" stands first. Of these there were in 1878 no fewer than 1,775. Second come law, politics, statistics and social questions, with 1,319. These are followed by theology, with 1,246; *belles lettres*, with 1,181; chemistry and pharmacy, with 793; medicine and veterinary surgery, with 789; popular publications and calendars, with 715; history, biography, memoirs, with 699; art, with 571; trade and industrial subjects, with 577; and classical and Oriental languages, with 500. Among the remaining categories, philosophy figures with 164.

Chinese Schools.

A SAN FRANCISCO paper says: "A remarkable example of the eccentricity of the Chinese turn of mind is noticeable in their schools, where, instead of silence being inculcated, as might naturally be considered so essential, every child is expected to bawl out the lesson that he is committing to memory at the top of his voice; and the babel which is the result may be more easily imagined than described. When a Chinese boy goes up to repeat his lesson, he does not stand facing his tutor, but turns his back upon him, and hence repeating a lesson goes by the familiar name of "backing" it. This method of recitation has an excellent effect in keeping the boy on the *qui vive* to avoid mistakes, for no sooner does he commit one than he is called to recollection by a smart tap on the closely shaven pate, from the metal of the long tobacco-pipe which every pedagogue carries about him."

The Paris Periodical Press.

ACCORDING to the catalogue published by the firm Brunox (Déffis), 1,190 daily, weekly and other periodical journals are published at Paris. Of these journals 71 are religious, 104 legal and administrative, 153 commercial and financial, 23 geographical and historical, 139 of light literature, 31 generally amusing, 90 literary, philological and biographical, 15 of fine arts, 1 photographical, 8 architectural, 15 musical, 17 theatrical, 7 of the fashions (3 of them devoted to hair-dressing), 134 technological and industrial, 50 medical, 48 scientific, 29 military and naval, 38 agricultural, 23 sporting, and 27 journals of various sorts. The number of daily political journals is 49, and that of political reviews 14. Eleven periodical publications appeared last year in connection with the Exhibition.

A Horse Census.

THE *Débats* has recently given statistics respecting the number of horses possessed by different countries. Throughout the whole of the Turkish dominions there are estimated to be only 1,000,000 horses, while the Russian provinces are credited with the possession of no less than 21,570,000. Austro-Hungary has a total of about 3,500,000, and Germany 3,352,000. France, which had considerably more than 3,000,000 a few years ago, is returned now with rather less than that number, and the United Kingdom stands only fourth on the list with 2,255,000. Amongst the American powers the United States heads the list with 9,500,000 and Canada surpasses the Mother Country by 70,000 or thereabouts. The Argentine Republic is credited with no less than 4,000,000, and Uruguay with 1,600,000.

Poor Carlotta's New Home.

SOME interesting historical recollections are associated with the château of Bouchout, near Grimberghe, lately purchased from Count de Beaufort by the King of the Belgians as a residence for the unhappy Empress Charlotte. Bouknote, as it should be pronounced, dates from the twelfth century. At that time it was a castle, strongly fortified by the Dukes de Brabant to defend themselves against the Counts of Grimberghe. About 1336, Count Louis de Male, who had difficulties not only with the English, but with the French, took refuge there. Recently the remnants of arrows and lances have been found on the estate, and they probably date from that period. Later, the castle was occupied by Everard de la Mark, brother of the Wild Boar of Ardennes, from whose hands it passed to the family of Aremberg. In 1590 the Hautevilles bought it, and the Beauforts, who have just sold it to King Leopold, have only owned it since 1830. It was formerly a very strong fortress, surrounded by five moats, which protected each other, and were crossed by a bridge of extraordinary length. In 1660 the castle was still a large square, flanked by five towers; but the latter, with the moats, have now disappeared. The most ancient part of the structure is the donjon, which dates from the twelfth century. It is three stories in height, each being occupied by only one apartment. The adjacent wing was constructed to harmonize with the rest of the building. The interior is a veritable museum, which will remain in its present state. In the dining room the chimney-piece, which is very large, is surmounted by statues of Godfrey of Bouillon, Philip the Good, the Duke of Burgundy, and Godfrey the Bearded, who is supposed to have founded the manor. Near the principal drawing-room is a small chapel dedicated to St. George. The stained-glass windows represent the Dukes of Burgundy, the Emperor Maximilian I., Charles V., Philip II., Albert and Isabella. The park contains over 300 acres. The works to prepare the château to receive the Princess are being pushed forward rapidly, and she will take up her residence there immediately after the return of the King and Queen from England.

Marriage in Great Britain.

ONE of the curious facts which come out in the British marriage returns for a period of years is the gradual decrease in the proportion of marriages solemnized according to the rites of the Established Church, while at the same time the proportion of civil marriages is steadily increasing. In 1861 the number of the former marriages formed almost 80 per cent. of the whole; in 1868 the proportion was 76.8 per cent.; and in 1876, 73.7 per cent. On the other hand, the number of civil marriages at the offices of Superintendent-Registrars in 1861 was 7.16 per cent. of the total number; in 1868 just 9 per cent.; while in 1876 the proportion had increased to 10.7 per cent. The total number of marriages not solemnized by the Established Church also shows an increase—the proportion to the total number in the years 1861, 1868 and 1876, being 20.1, 22.1 and 24.2 per cent. respectively.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

The Shakespeare Memorial Theatre.

The Shakespeare Memorial Theatre at Stratford-on-Avon was opened with a ten days' festival, beginning on Wednesday, April 23d. This edifice is the first instalment of the work done by the "Shakespeare Memorial Association," issuing from the Tercentenary Festival of 1864. The theatre is built on the most approved plans of the present day. There is yet to be added a gallery where art may lend its aid to illustrate and embody Shakespearean ideas, thoughts and expressions. It is hoped that the Memorial will form the nucleus of a Shakespearean activity which shall, by lectures, anniversary and other performances, essay prizes, and other means, encourage the true exposition of Shakespeare's dramas; and that it may aid generally in restoring a brightened national drama to its old position as a valued moral educator of the people. A school of acting and a beneficiary fund for the acting profession are supplementary proposals for the future. It may be remarked that the estimated first cost of these Memorial Buildings is £20,000. Of this, £12,000 is already in hand; more is promised; and Mr. Flower, of Stratford-on-Avon, who has already done so much in furtherance of the undertaking, now makes the generous offer of subscribing £1,500 for every £1,000 the public subscribe, until the requisite £20,000 is all in hand.

Sketches of the Zulu War.

The Zulu and his shield appear to be inseparable. He uses it to convey his firearms, weapons of war and spare clothing when crossing water, and as a protection against the sun or a storm. In attacking order it plays a prominent part, being borne on one arm so as to cover the vital parts of the body, while the other holds the deadly weapons. With the tufts of light-colored hair dangling from below the knee and the large ones hung about the neck, a column massed either for offensive or defensive movements on an open tract presents a very singular appearance. As recent events show, the Zulus carry on their aggressive measures in strong columns, evidently believing that success depends greatly upon surprise and overwhelming numbers. Dr. Glanville, who furnished the sketch of the Camp Bazaar, writes that while the troops were at a standstill waiting for reinforcements, the market became a familiar sight. Every morning troops of Caffre women came into the camps from the neighboring kraals, bringing with them milk, mast (milk curded in a calabash), sugar-cake, pumpkins, melons and other vegetables. The business is conducted in a most orderly manner, the saleswomen occupying the centre of an inclosure, while the buyers take their places outside. The merchandise is then disposed of according to a fixed tariff laid down by order. "Practicing for the Zulus" is an incident that occurred on the steamer *Pretoria* during the passage of that troopship round from Capetown to Durban with the Ninety-first Highlanders, named after the Princess Louise, on board. Both officers and men amused themselves by firing into the numerous flocks of seafowl that crossed the path of the steamer.

Unveiling the Cook Statue at Sydney.

The statue of Captain Cook, at Sydney, New South Wales, was unveiled in the presence of an assemblage of troops, sailors, public functionaries and citizens, estimated as numbering nearly 100,000. Music was furnished by the band of H. M. S. Wolverine. Seven war-vessels in the harbor contributed a force of some 500 sailors and marines. A lengthy procession was made up, representing all manner of national, civic and social organizations. Hyde Park, Cook Park, and all the approaches, were densely packed. A space of three acres was inclosed for the occasion, the boundary line being marked by seventy staffs, from which all the national ensigns were flying. Sir Hercules Robinson made a suitable address, and then the British flag which enveloped the statue was drawn aside by a party of two seamen from the Naval Brigade, two Royal Marines, and two seamen of the Royal Navy.

Decorating a Native Afghan Soldier for Gallantry.

The town of Khelat-i-Ghilzai, located eighty-nine miles northeast of Candahar, on the road to Cabul, was occupied by the British on the 20th of February last. It has great natural strength, and enables the British to control the frontiers of a powerful confederacy. Shortly after the occupation General Donald Stewart had the regular and native troops mustered, and in their presence invested Mattadeen Dorbar, Subadar-Major of the Twelfth Khelat-i-Ghilzais, with the Order of British India, first-class, as a reward of distinguished gallantry. This officer had previously been honored with a number of decorations for valor.

New Law Courts at Sydney, N.S.W.

The new palace for the abode of the law, to be built on King Street, overlooking Hyde Park, the Domain and the harbor at Sydney, New South Wales, will be upwards of 560 feet long, 270 feet wide, 70 feet high, rising in the centre to 100 feet. Accommodations will be furnished for six courts, viz.: Banco, Jury, Equity, Divorce, Insolvency and District Courts; a law library and chamber, with all the conveniences for judges, barristers, jurors, witnesses, etc., together with the retiring and refreshment rooms, offices for the Minister of Justice and Public Instruction, Attorney-General and law officers, as well as the Department of Education. Roman architecture is the style chosen. This plan was prepared fourteen years ago, but ministerial changes and other causes have led to the delay, till now, when great prosperity and general activity have stimulated the Government to take steps to begin the much needed work.

AT HOME AND ABROAD.

—THE colored Baptists of Atlanta are organizing a seminary.

—THE Paris Opera now, including rent, costs the country altogether $800,000 a year.

—A FIRST-CLASS club, the Parthenon, is to be started in London, in which no liquors will be allowed.

—WORK has been resumed on Strasburg Cathedral and the restoration may be completed this year.

—THE tramps are fleeing Texas, having got the idea that a Bill to put them to work had passed the State Legislature.

—THE Emperor Francis Joseph has celebrated his silver wedding by granting forty stipends of $197 each for students of the Austrian Universities.

—A BILL making women eligible to the offices of Superintendent of Schools and School Inspector has been passed by the Michigan House of Representatives.

—GERMAN agriculturists are getting up a petition, praying their Government to absolutely prohibit the importation of American cattle, from fear of contagion.

—THE scaffolding that has remained for fifty-six years around the tower of Rouen Cathedral, in France, was removed a few days ago, the lantern having at length been completely restored.

—THE wages of male and female teachers come nearer to being equal in Colorado than in any other State in the Union. Men average $69.90 per month pay, women $46.95, less than $3 difference.

—AN official report to the Persian Government of the earthquake at Miandi on the 22d of March, says that twenty-one villages were totally destroyed, and 922 persons, 2,600 sheep, 1,125 oxen, 124 horses and 55 camels were killed.

—THE Stone estate at Malden has offered Andover Theological Seminary $100,000 and Phillips Academy $25,000, provided that $45,000 is raised from other sources, and the friends of the institutions are trying to raise the money.

—ACCORDING to the St. Petersburg *Golos*, the Russian Government will hereafter compel the proprietors of all factories to provide free hospitals and medical attendance for those of their employés who contract disease or suffer injuries in the factories.

—CARDINAL-ELECT NEWMAN reached Rome in safety, but in feebleness so great that the Pope, in thoughtful consideration of his age and weakness, forbade him from fulfilling immediately the customary formality of a visit to the Vatican, saying that he should not expect to see him there for some days.

—THE Mikado of Japan, who has reduced his own expenses, lately entertained his Ministers at dinner, and seized the occasion to reprehend their luxury and extravagance. The Prime Minister has, in consequence, issued an order enjoining strict economy in departments, and stopping further expenditure on public works.

—AN ancient burial crypt under New Haven's old Centre Church has been rejoined and will soon be opened for inspection. In it there are one hundred and seventy skins and thirteen tablets, one bearing the date 1687, while others have the names of Mrs. Rebecca Hayes, President Hayes's great-great-grandmother, and Margarette, Benedict Arnold's beautiful first wife.

—THE new monument to Edward Everett at Mount Auburn Cemetery, Boston, is composed of red polished granite from the Bay of Fundy. The shape is modeled on that of an ancient altar. A Greek fret is incised around the base. The frieze is of white marble, ornamented with classical festoons, while in the faces panels of white marble are inserted, bearing the inscriptions.

—A BRITISH cavalryman suggests that the art of swimming on horseback be regularly practiced, whenever possible, by the British cavalry, and urges as a reason the recent loss of an entire squadron of the Tenth Hussars while attempting to ford the River Cabul. He mentions that last Summer he saw a French cavalry regiment practice "mounted swimming" in the Seine. If either men or horses exhibited signs of nervousness the practice was repeated until confidence had been obtained.

—TOBACCO is largely cultivated in Russia, and the seed used on the plantations is from the United States and from Turkey. According to the official report for the year 1877, there were raised in twelve southern provinces about 3,000,000 poods (or 120,000,000 pounds); in Caucasus, 75,000 poods (or 3,000,000 pounds); and in Siberia 27,000 poods (1,080,000 pounds); or, altogether, about 3,102,000 poods. At the rate of two roubles per pood, the revenue from tobacco is over $6,000,000 a year. All the Russian tobacco is consumed by Russians.

—THE Permanent Exposition building at Cincinnati, for which contracts have just been given out, according to description, will be a substantial and ample building of brick and stone. It is anticipated that it will be so far finished as to be ready for the reception of goods by the 20th of August next, and opened to the public on the 10th of September. The new structure, it is understood, will be used for the holding of annual exhibitions of American manufactures on the general plan of the very successful competitive displays that have been held there for a number of years.

—LONDON is spread over about 7,000 square miles. There is one death there every six minutes, and one birth every four. The growth of the population is at the rate of 75,000 a year, or 205 each day. The total length of streets in London is about 7,000 miles; there are built every year about 9,000 new houses, by which the length of the streets is increased by twenty-eight miles. In the jails there is an average of 75,000 prisoners. The foreign-born residents of London number about 100,000, but thirty-seven per cent. of the whole population were born out of the city.

—MR. WITT, the Swedish missionary, speaks highly of the Zulus, and says that they are brave, generous and hospitable. They believe in the transmigration of souls after death into the bodies of serpents. Consequently every family has its pet serpent, and if this reptile goes away or dies, the circumstance is regarded as a presage of ill, and there is weeping and gnashing of teeth. Mr. Witt regards the Zulu hostility as the outgrowth of misconduct on the part of the European settlers, but says that now that they have begun fighting they will, so long, at least, as the present king lives, fight to the death.

—THE recent arrest and detention of Captain R. B. Wilber, of the schooner *Fellow Pine*, by the Government authorities of Nassau, on a charge of smuggling, is to be investigated by Secretary Evarts. The offense of the captain consisted in selling about one hundred pounds of butter, prepared by a new process, to Nassau merchants. The purchasers entered the butter at the Custom House, the duty was paid, and yet Captain Wilber was arrested on a charge of smuggling, his crew were put under restraint, and he was fined $500. Great indignation was caused among the Americans at Nassau by the arbitrary proceedings of the customs authorities.

AMONG THE LILIES.

DEEP in the heart of the wood's green shade
Sunbeams quiver, as half-afraid;
And south wind, whispering low through the trees,
Wooes the lilies to perfume the breeze.
Odorous lilies! Like fays afloat,
Each in her own broad leafy boat,
That sways and swings as the wavelets flow—
Swings and sways as the soft winds blow—
White and cool!—white and cool!
Pond-lilies float on the silent pool.

The timid rabbit comes here to drink,
And rest a while at the water's brink;
Save by the note of some sweet wild bird,
Scarce is the silvern silence stirred.
The nightingale calls to his tender mate—
The moon shines down on the lilies' state.
Proud queen lilies! The fair white flowers!
What is it they watch through the lonely hours?
Cold and white!—cold and white!
Floating, so still, on the waves to-night!

They watch a form that has gone to its rest,
And lies asleep on the pond's dark breast.
Frantic with shame and despair, Love's fool
Has found her grave in the silent pool,
And swings and sways as the waters flow—
Sways and swings as the sad winds blow—
Oh, maid too frail! Oh, maid too fond!
Oh, strange white lily afloat on the pond!
Swift and free!—swift and free!
Both pond and river roll down to the sea.

Kissing thine eyes in their last long sleep,
Sweet pond-lilies thy secret keep;
Clustering close round thy cold, dead face,
Kind pond-lilies thy form embrace.
Tangled with lilies thy golden hair,
White as the lilies thy features fair.
Purer now than e'en lilies can be,
Float out with the lilies to river and sea.
Float out! oh, thou lily-blossom of pain,
Where none but the angels shall find thee again.

CHARLOTTE M. STANLEY.

THE FALLEN LEAVES.

By WILKIE COLLINS.

CHAPTER XXVII.

AMELIUS left Mrs. Farnaby troubled by emotions of confusion and alarm, which he was the last man living to endure patiently. Her extraordinary story of the discovered daughter, the still more startling assertion of her resolution to leave the house—the absence of any plain explanation, the burden of secrecy imposed on him—all combined together to irritate his sensitive nerves. "I hate mysteries," he thought; "and ever since I landed in England I seem fated to be mixed up in them. Does she really mean to leave her husband and her niece? What will Farnaby do? What will become of Regina?"

To think of Regina was to think of the new repulse of which he had been made the subject. Again he had appealed to her love for him, and again she had refused to marry him at his own time.

He was especially perplexed and angry when he reflected on the unassailably strong influence which her uncle appeared to have over her. All Regina's sympathy was with Mr. Farnaby and his troubles. Amelius might have understood her a little better if she had told him what had passed between her uncle and herself on the night of Mr. Farnaby's return, in a state of indignation, from the lecture. In terror of the engagement being broken off, she had been forced to confess that she was too fond of Amelius to prevail on herself to part with him. If he attempted a second exposition of his Socialist principles on the platform, she owned that it might be impossible to receive him again as a suitor. But she pleaded hard for the granting of a pardon to the first offense, in the interests of her own tranquillity, if not in mercy to Amelius. Mr. Farnaby (already troubled by his commercial anxieties) had listened more amiably, and also more absently, than usual, and had granted her petition with the ready indulgence of a preoccupied man. It had been decided between them that the offense of the lecture should be passed over in discreet silence. Regina's gratitude for this concession inspired her sympathy with her uncle in his present state of suspense. She had been sorely tempted to tell Amelius what had happened. But the natural reserve of her character—fortified, in this instance, by the defensive pride which makes women unwilling (before marriage) to confess their weakness unreservedly to the man who has inspired it—had sealed her lips. "When he is a little less violent and a little more humble," she thought, "perhaps I may tell him."

So it fell out that Amelius took his way through the streets, a mystified and an angry man.

Arrived in sight of the hotel, he stopped and looked about him.

It was impossible to disguise from himself that a lurking sense of regret was making itself felt, in his present frame of mind, when he thought of Simple Sally. In all probability he would have quarreled with any man who had accused him of actually lamenting the girl's absence and wanting her back again. He happened to recollect her artless blue eyes, with their vague, patient look, and her quaint childish questions, put so openly in so sweet a voice—and that was all. Was there anything reprehensible, if you please, in an act of remembrance? Comforting himself with these considerations, he moved on again a step or two—and stopped once more. In his present humor he shrank from facing Rufus. The American read him like a book; the American would ask irritating questions. He turned his back on the hotel, and looked at his watch. As he took it out his finger and thumb touched something else in his waistcoat pocket. It was the card that Regina had given to him—the card of the cottage to let. He had nothing to do and nowhere to go. Why not look at the cottage? If it proved to be not worth seeing, the Zoological Gardens were in the neighborhood—and there are periods in a man's life when he finds the society that walks on four feet a welcome relief from the society that walks on two.

It was a fairly fine day. He turned northward towards the Regent's Park.

The cottage was in a by-road just outside the Park—a cottage in the strictest sense of the word. A sitting-room, a library and a bedroom—all of small proportions—and, under them, a kitchen and two more rooms, represented the whole of the little dwelling from top to bottom. It was simply and prettily furnished; and it was completely surrounded by its own tiny plot of garden-ground. The library especially was a perfect little retreat, looking out on the back garden, peaceful and shady, and adorned with bookcases of old carved oak.

Amelius had scarcely looked round the room before his inflammable brain was on fire with a new idea. Other idle men in trouble had found the solace and the occupation of their lives in books. Why should he not be one of them? Why not plunge into study in this delightful retirement—and perhaps, one day, astonish Regina and Mr. Farnaby by bursting on the world as the writer of a famous book? Exactly as Amelius, two days since, had seen himself in the future, a public lecturer in receipt of glorious fees—so he now saw himself the celebrated scholar and writer of a new era to come. The woman who showed the cottage happened to mention that a gentleman had already looked over it that morning, and had seemed to like it. Amelius instantly gave her a shilling, and said, "I take it on the spot." The wondering woman referred him to the house-agent's address, and kept at a safe distance from the excitable stranger as she let him out. In less than another hour Amelius had taken the cottage and had returned to the hotel with a new interest in life and a new surprise for Rufus.

As usual, in cases of emergency, the American wasted no time in talking. He went out at once to see the cottage and to make his own inquiries of the agent. The result amply proved that Amelius had not been imposed upon. If he repented of his bargain the gentleman who had first seen the cottage was ready to take it off his hands at a moment's notice.

Going back to the hotel, Rufus found Amelius resolute to move into his new abode and eager for the coming life of study and retirement. Knowing perfectly well beforehand how this latter project would end, the American tried the efficacy of a little worldly temptation. He had arranged, he said, "to have a good time of it in Paris," and he proposed that Amelius should be his companion. The suggestion produced not the slightest effect. Amelius talked as if he was a confirmed recluse, in the decline of life. "Thank you," he said, with the most amazing gravity; "I prefer the company of my books and the seclusion of my library." This declaration was followed by more selling-out of money in the Funds, and by a visit to a bookseller, which left a handsome pecuniary result inscribed on the right side of the ledger.

On the next day Amelius presented himself towards two o'clock at Mr. Farnaby's house. He was not so selfishly absorbed in his own projects as to forget Mrs. Farnaby. On the contrary he was honestly anxious for news of her.

A certain middle-aged man of business has been briefly referred to, in these pages, as one of Regina's faithful admirers, patiently submitting to the triumph of his favored young rival. This gentleman, issuing from his carriage with his card case ready in his hand, met Amelius at the door, with a face which announced plainly that a catastrophe had happened. "You have heard the sad news, no doubt?" he said, in a rich bass voice, attuned to sadly-courteous tones. The servant opened the door before Amelius could answer. After a contest of politeness, the middle-aged gentleman consented to make his inquiries first. "How is Mr. Farnaby? No better? And Miss Regina? Very poorly, eh? Dear, dear me! Say I called, if you please." He handed in two cards, with a severe enjoyment of the melancholy occasion and the rich bass sounds of his own voice. "Very sad, is it not?" he said, addressing his youthful rival with an air of paternal indulgence. "Good-morning." He bowed with melancholy grace, and got into his carriage.

Amelius looked after the prosperous merchant, as the prancing horses drew him away. "After all," he thought, bitterly, "she might be happier with that rich prig than she could be with me." He stepped into the hall, and spoke to the servant. The man had his message ready. Miss Regina would see Mr. Goldenheart, if he would be so good as to wait in the dining-room.

Regina appeared, pale and scared, her eyes inflamed with weeping. "Oh, Amelius, can you tell me what this dreadful misfortune means? Why has she left us? When she sent for you yesterday, what did she say?"

In his position, Amelius could make but one answer. "Your aunt said she thought of going away. But," he added, with perfect truth, "she refused to tell me why, or where, she was going. I am quite as much at a loss to understand her as you are. What does your uncle propose to do?"

Mr. Farnaby's conduct, as described by Regina, thickened the mystery—he proposed to do nothing.

He had been found on the hearth-rug in his dressing-room, having apparently been seized with a fit, in the act of burning some paper. The ashes were discovered close by him, just inside the fender. On his recovery, his first anxiety was to know if a letter had been burnt. Satisfied on this point, he had ordered the servants to assemble round his bed, and had peremptorily forbidden them to open the door to their mistress, if she ever returned at any future time to the house. Regina's questions and remonstrances, when she was left alone with him, were answered, once for all, in these pitiless terms: "If you wish to deserve the fatherly interest that I take in you, do as I do—forget that such a person as your aunt ever existed. We shall quarrel if you ever mention her name in my hearing again." This said, he had instantly changed the subject, instructing Regina to write an excuse to "Mr. Melton" (otherwise the middle-aged rival), with whom he had been engaged to dine that evening. Relating this latter event, Regina's ever-ready gratitude overflowed in the direction of Mr. Melton. "He was so kind! he left his guests in the evening, and came and sat with my uncle for nearly an hour." Amelius made no remark on this; he led the conversation back to the subject of Mrs. Farnaby. "She once spoke to me of her lawyers," he said. "Do *they* know nothing about her?"

The answer to this question showed that the sternly-final decision of Mr. Farnaby was matched by equal resolution on the part of his wife.

One of the partners in the legal firm had called that morning, to see Regina on a matter of business. Mrs. Farnaby had appeared at the office on the previous day, and had briefly expressed her wish to make a small annual provision for her niece, in case of future need. Declining to enter into any explanation, she had waited until the necessary document had been drawn out; had requested that Regina might be informed of the circumstance; and had then taken her departure in absolute silence. Hearing that she had left her husband, the lawyer (like every one else) was completely at a loss to understand what it meant.

"And what does the doctor say?" Amelius asked next.

"My uncle is to be kept perfectly quiet," Regina answered; "and is not to return to business for some time to come. Mr. Melton, with his usual kindness, has undertaken to look after his affairs for him. Otherwise, my uncle, in his present state of anxiety about the bank, would never have consented to obey the doctor's orders. When he can safely travel, he is recommended to go abroad for the Winter, and get well again in some warmer climate. He refuses to leave his business—and the doctor refuses to take the responsibility. There is to be a consultation of physicians to-morrow. Oh, Amelius, I was really fond of my aunt—I am heart-broken at this dreadful change!"

There was a momentary silence. If Mr. Melton had been present, he would have said a few neatly sympathetic words. Amelius knew no more than a savage of the art of conventional consolation. Tadmor had made him familiar with the social and political questions of the time, and had taught him to speak in public. But Tadmor, rich in books and newspapers, was a powerless training institution in the matter of small talk.

"Suppose Mr. Farnaby is obliged to go abroad," he suggested, after waiting a little, "what will you do?"

Regina looked at him with an air of melancholy surprise. "I shall do my duty, of course," she answered, gravely. "I shall accompany my dear uncle if he wishes it." She glanced at the clock on the mantelpiece. "It is time he took his medicine," she resumed; "you will excuse me, I am sure." She shook hands, not very warmly, and hastened out of the room.

Amelius left the house with a conviction which disheartened him—the conviction that he had never understood Regina, and that he was not likely to understand her in the future. He turned for relief to the consideration of Mr. Farnaby's strange conduct, under the domestic disaster which had befallen him.

Recalling what he had observed for himself, and what he had heard from Mrs. Farnaby when she had first taken him into her confidence, he inferred that the subject of the lost child had not only been a subject of estrangement between the husband and wife, but that the husband was, in some way, the person blamable for it. Assuming this theory to be the right one, there would be serious obstacles to the meeting of mother and child in the mother's home. The departure of Mrs. Farnaby was, in that case, no longer unintelligible, and Mr. Farnaby's otherwise inexplicable conduct had the light of a motive thrown on it, which might not unnaturally influence a hard-hearted man weary alike of his wife and his wife's troubles. Arriving at this conclusion by a far shorter process than is here indicated, Amelius pursued the subject no further. At the time when he had first visited the Farnabys, Rufus had advised him to withdraw from closer intercourse with them, while he had the chance. In his present mood, he was almost in danger of acknowledging to himself that Rufus had proved to be right.

He lunched with his American friend at the hotel. Before the meal was over, Mrs. Payson called, to say a few cheering words about Sally.

It was not to be denied that the girl remained persistently silent and reserved. In other respects the report was highly favorable. She was obedient to the rules of the house; she was always ready with any little services that she could render to her companions; and she was so eager to improve herself, by means of her reading-lessons and writing-lessons, that it was not easy to induce her to lay aside her book and her slate. When the teacher offered her some small reward for her good conduct, and asked her what she would like, the sad little face brightened, and the faithful creature's answer was always the same. "I should like to know what he is doing now." (Alas for Sally—"he" meant Amelius!)

"You must wait a little longer before you write to her," Mrs. Payson concluded; "and you must not think of seeing her for some time to come. I know you will help us by consenting to this—for Sally's sake."

Amelius bowed in silence. He would not have confessed what he felt, at that moment, to any living soul—it is doubtful if he even confessed it to himself. Mrs. Payson, observing him with a woman's keen sympathy, relented a little. "I might give her a message," the good lady suggested—"just to say you are glad to hear she is behaving so well."

"Will you give her this?" Amelius asked.

He took from his pocket a little photograph of the cottage, which he had noticed on the house-agent's desk, and had taken away with him. "It is my cottage now," he explained, in tones that faltered a little; "I am going to live there; Sally might like to see it."

"Sally *shall* see it," Mrs. Payson agreed—"if you will only let me take this away first?" She pointed to the address of the cottage, printed under the photograph. Past experience in the Home made her reluctant to trust Sally with the address in London at which Amelius was to be found.

Rufus produced a huge complex knife, out of the depth of which a pair of scissors burst on touching a spring. Mrs. Payson cut off the address, and placed the photograph in her pocket-book. "Now," she said, "Sally will be happy, and no harm can come of it."

"I've known you, ma'am, nigh on twenty years," Rufus remarked. "I do assure you that's the first rash observation I ever heard from your lips."

CHAPTER XXVIII.

TWO days later, Amelius moved into his cottage. He had provided himself with a new servant, as easily as he had provided himself with a new abode. A foreign waiter at the hotel—a gray-haired Frenchman of the old school, reputed to be the most ill-tempered servant in the house—had felt the genial influence of Amelius with the receptive readiness of his race. Here was a young Englishman, who spoke to him as easily and pleasantly as if he was speaking to a friend—who heard him relate his little grievances, and never took advantage of that circumstance, to turn him into ridicule—who said kindly, "I hope you don't mind my calling you by your nickname," when he ventured to explain that his Christian name was "Théophile," and that his English fellow-servants had facetiously altered and shortened it to "Toff," to suit their insular convenience. "For the first time, sir," he had hastened to add, "I feel it an honor to be Toff, when you speak to me." Asking everybody whom he met if they could recommend a servant to him, Amelius had put the question, when Toff came in one morning with the hot water. The old Frenchman made a low bow, expressive of devotion. "I know of but one man, sir, whom I can safely recommend," he said. "Take me." Amelius was delighted; he had only one objection to make. "I don't want to keep two servants," he said, while Toff was helping him on with his dressing-gown. "Why should you keep two servants, sir?" the Frenchman inquired. Amelius answered, "I can't ask you to make the beds." "Why not?" said Toff—and made the bed, then and there, in five minutes. He ran out of the room, and came back with one of the chambermaid's brooms. "Judge for yourself, sir—can I sweep a carpet?" He placed a chair for Amelius. "Permit me to save you the trouble of shaving yourself. Are you satisfied? Very good. I am equally capable of cutting your hair, and attending to your corns (if you suffer, sir, from that inconvenience). Will you allow me to propose something which you have not yet had for your breakfast?" In half an hour or more, he brought in the new dish. "Œufs à la Tripe. An elementary specimen, sir, of what I can do for you as a cook. Be pleased to taste it." Amelius eat it all up on the spot; and Toff applied the moral, with the neatest choice of language. "Thank you, sir, for a gratifying expression of approval. One more specimen of my poor capabilities, and I have done. It is barely possible—God forbid!—that you may fall ill. Honor me by reading that document." He handed a written paper to Amelius, dated some years since in Paris, and signed in an English name. "I testify with gratitude and pleasure that Théophile Leblond has nursed me through a long illness, with an intelligence and devotion which I cannot too highly praise." "May you never employ me, sir, in that capacity," said Toff. "I have only to add that I am not so old as I look, and that my political opinions have changed, in later life, from red-republican to moderate liberal. I also confess, if necessary, that I still have an ardent admiration for the fair sex." He laid his hand on his heart, and waited to be engaged.

So the household at the cottage was modestly limited to Amelius and Toff.

Rufus remained for another week in London, to watch the new experiment. He had made careful inquiries into the Frenchman's character, and had found that the complaints of his temper really amounted to this—that "he gave himself the airs of a gentleman, and didn't understand a joke." On the questions of honesty and sobriety, the testimony of the proprietor of the hotel left Rufus nothing to desire. Greatly to his surprise, Amelius showed no disposition to grow weary of his quiet life, or to take refuge in perilous amusements from the sober society of his books. He was regular in his inquiries at Mr. Farnaby's house; he took long walks by himself; he never mentioned Sally's name; he lost his interest in going to the theatre, and he never appeared in the smoking-room of the club. Some men, observing the remarkable change which had passed over his excitable temperament, would have hailed it as a good sign for the future. The New Englander looked below the surface, and was not so easily deceived. "My bright boy's soul is discouraged and cast down," was the conclusion that he drew. "There's darkness in him where there once was light—and,

Digitized by Google

what's worse than all, he caves in, and keeps it to himself." After vainly trying to induce Amelius to open his heart, Rufus at last went to Paris, with a mind that was ill at ease.

On the day of the American's departure the march of events was resumed, and the unnaturally quiet life of Amelius began to be disturbed again.

Making his customary inquiries in the forenoon at Mr. Farnaby's door, he found the household in a state of agitation. A second council of physicians had been held in consequence of the appearance of some alarming symptoms in the case of the patient. On this occasion the medical men told him plainly that he would sacrifice his life to his obstinacy if he persisted in remaining in London and returning to his business. By good fortune the affairs of the bank had greatly benefited, through the powerful interposition of Mr. Melton. With these improved prospects Mr. Farnaby submitted to the doctors' advice. He was to start on the first stage of his journey the next morning, and, at his own earnest desire, Regina was to go with him. "I hate strangers and foreigners, and I don't like being alone. If you don't go with me I shall stay where I am—and die." So Mr. Farnaby put it to his adopted daughter, in his rasping voice and with his hard frown.

"I am grieved, dear Amelius, to go away from you," Regina said; "but what can I do? It would have been so nice if you could have gone with us. I did hint something of the sort, but——"

Her downcast face finished the sentence. Amelius felt the bare idea of being Mr. Farnaby's traveling-companion make his blood run cold; and Mr. Farnaby, on his side, reciprocated the sentiment. "I will write constantly, dear," Regina resumed; "and you will write back, won't you? Say you love me, and promise to come to-morrow morning, before we go."

She kissed him affectionately—and, the instant after, checked the responsive outburst of tenderness in Amelius by that utter want of tact which (in spite of the popular delusion to the contrary) is so much more common in women than in men. "My uncle is so particular about packing his linen," she said, "nobody can please him but me; I must ask you to let me run up-stairs again."

Amelius went out into the street with his head down and his lips fast closed. He was not far from Mrs. Payson's house. "Why shouldn't I call?" he thought to himself. His conscience added, "and hear some news of Sally."

There was good news. The girl was brightening mentally and physically. She was in a fair way, if she only remained in the House, to be "Simple" Sally no longer. Amelius asked if she had got the photograph of the cottage. Mrs. Payson laughed. "Sleeps with it under her pillow, poor child," she said, "and looks at it fifty times a day." Thirty years since, with infinitely less experience to guide her, the worthy matron would have followed her instincts, and would have hesitated to tell Amelius quite so much about the photograph. But some of a woman's finer sensibilities do get blunted with the advance of age and the accumulation of wisdom.

Instead of pursuing the subject of Sally's progress, Amelius, to Mrs. Payson's surprise, made a clumsy excuse, and abruptly took his leave.

He felt the need of being alone; he was conscious of a vague distrust of himself, which degraded him in his own estimation. Was he, like characters he had read of in books, the victim of a fatality? The slightest circumstances conspired to heighten his interest in Sally—just at the time when Regina had once more disappointed him. He was as firmly convinced, as if he had been the strictest moralist living, that it was an insult to Regina, and an insult to his own self-respect, to set the lost creature whom he had rescued in any light of comparison with the young lady who was one day to be his wife. And yet, try as he might to drive her out, Sally kept her place in his thoughts. There was, apparently, some innate depravity in him. If a looking glass had been handed to him at that moment, he would have been afraid to look himself in the face.

After walking until he was weary, he went to his club.

The porter gave him a letter as he crossed the hall. Mrs. Farnaby had kept her promise, and had written to him. The smoking-room was deserted at that time of day. He opened his letter in solitude, looked at it, crumpled it up impatiently, and put it into his pocket. Not even Mrs. Farnaby could interest him at that critical moment. His own affairs absorbed him. The one idea in his mind, after what he had heard about Sally, was the idea of making a last effort to hasten the date of his marriage before Mr. Farnaby left England. "If I can only feel sure of Regina——"

His thoughts went no further than that. He walked up and down the empty smoking-room, anxious and irritable, dissatisfied with himself, despairing of the future. "I can but try it!" he suddenly decided, and turned at once to the table to write a letter.

Death had been busy with the members of his family in the long interval that had passed since he and his father left England. His nearest surviving relative was his uncle—his father's younger brother—who occupied a post of high importance in the Foreign Office. To this gentleman he now wrote, announcing his arrival in England, and his anxiety to qualify himself for employment in a Government office. "Be so good as to grant me an interview," he concluded; "and I hope to satisfy you that I am not unworthy of your kindness, if you will exert your influence in my favor."

He sent away his letter at once by a private messenger, instructing the man to wait for an answer.

It was not without doubt, and even pain that he had opened communications with a man whose harsh treatment of his father it was impossible for him to forget. What could the son expect? There was but one hope. Time might have softened his heart, and might incline him to make a tardy atonement to the memory of his brother, by kindness to his brother's only son.

His father's last word of caution, his own boyish promise not to claim kindred with his relations in England, were vividly present to the mind of Amelius, while he waited for the return of the messenger. His one justification was in the motives that animated him. Circumstances, which his father had never anticipated, rendered it an act of duty towards himself to make the trial at least of what his family interest could do for him. There could be no sort of doubt that a man of Mr. Farnaby's character would yield, if Amelius would announce that he had the promise of an appointment under Government—with the powerful influence of a near relation to accelerate his promotion. He sat, idly drawing lines on the blotting-paper; at one moment regretting that he had sent his letter; at another, comforting himself in the belief that, if his father had been living to advise him, his father would have approved of the course that he had taken.

The messenger returned with these lines of reply: "Under any ordinary circumstances, I would have used my influence to help you on in the world. But, when you not only hold the most abominable political opinions, but actually proclaim those opinions in public, I am amazed at your audacity in writing to me. There must be no further communication between us. While you are a Socialist, you are a stranger to me."

(To be continued.)

German Theological Students.

ONE of the most remarkable facts in German University life is the extraordinary decrease for years past in the number of the students of theology. The decrease is so great that in several States there has been an insufficiency of candidates for the pulpit. Until now Schleswig-Holstein was an extensive nursery-ground of theologians, but there also a falling off by nearly forty per cent. has recently occurred. At Kiel there are at present twenty-four, at other German Universities, twenty-eight students of theology, of Schleswig-Holstein origin—altogether fifty-two. Six years ago there were still ninety of them, whilst fifty years ago there had been no less than 168 students of theology at Kiel alone, almost all of them being Schleswig-Holsteiners! It is to be feared that the progress of Natural Science and the deciphering of Assyrian clay-tablets have wrought sad havoc in the German Theological Faculty.

Zoological Mail Bags.

GERMAN post-offices are zoological gardens on a small scale. In the course of a year as many as 40,000 live animals are sent by post, and if crabs, frogs, bees and small insects are counted, the total will be among the millions. The post-office authorities have the privilege of excluding such animals as may be deemed either dangerous or disagreeable; but within the last six months only thirty-nine packages of living animals were refused, among which were an alligator, done up in a box considered as too fragile; a lot of dogs, whose persistent barking could not be quieted, and a number of pigeons loosely tied up in a sack. On the other hand, during the same period, a crocodile, scores of birds of prey, monkeys, serpents, a leopard and four living bear cubs were transmitted by post.

Grain at the World's Fair.

THE report upon agriculture by J. J. Woodman, of Michigan, Assistant Commissioner to the Paris Exposition, contains an interesting account of the exhibit of grains. It says the finest exhibit of agricultural products from the United States was that of the Oregon State Commission. The report contains a comparative statement of the present condition of agricultural interests in the principal countries of Europe, noting especially the points in which they differ from the same industries in our own country. In France the average size of farms is sixteen and a half acres arable or thirty-three and a half acres of productive land, making 3,977,781 farms. Of these, 2,826,388, or 71 per cent., are cultivated by the owners; 831,343, or only 21 per cent., are rented at a fixed price and 8 per cent. are worked on shares. The free use of fertilizers is mentioned as the reason for the heavy crops realized from small areas. The advantage of rotation has also been fully demonstrated in France. In the English exhibit samples of Molds's new varieties of wheat were shown in the straw and attracted much attention. It was claimed that this wheat could be sown one month earlier and would require only one-half the quantity of the old varieties, and would produce 105 grains from a single stalk, and 113 bushels, from a single acre. The report shows that the average production of England per acre is greater than in any other country in Europe, if not in the world. In Austria and Hungary 92¾ per cent of the whole territory is productive, and the soil is highly favorable for agriculture. The farmers generally own the soil they cultivate.

An elaborate and comprehensive table, giving the average amount of the cereal production of the European countries which furnish a surplus for commerce, and also those which are obliged to import breadstuffs, shows that the average annual production of cereals in Europe amounts to 5,147,796,000 bushels, of which Russia produces 1,655,921,000 bushels, or nearly one-third; the whole of Germany, 765,000,000 bushels; France, 710,130,000 bushels and Hungary, 300,330,000. On the basis of an average of 15 78-100 bushels of cereals for each person for home consumption, Roumania, Denmark, Russia, Prussia, France, Hungary, Bavaria and Sweden alone raise sufficient for home consumption. A comparison of the production of cereals per capita for the whole population of Europe with that for the United States gives the former about seventeen bushels and the latter forty bushels.

The report says that many of the countries of Europe, especially Great Britain and France, are largely deficient in meat products and that they are now turning their attention to the United States for supplies. The report says that English stock-raisers, who have become alarmed at the success which has attended the importation of American beef, have recently discovered that American cattle can be imported and fed even upon American grain at present prices with considerable profit to the English importer.

SCIENTIFIC INTELLIGENCE.

Professor J. Lawrence Smith, of Louisville, Ky., has been elected by the Academy of Sciences, Paris, Correspondent in Mineralogy, in room of the late Sir Charles Lyell.

We Regret to Announce the death of Herr Ludwig Reichenbach, an eminent German botanist and zoologist. He died at Dresden on the 16th ultimo, aged eighty-six years.

Dr. Alexander Dixon, Professor in the University of Glasgow, has been elected to the Professorship of Botany in the University of Edinburgh, vacant by the resignation of Dr. Balfour.

Chemists Turned Astronomers.—The Chemical Society of Russia is now discussing the means of a thorough study of the surface of the moon, especially by means of spectrum analysis.

The Various German Societies for the protection of animals are now keenly discussing the vivisection question, and have arranged a congress, which will shortly meet at Gotha, and which is to fix the final resolutions.

L. Babe has announced to the Paris Geographical Society, that he proposes to explore the globe by means of an improved Montgolfier balloon, capable of storing heat in all regions and of maintaining a sufficient height for several weeks.

The Paint-mine at Reno, Nevada, comprises a ledge forty-two feet wide and of unknown depth. The material is said to mix well with oil and not to settle on standing. The mineral contains a small quantity of silver and traces of gold.

A Monument to Niepce.—A committee has been organized in France to obtain subscriptions for erecting a statue to Nicephore Niepce, the inventor of photography. A circular has been published and will be sent to all scientific societies over the world.

A University for Women will be opened shortly in Odessa. It will have three faculties—history and literature, mathematics and natural science. The programme will be the same as in the other Russian universities for male students, with slight changes. Greek will not be obligatory, but pedagogy and hygiene will be required.

The German Scientific World is much gratified at the distinction conferred upon Dr. Julius Schmidt, of Athens, by the French Academy of Sciences, which recently honored Dr. Schmidt by presenting him with the Prix Valz in recognition of his work on the Moon. This prize is only given for important astronomical work, and has not been awarded since 1870.

One of the New Industries of Germany, reported by Dr. Stutzer to be "now in a flourishing condition," is the manufacture of artificial clover-seed. Fragments of gravel are sifted until particles of a suitable size are obtained, and the substitute for the seed is then shaken up with some coloring substance until it acquires the desired hue. An ordinary pocket-microscope is quite sufficient, however, to expose the cheat.

The Eighteenth Centenial of the Destruction of Pompeii.—In the present year, the eighteen centuries will be complete which have elapsed since Pompeii was destroyed by a rain of ashes and torrents of lava from Mount Vesuvius. The directors of the excavations at Pompeii intend to commemorate the event in a scientific manner in November next. No doubt the charming letters which Pliny wrote at the time will be read on this novel occasion.

Quite a Heavy Business is done in California in shipping to China the shells of the shrimp, which are caught in such numbers on the coast, and there is almost as much profit from the sale of the shells as from the shrimps themselves. The use they are put to in China is as a manure, and as a poison to the worm which works such destruction to the tea-plant of that country. The Chinamen state that this is the only remedy at present known for the tea pest.

The Ganss Monument for the City of Brunswick is now very nearly completed, the casting taking place in the studio of Professor Howard, at Brunswick, after Herr Schaper's model, the well-known Berlin sculptor. The figure will measure nine feet in height, and the great mathematician is represented in a fur coat with a book in his left hand, bearing the inscription, "Disquisitiones," the work which rendered his name immortal. The head is said to be a masterpiece of the plastic art.

Pre-historic Dwellings on Lake Geneva.—Recent explorations of the lake-dwellings of Lake Geneva in Switzerland, prove that they were destroyed by fire during a Spring, when the waters of the lake stood at the same level as now. A layer of charcoal from the burnt dwellings is to be found along the whole coast, beneath a layer of sand and gravel. Numerous objects have been brought to light, such as remains of textures, and implements dating from the stone, bronze and iron ages.

Precipitation of Copper.—Mr. Julio Ospina, a student of the College of Mining of the University of California proposed a modification in the precipitation of copper, by means of iron, in its extraction by the wet process, to be applied when the precipitating iron is in the shape of filings or iron sponge, for the purpose of avoiding the mixing of the fine iron with the copper precipitates. The process consists in packing the iron into bags before putting it into the copper solution. It is based on the principle that the precipitation is effected in an electrolytic way. The precipitation has to be made at a high temperature, and from a solution not exceeding 12° B., in order to obtain a loose sponge that can be easily detached from the bag.

Annual Expenses of the Institute of France.—The Institute of France is composed of only five academies: the French Academy, the Academy of Belles-lettres, the Academy of Fine Arts, the Academy of Moral and Political Science, and the Academy of Sciences. The first four contain each forty members, the last sixty-eight, making in all two hundred and twenty-eight members who individually receive 1,500 francs ($300). Each of the six secretaries have 6,000 francs ($1,200). The corresponding members have each 200 francs ($60). The expenses of printing, purchase of instruments, of the library, etc., amount to 208,000 francs ($41,600). The total budget of the Institute for 1879, as voted by the Assembly, is 698,275 francs ($139,655).

The Heliotrope in Geodetic Surveys.—Professor I. M. Haupt describes, in the Journal of the Franklin Institute, the use of the heliotrope in reflecting the sun's rays to distant points, and thus facilitating the reading of angles, either horizontal or vertical, on lines of from fifteen to one hundred miles long. Its construction is so simple that it may be made by any schoolboy with a penknife. Two opaque screens are placed about eighteen inches apart upon a strip of wood forming a base, and screwed or nailed fast. A hole about one inch in diameter should be cut through each screen, the one in rear being a little larger than the other, and across each there should be drawn two fine wires or threads so as to intersect each other. About six inches in rear of the screens there should be placed a small mirror, three inches in diameter, so mounted as to have the two motions horizontal (or in azimuth) and vertical (or in altitude). The crude instrument is then ready for operation. The rays reflected from it are plainly visible to the naked eye at from thirty to fifty miles, and with telescopes have been seen at a distance of nearly one hundred miles across Lake Superior when no trace of land was visible.

PERSONAL GOSSIP.

THE Empress Augusta of Germany will visit England this month.

LORD DUFFERIN is having a beautiful American yacht built in Rhode Island.

THE late William B. Howes, of Salem, has left $150,000 to the Boston Athenæum.

THE Texas Legislature has passed a law giving 640 acres to every veteran pensioner.

DR. LOUIS A. PAYNE, of New York, has been elected President of the American Medical Association.

AT the annual meeting of the Iron and Steel Institute in London, the Bessemer medal was awarded to Peter Cooper, of New York.

THE Crown Prince of Austria, the Archduke Rodolf, who arrived at Madrid on May 7th, was received in great state by the King and Court.

FRANCIS PARKMAN, the historian, has been made an LL.D. by McGill University at Montreal, in spite of the opposition of the press.

EX-GOVERNOR RICE, of Massachusetts, has received an elegant album from the associates of his staff containing their photographs individually and in a group.

GENERAL SHERMAN and his wife will hereafter live permanently in Washington. They have leased the residence on Fifteenth Street just vacated by Admiral Almy.

THE Right Rev. Bishop Ryan of St. Louis will deliver the sermon at the dedication of the Cathedral in New York. He is one of the most eloquent clergymen at the West.

ALL of Mrs. Nellie Grant Sartoris's bridesmaids except two—Miss Barnes and Miss Fish—are now married. Miss Bessie Conkling was the sixth of those eight young ladies.

COLONEL T. W. HIGGINSON has a handsome Swiss villa nearly completed at West Manchester, Mass. It is well situated, and is one of the prettiest cottages on that shore.

GEORGE ELIOT'S overwhelming grief at the death of her husband is reported to have so aggravated an incurable internal malady that her health is hopelessly shattered.

THE Hon. Robert C. Winthrop, Mr. R. H. Eddy, and the Rev. R. C. Waterston are three Bostonians to whom has been accorded fellowships in the Royal Historical Society of Great Britain.

PRINCE ALEXANDER of Battenburg dined with the Emperor William, at Wiesbaden, on May 6th. The Prince will visit the Czar at Livadia before receiving the Bulgarian deputation which is to tender him the throne of Bulgaria.

PROFESSOR COX, of Yale College, has received a call to the pulpit of the Collegiate Reformed Church of New York City, corner of Forty-eighth Street and Fifth Avenue, and it is reported, on good authority, that he has decided to accept.

SENOR CASTELAR will be in London this month, will receive from Oxford University the degree of Doctor of Laws, and will be consulted by the Evangelical Alliance respecting their future operations in spreading Protestantism in Spain.

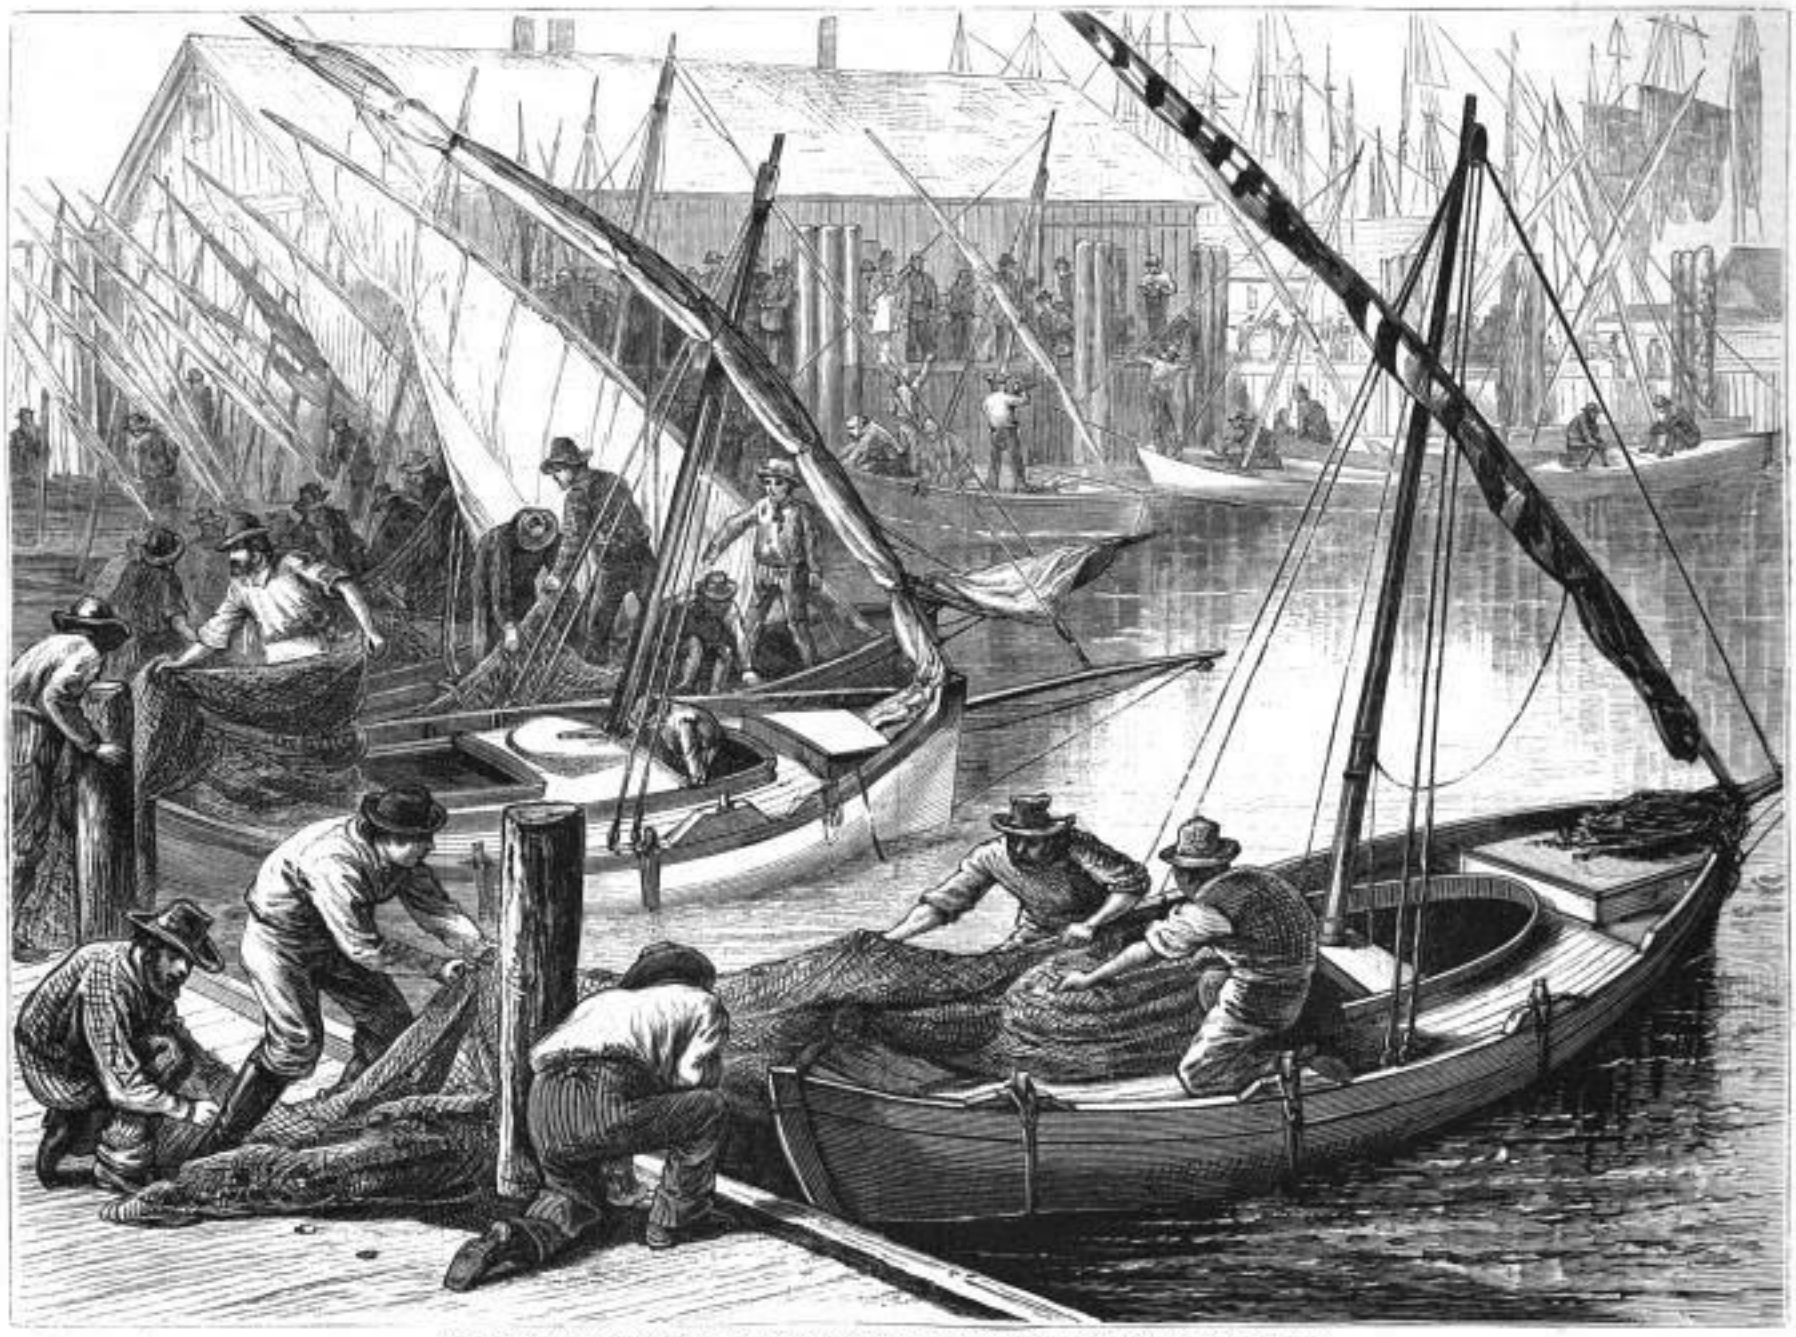
MISS MARY HALL, a sister of the late Ezra Hall, has been appointed by Judge Beardsley a Commissioner of the Superior Court of Connecticut. The New Haven *Journal* says that this is the first appointment of a woman to an office of this kind in the State.

IT is understood that by the will of Mr. Howes, a former resident of Salem, who died recently at Aiken, S. C., the Boston Athenæum will receive $150,000, the Essex Institute $20,000, the Salem Athenæum $10,000, and Mr. George R. Jewett, of Salem, about $6,000.

THE people of Amsterdam have presented the new Queen of Holland with a superb set of diamonds, and as Amsterdam is illustrious on account of its trade in these jewels, it may be imagined that the brilliants were of the first water, and the setting simply incomparable.

AT the last meeting of the Royal Humane Society, the honorary bronze medal was awarded to Mr. Cheney R. Prouty, Collector of Customs at Indianola, Tex., for gallantry exhibited May 5th, 1878, in swimming two miles in shark-infested waters from an overturned boat to bring assistance and rescue a British subject.

GENERAL GRANT'S departure from Lucknow was exceedingly stately. A long line of big elephants were stationed along the railway track near the station, a battery fired off a royal salute, a military guard was drawn up facing the station, and a band played one of our national airs, while the British officers and civilians stood with uncovered heads.



MRS. JULIA THUILLIER LANDOR, the widow of the poet, Walter Savage Landor, has just died at the Villa Landor, near Florence, in her eighty-sixth year. She was a lady of Swiss extraction, and married Mr. Landor when she was eighteen. She has lived at Florence ever since her husband's death, the eldest of their three sons, Mr. Arnold Savage Landor, residing on the family estate of Ipsley Court, Warwickshire.

MARGARET OF ITALY is fond of poetry, of novels, of Government debates and squabbles. She is even interested in archæology. She reads a little of everything, and when she is about to see literary celebrities is said to "cram" their writings in preparation for the interview. She has just received Mr. Samuel Smiles, whose works, by-the-way, are very popular, through translation, in Italy. The Queen met him very cordially, talked with him most understandingly about his books, and sent him away enchanted with her graciousness and good sense.

THE ex-Empress Carlotta has an income of $360,000. Her case is hopeless. She occupies herself with writing and painting, her correspondence being almost entirely addressed to sovereigns. She imagines constantly that she is still at her Mexican court receiving ministers, generals and ambassadors, and talks with these shadowy grandees as if they were indeed around her. She talks but little to her attendants, but enjoys exceedingly the presence of the Queen of Belgium, of whom she is very fond. The unhappy lady wears extraordinary toilets, and seems to prefer the most garish colors.

THE will of the late Robert Means Mason, of Boston, contains the following public bequests: To the trustees of the Episcopal Theological School at Cambridge, Mass., $5,000 as a permanent fund, the income to keep in perpetual repair St. John's Memorial Church; to the same trustees $20,000, the income to be appropriated for the general purposes of the school; to the Massachusetts General Hospital $5,000, for the support of free beds; to the Church for Orphans and Destitute Children in Boston, organized by his brother Charles, $10,000, the income to be used for general purposes; to the Boston Provident Association $50,000, the income to be used for general purposes; to the Rev. H. B. Whipple, Bishop of Minnesota, $5,000.

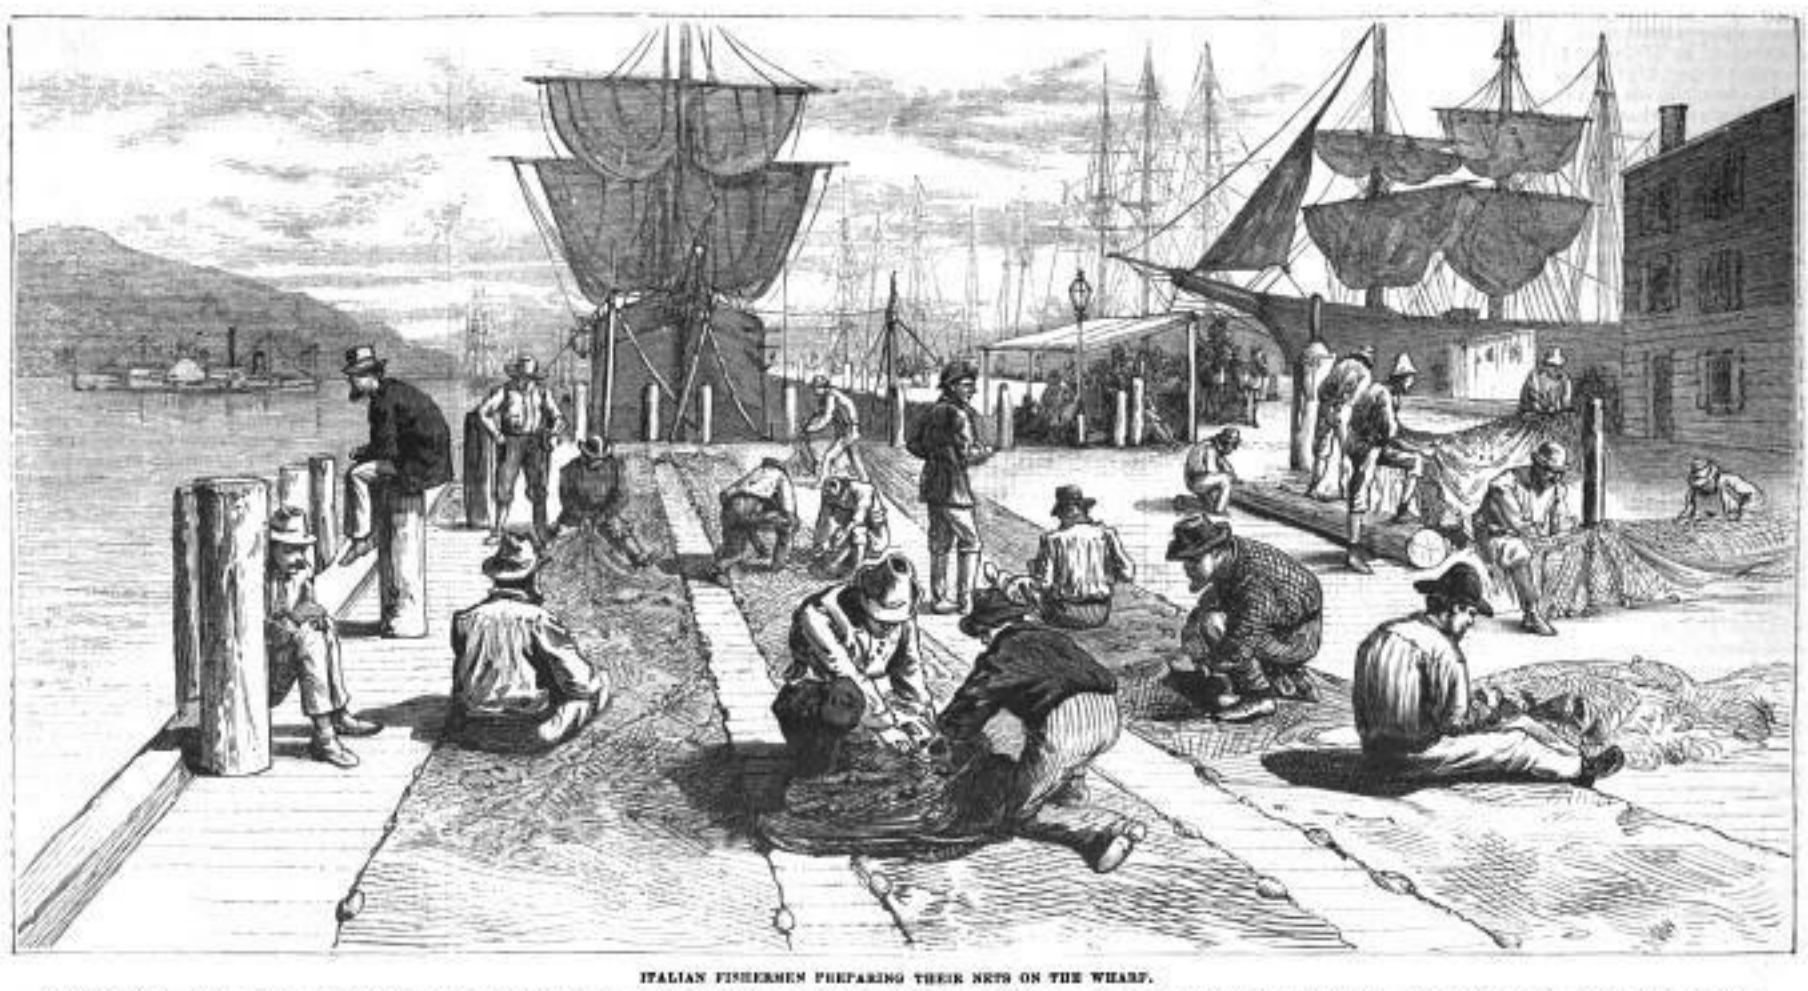
ITALIAN FISHERMEN UNLOADING FISH AT THE WHOLESALE MARKET FROM A FLEET OF LATEEN-SAIL BOATS.



HOW SAN FRANCISCO IS SUPPLIED WITH FISH FOR HOME CONSUMPTION.

FEW persons whom the pleasures of travel or the requirements of health have attracted to San Francisco have failed to note the evidences of the vast industry of catching, preparing, packing and shipping salmon that are there seen. This great game fish prefers northern or cold waters, and is found in abundance on the Pacific Coast, from San Francisco Bay to Alaska. Of the cargoes of canned salmon brought to San Francisco, the greater portion of the fish is caught in the Columbia River, Oregon, along which there are twenty-nine canneries, while the fish that is put up at the Golden Gate are taken either in the bay or along the coast.

The supply of ordinary fish for home consumption is likewise an industry of large proportions, and the business is engaged in during the months that the law prohibits taking more game species. The wholesale fish-market is located at the foot of Davis Street, where the wharves are specially arranged to accommodate the singular-shaped boats carrying lateen sails, and to facilitate the discharge of cargoes. The scenes there on an early morning are quite similar to those transpiring at the wholesale fish-market at the foot of Fulton Street on the East River, New York, excepting that a different class of men are engaged in the work. While there is a goodly sprinkling of Americans and Mexicans in the California fleets, the majority of the smacks are controlled by Italians, who have a large and peaceful colony in the city.

These men are remarkably clean and industrious, and the business rivalry between them seldom leads to passionate encounters. There is ample space upon the wharf for them to repair their nets, and make all the preparations for their cruise, while the piers are so extended that a large number of boats can be docked for the discharge of the fish at one time. In the illustration of the unloading the wholesale market looms up prominently. In New York there are large floats or tanks kept filled with water, into which the fish may be placed directly a boat comes to the dock, and from which they may be taken into the market as wanted. By this means the fish are kept fresh, because life is lengthened, and the purchaser at the market may invariably secure live fish if desired. But in San Francisco the demand is so large and constant that neither the boatmen nor the dealers would have time to use such floats if they were provided. The boats usually come in between one and two o'clock in the morning, and it frequently happens that every fish is sold within half an hour of the arrival. On Fridays the demand is so great that most of the fish is sold direct from the boats, no time being allowed to remove the catch to the stands in the market. These wharves are then as crowded as those in New York on steamer days. By noon the market, the wharves and the boats are thoroughly cleaned, the men make whatever repairs are necessary, and lounge about while awaiting the hour to get under sail for the night's work.

The location of the market at the water's edge is a wise sanitary precaution, as well as a vast convenience for the dealers. If in a particularly busy

Digitized by Google

season the market is too crowded for work, the fish can be cleaned on the boats or wharf, and the refuse thrown into the water. The market and boats are kept perfectly clean with ease. The narrow strip of wharf between the market and the water is shown crowded with wholesale dealers who flock thither upon the arrival of the boats, whose men they have direct relations with. Dealers throughout the city may buy their supplies for retail either dressed and cleaned or alive, as they prefer. This part of the city is always very animated and attracts many sight-seers.

The lateen-sail boats are short, broad and pointed at stem and stern, and are marvels of speed under the peculiarly shaped canvas they carry. In their leisure the men engage in sailing contests in the bay, and the spectacle of fifty or more of these boats scudding along under the one sail is intensely exciting. The speed they attain, with all their apparent clumsiness, might afford valuable suggestions to sportsmen in the East, who lavish fortunes upon yachts as large as merchant sailing vessels without securing very superior speed.

WARD'S STATUE OF GEN. THOMAS.

THE latest work of J. Q. A. Ward, the eminent sculptor of New York, bids fair to rank as the triumph of his life. He has recently placed on exhibition a model in plaster of the equestrian statue of the late General George H. Thomas, which is to be cast in bronze and set up at the national capital, under the auspices of the Society of the Army of the Cumberland. The figure of the rider is nearly ten feet high, and the horse is proportionately colossal. The General, in reconnoitring the position of the enemy, has ridden his horse over the ground between, and brought him to a stand on the summit of a gently rising ridge. He holds the reins lightly in his left hand, and, warmed by the brisk exercise, has removed his hat and holds it in his right hand, the arm hanging straight at his side. His forward calm but eager gaze is directed towards the right, so that his body is gently swayed in that direction, and the horse, excited by the stop and by the new horizon, snuffs the air with uplifted head and dilated nostrils. Repose and dignity come from the solid planting of all four of the horse's feet upon the ground and from the quiet seat of the rider in his saddle, while animation and picturesqueness are gained by the upward swing of the lines in the horse's body, and the alert intelligence of his head. General Thomas was not a particularly good horseman. He took no great pleasure in riding, either as an exercise or as an amusement, and, though not careless of his beast's accoutrements, he was somewhat indifferent to their appearance. So that he had a good horse, well equipped, he was content, and, unless there was need, seldom rode faster than a trot. These facts have enabled Mr. Ward a free play of fancy. The entire work is relieved of stiffness, the attitude of the horse is novel, and the portrait of the lamented rider faultless.

NEW YORK.—PLASTER MODEL OF WARD'S EQUESTRIAN STATUE OF THE LATE GENERAL GEORGE H. THOMAS, TO BE ERECTED IN WASHINGTON, D. C.

THE UNIVERSITY OF NOTRE-DAME,

NEAR SOUTH BEND, IND.

THE University of Notre-Dame, located near South Bend, Ind., which was destroyed by fire on April 23d, was founded in 1842 by Very Rev. Father Sorin, now Superior-general of the Congregation of the Holy Cross, and was the most flourishing Catholic educational institution in the United States, the usual attendance of students being from five to seven hundred, from all parts of the United States, and many of them being from foreign countries. It was also the largest boarding institution in the United States. It was especially rich in its libraries, zoological, ornithological, etymological, numismatic, and other collections. Most of these were destroyed, together with a collection of skeletons recently purchased at a cost of $2,400. The University was six stories in height, and the Dome, built on the model of St. Peter's at Rome, was surmounted by a statue of the Blessed Virgin, over ten feet high and weighing 2,000 pounds. Adjoining the University were an Infirmary, the Music Hall, Old Men's Home and Minims' Hall, all of which were destroyed. These buildings, with the contents not saved, cost not far from $250,000. Of course there are many articles burned whose value cannot be estimated in dollars. The insurance was $60,000.

Father Sorin, the Superior-general, announces that the University will at once be rebuilt. He is confident that the new edifice will be finished by September 1st, and puts down the opening of the classes for the first Tuesday in that month.

INDIANA.—THE UNIVERSITY OF NOTRE-DAME, NEAR SOUTH BEND, RECENTLY DESTROYED BY FIRE.

SIBERIAN WHEAT.

A GREAT many people have very hazy ideas about Russia in general, and Siberia in particular. The latter vast territory, some 1,200 miles from north to south, and 3,500 from east to west, has been subjected in the minds of many persons, through the pathetic story of the "Exiles of Siberia," to influences akin to those which have molded the ideas of many Englishmen and others respecting the northern portion of North America. Photographs of snow (or salt) besprinkled entities, all fur-capped, legginged and belted in Red River capotes: a wolf or two sneaking in the foreground; a black bear lazily gamboling on a tree in the rear, with several "Injuns" on the far frosty horizon, in moccasins and snow-shoes, apparently chasing nothing in particular, are sent home plentifully to admiring country cousins, and help to foster the notion that Canada is in the main an Arctic region covered with almost perpetual snow, pervaded by enormous rivers, which, under masses of ice, pursue their course through boundless primeval forests to the distant ocean. No doubt a country of such vast extent as Siberia must be in different climates, and the soil and products must be as various. But, though the northern parts are cold and inhospitable, there are extensive fertile regions which—those watered by the great River Oby especially—will, it is said, now have their wheat and other products brought into competition with American and even with Southern Russian wheat in the British markets. The Oby is the largest river in the Russian Empire. Issuing from Lake Altyn, in the desert of Ischinska, it is navigable almost throughout to its source, affording nineteen hundred miles of smooth navigation. The necessaries of life are extremely cheap in this district, especially about Tobolsk—so cheap, indeed, that indolence and ease prevail to such an extent as to retard the commercial and industrial progress of the inhabitants. It seems strange to hear of a sea route from Siberia only now being "discovered," *via* Tobolsk, but this may be owing to a want of enterprise on the part of the residents. It appears that wheat from Siberia passing through the Gulf of Oby, probably through the Straits of Waigatz, or else north of Nova Zembla, can be sold in London, including freight, for ninety-nine cents per pood, which is an appreciable rate lower than the prices of White Russian and American wheat.

There seems to be no reason why, should this be true, Siberia should not prove a most important factor in European wheat supply. The southern part of the country is fertile, with immense plains or steppes, some, no doubt, sandy and barren, but others well watered, with open tracts between forests, generally adapted for tillage and pasture. In fact, Siberia is a country of many and varied endowments and capabilities—rich in fine furs and skins, gold, silver, iron, lead and copper; and having also coal in the northern part.

The Russian caravans travel every year through the country with their merchandise to China, passing through Tobolsk on the Oby, where also all the furs furnished by Siberia are brought into a warehouse, and thence forwarded to the Siberian chancery at Moscow. Under proper trade development the exports of Siberia ought to be very large, and greatly in excess of the imports. It affords a variety of commodities which are of great use to foreigners, and its artificers want neither tools nor materials to carry on their trade, though they are lacking in industry and push on account of the cheapness of food, and other easy conditions of life. Much fine wheat should come out of the Tobolsk district. Agriculture, cattle-feeding, fishing and hunting have indeed for ages been the chief occupations of the Russian people, though national development in other ways has been the rule since the great Peter civilized the barbarous subjects of his vast empire. Russia, in commerce, as in agriculture, now holds a rank among the nations of the world, of which human foresight could have formed no conception, and which it can assign no limits.

THE MELON TREE.

AT a recent meeting of the Maryland Academy of Science, a member read a very interesting paper, written by Mr. Otto Lugger, of the Academy, on that curiosity of the tropics, the melon-tree (*Carica papaya*), which is a native of South America, and was seen and examined by Mr Lugger during his late tour through British Guiana. This tree is of very thick growth, as in six months it will grow high enough to furnish the broad shade of an umbrella to a man six feet high. In the fourth year a height of twenty feet has been attained; when after a short maturity the tree dies. The leaf resembles that of the "ricinus" plant, or wonder-tree, being seven-fingered in shape. From its rapid growth, shade-giving and quick decay, some have drawn a close simile between this tree and the melon-tree of the prophet Jonas. As it grows higher the lower leaves drop off, only their scales remaining, thus making the trunk resemble the skin of a snake. When it reaches the height of a man, the tree produces at all seasons, amid its flowers, both green and ripe fruit, which then becomes yellow, and seems to belong to the cucumber family. The fruit surrounds the base of the tree-crown, as do the nuts of a cocoa-palm. Each fruit attains a weight of some fifteen pounds, is melon-shaped, and marked, as lemons are, with longitudinal colored stripes. The tree, being pithy, is unable to bear the weight of a man, and a boy has to climb to gather the fruit. The unripe fruit is sliced and pickled, the ripe eaten with sugar or salt and pepper. The seeds are egg-shaped, strong-flavored, and used as a spice. This tree is eagerly sought and planted in all suitable climates from South America to Mexico and the West India Islands, and its culture has spread over Egypt and other portions of Africa. It grows without any particular care in the neighborhood of

COLORADO.—A MINING BATH-HOUSE AT LEADVILLE.—FROM A SKETCH BY E. JUMP.—SEE FRONT PAGE.

Digitized by Google

dwellings, and produces ripe fruit before it is a year old. Its leaves furnish an excellent substitute for soap, and it thus proves a great blessing to the natives of tropical climates, who so much need its use. They have another use—that of rendering tender and eatable tough and stringy meat of any kind which is wrapped in them for a short time. This Mr. Lugger himself verified by experiment whilst in British Guiana.

Old-time Bigotry.

UP to the close of the last century bigotry was carried to such length in Spain that the burial of a Protestant was attended with all sorts of difficulties and obstructions, and at an earlier period it was almost an impossibility. When Mr. Stanhope was British Minister at Madrid, in 1691, his chaplain died, and notwithstanding that his burial took place in a field at night, and with permission of the authorities, the corpse was insulted and mutilated, and Mr. Stanhope had to re-inter it in his cellar. In 1712, Lord Lexington, while Ambassador, lost his only son, and, apprised of the fate of Mr. Stanhope's chaplain, with great difficulty conveyed the body to England, concealed in a bale of cloth. It was supposed that it was buried at a place called Averham, but in 1842, when a vault built by Lord Lexington was opened, a coffin found there without an inscription was opened, and the body within was in such perfect preservation that, although 130 years had elapsed since interment, its identity was at once determined by the resemblance the features bore to the picture of Lord Lexington's son in the family gallery.

The British Pension List.

THE Pension List is not pleasant reading for the British taxpayer. One young gentleman, who is stated to have retired from the Mint at the somewhat early age of nineteen, on the modest sum of £150 pounds per annum, has already enjoyed £4,050. The law departments are well cared for. An official of the Irish Court of Chancery, who retired at thirty-nine, has already received a pension of over £89,000 in thirty-eight years. Another retired, at the age of thirty-one, with two pensions, one of £1,381 per annum from the Court of Chancery, which he has held for thirty-six years, and another from the Court of Exchequer of £174 per annum, which he has held for forty-one years. Another gentleman, more fortunate still, retired from the Court of Chancery on his full salary, as Taxing-Master, of £4,580, thirty-six years ago, and in 1871 was further gratified with £354 16s. 11d. per annum as retired "Sworn Clerk." This gentleman has already received upwards of £167,000 of the public money. Ex-"Weigh-Master of Butter" (whatever that may mean), who is the son of a peer, has been pensioned more than forty-eight years, at a cost to the present time of about £52,000; and ex-"Chaff-wax" (quite a quizzical title), as a solatium for his duties, whatever they may be, has received a pension of £1,145 for thirty-one years. There are instances of appointments being given to gentlemen over fifty years of age, and who retire a few years afterwards from ill-health. As a rule, and in confirmation of the general belief, all these pensioners live to a good old age, in compliment to the luxurious ease provided for them by a grateful country.

Underground Telegraphs.

THE Reichstag has voted the sum of 1,830,000 marks for the further construction of subterranean telegraph wires. Germany will soon be intersected with a complete network of this invisible and inaccessible means of communication, which no thunderstorm can destroy and no roving enemy can readily cut. In 1875 it was first proposed to connect by underground cables all the chief centres of commerce and industry in the empire, all the fortresses and places of arms, the cost being reckoned at about 34,000,000 marks ($8,500,000). The first experiment of the kind was made by the sinking of a wire between Berlin and Halle, which has been subjected to the strictest scientific tests, and yielding highly satisfactory results, not a single interruption being recorded. When the whole work is ended the German Empire will be crossed by two great main cables, stretching from Konigsberg in the north, to Strasburg in the south, and from Hamburg in the northwest to Ratisbon in the southeast, intersecting at Berlin. Strasburg will also be connected with Metz. In addition, another sunken wire will curve away up from Strasburg, through Cologne to Hamburg, while Ratisbon and Konigsberg will similarly be connected. An underground wire will also bind together Berlin, Dresden, Stuttgart and Munich, communicating with a fifth main cable passing through South Germany. In three years, it is said, the whole network thus planned by Dr. Stephen, the Postmaster General, will be completed. The half is already finished. An underground cable now connects Berlin, Halle, Leipsic, Cassel, Frankfort, Mayence, Carlsruhe, Rastadt and Strasburg; another line runs from Berlin through Magdeburg, Brunswick, Hanover, Munster, Dusseldorf and Barmen-Elberfold to Cologne, while Berlin and Hamburg are also connected, throwing out branch lines to Kiel and Cuxhaven, to Bremen and Emden, thus joining the North Sea cable communication with England and America. A sum of 18,000,000 marks ($4,500,000) has already been spent on this subterranean enterprise, and the money now voted will be employed in connecting the towns and harbors along the Baltic shore for the furtherance of commerce and coast defense—a work, said the Postmaster General, which should be proceeded with as speedily as possible.

Axes in History.

THE AX has quite a history, for in Homer's time iron was used for wood-cutters' axes, etc. The ax was an ancient weapon of war, and appears to have been used from the most remote periods in warfare. The war axes varied in form, according to the races to which they belonged. The first had a single edge only, and was similar to the modern hatchet: the second had two edges, and was sometimes called the Amazonian ax, from a supposition that weapons of this kind were used by those female warriors. Axes were much employed as offensive weapons by the Celtic and Scandinavian nations. Among the Roman armies the ax was not much used; it was considered the weapon of uncivilized nations. At the siege of the Roman capital by the Gauls, Brennus is represented as being armed with a battle-ax, and Ammianus Marcellinus several centuries afterwards describes an armed body of Gauls as being all furnished with battle-axes. In the Bayeux tapestry the English are represented by using the battle-ax. The pole-ax was introduced into Britain by the Saxons and Danes; it had an edge on one side and a sharp point on the other. The Franks, in their expedition into Italy in the sixth century, made use of an ax with a large blade (much like the present broad-ax). This was termed *francisca*. The battle-ax of Childeric I. is preserved in the Louvre, in France. The battle-ax fell into disuse towards the close of the sixteenth century. In Russia, Sweden and Norway, and many parts of Germany, they cling to the old, rude, unfinished, and unwieldy ax with which they are familiar. The introduction of the American ax in those countries must be a matter of time. The expressions "to bury the hatchet," "to take up the hatchet," are taken metaphorically from the practice of the North American Indians. In 1840 an English gentleman visited the United States and took back an American ax and helve, which, from the peculiar curve of the handle and shape of the ax, proved infinitely superior to the English. His son still has the ax, which is serviceable, though of course the handle has been renewed several times, always on the model of the old one. When it was first used, carpenters and woodmen came from a distance of ten miles to inspect it, and many times the owner was offered ten times its price for it—indeed, one enthusiast tried to steal it. Nevertheless, so tenacious is habit, to this day that venerable ax is the only one of its kind in the neighborhood.

NONSENSICAL ADVERTISING.

A GREAT deal of money is wasted every year by business men through negligence or injudiciousness, or both. Some will pay a nice little sum in having "dodgers" thrown around by the thousands on the pavements and into the gutters, that nobody ever stops to read; some will stick their names up on a dozen or so of rails in the country, or on pieces of painted board stuck up among the limbs of trees and on the corners of fences; some on cards in hotel-racks, others in mere advertising sheets and others again along ledges of rock and in railway-stations. Now, these are well enough, provided the newspaper—acknowledged long since to be the best advertising medium—is not without the announcement which is intended to reach the public eye. The weight of argument, if any were needed, is so much in favor of the columns of a widely-read newspaper, as against the other methods of communication, that it really is a matter of surprise that not all business men should see it, and act accordingly. There are men who would rather spend $10 or $20 in the rail, card and board nuisances, which may be seen by a few hundred people, than to expend the same sum in their home papers, where tens of thousands of eyes would see their cards every day. This is an age of newspaper reading, and the sooner business men come to realize this fact in all its importance, the better it will be for business generally, and the better it will be for themselves. It is as natural for the cards of wide-awake merchants to appear in the newspapers as it is to look for strawberries and ice-cream in Summer time.—*Reading (Penn.) Times and Dispatch.*

FUN.

THE caves of the ocean are mostly salt rheums.

WHY is a lady's bonnet like a cupola? Because it covers the belle.

THE nimble-footed mule is used as the light fantastic toe for a canal-boat.

A BOY with elbows out was asked the cause, and replied, "I laughed in my sleeves till I burst them."

IN a family in which there are two boys of the same age, it is pretty difficult to decide whose birthright it is to roll out the ash-barrel.

WOMEN have a great respect for old age. Watch a young lady seated in a 'bus between a young gentleman and an elderly one, and see how determined she is not to incommode the latter by squeezing against him.

THE present plan adopted by churches of making contributions by envelopes enables a man to drop two old-fashioned cartwheel copper cents into the basket with as much style and flourish as if they were trade dollars at par.

WILTSHIRE FARMER (who has been asked how it was that his daughters had not got married): "Well, 'ee zee, zur, zum y'ars agone them as wud ha' they, they wudn't have; and now, them as they wud have won't ha' they."

A WOMAN applied for a situation recently, with her clothes dripping like a water-spout. Being questioned as to her condition, she said she understood the lady of the house wanted a wet nurse, and she had come ready for service.

A SCHOOLMISTRESS, while taking down the names and ages of her pupils and the names of their parents at the beginning of the term, asked one little fellow, "What's your father's name?" "Oh, you needn't take down his name; he's too old to go to school to a woman," was the reply.

A NEW way of fastening on ladies' hats is to bore the tops of their ears, put in gold hoops, and have the hat strings tied through them. Thus, step by step we tread the pathway to perfection, and ere the darkness of death envelops all the world, man will have utilized his nose in holding up his pantaloons or pulling on his boots.

A FATHER said to an old acquaintance who came to condole with him on the unmanageableness of his two sons, who had committed a burglary in the next town, and had been sentenced to prison: "It is pretty rough on me to have them both go to eact, but there is one thing to it—when it comes night now you know where them boys be."

A BRIGHT little fellow of four, the son of a former pastor of a flourishing church, who attends the infant class in Sunday-school, received one Sunday morning a card on which were the words, "Pray without ceasing." After his mother had explained the text, he said, "I guess I won't show this to the minister; he prays long enough now."

A SHORT time ago a little boy went with his father to see a colt. He pulled the colt's head and made quite a fuss over it, until finally the stable-man told him to be careful that the colt did not turn round and kick him. When the little chap went home his mother asked him what he thought about the colt. "I like him pretty well," was the reply. "He's real tame in front, but he's awful wild behind."

THE best definition of a perfect hotel is an establishment which unites the luxury of a palace with the comforts of a home. Long effort would fail to give a more concise and fitting description of the ST. NICHOLAS, of New York, for a quarter of a century known in Europe and America as pre-eminent among its rivals. Never has it stood so high as under the present management.

FOR Neuralgia, Pains and Aches in the back, kidneys or limbs—Hop Bitters.

A MYSTERY EXPLAINED.

PARLOR SCENE: Mrs. Brown, who has spent the Summer among the White Mountains in search of health, and who seems to have searched the whole mountain side without being able to find a pair of blooming cheeks or an inch of healthful skin; Mrs. White, who has remained at home because her husband could not afford to go, but whose fresh complexion and bright eyes seem to have caught their bloom and brightness from mountain breezes.

Mrs. B.—"Dear me, Mrs. White, how well you are looking! If you will not think me impertinent, let me ask how you can keep so healthy in this dreadful city? I have been to the White Mountains, go there every Summer, in fact, and I can't keep off the doctor's list at that."

Mrs. W. (smiling)—"I'll tell you the whole secret, Mrs. Brown. You remember how poorly I was last Spring, some days even being confined to my bed. Dr. —— told Mr. White to send me to the mountains, but I knew he couldn't afford it, and I tried Dr. Pierce's Favorite Prescription. Its effects were so marvelous that I also tried his Golden Medical Discovery, to cleanse my system. In my opinion, one bottle of the Prescription and the Discovery is better than six weeks of the White Mountains for a sick woman. I have only been out of the city a week during the whole Summer; then my husband and I went to Buffalo and stopped at Dr. Pierce's Invalids' and Tourists' Hotel. The baths and mechanical apparatus for treating patients were alone worth going to see. Besides, our accommodations were better than we had at Long Branch last year, and the drives and scenery are superb. Let me advise you to use Dr. Pierce's Favorite Prescription, and try the Invalids' and Tourists' Hotel next Summer instead of the White Mountains.

TWENTY-FIVE DOLLARS in doctor's visits will do you less good than one bottle of Hop Bitters.

IT REMOVES WRINKLES AND SOFTENS THE SKIN.—The regular use of MURRAY & LANMAN'S FLORIDA WATER at the toilet tends to prevent and remove wrinkles, the softness of the skin produced by it taking away the natural inclination of the cuticle to form into ridges and furrows.

INDIGESTION, DYSPEPSIA, nervous prostration, and all forms of general debility relieved by taking MENSMAN'S PEPTONIZED BEEF TONIC, the only preparation of beef containing its *entire nutritious properties*. It is not a mere stimulant like the extracts of beef, but contains blood-making, force-generating and life-sustaining properties; is invaluable in all enfeebled conditions, whether the result of exhaustion, nervous prostration, overwork, or acute disease; particularly if resulting from pulmonary complaints. CASWELL, HAZARD & CO., Proprietors, New York.

AUBURN, N. Y., March 1st, 1878.
H. W. JOHNS' MANUFACTURING CO., 87 Maiden Lane, N. Y.
Dear Sirs: In answer to your inquiry as to how we like your Paint, we are more than entirely satisfied with it. As you are aware, we are large users of paint, and of all that we have ever used, are satisfied yours is far superior; it is put on with less labor, covers better, dows more easily, has a better body, and, as far as our experience goes, will stand the weather better than any other paint we know of. Your Roof Paint is unsurpassed; we used one coat on a tin roof, and to-day it looks as fresh, and the color is as bright, as when first applied, and there is no sign of its cracking.
Respectfully yours, JOSIAH BARBER & SONS,
Manufacturers of Woolen Goods and Carpetings.

Stuttering cured by BATES'S APPLIANCES. Send for description to SIMPSON & Co., BOX 2,236, New York.

Blair's Pills.—Great English Remedy for Gout and Rheumatism. All Druggists have them.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"BY a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*
Sold only in soldered tins, labeled,
JAMES EPPS & CO., Homœopathic Chemists, London, England.

LABRADOR.

I propose to make my Seventh Excursion to the coast of Labrador, leaving Boston July 9th, 1879, in a first-class clipper schooner of about 150 tons, and proceed as far north as Hamilton Inlet, in latitude 54° 30'. For particulars, address
M. M. CHICK,
41 Franklin Street, Boston.

$10 to $1,000 Invested in Wall St. Stocks makes fortunes every month. Book sent free explaining everything. Address, BAXTER & CO., Bankers, 17 Wall St., N. Y.

At Reasonable Rates—Money on Life and Endowment Insurance Policies and Mortgages; same bought; insurance of all kinds effected with best companies. J. J. HARRICH & CO., 165 & 167 Broadway.

Dr. T. Felix Gouraud's
ORIENTAL CREAM,

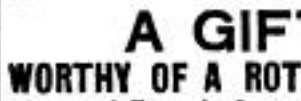
Or **Magical Beautifier**, removes every blemish on beauty; it elicits a clear, transparent complexion, free from tan, freckles, or moth-patches. The most popular for the skin ever invented; accept no cream of similar name. Indorsement of GOURAUD'S ORIENTAL CREAM by the distinguished Dr. L. A. Sayre: A lady of the Aust ion, a patient of Dr. Sayre, discoursing on the use of cosmetics, he remarked to the lady: "*As you ladies will use them, I recommend 'Gouraud's Oriental' as the least harmful of all the skin preparations.*'" "Praise from Sir Hubert is praise indeed." Indorsed by the fashionable world.

MME. M. B. T. GOURAUD, Sole Proprietor,
48 Bond Street, New York.

FOR SALE BY ALL DRUGGISTS AND FANCY GOODS DEALERS.

CLEAR HAVANA. LILIPUTIAN CIGARS, "Graduates" (3 inches), $11 per 1,000. Sample box, by mail, 50c. J. M. AGUERO, 2456th Av., N. Y.

SMOKERS, ATTENTION! 100 fine cigarettes, 60c.; 200, $1.10; 400, $2.10; 100 choice, all tobacco, $1.27½; 200, $2.45—postage paid. A. WILSON, 34st cor. 1, New York.



VITALIZED PHOSPHATES.
Debility and nervousness have their origin, to a great extent, in a weakened digestion. There can be but little mental activity with impoverished blood, and debility so induced leads to consumption and numerous other troubles that would never appear if the blood and nerves were nourished in a right degree. Physicians have prescribed 100,000 packages of **Vitalized Phosphates** preventing debility and nervous diseases, curing indigestion, and re-vitalizing and invigorating thousands who were sick. It is a brain and nerve food, not a medicine.
F. CRUSBY, 666 Sixth Ave., N. Y.
For sale by Druggists.

SUMMER HOTEL ADVERTISEMENTS
Prepared and inserted in all first-class newspapers, at publishers' lowest rates. Address, for particulars,
WILLIAM RICKS, 150 Nassau St., N. Y.

CAPE MAY POINT, N. J.

HOTELS open July 3d, 1879. Rooms can now be secured for the Summer on favorable terms.

Frank Leslie's
SUNDAY MAGAZINE
For JUNE.
REV. CHARLES FORCE DEEMS, D.D., LL.D., Editor.

THE CHEAPEST SUNDAY MAGAZINE IN EXISTENCE.

"FRANK LESLIE'S SUNDAY MAGAZINE is a welcome addition to the list of our religious periodicals, and is well worthy a place in all families. . . . The subscription price is only $3 per annum, which is almost unsurpassed for cheapness."—*Christian Statesman (Philadelphia).*

"We have before expressed our hearty appreciation of the SUNDAY MAGAZINE, edited by Dr. Deems; and every number which we receive bears fresh testimony to its excellence. It contains a very large amount and variety of reading matter, and abounds in illustrations. This magazine will be found in great demand in the family, and not less among the younger members than the elder."—*Boston Congregationalist.*

"FRANK LESLIE'S SUNDAY MAGAZINE for May deserves all the encomiums pronounced upon its predecessors, with the additional remark that wherein it differs from them it is in the sense of being still nearer the mark of perfection. Profusely and elegantly illustrated, printed on fine paper, and containing the choicest matter from all available sources, it offers to the reader an investment extraordinary for his three dollars, which is the low subscription price for a year."—*Central Presbyterian (Greensboro, N. C.)*

CONTENTS OF JUNE NUMBER.

Important to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP is the only thing that mothers can rely upon for their children. It corrects acidity of the stomach, cures wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. During the process of teething its value is incalculable. It softens the gums, reduces inflammation and allays all pain, thereby giving rest to the child and comfort to the mother.

Frank Leslie's
POPULAR MONTHLY

The Cheapest, Largest and most Attractive of all the Monthly Magazines!

"FRANK LESLIE'S POPULAR MONTHLY presents very attractive contents. The illustrations are numerous, and number over one hundred, and are well executed. This publication is meeting with much favor from the reading public. The contributors are among the most talented in the country, and hence the high intellectual standard."—*Leader, Bloomington, Ill.*

"Undoubtedly FRANK LESLIE'S POPULAR MONTHLY gives more and more varied material for its cost than any other magazine in the world. One hundred and twenty-eight pages, half of which are handsomely illustrated, for twenty-five cents, would certainly seem to be the finishing point of economy in reading matter."—*N. Y. Era.*

SELF-RAISING
Bread Preparation
The Healthful and Nutritious
Baking Powder,

Invented by E. N. Horsford, late Professor in Harvard University.

Better, Healthier and Cheaper than Ordinary Baking Powder.

BARON LIEBIG, the greatest chemist in the world, said: "I consider this invention as one of the most useful gifts which science has made to mankind."

Dr. M. H. HENRY, the celebrated Physician of New York, said: "The use of Horsford's Bread Preparation, offers admirable means for the introduction of a valuable element into the system."

Dr. J. C. BOOTH, the distinguished chemist of Philadelphia, said: "We have no hesitation in recommending your Preparation as new and valuable."

Prof. RODNEY WELCH, Lecturer at Hahneman Medical College of Chicago, said: "The greatest improvement ever made in raising bread without the use of yeast, is the process of Prof. Horsford."

The "Horsford Almanac and Cook Book," sent free on application.

FRANK LESLIE, EDITOR AND PUBLISHER.

NEW YORK, MAY 31, 1879.

CAUTION.

Subscribers, in ordering our publications, should be careful to write the name of FRANK LESLIE *in full, and direct their letters to 53, 55 and 57 Park Place, New York, from which address all our publications are issued.*

THE NEW VETO.

PRESIDENT HAYES has refused to sign the Bill entitled "An Act to Prohibit Military Interference at Elections," as recently passed by both Houses of Congress. The vetoed Bill is conceived in the following terms:

"*Be it enacted, etc.*, That it shall not be lawful to bring in, or employ at any place where a general or special election is being held in a State, any part of the army or navy of the United States, unless such force be necessary to repel the armed enemies of the United States, or to enforce section four, article four, of the Constitution of the United States, and the laws made in pursuance thereof, on application of the Legislature or Executive of the State where such force is to be used; and so much of all laws as is inconsistent herewith is hereby repealed."

Reaffirming his opinion that the existing statutes are ample to prohibit all military interference on the part of the Federal Government with the freedom of elections, and avowing the opinion that "any military interference whatever at the polls is contrary to the spirit of our institutions," the President objects that the foregoing Bill, by reason of its loose phraseology, would have for effect, if adopted, to nullify, on election days and at polling-places, the ancient and fundamental laws which, since the year 1792, have empowered the Executive to employ the land and naval forces of the United States, wherever and whenever, "by reason of unlawful obstructions, combinations, or assemblages of persons, or rebellion against the authority of the Government of the United States, it shall become impracticable, in the judgment of the President, to enforce, by the ordinary course of judicial proceedings, the laws of the United States within any State or Territory." Other important enactments, he urges, are liable to be suspended or annulled at the times and places of holding elections, if the proposed measure should become a law.

A second ground of objection to the Bill is found in its discrimination against the right and authority of the Federal Government to keep the peace at elections in which it is vitally interested, while it is conceded that the army and navy may be summoned by the States to protect the peace at elections, whenever, and only whenever, they shall be so disposed. This substitution of the discretion of the State Governments for the discretion of the Government of the United States, in a matter where the latter is charged with important rights and duties of its own, seems to the President "an abandonment of its obligations by the National Government—a subordination of National authority, and an intrusion of State supervision over National duties, which amounts, in spirit and tendency, to State supremacy."

That in matters extrinsic to the conduct of elections it was the purpose of the men who framed the proposed Bill to strip the President of the general power and duty with which he is charged in the presence of "combinations" and "insurrections" too powerful to be resisted by the ordinary course of judicial proceedings, may perhaps be reasonably questioned, but that the text of the statute, as actually drawn, is so vague as to be open to the President's criticism, can scarcely be disputed. If the body of the Bill had contained a pure and simple clause, declaring that it "shall not be lawful to bring to or employ at any place where a general or special election is being held in a State, any part of the army or navy *for the purpose of interfering with the free and peaceable conduct of the election*," it is probable that the President would have signed the Bill, though in doing so he might have explained that he would not regard as such "interference" the presence and employment of Federal troops at an election for members of Congress, wherever and whenever their presence and employment should be judged necessary *by the civil authorities of the United States for the sake of keeping the peace.*

The lines between the two parties at variance on this subject are coming to be distinctly drawn in the course of the present discussion. It is the purpose of the Democrats to exclude the Federal Government from all jurisdiction and control in the conduct of elections, both general and special, on the ground that such Federal intervention is a novelty in our history, that it has been grossly abused, and is always liable to abuse in the hands of a partisan President. On the other hand, it is the purpose of the Republicans to vindicate for the Federal authority the jurisdiction with which it is now charged over the conduct of elections affecting the composition of Congress, and over the right of suffrage as protected by the terms of the Fifteenth Amendment.

Between these two points of antagonism there is room for much oscillation of public opinion, according to the maxim that "circumstances alter cases." The Democrats are right when they allege that Federal intervention in the conduct of elections was wholly unknown for the first three-quarters of the century that marked the national existence; that it has often been grossly abused by partisans of the "carpet-bagger" stamp, and is always liable to abuse in the hands of an unscrupulous executive. The Republicans are right when they allege that, under the Constitution of the United States, it is competent for Congress to regulate the conduct of Congressional elections; that this regulation, when exercised, must be paramount whether a State regulation exists at the time or not; and that the expediency of exercising this paramount authority must depend upon the conceived exigencies of the public welfare at any given epoch. They are right, too, when they hold that the exclusive control of Congressional elections by the States has often been grossly abused, and is always liable to abuse in the hands of the dominant party in each State. Mr. Madison explains in his minutes of the Federal Convention that the power of Congress to make regulations under this head was supplied in order to enable it to regulate the elections if the States should fail or refuse to do so; and while admitting the full discretion vested by the Constitution in Congress, he expressed the opinion, in the Virginia Convention held on the adoption of the Constitution, that "if the elections were regulated *properly* by the State Legislatures, the Congressional control would very probably never be exercised." In point of fact, it never was exercised until the year 1865, and later, when the Federal Government began to assume jurisdiction in the premises. And this jurisdiction was avowedly based on the ground of the new exigencies and necessities which, under the altered conditions created by the war, had come, in the estimation of Congress, to justify the exercise of a hitherto dormant power lodged in the Constitution.

Whether the Federal Government should continue to exercise the jurisdiction which it has lawfully assumed in these latter days, or whether, as before the war, it should remit the control of all elections to the conduct of the States, is a question on which men will differ according to their political outlook. Those who believe that the normal relations between the States and the Federal Government are fully restored may consistently advocate a recurrence to the practice which obtained before the war, and it was in this sense, and under this persuasion, that such an enlightened Republican as Mr. Garfield avowed his willingness, at the close of the late Congress, to "muster out" so much of the recent extraordinary legislation, born of the war, as prescribes a test oath for jurors at the South, and as authorizes the presence of troops at the polls "to keep the peace." To this effect he said:

"For myself, I see no serious practical objection to letting these sections go through. I do not quite see how anybody can say that while a State may call out its own militia to keep the peace at its own polls, and nobody calls that tyranny, nobody calls that wickedness, injustice, and a menace to civil liberty, a nation, when it has its own elections, which its own Constitution says it may regulate as to the time, place and manner of holding them, may not with great propriety use its own military force to keep the peace at its own personal polls. That is all there is in these two sections that any gentleman has complained of. Now, I believe, as a matter of fact, no one will say that any citizen, during the thirteen years and more that this law has stood on our statute-book, has been denied the full and free exercise of the elective franchise in consequence of the presence of armed soldiers of the United States near the polls. If there has been such a case I will join with any man of any party in deprecating it, in deploring it, in doing what I can to prevent its recurrence. But, lest it should be a rock of offense and a stone of stumbling to any man in this country, I for one would be willing to let it go out of the law rather than even appear to sin against the liberty of the citizen."

In the presence of such a frank statement, doing full justice to the real grounds of the Democratic contention, it is greatly to be deplored that the insensate folly of the Democratic leaders, in needlessly provoking an extra session of Congress, and in raising extraneous issues of deeper import, should have now sharpened and intensified the sectional antagonisms which even their opponents were not unwilling to allay a few months ago.

THE DWIGHT INSURANCE CASE.

FROM present appearances, we are not likely soon to see the last of the proceedings in this more than ordinarily scandalous case. It was believed that the failure in the recent examination of the remains of the deceased would have the effect of making an end of the opposition of the insurance companies, and that they would promptly and without further cavil honor the claims of the heirs. Such, however, is not to be the case. A majority of the companies still resist, and efforts are being made to form a combination which shall be strong enough to prolong the struggle indefinitely. It is difficult, of course, to predict what would be the result if such a combination should be consummated; but it is certain that, as the case now stands, public sentiment is decidedly with the heirs of the deceased, and against the companies who refuse to honor their claims; and, whatever the final judgment may be, the public sentiment is but little likely to change. And, so far as facts warrant us to form any opinion, we think public sentiment, in this instance, is fairly on the side of truth and justice. There is nothing in the history of the deceased, peculiar as he was, nothing in the circumstances of his death, nothing in the facts brought to light at the original autopsy, nothing in the evidence obtained at the recent investigation, which can be regarded as sufficient to justify even a remote suspicion that he made away with himself. A slight mark on the neck, which, it is admitted, might have been produced by various causes, and which was allowed to pass unchallenged at the original autopsy, is the only basis on which is made to rest the charge that death was produced by strangulation, and that Colonel Dwight was a suicide. The theory is obviously an after-thought, and is altogether inadequate as a justification for the course pursued.

If there had been no money at stake, or if the money at stake had been less than it really is, we should probably never have heard of this now celebrated case; and, however unjust it may be, the public will not be diverted from suspicions of corruption on the part of those who, by their expressed opinions, have encouraged the conduct of the resisting companies. As to the latter, we must regard their conduct as at once unjust and suicidal—unjust, because without any satisfactory cause it is a refusal to honor just claims; suicidal, because it will have a most injurious effect on the companies immediately concerned, and because, but for the honorable, though exceptional, course followed by the Equitable, it would have been damaging to the entire system of life insurance. With such slender prospects of success, and with such a condition of public sentiment as that which now exists, the insurance companies will do well to halt in what seems to us a ruinous career.

THE TRADE OF 1878.

THE twenty-first annual report of the New York Chamber of Commerce furnishes an exhibit of the present state of trade and the indications of the future, which is in the main encouraging and satisfactory. Careful comparisons of the results of the past year with those of preceding years show that the last point of decline has been reached, and that in nearly all the more important branches of trade there is a positively upward tendency. Some of the results of 1878 are thus summarized:

"The receipts of sugar of all kinds, at the principal markets for consumption, were larger in 1878 than in many years preceding. The receipts at this port were nearly 4 per cent., and the consumption ranged nearly 3 per cent. in excess of 1877, and prices ranged about 1¾ cents per pound lower. The share of New York in the total sugar trade of the United States was, for the year, 64¾ per cent. The coffee trade shows the same general movement; steadily declining prices and a large increase of consumption. The receipts at New York show a gain of nearly 11 per cent., and deliveries of nearly 9¾ per cent. in 1878, over those in 1877. Of the whole trade, her share was 64¾ per cent.; the average prices were about 3 cents below those of last year. The gradual transfer of the tea trade from coastwise to interior ports has been arrested. This movement will restore to New York its supremacy in the trade. The receipts of the whole country for 1878 (with the exception of the imports at San Francisco, designed for consumption on the Pacific Slope), exceeded 60,000,000 of pounds, the deliveries for consumption, 53,000,000 of pounds—a decrease of 1,000,000 of pounds from those of 1877. Of this, nearly 75 per cent. came direct to New York, and 12 per cent. via San Francisco. The decline varied with the quality of the teas, ranging from 5 to 13 cents per pound.

The movement of export of American products shows a steady increase. The American cotton-crop for the year ending with September last reached 4,811,265 bales, of which 3,346,640 bales were exported, and 1,546,298 bales were taken for our own spinners. The exports exceeded those of 1877 by 297,143 bales. The exports of salt beef from New York amounted to 27,000,000, and of fresh beef to 44,000,000 pounds, valued at $6,000,000, being three-quarters of the entire export. The shipments of bacon and hams from New York reached 379,000,000 pounds, valued at $32,000,000, being two-fifths of the entire trade, which reached $52,000,000. There has been a rapid increase in the export of live animals, of which between 34,000 and 35,000 were shipped from New York, valued at over $2,000,000, this export from all the ports reaching nearly $6,000,000. The export of breadstuffs has again risen to large figures. The total exports of wheat and wheat flour from the United States reached the sum of $122,000,000, of which we sent from New York nearly $67,000,000, or 55 per cent. Of other grain exported, valued at $57,000,000, New York sent $24,000,000, or 42 per cent.

Summarizing the whole matter, the report presents these aggregates:

"The total foreign imports into the United States for the year ending June 30th, 1878, amounted in value to $446,872,846, of which New York received $213,179,649, or 47 per cent. The total domestic exports of the United States, including specie and bullion, amounted to $722,811,815, of which New York sent $338,992,746, or 47½ per cent. Of the total foreign trade, imports and exports (with foreign exports added, $20,824,736), amounting to $1,210,510,399, New York had $664,986,263, or 55 per cent.

"The total exports, domestic and foreign, for 1878 were $737,155,611 against $620,302,412 in 1877, showing an increase in 1878 of $116,853,199. The total foreign trade of the United States, exports and imports, exclusive of specie and bullion, for 1878, was $1,168,968,194, against $1,109,548,712 in 1877, an increase of $58,419,482. The total imports into the port of New York, including specie and bullion, for the calendar year 1878, reached $393,156,867, against $329,088,888 in 1877, and the total export $362,022,088, against $323,433,140 in 1877; a total of trade for 1878 of $665,708,955, against $655,520,028 in 1877, an increase of $10,188,947.

"The aggregate value of exports over imports for the calendar year 1878, exclusive of specie and bullion, was in favor of the United States, as shown by the following:

Exports, calendar year 1878.....	$737,155,611
Imports, calendar year 1878.....	431,812,583
Balance of trade, 1878.....	$305,343,028

These statistics furnish solid proofs of a substantial revival of our trade and industry. They show, too, that New York, with all the sharp competition to which she has been subjected, maintains her imperial pre-eminence as the great commercial emporium of the country.

THE FINANCIAL MARPLOTS.

LESS than three years have passed since the people of the United States cast nearly eight and one-half millions of ballots at an election for Presidential electors. Of this vast body of electors only 81,740, being less than one per cent. of the whole number, voted in support of the financial vagaries enunciated by the Greenback school of politicians. The question of an inflated paper currency was an open one, while the coinage and use of silver money by the country had been under discussion from January 6th, 1868, when Mr. Sherman, then a member of the Senate Committee on Finance, introduced a Bill to regulate the coinage of gold and silver.

If the lavish issue of irredeemable Government paper, coupled with an unlimited coinage of depreciated silver dollars, could have cured the financial ills under which the masses were laboring in 1876, it is passing strange that they did not commit the care of Government and the powers of national legislation to the hands of Mr. Cooper and his party. That surely would have been the logic of the case. But such was not their decision. The closing of that chapter in our history and the opening of a new one introduced the resumption of specie payments, one money alike for the bondholder and laborer, an excess of domestic exports over foreign imports, a revival of manufactures and home trade, an increase of business to transporters, and, with it all, a degree of national credit which even the most favored nations may regard with envy. All this came through the rejection of financial theories and plans which, when tried, have never failed to produce national bankruptcy and individual suffering. The country today stands on the threshold of a prosperous future. So long as European Governments continue to support vast armaments there will be a foreign market for the surplus raised by our farming population. The superiority of many of our manufactures is becoming better known abroad, and the demand for them increases year by year. As that demand grows in foreign markets, as well as at home, our skilled labor will be benefited and enriched. Nothing but the most egregious folly or blundering can now arrest the country's march to the highest state of wealth and power.

It must be admitted that there is one peril to the brightening prospect. Partisan politics is the one great bane and dominant evil of our life as a people. Political demagogues, intent only on personal aggrandizement, build their policies in conformity with the demands of individual or party interest, instead of squaring them with vital principles and the national necessities. Thus the public tranquillity is never entirely free from menace.

In support of this statement we have only to refer to the matter of resumption. A return to specie payment by the Government immediately after the war would have averted years of disaster. But the party intrusted with legislation deferred to the wishes of speculators and gold-gamblers. The hundreds of millions brought into the Treasury through a tax on importations, instead of being used to redeem the depreciated greenbacks, were turned over to the payment of a debt far from its maturity. That act of partisan folly cost the people billions of dollars through a lack of full purchasing

Digitized by Google

power in the paper currency of the Government and banks. During all this period the party in opposition rallingly accused the Government of maintaining one kind of money for the "bloated bond-holders," and another for the people and the poor pensioners of the nation.

The crash of 1873 and the distress which followed brought a Republican Congress to its senses. An Act was passed in the Winter of 1874-5, fixing a specific date when the Government would resume the payment of specie. The Democratic National Convention of 1876 antagonized this measure, and the demagogues of that party who had been declaiming against "gold for the bondholders and depreciated paper for the people" clamored for its repeal. In pursuance of this declared hostility, a Democratic House, on the 23d of November, 1877, passed a repealing Act. Why this change? Not, most certainly, because resumption was not proper and just in itself. Was it, then, because scheming partisans foresaw that successful resumption and a return to good times would give their opponents a claim upon the consideration, if not the lasting gratitude, of the country?

But at last resumption is an accomplished fact; it has brought reviving prosperity in its train; yet the intriguing politician does not stay his hand. To retrieve past losses and secure prospective gains the country needs entire rest from financial agitation. The need is met by the introduction into Congress of all manner of disturbing schemes. Some call for the issue of billions of irredeemable paper currency, others for the unlimited coinage of silver dollars of the value of eighty-five cents, the same to be legal-tender for one hundred cents. All are disturbing, uncalled-for, and pernicious. The country has not asked for financial legislation at the hands of Congress. On the contrary, the representatives of our great industrial and trade interests, being well satisfied with the good results flowing from resumption, imperatively demand exemption from legislative interference. These interests are of paramount importance. The prosperity and happiness of the people depend mainly upon their success. The party attempting their destruction, or the partisan seeking to profit by their ruin, should be, and will be, held to a stern accountability at the bar of public opinion.

IN THE OLD WORLD.

NO little excitement has been caused in England by Mr. Dillwyn's motion in the House of Commons, imputing certain unconstitutional acts to the Queen, and by Sir Robert Peel's rather savage onslaught on the Royal Family, on account of an intimation in *Vanity Fair*, by Mr. Bowles, a "friend" or toady of the Prince of Wales, that the Royal Family intended to cut Sir Robert, because, as the latter expresses it, "a member of the House of Commons dares to express his opinion in his place in Parliament, and to quote Thackeray and history in support of that opinion." The Prince of Wales caused Sir Robert to be informed that he had never authorized Mr. Bowles's statement, and Mr. Dillwyn's motion, so far as it reflected on the motives and disposition of the Queen, was promptly disavowed by both Mr. Gladstone and the Marquis of Hartington, the actual and the titular leaders of the Liberal Party. The breeze over these two "incidents" will die away, of course, but it is none the less significant of the drift of British sentiment and opinion as to Lord Beaconsfield's policy of putting forward the Sovereign and the Court as active factors in British politics.

It is significant also of the great changes which are going on in British thought and feeling, that something like national exultation should be manifested over the fact that, at the last Consistory in Rome, the Pope made a Cardinal of the gifted and learned John Newman, the descendant of an English Puritan and a French Huguenot; and that Exeter Hall should not break into a volcanic eruption over the introduction in the House of Commons of the O'Connor Don's Bill, to establish a Roman Catholic University in Ireland.

The political situation in France may be briefly stated as showing a difficulty in the Ministry, but not yet a crisis. After the 6th of June, when the time of partial amnesty expires, M. Waddington will resign the Premiership to M. Le Royer, who will also take the place of M. Lepère, Minister of the Interior. M. Waddington will remain Minister of Foreign Affairs. Gambetta has no expectation of trouble on any crucial question to arise before the Chambers, which met on the 15th of May, at Versailles. At a private conference, M. Clemenceau, the Radical leader, has presented the outlines of a programme which includes liberty of the press, the right of public meeting, income tax, free trade, secular education, separation of Church and State, and abolition of the exemption of clerical students from conscription. He declared, very reasonably, that the time had arrived to inaugurate a true Republican policy. And, bugbear as Clemenceau is in many French eyes on account of certain views held by him, his notion of "a true Republican policy" was partly formed from a careful study of its theory and practice in the United States, and differs little, in main features, from that of any enlightened American statesman. Yet, naturally enough, he wants a French republic and not altogether an American one for France. Not a few Americans betray both ignorance and silliness in wondering that the French people, with all their inherited differences of race and development, do not adopt our system in full, ready cut and dried. The International Canal Congress met at Paris May 15th. M. de Lesseps was elected its President, Admiral Ammen, United States Navy, Vice-President, and Mr. Nathan Appleton, of Boston, Chairman of the Committee on the Economic and Commercial Aspects of the project. It is not probable that the fair promoters, American and foreign, of Lieutenant Napoleon Bonaparte Wyse's scheme for an interoceanic canal will reap, so soon as they expect, a harvest from it; but the Congress will not have been held in vain if its discussions impress the world with the vast importance of deciding upon and executing the best possible scheme for accomplishing the purpose in view.

Germany has sent vessels to look after her South American interests during the war between Chili and Bolivia. She has also concluded a favorable treaty with Samoa. The Reichstag, by a vote of 218 to 88, has adopted the Government's proposal relative to duties on raw and broken iron. The tariff majority in the Reichstag, it is expected, may lead to the disruption of the National-Liberal Party. Autonomy has been granted to Alsace-Lorraine. By the birth of a daughter to Princess Charlotte of Prussia, the Emperor of Germany has become a great-grandfather and the Queen of England and Empress of India a great-grandmother. Dr. Döllinger, of the Old Catholic Church, appears anxious to submit to Rome, but is averse to the conditions required.

The rumor that King Alfonso will be married in October to an Austrian Princess is well received in Spain. The Duke of Medina Coeli, while out shooting on his estates, accompanied by his wife, accidentally shot himself the other day. He had more titles than any other Spanish grandee, and he was the richest landowner in the country.

Italy has forgotten Garibaldi's wild revolutionary schemes already, and is thinking only of the creation by the Pope of eight new Princes of the Church, English Dr. Newman among them. Garibaldi has quietly settled down in Rome.

Russia is still under a reign of terror. Although St. Petersburg is apparently quiet, the Nihilists have added incendiarism as well as assassination to the crimes committed by them in the name of liberty. Seventy arrests have been made in connection with the two fires inflicted upon Orenburg since its great conflagration.

WHILE the Southern planters have been devising methods to arrest the negro exodus, it is gratifying to note that at the other end of the line, in Kansas, a State organization has been formed, headed by the Governor and State officers, for the purpose of furnishing assistance to the emigrants in procuring work and finding homes, and relieving the wants and necessities of the destitute. The number of emigrants who have so far left Louisiana is stated at 25,000, but this is probably an exaggeration.

A STEP in the right direction is proposed by the French Minister of the Interior. He is preparing a Bill which, while it will maintain severe punishments for defamation of character, will abolish nearly all the penalties for Press offenses. The French Government cannot better illustrate its sympathy with the spirit of the age than by removing the restrictions so long imposed upon the freedom of the Press. The Empire lived by strangling free discussion; the Republic could not permanently endure were it to copy the bad example.

CONGRESS has set a bad precedent in incorporating in the Legislative Appropriation Bill a clause directing the Secretary of the Treasury to use immediately the $10,000,000 now held for the redemption of fractional currency in the payment of arrears of pensions. The objection to this provision is that it opens a door for attacking the reserves in the Treasury which may be utilized by the inflationists to defeat specie resumption by making further appropriations similar in character to the Arrears of Pensions Act without devising corresponding measures for meeting such appropriations.

ANOTHER vessel with a cargo of exhibits for the Australian Exposition sailed from this port last week. A feature of the cargo were four motors and six cars of a style used in the Centennial grounds at Philadelphia. These are to be used in Sydney in transporting passengers from the railroad terminus to the Exhibition grounds. Among the other exhibits in the cargo are a display of silverware valued at $12,000, handsome showcases, agricultural machines, glassware, chandeliers, books, paints and toys. Three cargoes of exhibits in all have now been sent from this country to Sydney, and very substantial benefits to our manufacturing industries will no doubt accrue.

UNDER a decision of a United States Judge at Omaha, last week, certain Ponca Indians who were being returned to the Indian Territory by military force, were ordered to be released—the Judge holding that Indians are citizens and possess the same rights of expatriation as the more fortunate white race, and the inalienable right to "life and liberty and the pursuit of happiness" so long as they obey the laws and do not trespass on forbidden ground. This decision is regarded by the Government as a severe blow to the Indian system. "If the power of the Government to hold the Indians upon their reservations or to return them when they escape is denied," so it is stated by a Cabinet Minister, "the Indians become a body of tramps, moving without restraint wherever they please and exposed to attacks of frontiersmen without redress from the Government." The District-Attorney at Omaha has been instructed to carry the question to a higher court.

THE Internal Revenue authorities have exhibited commendable and somewhat unusual vigor, during the last two or three years, in the enforcement of the laws. A report just laid before Congress shows that since July, 1876, in the States where the laws have been principally violated, 2,638 stills have been seized and 5,422 persons have been arrested for illicit distilling, and that nineteen persons have been killed and thirty-five wounded while engaged in suppressing the illegal trade. Of the whole number of seizures, 2,283, and of the total arrests, 4,915, were made in Georgia, Alabama, Tennessee, Kentucky, South Carolina, North Carolina and Virginia. In five of these States, pleas of guilty with suspension of sentence were allowed in the cases of 2,080 offenders who expressed an earnest desire to abandon their fraudulent practices. There is no branch of the public service where energy and integrity are more important than in that charged with the enforcement of the laws relating to the revenue, and it is matter for congratulation that the heads of the Department recognize fully the responsibilities of their position.

THE politicians of Ohio are actively skirmishing for position preliminary to the grand Presidential struggle of 1880. On the side of the Republicans, Secretary Sherman seems to be looming up as a candidate for Governor, but he does not appear to be anxious for the nomination, though he would, no doubt, accept it if he supposed he could thereby advance his chances for the Presidency. The Democracy appear to be somewhat demoralized, some of their leaders favoring the renomination of Governor Bishop, while others are urging the selection of General Ewing, and others still think the right thing to do is to nominate Senator Thurman. The latter, however, apparently has some doubts as to the result of his candidacy, and prefers, not unnaturally, not to hazard his Presidential claims by risking a defeat for the smaller office. Should he be nominated and elected as Governor, he would certainly be strengthened in his struggle for his party nomination for President. Mr. Sherman's recent visit to Ohio seems to have occasioned a good deal of excitement in political circles, it being generally supposed that the object of his visit was to set on foot some deep political intrigue, but as he himself says he only went to look after the repair of the fences of his farm, it would appear that all fears of a *coup d'état* of any sort may be safely dismissed.

THE city of New York is fortunate in numbering among her Representatives in Congress a gentleman so well able to speak effectively for her great interests as Hon. Levi P. Morton. Among all the speeches in opposition to the pernicious Warner Silver Bill, none has presented more compactly and clearly the objections to that financial monstrosity than that—only five minutes in length—of this eminent financier. The Bill proposes, in effect, to compel the Government to buy all the silver, American or foreign, offered to it by private owners, issuing certificates therefor good for duties and taxes. Of its inevitable effect, Mr. Morton said:

"If this Bill is to become law, the German Government and all who have silver bullion the world over will pour it into our mints to receive for every 84 cents a legal-tender silver dollar. They will make by this simple process nearly 20 per cent., and our own people, who will be obliged to receive the coin as legal tenders, will be the losers. Coinage by the Government is properly only an official attestation of the weight and fineness of the metal stamped or coined. A silver dollar thus attested to-day should contain 484 45-100 grains as the equivalent of a gold dollar. If this Bill is to become the law of the land, its title should be changed to read, 'An Act for the Relief of the Owners of Silver Mines,' and an appropriation made for the purpose of erecting elevators and warehouses for the storage of silver coin and bullion. If the owners of silver bullion can have their property carried by the Government, as this Bill proposes, and can have certificates of its deposit made a legal tender for all dues to the United States, including Custom House duties, why not clothe bonded warehouse receipts and all other representatives of property with the same functions of money? My constituents are not the owners of silver mines, but they are largely interested in cotton, wheat, corn, flour, iron and copper. Why should not the Government receive all these and other productions of the earth on storage, issue certificates, and make them also a legal tender? And if the supply of money should still be insufficient to satisfy the honorable gentleman from Ohio, receive also titles of real estate, issue money certificates, and so continue until every species of property becomes a part of the currency of the country!"

It is scarcely necessary to add that none of the astute Silverites attempted to answer these direct and pertinent inquiries.

NEWS OF THE WEEK.

Domestic.

THE Cabinet has decided upon opening negotiations with foreign Governments on the subject of restoring the bi-metallic standard.

THE House of Representatives has ordered the appointment of a committee to consider all measures in reference to alcoholic liquors.

BURGLARY in North Carolina being punishable with death, three persons guilty of that crime were hanged at Hillsboro, May 16th.

A RESOLUTION has been introduced in the United States Senate for the appointment of a commission to negotiate a reciprocity treaty with France.

IN Brooklyn, Messrs. Flaherty and Bennett, Commissioners of City Works, were convicted of malfeasance in office, and Commissioner Milne was acquitted, May 16th.

IN the Law School of Columbia College, 169 students were graduated on May 14th, and in the Law Department of the University of the City of New York, 39 were graduated.

GREAT forest fires last week destroyed a vast deal of timber near Fryeburg, Me., North Conway and Bartlett, N. H. The heavy rains have extinguished the forest fires in the neighborhood of Port Jervis.

MORE testimony showing wholesale attempts at bribery has been taken before the Committee of the Pennsylvania Legislature investigating charges of corruption in the passage of the Riot Indemnity Bill.

JUDGE ASA PACKER, President of the Lehigh Valley Railroad Company, ex-Member of Congress, and founder of the Lehigh University at South Bethlehem, Pa., died in Philadelphia, May 17th, in the 74th year of his age.

THROUGHOUT Minnesota, Northern Iowa and Northwestern Wisconsin, a region which annually sends 30,000,000 to 40,000,000 bushels of wheat to market, the weather for two weeks past has been peculiarly favorable to the growth of the wheat crop.

IT is now said that at least 5,000 whites have invaded the Indian Territory, and that hundreds are moving forward from the southern counties of Kansas. Over 150 wagons, it is represented, passed into the Territory southwest of Independence in one day recently.

GROUND was broken in Brooklyn for the elevated railroad on May 12th, and the president of the company, the contractor and sixteen workmen were arrested. A second attempt was made to prosecute the work later in the week, but the police interfered and the project was abandoned pending a decision in the court.

MR. PENDLETON has introduced in the United States Senate a Bill authorizing the Secretary of War to set aside any vacant posts or barracks for use in the establishment of normal and industrial training schools for Indian youth from the nomadic tribes having educational treaty claims upon the United States.

THE United States Senate was mainly occupied last week in the discussion of the Legislative Appropriation Bill. The House failed to pass the so-called Election Bill over the President's veto, the vote being 127 to 97, not the necessary two-thirds. Ten of the Nationals voted with the Democrats, and three did not vote. The Democratic members of the House have not yet decided what course to pursue as to the Army Bill.

THE eighty-ninth annual convention of the Protestant Episcopal Church of Massachusetts was held in Boston last week. The Presbyterian General Assembly met in annual session at Saratoga, May 15th. Rev. Henry H. Jessup, of the Syrian Mission, was chosen Moderator. The General Assembly of the Presbyterian Church, South, began its annual session at Louisville on the same day. The General Assembly of Congregational Preachers of the West met at Terre Haute, Ind., May 14th.

THE New York State Assembly passed a Bill to protect Nassau Street and Broadway from the elevated railroads, and a Bill to establish five cent fares at all hours on the elevated roads was favorably reported from the Committee of the Whole, on May 13th. On the 14th the Assembly passed the Five Cent Fares Bill, on the 15th the Excise Bill was defeated in the Assembly, while in the Senate a favorable report was made on the Bill to protect Nassau Street and Broadway; and on the 16th, the Assembly passed the Bill reducing the legal rate of interest to six per cent., amended the Street Protection Bill in the interests of the elevated railroads, and passed a Bill providing for a commission to revise the tax laws, consisting of Charles H. Sedgwick, of Syracuse, George Dawson, of Albany, and John Wheeler, President of the Tax Commission of New York City. It was decided to adjourn to May 22d.

Foreign.

TURKEY'S negotiations for a loan of $100,000,000 have fallen through.

THE Boers in South Africa have petitioned England for independence.

TWO ROTTERDAM trading companies have failed, with liabilities of $3,750,000.

ANOTHER deadly plague, which proves fatal in twenty-four hours, has broken out in the Caucasus.

THE greater part of Lublin, a city of 20,000 inhabitants in Russian Poland, has been destroyed by fire.

THE O'Conor Don has presented in the House of Commons a Bill to establish a Catholic University in Ireland.

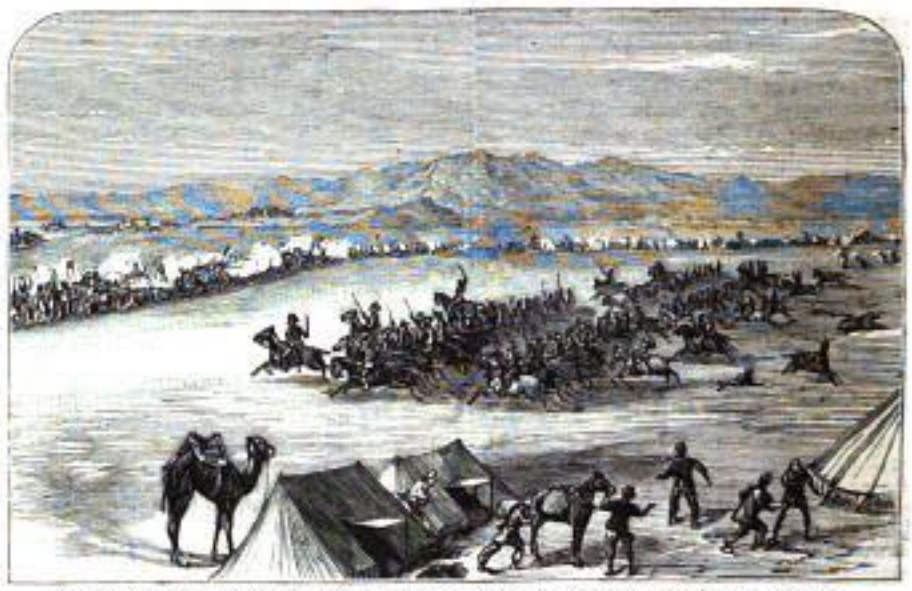
BOLIVIAN troops have recaptured Atacama from the Chilians; 15,000 Bolivians are marching to attack the Chilian border.

THE English negotiations with the Afghan Ameer are not making satisfactory progress, the Ameer having made fresh demands.

A LARGE fire at Poonah, an important Government and military centre, eighty miles from Bombay, has destroyed five public buildings and fifty private houses.

THE communal elections throughout Spain largely favor the Government. Señor Martinez, leader of the Centralists, has announced his intention to support the Government.

TIDINGS have been received down to September 25th, 1878, of the Nordenskjöld Polar Expedition, which is wintering on the north coast of Eastern Siberia. All were well, and evidently waiting for the ice to break up in order to sail eastward.



TWO Chilian vessels have destroyed the great railway works at Molleudo, destroyed Pisagua and bombarded Iquique, all three important ports of Peru. During the bombardment of Pisagua Admiral Rogers, of the *Pensacola*, had a narrow escape while on his way to his vessel in a small boat.

CHINAMEN SPRINKLING AND IRONING HOTEL LINEN.

THE LAUNDRY IN THE PALACE HOTEL, SAN FRANCISCO.

IN view of the great antagonism displayed throughout California towards the Chinese, it seems hard to believe that but a few years ago, Mongols who were experienced in the laundry business were heartily welcomed to the land. The encouragement offered by the hotels, public institutions and private families, have attracted so many of this class, that to-day more Chinamen are employed in laundry-work in San Francisco than in any other kind of labor. Their wash-houses are to be found in all parts of the city, every square block containing from four to six such establishments. From San Francisco they spread to Sacramento; then to the mining centres; then, journeying Eastward, they located in the leading cities as far as Boston, or were colonized for work on the largest scale, as at North Belleville, N.J. As a rule, Chinese laundrymen are better ironers than washers. They have a novel method of sprinkling clothing when getting it ready for the ironing-table, as shown in one of our present illustrations. Filling the mouth with water, it is ejected upon the garment or linen in the form of spray, being more evenly distributed by this process than by the usual hand-sprinkling. The prices charged by these laundrymen are of course much less than those formerly fixed by the American and French, but through the dispersion of the Chinamen throughout the United States, the latter have been forced to reduce their rates.

In the private wash-houses all the work is done by hand, the average Chinaman not caring to meddle with the mysteries of steam or complicated machinery, and not having the means to purchase the necessary apparatus. In San Francisco it is broadly asserted that the majority of the private laundrymen are agents for the different lottery schemes maintained by the Chinese, deriving a small percentage on all sales of tickets.

In the case of hotels and public institutions, steam and machinery have been adopted to do the greater part of the work; and in no place is the operation so thorough and extensive as in the laundry in the basement of the immense Palace Hotel at San Francisco, the model caravanserai of the world. All the linen and wearing apparel that requires washing is collected from the 775 rooms for guests, and, with the immense quantity of articles that belong to the hotel proper, taken to the basement. Women employés carefully examine every piece, and make such repairs as are necessary, and then the mass is turned over to the Chinamen for washing and ironing. Although the place of chamber-maids is filled throughout the building by Chinamen, with the force on each floor in charge of an American woman, who gives all her orders in "pigeon-English," the laundrymen do not live in the place, but work during regular daily hours.

The clothing is washed in huge tubs by means

WASHING PERFORMED BY MACHINERY.

CALIFORNIA.—THE IMMENSE LAUNDRY IN THE PALACE HOTEL, SAN FRANCISCO.—FROM SKETCHES BY H. A. OGDEN.

Digitized by Google

of steam, the pieces being agitated by mechanical appliances, so that the Chinamen have simply to keep the tubs supplied with clothing and other articles. All articles are then passed through a steam wringer, and then taken into the drying-room where hot air is applied. In the ironing-room there are from thirty to fifty men employed, who first sprinkle the articles as above described, and then iron them. For ironing collars and cuffs, a small cylinder covered with cloth, and operated by a crank, is used. A piece of hot iron is placed in a metal cup wide enough to cover the broadest cuff, and by means of a lever, after the collar or cuff is laid over the cylinder, the cuff is pressed down upon it, when by an alternate forward and backward motion of the crank, the article is easily ironed.

As may be imagined from the size of the Palace Hotel, the work is there done with the best mechanical appliances, and their laundry may be justly considered the most extensive and complete in the world.

MARRYING AN AMAZON.

"WELL, Fred, I gather from your description that your sister can swim like a fish, pull an oar with a university graduate, ride like a trooper, and shoot a bird on the wing. No, I thank you, my dear fellow; when I do give up my bachelor freedom it will not be for the sake of an amazon. I never did like the species. I beg your pardon. You look annoyed. If I have said anything to offend——"

"Not in the least, Arnold, I assure you. Although you refuse to compete for her hand, I fancy my bonnie Kate will not go a-begging for suitors. I wonder what the high-spirited puss would say if she knew that I had been trying to arrange an alliance for her. Annihilate me with one glance of her big black eyes, I fear. It was only my fondness for you both that suggested the arrangement to my mind."

"I am sorry that I cannot comply with your wishes, but the ideal of what my future wife is to be is in the way."

"Ah, yes," laughed Fred; "methinks I see the fair creature who will one day lead you captive—a languid, blue-eyed divinity, stereotyped after the fashionable pattern, with no apparent will of her own before marriage, but afterwards she will develop a thousand ailments and make you a very slave to her whims. In fancy I see you tied to her *chatelaine*, carrying her sofa-pillow, her smelling-bottle, her drops—my dear Arnold, I pity you."

"Keep your pity until I need it," replied Arnold, good-humoredly.

"Hark, I hear wheels. It must be Rosa and Kate returning from their drive. Let us hasten to the house—I long to have my wife see and know you."

"And I long to know her," responded Arnold, as the two friends walked away. "It seems strange to think that while I have been roaming over Europe you have taken to yourself a wife and settled down into a veritable *pater familias*."

The sound of their voices and the odor of their cigars came fainter and fainter to the senses of a young girl who had been an inmate of the old-fashioned summer-house, on the steps of which the foregoing conversation took place.

As soon as escape was possible, she bounded from her place of concealment, crossed the lawn and gained her own room without discovery.

Bolting the door to guard against intrusion, she began to pace the room with hurried steps.

A weaker woman would have thrown herself on the bed and indulged in a flood of tears, but Kate Escott was made of sterner stuff, and her indignation and wounded pride were shown by her flushed cheeks and blazing eyes.

"What could have induced Fred to offer my hand to a man who has never seen me, or to any man at all, for that matter? It was insulting to me! How coolly my lord refused the proposal. 'Did not desire to marry an amazon.' I wonder if my fondness for riding and rowing makes me unmaidenly? No one ever suggested such a thing before, and I have always prided myself upon my skill in these sports. I wish my good guardian had not taught me to love them. I have half a mind never to touch oar or gun again. But, pshaw! What do I care for the opinion of this namby-pamby fellow, who is probably too timid to either hunt or ride! No; I will show him that one woman at least is indifferent to his approval."

These were some of the thoughts which followed each other in rapid succession through the young lady's mind. At last, with a mental resolve to ride, row, hunt, etc., to the utmost extent of her ability during Mr. Jeffrie's stay, she began to make her toilet for dinner.

Kate Escott had been left an orphan at a very early age. Having no near relatives she was adopted into the family of her guardian, Mr. Daymond, who was a widower with four boys. In his pleasant home on the banks of Broad River, the little girl grew up, the idol of the household. She had been a delicate child at the time of her parents' death, but by sharing the sports of the boys and living an out-door life, she grew strong and robust, and developed into a young woman of perfect health.

Her proficiency with the gun and oar had been a great delight to her guardian, and she herself took a greater pride in these amusements than in her fine education and literary and musical accomplishments.

Mr. Daymond died at a ripe old age. His three youngest sons were well established in business; to Fred, the eldest, had descended Haredell, the family seat, and with him Kate made her home, loved as a sister by his warm-hearted wife and himself.

Arnold Jeffries and Fred Daymond were old college chums. A young man of independent means, Arnold had been traveling in Europe since his graduation, and at the time of my story had just returned to his native land. Through some misunderstanding he had arrived at Haredell a day sooner than was anticipated, taking his host by surprise, and finding his hostess away from home.

"I thought Kate went to drive with you, Rosa," said Fred, after the formalities of the introduction were over and the three had settled for a chat.

"No. She complained of a headache and said she should pass the afternoon in the old summer-house, where the breezes from the river would refresh her."

"The summer-house!" exclaimed Fred, starting, while a look of consternation passed between himself and Arnold.

"Why, what is the matter? I am sure there is no occasion for surprise at Kate's place of retreat; you know it is her favorite resort."

"Yes, of course," Fred hastened to say, "I was only thinking how odd it was that Arnold and I were roaming in the garden all the afternoon, and even sitting on the summer-house steps waiting for you ladies to make your appearance, and one of you were so near all the time."

At this moment came the summons to dinner.

"Ah," said Fred, as the party entered the dining-room, "here is Kate! This is my friend Jeffries, Kate, about whom you have heard so much."

Mr. Jeffries looked at Kate with considerable interest. Expecting to see a woman of the grenadier order, with a loud voice and masculine manners, he was agreeably surprised by the totally opposite style of his friend's sister.

Kate unconsciously made a beautiful picture as she stood against the background of the deep bay window. A light Summer dress with the multitudinous bows and frills of the present fashion set off her full round form to perfection. Her face was like a tropical flower with the rich bloom on the cheeks and lips, the large, soft black eyes, and dusky hair.

She received Arnold with calm, easy grace, showing nothing of the storm which had so lately ruffled her serenity.

Dinner passed off pleasantly. Arnold was charmed with his friend's family and made a favorable impression himself on Mrs. Daymond. Kate treated him with a charming frankness and discoursed in a most ladylike way on all the topics introduced, but at the same time she made many mental reservations, for, of course, she was prejudiced against him.

"By Jove, Arnold," was Fred's confidential remark, as the two gentlemen were pacing up and down the terrace, enjoying their after-dinner cigars, "I must confess that I was startled when Rosa said Kate was in the summer-house this afternoon."

"Yes! I was prompted to call for my luggage and leave at once, for I felt as if I could never face Miss Escott if she heard our conversation."

"She must have fallen asleep or else left the summer-house before we took possession of the steps, for her manner at dinner betrayed no knowledge of the affair. But what do you think of her?"

"Think of her? What could a man think, except that she is lovely, charming!"

"Ah! 'Sets the wind in that quarter?' Not so much of an amazon as she was, eh?"

"It was altogether the fault of your description, Fred. What was I to suppose from it but that she was one of the masculine women who are an abomination to me?"

The next morning, hearing merry voices, Mr. Jeffries looked from his window, and saw beneath it a pretty picture.

Kate was playing on the gravel walk with a little child and a huge dog. He watched her toss the little one in her strong, young arms, kiss the soft lips with loving fondness, and thought, "Why, she is the very essence of womanliness! How absurd was my conception of her!"

The succeeding days but deepened his fancy for her. Everything that she did seemed invested with a charm in his eyes, even though they were the same occupations which he had so violently condemned in his conversation with Fred.

He rode by her side on horseback and admired her graceful and firm seat in the saddle.

She passed him in her trim boat one day, as he was roaming along the river bank. Her boating dress was of blue flannel, the short sleeves showing her well-rounded arms, with the muscles in full play as she shot past him. He hastened to the landing-place, but before he could reach it, she had pulled in with long, steady strokes, stepped out and made her boat fast in the most independent manner.

He witnessed her skill in shooting at a mark, but all was done in such a ladylike manner that he had no thought but of admiration.

Fred looked on with delight, pleased to see his friend become entangled in the meshes of Love's net.

"I have lost my friend, but I may gain a brother," he soliloquized, as he smoked his cigar in solitude, for Arnold now devoted the twilight to sauntering by the side of Kate up and down the broad terrace, conversing in low, soft tones upon topics suggested by the tender beauty of the hour.

Yes. Arnold Jeffries was in love; with all the strength of his ardent, passionate nature. He waited but for a fitting opportunity to declare himself.

"To-morrow — and to-morrow," was his nightly resolve, as he indulged in dreamy reveries by his vine-shaded window before he retired, while the strains of her sweet songs lingered on his ear, and he seemed still to feel the pressure of her soft warm hand.

At last there came what seemed to contain a possibility. A ride had been planned for the morrow, but at dinner a note was received which urgently summoned Mr. and Mrs. Daymond to a neighboring city.

"Oh, dear, we shall have to give up our ride, and I am sure that to-morrow will be just the day to see Pleasant Valley in all its beauty," exclaimed Kate, with just a perceptible pout of her scarlet lips.

"It is too bad that you should be disappointed, and I confess that I had set my heart upon the excursion; so if you will accept my escort it need not be given up," said Arnold, quickly, seeing in the enforced *tête-à-tête* of the ride the long-sought opportunity.

"Just the thing," broke in Fred, "you two can have a pleasant day to yourselves, and Rosa and I will be at home in time for dinner. What say you, Kate?"

"Anything is better than not going at all," was Kate's saucy reply.

"To-morrow!" was Arnold's last waking thought.

"To-morrow!" also said Kate, in the solitude of her chamber. "How shall I get through the day? I am sure that Mr. Jeffries means to propose to me—ha, ha! I have made quite a conquest for an amazon, and to-morrow I will have my revenge for the summer-house scene. I suppose Fred will be angry with me if I refuse his friend, but it will serve them both right for talking of me so freely. Let me see—to-morrow I will ride Caper, and if his pranks do not interfere with my lord's love-making and give me a chance to show my amazonian qualifications, then I have no claim to belong to the warlike sisterhood."

The family breakfasted early the next morning, and Rosa and Fred set off at once.

But early as it was Kate had had time to visit the stables and summon Mike to her aid.

"How is Caper this morning, Mike?"

"Fresh, miss. Won't stand on more than two feet at a time."

"Good. I shall ride him to-day. I suppose our horses have been ordered early?"

"Yes, miss, but Caper feels his oats to-day, and——"

"Why, you don't think him too lively for me, do you, Mike? You used to say that I could ride anything."

"Yes, miss, she's a cute one, she is. She ain't goin' to drop into that feller's mouth just as soon as he opens it, I tell you. She and Caper 'll lead him a dance to-day, sure," was the groom's comment, as he proceeded to make the morning toilet of the horses. He had lived on the place as boy and man, and felt a pride in his young lady's achievements as well as an interest in her settlement in life.

Kate looked particularly handsome when she appeared on the piazza where Arnold awaited her. Her tight-fitting habit showed her perfect form to advantage—the round, white throat, swelling bust, and taper but not too slender waist. Her abundant hair was arranged compactly beneath the drooping plumes of her hat. A spirit of mischief lurked in her bright eyes and twitched her full scarlet lips, but Arnold detected it not, ascribing (with the usual conceit of a man) the brilliance of her manner to the anticipated pleasure of his companionship.

They walked around to the mounting-block at the south porch. The two horses were already there, Caper showing by his actions that his was no misnomer.

"Why, how is this, Miss Kate? This is not the horse you usually ride?" Arnold exclaimed, in surprise.

"No! I have taken a fancy to ride Caper this morning. Is he not a beauty?" she continued, going up to the spirited creature and patting his neck.

"But is it safe for you to ride him?" he asked, with some anxiety. "If I were your brother, or had any other claim to authority over you, I would not suffer you to risk your life on what seems to me a dangerous animal."

"Ah, but you haven't any authority, Mr. Jeffries," flashing him a saucy look. Then, finding his eyes dangerous, she said, quickly, "It is time to mount. Here, Caper, eat this and be quiet," giving him a lump of sugar. "Now, Mike, hold his head a moment," and, putting her foot in Arnold's hand, she sprang lightly to her saddle. Caper jumped to one side, reared, kicked, but all to no purpose. Kate's seat was firm, her hand strong, and she soon brought him to comparative quietude.

Arnold had looked anxiously on, and, when Caper was at last induced to stand still for a moment, walked to Kate's side to arrange the folds of her skirt, saying, in a low tone, "Will you not give up this horse for my sake, Kate? I cannot consent to your risking your precious life in this way."

Kate blushed, but answered, "A willful woman must have her way, you know, Mr. Jeffries, and I cannot give up my victory. To horse! to horse!" she continued, merrily, never heeding the reproach of Arnold's blue eyes.

Without another word he mounted, and the two rode rapidly away. Kate had Caper under good control, but at every approach to sentiment on the part of Arnold, the horse would in some unaccountable manner begin to prance and curvet requiring all of Kate's attention.

Thus the proposal was staved off for a time, but it was bound to come at last.

They had a charming ride to and through Pleasant Valley, and about noon turned their faces homewards.

Kate was bright, beautiful, bewitching. Arnold, though vexed at her evident purpose of preventing all serious questions, grew more madly in love with her each moment. At last, as they mounted a hill from which Haredell could be discerned, he resolved to trifle no longer.

Suddenly he laid his hand upon Kate's, and uttered her name softly; the very tone was a caress, and Kate took alarm at once.

"Nay, Kate, we have had enough of that," said Arnold, firmly, as she essayed to strike Caper a light blow with her whip. "I must and will speak and you must listen. I love you deeply, passionately." A little pause during which Kate still kept her eyes demurely fixed upon her horse's mane. "Have you no answer for me?"

"I am sorry that you have spoken, Mr. Jeffries."

"And is that all, Kate? Have you no love to give me in return? Has all my wooing been in vain?"

His eager, impassioned tones, his firm hand upon her own, his glowing eyes had their effect upon Kate. Her heart beat in response to his love; she seemed drawn nearer to him; he pressed her hand to his lips, his heart; apparently she was about to yield, but pride, wounded pride, came to her rescue.

Summoning all her resolution, she raised her eyes calmly to his face, and said: "Mr. Jeffries, how can you love me? Hush, it is my turn to speak now. I ride like a trooper, swim like a fish, row, hunt, and am, in short, an amazon, a kind of woman you despise."

"Kate, what do you mean?"

"I mean, Mr. Jeffries, that I was in the summer-house while you and Fred held an interesting conversation on the steps, and heard you refuse my hand, which to my great consternation and distress was offered you."

"Ah, Kate, you surely will not lay up those idle words against me. Recollect, I had not seen you then. If a life-time of devotion will atone——"

"It will not," was the calm reply, for Kate had worked herself up to such a pitch that she was living over again the feelings which she had experienced at the time of the conversation. "A woman's wounded pride is never healed. The amazon cannot be so easily appeased."

She urged her horse at his highest speed and entered the gates in advance of Arnold, intending to dismount unaided, but Arnold spurred his horse on, and flung himself from the saddle just in time to receive her in his arms as she hastily endeavored to spring to the ground.

Her soft form was in his embrace, her warm lips near his own. Pride, anger, wounded love were all forgotten. He strained her passionately to his heart, pressed an eager kiss upon her lips, and said, imploringly, "Kate, darling, forgive?"

Kate's eyes flashed angrily. "Release me, sir! I have already answered you."

He set her down at once, bowed low, and turned away.

She hastened to her own room, flung herself face downward upon the bed, and burst into a flood of bitter tears.

Neither of the two appeared at lunch, but an hour after, Kate having changed her dress and effaced all traces of her tears, rang for a servant. She gave some trifling order, then asked, carelessly, "Where is Mr. Jeffries?"

"He has gone rowing, miss; he started soon after you got back."

"Very well, he will probably be at home in time for dinner."

A desire to see him, unseen herself, took possession of her. She ascended the high turret stairs, to a little room where a glass was mounted, through which the surrounding country and the winding course of the river could be seen.

At intervals she swept the river, but for some time was unsuccessful. At last she discerned a tiny speck upon the waters. Waiting until it approached nearer, she again applied her eye to the glass. She started, wiped the lense, looked again. What did she see to startle her? A boat containing a prostrate human figure, drifting with the current! Could she be mistaken? No: it was Arnold, and the falls only a mile below!

She flew rather than ran down the stairs, through the house, across the lawn, to the landing-place, where her own little boat lay safely moored. Now God be praised that she had been trained to manage a boat, that her arms were strong, her nerves steady!

The drifting boat was rapidly approaching, borne upon the swift current. It passed her. She saw the white face of Arnold Jeffries, the eyes closed.

With skillful fingers she untied her boat, sprang in, and pulled with long, steady strokes in pursuit.

With teeth set she rowed steadily on, occasionally looking over her shoulder at the boat ahead.

She was gaining on it, and just as the roar of the falls broke on her anxious ears, she reached it, made it fast to her own, and rowed swiftly to the shore, here quiet and secluded.

She made her own boat fast, then sprang into the other, raised the white face of the unconscious man to her breast, and dipped from the river a handful of water which she flung into his face.

"My love, my love! Wake! speak to me, Arnold!" Kisses and tears fell upon the brow, the eyes, the lips. All the passion which she had that day repressed broke from its bonds and was lavished upon the unconscious form.

"Will he never wake to hear me say I love him? Arnold, I love you!" The eyelids fluttered under the warm kisses, lifted, and the blue eyes looked feebly around.

"Thank God! Arnold, you are safe!"

"Kate, is it you? Kiss me!"

She kissed his pale lips passionately. He smiled with content, then said, "I shall be better in a moment." Presently, "You have saved my life, Kate; will you accept it?"

"I will."

Then Arnold told how he came to be helpless in the boat. "I was angry and heated; I had eaten no lunch, and, after a fierce row up the river, a dizziness came over me, the oars fell from my hands, I lost consciousness. I think your kisses woke me to life, and if you had not known how to manage a boat my chances of escape from the falls would have been small."

"Yes, Arnold; had I not been an amazon my efforts would have been useless."

Fred and Rosa had returned. To them the whole story had to be related. Kate was praised, kissed, and congratulated, for both saw how matters stood between the lovers.

Digitized by Google

In the twilight Arnold was resting upon a couch in the dim parlor. Rosa had gone to see her little one safely bestowed for the night; Fred was smoking his cigar on the veranda.

"Kate!" called Arnold, softly, to the quiet figure in the large chair by the window.

She went obediently and sat down upon the ottoman by his side.

He took her passive hands. "What is it, Kate?"

"I fear you thought me unmaidenly this afternoon, Arnold," was the faltering reply.

"Because you caressed me, my dear child?" was the fond reply, raising the bowed head. "You showed yourself a true woman, my amazon, my precious, brave preserver!"

A BICYCLE "MEET" IN BOSTON.

THE bicycle season in Boston was opened in handsome style on Saturday, May 10th. The "meet" was in Chestnut Hill Reservoir, and the contest was given under the auspices of the Suffolk Bicycle Club. Considering the disadvantage of a strong head-wind for half the distance, the time made by the contestants is regarded as quite remarkable. Gold and silver medals were offered as prizes by Amos A. Lawrence, who, after the races, entertained the club at his dwelling close by. The following is a summary of the contests:

QUARTER-MILE RACE.

	Heats. First.	Second.	Third.
Russel S. Codman	3	1	1
George R. Agassiz	4	2	2
John C. Sharp, Jr.	2	3	dr
G. Tappan Francis	1	dr	dr
F. E. Abbott	5	dr	dr

Time—38⅝s; 39½s; 42s.
First Prize—Russel S. Codman.
Second Prize—George R. Agassiz.

ONE-MILE RACE.

	Heats. First.	Second.
Russel S. Codman	1	1
Edward P. Sharp	2	2
Frederick S. Whitwell	3	dr
George W. Beale	4	dr

Time—3m 32⅛s; 3m 29⅝s.
First Prize—Russel S. Codman.
Second Prize—Edward P. Sharp.

FIVE-MILE RACE.

G. Tappan Francis	1
Philip Little	dr
John C. Sharp	dr

Time—18m 4⅘s.
First Prize—G. Tappan Francis.
Second Prize—Not awarded.

A very great and quite extensive interest in bicycling, both as a pleasure and as a means of healthful, invigorating exercise, was manifested in the Eastern and Middle States in 1868-69. Courses were established for contests, the streets were crowded with the two-wheeled velocles, and it was even proposed to provide them in the post-office department to facilitate the collection and delivery of letters. Bicyclists, having no show on the streets, took possession of the sidewalks, and in a few weeks pedestrians had little show there. In New York the novelty was so overdone that it soon ran its course, and of late years but few bicycles have been seen save in pawn-shops and junk-stores. In Boston, however, the vehicle has remained popular. With over 400 in use there, it has not been difficult to organize and maintain clubs, and these clubs, by their Summer contests, have greatly increased the interest in the "bone-shakers."

The best mile yet made in this country was by Mr. Agassiz, of Cambridge, last Autumn, in the race of the Boston Bicycle Club at the Chestnut Hill Reservoir, in 3m. 21¾s. The quickest 40-mile ride yet made here was by Mr. H. E. Parkhurst in November last, from Boston to South Framingham and return, just forty miles, in 3h. 36m., and the best 20-mile run on the same gentleman's return trip from South Framingham on the same occasion, in 1h. 36m. The entire run was made without a single rest, and with only one dismount. A 100-mile run has been made by the Jacquith Brothers, of Brookline, within the suburbs of Boston, in 11¾h. Of course, all these runs have been outdone in England, where the roads are in better condition, while the riders have had several years' experience, whereas most of our riders have practiced the art only from six to eight months, and not more than one or two professionally. Probably the best rider in all respects in this country, as regards endurance, gracefulness of motion, and skill in "fancy riding," is Mr. William R. Pitman, of Boston.

In the six days' professional race at Agricultural Hall, London, which began April 28th, Mr. G. Waller rode 253 miles the first day, and at the end of the second day had covered 457 miles. Mr. T. Andrews rode 220 miles on the first day without a dismount. These are the best records ever made, and are perfectly marvelous. In this race they were not allowed to ride over eighteen hours per day.

The experience of ages has demonstrated that exercise is as essential to good health as proper food. Any one acquainted with physiology and the laws of health will see at a glance that riding the bicycle must be not only pleasant and exhilarating, but highly conducive to health. In this sense bicycling is a hopeful sign of progress. If that man is a benefactor who makes two blades of grass grow where but one grew before, he should come in for a share of praise who teaches a man to go ten miles as easily and as quickly as he previously went four. "Time is money," and whatever of it is saved is often so much cash. As the bicycle serves its purpose in this direction, it may be regarded as a good savings institution. Riding the bicycle affords pleasurable excitement, which is what most men drink liquor for, and it leaves no sting behind. It takes men out into the pure air, into God's light and sunshine, and braces their lungs with the very breath of heaven. It is an inducement to young men who work in close apartments to spend more time in the open air, and furnishes them with a means of healthful, invigorating, and at the same pleasant, exercise, such as nothing else can possibly afford.

The bicycler in New England has now his club, his course, and definitely outlined routes for suburban excursions, and his literature, a capital brochure by Charles E. Pratt, A.M., having been issued by the Pope Manufacturing Company of Boston. There is no reason why, with the excellent roads in and about New York City, there should not be a multitude of clubs finding amusement, excitement and health in this exercise.

A seventy-two hours' tournament was opened in the American Institute Building, New York City, on Wednesday night, May 14th, with eight contestants, William De Noille, "champion of America," the present favorite in the race; William E. Harding, an ex-champion of New York; Professor William C. McClellan, another ex-champion; A. P. Messenger, of Troy, "long-distance champion"; Charles H. De Noille, son of the favorite; William Rutland, "champion of England"; Daniel Belard, "champion of France"; and Thomas Walsh and W. H. Darling, both of New York, but not "champions."

Following is the complete score at 10:07 P. M., May 16th, just forty-eight hours from the start:

	Miles.	Laps.		Miles.	Laps.
De Noille, Sr.	378	2	Darling	108	7
De Noille, Jr.	348	5	Harding	165	1
Rutland	325	1	Walsh	146	2
Belard	275	1	Messenger	136	5

Both of the De Noilles expected to make over 500 miles within the seventy-two hours.

THE McDOWELL MONUMENT, AT DANVILLE, KY.

THE dedication of the monument erected to the memory of Dr. Ephraim McDowell, of Kentucky—the father of ovariatomy—took place at Danville, Ky., on the 14th of May, under the auspices of the Kentucky State Medical Society, which was in session at that time, and was attended with unusually interesting and imposing ceremonies. The dedicatory address was delivered in the evening by S. D. Gross, M. D., LL.D., D. C. L. Oxon, of Philadelphia, Pa., in the Second Presbyterian Church, to an overflowing house, which contained some of the most eminent medical men in the United States, who had come to hear the "Father of American Surgery" tell of the life of Kentucky's great surgeon. Letters were read from Mr. Spencer Wells—England's great ovariatomist—Drs. T. Gaillard Thomas, of this city, Oliver Wendell Holmes, of Boston, and various others, expressing their sympathy and interest in the event.

To Dr. Gross is due the credit of having successfully established the claims of Dr. McDowell as the originator of the operation known as ovariatomy, which had been resisted so long by the medical profession abroad. It was, therefore, peculiarly appropriate that he should have been selected to pay this last tribute to the memory of a man who had rendered such inestimable services to mankind—or, more properly, to womankind, since the operation is only applicable to women—as to justly entitle him to be ranked among the great benefactors of his race. In a memoir of McDowell—who was singularly careless and indifferent as to his own gain—published by him in 1861, the proofs brought forward in support of McDowell's claims as the originator of ovariatomy were so overwhelming and unassailable as to for ever silence all other claimants, from Italy to England, and he is everywhere now throughout the civilized world acknowledged to be the first to have performed this operation. The idea of suitably marking the resting-place of McDowell first originated with the late Dr. John D. Jackson, of Danville, and was brought up by him before his county—Boyle—Medical Society, and from there to the American Medical Association. This was at the beginning of the present decade. Over ten thousand dollars were raised for this purpose, but at the meeting of the Association in Louisville, Ky., in 1875, this money was, by resolution, diverted by the Association who had the matter in charge, from its original purpose of a monument, into a fund to be known as the "McDowell Fund," the interest of which is to be devoted solely in paying every year for prize essays on Diseases of Women. A resolution was furthermore adopted at the same meeting, leaving it to the State of Kentucky to provide a "local memorial to the memory of Dr. McDowell." The physicians of that State were thus called upon a second time to contribute for a monument to McDowell, and the whole amount, with an insignificant exception, thus raised came from the profession. The death of Dr. Jackson occurring soon after, the State Society confided the completion of the work to his pupil and friend, Dr. L. S. McMurtry, of Danville, to whose energy and perseverance, under many depressing circumstances, the success of the undertaking is attributable.

The monument is made from Virginia granite. Midway on the shaft is the likeness of McDowell in bronze, under which is his monogram, with "Honor to whom honor is due," and beneath is this inscription, encircled with a wreath of laurel: "A Grateful Profession Reveres his Memory and Treasures his Example." On the opposite side of the shaft is inscribed, "Erected by the Kentucky State Medical Society, 1879," and on the western face, encircled by a serpent, "Born in Rockbridge County, Va., 1771; attended the University of Edinburgh, 1793; located in Danville, Ky., 1795; performed the first Ovariatomy, 1809; Died, 1830." On the eastern face is this inscription: "Beneath this shaft rests Ephraim McDowell, M.D., the father of Ovariatomy, who, by originating a great surgical operation, became a benefactor of his race, known and honored throughout the civilized world." The monument is beautifully located near the centre of the town, in a lot of several acres, formerly a burying-place, which has been beautified and made suitable for his remains.

McDowell was scarcely two years old when he was brought by his parents from Virginia to Kentucky. He remained two years abroad in pursuit of his medical education. In 1802 he married Miss Susan Shelby, daughter of Governor Isaac Shelby, the first Governor and one of the most distinguished citizens of Kentucky. He attained great success as a surgeon, patients coming to him from the adjoining States. He performed the operation of lithiatomy on Mr—afterwards President—James K. Polk, who, after he became Chief Magistrate, evinced his gratitude to McDowell, then dead, by an offer of office to his son, which was declined. McDowell made no record of his ovariatomies, and it is therefore not certainly known how many he made. Of the thirteen of which there is reliable authority, he had eight to recover, which is an unusual low death rate, taking into consideration that these operations were performed before the day of anæsthetics. Dr. McDowell was buried in the family burying-ground at "Traveler's Rest," some six miles south of Danville, the home of Governor Shelby. He was an Episcopalian in religion, and the ground on which Trinity Church, Danville, is built, was given by him.

JOURNALISTIC NOTES.

IN these days of æstheticism, when art is gradually entering our lives and when an inner voice fiercely yearns for "arrangements" in color, symphonies in design; when Eastlake and Chippendale and good Queen Anne, of whom it is said that she is dead, and chronological surroundings as they were in Pompeii A. D. 79, or at Hampton Court when Ramillies was fought and won, are as necessities to our existence, and when anachronism would be worse than death, it behooves us, if not exactly to "cram," to at least read up the all-important subject; and for the sake of all of those whom it may concern, gladly do we welcome the *Art Amateur*, the first number of which now lies open before us. It is admirably "done," whether as regards matter, illustrations and general get up, while with the names of such contributors as Clarence Cook, Edgar Fawcett, and others equally known to fame, and with Mr. Montague Marks in the editorial chair, there can be but little question as to its future success.

THE *Eve* of this city has been purchased by Mr. Frank H. Norton, formerly on the editorial staff of the New York *Commercial Advertiser* and other city papers, and for many years an assistant librarian in the Astor Library. Mr. Norton designs making the *Eve* a first-class weekly newspaper, and his journalistic experience will be valuable to that end. The paper is handsomely printed in eight pages, and has a large country and local circulation. Its leading feature is a very full condensation of the news of the world. It will be independent in politics.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Easter at the Czar's Palace.

In Eastern countries special attention is given to the celebration of Easter, and as that is the leading religious event of the year the observances are made as grand as possible by all churches. Russia rejoiced particularly for her victory over the Turks, and her Czar, always in dread of assassination, and this year more alarmed than ever, held a most showy service in the Winter Palace at St. Petersburg. The highest dignitary of the Orthodox Greek Church celebrated Mass before an audience composed of the imperial family, the nobles of the land, and the diplomatic representatives of the world. The service was unusually impressive because of the growing Nihilist troubles, and the Czar was greatly affected while bestowing the kiss that the ancient service requires.

Sketches of the Afghan War.

The rear-guard of Major-General Biddulph's column, in retiring from Girishk to Candahar, was attacked by a large force of Alizais and others, at a place named Khushk-i-Nakhud. The enemy actually engaged are reckoned at more than a thousand, who were opposed on the British side by about three hundred, including two squadrons of the Third Sind Horse, under Major W. Reynolds and Captain Maitland, and a hundred men of the Second Beloech Regiment (Twenty-ninth Bombay Native Infantry), under Lieutenant-Colonel Tanner. The whole force was under the command of Lieutenant-Colonel Malcolmson, commanding the Third Sind Horse. An attempt of the enemy to get round the left flank of the British force, which had been hastily drawn up in front of the camp, was frustrated by a charge of the Sind Horse, as shown in our illustration. The remainder of the enemy were held at bay in the meantime by the Beloochee infantry of Colonel Tanner, and presently retired, with some loss, upon seeing the defeat of their right wing. An artist, at the headquarters of General Sir Samuel Browne's division on the Cabul River, sends a sketch of a party embarked on a raft of inflated bullock-skins for a short voyage across that stream to visit the cavern-temple of Chicknour, which have claimed the attention of gentlemen endowed with antiquarian tastes who have accompanied the present military expedition. This mode of aquatic conveyance is perfectly safe, and as convenient on those waters as any other kind of boating.

The Shakespeare Festival.

The festivities in connection with the opening of the Memorial Theatre at Stratford-on-Avon began on Wednesday, April 23d, with the annual meeting of the Council of the Association, under the presidency of the Mayor, the donor of the site. This was followed by a luncheon in the Town Hall, at which the chief toast drank was —"The Memory of Shakespeare." In the evening "Much Ado About Nothing" was played in the theatre, a handsome and commodious building, capable of seating about 1,000 persons, erected at a cost of £20,000 from designs by Messrs. Dodgshon & Unsworth, of Westminster. The cast included Miss Helen Faucit (*Beatrice*), Miss Wallis (*Hero*), Mr. Barry Sullivan (*Benedick*), and Mr. W. H. Cummings (*Balthasar*), and at the fall of the curtain a dedicatory address in verse, by Dr. Westland Marston, was read by Miss Kate Field. The interior decorations are not yet finished, but there is a fine drop-scene, painted by Mr. Beverley, which represents a visit of Queen Elizabeth to the Globe Theatre at Bankside, in her state carriage, with the Earls of Essex and Southampton on horseback, and Alleyn, the actor, manuscript in hand, receiving them at the door.

Attempted Assassination of the Czar.

On the morning of April 14th, while the Emperor of Russia was taking his customary walk near the palace in St. Petersburg, a respectably dressed man, named Solowjeff, wearing a military cap with a cockade, fired four shots at his Majesty's person, none of which, however, took effect. The assassin was promptly captured, but soon became insensible, having, it is supposed, taken poison. No papers were found upon him. Throughout the following night all suspected houses were searched. The previous week the revolutionary committees issued a proclamation threatening the life of the Emperor and a second St. Bartholomew. The great throng of people which had assembled enthusiastically cheered and congratulated the Emperor, who thanked them for their proofs of fidelity on such a painful occasion. He said he knew he had the support of all respectable people. He hoped God would grant that he might complete his task, which consists in promoting the welfare of Russia. The Emperor, after the foregoing speech, drove to the palace without escort.

The Colliery Explosion in Belgium.

A terrible explosion from fire-damp occurred on the 17th of April in the Agrappe coalpit at Frameries, near Mons. There were in the pit at the time no less than 260 men, and the force of the explosion was so great that many of the miners at the top of the pits were killed, the mine was set on fire, and the flames rushed up the shafts destroying the woodwork and the cages in a short time, so that it was impossible at first to reach the imprisoned men; but by almost superhuman exertions, over a hundred men were brought up alive, many of whom were dreadfully burned and scarred. A similar explosion happened in the same mine in 1875, when 122 colliers were killed. Our illustration represents the scene at the entrance to the works, shortly after the arrival of a body of dragoons called out to preserve order.

British Sports in Cyprus.

Early in the present year a large field near Larnaka was plowed up and a good-sized racecourse constructed for exhibitions of this great British sport. On the first day there were nine races, and the event proved successful beyond anticipation. The most amusing of all the races was that in which only the Zaptiehs (native police, generally mounted) were allowed to enter their own ponies. These jockeys showed a variety of dress and saddle most picturesque, while the ponies' heads were well adorned with crimson tassels. The start was very good, and they went off at the top of their speed, and for the first hundred yards they retained their position, being in two rows of five and four. The course was a mile, so that they had to pass the winning post twice. The first time of passing the winning post is that shown in our sketch. The dome of the Roman Catholic Church, the minaret of the mosque, and the other towers of Old Larnaka, are seen in the background. The foreground is composed of the motley crowd of Greeks, Turks, etc. An old Turk is selling lemonade in front, while a Greek priest is shown in the centre. There are no lack of these last in most of the resorts of harmless pleasure. The Englishman, Greek merchant, negro policeman, and others, will be easily recognized. Only two kept to the course, and bore off the honors.

AT HOME AND ABROAD.

—THERE will be a chorus of 2,000 voices at the forthcoming Saengerfest in Cincinnati.

—RUMORS from Tiflis say that high Russian officers are engaged in Persia organizing the Shah's forces.

—THERE are now 1,300 cases before the Supreme Court of Tennessee, representing $5,000,000, and 20,000 litigants.

—THERE are at present 54,847 persons employed in the United States Post Office Department, including all branches.

—THE whole sea coast of TEXAS is now quarantined against vessels hailing from points south of latitude twenty-five degrees.

—FIFTY-TWO practicing lawyers, seven ex-editors, six merchants and nearly a dozen farmers, are members of the present United States Senate.

—THE collection of statues in Westminster Abbey is to be enlarged by the erection of a magnificent figure of Sir James Y. Simpson, of chloroform fame.

—THE commune of Lozio, Italy, has been brought into notoriety by an enormous avalanche from the summit of the Comarena, devastating the country for several miles.

—A SITE has been selected on Mount ETNA, at an elevation of 9,652 feet above the level of the sea, for an observatory, the erection of which will be hastened during the Summer.

—THE most prominent men and women of New Orleans signed a petition to the Louisiana Constitutional Convention asking that equal political rights be conferred on women.

—THE Vestry of St. George's, Hanover Square, London, have refused permission for the erection of a statue of Lord Byron in St. James Street, on the ground that Byron wrote immoral poetry.

—HALAS, a town of Hungary, has been inundated in consequence of continuous rains, and floods have destroyed 300 houses in Kottori, besides ruining the harvest prospects in that district.

—GERMAN exhibitors have arranged for a space of 41,000 square feet at the Sydney Exhibition; England will occupy five times as much room, France half as much again, and Belgium about the same.

—POPE LEO has just founded the first archconfraternity of the Roman Catholic Church known to have been established in England. It is attached to the Church of St. Mary of the Angels, at Bayswater.

—NORTH CAROLINA has now about 1,200 convicts subject to penitentiary discipline, two-thirds of whom are employed with profit to the State on the several lines of railroads in course of construction.

—THE three tallest trees in the world are believed to be a sequoia near Stockton, California, which is 325 feet high, and two eucalypti in Victoria, Australia, estimated to be 435 and 450 feet high respectively.

—THE expedition fitted out under the direction of Captain Sengstacke, commander of the last German Polar cruise, for the relief of the Swedish navigator Professor Nordenskjold, will sail about June 1st from Sweden.

—ON opening the will of William Marshall, of Glasgow, Scotland, who died May 3d, it was found that he had left a legacy of $1,000,000 to found a charitable institution of the character most needed in the city, to bear his name.

—IN order to reach and utilize the large deposit of bernard guano which has been discovered there, and which can be secured only by a navigable cutting, it is proposed to run a canal through the swamp land of St. James Parish, LA.

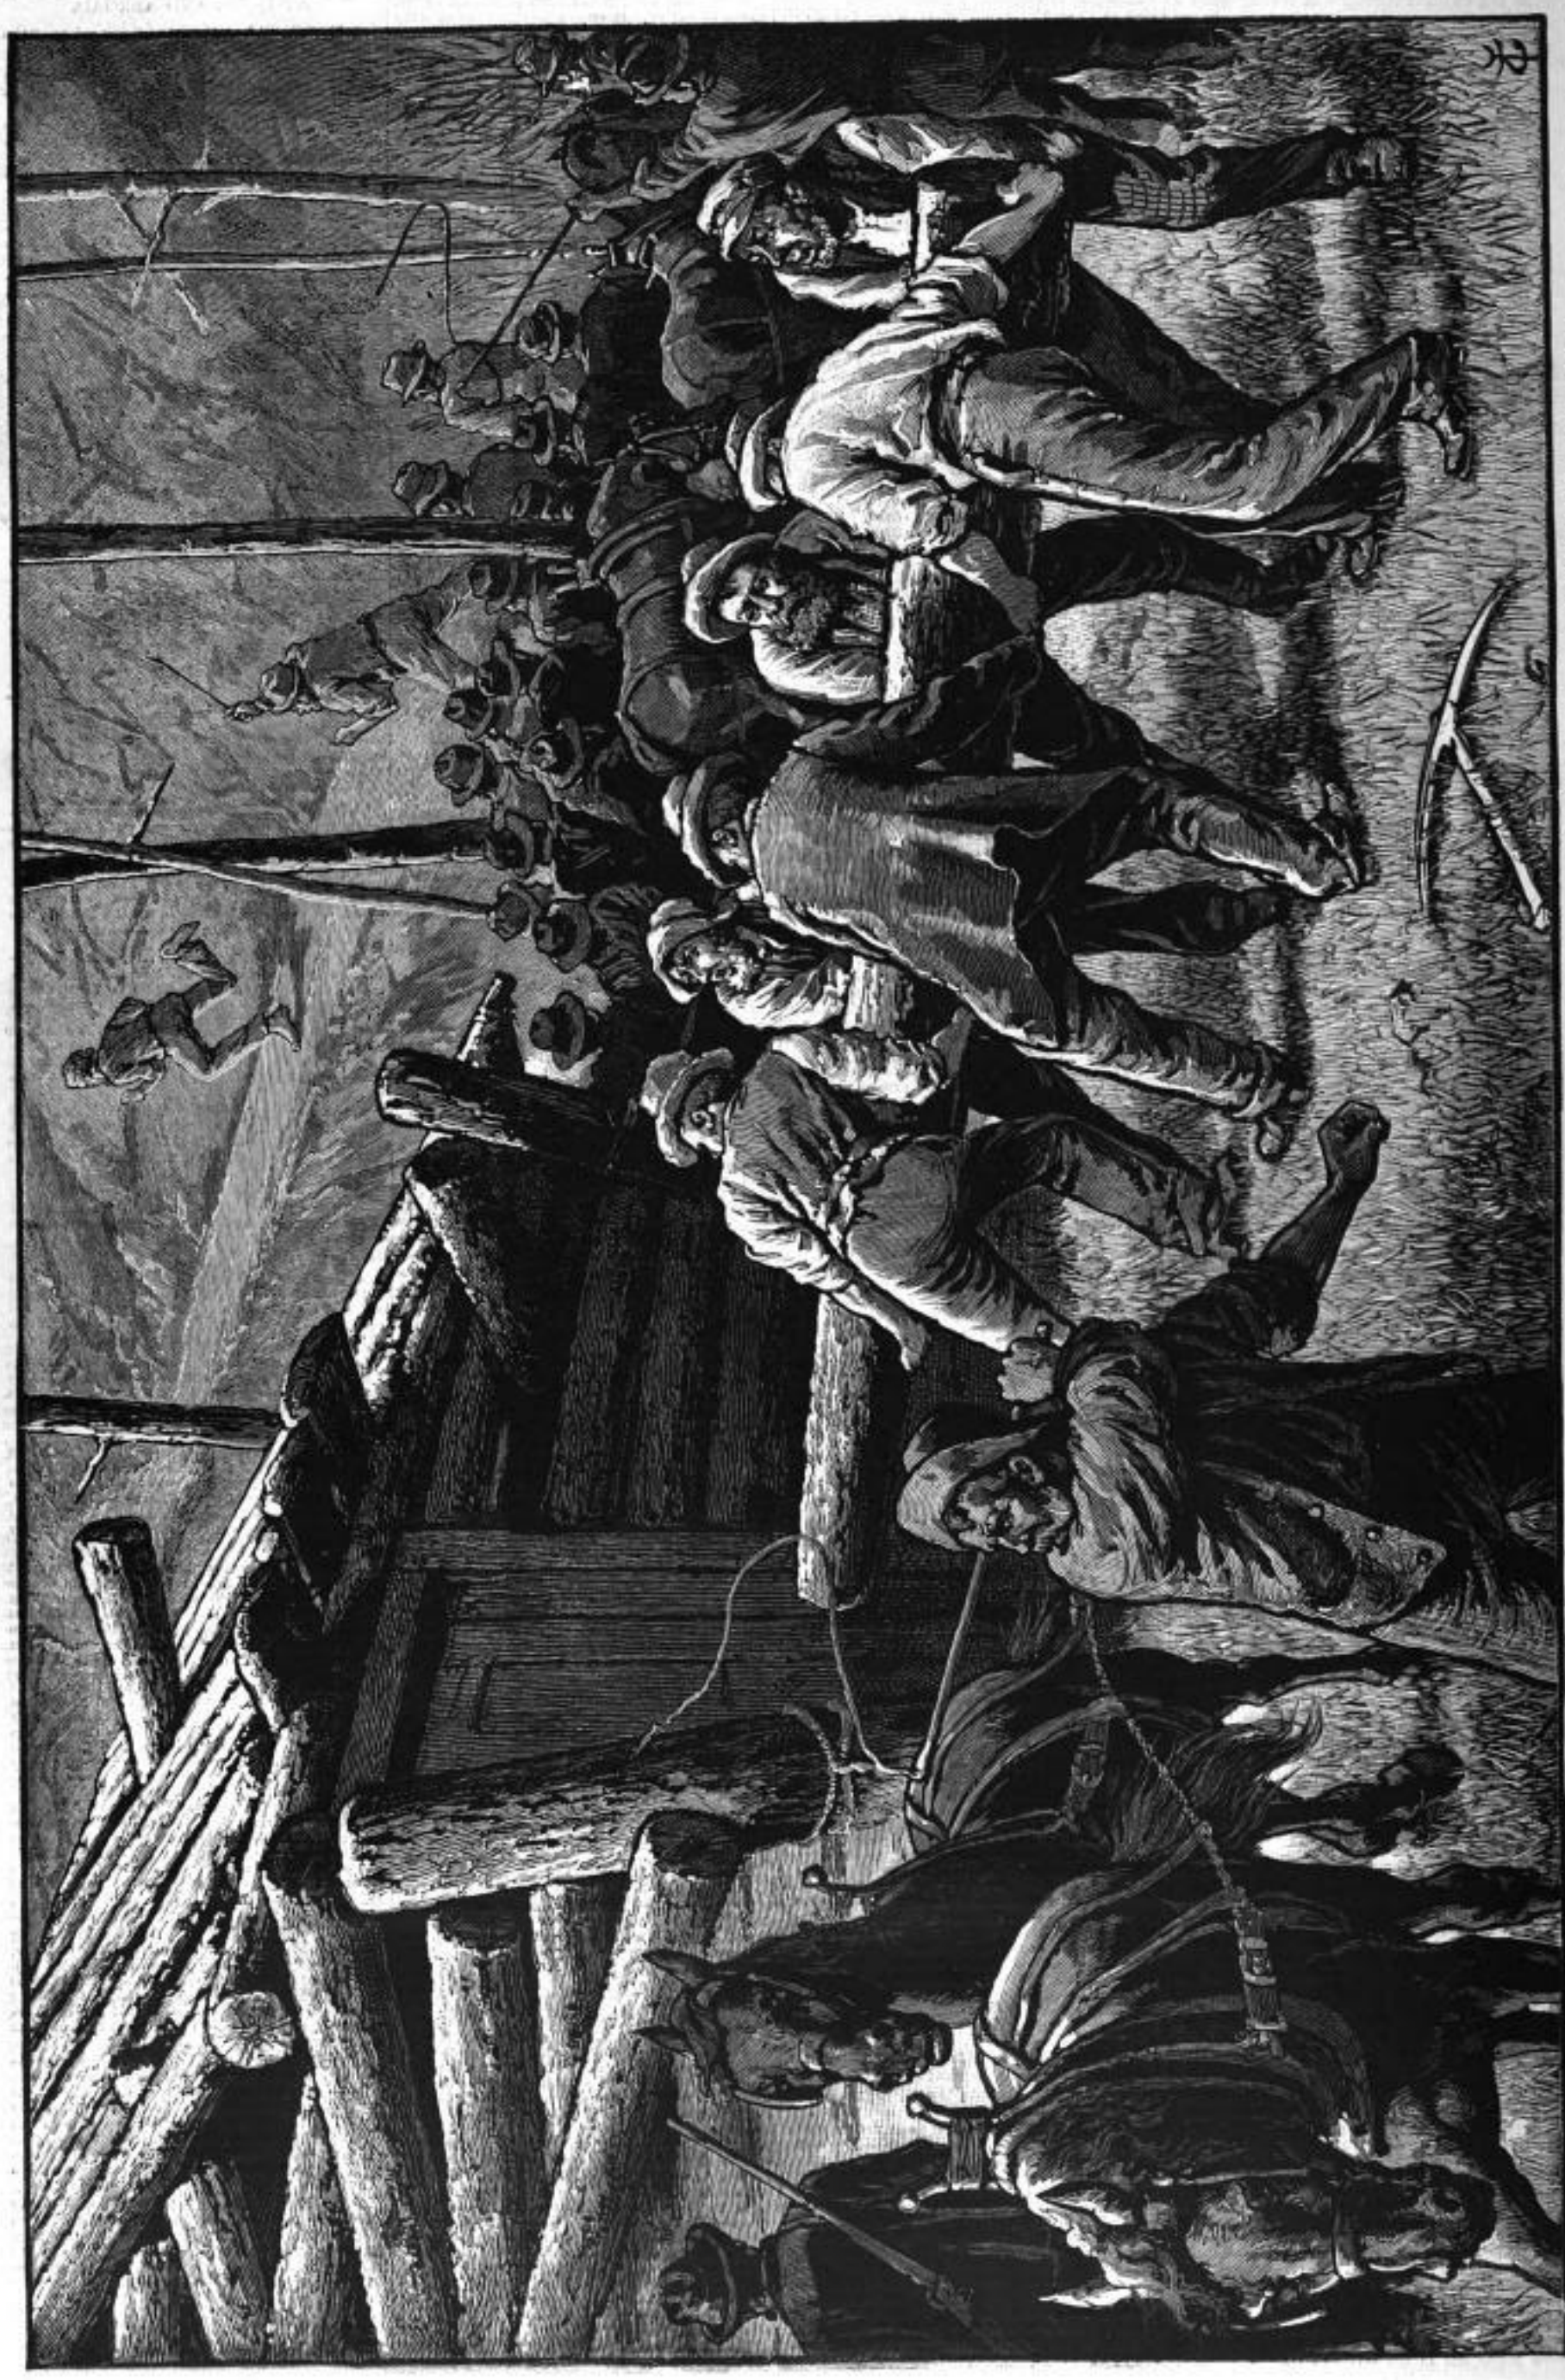
—IN Mississippi there are 318,244 pupil children —158,156 white, and 160,088 colored. Of these 100,676 white and 106,179 colored are in school. The school fund for the past year, $202,258, allowed a per capita in average daily attendance of $2.42.

—PORTABLE gas is sold and delivered in England like milk. People in the country and in villages receive it in copper vessels from large cities. This method is additionally popular from the fact that it dispenses with the erratic and depraved meter.

—NEXT year the Belgians will celebrate the fiftieth anniversary of their independence with an exhibition of industry, agriculture and horticulture, in a building to be erected on the Champs des Manœuvres, Brussels, and opened June 15th. Antwerp will have a maritime exhibition, while art and music will have their day at Ghent and Liege.

—LONDON *Truth*, commenting on the meat question, asserts the belief that fully one-half of the beef sold as English, Scotch and Irish in England is in reality American, and is positive that if Americans would themselves establish large retail depots for the sale of their beef and pork and bacon they would benefit themselves and benefit the English into the bargain.

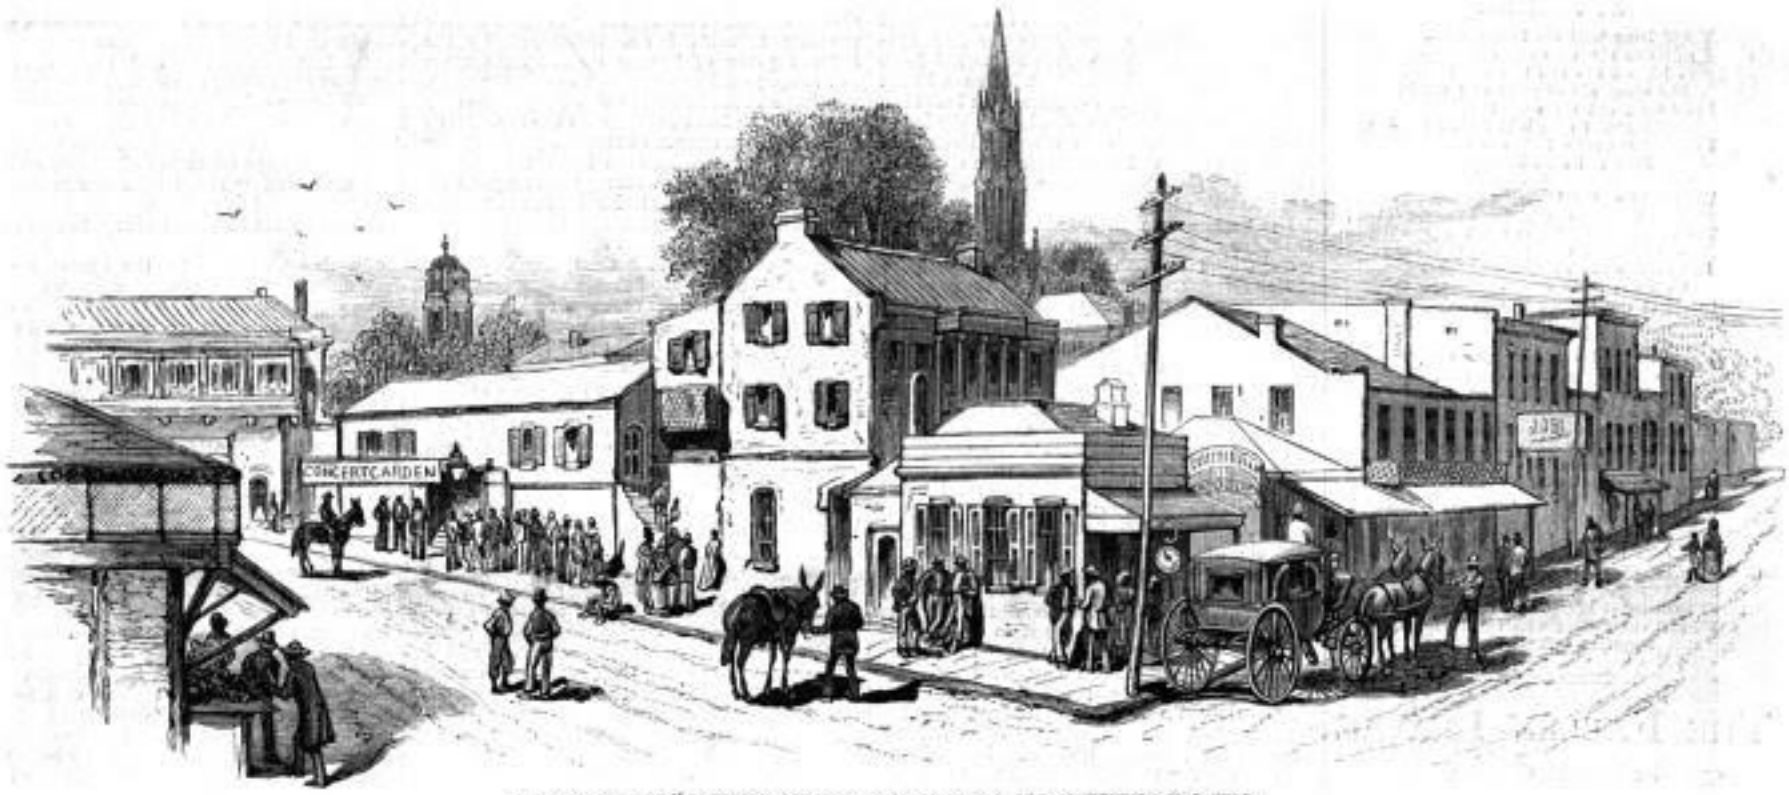
—ANNOUNCEMENT was made in the German Parliament on May 14th that Austria and Russia had consented to become parties to the Anglo-German treaty for the prevention of the slave trade on the African coast, but that France and the United States, though asked to do so, were scarcely expected to join, as they were unwilling to admit the mutual right of search.



—A VERY notable committee is now in session in London, under the chairmanship of the Hon. Lyon Playfair. The object is to make a long and thorough examination of the subject of the electric light. The first witness to be examined is Professor Tyndall, and a long list has been made out of well-known scientists and experts, and of representatives of various gas companies, to follow him.

—TO PROVE that Philadelphia is a church-going place a local paper took the census of 150 churches, counting 47,907 men, 57,299 women, and 25,587 children, a total of 124,793. There are 552 churches in the city, and, estimating from the above average, the number of people who there attend church is 551,159, of all denominations and creeds, out of a population of about 1,000,000.

—EARNEST work is being performed by the Auxiliary Sanitary Association of New Orleans to prevent another epidemic. Its men have abated the nuisance of Locust Grove Cemetery (Potter's Field) by a covering of two feet of earth sown with grain and grass. All interments are now made in the new cemetery, three and a half miles from the city. The dumping grounds have been covered with a coating of lime a foot deep.



—THE only house in the United States built by a reigning sovereign has once more escaped destruction by fire. It is the President's house at William and Mary College in Virginia. It was built in 1732, and was accidentally burned by the French troops under Lafayette, while on their way to the Battle of Yorktown in 1781. Louis XVI. rebuilt it out of his own private funds, and the structure has survived the fires which have since then so often destroyed the college. The last fire broke out a few days ago, but was fortunately extinguished before much damage was done.

AT PARTING.

LOW lying 'mid the lilies there—
White lily buds and daffodils—
With languid lips and loosened hair,
And every gift of grace that thrills,
I saw thee, and thy raven lace,
And charmed eyes held me for my ban,
I deemed me for a little space
More god than man.

The pillars of thy bower-house
Were wrought in quaint and strange device;
The white-rose beauty of thy brows
Was crowned with poppies to entice;
Soft dreams and sweet forgetfulness
Were girt about thee, and desire
Ceased at thy bidding to distress,
To vex and tire.

I have no hard words for thee now,
No curses cling about thy feet;
Then wert as I, and I as thou,
Weary of life and termoil sweet.
Since mutual ills on both alight,
And mutual (if there be such) shame,
Therefore let buried be in night
All mutual blame.

Here, where our heavy, heated heads
That never may come close again
Feel, even through tangled greens and reds
Of flower and leaf, the thick, chill rain;
Here, in forgetfulness of wrong,
In mind of brief and barren bliss,
We send our parting with one long
Forgiving kiss.

JOHN MORAN.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXVIII.—(CONTINUED).

AMELIUS accepted this new rebuff with ominous composure. He sat quietly smoking in the deserted room with his uncle's letter in his hand.

Among the other disastrous results of the lecture, some of the newspapers had briefly reported it. Preoccupied by his anxieties, Amelius had forgotten this when he wrote to his relative. "Just like me!" he thought, as he threw the letter into the fire. His last hopes floated up the chimney with the tiny puff of smoke from the burnt paper. There was now no other chance of shortening the marriage-engagement left to try. He had already applied to the good friend whom he had mentioned to Regina. The answer, kindly written in this case, had not been very encouraging. "I have other claims to consider. All that I can do I will do. Don't be discouraged—I only ask you to wait."

Amelius rose to go home—and sat down again. His natural energy seemed to have deserted him—it required an effort to leave the club. He took up the newspapers and threw them aside, one after another. Not one of the unfortunate writers and reporters could please him on that inauspicious day. It was only while he was lighting his second cigar that he remembered Mrs. Farnaby's unread letter to him. By this time he was more than weary of his own affairs. He read the letter.

"I find the people who have my happiness at their mercy both dilatory and greedy" (Mrs. Farnaby wrote); "but the little that I can persuade them to tell me is very favorable to my hopes. I am still, to my annoyance, only in personal communication with the hateful old woman. The young man either sends messages or writes to me through the post. By this latter means he has accurately described, not only in which of my child's feet the fault exists, but the exact position which it occupies. Here, you will agree with me, is positive evidence that he is speaking the truth, whoever he is.

"But for this reassuring circumstance, I should feel inclined to be suspicious of some things—of the obstinate manner, for instance, in which the young man keeps himself concealed; also, of his privately warning me not to trust the woman who is his own messenger, and not to tell her on any account of the information which his letters convey to me. I feel that I ought to be cautious with him on the question of money—and yet, in my eagerness to see my darling, I am ready to give him all that he asks for. In this uncertain state of mind, I am restrained, strangely enough, by the old woman herself. She warns me that he is the sort of man, if he once gets the money, to spare himself the trouble of earning it. It is the one hold I have over him (she said), so I control the burning impatience that consumes me as well as I can.

"No! I must not attempt to describe my own state of mind. When I tell you that I am actually afraid of dying before I can give my sweet love the first kiss, you will understand and pity me. When night comes I feel sometimes half mad.

"I send you my present address in the hope that you will write and cheer me a little. I must not ask you to come and see me yet. I am not fit for it, and besides I am under a promise, in the present state of the negotiation, to shut the door on my friends. It is easy enough to do that; I have no friend, Amelius, but you.

"Try to feel compassionately towards me, my kind-hearted boy. For so many long years my heart has had nothing to feel on but the one hope that is now being realized at last. No sympathy between my husband and me (on the contrary, a horrid, unacknowledged enmity, which has always kept us apart); my father and mother, in their time, both wretched about my marriage, and with good reason; my only sister dying in poverty—what a life for a childless woman! Don't let us dwell on it any longer.

"Good-by for the present, Amelius. I beg you will not think I am always wretched. When I want to be happy I look to the coming time."

This melancholy letter added to the depression that weighed on the spirits of Amelius. It inspired him with vague fears for Mrs. Farnaby. In her own interests he would have felt himself tempted to consult Rufus (without mentioning names), if the American had been in London. As things were, he put the letter back in his pocket with a sigh. Even Mrs. Farnaby, in her sad moments, had a consoling prospect to contemplate. "Everybody but me," Amelius thought.

His reflections were interrupted by the appearance of an idle young member of the club with whom he was acquainted. The newcomer remarked that he looked out of spirits, and suggested that they should dine together and amuse themselves somewhere in the evening. Amelius accepted the proposal; any man who offered him a refuge from himself was a friend to him on that day. Departing from his temperate habits, he deliberately drank more than usual. The wine excited him for the time, and then left him more depressed than ever, and the amusements of the evening produced the same result. He returned to his cottage so completely disheartened that he regretted the day when he had left Tadmor.

But he kept his appointment the next morning to take leave of Regina.

The carriage was at the door, with a luggage laden cab waiting behind it. Mr. Farnaby's ill-temper vented itself in predictions that they would be too late to catch the train. His harsh voice, alternating with Regina's meek remonstrances, reached the ears of Amelius from the back dining-room. "I'm not going to wait for the gentleman-Socialist," Mr. Farnaby announced, with his hardest sarcasm of tone. "Dear uncle, we have a quarter of an hour to spare!" "We have nothing of the sort; we want all that time to register the luggage." The servant's voice was heard next. "Mr. Goldenheart, miss." Mr. Farnaby instantly stepped into the hall. "Good-by!" he called to Amelius through the open door of the front room, and passed straight on to the carriage. "I shan't wait, Regina!" he shouted from the door-step. "Let him go by himself," said Amelius indignantly, as Regina hurried into the room. "Oh, hush, hush, dear! Suppose he heard you? No week shall pass without my writing to you; promise you will write back, Amelius. One more kiss! Oh, my dear——!" The servant interposed, keeping discreetly out of sight. "I beg your pardon, miss, my master wishes to know whether you are going with him or not." Regina waited to hear no more. She gave her lover a farewell look to remember her by, and ran out.

That innate depravity which Amelius had lately discovered in his own nature let the forbidden thoughts loose in him again as he watched the departing carriage from the door. "If poor little Sally had been in her place——" He made an effort of virtuous resolution, and stopped there. "What a blackguard a man may be," he penitently reflected, "without suspecting it himself."

He descended the house-steps. The discreet servant wished him good-morning, with a certain cheery aspect—the man was delighted to have seen the last of his hard master for some months to come. Amelius stopped and turned round, smiling grimly. He was in such a reckless humor, that he was even ready to divert his mind by astonishing a footman. "Richard," he said, "are you engaged to be married?" Richard stared in blank surprise at the strange question—and modestly admitted that he was engaged to marry the housemaid next door. "Soon?" asked Amelius, swinging his stick. "As soon as I have saved a little more money, sir." "Damn the money!" cried Amelius—and struck his stick on the pavement, and walked away with a last look at the house as if he hated the sight of it. Richard watched the departing young gentleman, and shook his head ominously as he shut the door.

CHAPTER XXIX.

AMELIUS went straight back to the cottage, with the one desperate purpose of reverting to the old plan, and burying himself in his books. Surveying his well-filled shelves with an impatience unworthy of a scholar, Hume's "History of England" unhappily caught his eye. He took down the first volume. In less than half an hour, he discovered that Hume could do nothing for him. Wisely inspired, he turned to the truer history next, which men call fiction. The writings of the one supreme genius, who soars above all other novelists as Shakespeare soars above all other dramatists—the writings of Sir Walter Scott—had their place of honor in his library. The collection of the Waverly Novels at Tadmor had not been complete. Enviable Amelius had still to read "Rob Roy." He opened the book. For the rest of the day he was in love with "Diana Vernon"; and when he looked out once or twice at the garden to rest his eyes, he saw "Andrew Fairservice" busy over the flower-beds.

He closed the last page of the noble story as Toff came in to lay the cloth for dinner.

The master at the table and servant behind his chair were accustomed to gossip pleasantly during meals. Amelius did his best to carry on the talk as usual. But he was no longer in the delighted world of illusion which Scott had opened to him. The hard realities of his own everyday life had gathered round him again. Observing him with unobtrusive attention, the Frenchman soon perceived the absence of the easy humor and the excellent appetite which distinguished his master at other times.

"May I venture to make a remark, sir?" Toff inquired, after a long pause in the conversation.

"Certainly."

"And may I take the liberty of expressing my sentiments freely?"

"Of course, you may."

"Dear sir, you have a pretty little simple dinner to-day," Toff began. "Forgive me for praising myself; I am influenced by the natural pride of having cooked the dinner. For soup, you have Croûte au pot; for meat, you have Tourne-dos à la sauce poivrade; for pudding, you have Pommes au beurre. All so nice—and you scarcely eat anything, and your amiable conversation falls into a melancholy silence which fills me with regret. Is it you who are to blame for this? No, sir! it is the life you lead. I call it the life of a monk; I call it the life of a hermit—I say it boldly it is the life of all others which is most unsympathetic to a young man like you. Pardon the warmth of my expressions; I am eager to make my language the language of utmost delicacy. May I quote a little song? It is in an old, old, old French piece, long since forgotten, called 'Les Maris Garçons.' There are two lines in that song (I have often heard my good father sing them), which I will venture to apply to your case: 'Amour, délicatesse, et gaité, d'un bon Française c'est la devise!' Sir, you have naturally délicatesse and gaité—but the last has, for some days, been under a cloud. What is wanted to remove that cloud? L'Amour! Love, as you say in English. Where is the charming woman, who is the only ornament wanting in this sweet cottage? Why is she still invisible? Remedy that unhappy oversight, sir. You are here in a suburban paradise. I consult my long experience, and I implore you to invite Eve. Ha! you smile; your lost gayety returns, and you feel as I do. Might I propose another glass of claret, and the reappearance on the table of the Tourne-dos à la poivrade?"

It was impossible to be melancholy in this man's company. Amelius sanctioned the return of the Tourne-dos, and tried the other glass of claret. "My good friend," he said, with something like a return of his old easy way, "you talk about charming woman, and your long experience. Let's hear what your experience has been."

For the first time Toff began to look a little confused.

"You have honored me, sir, by calling me your good friend," he said. "After that, I am sure you will not send me away if I own the truth. No! My heart tells me I shall not appeal to your indulgence in vain. Dear sir, in the holidays which you kindly give me, I provide competent persons to take care of the house in my absence, don't I? One person, if you remember, was a handsome engaging young man. He is, if you please, my son by my first wife—now an angel in heaven. Another person, who took care of the house, on the next occasion, was a little black-eyed boy; a miracle of discretion for his age. He is my son by my second wife—now an angel in heaven. Forgive me, I have not done yet. Some few days since, you thought you heard an infant crying down-stairs. Like a miserable wretch, I lied; I declared it was the infant in the next house. Ah, sir, it was my own cherubim-baby by my third wife—an angel close by in the Edgeware-road, established in a small milliner-shop, which will expand to great things by-and-by. The intervals between my marriages are not worthy of your notice. Fugitive caprices, sir—fugitive caprices! To sum it all up (as you say in England), it is not in me to resist the enchanting sex. If my third angel dies, I shall tear my hair—but I shall none the less take a fourth."

"Take a dozen if you like," said Amelius. "Why should you have kept all this from my knowledge?"

Toff hung his head. "I think it was one of my foreign mistakes," he pleaded. "The servants' advertisements in your English newspapers frighten me. How does the most meritorious man-servant announce himself when he wants the best possible place? He says he is 'without incumbrances.' Gracious heaven, what a dreadful word to describe the poor, pretty, harmless children! I was afraid, sir, you might have some English objection to my 'incumbrances.' A young man, a boy, and a cherubim-baby; not to speak of the sacred memories of two women, and the charming occasional society of a third; all inextricably enveloped in the life of one amorous-meritorious French person—surely there was reason for hesitation here? No matter; I bless my stars I know better now, and I withdraw myself from further notice. Permit me to recall your attention to the Roquefort cheese, and a mouthful of potato-salad to correct the richness of him."

* * * * * *

The dinner was over at last; and Amelius was alone again.

It was a still evening. Not a breath of wind stirred among the trees in the garden; no vehicles passed along the by-road in which the cottage stood. Now and then Toff was audible down-stairs, singing French songs in a high cracked voice, while he washed the plates and dishes, and set everything in order for the night. Amelius looked at his book shelves—and felt that, after "Rob Roy," there was no more reading for him that evening. The slow minutes followed one another wearily; the deadly depression of the early hours of the day was stealthily fastening its hold on him again. How might he best resist it? His healthy out-of-door habits at Tadmor suggested the only remedy that he could think of. Be his troubles what they might, his one simple method of resisting them, at all other times, was his simple method now. He went out for a walk.

For two hours he rambled about the great north-western suburb of London. Perhaps he felt the heavy, oppressive weather, or perhaps his good dinner had not agreed with him. Anyway, he was so thoroughly worn out, that he was obliged to return to the cottage in a cab.

Toff opened the door—but not with his customary alacrity. Amelius was too completely fatigued to notice any hidden circumstance. Otherwise, he would certainly have perceived something odd in the old Frenchman's withered face. He looked at his master, as he relieved him of his hat and coat, with the strangest expression of interest and anxiety; modified by a certain sardonic sense of amusement underlying the more serious emotions. "A nasty dull evening," Amelius said, wearily. And Toff, always eager to talk at other times, only answered, "Yes, sir," and retreated at once to the kitchen regions.

Amelius went into the library, to rest in his comfortable armchair.

The fire was bright; the curtains were drawn; the reading-lamp, with its ample green shade, was on the table—a more comfortable room no man could have found to receive him after a long walk. Reclining at his ease in his chair, Amelius thought of ringing for some restorative brandy-and-water. While he was thinking he fell asleep; and, while he slept, he dreamed.

Was it a dream?

He certainly saw the library—not fantastically transformed, but just like what the room really was. So far, he might have been wide awake, looking at the familiar objects round him. But, after a while, an event happened which set the laws of reality at defiance. Simple Sally, miles away in the Home, made her appearance in the library nevertheless. He saw the drawn curtains over the window parted from behind; he saw the girl step out from them, and stop, looking at him timidly. She was clothed in the plain dress that he had bought for her; and she looked more charmingly in it than ever. The beauty of health claimed kindred now, in her pretty face, with the beauty of youth; the wan cheeks had begun to fill out, and the pale lips were delicately suffused with their natural rosy red. Little by little her first fears seemed to subside. She smiled, and softly crossed the room, and stood at his side. After looking at him with a rapt expression of tenderness and delight, she laid her hands on the arms of the chair, and said, in the quaintly-quiet way which he remembered so well, "I want to kiss you." She bent over him, and kissed him with the innocent freedom of a child. Then she raised herself again, and looked backwards and forwards between Amelius and the lamp. "The firelight is the best," she said. Darkness fell over the room as she spoke; he saw her no more; he heard her no more. A blank interval followed; there flowed over him the oblivion of perfect sleep. His next conscious sensation was a feeling of cold—he shivered, and woke.

The impression of the dream was in his mind at the moment of waking. He started as he raised himself in the chair. Was he dreaming still? No; he was certainly awake. And as certainly the room was dark!

He looked and looked. It was not to be denied or explained away. There was the fire burning low, and leaving the room chilly—and there, just visible on the table, in the flicker of the dying flame, was the extinguished lamp!

He mended the fire, and put his hand on the bell to ring for Toff, and thought better of it. What need had he of the lamplight? He was too weary for reading; he preferred going to sleep again, and dreaming again of Sally. Where was the harm in dreaming of the poor little soul, so far away from him? The happiest part of his life now was the part of it that was passed in sleep.

As the fresh coals began to kindle feebly, he looked again at the lamp. It was odd, to say the least of it, that the light should have accidentally gone out, exactly at the right time to realize the fanciful extinction of it in his dream. How was it there was no smell of a burnt-out lamp? He was too lazy, or too tired, to pursue the question. Let the mystery remain a mystery—and let him rest in peace! He settled himself fretfully in his chair. What a fool he was to bother his head about a lamp, instead of closing his eyes and going to sleep again!

The room began to recover its pleasant temperature. He shifted the cushion in the chair, so that it supported his head in perfect comfort, and composed himself to rest. But the capricious influences of sleep had deserted him; he tried one position after another, and all in vain. It was a mere mockery even to shut his eyes. He resigned himself to circumstances, and stretched out his legs, and looked at the companionable fire.

Of late, he had thought more frequently of his past days in the Community. His mind went back again now to that bygone time. The clock on the mantel-piece struck nine. They were all at supper at Tadmor, talking over the events of the day. He saw himself again at the long wooden table, with shy little Mellicent in the chair next to him, and his favorite dog at his feet waiting to be fed. Where was Mellicent now? It was a sad letter that she had written to him, with the strange, fixed idea that he was to return to her one day. There was something very winning and lovable about the poor creature who had lived such a hard life at home, and had suffered so keenly. It was a comfort to think that she would go back to the Community. What happier destiny could she hope for? Would she take care of his dog for him when she went back? They had all promised to be kind to his pet animals in his absence; but the dog was fond of Mellicent; he would be happier with Mellicent than with the rest of them. And his little tame fawn, and his birds—how were they doing? He had not even written to inquire after them; he had been cruelly forgetful of those harmless, dumb, loving friends. In his present solitude, in his dreary doubts of the future, what would he not give to feel the dog nestling in his bosom, and the fawn's little rough tongue licking his hand! His heart ached as he thought of it; a choking hysterical sensation oppressed his breathing. He tried to rise, and ring for lights, and rouse his manhood to en-

Digitized by Google

dure and resist. It was not to be done—where was his courage? where was the cheerfulness which had never failed him at other times?—he sank back in the chair, and hid his face in his hands for shame at his own weakness, and burst out crying.

The touch of soft persuasive fingers suddenly thrilled through him.

His hands were gently drawn away from his face; a familiar voice, sweet and low, said, "Oh, don't cry!" Dimly through his tears he saw the well-remembered little figure standing between him and the fire. In his unendurable loneliness, he had longed for his dog, he had longed for his fawn. There was the martyred creature from the streets whom he had rescued from nameless horror, waiting to be his companion, servant, friend! There was the child-victim of cold and hunger and fear, still only beginning to feel her way to womanhood; innocent of all other aspirations, so long as she might fill the place which had once been occupied by the dog and the fawn!

Amelius looked at her with a momentary doubt whether he was waking or sleeping. "Good God!" he cried, "am I dreaming again?"

"No," she said, simply. "You are awake this time. Let me dry your eyes; I know where you put your handkerchief." She perched on his knee, and wiped away the tears, and smoothed his hair over his forehead. "I was frightened to show myself till I heard you crying," she confessed. "Then I thought, 'Come! he can't be angry with me now'—and I crept out from behind the curtains there. The old man let me in. I can't live without seeing you; I've tried, till I could try no longer. I owned it to the old man, when he opened the door. I said, 'I only want to look at him; won't you let me in?' And he said: 'God bless me, here's Eve come already!' I don't know what he meant. He let me in; that's all I care about. He's a funny old foreigner. Send him away, and let me be your servant. Why were you crying? I've cried often enough about you. No; that can't be—I can't expect you to cry about me; I can only expect you to scold me. I know I'm a bad girl."

She cast one doubtful look at him, and hung her head—waiting to be scolded. Amelius lost all control over himself. He took her in his arms and kissed her again and again. "You are a dear, good, grateful little creature!" he burst out—and suddenly stopped, aware too late of the act of imprudence which he had committed. He put her away from him; he tried to ask severe questions, and to administer merited reproof. Even if he had succeeded, Sally was too happy to listen to him. "It's all right now!" she cried. "I'm never, never, never to go back to the Home! Oh, I'm so happy! Let's light the lamp again!"

She found the matches on the chimney-piece. In a minute more the room was bright. Amelius sat looking at her, perfectly incapable of deciding what he ought to say or do next. To complete the bewilderment, the voice of the attentive old Frenchman made itself heard through the door in discreetly confidential tones.

"I have prepared an appetizing little supper, sir," said Toff. "Be pleased to ring when you and the young lady are ready."

(To be continued.)

THE MISSISSIPPI VALLEY LABOR CONVENTION.

THE Mississippi Valley Labor Convention held at Vicksburg, May 5th and 6th, numbered in all some four hundred persons, representing nearly every county and parish between Helena, Arkansas, and New Orleans. General W. R. Miles, of Mississippi, was made temporary chairman, and in a brief address stated the object of the Convention to be to secure a better understanding between capitalists, landowners, and laborers of the South. It was the old question which has disturbed the world ever since industry had been organized—capital and labor. He was followed by Ex-Governor Henry S. Foote, who was present at the earnest request of the Cotton Exchange of New Orleans to lend what power and influence he possessed towards harmonizing the conflicting interests of the great Mississippi Valley. He urged all, both white and colored, to shut their eyes to the past, and hand in hand work together for the future prosperity of their native land. Subsequently the Convention was permanently organized as follows: President—General W. R. Miles, of Holmes County, Miss.; Vice-Presidents—T. F. Cassel, Memphis, Tenn.; James Hill Jackson, Miss.; H. B. Robinson, Helena, Ark.; David Young, Concordia, La. All the vice-presidents were colored. Secretary—A. W. Crandall, Madison Parish, La.

The first day of the Convention was mainly occupied in discussions and the appointment of committees. On the 6th, the Committee on Resolutions presented a report which, after some debate, was adopted with practical unanimity. This report recognizes as among the chief causes of the recent migration of the blacks, a fear of persecution, the high rent of land, the unfair contract system maintained by employers, and the vicious system of credit fostered by laws permitting laborers and tenants to mortgage crops before they are grown or even planted. The resolutions further pledged the members of the Convention to maintain, to the extent of their ability, the absolute legal equality of the blacks; to protect them "against fraud, intimidation or bulldozing on the part of the whites"; and to seek the repeal of all laws authorizing liens on crops or advances of articles other than those of prime necessity. On the adoption of the resolutions only the whites voted, but the blacks appear to have been satisfied with the general results of the conference. The spirit of the Convention is fairly exhibited in the following closing resolution:

"*Resolved*, That it is the constitutional right of the colored people to emigrate where they please, and to whatever State they may select for their residence; but this Convention urges them to proceed on their movements towards emigration as reasonable human beings, providing in advance, by economy and effective labor, the means for transportation and settlement, and sustaining their reputation for honesty and fair dealing by preserving intact, until completion, the contracts for labor and leasing which they have made. If, when they have done this, they still desire to leave, all obstacles to their departure be removed; all practicable assistance will be afforded to them, and their places will be supplied with other and contented labor."

How far the action of the planters who directed the Convention will be sustained by the great body of employers in the States affected by the exodus is yet to be seen. The Vicksburg *Herald*, commenting on the results arrived at, says: "The action taken is a long step in the right direction, but it is only a step. A drawing of a house is a necessary prerequisite to its building, but there will be no house if nothing is done beyond making a drawing of it. The drawing must be utilized by the actual construction of the building. We are firmly convinced that the Convention completed a good draught for future action, but that is all. It yet remains for both races to see that the resolutions adopted by the Convention are carried out. On each race rests a responsibility, implied if not direct, in this matter; that of the white race is the greater. That race was appealed to as the stronger, the wiser and the wealthier for protection and assistance. We firmly believe the appeal was not made in vain. We firmly believe the white race of the South, as a whole, will prove a good friend to the colored race, and will aid it to reach a stage of civilization and enlightenment commensurate with its capacities. The boldness, the chivalry, the philanthropy of Southern white people are a guarantee of this fact. If any people on the face of the earth can get along well with the negroes of the South, the white people here will do it. But the negroes must know their rights carry with them duties. They are free. They are the political equals of all American citizens. But even these great boons will not give them prosperity and advancement, if they do not perform the duties allied to citizenship."

THE MUSIC TRADES.

MANUFACTURE OF ORGANS AND PIANOS AT CAMBRIDGEPORT, MASS.

FEW of our readers, perhaps, are aware of the extent to which the manufacture of musical instruments is carried in this country, and what an important branch of industry it is, not only in regard to the unusual numbers required for home use, but for export or shipment abroad. It is not possible, of course, to fix the exact number of instruments manufactured yearly in the United States; but the best authorities estimate the number of pianos at about 17,000, of which some 1,500 are probably exported, and the number of parlor organs at 40,000, of which number full 5,000 are expected.

The demand from abroad for American-made instruments, and the reputation they have acquired among foreign musicians and purchasers, is not the least gratifying of the many indications that are now so apparent of our being fully able to cope with, if not to surpass, our European friends in most branches of the mechanical arts. That this demand is primarily the result of the intrinsic merits of the goods there can be no doubt, as they are sold at prices fully equal to those obtained for the best European-made instruments. It has been but a few years since the first American organs and pianos were sold in Europe, but now most of the leading instruments can be purchased in the principal European cities, and are in great request among the better classes of buyers.

The amount of capital invested in the different branches of the business must necessarily be very large, owing to the extensive quantities of high-priced material that have to be carried, as well as to the character of labor employed, which is of the highest order of skill and intelligence, the prices paid in most branches of the business being higher than in any other branch of manufacture.

We have devoted a page to the illustration of the more prominent and interesting features of the business, which will be entertaining and instructive to most of our readers. We have selected for this purpose the extensive establishment of Geo. Woods & Co., of Cambridgeport (near Boston), Mass., not only on account of the high character of the work produced there, but for the reason of its great variety, this house not only being manufacturers of reed and pipe organs, but also of pianos.

Their establishment consists of four large buildings, arranged in the form of a hollow square (three only of the buildings being visible in our engraving), most pleasantly located on the main street, but two miles from the business centre of Boston, and is replete with ingenious mechanical appliances and labor-saving machinery. In the construction of musical instruments, the greatest care is necessary in the proper seasoning of the material, and our first illustration shows the "Dry Room," in which is used the "condensing process," which is the invention of the senior member of the house, and which is of the greatest importance, in not only insuring rapid drying, but at the same time preventing the material from warping and checking. This invention, which is patented, is being rapidly introduced into other branches of business.

Other illustrations show the "Mill or Machine Room," in which the intelligence of our American machinery is shown to excellent advantage. The "Case Room" or "cabinet-shop," where the elaborate case or cabinet work is produced; the separate Organ and Piano Rooms, where the actions are made and finished; the Piano and Organ-regulating Rooms, where the finished instruments are carefully examined and regulated. The "Machinist Shop," where all the iron and metal work is made, and the "Tuning Room," where are shown the different processes of tuning reeds, pipes and pianos; these processes, the essential principles of which are different in the three instruments, are exceedingly interesting. We will here mention the instrument made a specialty of by Messrs. Woods & Co., of a reed and pipe organ combined, the pipes being by a very ingenious and simple tuning arrangement most readily kept in tune with the reeds. This combination is one that has been long sought after by organ-makers, and the instruments are having a very extensive sale.

The pianos here made are all of the upright pattern (which are now fast supplanting the squares in this country, as they have long since in all others), and are all constructed upon a new method, also the invention of Mr. Woods, which secures a greater degree of strength and solidity, combined with a more musical quality of tone, than has hitherto been attained.

The warerooms of George Woods & Co. are at 608 Washington Street, Boston; 72 Adams Street, Chicago; 54 East Tenth Street, New York; and they are represented in England by the well-known house of Boosey & Co., London.

"MEMORIAL DAY" AT WILMINGTON, NORTH CAROLINA.

THE Ladies' Memorial Association of Wilmington, N. C., was permanently organized on the 20th of July, 1866. The first decoration of the graves of the Confederate dead buried in Oakdale Cemetery was on the day following. These graves were so scattered over the cemetery that the association decided to remove all that were not claimed by their friends to a beautiful lot on the crest of a gently sloping hill which faces the main entrance of the cemetery. This lot was inclosed with an iron railing, having a hedge of evergreen along the boundary line. In the centre stands a monument having a base of granite, on two faces of which are medallion likenesses, in bronze, of Lee and Jackson, the only inscription being, "To the Confederate Dead." The base is surmounted with a statue of heroic size, in bronze, of a Confederate soldier on guard—which has been pronounced a very superior work of art.

The 10th day of May, the anniversary of the death of Stonewall Jackson, was adopted by this association as Memorial Day, and has been so observed since 1867. Every return of the day is observed by a procession to the cemetery, where prayer is offered, appropriate odes and dirges sung, and an oration delivered—all closing with the distribution about the mound, which is beneath the monument, floral tributes to the "unknown dead" and all Confederates who lie without the inclosure. The graves of all within the cemetery are then decorated by loving hands.

We give in this issue a sketch of the scene as it appeared on Memorial Day of this year at the time of delivering the oration—Captain John N. Maffitt being the orator, and delivering an address which gave account of the heroic deeds of those who fell in the "lost cause," and showing that a return to the harmony which existed before the war was desired by the people of the South.

SCIENTIFIC INTELLIGENCE.

An Exploring Expedition to New Guinea is being organized at Wellington, New Zealand, on a large scale.

News has been received from Queensland that the remains of the two Prezis, well-known explorers, have at length been discovered, so that the question of their fate is now finally set at rest.

A Number of Prehistoric Bronzes, found in ancient Siberian graves, and collected by Sosbohm and Wiggins during their explorations of Arctic Siberia, are thought to be from 4,000 to 5,000 years old.

The Second Session of the Congress of Commercial Geography, inaugurated at Paris last year, will be held at Brussels in September, under the Presidency of M. Banps, and arrangements for the meeting have already been commenced.

A New African Expedition is being organized at Lisbon, under the direction of Captain Paiva d'Andrada. Its object is the exploration of the Zambesi and the foundation of commercial and agricultural colonies in the territories of Feis and Zoumbo.

The Danish Government has appointed Lieutenant Jensen to explore all the fjords in Greenland from Holsteinborg to the coast facing Disco. The explorations will bear on the moving ice-fields which send so many icebergs into the Polar Ocean.

Only One-tenth of the human body is solid matter. A dead body weighing 120 pounds was dried in an oven until all moisture was expelled, and its weight was reduced to twelve pounds. Egyptian mummies' bodies are thoroughly dried. They usually weigh about seven pounds.

At a Late Meeting of the Paris Academy, M. de Lesseps announced that in a letter of April 15th, Captain Roudaire states that the sounding operations were being pursued with vigor and success, and that so far they justified the expectation of being able to create an interior Algerian Sea.

Lord Dufferin, who had accepted the presidency of the Birmingham and Midland Institute, having been compelled to relinquish that office on his appointment to the Embassy at St. Petersburg, Professor Max Müller was communicated with by the Council, and has signified his acceptance of the post.

Phenic Acid, which is used to some extent as an antiseptic dressing by surgeons, does not appear to be quite safe. Koester has traced twenty-six cases of more or less severe poisoning to its employment, and recommends instead of this acid a careful application of thymol, salicylic acid, or dilute solution of zinc chloride.

There are Thirty-seven Mines in the Lake Superior copper regions, producing 20,000 tons of copper in excess of the productions of former years. The Hecla Mining Company employs 2,000 men, producing last year 12,500 tons of refined copper, worth $4,000,000. This company has divided nearly $15,000,000 in dividends since it was formed.

The Telegraph in Tunis.—The French telegraphic system crosses Tunis and extends to Tripoli. The Arabs having remarked that the camels travel faster when following the line of the telegraph, respect religiously the wires and posts. It is thought that Æolian music produced by the wires is agreeable to the ears of the camels and excites them to more active exertion.

The Collection of Funds instituted by the Dutch Central Committee for Arctic Exploration for the renewed outfitting of the *Willem Barents*, which vessel is shortly to start on another expedition of some eighteen months' duration, is progressing so favorably that it may be reasonably expected that the 60,000 florins which are required for the expedition will soon be completely subscribed.

Decrefet's Electric Lamp.—The peculiarity of this lamp consists in the employment of a tube filled with mercury in which are placed several carbon pencils. The difference of density is the only propelling force. As fast as the point of the pencil is consumed it rises of itself in a manner analogous to that effected in the Werdermann lamp. A battery of six to ten Bunsen cups gives a very brilliant light.

A Patent has just been issued to Miss Harriet G. Hosmer by the United States Patent Office for her process of making artificial marble, regarding which so much has been said. The claims set forth that limestone, or other like substance, including alabaster stone, may be given the appearance and uniform hardness throughout of natural marble in its various colors by the application of moist heat or heat in the form of steam, in combination with a bath of alum and water, or with various baths composed of different chemicals and coloring materials.

The April Number of the *Church Missionary Intelligencer* states that letters have been received from the missionary reinforcements who are traveling up the Nile to join the Nyanza expedition. They only reached Lado, opposite Gondokoro, on October 16th; after three weeks' stay at the Egyptian station they reached Regiaf on November 7th. The cause of delay, we are told, has been that the Nile has been unusually high, and the immense quantity of water loosened great masses of reeds and papyrus which formed floating islands and blocked up the river, besides which, owing to a deficiency of fuel between Khartoum and Lado, they remained fast bound during the whole month of September some distance south of Sobat, and the missionaries saw no living beings (besides the men on board) but "pelicans, fishes, and a white headed eagle or two."

PERSONAL GOSSIP.

WILLIAM LLOYD GARRISON is lying in a very critical condition at the house of his son-in-law, in New York City.

MESSRS. LONGFELLOW, Emerson and Holmes are to write poems for the Moore Centenary celebration at Boston this month.

LORD AUGUSTUS LOFTUS, late British Ambassador at St. Petersburg, leaves England this month to take up the Governor-Generalship of New South Wales.

THE Nihilists in Russia have warned eight governors of provinces, twelve colonels of gendarmerie, and four generals, that they are to be the next victims of the Executive Committee.

AT the festivities of the recent Austrian silver wedding Prince Potocki, son of the Governor of Galicia, appeared in a Magyar dress, three of his diamond buttons being alone worth $200,000.

SENOR ZORILLA, the Spanish Premier under King Amadeus, has been permitted to return to France, from which country he was expelled in 1877 by M. de Fourton, and in 1876 by M. Dufaure.

BARON ERNST VON MAYR, Envoy Extraordinary and Minister Plenipotentiary of Austria-Hungary, was, on May 13th, presented to the President. The usual ceremonies were observed on the occasion.

THE Empress Augusta of Germany arrived at Windsor Castle May 14th, on a visit to the Queen. Lord and Lady Dufferin reached London the same night from St. Petersburg, and expect to remain for a month.

ON May 15th the Pope nominated the Rev. John Vertes to be Bishop of Marquette and Sault Ste. Marie, and the Very Rev. Lawrence S. McMahon, Vicar-General of Providence, to be Bishop of Hartford.

SANTA MONICA is this year to be the fashionable seaside resort of California. Senator Jones owns it. He bought 36,000 acres there in 1874 for $250,000, and has ever since been preparing it for Summer visitors.

THE Emperor of Austria has consented to arbitrate between Great Britain and Nicaragua respecting the differences arising out of the Treaty of Friendship, Commerce and Navigation between those countries in 1860.

IT IS now likely that Chief Moses will have a home of his own shortly. General Howard is about to establish a new military post between the white settlements and the district on the Upper Columbia River where the new Indian reservation is to be located.

THE Emperor of Germany is getting much better in health at Wiesbaden. His celebration of his golden wedding will be very quiet. Of all the European potentates, only the Czar, the Emperor's nephew, and Prince Frederick of the Netherlands, his brother-in-law, will be present.

THE Crown Prince of Austria takes with him on his Spanish tour the naturalist, Dr. Brehm, which seems to indicate that it is not intended to be a mere pleasure trip. The Crown Prince is already author of a spirited volume describing his sports along the Danube, in Hungary and Slavonia.

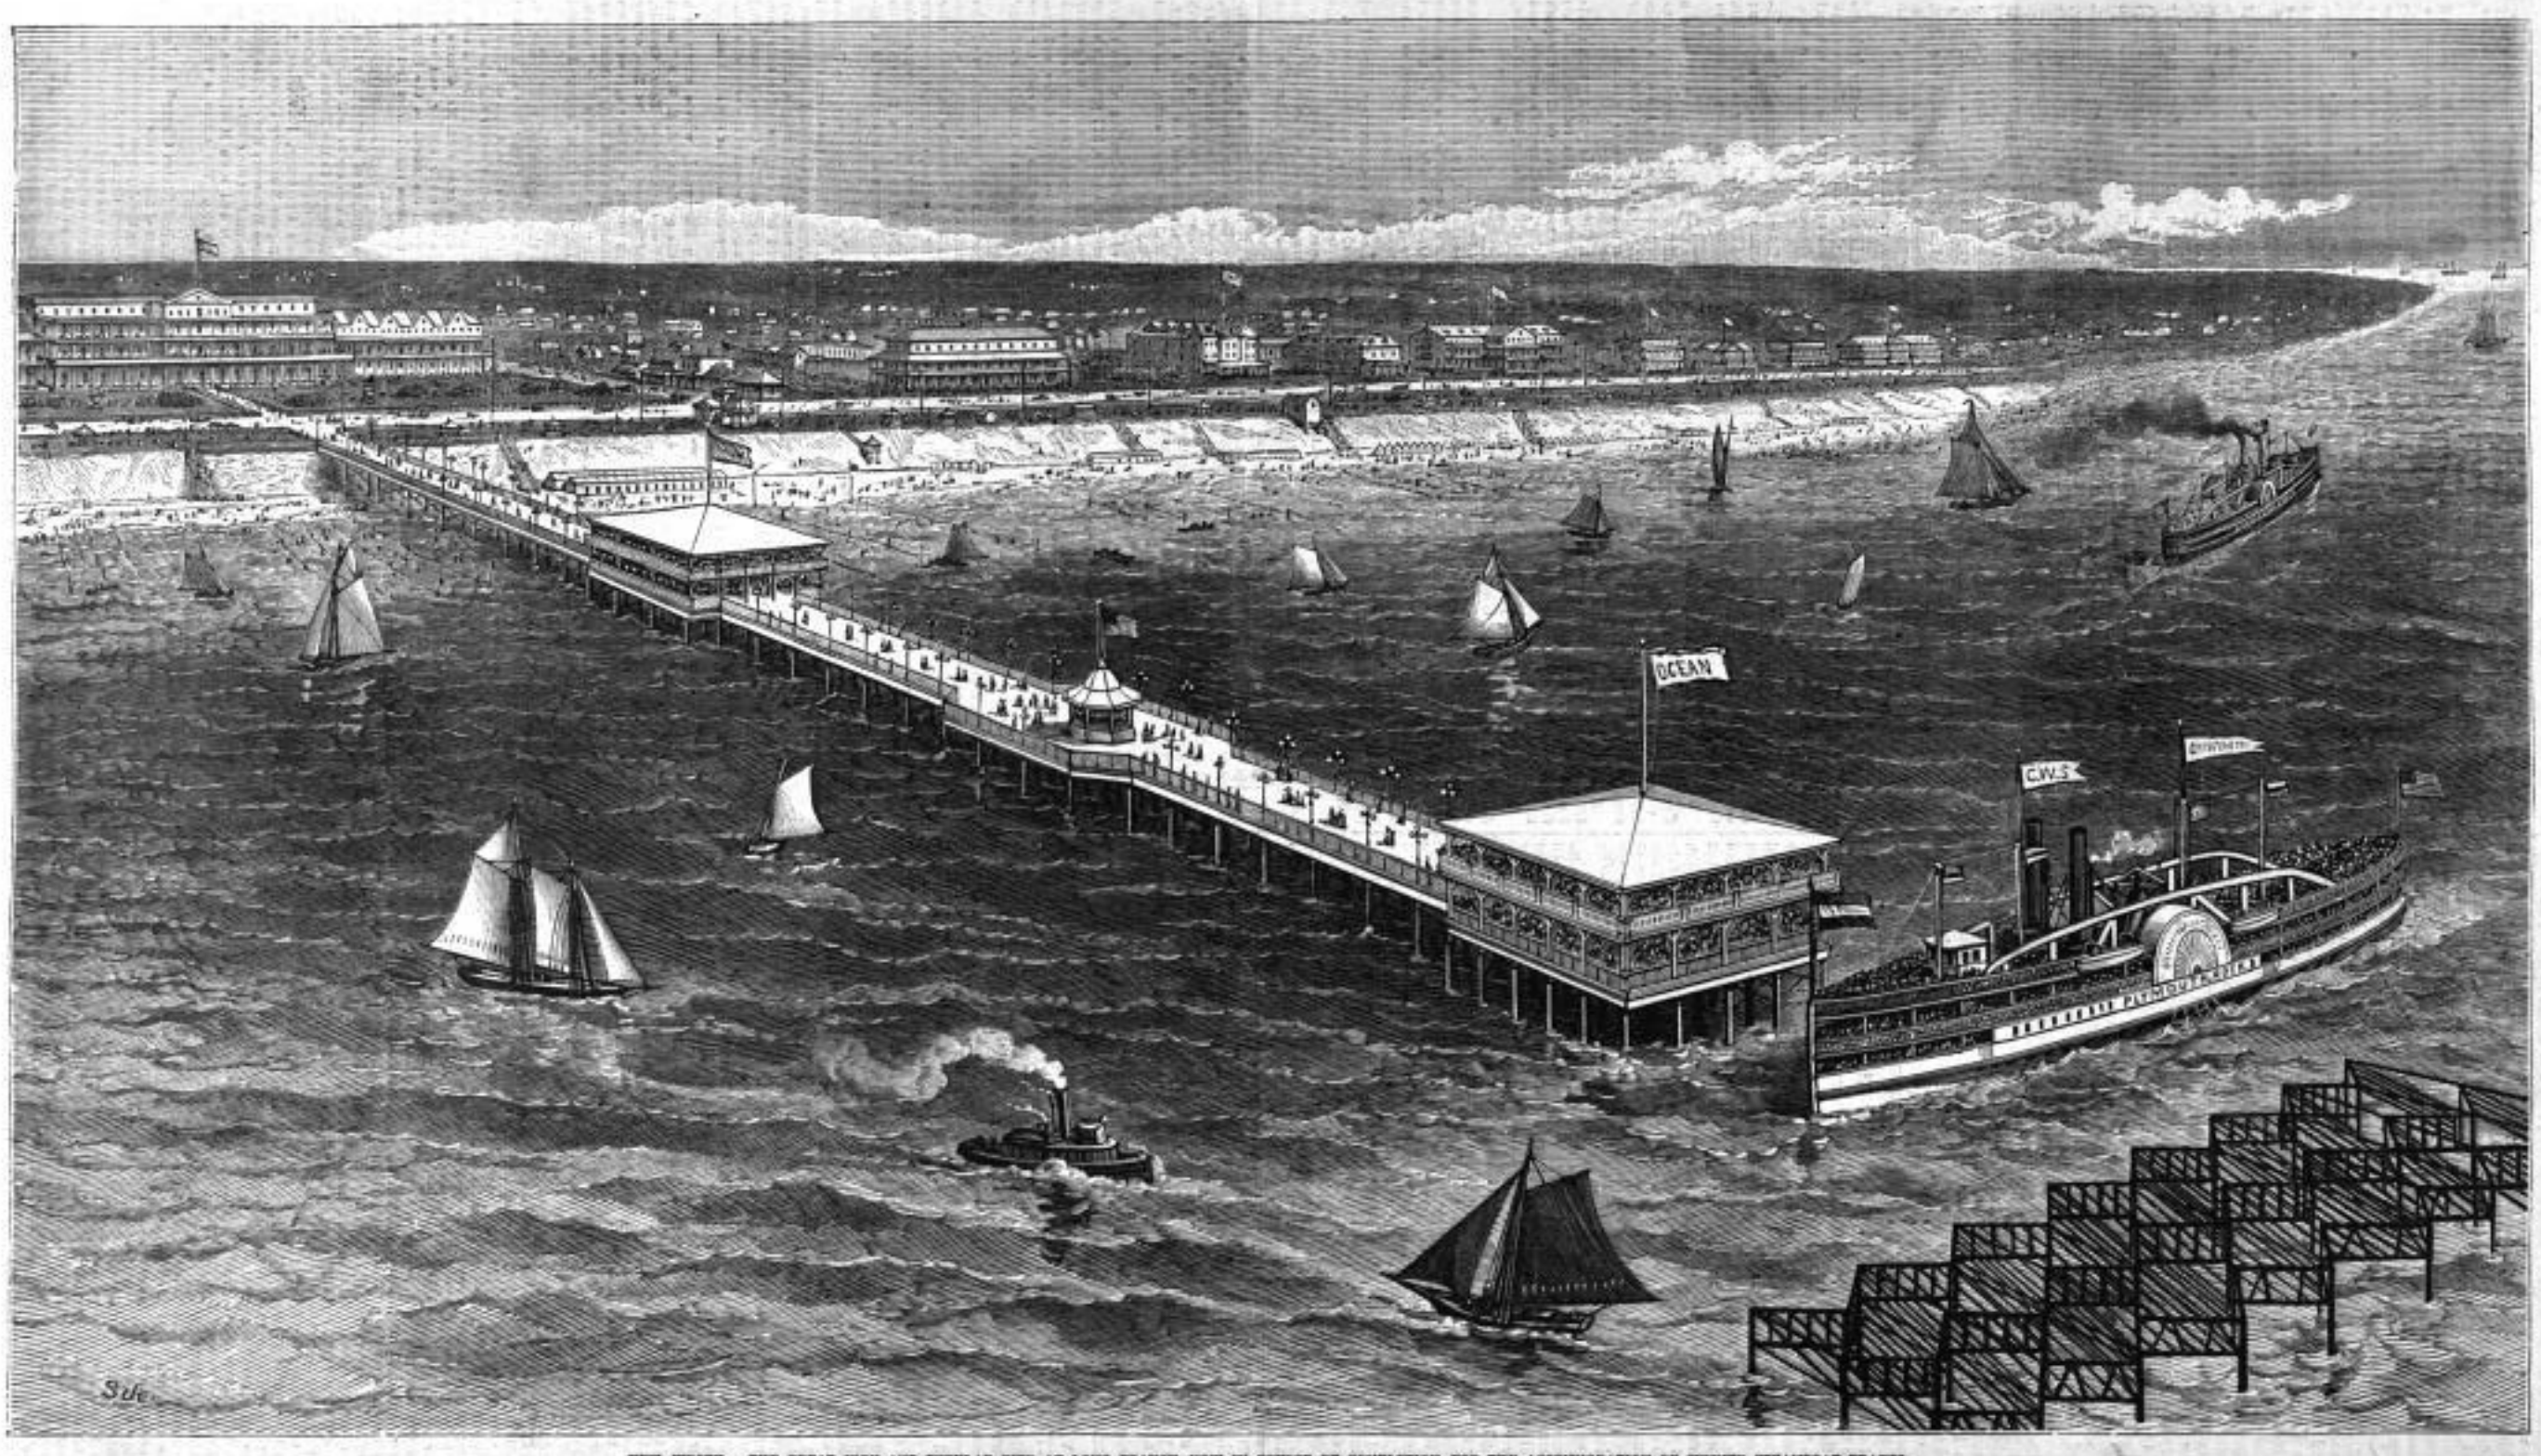
THE Princess Louise is occupying herself at present in designing and inlaying a mantel-piece of different sorts of wood. She goes out very little now; the Governor-General appears at church and elsewhere accompanied only by members of his suite, or by the Misses Montalto, who are visiting their friend the Princess.

JACOB STAEMPFLI, a well-known Swiss politician, and in 1861 President of the Swiss Confederation, and subsequently a member of the Geneva Court of Arbitration on the Alabama claims, is dead, in his sixtieth year. He was one of the chiefs of the Radical Party, and at one time editor of the *Berne Gazette*. He retired from public life in 1866.

AS an incident of the celebration of the silver wedding of the Emperor of Austria, 317 prisoners whose offenses were committed through indiscretion or poverty were pardoned, and ten university donations were made by the Emperor, amounting to 300,000 florins, and providing yearly forty purses of 300 florins each for poor students, and twenty free places in schools for officers' daughters.

AMONG the journalists who are members of the British House of Commons are Mr. Courtney, a leader-writer for the *Times*; Mr. O'Donnell, a leader-writer for the *Morning Post*; Dr. Cameron, editor and proprietor of the Glasgow *Mail*; Mr. Gray, editor and owner of the *Freeman's Journal*; and Mr. Justin McCarthy, who writes articles on a wide range of topics, and at hand-some prices.

QUEEN VICTORIA'S granddaughter, the Princess Charlotte of Prussia, daughter of the Crown Prince and Princess Royal of Prussia, was married in February, 1878, to Prince Bernard of Saxe-Meiningen, and on May 12th she was delivered of a daughter. The little princess is the first great-grandchild of Queen Victoria, and its coming into the world also makes the venerable Emperor William a great-grandfather for the first time.



THE Mrs. John Sherwood, whose name as a writer is known to the public as "M. E. W. S." is not the translator of any of the novels of Henry Greville, nor has she translated the novels of Daudet, Zola, or any of the modern French novels, with the single exception of one by Madame Charles Reybaud, lately published by the Appletons, called "The Goldsmith's Wife," which, under its French title, "Mlle Irza," appeared several years ago.

MR. WINANS, the American millionaire, is building in the Clyde a monster cigar-ship at a cost of close on £200,000. She is to be of 4,000 or 5,000 tons burden, and it is believed by her owner that she will be able to cross the Atlantic in five days. This will be the third vessel of the same type that Mr. Winans has built. The other two are much smaller and are well known to all who frequent the Solent in the Summer. It is understood that the three vessels, from first to last, will have cost over £400,000.

AMONG the large number of bequests by the late Gardner Colby, most of which are to local charities, are the following public bequests: To the Newton Theological Institution, $60,000; Colby University, Waterville, Me., $120,000; Brown University, Providence, R. I., $50,000; American Baptist Missionary Union, $30,000; American Baptist Home Missionary Society, $50,000; to a society to be incorporated for the relief of aged and indigent Baptist Ministers and male Missionaries, under certain conditions, $25,000. The estate is valued at $1,500,000.

MR. STEVENS, United States Chargé in Japan, informs the Department of State that extensive preparations are being made by the Japanese Government to receive and entertain General Grant. The Japanese Consul at Hong Kong will tender to the ex-President the hospitable invitation of the Government. Should he accept, the fine building used as the residence of the Duke of Edinburgh and of the Grand Duke Alexis will be set apart for the use of General Grant and his party. A commission of Daimios, including Mr. Yoshida, has been appointed to attend to the details of the visit.

NEW JERSEY.—THE GREAT IRON AND TUBULAR PIER AT LONG BRANCH, NOW IN COURSE OF COMPLETION, FOR THE ACCOMMODATION OF SUMMER STEAMBOAT TRAVEL.

OPENING OF THE EXCURSION SEASON.

THE NEW PIER AND BREAKWATER AT LONG BRANCH.

THIS wrought-iron tubular pier and breakwater, in front of Leland's popular Ocean Hotel, now completed as far as the 500-feet span, was designed and originated by Mr. Job Johnson, of Brooklyn, who has given great attention to the subject of piers and the study of iron. Soundings and profiles of the Atlantic coast demonstrated the superiority of the present location of the structure at Long Branch. The great difficulties in the way of building such a bridge, and the numerous obstacles encountered in the course of construction, have all been surmounted, and a fine promenade-deck, with a most enlarged view of the whole coast, now extends beyond the surf breaking on the shore.

Mr. Johnson's theory that tubular piles were best adapted for the foundations, and that their frictional surface opposed to the force of the sea was a minimum, has been successfully proved in the present pier. No one now entertains any doubts about the stability of the structure, as it has withstood numerous heavy seas and severe storms without even the slightest vibration of the deck or flooring. In October, 1878, the company was formed for building the pier, of which Mr. Johnson is a large stockholder, as well as contractor, the work to be finished by June 1st, 1879. As fast as material was delivered, Mr. Henry Case has been engaged in putting the work together, sinking piles, framing deck, etc.

Many people have visited this pier since its commencement, and few have failed being impressed with the boldness of design, and beauty of the parts. The National Tube Company have furnished the materials, which has been found most satisfactory and of excellent quality.

The practical working of this pier will soon be tested by the running of boats, and the expectations formed of the pecuniary success of the enterprise are very great. Its prospects of advantage are large to all parties concerned. In the adjacent district, for some miles, are over 300 farms of 50 acres each, now distant by land roads from 40 to 50 miles from New York markets, but which will be brought within 25 by sea and the pier. The water at the end of the pier will be from 20 to 25 feet deep. There are from 15 to 18 feet of water 250 feet from the shore.

The piles are driven by hydraulic power. The iron girders of the pier, composed of three wrought-iron tubes, securely clamped together at intervals, rest upon the masonry of the sea-wall, from which the construction extends 600 feet into the ocean, surmounting the breaking billows, and terminating 400 feet beyond. Owing to the sea-bottom being sand, resting on a bed of clay, the work of driving the wrought-iron tubular piling is not a difficult one. A hose runs through the tubular pile, its nozzle protruding from the teat. This hose is fastened to a hollow iron tube which leads out beyond the breakers. The water is sent through the hose by a steam force pump. It gushes into the sand through the teat, thus forming a little well, into

Digitized by Google

which the iron pile gradually sinks. After each tube is driven to the required depth, a bell-shaped collar from four to five feet in diameter descends along the column, resting upon the sand, with its excavated surface presented downwards, thus preventing the tendency of eddies created by water flowing around the piles to wash away the sand that holds them in position. It requires in all 138 of these tubular piles to sustain the deck of the pier, which will be at an elevation of 18 feet above low water and 14½ feet above high water.

1. THE PROCESS OF FORCING THE AIR THROUGH THE PILLAR INTO THE SAND. 2. THE PILLAR AS IT APPEARS WHEN FIXED IN POSITION.

At the pier-head the Lighthouse Board will construct a revolving light, surmounting a light, elegant structure, two stories high, with an observatory deck above, and 70 feet long by 50 feet broad, resting upon thirty of these tubular columns. After this structure a long railroad avenue will intervene for 140 feet, the pier-deck in some places being 50 feet broad and in others 28 feet. Then comes the music pavilion, two stories high, and 60 by 50 feet, the upper room of which will be used as a *café*, the lower floor being capable of accommodating 100 pieces of music. Further inshore will stand the fishing pavilion. This will be 140 feet long, with balconies overlooking the sea. From the fishing pavilion to the sea-wall will be 260 feet, beyond which will jut a dining-room pavilion, on either side of the entrance-gate of the pier, 700 feet long and 35 feet wide. Beneath this, occupying a space of 24,500 square feet, will be the 1,000 bathing-rooms.

The piles are arranged in three rows, and are braced both transversely and diagonally inward, so that any shock received by one of them is distributed along the central row from the pier-head to the shore, each column sustaining its share of the shock. The tubular columns are connected throughout with huge T bars of wrought-iron girders, and will vary in length from 20 to 48 feet, being 20 feet apart longitudinally and 12 transversely. The breakwater will stand parallel with the sea-wall, 885 feet from the shore, and will be 225 feet long and 28 feet broad. There will be a space of 200 feet between it and the pierhead, and will be made of thirty-nine iron piles, set in three zigzag rows of thirteen each, presenting six cutting surfaces to the billows. This will be interlaced with swinging cables, so as to form a sieve, through which the first breakers are expected to pass, losing thereby their force and power to damage boats anchored at the pier. The erection of the lighthouse, observatory, music and dancing pavilions are embraced in another contract, the $65,000 being the estimate for the pier without any embellishments.

It is confidently believed by the contractor that the pier will be in complete working order on the first day of June, and that the breakwater will be finished a month later. The managers of the hotels report that more rooms have already been let for the season than were let up to June 15th last year. This is especially true of the Ocean Hotel, managed by the well-known and popular Lelands. Hack-drivers' prices will be lower than last season, as at the recent election the "prohibitory" ticket, which intended the placing of high taxes on coaches, hacks, wagons, and liveried drivers from New York, was defeated.

A line of steamboats will be run on hourly trips between New York and the pier, at a low rate of fare. Besides the usual Long Branch steamers, there will be many new ones, which fact alone demonstrates the value and popularity of the enterprise. The elegant *Plymouth Rock*, fresh from Government inspection, thoroughly renovated and liberally supplied with improvements and new conveniences, will be on the passage within a few days, being the first of the mammoth floating palaces, and resume its popular excursions.

The President of the company which has constructed this great work is Hon. John Fitch, and the Treasurer Mr. William Ottman. In a recent address at a meeting of the Board of Directors, Mr. Fitch warmly complimented the energy of the Lelands, to whom much of the prosperity of Long Branch is due. "This pier was projected by the Lelands, and New York men and New York money were backing them. The effect was instantaneous. Real estate at the Branch was already rising, and it would soon be much higher. The company would strain every nerve to attract public patronage. They would establish a regular ferry between New York and Long Branch. They would run boats every half-hour during the day, and keep them running all night at hourly intervals. For sixty cents, or seventy, at the utmost, a person could buy a ticket at any station on the elevated railroad that would take him to the Branch and back. It now costs $2. There could be no more cool and delightful Summer excursion. It would include a sail of over fifty miles for about a cent a mile. Vessels would be built that would insure speed and safety, and unsafe boats would not be allowed to land passengers. But this was not all. Freight from New York would be brought through in two hours and at a quarter the rates now charged. All freight would be landed at night, and during the day the pier should be given up to the people free from the annoyance of freight or baggage. Ice would be brought to the pier direct from Maine, and the Southern steamers could land when coming up or going down the coast. The building of the breakwater would make a virtual harbor of Long Branch. Vessels could lie inside with perfect safety, and yachts could ride out any storm. It would be about the only harbor between New York and Cape May. The depth of water was so great that a European steamer might lie inside the breakwater. The Branch might become a regular resort for yachting squadrons. Fishermen could lie at the mole in peace, and the pier might open an outlet for the crop of the farmers. Regular lines of steamers might run from the Hudson River and Long Island Sound. The arrangements for landing would be so complete that no captain could have cause for complaint. It was the pioneer ocean pier on the Atlantic coast, and, if successful, similar harbors would spring up at different points."

AMUSEMENT NOTES.

AT Wallack's, the regular season closed on Saturday night with "The Snowball" and "Delicate Ground." The public has every reason to be pleased with the *menu* so carefully prepared for its palate *ab ovo usque ad mala*. At Wallack's they seem to possess the knack of doing the right thing and of doing it well. Miss Ada Cavendish opened on Monday night with *Rosalind*. Her conception of this charming but difficult rôle is most excellently "true F faith." We anticipate a series of histrionic triumphs for this gifted *artiste*.

"Pinafore," by the Philadelphia Children's Company, is the great material success.

"Lost Children" concluded the regular season at Union Square, and "Rice's Surprise Party" are now performing in "The Babes in the Wood."

Mr. Dion Boucicault is as fresh as when he first appeared in the rôle of *Myles-na-Coppaleen*. "Arrah-na-Pogue," at the Grand Opera House, is a veritable treat.

Haverly's Theatre gives "Pinafore" by the New-York Children's Company every afternoon, and by the Great English Opera Company every evening. This is "Pinafore" with a vengeance. Both performances are admirable.

"Fatinitza" at the Fifth Avenue is a success. The libretto sparkles, the music sparkles, the ensemble sparkles.

The Standard still flaunts the saucy flag of "H.M.S. Pinafore," with the introductory "Box and Cox."

The Philadelphia Church Choir have returned to the Broadway, and to the main deck of the good ship "Pinafore."

The welcome tidings come to us from the Golden State that Madame Marie Rose Mapleson has taken San Francisco by storm. The sweet song-bird is not only a supreme success, but a *furore*. The crush to hear her savors of the celebrated Lind nights. If her glorious voice and superb dramatic powers have gained the enthusiastic approbation of the critics, her beauty and winsome grace have struck deeper chords, and already is Marie Rose a household word on the Pacific Slope.

FUN.

A WIDOW'S little child received a reward of merit at school, and ran eagerly to her mother, saying: "I held it up to the sky all the way home, that papa might see what a good girl I had been."

LIKE A BIRD.—*Charlie:* "Where did the parrot come from, mamma?" *Mamma:* "From Africa, my dear." *Charlie:* "Then, when it knows how to talk, will it tell us all about the Zulus?"

"DOIN' IT 'ANDSOME."—*Flower Feader:* "Buy a bunch of violets for a penny?" *Crusty Old Gent:* "No, no; get away; I want no violets." *Flower Feader:* "Then p'raps yer'd 'low me to present yer wi' one for yur 'andsome civility?"

A GENTLEMAN travelling on a Hudson River steamer one day at dinner was making away with a large pudding close by, when he was told by a servant that it was dessert. "It matters not to me," said he: "I would eat it if it were a wilderness."

A CORRESPONDENT at Portland, Oregon, furnishes this of the "Heathen Chinee." "John" had bought a watch at our jeweler's, but as it ran too slow, he took it back saying: "Watchee no good." "What is the matter with it?" asked the jeweler. "Oh," said John, "watchee too much by-'m-by."

PHYSICIAN (who has just examined an Irishman's lungs).—"There seems to be some trouble here—pneumonia, or something of that sort; have you ever expectorated blood?" *Irishman:* "Och, yes, sir!" *Physician:* "How long ago?" *Irishman:* "About eight years." *Physician:* "Did you feel sick?" *Irishman:* "Och, I did that!" *Physician:* "What was the matter?" *Irishman:* "I had a tooth pulled."

SCARCELY any better retort is on record than one made to Professor Bonamy Price of Oxford University on his late visit to this country. He was not remarkable for his geniality, and at a dinner-party, at which popular ideas of heaven happened to be under discussion, he turned to Dr. H. W. Bellows and said: "We would like to have your opinion of heaven, Dr. Bellows, as that of one who stands outside the pale of civilized religions." Dr. Bellows replied: "My idea of heaven is that of a great dinner-party where we can have everything we want without money and without Price." All but one joined in the laugh.

"PRACTICAL SCIENCE."

UNDER the above heading, the *St. Croix Courier*, of St. Stephen, N. B., in referring to the analysis of Dr. Pierce's Golden Medical Discovery and Sage's Catarrh Remedy, recently made by Prof. Chandler, of New York, and others, says: "Nothing was discovered which we think objectionable, and the published analysis should increase, rather than retard, their sale. To us, it seems a little unjust to call a man a quack, simply because he seeks to reap as much pecuniary reward as other classes of inventors." The English Press is conservative, yet, after a careful examination of all the evidence, it not only endorses but recommends the Family Medicines manufactured by Dr. Pierce. No remedies ever offered the afflicted give such perfect satisfaction as Dr. Pierce's Golden Medical Discovery and Dr. Sage's Catarrh Remedy.

THURBER'S RELIABLE CANNED GOODS.

GREAT progress has been made within a few years in the art of Preserving Fruits, Vegetables, Fish and Meats in tins, and in consequence the consumption has largely increased. As yet, however, canned goods are not generally thought to be "fresh," and some brands are not, perhaps, entitled to be so considered. Those packed by us, however, are Hermetically Sealed at the sources of supply, when they are in the best possible condition, by a process which preserves the much-to-be-desired fresh, natural flavors; and they are really in better condition, fresher, more palatable and wholesome, than many so-called "fresh" articles which are exposed for sale during considerable periods of time in city markets. All goods bearing our name are guaranteed to be of superior quality, and dealers are authorized to refund the purchase price in any case where consumers have cause for dissatisfaction. It is, therefore, to the interest of both dealers and consumers to use THURBER'S BRANDS.

H. K. & F. B. THURBER & CO.,

Manufacturers of and Dealers in Food Products, New York.

PHOTOGRAPHIC ARTIST.

MR. STOCKTON STOKES, of No. 43 North Eighth Street, Philadelphia, is one of our best photographers. In no gallery is there to be found the likenesses of more distinguished persons than are found in his—many taken from life. His parlors are well worth a visit of inspection, and any one will be repaid by so doing. Photographs, portraits in oil, crayon drawings, and photographs in india ink, in fact, all the late improvements in his art are to be found in his gallery. Friends out or in the city who desire copies of photographs or copies of daguerreotypes can have them done in his gallery in the best manner.—*Com.*

THE OLD RELIABLE—NINTH DRAWING, COMMONWEALTH DISTRIBUTION CO., AT LOUISVILLE, KY., MAY 31ST.—One merit of these drawings is their regularity. Every sixty days WITHOUT FAIL. All prizes for the eighth drawing were duly paid. Outside of the capital and larger prizes already published we have obtained the consent to publish the names and addresses of the following parties, who, with hosts of others, have drawn smaller prizes, viz.: Carl Valeriens, 434 West Madison Street, Chicago, Ill.; James G. Meninger, Manor Hill, Pa.; Wm. J. Davies, 341 West 4th Street, Cincinnati, O.; James Christ, care Burnham & Co., Deadwood, D. T.; Wm. Kaile, Staunton, Clay County, Ind.; H. Mayer, Vicksburg, Miss.; G. H. Carder, Kalamazoo, Mich.; James H. Kinsey, Troy, New York. Next drawing May 31st.

HOP BITTERS gives good digestion, active liver, good circulation and buoyant spirits.

THE highest chemical authority has publicly and frequently testified to the purity and healthfulness of the "American" Extra Dry Champagne of A. Werner & Co., of 598 Broadway, New York. The pure juice of the California grape only is employed in this champagne, and repeated analyses have failed to detect any harmful or improper ingredient. It is a wine often recommended and always beneficial to invalids, while for the thirsty multitude who are looking for a safe and satisfying Summer drink, nothing can be found superior to a glass of Werner's "Extra Dry."

THOUGH New York has pushed its extremities far up in the island of Manhattan, still its heart beats in the old centre, where is the ST. NICHOLAS hotel, enshrined in the hearts of myriads as the source of an elegant and boundless hospitality. No efforts are neglected to make this hotel a synonym for all that is attractive in a house of public entertainment.

THERE IS BUT ONE American perfume that has stood the test of time, and that is MURRAY & LANMAN'S FLORIDA WATER, which, for over seventy years, has been in constant use, and which is to-day admitted to be the only fragrant water adapted to the various uses of the bath, the handkerchief and the toilet.

DROWSINESS, biliousness, pains and aches, and ague, Hop Bitters always cures.

H. W. JOHNS'S Asbestos Liquid Paints are in use by the United States Navy and Treasury Departments (lighthouse and life-saving stations) and on the United States Capitol at Washington.

Blair's Pills.—Great English Remedy for Gout and Rheumatism. All Druggists have them.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Frank Leslie's
POPULAR MONTHLY
The Cheapest, Largest and most Attractive of all the Monthly Magazines!

"FRANK LESLIE'S POPULAR MONTHLY presents very attractive contents. The illustrations are numerous, and number over one hundred, and are well executed. This publication is meeting with much favor from the reading public. The contributors are among the most talented in the country, and hence the high intellectual standard."—*Leader, Bloomington, Ill.*

"Undoubtedly FRANK LESLIE'S POPULAR MONTHLY gives more and more varied material for its cost than any other magazine in the world. One hundred and twenty-eight pages, half of which are handsomely illustrated, for twenty-five cents, would certainly seem to be the finishing point of economy in reading matter."—*N. Y. Eve.*

Important to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP is the only thing that mothers can rely upon for their children. It corrects acidity of the stomach, cures wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. During the process of teething its value is incalculable. It softens the gums, reduces inflammation and allays all pain, thereby giving rest to the child and comfort to the mother.

DISTRIBUTION OF THE POLITICAL LOAVES IN OHIO.

BAKER'S ATTENDANT—"Well, gentlemen; just in time. Here's a nice, fresh loaf, can be had for the asking."

MR. SHERMAN—"No, thank you—none of your small loaves for me. Hand down that big one on the top shelf—that's what I'm after."

MR. THURMAN (aside to me)—"Can it be possible that those fellows imagine they can ever reach that prize loaf? That belongs to me. I'm getting fairly empty waiting for it." (To the Baker)—"I say, old fellow, hand over that big loaf right away—I'm in a hurry."

JUDGE TAFT—"What impudence some people have! The idea that Sherman or Thurman is entitled to first place at this counter, and that I can be put off with just anything they choose to leave! I'm hungry for the best loaf in the shop, and I'm bound to have it. At any rate, neither of these other fellows shall have it, if I can't!"

SELF-RAISING

Bread Preparation

The Healthful and Nutritious

Baking Powder,

Invented by E. N. Horsford, late Professor in Harvard University.

Better, Healthier and Cheaper than Ordinary Baking Powder.

BARON LIEBIG, the greatest chemist in the world, said: "I consider this invention as one of the most useful gifts which science has made to mankind."

Dr. M. H. HENRY, the celebrated Physician of New York, said: "The use of Horsford's Bread Preparation, offers admirable means for the introduction of a valuable element into the system."

Dr. J. C. BOOTH, the distinguished chemist of Philadelphia, said: "We have no hesitation in recommending your Preparation as new and valuable."

Prof. RODNEY WELCH, Lecturer at Hahneman Medical College of Chicago, said: "The greatest improvement ever made in raising bread without the use of yeast, is the process of Prof. Horsford."

If your grocer has not got it send a three cent stamp to the manufacturers for a sample.

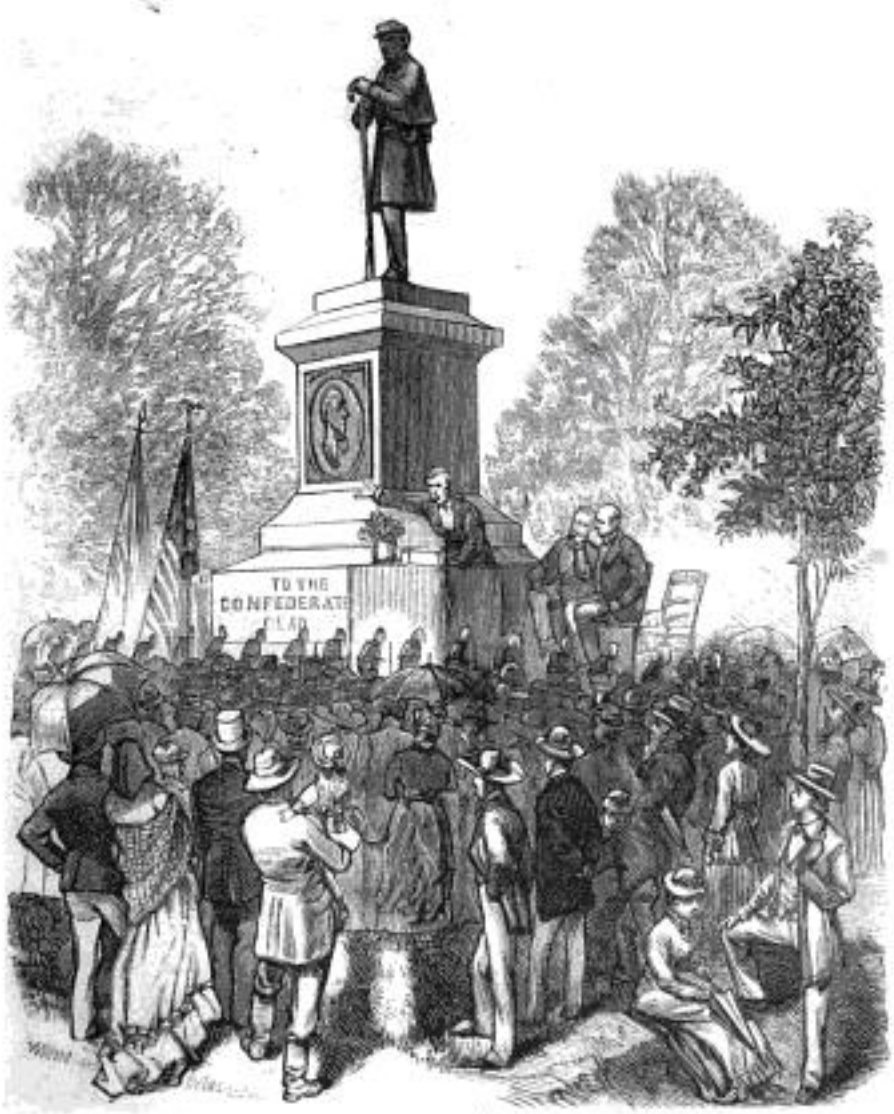
THE NEW ROCKY MOUNTAIN MINES.

THERE is but scant courtesy in Leadville. It would suit Mercutio, who liked "a word and a blow." There is no time for conventionalities. Grim earnestness dallies not, and no bows are made save to King Gold. Squatters fare roughly. If they squat where a prospector has "set up" a claim, the sooner "they git" the better, out they go. Eviction is carried on after the fashion of the Crowbar Brigade in Ireland, save that in this case the clinging tenant has to deal with several landlords. He is told to go, and in ten minutes from this freebooter's notice his house is absolutely down about his ears. Fastening ropes or chains to the principal supports, horses or mules or oxen are attached to the other end, and then comes the cracking of whips, a series of wild whoops, and crackle, crackle, crash! and down comes that which was once the squatter's home. Tenant-right has been wittily defined as a "lease for ever and no rent," but tenant-right in squatter form is not recognized in Leadville. Miles of territory east and south of Leadville are covered with the cabins of the adventurous miners, and if every Englishman's house is his castle, woe to the rash intruder who would venture to touch a stone of a genuine digger's fortress. The town is spreading itself on all sides, and buildings spring up as if by magic. Lots run all the way from $50 to $10,000 each, and real estate, to use a Western phrase, is "booming."

Take out the ringing of the church bells, and the small per centage that attend church, and there is no Sabbath in Leadville. The sawmills turn out just as much lumber, the blacksmiths' fires are just as hot, as much and more money is won and lost at gaming, as many goods are sold by markets on the Lord's day as on any week day. In passing through the town on the seventh day, if the street leading to the churches be not taken, no imagination could conjure up the Sabbath.

THE NEW ROCKY MOUNTAIN MINES.—THE SUNDAY AMUSEMENTS OF MINERS AT TENDER-FOOT TOWN, LEADVILLE, COLORADO.



There is the same whirr and buzz as on other days, and Sunday is the day selected by many of the miners for coming in from their claims to do their week's marketing. Occasionally one stumbles on a gang of miners who recognize the day by loafing, by card-playing and shooting at targets with the pistol. Such a sight is eminently picturesque. The great, brawny, hairy men, their open necks, their red sashes, their uncompromising boots and semi-Spanish hats, lounging, leaning, lying in every conceivable attitude, like a parcel of brigands in wait for a richly-laden mail-coach. Some crack shots are to be found amongst these men, and many handsful of the "dimmy" change hands over the scores on the target.

SALT LAKE CITY.

THE GREAT MORMON DEMONSTRATION.

SALT LAKE CITY was recently the scene of a demonstration which illustrates at once the unity and the fidelity of the Mormons in supporting their peculiar doctrines. The occasion had its origin in the following facts: In the trial of one Miles, in the United States Court, for polygamy, Daniel H. Wells, First Counselor to the Twelve Apostles of the Mormon Church, and a witness for the prosecution, refused to answer certain questions relative to polygamous marriages in the Endowment House, said to have been performed by him, and to the garments worn. For this refusal, he was held to be guilty of contempt, and on the 3rd instant was sentenced by Judge Emerson to pay a fine of $100, with two days' imprisonment. This action of the Court produced a profound excitement among the Mormon population, and it was resolved to honor the contumacious witness on his release with an ovation which would amount to an overwhelming rebuke to the Federal authorities. Accordingly, on the morning of the 6th, Wells was escorted by a procession from the jail to his residence.

The procession formed south of the city, and

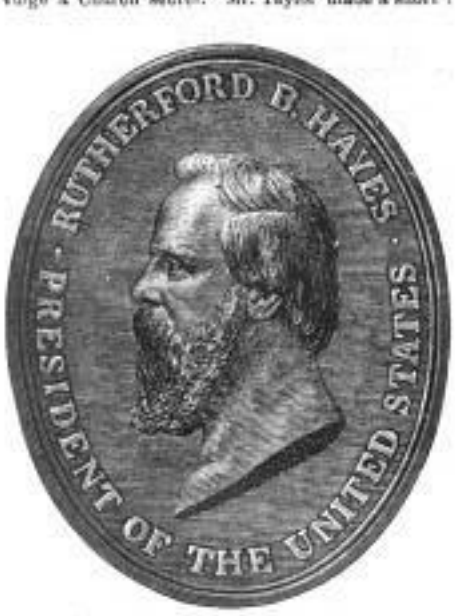
contained not less than ten thousand people in carriages and on foot, among them four hundred elderly matrons who marched through the dust, carrying American flags and banners bearing such mottoes as "Women in favor of polygamy," "We care less for the cut of our aprons than the loss of our rights." Some three thousand Sunday-school children also marched in the line. The sidewalks were literally blocked by people for three miles, and, as the procession proceeded, headed by Wells and John Taylor—the Mormon President—riding uncovered in an open barouche, peal upon peal of cheers saluted it at every step. When it passed the Federal Court building the shouts were especially deafening, as if in defiance of Judge Emerson and the officers of the court, who witnessed the demonstration from the balcony. The procession marched to the great Tabernacle, which was unable to hold more than half of the 25,000 people who, it is estimated, tried to gain admittance. Wells, from the stand, simply thanked the multitude for the demonstration of respect for one who stood faithful to his religious integrity in refusing to divulge a Church secret. Mr. Taylor made a short speech, full of expressions of loyalty to the Government and Constitution, but protesting against interference with his religious belief and practices. The multitude was orderly and undemonstrative, but expressions of individuals told that the fanatical masses felt their power.



Probably Salt Lake City has never witnessed a more remarkable display. A correspondent writes: "The demonstration was concerted, arranged and consummated within thirty hours, people coming from hundreds of miles north and as far south. Ten Mayors of cities were in the procession, as many bands of music, all the Church dignitaries, and Territory, county and town civil officials within the reach of railroads. There were one hundred and twenty-five banners bearing mottoes. The city was fairly ablaze with Stars and Stripes, and the Mormons directing the jubilee protest against what they call interference of law officers with religious liberty. Those who think Mormonism weakening are mistaken. In Brigham Young's palmiest days he could have done no more than has been done on this occasion.

HON. JOHN FITCH,

PRESIDENT OF THE LONG BRANCH OCEAN PIER COMPANY.

JUDGE JOHN FITCH, who is the President of the Long Branch Ocean Pier Company, was born in Schoolack, Rensselaer County, New York. He is of the Norwalk branch of the Fitch family of Connecticut, being fifth in line from Governor Thomas Fitch of that State. Judge Fitch graduated from Union College, and subsequently studied law with Judge Buell, of Troy, N. Y. For more than twenty years past he has resided in this city, and is still actively engaged in the practice of his profession. He has earned, during his professional life, the high esteem of his associates for his ability as well as other qualities. He is a member of the Bar Association, in which he takes great interest. He is also a member of the St. Nicholas Society, the New England Society, the New York Historical Society, the Society of the Cincinnati, the New York Yacht Club and the St. Nicholas Club.

Judge Fitch is a man of indomitable perseverance and iron will, and has a large personal acquaintance and a great number of friends. He undertook the management of the Long Branch Ocean Pier Company solely on account of his personal friendship for the Lelands. The stockholders of the company may be assured that if any one can make the enterprise a financial success, he is the man.

THE NEW INDIAN PEACE MEDAL—OBVERSE.

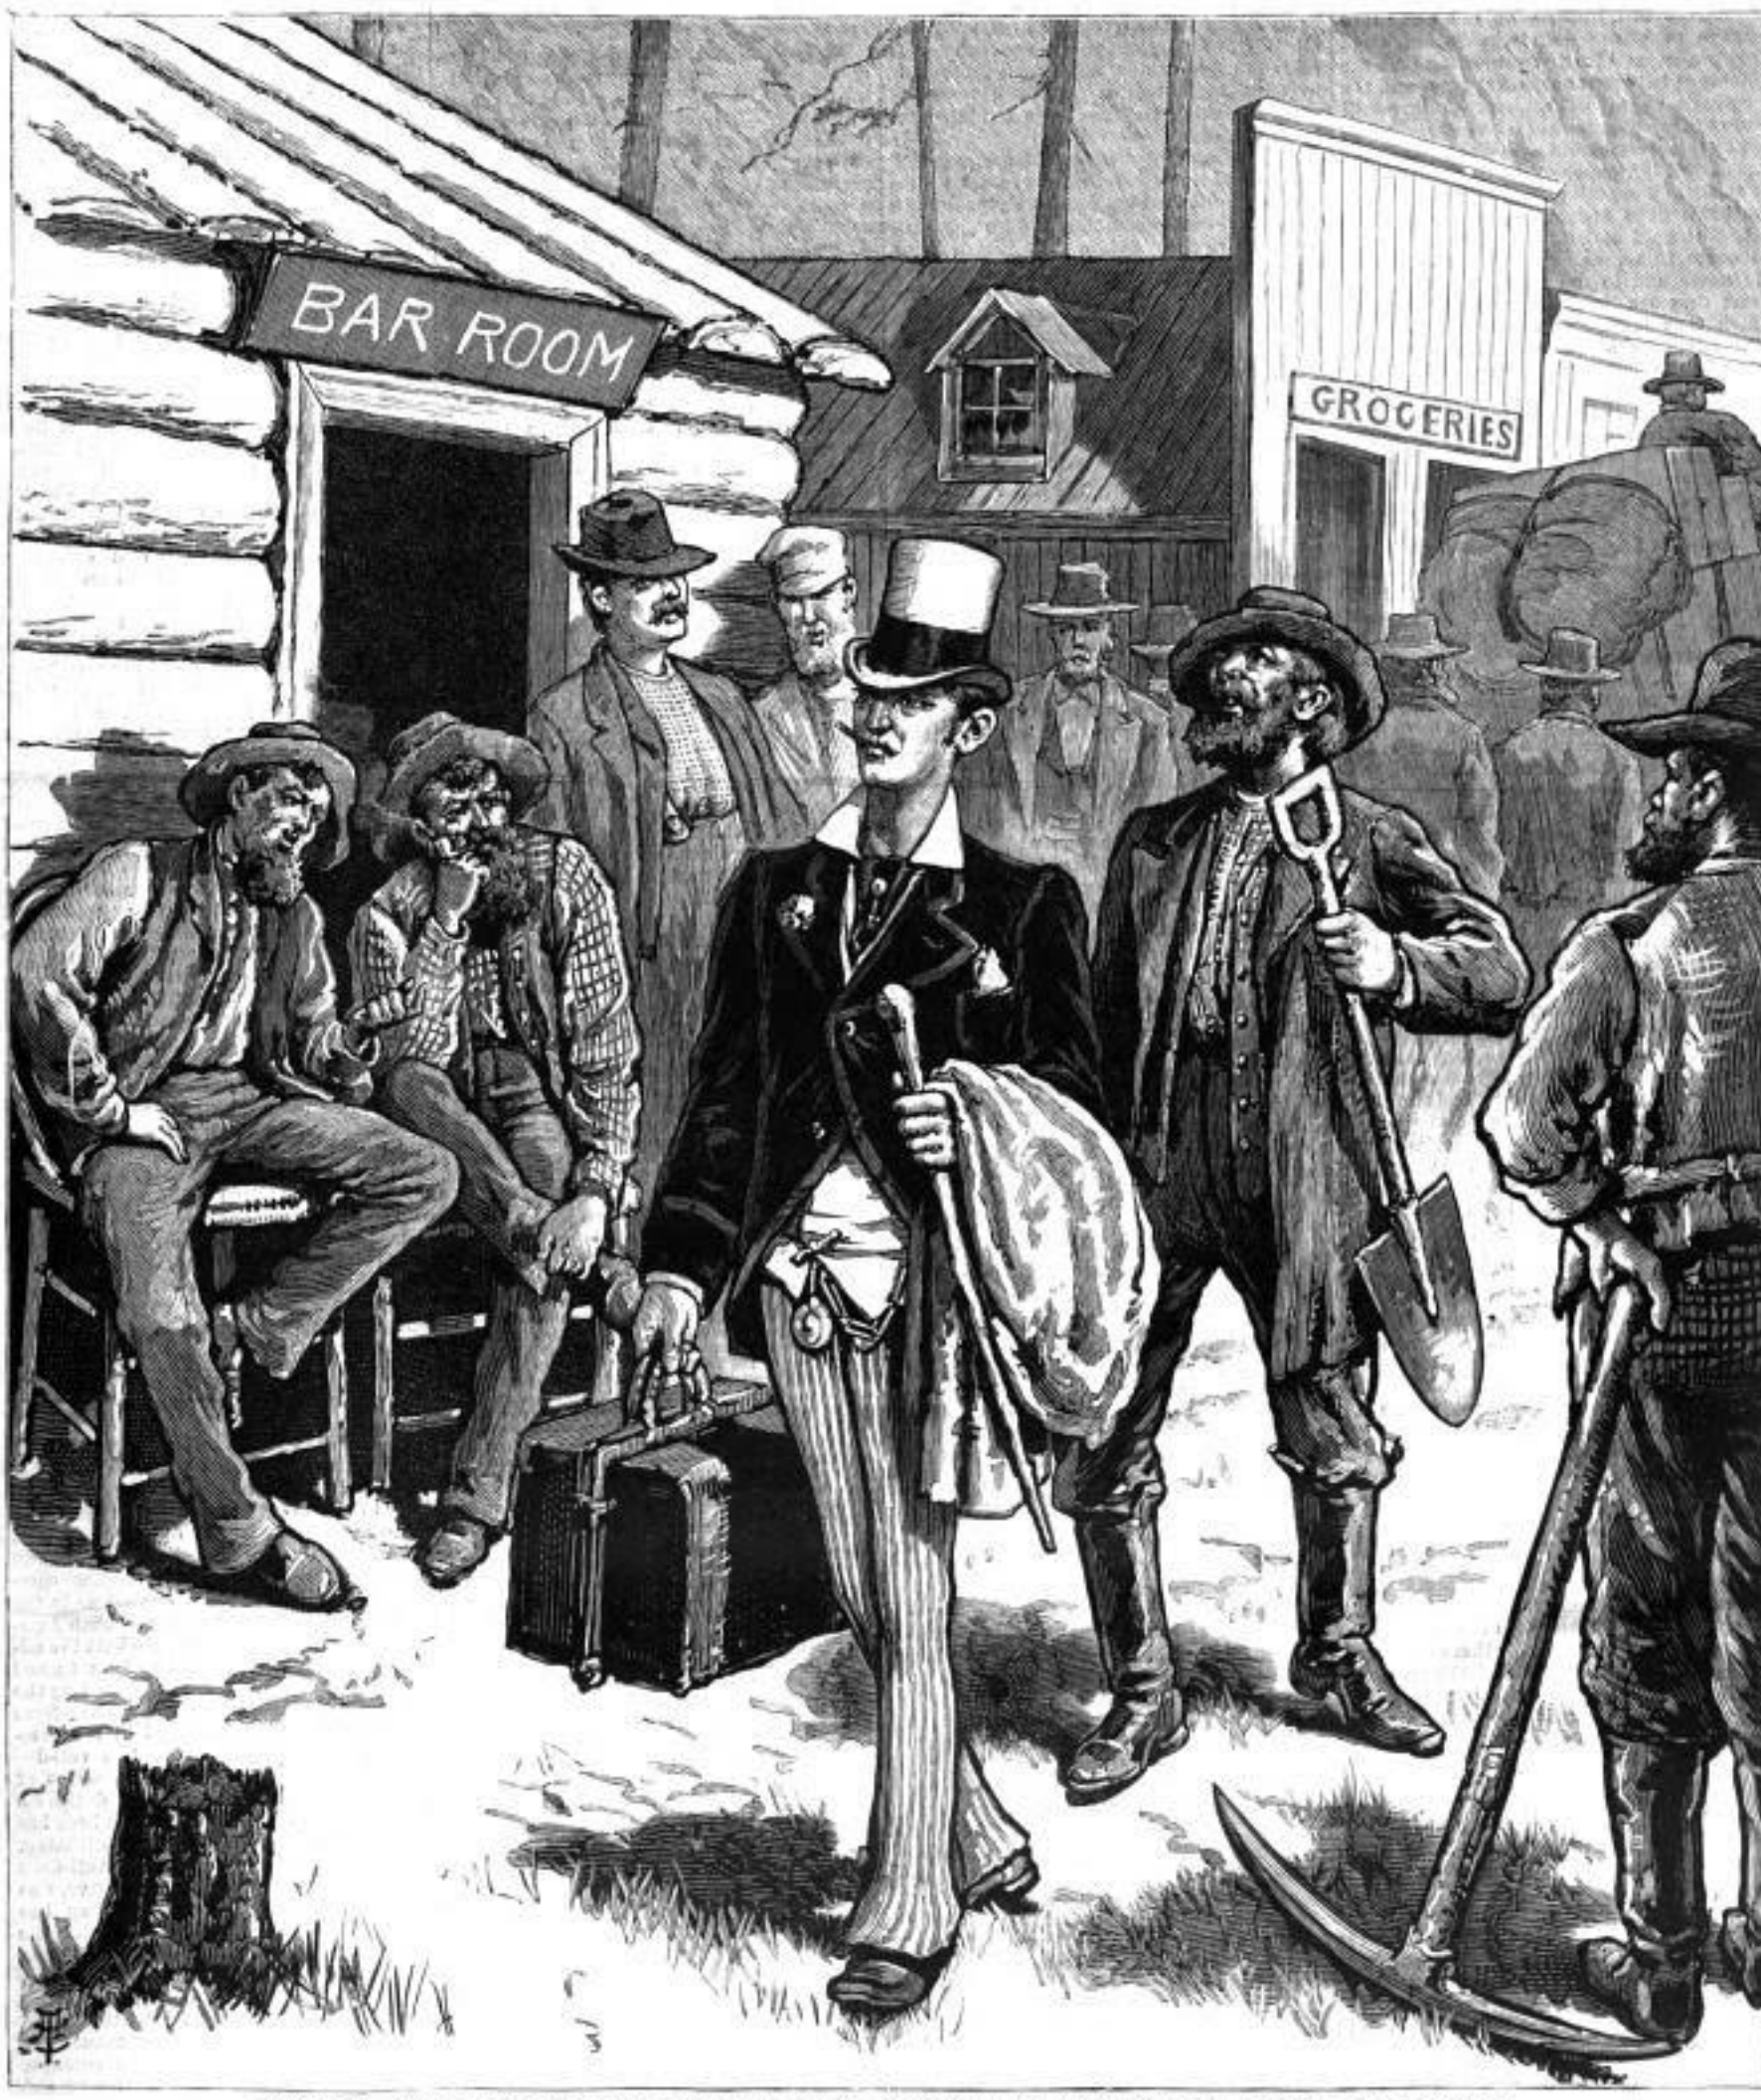
HON. JOHN FITCH, PRESIDENT OF THE LONG BRANCH OCEAN PIER COMPANY.

THE NEW INDIAN PEACE MEDAL—REVERSE.

THE INDIAN PEACE MEDALS.

IT has long been the custom of the United States Government to signalize the conclusion of amicable adjustments with representative Indians visiting Washington by presenting to them medals bearing appropriate inscriptions and the head of the President for the time being. This rule was somewhat varied during the earlier part of President Hayes's term, when, no new medals having yet been struck, a number of Indian chiefs were presented with the medals prepared during the administration of Gen. Grant, and which were highly valued by the recipients. Recently a new medal has been prepared at the Government Mint, a *fac-simile* of which we illustrate, and this medal will hereafter, during the present Administration, be used in the distribution of favors of this sort among the red men.

FOOD FOR THE WORLD.



THE total exports of bacon and hams from the United States for the month of April last were 57,321,524 pounds, valued at $3,762,366; fresh beef, 5,384,687 pounds, valued at $477,881; beef, salted or corned, 3,130,231 pounds, valued at $205,429; pork, 8,871,888 pounds, valued at $525,753; lard, 35,907,691 pounds, valued at $2,490,101; butter, 1,860,156 pounds, valued at $244,130; cheese, 4,479,587 pounds, valued at $370,747; tallow, 7,413,009 pounds, valued at $525,310. Total value, $8,021,716, against $10,696,747 for April, 1878.

THE NEW "SILVER AGITATION."

THE current debate in the House of Representatives on the so-called "Warner Silver Bill," proposing the unlimited coinage of silver dollars, weighing each 412½ grains, and further proposing that the difference between the market-price and the "coinage value" of a silver dollar shall inure to the advantage of silver dealers, and not to the Government, has disclosed either a profound ignorance or a willful disregard of the fundamental principles which lie at the basis of a bi-metallic currency composed of gold and silver. The men who advocate this measure profess to do so in the name and in the interest of bi-metallism; they are lavish in the denunciations which they launch at the heads of those who advocate a single gold standard of value, and argue with much vehemence of speech that to attach the quality of a "standard" and of "legal tender" to either gold or silver exclusively is to diminish the quantity of the circulating medium, and thereby work a contraction injurious to debtors, and also be obstructive of the public prosperity.

In point of fact, the men who clamor for the unlimited coinage of silver, on the terms we have indicated, are monometallists of the most determined type. All experience and all theory combine to prove that the contemporaneous circulation of gold and silver coins, as respectively the common units of value, must everywhere and always depend on so fixing the ratio between the said gold and silver coins that their coinage value shall be, for all practical purposes and as far as possible, the precise equivalent of their commercial value. This proposition is the fundamental basis—the *sine qua non*—of all bi-metallism. Every nation which has ever attempted to institute a bi-metallic currency has laid the foundation for its coinage in a legal ascertainment of the monetary equivalency between gold and silver, and this monetary equivalency has been made to depend on the assumed relative market value of each at the time when the proportion between them was fixed. It is of the very essence of bi-metallism that this proportion should be a fact and not a pigment. The truth of this statement is written in all history and in all political economy. Why was the mint ratio between gold and silver fixed by the Congress of the United States at 1.15 in the year 1792? Because this legal proportion was supposed to express the true state of the gold and silver market at that time. Why was this mint ratio fixed by France at 1.15½ in 1802? Because this ratio was then and there supposed to represent the actual facts of the gold and silver market. Why was this mint ratio changed by the United States from 1.15 to 1.16 in the year 1834? Because it was supposed that the commercial value of gold and silver had changed from 1.15 to 1.16 at that epoch. Every time that this mint ratio has been fixed, and every time that it has been changed, there has been a recognition of the primal, fundamental truth that bi-metallism lives and moves and has its being in the just and accurate ascertainment of the real commercial value of gold and silver in the markets of the world. Any attempt to fix this ratio otherwise than in accordance with the facts of the case at the time being is seen to be futile wherever men propose to establish a gold and silver coinage having equal currency, and having an equally honest quality of legal tender. Hence, when the commercial ratio between gold and silver undergoes a change, there must be a corresponding change in the mint ratio of gold and silver coins, if these coins are to be retained in circulation as equally and alike the measures of value according to the money units respectively represented by them. According to the money unit of the United States, a dollar in gold and a dollar in silver must be of equal value in fact before they can practically be made to circulate together, and before they can honestly be used alike in the payment of all debts.

And it is this consideration which cuts up by the roots the sophistical argument used by the "silver inflationists" when they exclaim that to alter the silver dollar so as to make it the equivalent of the gold dollar would be to favor the "bloated bondholders" and "coupon clippers" of the public debt. This debt, they say, is redeemable, according to the contract, "in coin of the standard value" fixed in 1834, and to provide that the ratio between gold and silver shall *now* be increased would work an increase in the public debt. This statement is not true. To readjust the silver coins of the United States so that they should be monetary units of value as truly and really as gold coins, would be simply to say that the debt of the United States should be the same when measured in silver as when measured in gold. The Acts creating the United States bonds were passed at a time when the words "standard coin of the United States" were understood to refer to gold, because the mint ratio fixed in 1834 had practically suspended the coinage of silver. And since our Government has twice fixed the mint ratio between gold and silver, with the view of conforming to the commercial value of each metal at the time, it follows that our country is committed to the doctrine that equivalency in the circulation of gold and silver coins depends on the equivalency of their relative values, and that equivalency in their legal tender quality depends, if honestly used, on the same fundamental consideration.

But in fact the "bondholder argument" has no rightful place in the present agitation for unlimited coinage of silver dollars worth eighty-five cents each. Nobody proposes to pay the public debt just now, or within the next twenty years, and least of all men the "silver inflationists" and the comparative "repudiationists." The demand of the hour is for honest money—for money that does not fluctuate one, two, or five per cent. a day, and which will afford a stable basis for business enterprises and productive industry. Whether it be possible to establish and maintain a bi-metallic currency of gold and silver we forbear to discuss at this time; but we venture to affirm, without fear of successful contradiction, that it is impossible to establish and maintain such a currency without the concurrence of the leading commercial nations of the world, and without providing for a periodical revision of the mint ratio fixed by law between the two metals. Any attempt to escape these irreversible conditions is an ignorant attempt to fight against the laws of nature, while any attempt to evade these conditions is an unscrupulous attempt to frame mischief by law and to devise unrighteousness by statute. And it is the blended ignorance and moral obtuseness brought to light by the current discussion of the silver question which furnish the chief grounds of alarm for the future. The particular measure now pending will be brought to confusion, if not by the wisdom of Congress, then by the wholesome interposition of the Executive veto. But while such schemes are hatched, and while such "lunacy" is in the air, what man of ordinary prudence can be expected to risk his money in enterprises which the breath of a future Congress may blast? Though impotent to pass their inflation Bills, the inflationists of both the Greenback and the Silver persuasion are unhappily not impotent to arrest the return of business confidence by their wild and reckless agitation.

THE EMULATION OF THE NATIONS.

IT seems to be definitely settled that there is to be another great World's Fair in the United States at as early a date as is practicable. Some of its friends put it as far off as 1889—the centennial anniversary of the adoption of the Constitution and the elevation of Washington to the Presidency; but ten years seems too long a period for mere preparatory work. The other prominent date mentioned is 1883, rendered memorable as a centennial anniversary by the close of the Revolutionary War and the evacuation of New York by the British. But perhaps neither date will be selected. There is a prevalent notion that the "centennial" whimsey has been worked out, and it is quite possible that an intermediate date, like 1885 or 1886, may be chosen at last.

Only one thing is definitely settled—that the Exposition is to be held at New York City. At the present date four committees are at work trying to facilitate matters—a Board of Trade Committee, a Citizens' Committee, a Brooklyn Committee, and a West Side Committee, and they pull this way and that in favor of various locations, with considerable celerity and strength; but as none of them has any authority whatever to do anything more than talk, it is pretty certain that the questions of date and site will be settled by Congress under the Bill which Mr. Hewitt, of the Citizens' Committee, has had introduced for that purpose.

The location, Congress will please to remember, is a matter of grave consequence. It should combine advantages which may be enumerated as follows: 1, spaciousness; 2, healthfulness; 3, accessibility; 4, capability of landscape adornment; 5, economy. As to spaciousness, the grounds where the exhibition is held should contain not less than 200 acres, and more if possible. As to healthfulness, the situation should admit of perfect drainage, and should be sightly and salubrious. As to accessibility, the site should be as near as possible to Union Square, New York, and so placed that 50,000 people can be delivered there within one hour, and so that heavy freights can be easily handled. Concerning these first three conditions, the Central Park of this city and the Prospect Park of Brooklyn offer every imaginable inducement, except as to the delivery of heavy machinery by sea, to which Port Morris, just above the Harlem River, on the east side, can claim pre-eminence. Manhattan Park and eight or ten unoccupied squares immediately adjoining, are also much spoken of. These lie directly on Central Park, which they face upon the west, and if they shall ultimately be chosen for the site, the park fence might be removed at this point, making the exhibition grounds seem to include the whole of this vast garden of 850 acres, of which New York and the country are now so justly proud.

There is a well-defined and earnest remonstrance against tearing up and mutilating Central Park for the purpose of this great international show. It would ruin a large part of this superb resting-place and pleasure-ground for many years, and the desecration should be prevented if any other acceptable place can be found. Perhaps this hundred or two unoccupied acres lying directly on the Park will answer the requirements. They are as healthful and as accessible as the Park, and they can be rendered as beautiful at an expense smaller than that required to destroy the loveliness already created, and then to renew it when the exhibition is finished. It seems a wanton wastefulness to destroy for a six months' occupation what cannot be restored in many years.

Of the good to the country which the exhibition would do commercially, it is not necessary to speak. It would certainly be a success far beyond the Philadelphia experiment. Several million people would avail themselves of the chance to visit the metropolis, and American skill and ingenuity would make a profitable acquaintance with all the world.

TENEMENT-HOUSE REFORM.

AMONG the commendable acts of the State Legislature, which adjourned on Thursday last, was the passage of the Bill for the regulation of tenement and lodging-houses in New York and Brooklyn. This Bill, if honestly carried out, will prevent the erection or adaptation of tenement or lodging-houses which will occupy more than 65 per cent. of any ordinary city lot, and will secure uniformity in the construction of all buildings of this sort, so far as relates to heights of ceilings, means of ventilation, number of occupants, etc. The more important provisions of the Act are thus summarized:

"Every room in a tenement-house hereafter erected or converted, except rooms in the attic, must be not less than eight feet in height from the floor to the ceiling; and every habitable room in the attic of such building must be at least eight feet in height throughout not less than one-half the area of such room. Every such room must have a window opening to the outer air, or over the door a perfectly constructed ventilator communicating with a room that has communication with the outer air; the area of a window must be at least one-tenth of the superficial area of the room; the top of the window must not be less than seven feet six inches above the floor, and the upper half must be made so as to open the full width. Every habitable room of a less area than 100 superficial feet, if it does not communicate directly with the external air, and is without an open fireplace, must have an air shaft extending to the roof, or otherwise, as the Board of Health may prescribe. But in all houses hereafter erected in the City of New York, which shall be used, occupied, leased, or rented for a tenement or lodging-house, every habitable room must have at least one window, with a movable sash, having an opening of not less than ten square feet, admitting light and air directly from the public street or the yard of said house.

"Whenever the Sanitary Superintendent shall certify that any tenement-house or room therein is so overcrowded that there shall be afforded less than 600 cubic feet of air to each occupant of such building or room, the Board of Health may issue an order requiring the number of occupants of such building or room to be reduced so that the inmates may not exceed one person to 600 cubic feet of air. The reduction must be made within ten days after notice to the landlord, agent, or occupant. In no case must there be more persons occupying a tenement than at the rate of one person to every thirty square feet of the tenement-house lot. Whenever there are more than ten families in a tenement-house there must be a janitor or housekeeper, if the Board of Health so require.

"The Board of Health must collect a license fee of $5 annually for every tenement-house let, hired, or occupied in the City of New York. The money is to be known as the "Tenement House Fund," and is to be used for the support of the sanitary police, and the surplus for the inspection of tenements, and the better security and protection of the life and health of persons living in such buildings."

It is provided that every owner or other person who may violate this Act shall be liable to a penalty of ten dollars for every day the violation continues. It is to be presumed that the benefits of this timely Act will be immediate, since the provisions relating to the amount of air and space to be allowed to each occupant of a tenement-house, and the number of occupants to be allowed in such structures, apply as well to tenement-houses already in existence as to those hereafter erected or converted. With anything like a thorough and vigorous performance, by the corps of inspectors, of the work assigned them, there should be a very sensible diminution of tenement-house mortality during the hot season upon which we are soon to enter.

THE INTEROCEANIC CANAL.

THE International Congress, which is now in session in Paris for the purpose of considering and choosing a route for a ship canal across the Isthmus of Panama seems to be making satisfactory progress. Originally there were no less than seven different projects. These, however, were in time reduced to four—the Nicaragua, the San Blas, the Atrato-Napipi, and the route recommended by Lieutenant Wyse. This officer made two separate surveys, between the years 1876 and 1879, both by way of the Gulf of San Miguel and the Tuyra River to the Atlantic. One of these followed the valley of the Tuyra and one of its branches, thence over the divide to the River Caguini, which empties into the Atrato. The other commences at the same point on the Pacific, some twenty miles from the Gulf of San Miguel, thence east to the junction of the Tupisa with the Chucunague, and then makes a nearly straight line to Acanti on the Atlantic, where it will be necessary to build a harbor. This last survey was the most satisfactory, and it is the route which Wyse recommends. The total length of the route would be 125 kilometres, of which 75 kilometers would have to be excavated. It would imply the removal of 70,000,000 cubic metres of earth and stone, and the construction of a tunnel of seventeen kilometres in length. It could not be constructed in less than ten years, and it would cost one hundred and twenty millions of dollars.

These figures indicate clearly the formidable nature of the difficulties which lie in the way of a ship canal across the Isthmus. On some of the routes proposed the canal could be constructed at a less cost; but one hundred million dollars is about the lowest estimate. According to latest reports, the Wyse scheme, and all those plans, indeed, which imply the construction of a tunnel, have been abandoned. The choice, it appears, now lies between the Nicaragua route and that which connects Simon Bay with the Port of Panama. There is a strong presumption now that the former will be preferred. The Panama route has, no doubt, much to recommend it, but the harbors are poor and the country along the Chagres River is extremely unhealthy. The Nicaraguan route will utilize the San Juan River and the Lake of Nicaragua. It will be about one hundred and eighty miles from ocean to ocean. On the San Juan River it will be necessary to construct a series of dams, and between Lake Nicaragua and the Pacific, a distance of sixteen miles, there will be needed not fewer than ten locks, which will involve heavy and expensive cutting.

On the whole, there seems a reasonable prospect that the Congress will accomplish its intended task, and that, as the result of the deliberations of its members, the isthmus will at length be pierced from ocean to ocean. M. Lesseps has given his word for it that as soon as a route is agreed upon, the needed funds, to the amount at least of one hundred millions of dollars, will be promptly produced. It is a mighty undertaking; but it is a necessary step in the onward march of progress. Hitherto the isthmus has been a barrier to human enterprise. It must not be permitted to remain a perpetual obstruction to the commerce of the world.

IN THE OLD WORLD.

GERMANY, by concluding a treaty with Samoa, has shown in behalf of her interests in the Pacific a foresight that the United States Government ought long ago to have shown on behalf of its own. Not only Germany, but England, France, and even Italy, have the start of American commerce in yonder latitudes, as well as in the West Indies and in Central and South America. Bismarck's war at home with the advocates of free-trade seems to have turned decidedly in his favor, notwithstanding the fact that a congress of representatives from seventy-two towns, convened by the communal authorities of Berlin, has voted—68 towns for and 4 opposed—a series of resolutions against the proposed duties on corn and cattle. Herr Von Forbenbeck has resigned the Presidency of the Reichstag, and is to become President of an Anti-Corn League; Herr Seydewitz, conservative, was elected in his place. The Reichstag has approved the Anglo-German treaty for the prevention of the slave trade on the African coast. The German Government has decided to restrict, temporarily, the sales of silver, and may possibly suspend them altogether. This indicates, it is thought, a disposition to increase the silver coinage. It is expected that a proclamation of clemency relative to the Falk laws will be issued on the occasion of the Emperor William's golden wedding.

The Austrian Reichsrath was closed last Saturday with a speech by Emperor Francis Joseph. The Danube is very high, and threatens great damage to the crops. Nearly all the Austrian villages between Pesth and Bazias have water in the streets. At Belgrade, the river is twenty miles wide. The Sultan of Turkey has issued an Irade sanctioning the Eastern Roumelian constitution. The Russian evacuation of Eastern Roumelia will probably be completed before the appointed time. A dispatch from Constantinople announces that Kaireddin Pasha, the Grand Vizier, has tendered his resignation; if it is accepted, the change will doubtless have a far-reaching effect. Germany and France are said to be co-operating heartily on the Greek question. Greece is mobilizing 30,000 men, and, it is said, has sent an agent to the United States to buy ironclads. The Porte has communicated to its representatives abroad almost incredible stories of atrocities committed by "Greek brigands" on Turkish soldiers ambuscaded in a forest in the district of Trikala. The Italian Chamber of Deputies has passed a Bill making the performance of civil marriage before the religious ceremony obligatory.

Russia continues to be terrorized by incendiary fires, the suspected fire-bugs being Nihilists, of course. A fresh outbreak of the fire at Nimiuralsk destroyed several Government buildings. Another fire at Orenburg swept away a large part of the suburb which had previously been spared. At Irbit eighty houses were burned. The Czar has determined to shorten the period of military service in the line by three years; this will permit a vast increase in the number of recruits. The assailant of General Dreutelm has been arrested at Kieff, where also two Nihilists have just been condemned to be shot.

In France, the death of Roch, the executioner, at the age of fifty-six, left a vacancy which, strange to say, no less than 568 applicants immediately sought to fill. Among them were twenty-one hackmen and eighty-seven doctors. Roch had made several improvements in the apparatus of his hideous calling, notably the noiseless putting together of the parts of the guillotine with wooden screws, the lowering of the platform almost to the level of the ground, and the shielding of the ax with a wooden screen to prevent the glitter of the steel from catching the eye of the condemned man on his coming out from prison. These improvements were all prompted by the same merciful motive which led the benevolent Dr. Guillotine to invent the machine (so accurately described by the late Dr. Gardner) which gave the inventor an unenviable immortality by cutting off his own head and the heads of thousands of other victims. Roch also enlarged the basket so that, if necessary, it could hold four heads at a time. He was himself a plump, placid, phlegmatic, bourgeois-looking man, a regular attendant at the Church of St. Ambroise, fond of music and flowers, and the Lord Bountiful of the ducks and birds in the parks and squares.

England is rejoicing that her apprehensions of a fresh Indian mutiny in the Deccan have been quieted; that Yakoob Khan's acceptance of satisfactory terms of submission virtually ends the Afghanistan War and provides the British Empire in India with "a scientific frontier"; and that even Mr. Gladstone has found reason to congratulate the Hon. Mr. Stanhope, Under-Secretary of State for India, on his presentment of the financial condition of India. The Duke of Argyll has left London on his way to Canada, where he intends to pass four months. The Council of the English Royal Agricultural Society have been recommended to obtain and publish reports on the corn and wheat-raising capabilities of the United States, Canada, Russia, India and Australia, with reference to the probable food supply for the English market. After all, the bread question is at the bottom of all European questions.

THERE is to be no tinkering with the tariff at the present session of Congress, the Ways and Means Committee of the House having voted to lay over until the regular session all Bills or joint resolutions affecting the revenues. The country will be grateful for even so brief a respite.

MAUD MILLER, the actress, who has been arrested on a charge of abduction, and whom some of our contemporaries refer to as the daughter of Joaquin Miller, is in no wise related to the poet. His only daughter, Maud Miller, a child of ten or twelve years, will shortly return from the West, with her father, to complete her education at the Manhattanville Convent of the Sacred Heart.

WHILE the new California Constitution is, no doubt, in many respects, pernicious in its tendencies, the means employed by some of its opponents to compass its defeat seem to have been altogether indefensible. Many of the great corporations resorted to coercion and bulldozing of the most obnoxious form in their efforts to control their employés, and, failing in their purpose, are now, it is said, discharging all who refused to obey their behests. One of the railroad companies organized a thorough system of compulsion and detection, and men who went to the polls firmly convinced that their employers did not know how they were going to vote, found, on their return to work, that their services were no longer needed. This ostracism of voters for opinion's sake puts those who are guilty of it on a level with the demagogues of the "sand-lots," and, if persisted in, will be sure to produce a reaction in favor of those who suffer from corporation tyranny, as well as the cause which they represent.

WE referred some time since to the new cental system which it was proposed to introduce in this country. The system has now received the approval, by formal vote, of the Produce Exchange of this city, and it is believed that a date will soon be fixed, after which all transactions shall be made in hundred pounds, or the multiple thereof. This will introduce a new standard for the sale of flour, grain, petroleum and produce, and will do away with the annoying diversity of methods heretofore pursued.

IN a communication to the Senate, Secretary Sherman states that since the first of January last legal-tender notes to the amount of $4,133,513 have been redeemed in coin. The coin reserve of the Treasury for the purpose of maintaining resumption of specie payments has been increased to $138,000,000, that being about forty per centum of the notes outstanding to be redeemed, and believed to be the smallest reserve upon which resumption could be prudently begun and successfully maintained.

THE work of erecting the buildings for the Mexican Exposition has been commenced, and will be prosecuted to completion with all possible dispatch. An agent of the Government who is now in this city for the purpose of supervising the construction of the iron-work necessary for the buildings, expresses entire confidence that the Exposition will be opened, in complete order, at the time appointed—the first of January next. This Exhibition will afford American manufacturers an excellent opportunity to extend their conquest of Mexico, and they should not fail to improve it.

SECRETARY SHERMAN, in a letter to the Chairman of the Republican State Committee, declares that he cannot under any circumstances accept the party nomination for Governor of Ohio. "I am now engaged," he says, "in a public duty which demands my constant attention, and which can clearly be better completed by me than by any one coming freshly into the office. To now accept the nomination for Governor—though it is an honor I would otherwise highly prize and feel grateful for—would be justly regarded as an abandonment of a trust which is important to the whole country to promote my personal advancement." This decision is eminently creditable to the Secretary.

INTELLIGENCE from China shows that the Government would have resorted to retaliatory measures against Americans had the anti-Chinese Bill passed by Congress received the approval of the President. The official class in China are strongly opposed to the growth of foreign influence in the country, and they would welcome any excuse for initiating a vigorous anti-foreign policy, and re-establishing the barriers which the progress of recent years has, to some extent, broken down. The folly which imagines that this can be done is only equaled by the folly which supposes that we can suspend in the case of Chinamen the natural laws which govern the movement of populations the world over.

THE Committee on Manufactures of the House of Representatives has taken up the subject of the adulteration of food, and proposes to make a thorough and critical inquiry, with the aid of experts in chemistry, as to the whole range of articles in which adulterants are employed. Such an investigation must result in the accumulation of a mass of valuable information, and it can scarcely be otherwise than that the necessity of legislation will be made so apparent as to compel the speedy enactment of laws for the protection of the public against a steadily growing evil. A Bill already introduced imposes a fine and imprisonment upon persons manufacturing, selling or bartering any article of food or drink containing any injurious ingredient or material.

IT is a wholesome sign, as indicative of a steady growth and development of our agricultural interests, that the demand for land in the West is constantly increasing in volume and urgency. In one week, recently, applications were received for 192,000 acres of land for settlement in Dakota, and during the same week applications were received in Minnesota for 500,000 acres. Of the ninety-six registers of the Land Office, over half are reporting immense increase in the settlement of the public lands in the West. The General Land Office is running behind because of the increased business of the department, which during the past two years has more than trebled. Not only our material prosperity, but the stability of our institutions, is augmented by the multiplication of landowners, and the present tendency towards the occupation of our vast territorial area is, therefore, a most encouraging phase of our national life.

THE advocates of the abolition of capital punishment will find small ground for encouragement in the recent action of the Swiss Republic. Thirty-one years ago the death penalty for capital offenses was abolished in that Republic, and twenty-six years later, in 1874, a Federal penal code was adopted which prohibited capital punishment altogether in all of the cantons. The punishment of capital crimes by imprisonment for life has therefore had five years of unquestioned trial, while as to certain other offenses, the new system had enjoyed a test six times as long. Instead of crime diminishing as was expected, it has alarmingly increased, infanticide, assassination, and other offenses having become more common than at any previous period. The people have now by a vote of 191,197 to 177,263 voted to restore the death penalty, and the world will accept their verdict as a proof that the substitution of the prison for the scaffold is a failure as a restraining and correctionary measure in preventing and dealing with the more heinous forms of crime.

THE Southern Representatives in Congress have an opportunity to silence the complaints of the "stalwarts," which, it is to be regretted, they do not care, apparently, to improve. They protest earnestly, when charged with playing the *rôle* of obstructionists, that their motives are misconstrued, but it is their own fault that it is so. The Washington correspondent of the *Herald*, who is by no means an unfriendly critic, says truly of the course of these Southern Representatives

"They have a majority of their party in both Houses; they could count upon the co-operation of a number of sensible Northern men in any moderate and just measures and in resisting the extremists, but they choose not to act. They have, in fact, sacrificed their own people and brought the whole South into suspicion, and unless they act quickly and decisively their best friends will begin to believe that the reports of their secret intentions are true. They can, if they will, pass the Appropriation Bills and adjourn Congress on or before the 1st of June, and if this is not done the blame will justly lie at their door. Does the South really mean to starve the army and keep the country in turmoil? That is the question they must answer by acts, and not by private and barren professions."

A SIGNIFICANT proof of the growing moderation of feeling in France is furnished in the disposition of the question of the restoration to the Legion of Honor of the Communists who were members of the Order before their condemnation. It has not only been decided to give them back their decorations, but it is proposed that a sum shall be added to the vote of credit for the Legion sufficient to pay them all arrears of their pensions which have accumulated during the time they have been erased from the list. There are about forty who will receive the Legion and forty-five the military medals, and if this proposition shall prevail, an unexpected windfall will await them on their return to France. The London *Examiner*, commenting on these facts, says pertinently that "decorations in general, and the institution of the Legion of Honor in particular, having always been bitterly attacked by the extreme Republicans as being symbols of aristocracy and inventions of despotism, it is, to say the least, curious to witness all the efforts they are making to get the ribbon of the Legion and the Military Medal restored to their friends and *protégés*."

WE publish elsewhere the last circular of Fisk & Hatch, who have sustained so important a part in marketing the four per cent. loan, setting forth the advantages of these bonds, and their desirableness as a permanent investment. The circulars of this eminent firm have contributed very largely to the popular information as to the value of our national securities, the effects of refunding, etc., while they have at the same time combated erroneous views and inculcated sound financial doctrines with a vigor and effectiveness which entitle them to the heartiest commendation. One of their recent circulars embodied these propositions, which, to say the least of them, will not be disputed by any friend of honest finance:

"No country or nation ever became great and prosperous that permanently paid a large rate of interest on its public debt.

"A dishonest country or nation pays no interest at all.

"A country or nation in bad credit pays the highest rates.

"A country or nation honest, upright and jealous of its credit, borrows money on its own terms. Capital and enterprise seek that land and its securities.

"The reduction of the rate of interest on our public debt to three and a half and four per cent. is a permanent benefit to every person and enterprise in the country, and is the surest sign of returning national wealth and sound prosperity."

A BILL relating to the manner of counting the Presidential electoral vote has finally been matured by the House Committee on that subject. It provides, first, that disputes as to electoral votes in any State shall be decided by the highest judicial tribunal of such State. Then it is provided that the two Houses of Congress shall meet on the second Monday in February after the election, and proceed to count the votes in the alphabetical order of the States; if there be a controversy in any State, and a certified decision of it by its highest judicial tribunal, the electoral votes of that State shall be counted in accordance therewith, unless the decision be reversed by both Houses. If there be a controversy and no such judicial decision, the contested votes shall not be counted unless both Houses concur therein. If there be conflicting judicial decisions, or conflicting certificates, the decision or certificate held by both Houses to be given by proper authority shall not be conclusive unless approved by both Houses. These provisions, it will be observed, practically put the control of the whole Presidential question in the hands of the party having control of both Houses of Congress. These are very dangerous provisions. It is an extremely easy matter to get up a contest in any State, or in every State, and the inducement held out in this Bill to institute such contests in order to throw the whole matter into Congress would be almost certain to provoke the more desperate class of politicians to seize the opportunity offered for the achievement of partisan ends.

NEWS OF THE WEEK.

Domestic.

OVER 1,400 immigrants arrived at this port, May 24th.

EMIGRANTS are crowding into Minnesota in unprecedented numbers.

GENERAL GRANT is expected to arrive at San Francisco about July 20th.

THE steamers sailing from this port on Saturday last carried 350 passengers and heavy cargoes of merchandise.

A FIRE in Brooklyn, on the night of May 23rd, destroyed a linseed oil mill and stores, valued at $700,000.

TEN young ladies graduated at the tenth annual commencement of the Women's Medical College of the New York Infirmary, May 22d.

THE International Convention of the Young Men's Christian Associations of the United States and British Provinces was held in Baltimore last week.

CONGRESS will authorize the appointment of a commission to represent the United States at the International Exposition to be held in Sydney and Melbourne, Australia.

A BILL has been introduced in the Senate forbidding Chinamen to engage in any other business than commerce, or to acquire any real property except for a residence.

EX-POLICE COMMISSIONER NICHOLS of this city has commenced proceedings against Governor Robinson and Mayor Cooper for what he claims his wrongful removal.

HORACE CAPRON, Ex-Commissioner of Agriculture, has recently made a purchase of sheep in Avon, N. Y., for the Japanese Government, of which he is an accredited agent.

THE House of Representatives remained in session during the whole of Friday and Friday night last in a struggle over the Silver Bill. The Bill was passed by a vote of 114 to 97.

A REPORT to the Pennsylvania Senate from the State Treasurer shows that there will be a deficit on November 30th, 1880, of over $1,700,000. It is proposed to increase taxation.

THE Democrats of Iowa nominated a State ticket headed by Judge Trimble, on May 21st, and adopted a platform indorsing the conduct of the Democratic members of Congress.

THE Legislative Appropriation Bill has passed both Houses of Congress, and been sent to the President, who is expected to veto it. The Senate has passed the Bill to prevent the introduction of contagious diseases.

GOVERNOR ST. JOHN of Kansas says that the people of that State will be able to provide for the negro emigrants from the South, whom he represents to be sober, industrious, and willing to face the difficulties in their way.

THE House Committee on Appropriations, by a majority vote, has authorized a favorable report to be made to the House on Representative Conger's Bill making additional appropriations for the pay of letter-carriers. The Bill appropriates $131,000 for the fiscal year of 1880, and $55,000 to meet the deficiency for 1879.

AN agreement has been arrived at by the managers of the elevated railroad companies of this city, by which all the roads will be controlled and operated by the Manhattan Company, which assumes the payment of the interest on the bonded debt, and guarantees an annual dividend of ten per cent. on the combined stock of the two companies.

THE assignees of Archbishop Purcell have filed a schedule of the assets and liabilities of the Archbishop and his brother, Edward Purcell. The total amount of claims presented is $3,097,651.49, and the total assets are $1,181,562.47, of which amount $418,536.25 is classed as doubtful. The Archbishop will begin soliciting aid from the churches of New York in a few days, with the consent of the Cardinal.

BY a fusion of the Republican and Tammany members of the New York Board of Aldermen, Mayor Cooper's nominations of Stephen B. French for Police Commissioner, Cornelius Van Cott for Fire Commissioner, and Jacob Hess for Commissioner of Charities and Correction, were confirmed; and those of John N. Hayward for President of the TAX Board, and James Daly for Dock Commissioner, were rejected.

THE Louisiana Constitutional Convention has adopted articles prohibiting the Legislature from passing any law fixing the price of manual labor, appropriating money in aid of any church or priest, preacher or minister, giving preference or discriminating against any religious creed and prohibiting appropriations for private or benevolent purposes to individuals or communities, excepting public institutions of the State; also, imprisonment for debt.

Foreign.

ALL the striking Durham coal-miners have returned to work.

A RECURRENCE of the drouth in the province of Ceara, Brazil, is feared.

THE Home Rulers in the House of Commons have chosen as their leader William Shaw, Member for County Cork, in the place of Dr. Isaac Butt, deceased.

THE Brazilian Government has declared that it will not interfere in the Chile and Bolivia-Peruvian war, though willing to offer mediation whenever asked to do so.

THE hostility of the Greeks towards the Turks has resulted in a battle at Perlazia, Thessaly, in which the Turkish forces lost 450 men. The insurgents lost only seventy men, but that number includes their leaders.

BAD tidings come from British India. In Cashmere there is a severe famine, for which the incompetent officials are unable to provide a remedy. In the Deccan lawless bands are engaged in plunder and incendiarism.

THE French Government has decided not to grant amnesty to members of the Commune, but simply to pardon them after the 6th of June. Rochefort, Vallès and Blanqui will be thus pardoned, but a simple pardon does not include the restoration of civil rights.

IT was expected that the treaty with Yakoob Khan would be signed May 26th. According to its provisions, Great Britain will treat the Kuram, Sibi, and Pishin Valleys as assigned, not annexed, territory, and will hand the surplus revenues over to Yakoob Khan, who will also be guaranteed a subsidy of £120,000 yearly.

THE FIRST PLACE M. E. CHURCH, BROOKLYN, N. Y.

AMONG the many ecclesiastical edifices in the "City of Churches," the First Place Methodist Episcopal Church of South Brooklyn holds a prominent place. It is a fine, large and imposing structure, standing at the head of First Place, on the corner of Summit and Henry Streets. Although the present edifice was erected in 1855, the church society has an older existence. It originated about 1852, and the first building used for worship was in Summit Street, only about half a block from the present location. This building belonged to Mr. Charles Bridges, now deceased, and is at present occupied as a dwelling-house. The project of erecting the present church edifice was started by Mr. Samuel Carter and Mr. M. W. Barber. These gentlemen were much assisted by Mr. Isaac Henderson, and in 1855 the corner-stone was laid. The edifice was dedicated in the following year, the Rev. Mr. Birch being at the time the pastor. Mr. Birch was succeeded by the Rev. Abel Stevens and the Rev. J. H. Rylance in conjunction; Mr. Rylance preaching in the morning and being the nominal pastor, and Mr. Stevens officiating in the evening. Mr. Rylance has since joined the Episcopal communion, and is now the rector of St. Mark's Church, in Stuyvesant Place, New York City.

The church was under a debt of $17,000 until it was liquidated by the efforts of the Rev. Dr. A. S. Hunt, the then pastor, in 1864, since which time it has been free from such a paralyzing burden. About three years ago it was deemed advisable to redecorate and refurnish the parsonage, which was done, and a mortgage of $1,600 was put on the parsonage. To pay this, however, the money is nearly all raised, and the mortgage will be lifted during the coming Summer. The disposition of religious bodies to emancipate themselves from debt is one of the most wholesome of the many indications of a growing vigor of Christian feeling in this country.

The present pastor is the Rev. W. W. Bowdish, who has been stationed there for two years, and, in accordance with the itinerancy rules of the Methodist denomination, has still one year to stay, being a married man. The church has been very prosperous under his ministrations, and is increasing in membership continually. A revival was held last Winter, and one the Winter before, at each of which many new converts connected themselves with the church.

THE NEW ROCKY MOUNTAIN MINES.—PARK CITY, NEAR LEADVILLE—SISTERS OF MERCY COLLECTING FUNDS FOR A NEW HOSPITAL.—SEE PAGE 223.

THE COURT HOUSE AT COUNCIL BLUFFS, IOWA.

THE City of Council Bluffs, Iowa, on the east bank of the Missouri River, opposite Omaha, enjoys advantages in point of situation which must secure for it a high degree of prosperity. It has not been slow to utilize its opportunities. In the character of its buildings, its business enterprises, and the variety and liberality of its provision of the conveniences and comforts of life, it is already eminent among Western towns. Its principal edifices are of brick, and among the most important are the County Court House, the City Hall, two public halls, a high-school building and six public schoolhouses. The Court House, of which we give an illustration, was built in 1867, at a cost of $50,000, and is admirably adapted for the uses for which it was designed. Council Bluffs is well supplied with churches, has a library and reading-room, two or three banks, and five newspapers—two of which are dailies.

NEW YORK.—FIRST PLACE M. E. CHURCH, BROOKLYN.

EMBASSIES IN LONDON.

GERMANY and Russia nowadays maintain the two most splendid embassies in London. It is part of the pronounced policy of Prince Bismarck to maintain representation abroad on a magnificent scale. The German Embassy is a corner house on Carlton House Terrace—the finest site in London—and was occupied by Baron Bunsen during the latter part of his tenure of office as Prussian Minister in London. It is always called Prussian House. One side looks over St. James's Park, the other over the garden which separates it from the line of clubs in Pall Mall. The ground-floor rooms open on the park side upon a spacious terrace. The present German Ambassador, Count Munster, is married to a sister of the Earl of Rosslyn, and, inasmuch as she has written an excellent cookery book—"Dainty Dishes"—the dinners are, no doubt, all that can be desired. Germany has only been represented by an Ambassador (as contrasted with a Minister) during the past few years. His salary is about $45,000 a year, with a house. The Russian Embassy, known as Chesham House, is in Belgravia. A great establishment is maintained, and the entertainments are always on prince. Russia kept the same Minister in London—the late Baron Brunow—for thirty years, and Baron Van de Weyer represented Belgium in England as long. The Marquis d'Azello was at the same time for years the representative of Victor Emmanuel. The United States and France are the countries which change their representatives most often, so far as England is concerned. France is, albeit a Republic, still represented by an Ambassador. The difference between an Ambassador and a Minister is that, while the former represents the sovereign personally, the latter represents the Government. The Ambassador can claim personal communication with the sovereign, the Minister cannot. The French Embassy has for years been housed in the vast mansion on the south side of Hyde Park, which witnessed the triumphs and the reverses of Hudson, the railroad king. The Embassy of the Walewskis, under the Second Empire, was exceptionally brilliant. In Louis Philippe's time the French Embassy occupied Hertford House, in Manchester Square—the Gaunt House of "Vanity Fair." This has now been splendidly rehabilitated, after long desertion, by Sir Richard Wallace, and contains a large proportion of the Hertford collection. Probably the contents of Hertford House are worth $5,000,000. The Austrian Embassy is now in Belgrave Square, where Count Beust gives a great many splendid dinners, but it is scarcely maintained on the same scale of splendor as that of the representative of the Czar and the Emperor of Germany.

THE DEEPEST MINE.

THE deepest mine in the world now worked is said to be the Adalbert lead and silver mine in Austria, which is 3,289 feet deep. The next is the Viviers coal mine in Belgium, 2,847 feet. It was sunk to the depth of 3,586 feet, but no coal having been found, the working is at the former level. The deepest coal mines in England are the Dunkirk colliery in Lancashire, 2,824 feet, and the Rosebridge in the same locality, 2,458 feet. The deepest mine in this country is the Yellow Jacket of the Comstock Lode. It is now 2,500 feet below the surface at the mouth of the main shaft, and 2,933 feet below the Gould and Curry croppings.

SHEEP-RAISING IN COLORADO.

SHEEP-RAISING is, as is well known, one of the most active industries of Colorado, and steadily growing in importance. The best information obtainable shows the number of sheep in that State to be about 2,000,000, valued on an average at $2.25 a head, or $4,500,000 in totality. Last year's wool clip was some 5,000,000 pounds, worth at an estimate of 17½ cents, $875,000, to which should be added 500,000 lambs, valued at $1.50 a head, or $750,000, making $1,625,000. During 1878, 30,000 head of sheep were driven in from California and 15,000 from New Mexico. The shipment of wool the coming season will be about 7,000,000 pounds, amounting, at last year's figures, to $1,225,000, exclusive of 750,000 lambs, which would bring about $1,125,000, creating an income of $2,350,000 from sheep alone. In consequence of the long distance and the want of double-decked cars, railway rates on sheep to the East have been so high that mutton cannot be shipped to any extent with profit. Thus far, sheep-raising has been very remunerative, and it will probably be more so when conducted with ampler capital and experience. Men who embarked in the business eight or ten years ago lost money from their lack of practical knowledge, but they have since repaired their errors, and are now doing well. The failures from inexperience have been many; but those who understand sheep-raising and are industrious and energetic have almost always made money.

A SHAKESPEARE PORTRAIT.

A PORTRAIT, said to be of Shakespeare, has been discovered at Sydney. It has been insured for £5,000, and has been packed and shipped for England. Moreover, it is said to be the missing portrait, and has upon it Jun, Jan, or, Jon, 1611. A photo from the portrait exhibits a bright and intellectual look. It must be in good preservation. The picture will, however, have to run the gauntlet of criticism on its arrival.

A COSTLY WINE.

THE most famous Madeira ever known was the "1814 pipe." It was fished up from the bottom of the Scheldt, a short distance above Flushing, in 1814, having remained there since 1778 in the timbers of a ship which had been wrecked at the mouth of the river in that year. It was sold by auction at Antwerp, the greater portion being secured for Louis XVIII., who dispatched an agent with instructions to secure it regardless of expense. The King (or the agent) presented the French Consul at Antwerp with several dozens, which he sold to the Duc de Raguse. In 1838, after the death of the Duchesse de Raguse, four dozens remained in her cellars, and they were sold for something over their weight in gold to Baron Rothschild. On the occasion when the Duchess entertained Taglioni at dinner, several bottles were produced, the hostess rightly considering that to be thought worthy of the precious liquor was the greatest and most becoming honor that could be paid to anybody.

INFANT MORTALITY IN RUSSIA.

THERE is scarcely a country in the world where infant mortality assumes more appalling dimensions than in Russia. This may be explained by the method in which newborn infants are commonly treated, so that it is a wonder how children survive. After birth, the baby is wrapped up in towels and left for several hours on the bed, till the bathroom has been thoroughly heated. (No cottage, be it ever so poor and miserable, is ever built without a bathroom, which is generally a draughty,

IOWA.—THE COURT HOUSE AT COUNCIL BLUFFS.

Digitized by Google

miserable place.) Here the child is at last bathed in a most primitive way, and often either dies from cold or is scalded by the hot water. It is then brought back into the house, laid upon the stove (a large stove with a broad top is at once the bed and bedroom of the whole family), and immediately a dirty rag, containing brown bread which has previously been chewed by the mother, is put into the child's mouth to be sucked. This bread being very sour, the acidity causes the mucous membrane of the child's mouth to ulcerate, and produces microscopic fungi. This is considered as being quite normal by the relatives, who say simply, "The child is blooming;" and it is not put to the breast till this period of "blooming" is over. The screams of the infant are not attributed to pain, but to hunger; and accordingly its mouth is either stuffed with some porridge made of dried oatmeal, or a few drops of water are simply poured down its throat. If the child has survived this treatment it is put to the breast; but if it should not be able, either from too great bodily weakness or from the state of its buccal mucous membrane, to seize the nipple, it is taken away, and again the dirty rag or a horn is put into its mouth. This last primitive feeding-bottle consists of a cow's horn, over the pointed end of which is drawn a piece of the udder. This mouthpiece is generally changed twice a month. The milk (skimmed-milk generally) is poured into the open end of the horn. It will be easily understood how tasteful this beverage is, if we add that the milk often turns sour, the udder decays, and flies fall into the horn. If the child persists in screaming, more oatmeal-porridge is stuffed into its mouth. This sad state of things is not only found among the poorer class, where it might be excused, but even among the wealthier classes.—*e.g.* merchants—where dirt and ignorance prevail to an almost incredible degree.

MEMORIAL DAY—1879.

FROM mast and dome and fortress crag
Our country's mourning emblems fly;
Columbia 'neath her drooping flag
Casts to the earth her tear-filled eye,
Where calm in hallowed rest her warriors lie.

The banners droop, the muffled beat
Falls from the heart of throbbing drum,
And low with minor cadence sweet,
To make all baser music dumb,
The sadder thrills of funeral marches come.

And men with slow and measured pace
Surround the graves where sleep the dead,
With reverence for the resting-place
Where blooms are laid, where prayers are said,
And Honor's roll of treasured names is read.

Oh, silent grave, 'tis yours so tell
How well these sleepers bore their parts;
How, where the hail of battle fell,
And Death let fly his cruel darts,
They stood and died with unblanched, fearless hearts.

Maybap some bosoms torn with throes
More fierce than deadly bayonet-thrust,
Will covet what this day bestows,
And what the future holds in trust
To lay with lavish hand upon this dust.

Let sculpture its chill tribute pay,
And marbled shafts rise o'er each mound;
We hail this bright Memorial Day,
When garlands, by fair fingers wound,
In rich profusion deck the sacred ground:

When pillared domes and mountain peaks
A grateful country's flag unroll;
And Fame the world's applause bespeaks
For each bright name upon her scroll,
While music sobs and muffled bellfries toll.

HENRY D. RIDGELY.

COURTSHIP BY PROXY.

I WAS sitting one Summer evening at the open window of my snug bachelor apartments on Kay Street, reflectively smoking my post-prandial Partaga, and wondering whether I would not be about as comfortable during the next two months in the city as out of it, when the door was flung open, and Tom Kiddoo burst in, in a state of mingled excitement and dejection.

"My dear fellow," I said, knocking the ashes from my cigar, "what is the matter with you?"

"Matter enough," he said, flinging himself into a chair. "Did you ever have any money left to you?"

"Alas, no! I never did," I replied, with a sigh.

"Then you don't know what it is to fall heir to a lot of property only on condition that you marry somebody you don't like, when you are madly in love with somebody else, and your governor is insisting on your tying yourself for life to the woman you don't want, and having nothing whatever to do with the woman you do want."

I swung round in my chair and looked at him. "This is very interesting," I said. "You don't mean that you are in a scrape of that kind?"

"Yes, I do. The whole thing is just this. When I was a boy, my uncle Oliver died, and meanly taking advantage of my youth and helplessness, left his whole fortune to my cousin, Rebecca Mudge—(think of that for a name!)—and me, on condition that we marry each other. If we don't, the money is to go to some charitable institution. Mudge lives with her family at Oldport, and her governor is as eager for the match as my governor is. Now, my governor has taken it into his head that we are old enough to consummate the infernal compact, and as he is pretty hard pressed just now for money, he insists on my going down to Oldport day after to-morrow, getting acquainted with Mudge, and arranging the preliminaries for our marriage in the Fall."

"Well," said I, "what possible objection can you have to doing it?"

"The greatest of all objections," he replied, excitedly. "I love another—an angel who left a vacant place in heaven when she was born on earth—and I cannot leave her. When I am here, I can see my darling almost daily. If I am compelled to go to Oldport, the separation would kill me in a week."

"Have you ever seen—Mudge?"

"Never in my life."

"Perhaps you would learn to love her even better than the angel."

"Great heavens! You don't know what you are talking about," exclaimed Tom, jumping up, and commencing to pace the floor.

"Then think of the fortune."

"What do you take me for?" exclaimed Tom, excitedly. "Am I a man to sell my soul for filthy lucre?"

"Does your angel reciprocate your passion?"

"I don't know. I've never asked her. With this odious will hanging over me, how could I? If I had told her the facts, she would have refused me instantly, out of pure generosity."

"Then, my dear fellow," I said, laughing, "there's only one course to adopt, and that is to brave your father's displeasure and refuse to carry out the compact."

"I don't dare to," he said, gloomily. "The governor would turn me out of the house. I am deeply in debt and have already exceeded my allowance. I can't brave the governor at this time. I must have a chance to turn about first."

"I don't see that I can help you, then," I said.

"Yes, you can," he replied, quickly. "That's just what I came here for. I've got a plan that will work to a charm, and will give me a good three months' delay, and save me a long separation from my darling into the bargain."

I looked at him inquiringly, and he proceeded with great eagerness.

"Look here! I never saw Mudge or a single individual of the Oldport family in my life. They wouldn't know me from a hill of beans. I will stay here in town and keep out of the governor's way, while you go down to Oldport and introduce yourself as Mr. Tom Kiddoo."

I was so amazed at the audacity of this proposal that my cigar fell from my fingers and my jaw dropped.

"You are mad!" I said.

"Nothing could be easier," continued Tom; "and it would help me out wonderfully. You could make love to Mudge for a couple of months or so, and in the meantime I could arrange matters here; then, when all was ready, I could announce my resolution to the governor and go to my dear girl with my heart in my hand, telling her of the sacrifice I had made, and ask for hers in return."

"And I could go to jail!" I said.

"Nonsense! You wouldn't do anything of the kind; and, besides being a lasting favor to me, it would be a splendid lark for you."

I reflected. As Tom said, it would be a beautiful lark. Perhaps Rebecca Mudge was an angel, too. It could do no great harm, for she had never seen Tom, and, of course, had formed no attachment for him. As for me, it was probable that she had as strong an aversion to the match as Tom had, and would therefore naturally detest me, so there would be no danger of a broken heart, no matter how violent my love-making might be. Under such circumstances I had no compunctions in acting upon Tom's idea.

"I'll do it," I said, after a pause. Tom grasped my hand with the greatest fervor.

"I knew you would, old man," he said. "I knew you would. God bless you! And if you can only behave down there so as to make the whole family hate the sight of you, the thing will be brought about so much the easier."

We settled the details next day. Tom procured me a letter of introduction from his father to Mr. Jonas Mudge. He also gave me a pack of his visiting-cards, some stationery with his monogram, and a seal-ring with his initials, T. K., on the stone. I had his name painted on the end of my trunk, and carefully discarded everything that could possibly lead to my identification. Tom then took an affectionate farewell of his father, and went to a boarding-house three blocks distant, assuming my own name of Ned Rushmore for the occasion, while I embarked on the five P. M. boat for Oldport, not without some misgivings as to the result.

I reached the Mudge mansion about breakfast-time next morning, and was warmly welcomed by the entire family.

"I'm glad to see you, my boy," said the paternal Mudge, shaking me cordially by the hand. "My stars! How much you do look like your father!"

I found Miss Rebecca Mudge to be a young lady of about twenty—a listless, washed-out blonde, with a face betokening amiability without character; a docile enough person, but one in regard to whom it would be difficult to feel any sort of interest whatever. She regarded me with perfect indifference, apparently accepting her marriage to Mr. Tom Kiddoo as one of the foregone conclusions of her colorless life. Nevertheless, I found her companionable enough, and I soon installed myself in her father's good graces by paying her every attention consistent with my assumed character. This was not difficult, for she was by no means bad-looking, and dressed well; so that I had no aversion to driving her about Oldport, to strolling with her on moonlight evenings, or to mingling freely, as her attendant, with her little circle of society. In fact, I might, perhaps, have ended by actually becoming interested in her, had she shown the slightest spark of interest in me, and had not my "beautiful lark" been brought to a sudden conclusion by an occurrence that had never once entered into my calculations.

One morning, about three weeks after my arrival, Miss Mudge came into the breakfast-room, where I sat reading the paper.

"Who do you think is coming, Mr. Kiddoo?" she said, smiling. "An old and very dear friend of yours. Now guess who it is."

My cheek blanched; my knees smote together; the paper fell from my grasp, and I really believe my heart stopped beating.

"I—I can't," I gasped, feebly.

"Hilda Duryea," she exclaimed, triumphantly holding up a letter before me.

I was on the point of saying, "And who the deuce is Hilda Duryea?" but recollected myself, and faintly ejaculated, "You don't say so!"

"Yes, indeed. She'll be here early to-morrow morning, on the New York boat, and is going to stay all the rest of the Summer. Oh, won't we have a splendid time!"

"Yes, no doubt," I replied.

"Why, you don't seem pleased a bit," said Rebecca, returning the letter to the envelope.

"Oh, yes, I am," I returned, jumping up. "I'm tickled half to death. We'll have lots of fun—lots of—fun. I'm quite too awfully delighted!"

Miss Mudge looked at me somewhat doubtfully. My face must have been a perfect picture of despair, but I capered about the room in a ghastly attempt to express my rapture. Her mother called her, however, before she had a chance to inflict any fresh torture, and I rushed out doors to think it over.

There was little use in thinking of the matter, for, of course, my only chance of safety was in immediate flight. The only thing to consider was how to accomplish this with the least ignominy. Whatever excuse I might make for a sudden departure would be immediately connected by the family with the visit of Miss Duryea. I would be questioned about it, which would be unpleasant, and the plot might be discovered, or at least suspected, before I could make myself scarce. The only alternative that seemed open to me was to fly by night. This would not be difficult. The room which I occupied was a front one, facing the street. The windows opened upon the roof of a piazza, and escape to the ground, with the aid of the vines and the darkness, would be easy. It would be a miserable, contemptible ending to my "lark," but I had no desire to view the interior of Oldport jail. Having arrived at this conclusion, I packed my carpet-bag and prepared for a surreptitious departure as soon as the family should have retired to bed.

At the supper-table that evening, Rebecca, whose head had been full of her expected visitor all day, suddenly exclaimed:

"Mr. Kiddoo, I've a splendid idea. The New York boat will be in about three o'clock in the morning, you know. What do you say to getting up early and driving with me down to the wharf to meet her? Wouldn't it be jolly?"

I was about to exhibit some extravagant demonstration of delight when there was a sound of wheels without, the quick bang of a carriage-door, and a brisk ring of the bell. Rebecca jumped up from the table; the entire Mudge family rose to their feet; there was a chatter of voices in the hall; the door of the supper-room was thrown quickly open, and on the threshold appeared, flushed, laughing and dimpled, the most beautiful being I had ever beheld in my life.

"Hilda!" exclaimed Rebecca, springing forward, and in an instant there was a Babel of voices, in which, in my dazed and collapsed condition, I could only distinguish "darling," "you dear girl," "surprise," "came by day train," "so glad," etc., etc. I looked about for a chance to escape, but the excited group blocked up the doorway. A chill of horror such as I shall never forget to my dying day, froze my blood as Rebecca Mudge turned around and said:

"But here is some one that you didn't expect to see. I believe, Hilda, that you and Mr. Tom Kiddoo are old friends."

I smiled a ghastly smile and held out my hand.

"A pleasant surprise indeed," I said.

The beautiful brown eyes opened to their widest extent, and a startled look came into them as they met mine. I gave myself up for lost, and darted towards her a look of imploring helplessness. She looked at me earnestly for an instant, with the slightest possible shrinking back, as though trying to comprehend the mystery. Then with a face which all the color had suddenly left, she placed a trembling hand in mine, and instantly withdrew it.

I could have fallen down upon my knees and worshiped her. Contemptible impostor as I was, and as she knew me to be, she yet was merciful enough to refrain from denouncing me without an opportunity for explanation. Few women could have resisted so natural an impulse, and from that moment I was her slave.

When I retired to my chamber that night I unpacked my bag, and resolved to remain in the house at all hazards until I could see Miss Duryea alone. I passed a sleepless night, and descended the stairs next morning, haggard, feverish, and utterly dejected and miserable. My good star was in the ascendant, however, for Miss Duryea was on the front piazza and alone. I sought her side immediately, thinking as I approached her, what a lovely picture she made in her white muslin dress, and with her luxuriant hair braided in two simple braids that fell below her waist. Framed as she was in a circle of climbing vines, she was a study for the best of *genre* painters. As she saw me she turned her back towards me, but I would not be rebuffed.

"I know not how to thank you, Miss Duryea," I said, humbly, "for your consideration to me last night. I had no right to expect anything but the shame of exposure, and I am very grateful."

She turned her dark eyes full upon me with a scornful curl of her lips, but made no answer.

"Whatever you may think of me," I continued, "I am neither a thief nor a villain. I can scarcely expect you to believe me, but I am most painfully situated. I admit that I am an impostor, but I am not a scoundrel."

"Then why are you here," she said, "under a name that is not your own? What end have you in view? Who are you?"

"A fool," I replied, "who, to oblige a friend, has placed himself in a most ridiculous position." And then I unburdened to her the whole story, revealing my name, Tom Kiddoo's infatuation with the young lady in New York, his repugnance to the proposed marriage with Rebecca, his request for me to personate him for a time, and my good-natured compliance. I ended by expressing my contrition for the course I had taken, and imploring her in extravagant terms, for Tom's sake, for my sake, for the sake of her own Summer's pleasure, to keep my secret and to treat me as Kiddoo.

She regarded me intently during my narration, and her mouth showed a slight tendency to smile as I came to the end. Her face became grave for a moment when I ceased, and she said, at last, quietly:

"I will not betray your confidence, sir, unless you prove unworthy of mine."

She turned away and entered the house, leaving me standing among the vines, gazing after her with a grateful heart, and a mind quite dazed with her beauty and her manner. For as I stood before her I had had an opportunity of watching every expression of her mobile features. I had gazed into the depths of her lovely brown eyes; I had seen the tremor of her red lips and the faint shadows of the smiles that suggested themselves about the sensitive mouth. I had watched the dimples spring into her cheeks and the merry light come into her eyes, and I had seen her color come and go, and her whole face relapse into thoughtfulness when I implored her to keep my secret. I was lost, and I knew it. In those few moments she had woven about me a spell more potent than any invoked by conjurer, and as I watched her retreating figure, with the soft tones of her voice still ringing in my ears, I knew that I was in love and beyond the reach of all argument or reason.

In the weeks that followed I scarcely knew whether to consider myself happy or wretched. I was happy in being with her, in listening to her, in gazing at her whenever I could do so unobtrusively. I was wretched when I thought of the contemptible light in which I must appear in her eyes, and of the necessity of playing out the miserable comedy to the end. And what the end would be I could not conceive, except that, whatever it was, it could scarcely fail to be productive of wretchedness for me. I did not obtrude myself upon her society, but there were many times when, together with Rebecca, I was unavoidably with her for hours at a time. She always treated me politely, and sometimes turned and addressed herself to me with the most perfect familiarity and frankness; but I realized that at these times I was, to her, Tom Kiddoo, and not my proper self. On several occasions, on looking suddenly up, I detected her eyes fixed stealthily upon me and regarding me with a look of intense interest. Then she would turn quickly away with a blush of confusion, and I would hang my head and feel, if possible, more contemptible than before.

This could not go on for ever, for I was going mad. I had letters from Tom only at rare intervals. They were generally despondent, and I assumed from their tone either that his *inamorata* had rejected him, or that he was not getting rid of his debts. The Summer waned. Rebecca's father began to hint about the wedding outfit; and Miss Duryea began to talk of going home. It was plain that matters had about reached a crisis, and that the farce could not be carried on much longer.

One afternoon, to get rid for an hour of the racking perplexity of brain which was constant with me when these two women were near, I went for a stroll along the cliffs overlooking the sea. It was near the close of a lovely day. The long, level line of sleepy blue water was broken only here and there by a loitering sail; the surf broke against the foot of the rocks lazily, and the idle breeze was warm to my face as I sauntered along the unfrequented path. In a sunny nook in the rocks I came unexpectedly upon Miss Duryea with a book in her lap which she was not reading, but was apparently only musing over. I hesitated and was about to turn back, when she exclaimed:

"Oh, Mr. Rushmore, is it you?"

"I—I did not expect to meet you here," I said. "I supposed you were at home."

"Rebecca and I started together to come here," she replied, "but she was seized with a headache and went back. Isn't it a beautiful spot?"

She made room for me on the rock beside her, and I took the seat with a feeling of happiness that I cannot describe.

"Why are you afraid of me?" she asked. "There should be some friendship between rogues. I have helped you to carry out your imposition, and so I am just as bad as you."

"I'm not afraid of you," I answered, "but I am ashamed of myself, and feel that you despise me."

"But I don't despise you."

"You do—you *must!*" I persisted. "You may not admit it, even to yourself, but no woman can regard a man whom she knows as an actor, a fraud, a lie, otherwise than with a feeling of contempt."

She pushed a little stone away with her foot, and waited until it struck the water below, before she replied, softly:

"You do not know how I regard you."

There was something in her voice that made me look at her quickly, and caused my pulse to beat faster. The tone in which she spoke seemed to hint that her feeling towards me was one very different from contempt or aversion.

"I would give all I possess," I exclaimed fervently, "to earn your respect and good opinion. The belief that I had lost it has caused me a Summer more full of bitterness than I can ever tell."

Her eyes fell, and she began to nervously tug at the roots of grass that covered the rock at her side.

"Why?" she asked simply.

"Because I love you!"

It was out now. I had made the plunge, and nerved myself for the worst. As I spoke I had seized her hand. It trembled slightly in my

Digitized by Google

own, but she did not withdraw it, and sat with her face averted, idly pushing at the loose gravel with the point of her parasol. Another pebble was pushed to the edge and fell into the sea, and another, and yet another. Still she made me no reply, and I held her hand with fast beating heart, and waited.

"Hilda," I said, "will you be my wife?"

Suddenly she turned to me, and a light came into her beautiful eyes which I had never seen there before. Both her hands sought mine, and her head nestled upon my breast.

But if the reader thinks I am going to let him into the secrets of the half-hour that followed, he is mistaken.

The sun was sinking in the west before we arose to go. As we took the path homeward, arm in arm, Hilda said:

"But Ned, how can you arrange matters with Tom and Rebecca?"

"I don't know," I replied. "I have done for Tom all I agreed to do. When I get back to New York he must arrange affairs with Rebecca and his angel to suit himself."

She looked up at me demurely.

"I am afraid I am his angel," she said, softly.

I stopped in the path and gazed at her in astonishment. "You!" I exclaimed.

"Yes. I came down here to get rid of him, and—and to worry you."

"Then you knew——" I began.

"Yes," she said, "Tom told me the whole story before I came. I didn't want to undergo the pain of a proposal from him, and I thought I could have some good fun by coming down here and plaguing you. I—I told you I was as great a rogue as you were, but—I didn't expect to fall in love with you."

The only reply I could make was a long whistle.

"But your astonishment when you first met me," I said, at last; "your changing color, your——"

"I was excited," she replied, "and you were too frightened to be able to read my thoughts."

I had evidently put my foot into Tom's kettle deeper than I had supposed. However, I was satisfied if Tom was. That night I wrote him a long letter, and the next morning but one I found him awaiting me in the parlor. He was raging around the room, and held my letter in his hand.

"What does this mean?" he asked, as soon as he could find utterance.

"My dear Tom," I said, "calm yourself. I couldn't help it. I didn't know you had a claim upon her until two days ago, and, besides, she would have refused you anyhow, for she ran away to avoid you."

"If I had known where she was, I would have followed her," he said, hoarsely.

"That was why she concealed her address from you. Then you would have spoiled your chances with Rebecca. Now you can step into my place, marry Rebecca, who is apparently indifferent as to whom she has for a husband, and receive your uncle's legacy. Come Tom, it's not so bad. Make the best of it, my boy."

As there seemed no help for it, he wisely concluded, after considerable argument, to adopt my advice. We called in Rebecca and her parents, and explained the entire matter to them, and Hilda besought their forgiveness for her sake. The old gentleman seemed to regard the affair as a rather good joke, and Rebecca readily agreed to install Tom in my place in her affections. When matters had been thus satisfactorily arranged, I restored to Tom his personal property, and tucking Hilda under my arm, took the first train to New York. Hilda and I are married now, and so is Tom; but though he is very happy, he still declares that if he were to live over his life again, he would not do his courtship by proxy.

INCIDENTS OF LIFE IN LEADVILLE, COLORADO.

A FEW days since I was intensely amused by the sensation created by a full-blown white-shirted swell—the miners always "go" for a white shirt—who strutted through the streets of Leadville as though he were the owner of the Prospect Mine itself. This "nice young man" was attired after the most approved style of the "masher," and carried his valise in so gingerly a manner as to beget the open derision of such miners as happened to be around at the time. Every eye turned upon the new comer, and remarks highly the reverse of complimentary were hurled at his stove-pipe, his shirt-collar, and the peculiar cut of his nether garments. One droll son of toil, shouldering a pick, proceeded to march in the footsteps of the swell, with the mincing gait of a miss of fifteen in a pair of brand-new high-heeled shoes. This burlesque movement was hailed with rapturous delight to the evident dismay of "Sir White Shirt," who accelerated his pace without daring to cast a look behind, and inwardly condemning the folly that caused him to come to a region where the pants are invariably thrust inside the boots, and where shirt-collars are unknown quantities.

In contradistinction to this it is touching to see the gentle Sisters of Charity proceeding on their errands of mercy, respected and revered by rough, rude men, in whom the animal holds its own with brutal tenacity. I have beheld the Sisters approach a body of miners, and at their coming the ribald jest and unseemly song have ceased, while not a few of these men have doffed their hats, and when solicited for alms in the name of the Creator have given freely. Our illustration represents such a scene, and the dollars that ere many moments would be rolled into the faro bank, or into some sink of seething vice, are being cheerfully extended in the cause of Samaritanism.

To peep into windows o' nights would repay "Le Diable Boiteux." Beds being at a discount, new-comers put up as best they can, till the floor of a billiard-room becomes an object of interest, while the table itself rises to the dignity of a luxury. The attitudes of the sleepers are rich in contortion, the expressions upon their faces the reverse of amiable. Each man reposes upon a pillow composed of all his worldly belongings, and dreams, no doubt, that ere many moons roll over, his bolster will be of down, his coverlet broidered in gold.

The Holiest of Russian Shrines.

THE great monastery at Kiev is the richest and most holy of the Russian shrines. The tombs of the saints are in catacombs cut in the rocks overhanging the Dnieper, on which the monastery stands. Over 100,000 pilgrims, chiefly from the provinces of Great Russia, arrive here during the course of the year, and their donations are a great source of wealth. All day long the entrance is lined by rows of beggars, to whom the piety of the Russian pilgrim compels him to extend his charity. These persons have bought from the monks the privilege of occupying the profitable stations where they pass the day, and it is said that some of these posts are valued as high as 2,000 roubles a year. The Government is perfectly aware of the abuses of the whole system, but in face of the superstition of the people and the firm attitude of the clergy, it is powerless. A good story is told of the Emperor Nicholas: At the time of the great wars with Napoleon, Alexander I. worked sufficiently on the patriotism of the monks to induce them to make a loan of 1,000,000 roubles to the Government, for which the Emperor gave his personal bond. When Nicholas, shortly after his accession, visited Kiev, the monks presented this bond to him. Nicholas was affected to tears, congratulated them on the possession of so valuable a souvenir of his revered father, and earnestly begged them to preserve it with the greatest care.

The New Cardinals.

OF the new Cardinals created by Pope Leo, on May 12th, four, at least, are men of distinction, namely, Dr. Newman, Monsignor Deprez, Monsignor Pie, and Professor Hergenrother. The life and labors of the English Doctor of Divinity are generally known, but the other three mentioned are not so familiar. Monsignor Julien Florian Deprez was born at Ostricourt, in the Archdiocese of Cambray, on the 14th of April, 1807. When in his forty-ninth year he was promoted to the Bishopric of Hèmiron, was thence translated to Limoges, and thirty months thereafter was preconized Archbishop of Toulouse. His Ultramontane antecedents are above suspicion, and he has already been dubbed by the *Unita Cattolica*, the organ of the Jesuits in Italy, "the Cardinal of the Sacred Heart of Jesus."

Monsignor Louis François Desire Edouard Pie was born at Pontgoin, in the Diocese of Chartres, in 1815, and was created Bishop of Poitiers, December 26th, 1849. In him we have another Cardinal bearing the genuine Ultramontane headmark. Dr. Joseph Hergenrother, Professor of Ecclesiastical History in the University of Wurzburg, is in high repute as a theologian, and, according to the *Unita Cattolica*, has "proved more than a match, in more than one controversy, for the famous Döllinger and his sectaries." Through him, continues the organ of the Italian Ultramontanes, "the schism of the Old Catholics was from the beginning covered with shame and convicted of error and falsehood in the eyes of the German faithful and of the German Protestants alike." It was on account of his learning and controversial skill that, early in 1869, the late Pius IX. summoned Dr. Hergenrother from Wurzburg to Rome to take part in the preliminary labors of the Œcumenical Council. Far different from Cardinal Hergenrother is his countryman, Cardinal Hohenlohe, who has just been appointed by the Pope to the Bishopric of Albano.

Until May 12th the 15,000,000 or 20,000,000 Catholics of the German Empire were represented in the Sacred College alone by Prince Gustavus Adolphus Hohenlohe. He was created a Cardinal Priest in 1866, and was intended to be a resident at the Vatican Court, but ranged himself among the stanchest opponents of the dogma of infallibility at the Œcumenical Council, and at its close went to Germany, whence Prince Bismarck proposed to send him back as German Ambassador to the Vatican, a priest seeming to him the fittest person to be accredited to a priestly court. Upon the late Pope refusing to receive Hohenlohe in that capacity, the Cardinal tarried in Germany till actually summoned to his post by a threat of punishment that he dare not ignore. His appointment to the bishopric is, of course, a promotion from Cardinal Priest to that of Cardinal Bishop, but this act of the Pope loses all significance in view of Dr. Hergenrother's elevation to the purple.

On the 14th instant a numerous assemblage of British and American residents and sojourners gathered at the English College in Rome to present their congratulations to Cardinal Newman on his elevation to the cardinalate, together with a rich suit of vestments and a complete set of beautifully wrought sacred vessels for use on the altar, subscribed for by Catholics of Great Britain. The gathering at the College consisted chiefly of Catholics, though other sects were not unrepresented. The Italian journals contain many flattering remarks on the grand character and high standing of the new English Cardinal, and long accounts of his life, his conversion and his labors in the cause of the Church.

New Facts in Regard to Mary Stuart.

IF any historical subject could be regarded as thoroughly exhausted so far as old sources of information are concerned, one would say it was the life and adventures of Mary Stuart. And yet in the very best known and most accessible of all manuscript collections—the Cottonian Library—the Rev. Joseph Stevenson has discovered some new particulars of very considerable interest connected with the murder of Rizzio, which any reader in the British Museum might have found out ages ago by merely bestowing a little patience on some rather cramped and difficult handwriting. The manuscript, which is imperfect at the beginning, is supposed to have been dictated by Mary Stuart herself, or written directly from information supplied by her own mouth to her French Secretary, Nau, during her confinement at Chartley. The story begins, however, not with the Queen, but with the confederate lords, just after the murder, discussing what is to be done next. Darnley is terrified at their proposals, and endeavors that night to enter the Queen's bedroom by a private stair. But the Queen had locked the door, and resisted firmly till next morning his petition to open it, notwithstanding his assurance that he had something to tell which concerned their common safety. When at length he gained admittance to her presence, his first act was to throw himself on his knees before her, implore her pardon, and show her the secret articles between himself and his accomplices. The Queen told him frankly he had lost her confidence, she believed for ever; but that he must now devise means to extricate both himself and her from imminent danger. Darnley advised her, if desired, to pardon the conspirators, and said he would endeavor to arrange a compromise. Mary refused to pledge herself to any such thing, but declared her husband might promise what he pleased in her name. Darnley, however, persevered, and first brought his father singly to visit her, to whom she spoke coldly. Afterwards he brought the other lords of the same faction to the Queen's presence, and Morton, as spokesman for the rest, besought her pardon, kneeling on the very spot which was still red with the blood of Rizzio. Morton endeavored to palliate their conduct as being prompted not by enmity to the Queen, but by fear of the Parliament. Moray protested his own entire innocence, and interceded for the others. The Queen, being closely pressed by their solicitation, feigned sudden illness, and required the immediate attendance of the midwife, leaving it to Darnley to tell the lords what she would do. The device succeeded. In spite of the suspicions of the conspirators, a midwife, appointed by themselves, reported that her life was in danger from premature pains of labor, and the lords were obliged to defer further solicitations till next day. But by this time Mary's plan of escape had been secretly arranged, and before daybreak next morning she and Darnley were already far on the road to Dunbar. Such is the curious revelation now made from a manuscript which has always been perfectly accessible to literary men, but which no one but Mr. Stevenson seems to have troubled himself to read through.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Zulu Attack upon the Eightieth Regiment.

An engagement took place on April 10th on the Intombi River, between Luneberg and Derby, on the Transvaal frontier, north of Zululand, resulting from an attack by an overpowering force of Zulus upon a convoy of the Eightieth Regiment, a portion being on each side of the river. An officer writes: "The morning on which our men were attacked was misty, enabling the enemy to approach and take up their position without being seen. When the mist lifted, the sentry on this side of the river gave the alarm, as he saw the enemy close to the "hanger" on the opposite side. However, this was of very little use, as the Zulus, on gaining the rise, fired a volley, then, dropping their rifles, rushed by thousands on our men, and in a few minutes surrounded the camp. Some of our men attempted to cross, but they were nearly all smeared in the water. The men on this side poured in volley after volley, by that means enabling a few of their comrades to join them; but they had to make their retreat, as the enemy were crossing in great numbers. Directly the news was brought into camp, Major Tucker, commanding the Eightieth Regiment at Luneberg, accompanied by Lieutenants Johnson and Sherrard, Doctor Wardrop, and myself, with two mounted orderlies, proceeded to the scene of the attack, which is about five miles distant from Luneberg. On approaching the river, we saw an immense swarm of the enemy, estimated at between 6,000 and 7,000, retiring in a dense column about two miles away. It may well be imagined with what rage and chagrin our men saw the enemy almost within range, while at the same time, for want of cavalry, we had to allow them to retire unmolested.

The Durham Collieries Strike.

The strike of the colliers employed in the mines at and in the neighborhood of Durham, England, has been a most determined one. A leading feature of the various demonstrations was the earnest participation of women related to the miners. There was a mass-meeting of women, colliers' wives and other female relatives, in a field near the villages of East and West Boldon, not far from Sunderland. A messenger with a watchman's rattle was sent through the villages and neighboring hamlets to summon the women to this meeting, and his method is the subject of our sketch. The meeting, which took place immediately after the distribution of soup from the colliers' strike relief fund, at the Primitive Methodist Chapel, was attended by some fifteen hundred persons, of whom about half were females, many of them carrying children in their arms, or followed by children. A rude temporary platform, with a couple of chairs upon it, had been set up in the field, and the speakers, both women and men, with a "Mrs. Warrior," who presided, held forth in an energetic style of eloquence, protesting against the injustice of lowering wages.

The Emperor of Russia in his Capital.

There can be no doubt, despite the contrary teaching of the events of the past few weeks, that the Russians are ardent believers in the "divinity that doth hedge in a king." That they absolutely worship their monarch may be saying a little too much, but that they hold him in the greatest veneration, despite the oppressive form of government which he permits, if not directs, is true to the very letter; and though the conspiracy, ramifications of which extend through all classes of society, aims at the removal of obnoxious Ministers and Governors by the assassin's hand, it has hitherto refrained from touching the monarch—if we except the recent attempt of Solovieff. The enthusiasm of the people when the monarch rode through the streets of St. Petersburg to attend the *Te Deum* given in thanksgiving of his escape knew no bounds. Every head was bared, hurrahs followed him in his course, and for the time being Nihilism certainly was at a discount before the one sentiment of thankfulness that their "Father," the Czar of all the Russias, has again escaped the murderer's bullet.

Bridal Trip of the Duke and Duchess of Connaught.

A complete list of the places visited by their Royal Highnesses during their honeymoon cruise in the royal yacht *Osborne* has appeared in the pages of the daily press. Everywhere they were received with distinguished honors, the demonstrations by British subjects being, of course, particularly hearty. On April 24, the *Osborne* cast anchor at Lisbon, and remained there three days. The Duke and Duchess dined at the Ajuda Palace, and subsequently gave a banquet to the King of Portugal on board the yacht, which was illuminated in honor of the occasion. Our sketch shows the Duke and his suite at the gangway of the *Osborne* watching the approach of King Luis in his state barge, which was propelled by no less than eighty rowers.

The Disaster to the Tenth Hussars.

On the night of the 29th of March, about midnight, the quiet at the British camp at Jellalabad was suddenly broken by the distant sound of horses galloping, and in a few moments, by the light of the moon, riderless steeds to the number of twenty-five or more could be seen rushing into the camp, bespattered with mud and foam, coming evidently from the direction of the Cabul River. There had been no shots heard in that direction, and the men were at a loss to guess what dire news these messengers of death and disaster were bringing. Soon some men toiling across the fields from the direction of the roaring torrent were seen approaching. They were dripping with wet. The story of the disaster was soon told. The Tenth Hussars had tried to cross the river, missed the ford, and the whole squadron had been immersed. Search for the bodies was immediately instituted, but by the following night only nineteen bodies were recovered. These were placed on the backs of elephants and conveyed into camp. At half-past seven the next morning the burial took place in the little cemetery which has been made a short distance from the camp. Every one who could possibly leave their duties followed in the wake of the ghoulies carrying the bodies; and many a heart swelled as the strains of that exquisite march of Schauppmann's played the poor fellows to their last resting-place. The scene at the cemetery was singularly impressive, the General and his Staff and all officers in camp being present. The Rev. Mr. Mole, the Wesleyan clergyman, read the burial service.

AT HOME AND ABROAD.

—A MOVEMENT is on foot to erect a monument to Abraham Lincoln in Allegheny Park, Pittsburg, Pa.

—THE United States steamer *Adams* is ordered to hasten from Panama for the scene of the Peru-Chili war.

—ALTHOUGH established only a year ago, the English Wesleyan Thanksgiving Fund is increasing at the rate of $20,000 a week.

—A LATE report that from 20,000 to 30,000 persons died from cholera while returning from a religious fair in India is repeated.

—A BILL making the performance of civil marriage before the religious ceremony obligatory has been passed in the Italian Chamber of Deputies.

—A RETURNED South Carolina emigrant reports that one-half the negroes who went to Liberia are dead, and the remainder are anxious to get back.

—IT is believed that the British Government has arranged with Yakoob Khan a satisfactory basis of negotiations, favorable mainly to the British policy.

—IN the Constitutional Convention of Louisiana, an article has been adopted which provides for leaving the present apportionment of the Senate undisturbed.

—THE American Board of Foreign Missions have decided to use $125,000 of the Otis legacy to establishing a mission in the Nyanza region of Central Africa.

—ONLY $190 is now wanted towards the $60,000 required for the endowment of the Celtic Chair at the University of Edinburgh, so the enterprise may be regarded as a success.

—ACCORDING to latest dispatches, the popular vote in Switzerland on the question of re-establishing capital punishment stands 166,834 for and 138,692 against the proposition.

—IT has been decided in the British War Office to grant six months' pay to all ranks serving in South Africa on the close of the war, to compensate for the losses sustained in active service.

—TWENTY Roman Catholic Bishops in Canada have united in a petition to the Queen, praying that Her Majesty will aid the movement for the establishment of a Catholic University in Dublin.

—THE new liquor law for Illinois has special clauses for towns and large cities. In the former all persons, male and female, are permitted to vote on the question whether licenses shall be granted.

—IN Zululand the atmosphere is so clear that objects are distinctly visible at as great a distance as seven miles when the moon is at the full, and one can see to read print with ease by starlight only.

—A CENSUS compiled by order of the Dutch Government gives the population of the Kingdom of the Netherlands on January 1st, 1879, as 3,975,001 souls, of whom 1,970,607 were males and 2,007,394 females.

—THE British Government has purchased of a poor Hungarian for $8,000 one of the three black pearls, which, more than 150 years ago, were stolen from the English crown, and were long supposed to be the only black pearls in existence.

—FROM the beginning of next year the Imperial Medico-Chirurgical Academy of St. Petersburg will be wholly devoted to the training of physicians and surgeons for the Russian Army, and will be known as the Imperial Military Academy of Medicine.

—A good evidence of the financial recuperation of the French Republic is shown in the fact that the Government has recently paid the last instalment of its debt of 1,500,000,000 francs to the Bank of France, incurred at the time of the war with Germany.

—THE South Kensington Museum, London, has just come into possession of a marble sarcophagus elegantly sculptured on the outside, the work of the famous Donatello. It was exhumed at Padua, Italy, and is supposed to have been cut some time prior to 1456.

—AT a convention of colored people in Richmond, Va., May 19th, resolutions were adopted recommending the formation of societies to facilitate emigration from the States, providing the authorities do not take immediate steps to better the condition of the negroes.

—GERMANY has now no commercial treaty with any nation; still, according to an article of the Treaty of Frankfort, German goods must be admitted into France on the basis of the most favored nation clause. This section is causing a great outcry among the French protectionists.

—THERE is great rejoicing among the police of New York in consequence of a decision by the Court of Appeals. The decision previously rendered that the salaries of the force are not to be reduced twenty per cent. by reason of a return to specie payments is affirmed; hence there will be no reduction.

—IT is asserted that there is not to-day in the Union a State, Territory, or city, where Sunday laws are so stringent, so rigidly enforced, or so generally obeyed as in New Mexico. The week, so far as business, pleasure and social intercourse are concerned, ends Saturday night, and has no beginning again until Monday morning.

—THERE are now in Paris, for the relief of persons who may meet with street accidents, eighty-four surgical depots. There is also provided fumigating apparatus for the relief of suffocated persons in the watch-houses of the cemeteries, and along the banks of the Seine and the canals, which are further provided with buoys and boat-hooks.

—AT the close of the Franco-Prussian war, both Governments entered into an engagement to take care of the graves of soldiers buried in their respective territories. A report has just been made by which it appears that the French Government has taken action in 1,438 communes, situated in 36 departments, and containing the remains of 87,296 victims of the war; 27,859 French and 21,876 German soldiers have separate sepulture, while 27,661 bodies, whose nationality could not be positively distinguished, have common graves. Municipalities and private committees have erected 349 monuments, families 58 and Germany 60. The French Government has constructed 25 large cemeteries, with imposing ornaments, at an expense of 782,477 francs. The total outlay has been 2,287,896 francs, and there will be an annual vote for the conservation of the graves and memorials.

THE PROCESSION OF ARCHBISHOPS, BISHOPS AND PRIESTS, WITH THE CARDINAL, EMERGING FROM THE GRAND ENTRANCE, PRIOR TO THE SPRINKLING OF THE EXTERIOR OF THE WALLS.

NEW YORK CITY.—DEDICATION OF ST. PATRICK'S CATHEDRAL, AT FIFTH AVENUE, BETWEEN FIFTIETH AND FIFTY-FIRST STREETS, SUNDAY, MAY 25TH.

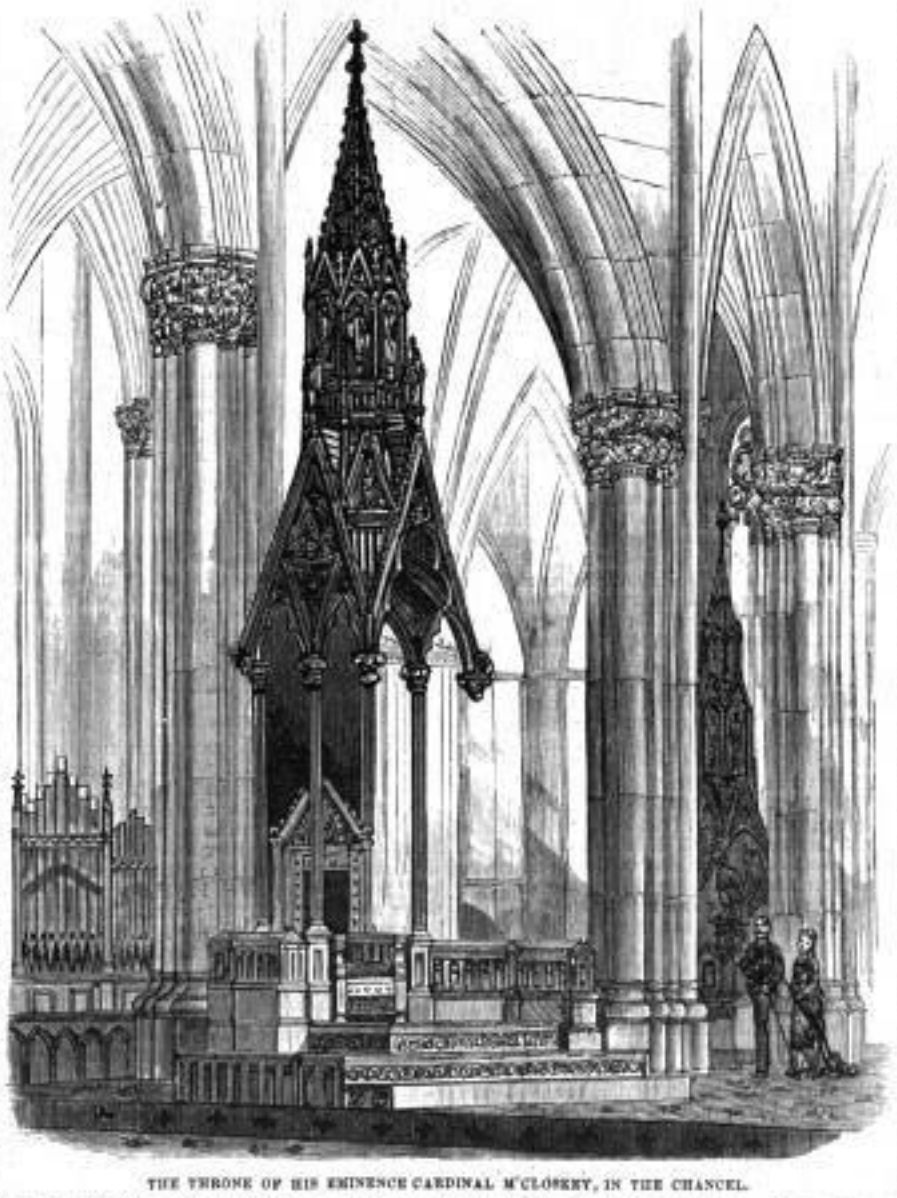
THE GRAND ALTAR IN THE CHANCEL OF THE EDIFICE.

ST. PATRICK'S CATHEDRAL.

DEDICATION OF THE MAGNIFICENT EDIFICE.



THE ceremonial opening and dedication of the new St. Patrick's Roman Catholic Cathedral, on Fifth and Madison Avenues and Fiftieth and Fifty-first Streets, took place on Sunday morning, May 25th, the services beginning at 10 o'clock A. M., and closing about 2 P. M.

The grand procession was formed in the sacristy, and was led by a priest in full robes, carrying a large golden cross, and attended by two acolytes bearing candles. These were followed by some thirty altar-boys in red cassocks and white surplices; the sanctuary choir of one hundred and twenty young men, and a number of clergymen, bishops and archbishops, in full dress. Last of all was His Eminence Cardinal McCloskey, dressed in his richest robes, followed by train-bearers, a cross bearer and youthful attendants, and assisted by Vicar-General Quinn, first deacon of honor; the Rev. A. J. Donnelly, of St. Michael's Church, second deacon of honor, and Vicar-General Preston, assistant priest. Among the prelates in the procession were the following archbishops: James Gibbons, of Baltimore; John J. Williams, Boston; John E. Purcell, Cincinnati; James F. Wood, Philadelphia; J. J. Lynch, Toronto, Canada; Michael Hannon, Halifax; Alexander Taché, St. Boniface, Canada. Some of the bishops were—Becker, Wilmington; Chatard, Indianapolis; Corrigan, Newark; Conroy, Albany; De Goesbriand, Burlington; Healy, Portland; Gross, Savannah; Hendricken, Providence; Kain, Wheeling; Loughlin, Brooklyn; McNeirney, Albany; McQuaid, Rochester; O'Hara, Scranton; O'Reilly, Springfield; Quinlan, Mobile; Ryan, St. Louis; Ryan, Buffalo; Shanahan, Harrisburg; Spalding, Peoria; Tuigg, Pittsburg; Wadhams, Ogdensburg; Lynch, Charleston; Gilmour, Cleveland, and Kean, Richmond.

The procession moved down the central aisle of the building, in full view of the congregation, while six priests intoned the "Psalms of the Blessing." When the Fifth Avenue entrance was reached, the procession passed out into the street, and turned down the avenue to Fiftieth Street. As the Cardinal reached the front entrance, he sprinkled it with holy water and performed the blessing ceremony. While the priests and choir chanted the "Miserere," the procession advanced through Fiftieth Street, then through Madison Avenue and Fifty-first Street, until the main entrance was again reached. During this time the Cardinal sprinkled the walls with holy water. As the procession again entered the church, the choristers chanted the "Litany of the Saints," until all the clergy were within the sanctuary. The Cardinal and his attendants advanced to the bottom marble step of the grand altar and knelt until the litanies were finished. At the conclusion of this ceremony, all the acolytes, choristers, priests and prelates formed for another procession, and passed around the side aisles of the Cathedral, while the Cardinal sprinkled the walls with the holy water, when the procession returned to the sanctuary, and the dedicatory services ended.

A Pontifical High Mass was then sung, Cardinal McCloskey being the celebrant, Dr. McGlynn, of St. Stephen's Church, deacon, and Father McGean, of the Church of the Transfiguration, sub-deacon, Father Farley, the Cardinal's secretary, and the Rev. John F. Kearney, of the old Cathedral, in Mott Street, were Masters of Ceremonies. The Mass proceeded as usual to the Gospel, when Bishop Ryan of St. Louis delivered the sermon. The music of the Mass was under the direction of W. F. Pecher, the organist of the new Cathedral. Hayden's Sixteenth Mass in B flat was sung by a double quartet and a chorus of one hundred male and female voices. The first quartet and solo parts were taken by Miss Amanda Starritt, soprano; Miss Alama Martine, alto; Mr. Fritsch, tenor; and Mr. Steinbuch, baritone. The introit, gradual, and some of the responses were given by the male sanctuary choir to the Gregorian chant. At the close of the Mass a grand Gregorian Te Deum was given by both organs and both choirs in unison.

In the evening the whole building was illuminated, and the sanctuary blazed with hundreds of lights. Solemn Pontifical Vespers were celebrated by Archbishop Gibbons of Baltimore, assisted by the Rev. John J. Kean and the Rev. Michael J. Farrell. On the episcopal throne was seated the Cardinal, attended by his assistant priests. Boys scattering incense from richly wrought censers; numerous acolytes, bearing burning torches, six chanters, dressed in costly copes, singing the psalms, and the presence of many prelates in full robes added much to the effect of the sanctuary. The chancel choir sang the Psalms "Dixit Dominus," "Confitebor Tibi, Domine," "Beatus Vir," "Laudate Pueri" and "In Exitu Israel." The gallery choir sang the "Magnificat" by Emerich. The vespers closed by the singing of Rossini's "Benedictus" and the "Tantum Ergo" for solo and full chorus. Bishop Kean of Richmond preached the sermon.

THE THRONE OF HIS EMINENCE CARDINAL M'CLOSKEY, IN THE CHANCEL.

The high altar of the Cathedral was consecrated on Thursday morning, May 22d, by Bishop Conroy of Albany, New York, with closed doors, no persons save the necessary number of priests and acolytes being present. Bishop Conroy was assisted by Vicar-General Quinn, Fathers Kearney and Hogan, of St. Patrick's Church, Mott Street, and Father Callaghan, of the Church of St. John the Evangelist. The "Seven Penitential Psalms" were first recited, and while the priests were reading the fiftieth psalm, "Miserere," the officiating Bishop walked seven times around the altar, reaching the front at the end of every third verse. Then the "Litany of the Saints" was recited, after which the Bishop blessed the ashes, salt and wine, and when he had mixed them, sprinkled the altar therewith. He then marked each of the crosses at the four corners and the centre of the altar, and blessed the cement with which, after placing the sacred relics in the centre cavity, he sealed the small stone which covered it and filled up the space on a level with the altar slab, using meanwhile holy oil or chrism on each of the five crosses. Incense was offered at intervals during this solemn rite, and five small tapers were set in incense on each of the five crosses, lighted and allowed to burn down. The candles borne into the chancel by the acolytes were placed at one side of the altar, and at no time placed on the altar itself.

The high altar is placed about thirteen feet from the eastern wall of the choir. The table of the altar is of white marble, divided into niches and panels on its sides, the former containing statues and the latter bas-reliefs, both representing the Divine Passion. The tabernacle over the altar is a blaze of mosaics and precious stones, and has a door of bronze, richly gilt. The base of the screen behind the altar is nine feet in height, of white marble, with base moldings of *bleu bélge* marble, and inlaid with diaper-work of alabaster. The screen above the base has a central tower, built with colored columns, a tabernacle, statues and rich foliage, above which rises a spire pierced with open tracery, surmounted by a gilt cross. The two flanking towers of the screen have niches containing the statues of St. Peter and St. Paul. The spaces between the central towers and those at the corners are divided into six niches, containing figures of seraphim, bearing shields with the emblems of the Passion. The reredos is thirty-two feet wide and fifty feet high. The shrine of the Virgin, though of inferior splendor, is exceedingly beautiful and costly. The altar, so exquisite in material, design and artistic beauty, is forty-eight feet in height from the base to the apex of the cross surmounting the tabernacle.

EMBRYO.

I FEEL a poem in my heart to-night,
A still thing growing;
As if the darkness to the outer light
A song were owing.
'Tis something vague, and very sweet and sad;
Fair, fragile, slender;
Not tearful, yet not daring to be glad,
And oh, so tender!

It may not reach the outer world at all,
Despite its growing;
Upon a poet-flower such cold winds fall
To blight its blowing.
But oh! whatever may the thing betide,
Freedom or fetter,
My heart, just to have held it still is dead,
Will be the better!

MARY ASHLEY TOWNSEND.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXX.

TOFF'S interference proved to have its use. The announcement of the little supper—plainly implying Simple Sally's reception at the cottage—reminded Amelius of his responsibilities. He at once stepped out into the passage, and closed the door behind him.

The old Frenchman was waiting to be reprimanded or thanked, as the case might be, with his head down, his shoulders shrugged up to his ears, and the palms of his hands spread out appealingly on either side of him—a model of mute resignation to circumstances.

"Do you know that you have put me in a very awkward position?" Amelius began.

Toff lifted one of his hands to his heart. "You are aware of my weakness, sir. When that charming little creature presented herself at the door, sinking with fatigue, I could no more resist her than I could take a hop-skip-and-jump over the roof of this cottage. If I have done wrong, take no account of the proud fidelity with which I have served you, tell me to pack up and go; but don't ask me to assume a position of severity towards that enchanting miss. It is not in my heart to do it," said Toff, lifting his eyes with tearful solemnity to an imaginary heaven. "On my sacred word of honor as a Frenchman, I would die rather than do it!"

"Don't talk nonsense," Amelius rejoined, a little impatiently. "I don't blame you—but you have got me into a scrape for all that. If I did my duty, I should send for a cab and take her back."

Toff opened his twinkling old eyes in a perfect transport of astonishment. "What!" he cried, "take her back? Without rest, without supper? And you call that duty? How inconceivably ugly does duty look when it assumes an inhospitable aspect towards a woman! Pardon me, sir; I must express my sentiments or I shall burst. You will say, perhaps, that I have no conception of duty! Pardon me again—my conception of duty is *here!*"

He threw open the door of the sitting-room. In spite of his anxiety, Amelius burst out laughing. The Frenchman's inexhaustible contrivances had transformed the sitting-room into a bedroom for Sally. The sofa had become a snug little white bed; a hairbrush and comb, and a bottle of eau-de-cologne were on the table; a bath stood near the fire, with cans of hot and cold water, and a railway-rug placed under them to save the carpet. "I dare not presume to contradict you, sir," said Toff; but there is *my* conception of duty! In the kitchen, I have another conception, keeping warm; you can smell it up the stairs. Salmi of partridge, with the littlest possible dash of garlic in the sauce. Oh, sir, let that angel rest and refresh herself! Virtuous severity, believe me, is a most horribly unbecoming virtue at your age!" He spoke quite seriously, with the air of a profound moralist, asserting principles that did equal honor to his head and his heart.

Amelius went back to the library.

Sally was resting in the easy-chair; her position showed plainly that she was suffering from fatigue. "I have had a long, long walk," she said; "and I don't know which aches worse, my back or my feet. I don't care—I'm quite happy now I'm here." She nestled herself comfortably in the chair. "Do you mind my looking at you?" she asked. "Oh, it's so long since I saw you!"

There was a new undertone of tenderness in her voice—innocent tenderness that openly avowed itself. The reviving influences of life at the Home had done much—had much yet left to do. Her wasted face and figure were filling out, her cheeks and lips were regaining their lovely natural color, as Amelius had seen in his dream. But her eyes, in repose, still resumed their vacantly-patient look; and her manner, with a perceptible increase of composure and confidence, had not lost its quaint, childish charm. Her growth from girl to woman was a growth of fine gradations, guided by the unerring deliberation of nature and time.

"Do you think they will follow you here from the Home?" Amelius asked.

She looked at the clock. "I don't think so," she said, quietly. "It's hours since I slipped out by the back door. They have very strict rules about runaway girls—even when their friends bring them back. If you send me back —" she stopped, and looked thoughtfully into the fire.

"What will you do, if I send you back?"

"What one of our girls did, before they took her in at the Home. She jumped into the river. 'Made a hole in the water'; that's how she calls it. She's a big, strong girl; and they got her out, and saved her. She says it wasn't painful till they brought her to again. I'm little and weak—I don't think they could bring me to life, if they tried."

Amelius made a futile attempt to reason with her. He even got so far as to tell her that she had done very wrong to leave the Home. Sally's answer set all further expostulation at defiance. Instead of attempting to defend herself, she sighed wearily, and said: "I had no money; I walked all the way here."

The well-intended remonstrances of Amelius were lost in compassionate surprise. "You poor little soul!" he exclaimed, "it must be seven or eight miles at least!"

"I dare say," said Sally. "It don't matter, now I've found you."

"But how did you find me? Who told you where I lived?"

She smiled, and took from her bosom the photograph of the cottage.

"But Mrs. Payson cut off the address!" cried Amelius, bursting out with the truth in the impulse of the moment.

Sally turned over the photograph and pointed to the back of the card, on which the photographer's name and address were printed. "Mrs. Payson didn't think of this," she said slyly.

"Did you think of it?" Amelius asked.

Sally shook her head. "I'm too stupid," she replied. "The girl who made the hole in the water put me up to it. 'Have you made up your mind to run away?' she says. And I said, 'Yes.' 'You go to the man who did the picture,' she says; 'he knows where the place is, I'll be bound.' And I asked my way till I found him. And he did know. And he told me. He was a good sort; he gave me a glass of wine, he said I looked so tired. I said we'd go and have our portraits taken some day—you and your servant. May I tell the funny old foreigner that he is to go away now I have come to you?" The complete simplicity with which she betrayed her jealousy of Toff made Amelius smile. Sally, watching every change in his face, instantly drew her own conclusion. "Ah!" she said cheerfully, "I'll keep your room cleaner than *he* keeps it. I smelt dust on the curtains when I was hiding from you."

Amelius thought of his dream. "Did you come out while I was asleep?" he asked.

"Yes; I wasn't frightened of you when you were asleep. I had a good look at you. And I gave you a kiss." She made that confession without the slightest sign of confusion; her calm blue eyes looked him straight in the face. "You got restless," she went on, "and I got frightened again. I put out the lamp. I says to myself, 'If he does scold me I can bear it better in the dark.'"

Amelius listened, wondering. Had he seen drowsily what he thought he had dreamed, or was there some mysterious sympathy between Sally and himself? These occult speculations were interrupted by Sally. "Won't you let me stay and rest a little?" she said. "May I take off my bonnet, and make myself tidy?" Some men might have said, "No." Amelius was not one of them.

The library possessed a door of communication with the sitting-room, the bedchamber occupied by Amelius being on the other side of the cottage. When Sally saw Toff's reconstructed room, she stood at the door in speechless admiration of the vision of luxury revealed to her. From time to time Amelius, alone in the library, heard her dabbling in her bath, and humming the artless old English song from which she had taken her name. Once she knocked at the closed door, and made request through it, "There is scent on the table; may I have some?" And once Toff knocked at the other door, opening into the passage, and asked when "pretty young miss" would be ready for supper. Events went on in the little household as if Sally had become an integral part of it already. "What *am* I to do?" Amelius asked himself. And Toff, entering at the moment to lay the cloth, answered respectfully, "Hurry up the young person, sir, or the salmi will be spoilt."

She came out from her room, walking delicately on her sore feet—so fresh and charming, that Toff, absorbed in admiration, made a mistake in folding a napkin for the first time in his life. "Champagne, of course, sir?" he said, in confidence to Amelius. The salmi of patridge appeared; the inspiriting wine sparkled in the glasses; Toff surpassed himself in all the qualities which make a servant valuable at a supper-table; Sally forgot the Home, forgot the cruel streets, and laughed and chatted as gayly as the happiest girl living. Amelius, expanding in the joyous atmosphere of youth and good spirits, shook off his sense of responsibility, and became once more the delightful companion who won everybody's love. The effervescent gayety of the evening was at its climax; the awful forms of duty, propriety, and good sense had been long since laughed out of the room—when Nemesis, a goddess of retribution, announced her arrival outside, by a crashing of carriage-wheels and a peremptory ring at the cottage-bell.

There was a dead silence; Amelius and Sally looked at each other. The experienced Toff at once guessed what had happened. "Is it her father or mother?" he asked of Amelius, a little anxiously. Hearing that she had never even seen her father or mother, he snapped his fingers joyously, and led the way on tiptoe into the hall. "I have my idea," he whispered. "Let us listen."

A woman's voice, high, clear and resolute (speaking apparently to the coachman), was the next audible sound. "Say I come from Mrs. Payson, and must see Mr. Goldenheart directly." Sally trembled and turned pale. "The matron," she said, faintly. "Oh, don't let her in!" Amelius took the terrified girl back to the library. Toff followed them, respectfully asking to be told what a "matron" was. Receiving the necessary explanation, he expressed his contempt for matrons bent on carrying charming persons into captivity by opening the library-door and spitting into the hall. Having relieved his mind in this way he returned to his master, and laid a lank, skinny forefinger cunningly along the side of his nose. "I suppose, sir, you don't want to see this furious woman?" he said. Before it was possible to say anything in reply, another ring at the bell announced that the furious woman wanted to see Amelius. Toff read his master's wishes in his master's face. Not even this emergency could find him unprepared; he was as ready to circumvent a matron as to cook a dinner. "The shutters are up and the curtains are drawn," he reminded Amelius. "Not a morsel of light is visible outside. Let them ring—we have all gone to bed." He turned to Sally, grinning with impish enjoyment of his own stratagem. "Ha, miss! what do you think of that?" There was a third pull at the bell as he spoke. "Ring away, Misses Matrone!" he cried. "We are fast asleep—wake us if you can." The fourth ring was the last. A sharp crack revealed the breaking of the bell-wire, and was followed by the shrill fall of the iron handle on the pavement before the garden-gate. The gate, like the palings, was protected at the top from invading cats. "Compose yourself, miss," said Toff; "if she tries to get over the gate she will stick on the spikes." In another moment the sound of retiring carriage-wheels announced the defeat of the matron, and settled the serious question of receiving Sally for the night.

She sat silent by the window when Toff had left the room, holding back the curtains and looking out at the murky sky. "What are you looking for?" Amelius asked.

"I was looking for the stars."

Amelius joined her at the window. "There are no stars to be seen to-night."

She let the curtain fall to again. "I was thinking of night-time at the Home," she said. "You see I got on pretty well in the day, with my reading and writing. I wanted so to improve myself. My mind was troubled with the fear of your despising such an ignorant creature as I am; so I kept on at my lessons. I thought I might surprise you by writing you a pretty letter some day. One of the teachers (she's gone away, ill), was very good to me. I used to talk to her; and, when I said a wrong word, she took me up, and told me the right one. She said you would think better of me, when you heard me speak properly—and I do speak better, don't I? All this was in the day. It was the night that was the hard time to get through—when the other girls were all asleep, and I had nothing to think of but how far away I was from you. I used to get up and put the counterpane round me, and stand at the window. On fine nights the stars were company to me. There were two stars, near together, that I got to know. Don't laugh at me—I used to think one of them was you, and one of them me. I wondered whether you would die, or I should die, before I saw you again. And, most always, it was my star that went out first. Lord, how I used to cry! It got into my poor, stupid head that I should never see you again. I do believe I ran away because of that. You won't tell anybody, will you? It was so foolish. I am ashamed of it now. I wanted to see your star and my star to-night. I don't know why. Oh, I'm so fond of you!" She dropped on her knees and took his hand, and put it on her head. "It's burning hot," she said, "and your kind hand cools it."

Amelius raised her gently, and led her to the door of her room. "My poor Sally, you are quite worn out. You want rest and sleep. Let us say good-night."

"I will do anything you tell me," she answered. "If Mrs. Payson comes to-morrow, you won't let her take me away? Thank you. Good-night." She put her hands on his shoulders, with innocent familiarity, and lifted herself to him on tiptoe, and kissed him as a sister might have kissed him.

Long after Sally was asleep in her bed, Amelius sat by the library fire, thinking.

The revival of the crushed feeling and fancy in the girl's nature, so artlessly revealed in her sad little story of the stars that were "company to her," not only touched and interested him, but clouded his view of the future with doubts and anxieties which had never troubled him until that moment. The mysterious influences under which the girl's development was advancing were working morally and physically together. Weeks might pass harmlessly, months might pass harmlessly—but the time must come, when the innocent relations between them would be beset by peril. Unable, as yet, fully to realize these truths, Amelius nevertheless felt them vaguely. His face was troubled as he lit the candle at last to go to his bed. "I don't see my way as clearly as I could wish," he reflected. "How will it end?"

How indeed!

CHAPTER XXXI.

AT eight o'clock the next morning, Amelius was awakened by Toff. A letter had arrived, marked "Immediate," and the messenger was waiting for an answer.

The letter was from Mrs. Payson. She wrote briefly, and in formal terms. After referring to the matron's fruitless visit to the cottage on the previous night, Mrs. Payson proceeded in these words: "I request you will immediately let me know whether Sally has taken refuge with you, and has passed the night under your roof. If I am right in believing that she has done so, I have only to inform you that the doors of the Home are henceforth closed to her, in conformity with our rules. If I am wrong, it will be my painful duty to lose no time in placing the matter in the hands of the police."

Amelius began his reply, acting on impulse as usual. He wrote, vehemently remonstrating with Mrs. Payson on the unforgiving and unchristian nature of the rules at the Home. Before he was half way through his composition, the person who had brought the letter sent a message to say that he was expected back immediately, and that he hoped Mr. Goldenheart would not get a poor man into trouble by keeping him much longer. Checked in the full flow of his eloquence, Amelius angrily tore up the unfinished remonstrance, and matched Mrs. Payson's briefly business-like language by an answer in one line: "I beg to inform you that you are quite right." On reflection, he felt that the second letter was not only discourteous as a reply to a lady, but also ungrateful as addressed to Mrs. Payson personally. At the third attempt, he wrote becomingly as well as briefly. "Sally has passed the night here as my guest. She was suffering from severe fatigue; it would have been an act of downright inhumanity to send her away. I regret your decision, but of course I submit to it. You once said you believed implicitly in the purity of my motives. Do me the justice, however you may blame my conduct, to believe in me still."

Having dispatched these lines, the mind of Amelius was at ease again. He went into the library, and listened to hear if Sally was moving. The perfect silence on the other side of the door informed him that the weary girl was still fast asleep. He gave directions that she was on no account to be disturbed, and sat down to breakfast by himself.

While he was still at table, Toff appeared with profound mystery in his manner, and discreet confidence in the tones of his voice. "Here's another one, sir!" the Frenchman announced, in his master's ear.

"Another one?" Amelius repeated. "What do you mean?"

"She is not like the sweet little sleeping miss," Toff explained. "This time, sir, it's the beauty of the devil himself, as we say in France. She refuses to confide in me; and she appears to be agitated—both bad signs. Shall I get rid of her before the other miss awakes?"

"Hasn't she got a name?" Amelius asked.

Toff answered in his foreign accent, "One name only—Faybay."

"Do you mean Phœbe?"

"Have I not said it, sir?"

"Show her in directly."

Toff glanced at the door of Sally's room, shrugged his shoulders, and obeyed his instructions.

Phœbe appeared, looking pale and anxious. Her customary assurance of manner had completely deserted her; she stopped in the doorway, as if she was afraid to enter the room.

"Come in and sit down," said Amelius. "What's the matter?"

"I'm troubled in my mind, sir," Phœbe answered. "I know it's taking a liberty to come to you. But I went yesterday to ask Miss Regina's advice, and found she had gone abroad with her uncle. I have something to say about Mrs. Farnaby, sir; and I'm afraid there's no time to be lost in saying it. I know of nobody but you that I can speak to, now Miss Regina is away. The footman told me where you lived."

She stopped, evidently in the greatest embarrassment. Amelius tried to encourage her. "If I can be of any use to Mrs. Farnaby," he said, "tell me at once what to do."

Phœbe's eyes dropped before his straightforward look as he spoke to her.

"I must ask you to please excuse my mentioning names, sir," she resumed, confusedly. "There's a person I'm interested in, whom I wouldn't get into trouble for the whole world. He's been misled—I'm sure he's been misled by another person—a wicked, drunken, old woman, who ought to be in prison if she had her deserts. I'm not free from blame myself—I know I'm not. I listened, sir, to what I oughtn't to have heard; and I told it again (I'm sure in the strictest confidence, and not meaning anything wrong), to the person I've mentioned. Not the old woman—I mean the person I'm interested in. I hope you understand me, sir? I wish to speak openly (excepting the names) on account of Mrs. Farnaby."

Amelius thought of Phœbe's vindictive language the last time he had seen her. He looked towards a cabinet in a corner of the room, in which he had placed Mrs. Farnaby's letter. An instinctive distrust of his visitor began to rise in his mind. His manner altered—he turned to his plate, and went on with his breakfast. "Can't you speak to me plainly?" he said. "Is Mrs. Farnaby in any trouble?"

"Yes, sir."

"And can I do anything to help her out of it?"

"I'm sure you can, sir—if you only know where to find her."

"I do know where to find her. She has written to tell me. The last time I saw you, you expressed yourself very improperly about Mrs. Farnaby—you spoke as if you meant some harm to her."

"I mean nothing but good to her now, sir."

"Very well, then. Can't you go and speak to her yourself, if I give you the address?"

Phœbe's pale face flushed a little. "I couldn't do that, sir," she answered, "after the way Mrs. Farnaby has treated me. Besides, if she knew that I had listened to what passed between her and you——" She stopped again, more painfully embarrassed than ever.

Amelius laid down his knife and fork. "Look here!" he said; "this sort of thing is not in my way. If you can't make a clean breast of it, let's talk of something else. I'm very much afraid," he went on, with his customary absence of all concealment, "you're not the harmless sort of girl I once took you for. What do you mean by 'what passed between Mrs. Farnaby and me?'"

Phœbe put her handkerchief to her eyes. "It's very hard to speak harshly to me," she said, "when I'm sorry for what I've done and am only anxious to prevent harm coming of it."

"*What* have you done?" cried honest Amelius, weary of the woman's inveterately indirect way of explaining herself to him.

The flash of his quick temper in his eyes, as he put that straightforward question, aroused

Digitized by Google

a responsive temper in Phœbe which stung her into speaking openly at last. She told Amelius what she had heard in the kitchen as plainly as she had told it to Jervy—with this one difference, that she spoke without insolence when she referred to Mrs. Farnaby.

Listening in silence until she had done, Amelius started to his feet, and, opening the cabinet, took from it Mrs. Farnaby's letter. He read the letter, keeping his back towards Phœbe—waited a moment thinking—and suddenly turned on the woman with a look that made her shrink in her chair. "You wretch!" he said. "You heartless, detestable wretch!"

In the terror of the moment, Phœbe attempted to run out of the room. Amelius stopped her instantly. "Sit down again," he said; "I mean to have the whole truth out of you, now."

Phœbe recovered her courage. "You have had the whole truth, sir; I could tell you no more if I was on my deathbed."

Amelius held up Mrs. Farnaby's letter, and shook it at her threateningly. "Do you mean to tell me you are not in this abominable conspiracy?" he asked.

"So help me God, sir, I never even heard of it till yesterday!"

The tone in which she spoke shook the conviction of Amelius; the indescribable ring of truth was in it.

"There are two people who are cruelly deluding and plundering this poor lady," he went on. "Who are they?"

"I told you, if you remember, that I couldn't mention names, sir."

Amelius looked again at the letter. After what he had heard there was no difficulty in identifying the invisible "young man," alluded to by Mrs. Farnaby, with the unnamed "person" in whom Phœbe was interested. Who was he? As the question passed through his mind, Amelius remembered the vagabond whom he had recognized with Phœbe in the street. There was no doubt of it now—the man who was directing the conspiracy in the dark was Jervy! Amelius would unquestionably have been rash enough to reveal this discovery, if Phœbe had not stopped him. His renewed reference to Mrs. Farnaby's letter and his sudden silence after looking at it roused the woman's suspicions. "If you're planning to get my friend into trouble," she burst out, "not another word shall pass my lips!"

Even Amelius profited by the warning which that threat unintentionally conveyed to him.

"Keep your own secrets," he said; "I only want to spare Mrs. Farnaby a dreadful disappointment. But I must know what I am talking about when I go to her. Can't you tell me how you found out this abominable swindle?"

Phœbe was perfectly willing to tell him. Interpreting her long, involved narrative into plain English, with the names of the persons added, these were the facts related: Mrs. Sowler (bearing in mind some talk which had passed between them on the occasion of a certain supper) had called at her lodgings on the previous day, and had tried to entrap her into communicating what she knew of Mrs. Farnaby's secrets. The trap failing, Mrs. Sowler had tried bribery next; had promised Phœbe a large sum of money, to be equally divided between them, if she would only speak; had declared that Jervy was perfectly capable of breaking his promise of marriage, and "leaving them both in the lurch, if he once got the money into his own pocket"; and had thus informed Phœbe that the conspiracy which she supposed to have been abandoned was really in full progress, without her knowledge. She had temporized with Mrs. Sowler, being afraid to set such a person openly at defiance, and had hurried away at once to have an explanation with Jervy. He was reported to be "not at home." Her fruitless visit to Regina had followed—and there, so far as facts were concerned, was an end of the story.

Amelius asked her no questions, and spoke as briefly as possible when she had done. "I will go to Mrs. Farnaby this morning," was all he said.

"Would you please let me hear how it ends?" Phœbe asked.

Amelius pushed his pocketbook and pencil across the table to her, pointing to a blank leaf on which she could write her address. While she was thus employed, the attentive Toff came in, and (with his eyes on Phœbe) whispered in his master's ear. He had heard Sally moving about. Would it be more convenient, under the circumstances, if she had her breakfast in her own room? Toff's astonishment was a sight to see, when Amelius answered, "Certainly not. Let her breakfast here."

Phœbe rose to go. Her parting words revealed the double-sided nature that was in her; the good and evil in perpetual conflict which should be uppermost.

"Please don't mention me, sir, to Mrs. Farnaby," she said. "I don't forgive her for what she's done to me; I don't say I won't be even with her yet. But not in *that* way! I won't have her death laid at my door. Oh, but I know her temper—and I say it's as likely as not to kill her or drive her mad, if she isn't warned about it in time. Never mind her losing her money. If it's lost, it's lost, and she's got plenty more. She may be robbed a dozen times over for all I care. But don't let her set her heart on seeing her child, and then find it's all a swindle. I hate her; but I can't and won't let *that* go on. Good-morning, sir."

Amelius was relieved by her departure. For a minute or two he sat absently stirring his coffee, and considering how he might most safely perform the terrible duty of putting Mrs. Farnaby on her guard. Toff interrupted his meditations by preparing the table for Sally's breakfast; and, almost at the same moment, Sally herself, fresh and rosy, opened her door a little way, and looked in.

"You have had a fine long sleep," said Amelius. "Have you quite got over your walk yesterday?"

"Oh, yes," she answered, gayly; "only I feel my long walk now in my feet. It hurts me to put my boots on. Can you lend me a pair of slippers?"

"A pair of my slippers! Why, Sally, you would be lost in them! What's the matter with your feet?"

"They're both sore. And I think one of them has got a blister on it."

"Come in, and let's have a look at it?"

She came limping in, with her feet bare. "Don't scold me," she pleaded. "I couldn't put my stockings on again, without washing them; and they're not dry yet."

"I'll get you new stockings and slippers," said Amelius. "Which is the foot with the blister?"

"The left foot," she said, pointing to it.

(*To be continued.*)

ST. PATRICK'S CATHEDRAL.

DEDICATION OF THE MAGNIFICENT EDIFICE.

(*Continued from page 225.*)

The episcopal throne is placed on the north side of the sanctuary, is approached by three steps, and is an imposing and beautiful object of art. It is over sixty feet high, and is composed of oak, elaborately carved and gilded. The upholstery is of crimson velvet, and the whole is surmounted by a canopy.

The baptismal font is of Caen stone, and stands about four and a half feet high. It consists of an octagonal basin of some three feet diameter, supported on a carved pedestal. The eight sides are formed into panels about a foot deep, on which are graven, in high relief, appropriate Scriptural incidents, such as the Baptism in the Jordan of Christ and the children. Its position is on the north side, not far from the altar of the Blessed Virgin.

The marble altars are so exquisite in design and in finish that the eye never tires in viewing them, and in the varied and beautiful stained glass windows there is an ever-changing relief from the vast space of the edifice. Four altars have been already erected, and there are spaces in the walls on either side of the building for ten more. The four altars already erected cost over $100,000. There are in all seventy windows, of which thirty-seven are figured, representing scenes from Scripture and from the lives of the Saints, and twenty have cathedral-stained glass, the figures being only geometrical. The remaining windows are filled with white glass, these being needed for the lighting of the building. The six-bayed window over the south transept door is what is called a storied-window, as it tells the story of a life in the scenes it pictures. It is the titular window of the Cathedral, and represents eighteen scenes in the life of St. Patrick. In the centre of the tracery is the scene of St. Patrick's coronation in heaven—a beautifully executed piece of work. Each of the figured windows is the gift of some church in the diocese, the name of which is inscribed at the base.

The grand organ of the Cathedral, built by George Jardine & Son, is one of the largest, and one of the most powerful, organs in the world, and really consists of *five* large organs all combined, forming one immense instrument, any one of which would be ample enough to fill a large church. The "great" organ contains many new stops (among which are the "Doppel flute" and "English horn," sixteen feet tone), and forms the groundwork of the immense superstructure of chorus and solo stops by its mighty diapasons, which are the finest ever made. The "choir" organ contains solo stops of a sweet character, among which is the new and really beautiful "saxophone." The "swell" organ is particularly fine in its effective diminuendo and crescendo, and contains the wonderful "Vox Humana," also a chime of thirty-two bells. The "pedal" organ furnishes the deep bass of the whole work, and pervades the Cathedral with its thunder-tones. The "Orchestral," or *fifth* organ, is the new and most wonderful feature, containing the "tuba mirabilies," "trombone," "flute à pavillon," "French horn," all of eight feet tone, and a "Bombarde and Pasaune" of sixteen feet tone, making in all seventy stops and combinations, and five thousand pipes. The touch is made easy by "Jardine's Patent Pallet." The value of the organ is $30,000.

THE QUEEN'S BIRTHDAY IN MONTREAL.

HER BRITANNIC MAJESTY, Queen Victoria, closed the sixtieth year of her age on Saturday, May 24th, and the event was appropriately commemorated wherever in Christendom a loyal Briton was located. In Canada the celebration was particularly imposing, additional zest being given the usual programme by the participation in the rejoicings of a dearly beloved member of Her Majesty's personal family. The demonstrations in Montreal had a special interest to Americans because of the part borne in a sham battle by a representative body of our citizen soldiery—the Thirteenth Regiment of the National Guard, State of New York, located at Brooklyn.

The regiment—537 strong—left its armory on the night of Thursday, May 22d, and, proceeded direct to Lachine, where a boat was waiting, with a suitable military escort, to take the regiment down the rapids of the St. Lawrence. Sailing down the river under the Victoria Bridge, the regiment came in view of ten thousand persons awaiting their arrival in front of the ancient Bonsecours Market. The Canada militia were drawn up in a line on the pier, and as the regiment's band played "God Save the Queen" the Canadians uncovered their heads, and when the tune was played sent up loud cheers. The shipping streamed with flags, and the Stars and Stripes were everywhere in the ascendant. The Thirteenth formed line upon the wharf, and when the staff officers were called from their position on the right to the front and centre, Chaplain Beecher, with his sword drawn, marched to a central position with the rest of the staff. Then Mayor Rivard of Montreal advanced to the front of the Thirteenth and presented to that regiment a beautiful silk flag made by the nuns of the Hochelaga Convent, on one side of which were the Stars and Stripes, and on the other the Dominion flag, richly embroidered. The Mayor read an address, welcoming the regiment, to which Chaplain Beecher responded. The regiment was then escorted to its quarters, the Victoria Skating Rink, in the rear of the Windsor Hotel, where the Marquis of Lorne and the Princess Louise had taken apartments for the celebration. Early on Saturday morning the regiment left its quarters to participate in the grand review and the sham-battle, in which, by pre-arranged courtesy, they successfully attacked the position of the Canadian troops, drove the militia away, and occupied their works. The sham-fight over, English roast beef was served to the conquering Americans, and 3,500 persons joined in the meal, which was presided over by the Mayor of Montreal. On Sunday Chaplain Beecher preached a sermon before the troops and an immense audience. In the evening the regiment started for home, making a parade in Hartford, under the escort of the First Regiment of the National Guard of Connecticut; in New York, accompanied by the Ninth Regiment and separate troop of calvary, and in Brooklyn with the Fourteenth and Twenty-Third Regiments.

Our illustration shows the Thirteenth Regiment passing along St. James Street, in front of the Notre Dame Cathedral, on the 23d.

SCIENTIFIC INTELLIGENCE.

A Respirator for the use of men employed in white-lead works has been found to diminish the number and the severity of cases of lead poisoning.

The So-called "Parallel Roads" found in many parts of the world, but which are especially characteristic of Scandinavian coast scenery, are said by Dr. Lehmann to be due exclusively to breaker action.

The Small Bronze Turbines used in the St. Gothard tunnel, which make 155,000,000 turns per annum, after four or five years' service, require but slight repairs. Turbines of iron and steel, under the same pressure, do not last over a year.

During the Past Year, 1878, Herr Fuchs states that the number of volcanic eruptions over the world reached the unusually high number of twelve; that they were at places far apart, and were mostly from little known and inaccessible volcanoes.

Several of the Conseils Generaux of the surrounding departments have voted funds for the erection of an observatory on the top of Mont Ventoux, in Vaucluse. It will be the third high meteorological station in France, and very likely not the last. M. Ferry, the Minister of Public Instruction, is favorable to the erection.

The Death of the Ape named Maioka, in the Dresden Zoological Gardens, has enabled the German naturalists to settle the vexed question of its true character. Many zoologists expressed the opinion that it was a gorilla, but an examination of the structure of the skeleton leaves no doubt that Dr. A. B. Meyer was right in regarding it as a chimpanzee.

M. Delbœuf has found that if a person afflicted with Daltonism (color-blindness) looks through a layer of rosoline in solution his infirmity disappears. A practical application of this discovery has been made by M. Javal, by interposing between two glasses a thin layer of gelatine previously tinted with rosoline. By looking at objects through such a medium all the difficulties of color-blindness are said to be corrected.

The Council of the British Society of Arts have awarded to Sir William George Armstrong, C.B., D.C.L., F.R.S., the Albert Medal, "because of his distinction as an engineer and as a scientific man, and because by the development of the transmission of power, hydraulically, due to his constant efforts, extending over many years, the manufactures of England have been greatly aided and mechanical power beneficially substituted for most laborious and injurious manual labor."

Last May the phenomenon called "blood rain" occurred in the Jebel Sekra, a summit of the Rif, at the western extremity of the Atlas range in Morocco. Professor Brun, of Geneva, has given an account of his observations of the wonder-producing circumstance. The "rain" appeared on the rocks in the form of bright red spots. It consisted of a mixture of siliceous sand and very fine lime, with abundance of unicellular algæ of the species *protococcus fluviatilis*, and containing a large proportion of peroxide of iron.

The Source of Camphor.—Camphor is the solid fat of a volatile oil, and is found in Formosa, Japan, and some parts of the Malay Archipelago. The tree from which it is obtained is said not to be known on the mainland of China. The camphor-producing tree of the Malay Archipelago differs from that growing in Formosa and Japan, and, in addition to the crude camphor, produces a valuable medicinal gum, known to merchants as camphor baroos. The Formosa tree, on the contrary, does not produce this gum.

Attention has been lately directed to a much-neglected timber-tree—the ailanthus. Experiments made in Toulon in the French dockyard showed that in an average of seven tensile tests the ailanthus broke with a weight of 12,136 pounds; the elm yielded to 84,707 pounds, and the oak broke under a weight of 43,434 pounds. The wood is at first of a pale straw color, but grows somewhat darker with age, and takes a high polish. For cabinet-making and indoor work its silver grain and satiny lustre are very pleasing; as regards freedom from warping and shrinking, it is said to be superior to walnut, and fully equal to mahogany.

Experiments on Catalepsy.—In a recent series of demonstrations at the Retreat for the Insane in Paris, Professor Charcot has shown that it is possible to produce in one subject a state of catalepsy on one side of the body and a simultaneous state of lethargy on the other. The patient is first thrown into catalepsy by looking at the electric light (in this state the limbs are supple and will retain any position one chooses to give them). To produce the state of lethargy or somnambulism on one side, it is sufficient to close the corresponding eye, or shut off the light with a screen; the two states are then co-existent on the two sides of the body.

Briar-Root Pipes.—Much of the wood used for making the so-called briar-root pipes is derived, it appears, from Corsica. The white heath, or *bruyère*—of which "briar" is a corruption—grows in great luxuriance and very abundantly among the trees and shrubs which form what is called the "maquis" covering the mountain sides. In the course of the last few years, since briar-wood pipes have become such a large article of trade, the heath-trees have formed a source of lucrative industry. The roots are dug up and cut into rough forms of tobacco-pipes by circular saws worked by the water-power of the mountain streams. The pieces, when cut up, are sent abroad in sacks, to be eventually manufactured into briar-root pipes.

At a Recent congress of physicians who make a specialty of complaints of children, held in Berlin, Dr. Winckel described a new and mysterious disease which has broken out in Dresden, and which is so fatal that out of twenty-three cases treated nineteen died. The first symptoms are difficult respiration and froth on the lips, and the most singular feature of the complaint is an extraordinary change in the blood, which becomes of a dark brown color and of a syrup-like consistence, and will only flow from a wound under strong pressure. Convulsions soon set in, and the child dies in about thirty-two hours from the beginning of the attack. Dr. Winckel proposed to call the complaint "Cyanosis sfebrilis isterica perniciosa cum hæmoglobinæmia," but the president of the congress suggested the shorter and more sensible title of Winckel's Disease.

PERSONAL GOSSIP.

SENOR CASTELAR goes to London this month to receive from Oxford University the degree of Doctor of Laws.

J. B. KIMBALL, Chief Engineer United States Navy, died at the Pensacola Navy Yard, May 18th, of peritonitis.

M. HESSIADETZKI, the German physician, has suggested that it be officially declared that the plague has completely ceased in Russia.

THE Empress of Germany has, through Professor Langenbeck, offered a prize for the best treatise on diphtheria that shall be published within a year.

THE Rev. Dr. Brown, of Hamilton College, has been chosen a delegate from this country to the Evangelical Alliance Meeting at Basle in August.

IT is reported in London that Monsignor Capel is coming to the United States on a lecturing tour, during which he will "preach in aid of his pet scheme of higher Catholic education."

JAMES B. NICHOLSON, formerly Harbor Master of New York, a Commissioner of the Board of Charities and Correction, and a trustee of Bellevue Medical College, died on May 17th, after a lingering illness.

THE death is announced, at the age of seventy-four, of the Rev. Professor Isaacs, long minister of a Manchester synagogue, and said to have been the first Jewish preacher in England who preached in English.

THE Duchess of Edinburgh is visiting all the London Theatres and makes herself very gay and gracious in society, by way of atoning for the cold and haughty manner she at first exhibited in England, to her great loss of popularity.

PIO NONO'S two nephews have summoned Cardinals Monaco Lavalletta, Martel and Simeoni before the tribunals to render an account of the inheritance, the efforts of Leo XIII. to avoid scandal and bring about a compromise having failed.

MISS MONELER, of Chicago, has won a position as assistant physician in the County Insane Asylum, by her success in a competitive examination. This is the first case in which a woman has obtained a hospital position where both sexes have entered into competition.

M. HENRI MARTIN will be formally received into the French Academy on the 29th inst., when M. Emile Olivier will reply to his eulogy of Thiers. Jules Barbier, the author of the libretto "Faust," is a candidate for the *fauteuil* rendered vacant by the death of M. Saint Rene Taillandier.

FATHER GIOVANNI, the famous Italian tenor, has become immensely fat, and continues to draw wonderful crowds to the Roman churches whenever he sings. To keep him in the church and from accepting the offers of operatic managers, it is said that he has been given a more than princely salary.

THE Supreme Court of Pennsylvania has decided a second suit sustaining the position of the Rev. George H. Stewart, who was suspended by the General Synod of the Reformed Presbyterian Church for hymn-singing and communing with other Evangelical churches, and condemned the action of the Synod.

ON the occasion of the golden wedding of the German Emperor there will be an amnesty granted to about one thousand non-political prisoners. Political prisoners, on the other hand, will not be pardoned in any single instance. This excludes Count Harry von Arnim and the fugitive bishops from the benefits of the amnesty.

MR. J. G. HILL, Supervising Architect of the Treasury Department, who has been suspended since December 5th last, on account of charges in connection with the construction of the Chicago Custom House, and who was recently acquitted by the court of that city, returned to Washington on May 22d, and was at once restored to duty by the Secretary of the Treasury.

MR. WILLIAM HUNTER, Second Assistant Secretary of State, celebrated the fifty-fifth anniversary of his entry into the service of the Government as an employé of the State Department on May 22d. As a mark of respect from his associates in the department, his desk was handsomely decorated in the morning and a banquet was given in his honor at night. The President and many foreign representatives and public officers called upon him during the day.

A CURIOUS London benevolent society is the Kyrle, of which the Princess Louise and Prince Leopold are president and vice-president. The object is an exceedingly simple one. The members are principally tourists, who pledge themselves to send to the treasurer, Miss Octavia Hill, all small objects of interest they may collect on their travels. These articles are distributed in the hospitals, workhouses and public schools.

REV. JAMES EELLS, D.D., of California, who was Moderator of the Presbyterian General Assembly in 1877, has been elected to the chair of Sacred Rhetoric and Pastoral Theology in Lane Theological Seminary at Cincinnati, the chair left vacant by the death of Dr. Henry Smith. Dr. Eells is a graduate of Hamilton College and Auburn Theological Seminary. He was pastor of a church in Brooklyn for some years, beginning in 1859.

THE Victoria Crosses awarded in Zululand are to Lieutenants Chard and Bromhead, and to Privates John Williams, Henry Hook, William Jones, Robert Jones and Frederick Hitch and Corporal William Allen, for saving the sick and wounded in the burning hospital. Williams and Hook, in particular, after the Zulus had broken in, smashed holes in four partitions and dragged through these and out of a small window eight invalids, one man working while the other with the bayonet kept off the savages.

THE Baroness Burdett-Coutts has had some pretty things from Turkey. The Sultan has sent her two antique vases, a magnificent Turkey carpet, and the new Order of "Charity," which he has instituted to acknowledge the great services rendered by English and Turkish ladies to the multitudes of homeless wanderers who would have perished but for a little aid. The Order is an exceedingly artistic decoration set with diamonds, emeralds and rubies. An autograph letter accompanied it, both being brought to the Baroness by the Turkish Ambassador.

THE Archduchess Marie Christine Désirée Henriette Félicité Rénière of Austria, who is to be the second queen of Alfonso XII. of Spain, is the only daughter of the Archduke Charles Ferdinand of Austria (who died the 20th of November, 1874), by his marriage with the Archduchess Elizabeth, the widow of Archduke Ferdinand Charles Victor of Modena. She was born on the 21st of July, 1858, and is consequently in her twenty-first year. The alliance does not seem to have been seriously entertained at Madrid until the condition of the Infanta Marie Christine had been pronounced hopeless; but from more than one point of view it must be considered a far more suitable match for the king than the one with his deceased wife's sister. The Austrian Princess is a few months younger than the king, whereas the Duc de Montpensier's second daughter was more than five years his senior, having been born on the 29th of October, 1852. Her death has now left the Montpensier family without a marriageable daughter.

THE CHINESE IN SAN FRANCISCO.

IN our last issue we published illustrations of the laundry at the Palace Hotel at San Francisco, and spoke of the large number of Chinamen engaged in this kind of work. This week we conclude this series, and introduce another feature of the "cheap labor" of the Mongolians.

If more Chinamen are employed in the laundry business than in any other in this country, the next largest class are found operating barber-shops. In San Francisco, on Dupont Street, between Sacramento and Clay Streets, there are fifty basement apartments devoted to shaving and hair-cutting. At first thought the wonder arises why so many such establishments are required, but when the heads of the passing Chinamen are counted, and it is remembered that each head has to be shaved at stated intervals, the mystery is dispelled. All the barber-shops of the Chinese have a peculiar sign at the doorway indicative of the business. It is a four-legged frame, with the legs painted green and the top-knots red. On all the streets in Chinatown these signs are seen every few steps.

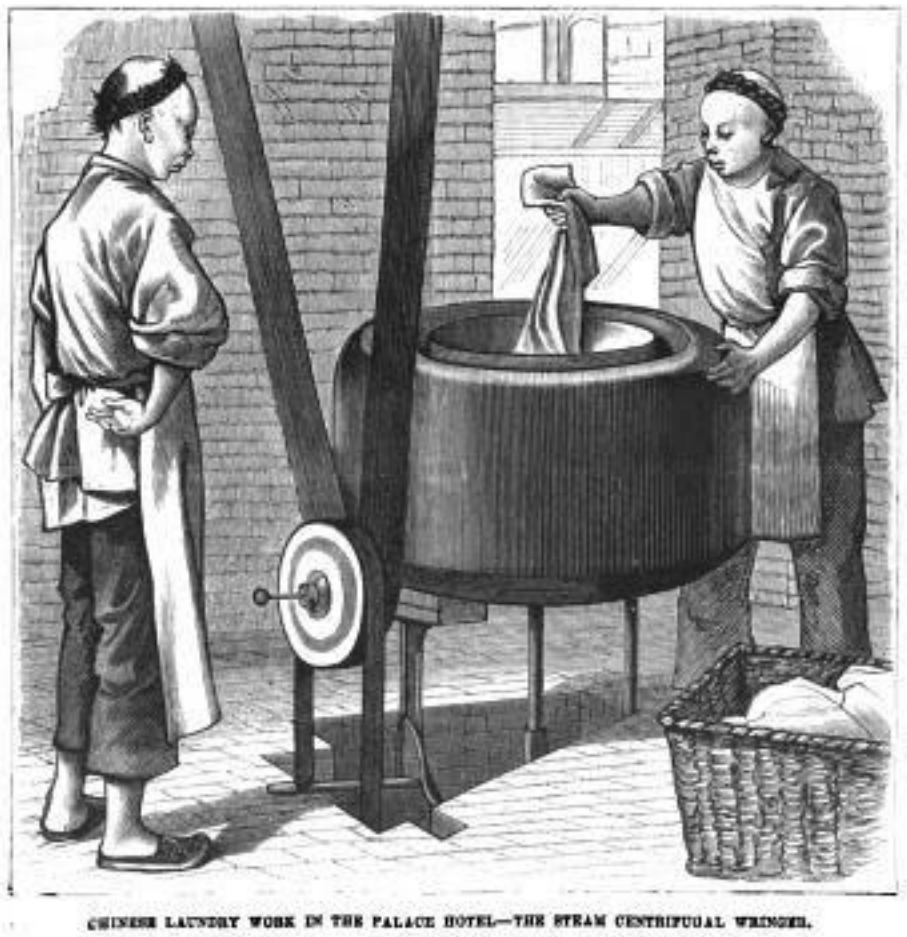
Among the Chinese no toilet is considered complete which does not involve the shaving of a greater portion of the head and neck, a thorough cleansing of the eyes, ears and nostrils, and, in the case of fastidious natives, a trimming and pencilling of the eyebrows and lashes. Razors, probes and lances of peculiar construction are among the instruments used in the work. The process of shaving and cleansing is necessarily a long one, and the combing and braiding of the queue consumes no little time.

Besides the mere shaving and scrubbing of the head and neck, the high-toned Chinaman demands that the closely-shaven head shall also be scraped, giving it the appearance of having been sand-papered, to use a Western expression. It will thus be seen that such slow and elaborate work, necessary to many thousand persons, requires a large number of shops and skilled operatives.

CHINESE LAUNDRY-WORK IN THE PALACE HOTEL—THE STEAM MANGLE.

KENTUCKY'S CAVE REGION.

THE GRAND CRYSTAL AVENUE CAVE.



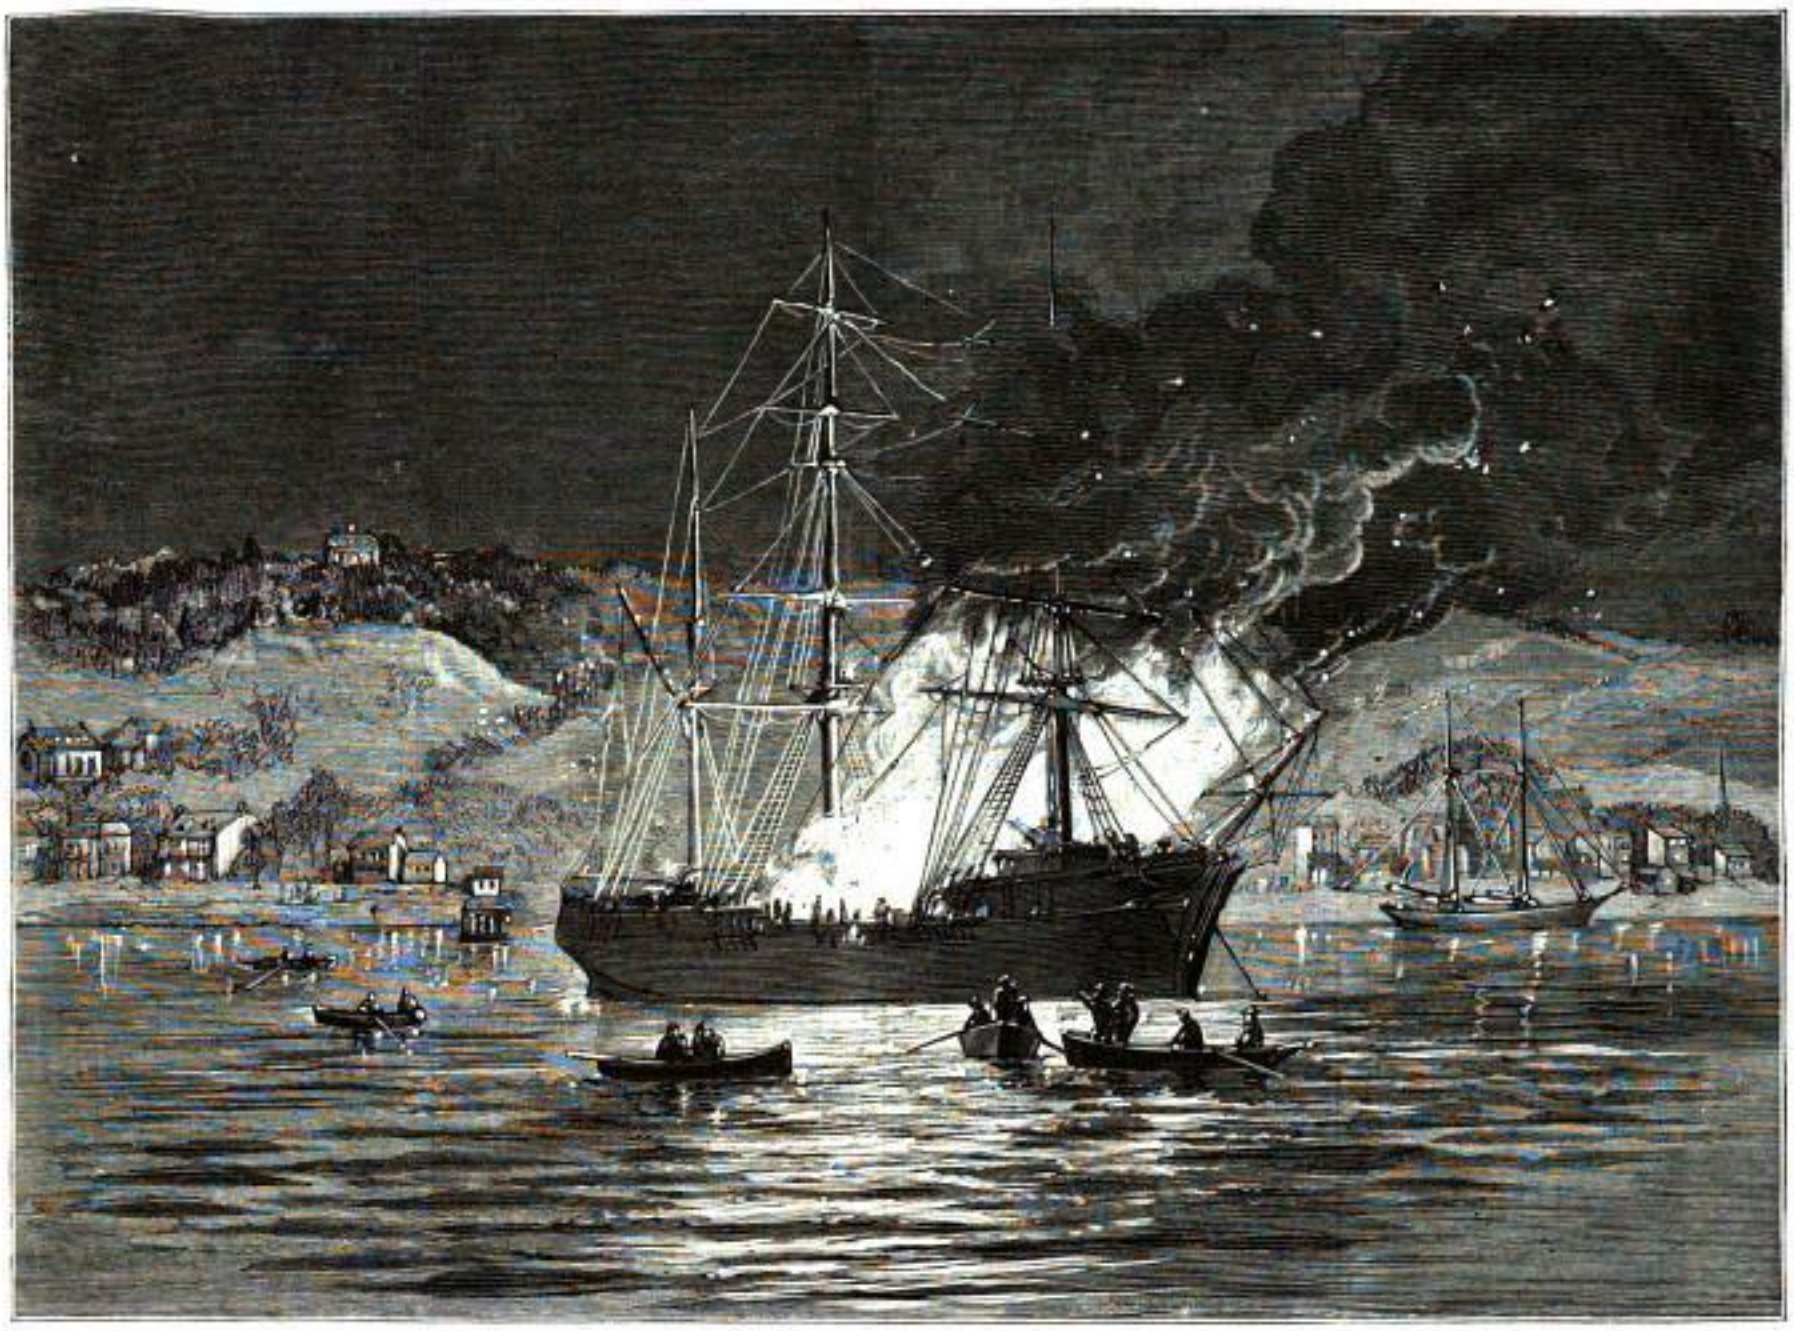
THE wonderful caves of Kentucky—as famous as the Pyramids of Egypt—are all located in the immediate vicinity of Glasgow Junction, Barren County, ninety miles south of Louisville, on the line of the Louisville and Nashville Railroad. There are, in all, thirty-six caves. Many of them, of course, are very small and uninteresting compared with others of greater note, but it is a significant fact that they are all in the same locality, and that nowhere else in Kentucky or in the United States, except perhaps in Virginia, are any such wonderful caves to be found. There are hundreds of theories as to their origin—they are theories only, mere speculations. There is every appearance, however, that the country in the vicinity of Glasgow Junction was at a remote period the scene of volcanic eruptions and violent upheavals of the earth. The topographical features of the country are remarkable in the extreme. There are no running streams on the earth's surface. The waters pass into great circular depressions, evidently craters of extinct volcanoes, and are lost for ever. The earth's surface is but a series of these wonderful craters, around which great, loose rocks are to be seen, just as they were thrown out by the great forces below, and the yawning chasms and bottomless pits of these basins tell the tale of upheaval. Great loose rocks encircle all of them. The region is one of utter hollowness. It is impossible to procure spring water or running water of any kind; cistern water is used exclusively, except in some cases where these basins are cemented that water may be collected for cattle.

Edmonson County, in which all the caves are located, is wild in the extreme. Glasgow Junction is just over the line in Barren County. Brownsville, the county seat of Edmonson County, is sixteen miles from the railroad at Glasgow Junction, and the extreme wildness of the region may be inferred when we state that there is only one small country store in Brownsville—the county seat—and the Court House, with one or two dwelling-houses. The people are isolated almost entirely from the world, and live in a little wild world of their own. Glasgow Junction—the town nearest the caves—is but a long, straggling village, with two general stores, a drug-store, shoe-shop, saddler-shop, two barrooms and a first-class hotel.

The newly-discovered Grand Crystal Avenue Cave is located in the immediate vicinity of Glasgow Junction. It was known as a small cave as early as 1806, when it was used by manufacturers of saltpetre. The remains of the old hoppers used in dripping the clay can still be seen near the mouth of the cave, about which spot, in the year 1815, workmen found the mummy now in the rooms of the Antiquarian Society at Worcester, Mass. Owing to obstructions in the shape of huge rocks the cave was explored but a short distance until June, 1878, when Mr. J. R. Puckett and a few other daring explorers penetrated its mysteries by crawling several hundred yards between fallen rocks and then emerging in an avenue at least sixty feet wide. Following it for about a mile, they discovered an immense room, in dimensions about one hundred yards in width by about one hundred feet in height, and tapering out in length into an avenue, a continuation of the one they had been traversing. The beauties of this chamber are simply indescribable. It is called the Crystal Chamber, and is well named. The most beautiful and fantastic formations imaginable are here to be seen, all in clusters of crystal. At a distance of about three miles, in a very picturesque spot, six mummies were found on a ledge of rocks. They were reposing in stone coffins rudely constructed, and presented every appearance of the Egyptian mummies. Three of the mummies were male and three of them female. Mr. W. Edwin Mortimer, who resides at No. 209 Floyd Street, Louisville, Ky., purchased two of them; Mr. J. R. Puckett, a capitalist of Glasgow Junction, purchased two, and Joseph Mulbastan the remaining two. Our illustrations are furnished by the latter gentleman.

Continuing their explorations a few days afterwards, the party came to a wide, deep river, about four miles from the orifice of the cave. Returning, they enlarged the entrance by blasting and removing the huge rocks, and were, a few days later, enabled to carry two boats to the newly-discovered river. Measuring the distance subsequently, it was found that they could navigate the main river—named Wonder River—for a distance of six miles, and two other rivers for a distance of eight miles, making, in all, fourteen miles of navigable river in the cave.

The scenery along the river beggars description. It is but a series of the most beautiful forma-



CHINESE LAUNDRY WORK IN THE PALACE HOTEL—THE STEAM CENTRIFUGAL WRINGER.

SHAVING, CLEANSING AND SCRAPING HEADS IN A BASEMENT BARBER-SHOP.

CALIFORNIA.—PHASES OF CHINESE LABOR IN SAN FRANCISCO.—FROM SKETCHES BY H. A. OGDEN.

STATEN ISLAND.—EXPLOSION OF PETROLEUM ON BOARD THE BARK "AMALFI," OFF TOMPKINSVILLE, MAY 20TH.—FROM A SKETCH BY FRED. B. COZZENS.

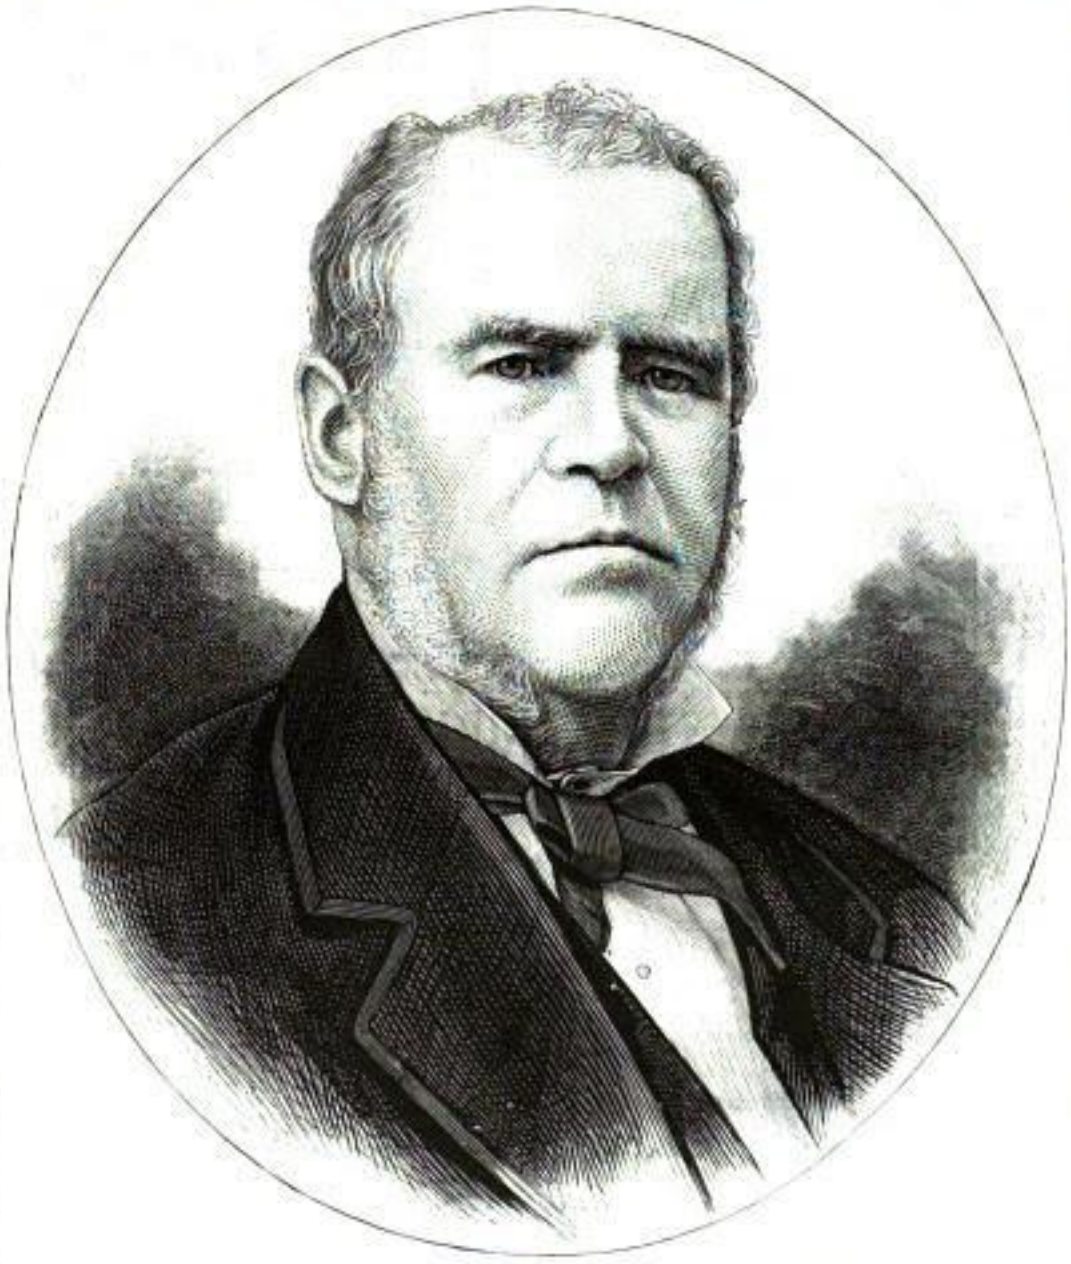
tions — sparkling like diamonds; pillars of pure alabaster, walls on either side averaging in height about one hundred feet. In width the river is about sixty feet, and in depth about sixteen feet. Mr. Puckett is now engaged in building a small steamboat to navigate these wonderful subterranean rivers. This is practicable, but it will be necessary to construct the boat in the cave four miles from its mouth, on the banks of Wonder River, there being no way of egress to the outer world by the rivers. They flow, no one yet knows where. Visitors to the cave will be obliged to walk four miles underground, amidst the most wonderful scenery imaginable, before they can embark on one of the most wonderful voyages of the age.

This newly discovered cave undoubtedly far surpasses in grandeur the Mammoth Cave, or any cave heretofore discovered, and is worthy the attention of scientists all over the world. The discovery of the mummies is certainly very important, as they evidently belong to a pre-historic race of intelligent and well-developed human beings. The features of the female, especially, have a fine, intelligent, refined cast, beautiful even thousands of years after the visit of the destroying angel.

Mr. Larkin J. Proctor, of Glasgow Junction, is the fortunate owner of the cave, and he may, from its sale, some day realize a large sum. As it is now, visitors are entirely welcome to inspect its wonders, no cave fees being charged as in the Mammoth Cave. A great camp-meeting of the Southern Methodist brethren will be held this Summer in and about the caves.

TERRIFIC EXPLOSION

Of a Vessel Laden with Petroleum — The Crew Saved by a Pet Dog.



THE Italian bark *Amalfi*, 400 tons burden, loaded with 2,200 barrels of refined petroleum, was burned to the water's edge off Tompkinsville, Staten Island, early on the morning of May 20th. When the fire broke out the crew were asleep, but the captain was awakened by a pet dog, and as speedily as possible gave the alarm to the crew, who, almost naked, leaped into a boat and rowed hastily for the shore. They had barely rowed a furlong when a terrific explosion occurred. The decks were shattered, but the masts stood, and the hull was comparatively unbroken. At that time in the morning the clouds overhead were of an inky blackness, and the light of the burning ship made a grand display.

Nearly everybody in the village of Tompkinsville, and on the shores for many miles, was watching it. A correspondent says of the explosion itself: "A volume of red flame shot up from the hold of the vessel, carrying with it portions of the decks, implements, and lower rigging. It mounted higher than the topmast, and scattered burning fragments in all directions. These were mirrored in the water as they were falling. The flames leaped from rope to rope in the rigging, and in an instant almost the entire rigging was afire. The small ropes looked like threads of flame. The cords with which the furled sails had been made fast were burned off, and the sails unfurled themselves. Then the flames caught them and burned them till they rose on the heated air and were broken into charred fragments. These floated away on the wind like dry leaves over a forest fire.

"All of this—the volume of flame bursting from the vessel's hold, the burning rigging and the flying cinders—was mirrored in the black water, forming such a picture as is never seen except when a full-rigged vessel burns on the water at night. The spars and ropes of the ships lying near seemed to be gilded by the light from the burning bark. You could see the men leaning on the rails of those ships and watching the flames. The light was so brilliant that one could see to read a newspaper on the landing. The faces of the crowds along the shore were as clearly discernible as they would have been by day.

"The smaller portions of the rigging were quickly consumed, and only the thicker were left. The foremast was the last to fall. Something about the truck seemed to prevent the flames from climbing over it; but at last they caught above, and soon the mast went over. The burning sides of the vessel curled up in brands and dropped into the water, and then floated away on the tide. The vessel burned down to the water-mark."

The dog that warned the captain and crew just in time to enable them to escape being blown into the air by the explosion was himself hoisted to an unpleasant height when she blew up. He came to the surface after he fell, and climbed on some planks that were floating near him. He drifted close to another craft and was taken on board. Subsequently the captain recovered him. The ship's crew saved only the garments in which they had been sleeping. The origin of the fire is unknown. The estimated value of the cargo is something over $10,000, for which sum it was insured.

HON. WILLIAM HUNTER, SECOND ASSISTANT SECRETARY OF STATE.—FROM A PHOTOGRAPH BY BRADY.

THE HON. WILLIAM HUNTER.

ON Thursday, May 22d, this venerable public official celebrated the fiftieth anniversary of his entrance into the Department of State at the national capital. His first service in our Foreign Office was as translator, beginning in 1829. Since then he has remained in various positions under the different Secretaries, starting under Martin Van Buren, in that year, following John Forsythe; Daniel Webster, in 1841; James Buchanan, in 1845; John M. Clayton, in 1849; William L. Marcy, in 1853; Lewis Cass, in 1857; William H. Seward, in 1861; Hamilton Fish, in 1869, and William M. Evarts, in 1877, until now he is the Senior Assistant Secretary of State. All the Secretaries of State under whom he was a subordinate have passed away, with the exception of Hamilton Fish, Elihu B. Washburne, Jeremiah S. Black and William M. Evarts. Mr. Hunter has had intimate relations with such British Ministers as Hon. Charles Richard Vaughan, who succeeded Sir Stratford Canning, afterwards the eminent British Minister at Constantinople, who came to Washington in 1820, and left in 1823. Mr. Vaughan remained until 1839,

Digitized by Google

and was followed by Henry Stephen Fox, who remained as British Plenipotentiary from 1836 to 1844, and was in turn succeeded by Lord Ashburton, Right Hon. Richard Pakenham, Sir Henry Lytton Bulwer, Mr. Crampton, Earl of Elgin and Kincardine, Lord Napier, Lord Lyons, Sir Frederick Bruce, the present Sir Edward Thornton, and the great English statesman, Earl De Grey and Ripon, Sir Stafford H. Northcote, Sir John A. McDonald, Montague Bernard, Lord Tenterden, of the High Joint British Commission, who, in February of 1871, came to the country to settle the differences between the United States and Great Britain. Mr. Hunter, who is a fine linguist, speaking French, German, Spanish and Italian, with equal facility, met the French plenipotentiaries of his day and time, and the Spanish, including the celebrated Calderon de la Barca and his accomplished wife; and the Prussians or Germans, including the old dean of the foreign legations, Baron Gerolt, who spent altogether nearly twenty-four years as minister resident and minister plenipotentiary of his country at the American capital; also, the Russian notabilities, including Bodisco and Stoeckl and Catacazy. Mr. Hunter was seventy-three years old last November.

A Lucky Russian Hatter.

In connection with the attempt made the other day upon the life of the Czar, it may not be uninteresting to call to mind a rather absurd *mal entendu* which took place years ago. In April, 1866, a student, by name Karakosoff, fired on His Majesty in the Summer Gardens. It was supposed—how the story got about nobody ever really knew—that a certain hatter, named Komissaroff, had saved the Imperial life, whereas, as a matter of fact, chancing to be near the sovereign at the moment the attempt was made, he had simply fainted from sheer fright. General Todleben happened to be in the Gardens at the same time, and hearing that the man lying insensible in the path had saved the Czar's life, he gave orders to have him taken care of and most preciously looked after. General Souwaroff, Governor-General of St. Petersburg, then heard of this worthy and sent for him. The poor man, still dazed with fright, of course answered the summons; but imagine his astonishment when he was presented to the sovereign, who stood in one of the reception rooms of the Winter Palace surrounded by a group of officers and noblemen all in brilliant uniform, and when the Czar stepped forward, took him in his arms, kissed him on both cheeks, and said, "I create you a gentleman, Ossif Komissaroff. Conduct yourself according to your new rank!" Then, turning to his *entourage*, the Czar asked, "What think you?" A hearty cheer was the reply, and from that moment the poor hatter became the idol of St. Petersburg. In vain on several occasions the poor man endeavored to explain the mistake and to prove that he had done absolutely nothing to save the life of his sovereign. No one would listen to him. He and his heirs were invested with a title of nobility, and an official announcement appeared that he had become "Komisarof-Kostromskoi." Large sums of money were collected for him, and he was gazetted sub-lieutenant in a hussar regiment. Tutors were appointed to teach him how to read and write, and his father, a convict, was released from Siberia. It was by a lucky accident that the poor hatter happened to be in the Summer Gardens on that April day, was it not?

OFFICE OF FISK & HATCH,

NO. 5 NASSAU STREET.

NEW YORK, May 22, 1879.

FOUR PER CENT. CIRCULAR, No. 6.

THE demand for our circulars almost equals the demand for the four per cent. bonds, so universal is the interest in the subject of investment in Government bonds. Of each one we have been compelled to order and issue from five to ten thousand to satisfy the eager inquiries from investors, and although only three days have elapsed since the issue of the last, we are so besieged for the latest information, and so many new questions are daily arising, that we are compelled to issue another in order to save time and satisfy inquiries. From friends, investors, and the public generally, constantly come the queries—Are not the four per cents too high? Won't they decline after a while? Shall we not do better by waiting? Will not business revive and make money scarce? Will not something happen for us who have waited to invest our money in "fours" or to exchange our called bonds, to put down the market price to our figure? May not some miracle happen whereby we, the holders of $200,000,000 called bonds, can all supply ourselves out of $25,000,000 "fours," without raising their market price? Won't the great European markets and investors, with cash in their hands, wait a while, hoping to buy on more favorable terms? What are we, the National Banks, going to do with our $40,000,000 of called bonds still in the Banking Department? Can we afford to wait until our called bonds mature, and then pay three, four or five per cent. difference, or retire our circulation and lose the interest on the four per cents, which as a basis for circulation would be almost clear profit? How high will the four per cents go? Do you really think our credit has reached the basis of a three and a half per cent. bond at par? What does London want of our long four per cents at a premium when they can get their own three per cent. consols at a little under par? To what price must our four per cents advance before the income will be reduced to the income received from British consols? Can we not do better next week, or next month, or next Fall, or next year? All these questions, and hundreds of others, are asked over and over every day.

One answer is certain, and that is, that if "fours" were not wanted, all these questions would not be asked; and another is, if the supply of "fours" was unlimited, no such intense anxiety would exist. Since 1870 the Government has had its hundreds of millions of bonds for all comers. Now they are all out, and investors have only to feed on each other. This simple fact tells the whole story. Every year produces its surplus income of hundreds of millions; the Government itself is paying out for interest on its bonds an average of nearly two millions a week, the national banks as much more, the railroads as much more; the savings banks, insurance and trust companies, as much more; States, counties, town and villages, as much more; the products of the land, of the forests, of the mines, double and treble this amount, while all the varied industries of the land are swelling the grand total. All this national wealth underlies the credit of the Government, which issues its bonds running a generation and a half, free of all taxation, and pays four per cent. per annum interest, returning the principal at maturity.

With all this competition for the bonds and no more supply, can they remain at one fixed price, and if not, will they go up or down? In reply to the questions put to us, we would say, first—we do not think the four per cents too high until their income is reduced below three and a half per cent., and this figure is, with present amount of accrued interest, 109.35; and, second—we do not think investors will do better by waiting. We do not think holders of called bonds will gain anything but experience by waiting. We think the European markets and cash customers will soon hold all the remaining supply. We know that every family North, East, South and West must and will put part of their savings into four per cents for safety from the thousand and one perils that beset investments in every other direction. We know that the four per cents are equal in income to the British consols until they advance to over eighteen per cent. premium. We know that the large amounts recently bought of the Government by the National Bank of Commerce and the First National Bank and their associates are nearly all exhausted. We believe if the price of the balance was advanced to five per cent. premium it would make little difference in the demand.

We do not forget that a few months ago we placed the fives and sixes of 1881 at the top of the list; neither do we forget that the Government has since knocked away the barrier between them and danger of redemption at maturity, by doing in four months what it then appeared would be good work for as many years.

As this may be the last circular we shall issue before the four per cents are all gone, we would take this occasion to thank the press and many friends for their cordial words of cheer in this undertaking to market the "last of the four per cents."

Respectfully, FISK & HATCH.

FUN.

WHAT was it that Barnegat?

BRICKMAKERS would make good soldiers; they are kiln fellows.

IT was a wag of a lawyer who said he went into the Supreme Court-room in Washington "to see the bench show."

YOU may talk about Communists, but the person who chiefly desires that the ruler be done away with is the schoolboy.

THE Southern press have adopted the right plan at last to check the Negro exodus. They are publishing reports to the effect that the watermelon crop in the South this year will be the largest ever known, and that growers will be compelled to give them away to get rid of them. Circulate this fact among the colored refugees in Kansas, and they will return home in the next boat.

CONCERNING Thomas Carlyle Mrs. Hooper tells this story: An American gentleman once called to see him, and was greeted in the following manner: "Weel, sir, and so ye come frae that big country where the vote of the grandest scoondrel on airth is equal to that of Jesus Christ. And ye think much o' Jarge Washington; but he was no a great mon—he was a good surveyor, maybe, but he was no a great mon."

"YES, your Honor," says the prisoner, "I admit that I broke into his house to rob it, but I did not intend to add violence to my crime." "You did not intend—of course you didn't. But if the witness had heard you, had called out 'Who's there?' had——" "Oh, of course, if he'd begun it I should have had to defend myself, and so would you if any man attacked you while you were peaceably going through his house." (Held in $10,000.)

THE Count de V., in the mildest tone, to his servant: "Joseph, you have been drinking my rum again, and you have put water in it to make up the deficiency." "I admit it, sir; but I swear I will drink no more of it." The Count de V., slightly elevating his shoulders: "You always exaggerate! I did not ask you not to drink it. I only ask you not to put water in what's left. For, really, it isn't fair that you should drink rum pure and that I should drink rum and water."

A GENTLEMAN, passing a couple of youngsters who were sitting on a doorstep with slates on their laps, overheard in their colloquy a strange bit of rhetoric brought to bear on the problem: "Take two from one and one remains." The gentleman, not having thoroughly understood the argument, yet convinced of its fallacy, offered something short of a shilling to him who could prove, either rhetorically or mathematically, the solubility of the problem; whereupon they offered him ocular demonstration, and led him through to their mother, who sat in the kitchen with her twins in her arms. Having each deprived her of an infant, they pointed to her who remained to prove that "if you take two from one, one remains!"

THE FORGETFULNESS OF PEOPLE.

THE Oxford Professor who, to avoid the wind when taking snuff, turned around, but forgot to turn back, and walked six miles into the country, was no more forgetful than those who still use the huge, drastic, cathartic pills, forgetting that Dr. Pierce's Pleasant Purgative Pellets, which are sugar-coated, and little larger than mustard seeds, are a positive and reliable cathartic, readily correcting all irregularities of the stomach, liver and bowels. Sold by druggists.

WHAT SHALL WE WEAR?

THE desire to go out and in among men neatly attired betokens refinement, and is an evidence of self-respect to be encouraged. The privilege of wearing genteel clothing is no longer confined to men of large means, whose wardrobes are made to order, for now leading manufacturers of gentlemen's ready-made clothing keep abreast of freshest fashions, drawing to them buyers otherwise inaccessible, and competition has made prices markedly in favor of consumers. One of New York's leading houses in Clothing for Men, Boys and Children—ROGERS, PEET & Co., 487 Broadway, corner Broome Street—invite an inspection of their display by our city and suburban readers. To buyers remote from New York they supply samples of goods, rules for self-measurement, and fashion-plates; and goods sent by express may be examined before payment is made.

MURRAY & LANMAN'S FLORIDA WATER.—The most delicate invalids, the greatest sufferers with seasickness, and those whose nervous systems are most sensitive, prefer it before all others, and use it to the exclusion of all others, not for a time only, but always and continuously. The sense of smell never tires of its soft, refreshing odor.

THE contract for supplying scales for the Indian Bureau has been awarded to E. & T. FAIRBANKS & Co., of St. Johnsbury, Vt.

NO COSTIVENESS, Diarrhœa or any Bowel complaints where Hop Bitters are used.

A NEW CURE FOR CHRONIC DISEASES.

THERE are certain diseases which defy medical treatment even when administered by the most skilled practitioners and specialists. Among these may be classed Consumption, Catarrh, and Neuralgia, the first carrying off its tens of thousands of victims annually, and the others dooming to a life of misery and torture quite as many more. The best men in the profession are able to do but little for the relief of these unhappy sufferers, too many of whom resort, in the vain hope of relief, to the use of patent nostrums which in most cases do more harm than good. Now, it should be known that there is a new treatment for these and many other chronic ailments, the effect of which is claimed to be little less than miraculous. It is called "The Compound Oxygen Treatment," and is said to be entirely free from drugs or anything that can produce the slightest injurious effect upon the most delicate organism. If the half be true that is claimed for this new treatment, then the invalid's millenium has come. The evidence submitted is certainly very strong. All information in regard to this new cure will be found in a small treatise on Compound Oxygen, which is sent free by Drs. Starkey and Palen, 1,112 Girard Street, Philadelphia.

INDIGESTION, DYSPEPSIA, nervous prostration, and all forms of general debility relieved by taking MENSMAN'S PEPTONIZED BEEF TONIC, the only preparation of beef containing its *entire nutritious properties*. It is not a mere stimulant like the extracts of beef, but contains blood-making, force-generating and life-sustaining properties; is invaluable in all enfeebled conditions, whether the result of exhaustion, nervous prostration, overwork, or acute disease; particularly if resulting from pulmonary complaints. CARWELL, HAZARD & Co., Proprietors, New York.

HOTEL-KEEPING as an art has been reduced to its perfection in the leading New York houses; among these the "St. Nicholas" hotel enjoys an enviable reputation. Many of its guests have been constant visitors since its opening, about a quarter of a century since. A luxurious table, combining perfect catering and cooking, is matched by elegance of apartments and completeness of appointments.

THE report of the New York Produce Exchange for the year 1878 is a volume of great interest and value. It includes a vast amount of statistics, exhibiting the features and extent of our metropolitan and national commerce, and has a chapter on "Trade and Transportation" which is of peculiar interest.

THE annual report of the Board of Police Justices of this city, for 1878, furnishes an interesting exhibit of the business of these courts and the grades of crime with which they have to deal. The total number of cases disposed of last year was 78,533.

BALMY sleep, good digestion, rich blood, elastic step and cheerfulness in Hop Bitters.

Frank Leslie's
POPULAR MONTHLY
The Cheapest, Largest and most Attractive of all the Monthly Magazines!

"FRANK LESLIE'S POPULAR MONTHLY presents very attractive contents. The illustrations are numerous, and number over one hundred, and are well executed. This publication is meeting with much favor from the reading public. The contributors are among the most talented in the country, and hence the high intellectual standard."—*Leader, Bloomington, Ill.*

"Undoubtedly FRANK LESLIE'S POPULAR MONTHLY gives more and more varied material for its cost than any other magazine in the world. One hundred and twenty-eight pages, half of which are handsomely illustrated, for twenty-five cents, would certainly seem to be the finishing point of economy in reading matter."—*N. Y. Era.*

UNCLE SAM AS A DEALER IN OLD METAL.

"If this (Warner) Bill is to become law, it is inevitable that the country will be drained, sooner or later, of its gold coin and bullion, and that silver will become the sole unit of value. If this Bill is to become law, the German Government, and all who have silver bullion the world over, will pour it into our mints, to receive for every 84 cents a legal-tender silver dollar. They will make, by this simple process, nearly 20 per cent., and our own people, who will be obliged to receive the coins as legal-tenders, will be the losers."—*Speech of Hon. Levi P. Morton in the House of Representatives.*

Important to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP is the only thing that mothers can rely upon for their children. It corrects acidity of the stomach, cures wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. During the process of teething its value is incalculable. It softens the gums, reduces inflammation and allays all pain, thereby giving rest to the child and comfort to the mother.

NEW YORK.—THE STEAMER "CHARLESTON," OF THE CITY OF CHARLESTON, S. C., AGROUND NEAR FORT HAMILTON, STATEN ISLAND, MAY 18TH.—FROM A SKETCH BY FRED. S. COZZENS.

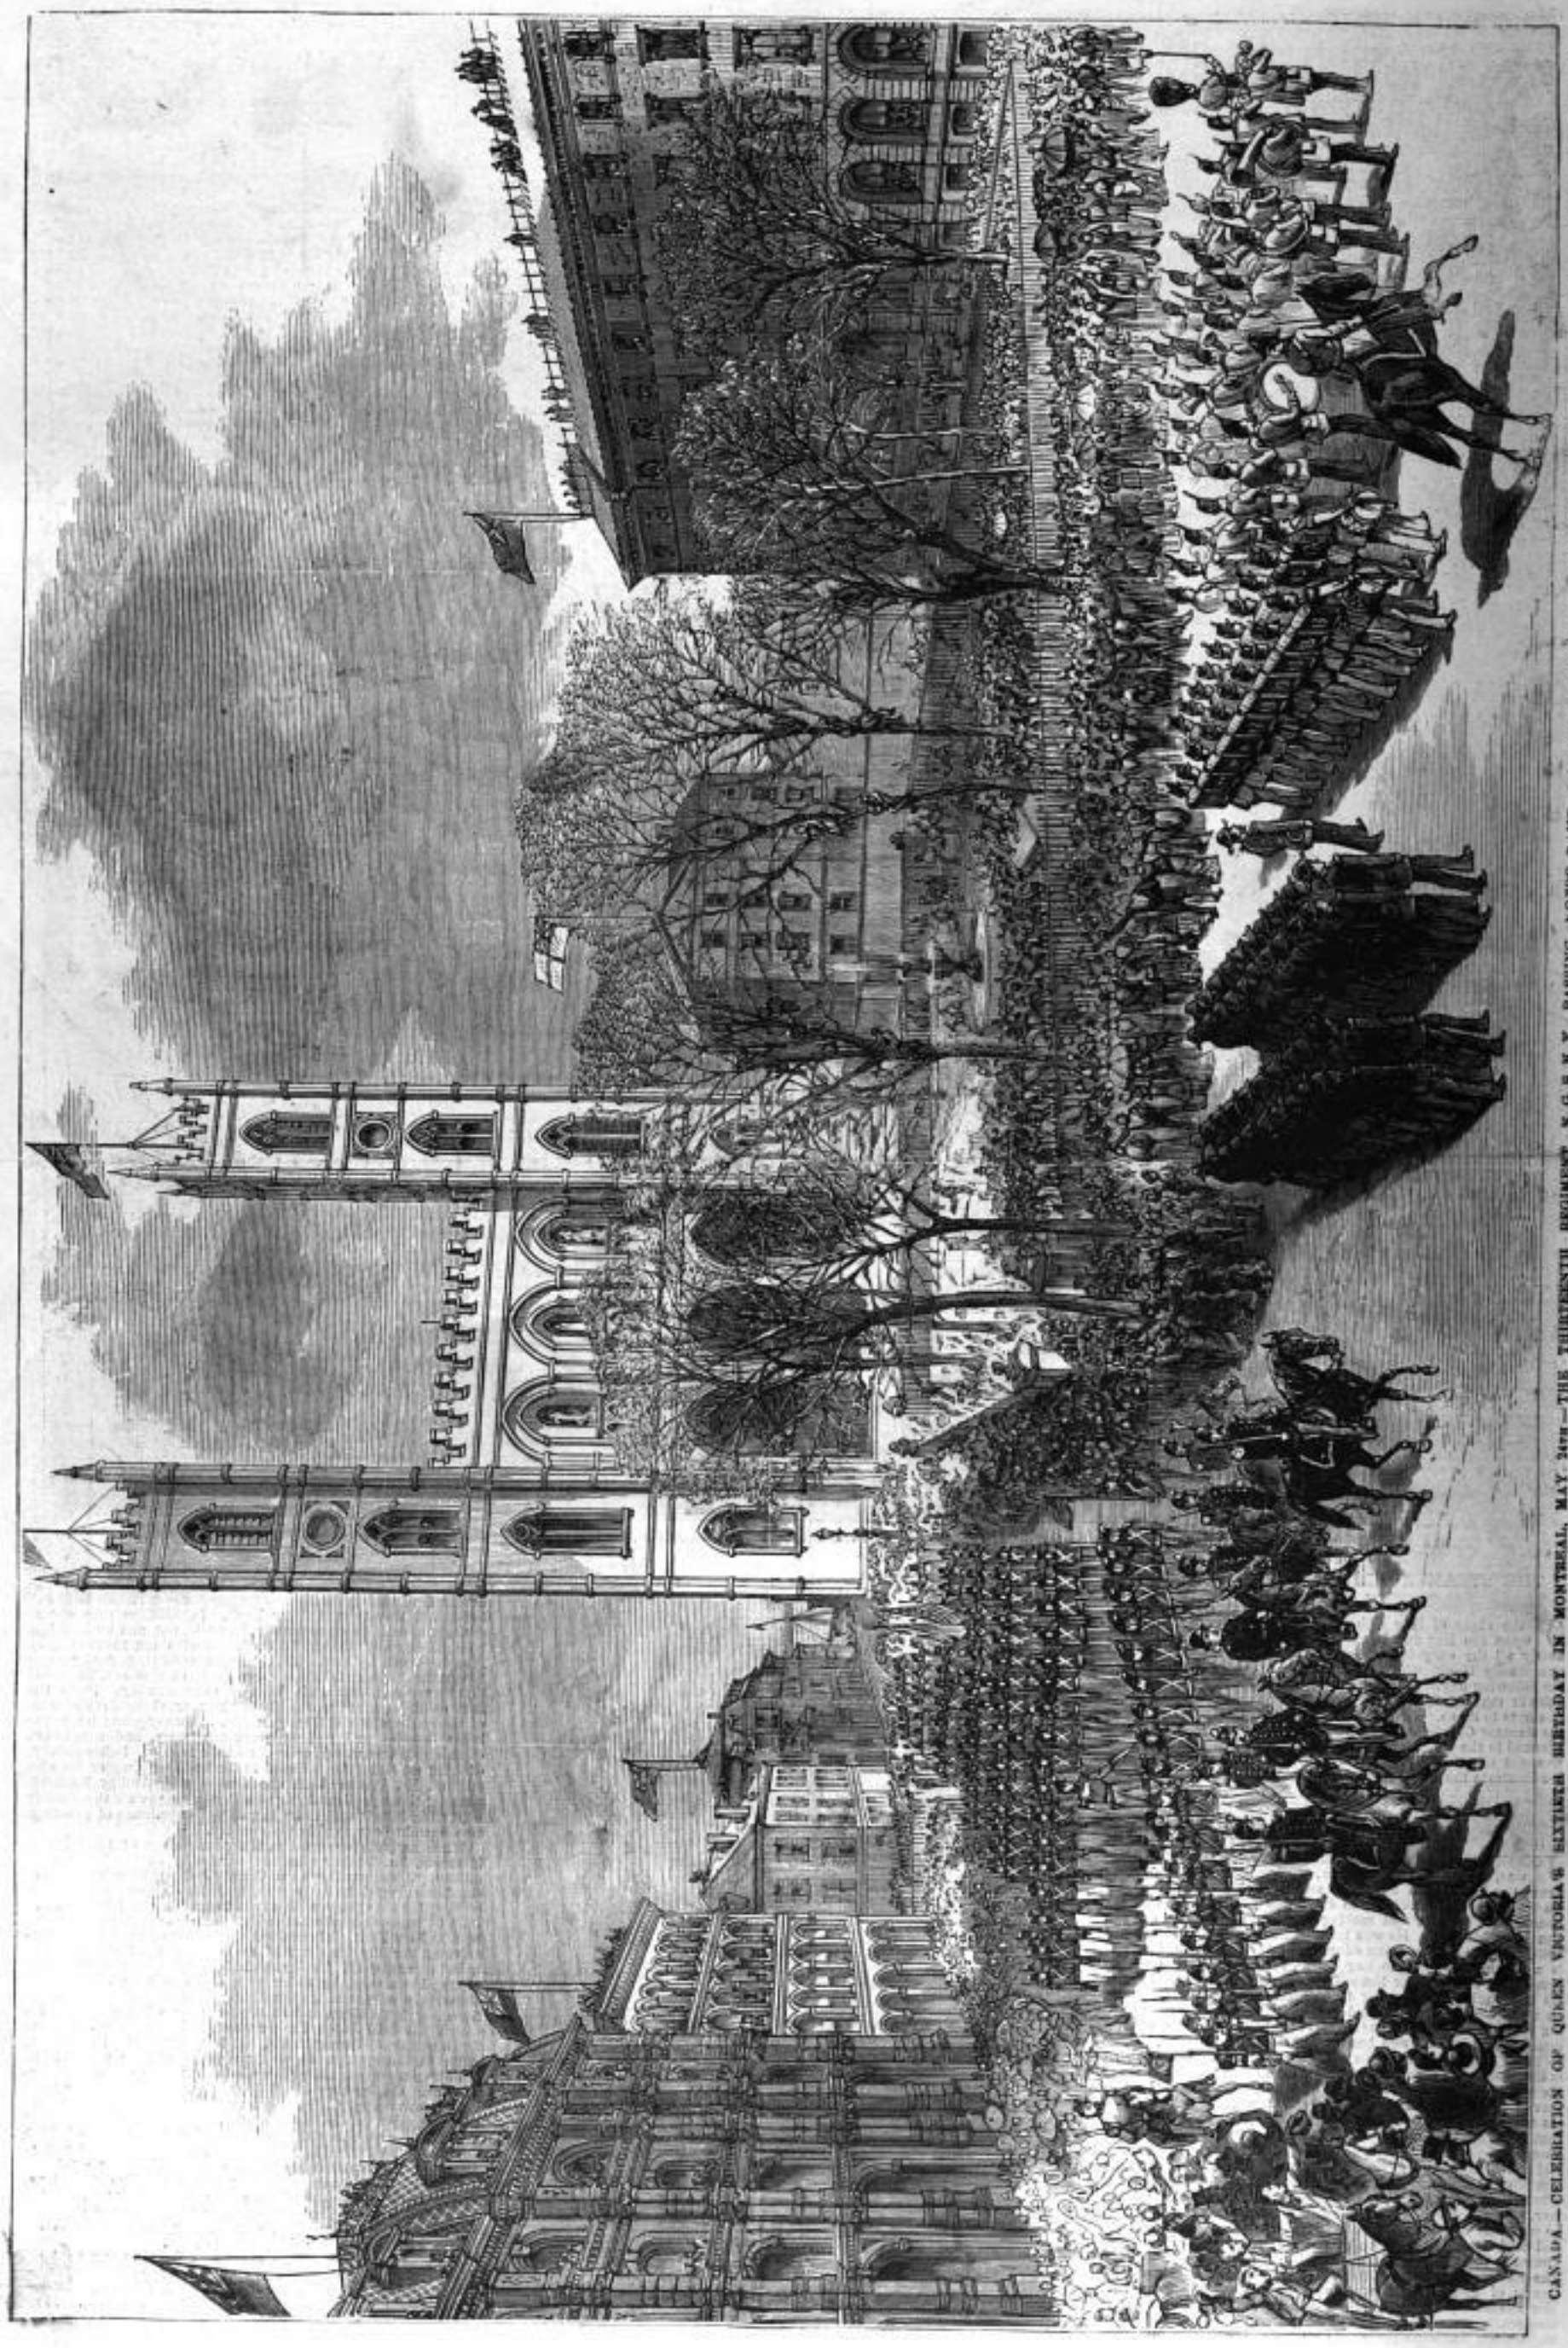
THE STEAMER "CHARLESTON" AGROUND IN A FOG.

ON the night of May 17th a fog of unusual density settled upon the Bay and Harbor of New York, and as a result nearly all the outgoing steamers were compelled to anchor near Sandy Hook, where they remained during the whole of the following day. Incoming steamers experienced great difficulty in making the harbor, some temporarily abandoning all attempts to do so. At five o'clock on the morning of the 18th the steamer *Charleston*, from the city of Charleston, S. C., went aground in the fog, between Forts Hamilton and Lafayette, but was got off after some hours' delay, without serious injury. We illustrate the incident on this page.

THE LATE ASA PACKER.

JUDGE ASA PACKER, who died in Philadelphia, May 17th, was, in the broadest sense, a representative American. From the lowest and humblest station in life he climbed, by his own inherent qualities, to eminence and power, winning honors and wealth, and making a deep impression on the annals of his time. He was born at Groton, Conn., December 29th, 1805, and without any education other than he had gained in a few months' "schooling," was permitted, at the age of seventeen, to shift for himself, which he did by shouldering his knapsack and removing to Susquehanna County, Pa., then an undeveloped country, and learning the carpenter's trade. Six years later, in 1828, having saved a little money, cleared a little land of woods, and built a log cabin of his own, similar to those he had built for his neighbors, he married and settled in life, doing odd jobs at his trade for the neighbors, and taking his pay in the services or goods of his customers. In 1833 he moved to Mauch Chunk, then a canal town, where he turned his trade to account in building a canal-boat to ply between that place and Philadelphia. He was captain and freight and passenger agent for his own boat, and here, by slow degrees, laid the foundation of his magnificent fortune. It had taken him several years of spare times, working at his trade in the Winter, and earning a little money on the canal in the Summer, to fight his way to this start in life. Three years later he was the owner or part owner of several other canal-boats, and had founded the firm of Packer Brothers, so long well known in the valley. Mauch Chunk was then a growing town. The coal interest was yet undeveloped, and the railroad interests of Pennsylvania were still in the speculative stage. The Packer Brothers embarked in business presently as contractors, building dams and locks, and performing feats of engineering that were the wonder of their primitive community.

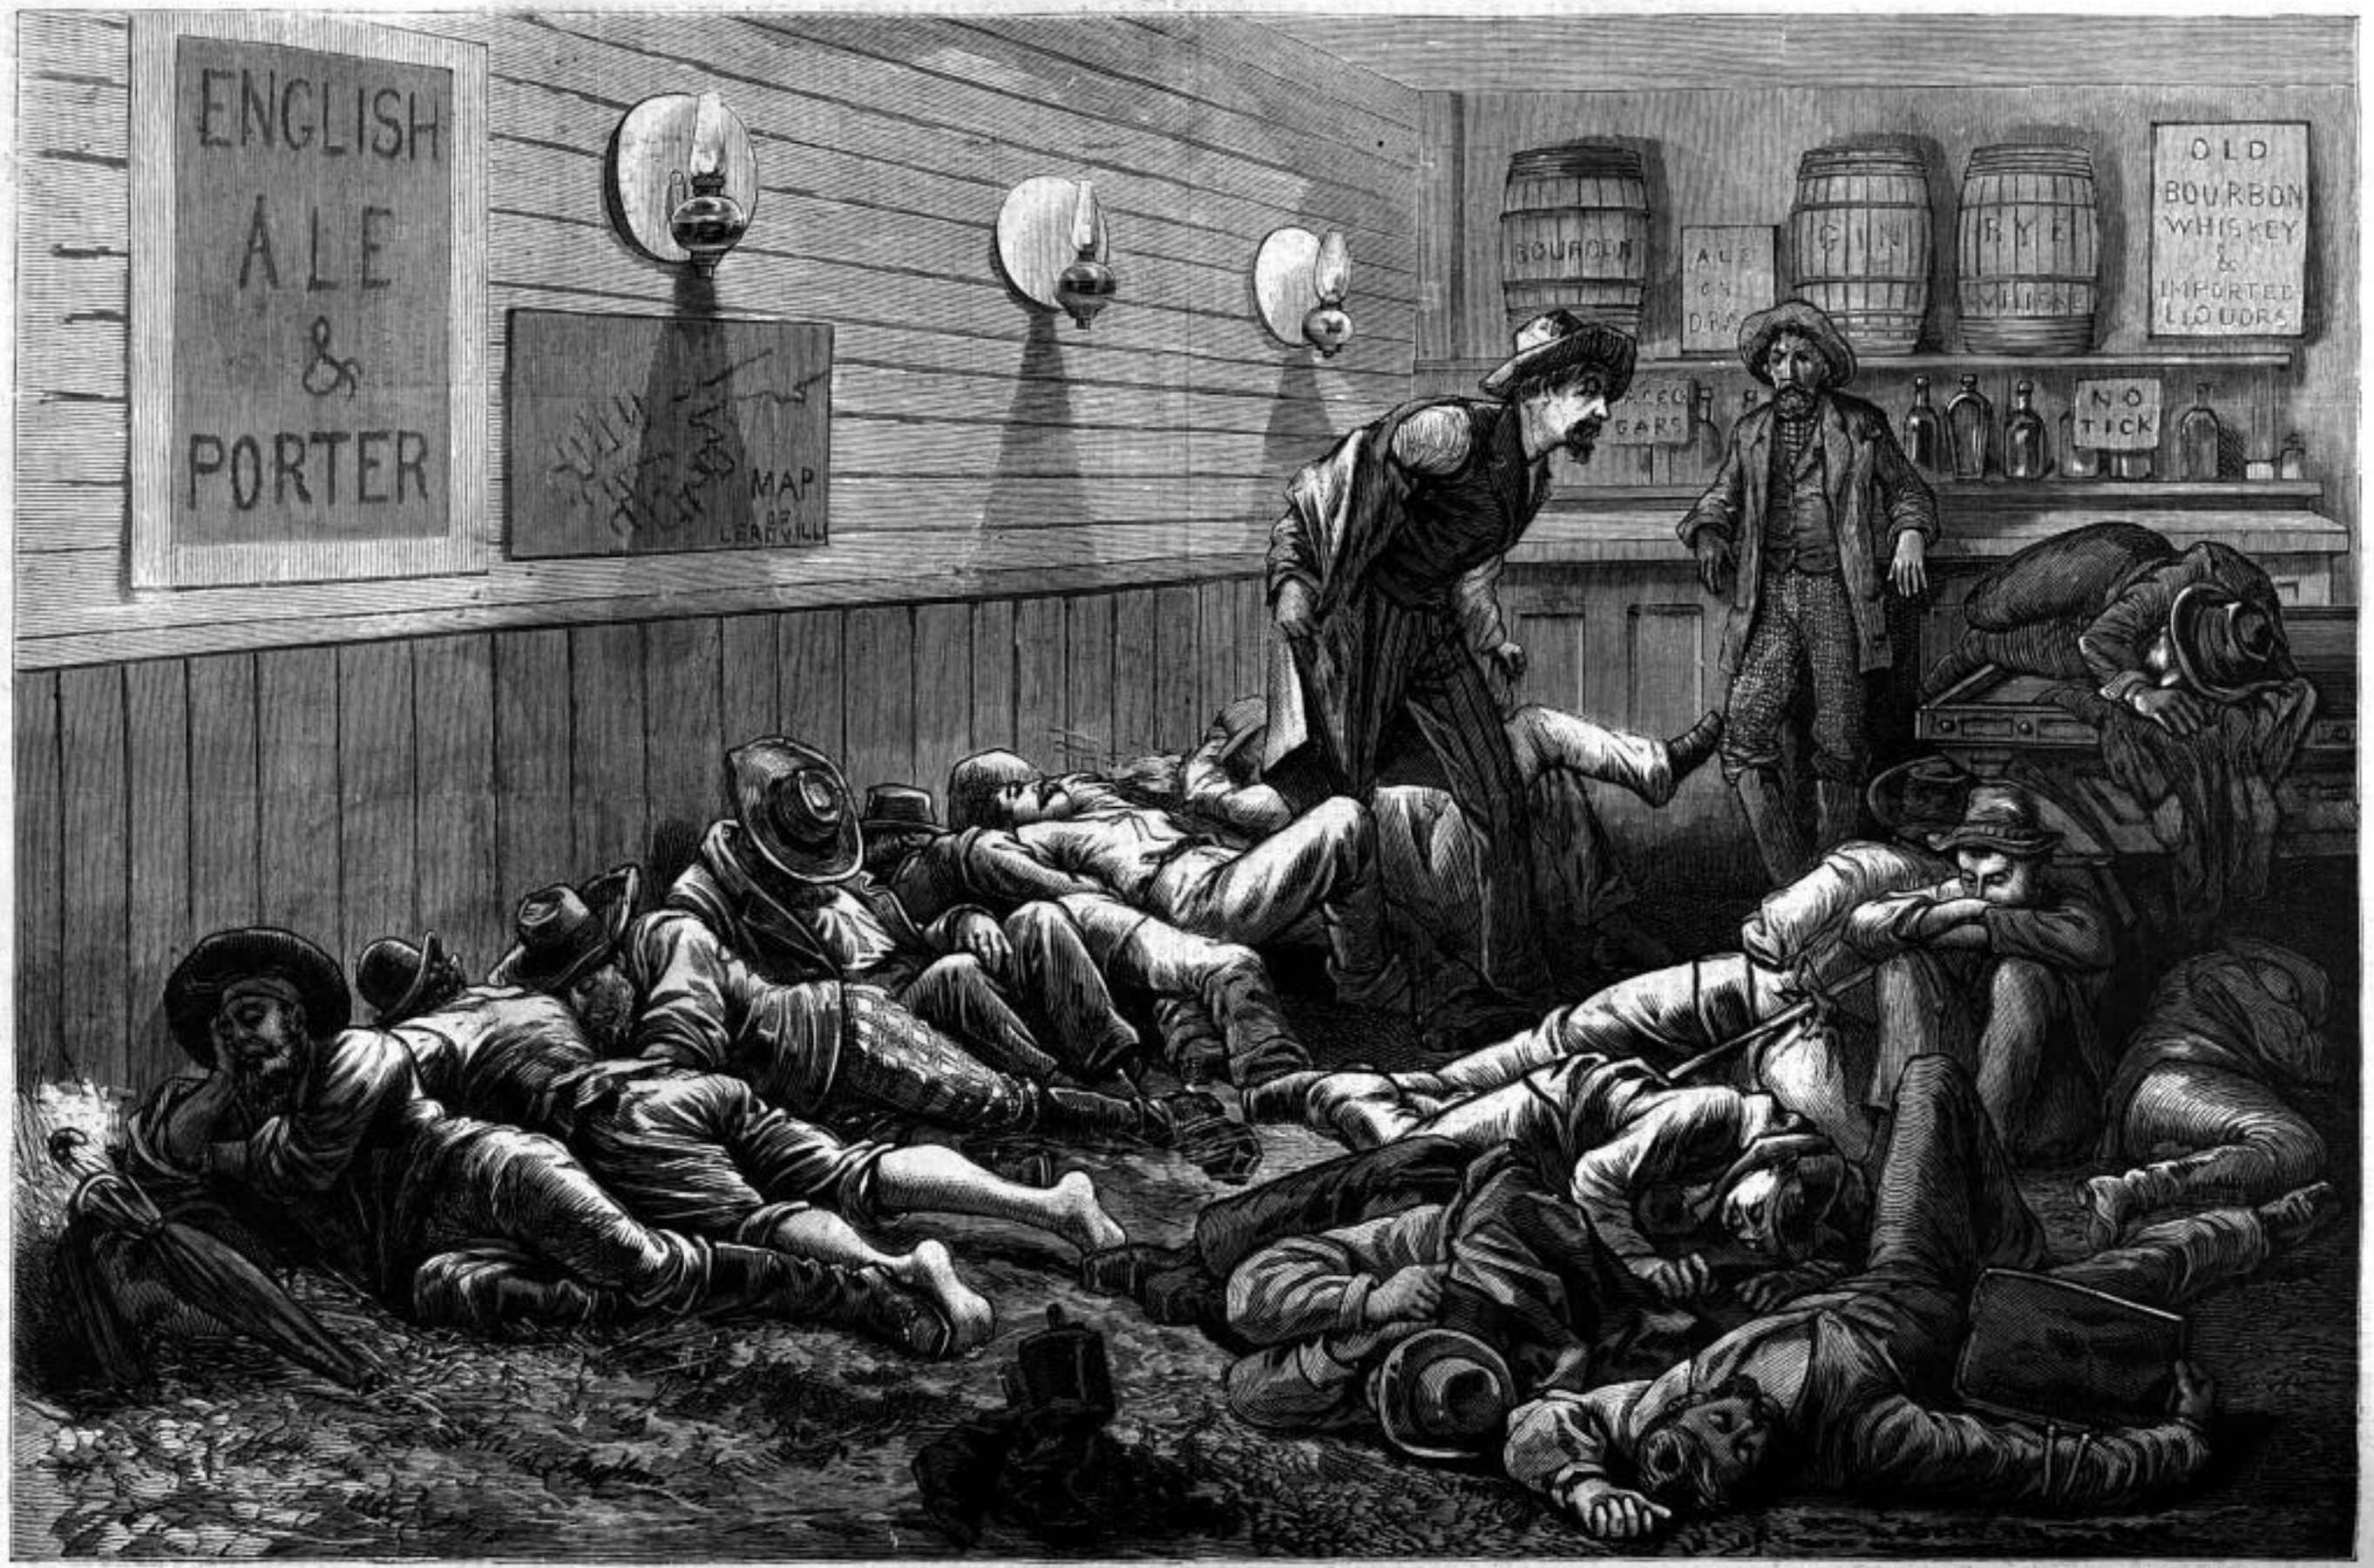
THE LATE JUDGE ASA PACKER.—FROM A PHOTOGRAPH BY F. GUTEKUNST.



Asa Packer went further, bought coal lands whenever he found them in the market, worked his own mines, and was among the first to open the now tremendous coal traffic between Schuylkill County and New York. In 1852, relying almost entirely upon his own resources, he projected, and by 1855 had built, the Lehigh Valley Railroad, and also the railroad from Mauch Chunk to Erie. He met with serious pecuniary embarrassments in completing these great enterprises, but tided them over and ultimately became very wealthy. From the first of these great works dates the marvelous development of the coal regions of Pennsylvania. Towns sprang up, population doubled and trebled every ten years, and a network of railroads was woven over the whole region. Subsequently, desiring an outlet for his coal to the seaboard, under his own control, Mr. Packer built the Easton and Amboy Railroad, running through New Jersey to Perth Amboy on the Raritan Bay, and which is said to be, in point of excellence of construction, equal to any road in the country.

While actively engaged in the prosecution of his business interests, Mr. Packer was not unmindful of his duties as a citizen. After serving as a County Judge and a member of the State Legislature, he was, in 1853, elected to Congress, serving for four years with credit to his State and himself. In 1868 he was a delegate to the National Democratic Convention held in New York, and received the twenty-six votes of Pennsylvania for the Presidential nomination until the fifteenth ballot was reached. During the balloting, before the delegation changed its vote, he twice received one vote from North Carolina, once one vote from California, at one time a half-vote from North Carolina, and at another time a half-vote from Indiana. In 1869 Judge Packer was the Democratic candidate for Governor of Pennsylvania, but lacked 4,500 of an election. After that campaign he took no active part in politics. In 1875 he was appointed a Commissioner to the Centennial Exhibition. On January 23d, 1878, Judge and Mrs. Packer (still living) celebrated their golden wedding, with 1,000 guests, at the family mansion in Mauch Chunk.

Judge Packer was the founder and benefactor of the Lehigh University at South Bethlehem, Pa., which was chartered in 1865 under Protestant Episcopal control. For the establishment of this institution, tuition in which was made entirely free, Judge Packer gave $500,000 and suitable grounds. Lehigh University was originally designed to give a purely scientific education, and the school of general literature—similar to the ordinary college—was subsequently added.



The will of Judge Packer bequeaths for the permanent endowment of Lehigh University, $1,500,000; for a library for the University, $500,000; St. Luke's Hospital, Bethlehem, $300,000; St. Mark's Episcopal Church, Mauch Chunk, $30,000. There are several bequests which are kept private for the present.

WILLIAM LLOYD GARRISON.

ONE of the earliest, strongest, and most consistent of American abolitionists died, May 24th, in the fullness of years and honor at the residence of his son-in-law in New York City. William Lloyd Garrison was born at Newburyport, Mass., December 12th, 1804, his parents being natives of the province of New Brunswick. After a trial of the trades of shoemaker and printer, he, through various degrees, at last became an editor. As early as at eighteen years of age he began to write for the Newburyport *Herald*, then for the Salem *Gazette*. His articles were on political topics. Those for the *Herald* were unsigned, those for the *Gazette* were over the name of "Aristides." He became editor and owner of the Newburyport *Free Press* in 1826, but the paper failed, and in the following year he took editoral charge of the *National Philanthropist*, of Boston, an advocate of total abstinence. But his great life-work was begun in 1829, when he, in conjunction with Benjamin Lundy, edited the *Genius of Universal Emancipation*, a journal published in Boston devoted to the abolition of slavery. Lundy was in favor of a gradual emancipation of the negroes, while Garrison advocated striking off their shackles immediately and at one blow. The journal was bold and uncompromising in its tone, and created strong friends and bitter enemies. Garrison knew no fear. He denounced slavery and the slave-trade with that sublime courage that comes of honesty and integrity. The ship *Francis*, owned by Francis Todd, of Newburyport, having taken a cargo of slaves from Baltimore to Louisiana, Garrison denounced the act as "a domestic piracy," and declared his purpose "to cover with thick infamy" all who were connected with it. He was indicted and held for libel for this, and sentenced to pay a fine of $50 and costs, and Mr. Todd, in a civil suit against him, obtained a judgment of $1,000. As he could not pay the fine he was sent to jail, where he remained for two months, until Arthur Tappan, of New York, paid the fine for him. Nothing daunted, however, he began, in January, 1831, the publication of the *Liberator*, which lasted for thirty-four years. The Legislature of Georgia offered a reward of $5,000 for his arrest.

In 1832 he organized the New England (afterwards the Massachusetts) Anti-Slavery Society. He visited England in 1833, and on his return organized the American Anti-Slavery Society, of which he became president.

His work grew and his friends increased, and in 1865, when he resigned the presidency of the American Anti-Slavery Society, and discontinued the publication of the *Liberator*, he saw the fruition of all his hopes, and his native country held not a single slave throughout its borders. He was presented with $30,000 by his admirers in token of his unremitting labors in behalf of freedom. In 1867 he again visited England, where he was received with honor. A volume of his poems was published in 1843, and a selection of his speeches and writings in 1852.

THE LATE WILLIAM LLOYD GARRISON.—FROM A PHOTOGRAPH BY HARDY.

WHERE SHALL WE GO THIS SUMMER?

"WHERE we shall go?" That curious hegira which possesses all inhabitants of North America during the reign of the Dog Star depends very much on who we are.

If we are young married people, with several children, we shall seek some cool, quiet, retired spot, where we can be moderately amused ourselves, and where the children will be presumably well and comfortable. If we are so unfortunate as to own a country place, we shall go there. If we are free as air, and very rich and well clothed, we shall go to Saratoga or Newport. If we are lucky, we shall go to Europe.

In any contingency, we shall go *somewhere*. It is written on the lintels of all the inhabitants of the "States" that they shall be peripatetic in Summer. The local aristocracy of the inland towns would be lost and miserable without Saratoga. It is the place where one sees the fashions, hears the last and best *mot*, meets the untrammeled beau, drinks the waters, drives through the softest and most perfect Summer air, fragrant with balsamic pine, and hears the best music and sees the best second-rate racing. It is equally agreeable to the Cit and the countryman to meet at Saratoga. The hotels are peerless, especially the "United States," which is Versailles on a small scale.

Then, Newport—to those that love the sea,

KENTUCKY.—MALE MUMMY FOUND IN THE GRAND CRYSTAL AVENUE CAVE.—SEE PAGE 228.

Newport is wonderfully fine. There is no such place in the world as Newport, no such houses built for a three months' occupancy. It is the Summer Washington—our Biarritz. The court meets there. If it has a fault, it is that it is too clique-loving—too much a *villegiature* of New York, too fashionable, too expensive, and too exclusive for the general visitor.

Some one said that to be eligible for Newport one must have a villa, a view, a vehicle, and a visiting list. Perhaps the four v's are necessary to the perfection of a Newport experience, but not indispensable. The ocean and a friend make Newport tolerable, although the villa life, as affording an immediate reproach to your own nomad hotel existence, is sometimes very envy-inspiring.

Newport having such a reputation, of course draws to itself all the *diplomats* and our wandering princes and lords. It is the most perfect of seaside climates to those who like a soft, Devonshire, Gulf-stream, damp mildness. It is death on ostrich feathers and all thin dresses. But for a Summer morning drive in a pony-phaeton, a lawn-party, or a tea-dinner after the drive—and what is equal in splendor to that ocean drive, or to a morning *musicale!*—all the women in Paris dresses—what can be more elegant and more luxurious? That it is hard work, and as gay as the London season, is too true. It is not the relaxation which a woman needs after a season in town, nor is it "easy" to a newcomer.

One needs the four v's, and perhaps another v—vigilance—to keep up with the gay leaders of Newport.

Saratoga needs but one luxury—a handsome toilet—and that is not indispensable. But most women are unhappy unless as well dressed as their neighbors, and people do wear fine clothes at Saratoga. There the life is all hotel life. It is a gay, public, real watering-place existence. There are comparatively few villas near the great caravanseries—the opulent few are in the minority. It is what every great watering-place should be, a democracy. No charm is wanting at Saratoga except a greater quantity of outside attraction in the way of places to go to. There is but one excitement possible—a dinner at the lake, away from the hotel.

Sharon opens its healthful season in July. There sulphur baths add to the reason for going, and the hotel, which is all piazza, presents the most noble view in America.

Richfield has great attractions of lake and drive, and houses where one can drive for a dinner. The sulphur baths are most efficacious, and the hotels wonderfully fine. It is not so fashionable or so *exigeant* as Sharon, but it is more amusing.

Then come the White Mountains, with their large and growing audience, the Profile House being almost as fashionable, in its way, as Newport. No fine dressing, but much mountaineering, riding on a buckboard, and such primitive sport. There, fine views, excursions, and all sorts of out-of-door life, remind the visitor of Switzerland.

There is no drawback to the healthfulness of this life, except to those to whom mountains are unhealthy, and who get headaches in the highly rarified air. Many cannot stand it, but it is Paradise to the afflicted noses of the sufferers from hay fever.

Watkins Glen and the Delaware Water Gap offer much attraction in the way of the picturesque. Mauch Chunk, in Pennsylvania, only five hours from New York by the prettiest railroad journey possible, along the banks of the Lehigh, is a most wonderful romantic spot. Here the Lehigh looks like the black Leutchine in Switzerland, and is as well worth seeing. Mauch Chunk has all the charm of Lauterbrunnen except the Jung Frau.

These last mentioned resorts are cheap, comparatively, and need no fine clothes.

Then come the lakes. The ever serene Lake George, with fine hotels; and Lake Champlain more retired in its little watering-places. Lake Mohunk, near the old settlement of New Pals, a most fascinating place; wild and noble scenery, and very near to the Hudson River. Lake Dunmore, and a dozen others where there is boating and scenery, not to speak of Otsego Lake, at Cooperstown, famous for legend and romantic association.

Then come the farm-houses; but here this faithful chronicler stops, for the sufferings in farm-houses—however, let those who take them go to them!

The seaside comes next; and towering high stands Mount Desert, the remarkable combination of mountain and sea. This place has now an annual visiting of many thousands. It is not comfortable to the luxurious. It is somewhat primitive as yet, but it is gloriously beautiful, and it exercises over those who love it a spell such as that which Rome casts over her constant lovers.

Then all the coast, everywhere. Noble, remote, exclusive Nahant, most peerless of all spots, where Earth juts out into Sea, and throws up her frowning fortress; wild Cohasset, sober Manchester, beloved by theatrical artists; our own Long Branch, "so near and yet so far."

Then come the beautiful suburban places—Orange, Morristown, Summit, the Palisade Hotel—most romantic—with a road which is as great a wonder of engineering as the great Swiss road over the Devil's Bridge, on the way to Anderott. What a view! What a delightful spot is the Palisade Hotel, back of Englewood, and only an hour from New York.

Niagara is a charming watering-place, if not too far. It is wonderful how the beauty and grandeur and music of that great spectacle of nature grows upon one. A season of three months there, said the artist Church, left him unwilling to leave it—he was astonished every day at new beauties. It has comforts, too—excellent hotels, and the finest of drives. A little exorbitant, but not demanding much in the way of dress.

The little watering-places along the St. Lawrence are very picturesque and very cheap. One meets at them always some pleasant English and Canadian people. Sir John A. Macdonald, Premier of Canada, speaks with high commendation of these retreats. They are, too, to the wearied and jaded watering-place sufferer, something new under the sun. For there is a dreadful weariness settling down on the watering-places. Men will not go much, and the bore thrives at them. Women tire of the round of visiting, dressing, pleasure-seeking, and irresponsible life. We want to go away and hitch our pony-phaeton to a star. It is strange how some pleasure wearies! It looks so bright at first; but we suspect we have all echoed the voice of a gentleman at Saratoga last year, who said, "I don't want to eat, and I don't want to drink. I don't want to see anybody—man, woman or child. I don't want to hear any music, and I don't know what to do!"

In such a mood, the neighboring solitudes of the Adirondacks, with their eternal silence, their vast and illimitable forests, and their gentle lakes, offer intense compensation to the wearied society-lounger. Nature never fails. There are short and comfortable trips possible now in the entrances to the Adirondacks, where one can be comfortably lodged, and cheapness, health and quiet dressing go together.

As for country-house life in America, it is beset with difficulties. Servants, that great unsolved problem—that sum which refuses like Dora's, to add up—servants are terrible at country places. It requires a woman to be at once a general, an emperor, and a genius, a wit, and a lightning calculator, to keep house in the country; for she may have invited Lord Lay and Leal to dinner, and, looking out of her window, may see the cook, bag and baggage, driving off to return no more. The utter and proud irresponsibilty of our servants, their prosperity, political supremacy, and general disdain of a "character," all place the poor "mistresses" in a perpetual dilemma. Still, some women are great enough to conquer their fate, and then the country house is delightful—perhaps a little lonely, for we are not quite civilized enough for country life in this our young and crude land. We have no "resident gentry" as yet, and no "leisure class," except on the Hudson River, and there it is very, very warm.

There is no doubt but that one can go to Europe, and pass six months for less money and with more enjoyment than to stay at any of our larger watering-places.

The watering-place life of America is, then, a very decided thing: it is one of the phases of our civilization; it is the most eminent form of our gregariousness.

The quiet amusements which grow up at a small watering-place, the evening games and the morning walks, the intimacy of lawn-tennis and of croquet, often lead to that great and important game played by two and called matrimony. It used to be said that all matches made at Saratoga turned out happily, and one enterprising owner of a Spring went so far as to say, "particularly between those who drank exclusively of the Congress Spring." Whether this celebrated fountain had the virtues of the Well of St. Keyne or not it is impossible to say. Let the fortunate respond:

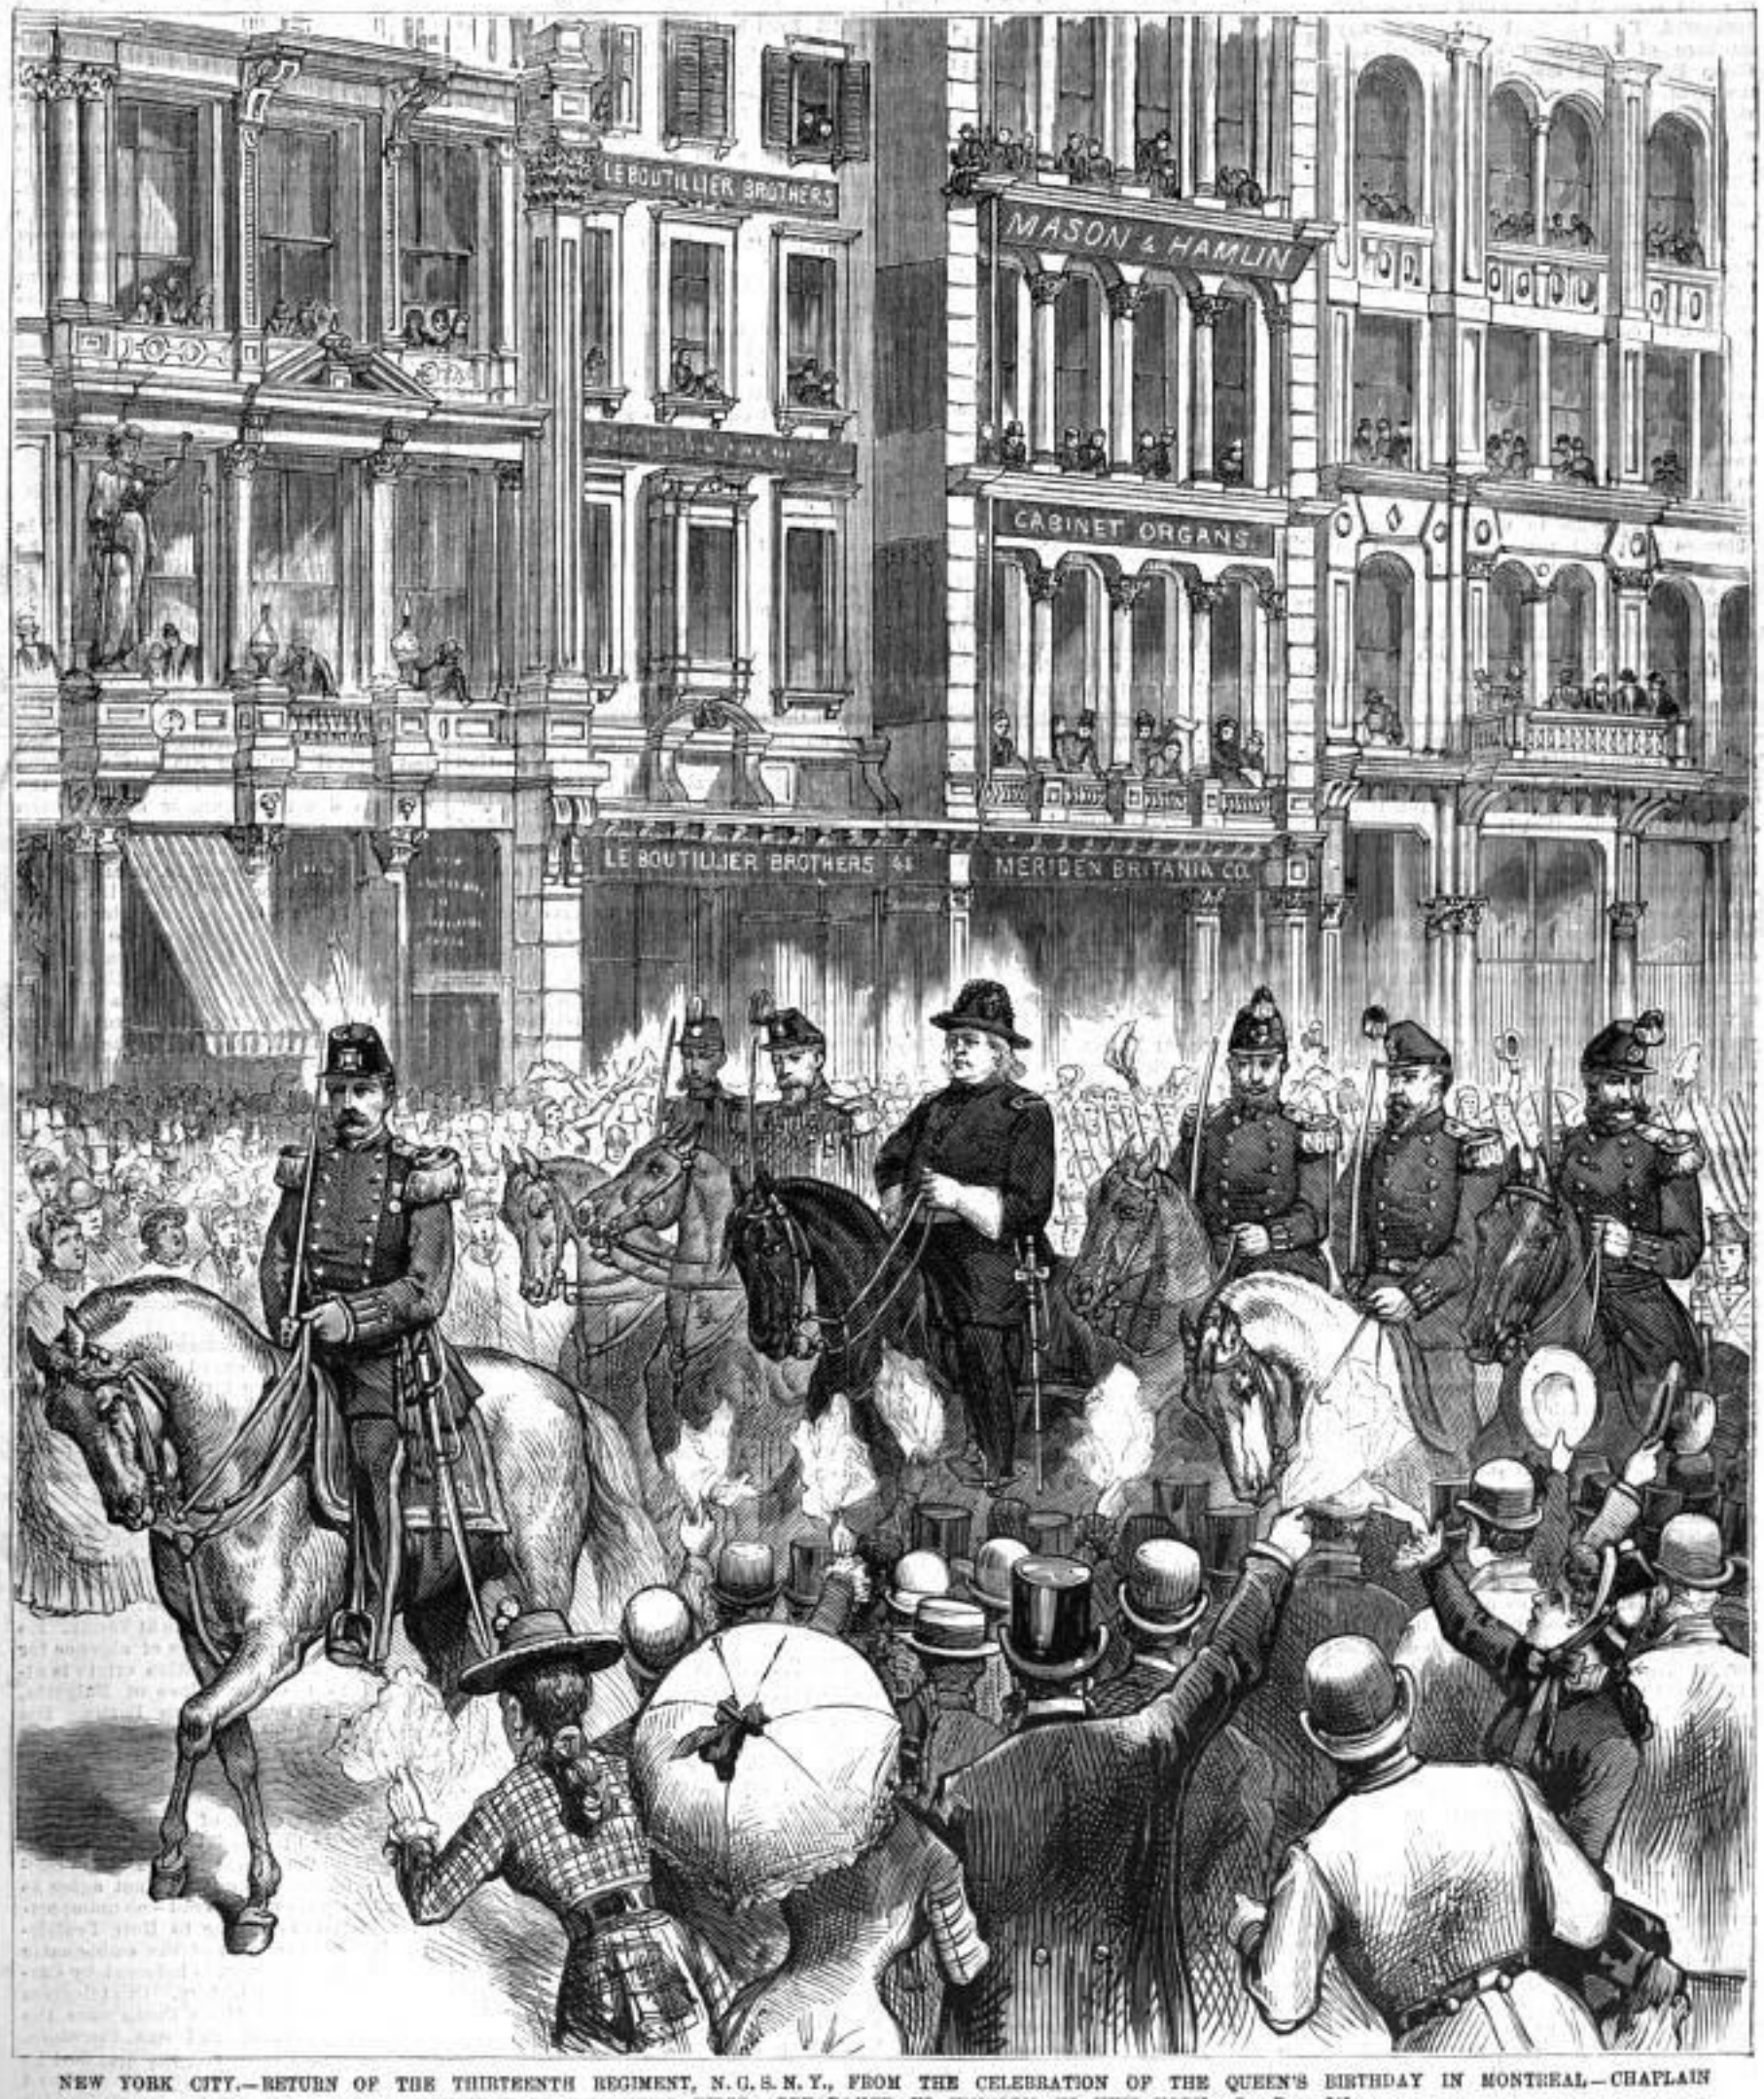
"If the husband at this gifted well
Shall drink before his wife,
A happy man thenceforth is he,
For he shall be master for life.

"But if the wife should drink of it first—
God help the husband then!
The stranger stooped to the well of St. Keyne,
And drank of the waters again."

The millions who rushed to Coney Island last Summer testified to the fact that New York is in itself a very distinguished Summer resort. Some very luxurious bachelors declare that it is the best. To be sure, with Delmonico's and the Hotel Brunswick, with their plashing fountains and flowers, and the exquisite luxuries of the table, and the whole of an empty house covered, as to floors, with clean matting, and with hot and cold baths, *à discretion*, a man may thus be more comfortable than in a stuffy room at Long Branch, or indeed elsewhere, especially if he can go down and breathe the salt air and bathe at Coney Island, when he feels the need of a few saline particulars in his body politic; and can also make a few other agreeable excursions to the Palisades and the mountains of New Jersey. Our men are obliged (or think they are) to stay in the city much of the Summer, and it is fortunate for them that they can enjoy it, and that the neighborhood offers them facilities for fresh air.

Detestable as New York streets become in July, from the dirt, the smells, and the cats, the hand-organs and the desolation; dry and nerveless as are the mornings and evenings, there still does come to it in August a sort of charm. It is cooler then, and has a sort of watering-place air; the musquitoes reserve themselves for September, and August is comparatively clear of nuisances. A great rain has cleaned the streets; the men look like East Indians in their white clothes; the matting has an Oriental suggestion; and to the lady who flits through town then from Newport to the mountains, or, dallying with her shopping a little, stops to make a necessary purchase and to pay a visit to her town-loving husband, the city seems a foreign place, her

KENTUCKY.—FEMALE MUMMY FOUND IN THE GRAND CRYSTAL AVENUE CAVE.—SEE PAGE 228.



own street an unfamiliar locality. She goes to dine at the restaurant, and to a Summer theatre, and drives with him in the now deserted Park. It all reminds her a little of the wedding-journey in Europe, and how they found each other the best company everywhere, and she is rather inclined to give up even West Point, most perfect spot for June and September, until a very hot day comes to alter her resolution and she flies the city—not quite agreeing with her bachelor friend that it is "the best watering place in the country."

THE ROOT OF THE EVIL.

IN commenting on the evils produced by the bad state of the English currency in the latter part of the seventeenth century, Macaulay justly remarks that it "may well be doubted whether all the misery which had been inflicted on the English nation in a quarter of a century by bad Kings, bad Ministers, bad Parliaments and bad Judges, was equal to the misery caused in a single year by bad crowns and bad shillings." In so writing he refers to the spurious and clipped coins which at that date had driven all honest money out of England, until, at length, in the year 1695, it could scarcely be said that the country possessed, for practical purposes, any measure of the value of commodities. When Parliament met in the Autumn of that year, all its members, adds Macaulay, were thinking of the state of the coin; all were saying that something must be done; and all acknowledged that they did not know what could be done. "I am afraid," said a member, "that the nation can bear neither the disease nor the cure."

Though the monetary condition of our country is far from being in anything like the desperate condition of the English currency in 1695, we have yet been often reminded, by current discussions in Congress at its present and former sessions, of the sagacious remark dropped by this radical reformer, who saw that financial palliatives would not cure the monetary gangrene from which England was then suffering, and who saw, too, that there was not courage enough in the patient to support the surgeon in laying a knife at the root of the cancerous growth. It seems to us that the wild schemes with which Congress has been flooded at its present session, by inflationists of both the greenback and silver stamp, are but the surface indications of a deeper disease which the nation cannot bear, and the only radical cure for which it has shown, thus far, very little willingness to endure. Bidding a truce to metaphorical speech, we venture to aver, with all positiveness and directness of language, that it is vain to hope for the disappearance of financial vagaries so long as the Federal Treasury continues to perform the functions of a bank of issue—that is, so long as it is required to maintain in circulation the existing volume of the legal-tender notes. In order that the political effect of this policy may be clearly apprehended by the reader, let us briefly review the steps by which the country has been conducted to its present attitude with regard to the United States notes.

When these notes were first issued, in the years 1862 and 1863, it was explained by the Secretary of the Treasury that they were issued only to meet the extraordinary emergencies imposed on the country by the war, and that, as soon as possible after the close of the war, they would be called in, redeemed in coin, *and cancelled by the Government.* We have before us, as we write, the annual report of Secretary Chase for the year 1863, in which he holds the following explicit language: "Just as soon as victory shall restore peace, the ample revenue, already secured by wise legislation, will enable the Government, through advantageous purchases of specie, *to replace at once large amounts, and, at no distant day, the whole of this circulation, by coin,* without detriment to any interest, but, on the contrary, with great and manifest benefit to all interests."

Soon after the close of the war Congress entered boldly and wisely on a process of contraction, which was the first condition precedent to the pledged resumption of specie payments, by the redemption of the greenbacks in coin. The reduction of the paper circulation was at first limited by the legislation of Congress to $10,000,000 for six months ending on the 12th of October, 1866, and was to proceed at the rate of $4,000,000 per month thereafter. The paper circulation of the country on the 1st of December, 1866, was as follows:

United States Notes, legal tender	$385,441,849
Fractional Currency	28,820,249
National Bank Notes	292,671,753
State Bank Notes	46,533,060
Gold Certificates of Deposit	25,638,500
Compound Interest Notes	147,387,140
Total	$920,292,551

We will not comment on the disastrous results produced by the change of financial policy adopted by Mr. Secretary Boutwell, who devoted his chief attention, not to the redemption of the paper currency, but to the payment of the public debt at a high premium and in advance of its maturity, thus crippling the productive industry of the country by laying upon it an intolerable burden of taxation (amounting in a short period to over $100,000,000) and at the same time leaving the currency in an unsettled condition while working contraction by the hard process of taxes levied to pay the bondholder before his time. Nor will we comment on the continuation of the financial woes that may be said to have sprung from the reversal by the Supreme Court in 1871, of the decision by which it had, in 1869, put the legal tender notes of the United States under ban of unconstitutionality for debts contracted prior to their issue. No laches on the part of Secretaries or of Courts can excuse Congress from its paramount responsibility in the premises, and, having pledged the country again and again to the earliest possible redemption of the legal tender notes and their retirement, it was the duty of Congress to take no step backwards until this end was attained.

Unhappily, the Act of 1875, pledging the United States to a resumption of specie payments on the 1st of January, 1879, was not explicit on the point in question. The supporters of that measure refused to say whether, under its operation, the United States notes, as they should be called in, were to be cancelled or not. Senators Schurz and Bayard, as consistent hard-money men and honest financiers, pressed for a frank and straightforward policy under this head, but they could not carry their point. The Republican caucus which matured the Resumption Act of 1875 had wisdom enough to see that the evils under which the country was then laboring could not be endured, but they had not quite wisdom enough to endure a permanent cure of the evils by providing for a withdrawal of the legal-tender notes, as well as for their redemption in specie. And, profiting by this weakness, the inflationists of the last Congress were able to carry through both Houses the Act of 1878, by which the Secretary of the Treasury is compelled to reissue the legal-tender notes as fast as they come in for coin redemption.

Now, while this state of things endures the inflationists have, in this "Congress-made money," a constant nest-egg for the hatching of their "flat-money" projects. Hence the crazy scheme of Weaver, proposing to issue $500,000,000 of new legal-tender paper, "to be used for such purposes as Congress by law shall direct"; of De La Matyr, calling for $1,000,000,000 greenbacks to be divided among various corporations; of Muldrow, asking for $500,000,000 in legal-tenders, and insisting that the present specie reserve of the Treasury shall be used up in redeeming the bonds of the Government, as far as it will go.

If we are to have an end of such assaults on the public credit and on the revival of prosperity, the Government must withdraw altogether from the banking business, for it is as true now as it was in the days when Aristophanes made it the topic of satire in one of his comedies, that bad money is the nurse of demagogues like Cleon and Hyperbolus.

THE DEAD OF THE WAR.

ONCE more our National Decoration Day has been celebrated. The army of the dead has again passed in review under the respectful salute of millions. Again the long muster-roll of honor has been called, and new flowers have been laid upon old graves, and tears have bedewed the flowers.

There is no more ennobling sentiment in human nature than that which impels the living to tender memorial tributes to the dead — to decorate their resting-places, to recall the virtues of their lives, and throw upon the unresponsive sod an evergreen suggestive of a life to come. Especially is this elevating and purifying when those who are honored have given their lives for others—have died for an idea, crowning their earthly hours with a high self-sacrifice. From this point of view, the mounds of all soldiers who have fought for a cause are holy, and worthy of being remembered by all who admire courage and devotion. From this point of view the passer-by would do a worthy thing to honor both the Blue and the Gray, and drop a wreath of flowers upon every soldier's mound:

"—— that low green tent
Whose curtain ever outward swings."

For he is dead; he died for what he fancied to be the welfare of others; and he found his muster-out at the front.

But there is even a higher point of view than this, which will commend itself to all except mere sentimentalists. That is, that the deserts of a dead soldier will ever be held to depend somewhat on the outcome of the fight in which he lost his life. If the world in the future shall deem that cause to be just, he will be doubly honored; if it shall hold the cause to have been unworthy, or ignoble, or even, on the whole, unnecessary, his grave will grow to weeds which the love of man will never turn to flowers. So, while the graves of both the Blue and the Gray will be decorated, for high personal qualities possessed or imputed, and while Pity will strew some roses of tender sympathy on the grave of him who gave his brave young life for a Lost Cause, the meed of honor will still be given to the hero who died that the Nation might live, because it is widely felt that his judgment justified his courage, and that he actually died for the establishment of a principle worth the sacrifice. For this supreme reason, the 30th of May must ever be more and more widely remembered, at least for another generation, while the day set apart for Confederate decoration will gradually be forgotten except for the personal expression to which it gives opportunity, and the celebration as a public rite will fall into disuse.

The celebration of Decoration Day by the North was this year uncommonly earnest and enthusiastic. No recent May has witnessed such an attestation of devotion to the soldier-dead. The fact embodies a solid ground of encouragement for the future, since it shows that the popular appreciation of the principles for which our soldiers suffered and died deepens and broadens with the passing years.

ENGLAND'S WARS.

THE British Government has been at length compelled to admit the failure of its plans for the subjugation of the Zulus. Not only was the task to which it addressed itself more formidable than was anticipated at the outset, but the agents employed for its accomplishment have proved conspicuously incapable and inefficient. To retrieve the disasters which have overtaken the British arms and secure the speediest possible termination of the campaign, the Government has now placed General Sir Garnet Wolseley in supreme command on the Zulu frontier, thus removing Lord Chelmsford, whose recall has been so loudly demanded; and should the Zulus continue to maintain their defiant attitude, hostilities will speedily be renewed on a scale and with a vigor which can scarcely fail, ultimately, to command decisive success. At the last accounts, two principal columns, operating from bases widely apart, were preparing to move upon Cetewayo's stronghold, but possibly this plan of campaign will now be temporarily suspended, awaiting the arrival of the new commander-in-chief. It is significant that, prior to the appointment of Sir Garnet Wolseley, military authorities in South Africa very generally regarded the war as likely to be prolonged over two campaigns. Another significant circumstance is that the Boers of the Transvaal still display an uneasiness which amounts almost to menace, and that, as a result, a portion of the British cavalry will be sent to guard the border and prevent an outbreak.

Meanwhile, in Afghanistan, Beaconsfield secures his "scientific frontier" with other concessions which make the Ameer a mere vassal of the British Government. The Ameer, however, appears to have secured very important pecuniary advantages before coming to terms, it being understood that he is to be paid a subsidy of $290,400 annually. The treaty also provides that British sympathizers in Afghanistan shall be amnestied; that the Ameer shall be supported against foreign aggression; that the British Resident at Cabul shall be provided with a proper escort; that he shall have power to depute British agents to the Afghan frontier on special occasions, and that the Ameer shall be permitted to send agents to India. It does not follow, of course, that because Yakoob Khan thus capitulates, either his people or the various claimants to his throne will submit in good faith to the new *régime*, but no resistance can long withstand the British advance, and the contest may therefore be regarded as practically over.

Terminating thus, with the acquisition of commercial and political advantages of the very highest importance, involving the effectual overthrow of Russian influence in the Afghan territory, the war, which for a time provoked vigorous condemnation at the hands of a portion of the British public, will be generally accepted as only another demonstration of the wonderful sagacity of a Prime Minister who, had he never won any other title, would have fairly deserved that of Fortunate.

STREET-CLEANING METHODS.

THE City of Boston enjoys a happy eminence in the cleanliness of its streets, as in many other matters, æsthetic, social and material. The system of cleaning is conducted altogether on business principles, with reference to sanitary rather than political ends, and is in every respect as practical and thorough as it can be made. Some 450 men are constantly employed in the work, 82 of whom are hand-sweepers, and there are 30 street-teams, 9 sweeping-machines, 6 water-carts—for laying the dust for the sweepers—57 ash-wagons, 41 offal-wagons and 12 cesspool-wagons. The force is divided into four sections, and each week 180 miles of streets are cleaned. As to the details of the work, a correspondent supplies these facts:

"The street-sweeping begins as a steady work April 1st, and continues to December 16th. Occasionally, during the Winter months, during dry weather, the streets are also thoroughly swept; and they are kept in as good condition as possible when snow and ice are packed into them, and the crossing-sweepers are employed steadily. The work of cleaning the business streets begins at 5 A. M., and is done entirely in the daytime. The principal business and residence streets are cleaned and swept thoroughly every day during the sweeping season, mostly early in the morning, before the street traffic begins, the other paved streets twice a week, and the gutters of macadamized streets once every two or three weeks. Ashes are collected once a week from dwelling-houses and from hotels three times a week, and offal from hotels, restaurants, boarding-houses and markets daily, and from dwelling-houses three times a week in Summer and twice a week in other seasons. The collectors go into the yards, bring out the vessels, empty them, and return them to their proper places. This is done, it is said, in no other city. In most cities the householder is obliged to set his vessels on the walk, and when they are emptied by the collectors they are left where found. The swill is conveyed to the depots, and there disposed of to farmers who come in from the suburbs and country towns round about the city, by whom it is removed every day. From these sales last year $30,000 was realized. The bulk of the ashes collected is at the present time dumped into the territory of flats upon which is to grow the beautiful Back Bay Park, about which so much has been said in the local press, and for which most elaborate and tasteful plans have been drawn."

These details show that the work of cleaning is done thoroughly and vigorously. The cost is not excessive, having last year amounted to $322,000. Is there any reason why the work of cleaning the streets in this city should not be done just as satisfactorily and effectively as in Boston? Why should a matter of such supreme importance to the health of the citizen be eternally subordinate to the interests of political "rings," and the appropriations made for preserving the cleanliness of the streets be treated as the legitimate plunder of partisan spoilsmen who are able to "run" ward primaries and control masses of voters in the interest of the dominant faction? Our authorities cannot better illustrate their desire to earn the applause of our people than by taking a leaf out of the record of the Boston Street-cleaning Department, and adopting the methods which have secured for it deserved and conspicuous success.

IN THE OLD WORLD.

ANOTHER great fire has flamed forth in Russia—this time in a village of the Upa Government. One hundred and eighty-six houses were burned. The suspected incendiaries have been arrested. Of the Nihilists recently court-martialed at Kieff, two were sentenced to be shot and ten to various term of penal servitude. Among the latter were three women, who were sentenced to fifteen years each. Two women were acquitted. A Berlin journal reports that several feminine Nihilists will soon be executed at Kieff. But, although the Nihilists doubtless number many women and girls among their most zealous and dangerous partisans, and the Russian Government would not hesitate, in case of necessity, to act promptly in the full spirit of General Butler's memorable order at New Orleans, yet the reports of the German newspapers on this point, and on the general condition of things in Russia, should be taken with several grains of allowance. A sensible and, in the main, trustworthy letter from St. Petersburg to the London *Times* depicts the actual situation in Russia as being neither a reign of terror nor a state of siege. "It is only a state of military law, where one-half of the population is set to watch the other." It is significant that little confidence is felt by the Government in the army. But the army of 30,000 *dvorniks*, or house-door porters, is fast becoming so useless and even ridiculous a burden that it is now proposed either to abolish the system or to reduce it to normal limits, in favor of an increased police force.

The Emperor of Germany proposes, it is said, to present a sword of honor to the Czar on the coming fiftieth anniversary of the latter's acting as colonel of a Prussian regiment of Uhlans. Hans Breitmann should write a special ode on the occasion. The election of Herr von Frankenstein, Ultramontanist, as Vice-President of the Reichstag, indicates a better understanding between the German Government and the clerical party. Prince Bismarck, after the victorious termination of his contest with the free-traders, seeks repose: he has left Berlin and gone to his estate at Varzin. He asked of the Emperor leave of absence for several months. An Alsatian origin is attributed to the new Prince of Bulgaria, who has just been visiting Berlin. His mother, the Princess de Battenberg, was great-granddaughter of Henri Guillaume Schweppenhauser, a Protestant pastor at Rechtenbach.

The new Governor of Roumelia, Aleko Pasha, made his official entry into Philippopolis on the 28th ultimo. But the telegrams announcing the fact do not agree as to what he wore on his head—no unimportant a matter, according to Herr Teufelsdröckh, whose opinion of the emblematic character of all clothes is indorsed by Carlyle and verified by history. One telegram says that Governor Aleko Pasha wore the Bulgarian headgear, and was, therefore, enthusiastically received; another, that he complied with the Sultan's express wish and wore the red fez, the symbol of Turkish authority, to the disgust of the Panslavists, and that his reception was more marked by

Digitized by Google

curiosity than by enthusiasm. The Sultan, by-the-by, has been won over at last by the Khédive of Egypt, whose desperate cause in opposition to England and France he has somewhat rashly promised to favor. Gordon Pasha is said to have resigned the dignities bestowed on him by the Khédive. The marriage of Hobart Pasha, the Admiral of the Sultan's navy (and well-known at Wilmington as a blockade-runner during our late civil war), to Miss Rosa Horn, of Wellington, England, has been announced in the journals of Vienna. That city, like, indeed, all other European cities, is looking forward with great interest to the speedy publication, simultaneously, in Vienna, Paris and London, of a German, a French and an English edition of the long-delayed "Memoirs of Prince Metternich." These "Memoirs" cannot fail to shed much light on a long and eventful period of modern history.

The eruption of Mount Etna is increasing in force and brilliancy. Rome is full of gossip about the lawsuit over the contested will of the late Pio Nono—not so scandalous a lawsuit, by any means, as that over the will of the late Cardinal Antonelli. Pope Leo XIII. is suffering from a slight indisposition. Cardinal Newman is recovering from his attack of pneumonia. Garibaldi has formally, by notarial act, renounced his domicile on the Island of Caprera and permanently fixed it in Rome; he would be glad also to sign away his rheumatism. The sanitary condition of Rome has at length awakened the attention of the Italian authorities and public to the urgent necessity of taking steps to improve it. The death rate there is from thirty-five to thirty-six in the thousand, to twenty-two in London. The population of Rome, which was 248,000 in 1874, is now 270,000.

It is expected that the wedding of King Alphonso of Spain and the Archduchess Christina of Austria will be celebrated in October. The Spanish Premier, Campos, intends to introduce in the Cortes a Bill for the Abolition of Slavery in Cuba, and to provide for free Chinese labor. The Royal message, it is said, will declare that the Cabinet leaves questions of reform to the Cortes, but insists upon the emancipation of the slaves.

The French Republic has again disappointed both its enemies, the Reactionists and its mistaken friends, the Radicals. The Chamber of Deputies, by a vote of 272 against 171, has refused "urgency" for the motion of M. Clemenceau demanding the tempory release of Blanqui. It is probable, however, that this old arch-conspirator will soon be pardoned. For an American it is difficult to see why he should not already have been released; but Blanqui and his countrymen of all parties well know the reasons. Emile Zola, the author of "L'Assommoir," has presumed to make a set attack upon Victor Hugo—as if a mud-scow were to attack a man-of-war. H. Lacosta, a Frenchman, who was naturalized in the United States some years ago, has been expelled from France for renouncing his nationality without performing his military duty to his native country.

THE FUTURE OF CAPITAL.

THE cheapness of money in all commercial countries is very naturally attracting attention and discussion. The cause of this state of things is found, of course, in the depression of trade which began with the Vienna panic nearly six years ago, and which has lessened the demand for money in a great variety of channels. It is plain that the period of great profits, high rates of interest, and extraordinary accumulation of wealth, has come to an end, and that hereafter capitalists must be satisfied with smaller returns, and industrial progress will be compelled to move with a slower and more gradual pace. But it would be a mistake to conclude, as some insist, that the capital now lying idle or unremunerative will not find profitable investment. The world is not yet, by any means, finished. The organization of industry is not yet complete, nor is the commerce of any country supplied with all the equipment needed for the proper development of trade. The *Saturday Review*, in a thoughtful discussion of this whole subject, shows very clearly the possibilities of the future in the utilization of capital, as follows:

"The United States have a vast railway system, if we think only of the absolute mileage; but if we compare it with their requirements, we shall see that it is entirely inadequate. When the present depression passes away, the work which it interrupted will be resumed, we may be very sure, and pushed actively forward. Russia is in a somewhat similar position. Political troubles and financial discredit may interpose delays, but if progress is not to be arrested altogether, material development must be recommenced. The Austro-Hungarian monarchy, Italy and Spain have only just begun the public works necessary to enable them to take the place in the world to which they aspire. And if we look further—to Turkey, China, Japan, South America, and Africa—we come upon boundless regions that are yet untouched. All these countries need capital, and though the credit of few of them stands very high, it would be a bold thing to say that they will not obtain what they need. Again, as respects the revolution in naval construction, a study of the returns relating to the mercantile marine of the world will show that Great Britain is the only nation which has fully recognized the value of steam and got rid of obsolete sailing vessels. The substitution of iron for wood is not complete even with us; abroad it has yet to be begun, while the adaptability of steel is but just coming up for consideration. Without venturing on predictions as to future inventions, or discussing the probability of electricity being largely used for lighting purposes, we may therefore safely conclude that the industrial transformation is still far from complete, and that ample scope may yet be found for the profitable employment of capital on a large scale."

A READER of FRANK LESLIE'S ILLUSTRATED NEWSPAPER, who became interested in Michael Dunn's Home for Convicts, in Water Street, through the illustrations published by us, has forwarded a contribution of $5 in aid of that work. The money has been paid over to Mr. Dunn.

THE vote on the Warner Silver Bill in the House of Representatives is very significant as showing the tendencies of the two great political parties. Including the pairs, the supporters of the Bill included 129 Democrats, ten Nationals and five Republicans; while in opposition to the Bill, there were 115 Republicans, one National and eleven Democrats. In the face of such a record, how can any sane man doubt as to where the country must look for the maintenance of an honest financial policy and the defeat of the schemes of jobbers and repudiationists?

THE overseers of Harvard, who have been wrestling with the question of admitting women to the Medical School, have decided that it is "inexpedient" to permit such an innovation, except under certain restrictions. These restrictions are that women shall be instructed separate from the men in all exercises in which students take an active part, such as laboratory work and recitations, and in lectures on women's diseases, anatomy and the like. There can be no doubt as to the reasonableness of the desire for greater opportunities than are now afforded for the higher education of women in medicine as well as in other branches of knowledge, and it is to be hoped that some plan may be arrived at by which, at Harvard and elsewhere, the highest advantages of medical instruction may be secured to females as well as males.

THE sale of the ten-dollar refunding certificates, in the large sales, has been stopped by Secretary Sherman, for the reason, first, that they were being bought up in large numbers by banks and speculators to the exclusion of the class for whose special benefit the issue of the certificates was authorized; and, secondly, because the enormous sales in the cities were making serious inroads upon the reserve funds of the banks, and transferring them to the Treasury, where they must remain in idleness until needed to redeem called bonds. The sales of certificates will be continued from Post Offices in rural districts, and efforts will be made so to regulate them that the certificates will fall into the hands of the class for which they were intended. It is to be regretted that this action was not taken before, there being now only $15,000,000 of the certificates to be disposed of.

IN the nomination of Hon. Charles Foster as their candidate for Governor, the Republicans of Ohio have shown conspicuous sagacity and good sense. Mr. Foster is not a great man, but he is an eminently safe man—courageous, upright, clear-headed, and conservative, and is, withal, the best political organizer, perhaps, in the State, having in every campaign in which he has appeared before the people carried a great deal more than his party strength. In four successive campaigns he was elected to Congress from a Democratic District, and his course as a representative always justified, by its candor, manliness, and independence, the confidence reposed in him by his constituency. It is creditable to his party that it has chosen him as its candidate over the non-radical and aggressive elements of its ranks; for, by that act, it has not only shown its appreciation of brave character and honest service, but has assured a canvass on its part free from the scandals and disreputable personalities which too often, owing to unworthy nominations, characterize our political campaigns.

THE "friends" of General Grant, who are organizing a "grand excursion" across the Continent to welcome him on his arrival at San Francisco, mistake the public temper if they suppose that they can, in this way, advance their scheme to compel the nomination of the ex-President as the Republican candidate in 1880. Men of all parties have been gratified at the reception extended to General Grant everywhere abroad, and will greet him with cordial welcome on his return to the country he has so signally served; but any attempt to turn to mere partisan advantage this spontaneous feeling of admiration and satisfaction will be sure to provoke the condemnation of the great body of our population. Surely the great soldier of the age does not need any blaring of trumpets or brawling applauses of scheming politicians to secure for him at home the same recognition he has received elsewhere in the world. General Grant has declared emphatically that he wishes to avoid a return to the anxieties of public life, and his over-zealous "friends" will best illustrate their regard by permitting him to have his way in a matter which primarily and chiefly concerns himself.

THE reports of the several departments of Christian effort employed by the Presbyterian Church, presented to the General Assembly at Saratoga, show that this great denomination is not abating in the least its vigor or aggressiveness. Presbyterianism, however exaggerated may be its conservatism on some social and moral questions, is always on the side of culture and intellectual development, and the service it has rendered this and other countries in elevating the character and tone of the pulpit, and so promoting a sound public opinion, can scarcely be over-estimated. The work it is now doing in this direction in the United States, is shown by the facts that the General Assembly has under its care thirteen seminaries, in which there were last year 534 students; that the standard of scholarship is being constantly raised, and that every effort is making to command for the church the highest talent and loftiest personal character. It may be said, indeed, that there is among all religious denominations a growing disposition to elevate the standard of qualifications among the clergy, and to recognize the demands of the pews for the enlightened discussion—in the light of the revelations of science, the lessons of philosophy, and the claims of modern progress—of the solemn problems with which the pulpit has to do.

PRESIDENT HAYES'S veto of the Legislative Appropriation Bill states, with great force and clearness, the objections to the repeal of certain portions of the election law which that Bill proposes, and asserts, very effectively, the right of the nation to protect the purity of the ballot. We quote a single paragraph:

"This Bill recognizes the authority and duty of the United States to appoint supervisors to guard and scrutinize Congressional elections, but it denies to the Government of the United States all power to make the supervision effectual. The great body of the people of all parties want free and fair elections. They do not think that a free election means freedom from the wholesome restraints of law, or that the place of an election should be a sanctuary for lawlessness and crime. On the day of an election peace and good order are more necessary than on any other day of the year. On that day the humblest and feeblest citizens, the aged and the infirm, should be and should have reason to feel that they are safe in the exercise of their most responsible duty and their most sacred right as members of society—their duty and their right to vote.

"The Constitutional authority to regulate the Congressional elections which belongs to the Government of the United States, and which it is necessary to exert to secure the right to vote to every citizen possessing the requisite qualifications, ought to be enforced by appropriate legislation. So far from public opinion in any part of the country favoring any relaxation of the authority of the Government in the protection of elections from violence and corruption, I believe it demands greater vigor, both in the enactment and in the execution of laws framed for that purpose."

THE Bill to establish a National Board of Health for enforcing quarantine regulations, and to prevent the introduction of contagious or infectious diseases, has passed both Houses of Congress, and received the approval of the President. The discussion of the bill involved some curious inconsistencies on the part of a portion of its supporters. Thus, while denying the right of Congress to control or regulate the time, place and manner of holding Federal elections, claiming that for it to do so was an invasion of State rights, they insisted that the Federal Government can enforce sanitary regulations in any State for the protection of the public health—thus absolutely subordinating the rights of the States, so called, to the authority of the nation, and surrendering the whole theory of State sovereignty. It is to be hoped that the friends of the Bill may not be disappointed in their expectations that its enforcement will be attended with beneficent results. The power it confers is certainly ample. It authorizes the National Board of Health to superintend the execution of all regulations enacted for the prevention of the introduction of infectious or contagious diseases at any port; to alter such regulations and supplement them with others, whenever deemed inefficient, and, generally, to secure unity and coherency, so far as possible, in the quarantine system and methods of the country.

THE law-abiding citizens of Lincoln and adjoining counties, in Mississippi, have taken a step which must afford sincere satisfaction to all friends of law and order. For ten years past gangs of desperadoes in these counties have perpetuated, unrebuked, all manner of lawless acts, raiding up and down the country in the dead of night, whipping and otherwise ill-treating colored citizens, burning their crops and destroying their homes. Recently, one of these gangs capped the climax of its enormities by deliberately assassinating an unoffending black; and, thereupon, unable longer to tolerate the reign of terror, the citizens, assembling in mass meeting, spoke out in rebuke of the bulldozers with an emphasis not to be mistaken. The state of society in that part of the South is shown by the fact that the Regulators, hearing of the proposed demonstration, posted a warning to those engaged in the movement that they "would be held to a strict accountability for all the measures of defense adopted by them—the notice closing with these words:

"At present you may be doing well, living peaceably and quietly, and in a prosperous condition; but we cannot warrant your future prosperity if you continue to interfere with the business of other people. If you are determined to carry out your undertaking, all well and good; all we have to say is, you must abide by the future consequences, let them be what they may. Advance one or two more steps, either by word or by act, and you will reach the dagger's point on which hangs the reality of our doctrine."

A community in which the menace of assassination is thus openly held over the head of every man who dares to rebuke lawlessness and crime certainly challenges the sympathy of all right thinking citizens. That the better class of Mississippians are, at length, organizing for the resistance and overthrow of the bulldozing despotism is at once creditable to their courage, and one of the most hopeful of recent indications that Southern feeling is tending more and more positively in the right direction.

NEWS OF THE WEEK.

Domestic.

THE public debt statement shows the increase of debt for May to be $62,250.

DREXEL, MORGAN & Co. have offered to take all of the new $10,400,000 loan of Philadelphia.

GENERAL JAMES SHIELDS, late United States Senator from Missouri, died suddenly on June 1st.

THE New York Elevated Railroad Company has been sold under foreclosure of a mortgage of $2,500,000 given by the Greenwich Street road.

SIX persons were burned to death, and thirty-five others injured by the burning of the Washington House at Hagerstown, Md., May 29th.

A PARTY of 300 Sunday-school officers and teachers started from Chicago, May 17th, for California, intending to visit the Yosemite Valley.

FIFTY-TWO pews in the new St. Patrick's Cathedral, in this city, were sold, May 30th, at premiums amounting to $12,410 in addition to the rentals.

DANIEL CAMPBELL has received the Gubernatorial nomination of the Greenback party of Iowa, on a platform hostile to a coalition with the Democrats.

SIXTEEN Brooklyn Aldermen have been declared in contempt of court for refusing to order a special election for a successor to ex-Alderman and Congressman O'Reilly.

THE details of the robbery of the Manhattan Savings Bank of New York City have been disclosed by the arrest and confession of Patrick Slevin, one of the watchmen.

A NEW Board of Trustees of the Globe Mutual Life Insurance Company of New York, having discovered a deficiency of $600,000, have petitioned for the appointment of a receiver.

THE Bribery Committee of the Pennsylvania House of Representatives has reported three members of that body as guilty of having corruptly solicited votes for the Pittsburg Riot Bill.

TWENTY-SEVEN children were poisoned, last week, at Newark, Vermont, by drinking water from a brook into which refuse matter had been thrown. Eleven of the children died.

A COUNCIL of Cherokees and six other Indian tribes, held last week in the Indian Territory, adopted an address thanking the President for his proclamation warning of intruding settlers from that Territory.

THE Catholic Archbishops and Bishops have issued an address in relation to Archbishop Purcell's debts, describing a plan for his relief and giving a statement of the assets and liabilities and the beginning of a subscription list.

A CYCLONE passed over Northern Kansas and Southern Nebraska on Friday evening, May 30th, killed forty persons, wounded many more, leveled sixty buildings, including several churches, and destroyed a belt of crops thirty miles in length.

THE Michigan Senate has passed a joint resolution amending the constitution authorizing the City of Detroit to raise money to construct a bridge or tunnel across the river at Detroit, the amount not to exceed one per cent. of the tax valuation.

A COMMITTEE of three has been appointed to draft an ordinance to be submitted to the Louisiana Constitutional Convention, advising that only about $5,000,000 of the present State debt be paid, the remainder to be declared invalid.

PRESIDENT HAYES, on May 29th, vetoed the Legislative Appropriation Bill, on the ground that it repealed the Supervisors' law, and denied to the Government of the United States the control of Federal elections. The House, by a vote of 135 to 91, refused to pass the Bill over the veto.

THE Republican State Ticket in Ohio, nominated May 28th, is as follows: For Governor, Charles Foster, of Seneca; for Lieutenant-Governor, Andrew Hickenlooper, of Hamilton; for Judge, W. W. Johnson, of Lawrence; for Attorney-General, George K. Nash, of Franklin; for Auditor, John F. Ogleree, of Clark; for Treasurer, A. E. Turney, of Cuyahoga; for Commissioner of Public Works, James Pellington. The platform condemns the course of the Democrats in Congress, approves the financial policy of the Government, and rebukes the agitation of industrial and financial questions as unwise and injurious.

Foreign.

THE American horse Parole won the Epsom Gold Cup, May 30th.

PRINCE ALEXANDER of Bulgaria has been invited by Queen Victoria to visit Balmoral.

MOORE centenary celebrations were held, May 28th, at Dublin, Belfast, Liverpool and various Irish towns.

THE English Parliament has adjourned for the Whitsuntide holidays, and will meet again on the 9th of June. The German Reichstag has adjourned to the same date.

THE English Derby, May 28th, was won by Sir Nathaniel Mayer de Rothschild's Sir Bevys, the second and third places being taken by Palmbearer and Lord Rosebery's Visconti.

THE deaths from cholera in the city of Morocco have been as many as 200 per day. Europeans suffer alike with the natives. A number of consuls and vice-consuls have died. The Ministers of France, England and Spain have raised a "famine relief fund."

OFFICIAL intelligence has been received at Athens that the Turkish troops, pursuing the Thessalian insurgents, crossed the Greek frontier and came in collision with some Greek troops. Fighting ensued, in which several Turks were killed. The remainder retired into Thessaly.

THE second naval battle in the war now waging between Peru, Bolivia and Chili, has been fought off Iquique, between the Peruvian iron-clads *Independencia* and *Huascar* and the Chilian wooden vessels *Esmeralda* and *Covadonga*. The *Huascar* alone came out of the fight. The others were sunk.

THE Zulus have taken to fighting among themselves and a great battle took place on May 11th, when Cetewayo completely routed, with terrific slaughter, a subordinate chief who, with some thousands of his followers, had determined to join the English. The latest advices indicated that the King with his entire forces was awaiting Lord Chelmsford.

THE Lords-Justices of Appeal have reversed the decision of the British Chancery Court, in the suit between the bondholders of the National Bolivian Navigation Company of the United States, and the Messrs. Collins, of Philadelphia, contractors for building the Madeira and Mamore Railway, involving the sum of £800,000. The respondents will carry the case to the House of Lords.

TWO SONNETS.

I.

A SUMMER PICTURE.

STROLLING hephazard as the whim may please,
In city squares I mark sweet baby-girls,
With great soft eyes and clustering silken curls,
All dimpled daintiness, who, with each breeze
Of quickening Summer, learn low, happy glees
From fountains arching in cool shimmering whirls,
While each sap-bursting bough o'erhead unfurls
Green pennons amid these casual ease.

And, seeing the innocent freshness of each face,
I marvel why such virgin flowers of flesh
Should bloom for soil of shame or blight's sad goal;
Since one may rail, beneath this prescient grace,
The spirit of Messalina born afresh,
One, Marie Antoinette's pure, martyred soul!

II.

A WINTER PICTURE.

Wrapt in soft furs, more soft and warm than they,
My brightest love-bird, my embodied song,
Through snow-girt country lanes, or 'mid the throng
That crowds the frost-bound city, threads her way,
Her gold hair half escaping from the sway
Of band or veil; the keen breeze, rough and strong,
Heightening the fluctuant color all along
Her sweet mouth's curve, her cheeks where rose-tints play.

And, as the passers catch her fragrant grace,
Her willowy motion and her beauty's glow,
And, at the sight, forget grief, want and crime,
I liken her, while proud love lights my face,
To rosebuds left belated in the snow,
Or apple-blossoms born before their time.

JOHN MORAN.

THE BURGLAR'S STORY.

BY

RICHARD B. KIMBALL, LL.D.

AUTHOR OF "ST. LEGER," ETC.

IT was on the 16th day of December, 1878, that I visited the Court of the Oyer and Terminer of the City of New York, and took my seat within the bar. I was attracted to the spot by an interesting trial which was set down, as I was informed, for that morning. While waiting for the case to be brought on, there came a sudden surge through the court-room. This surge was occasioned by a score of deputy sheriffs and police officers who were hurrying a man along the passageway into the room. These were succeeded by a crowd of roughs—eager, expectant, menacing. After them came other policemen, detectives, supernumeraries, and so forth. A crowd of spectators, gossip-mongers and idlers brought up the rear.

The judge was already on the bench. The counsel for the people, and the counsel for the man who had been so unceremoniously hurled upon the scene, were present in full array. This completes the tableau. No, it does not quite complete it; for there remains still the picture of the individual man who was now seated near his counsel, between two officers of justice. I looked at him with some degree of scrutiny. He was a large, deep-chested fellow, of prodigious strength, with features the reverse of repulsive. He exhibited an air of good-natured indifference to the surroundings. His thick hair was cut short. Its color was red. In fact, the man was "Red" Leary himself.

As his case had preference over the one I came to witness, and seemed likely to consume the day, I accepted the invitation of an old friend who sat near me, to lunch with him. The conversation naturally turned on the extradition motion, by which "Red" Leary was sought to be sent to an adjoining State for trial. From this it went to criminals of that class generally.

"You know," said my friend, "before I came to New York to reside, I was for several years District Attorney of ——— County, and in that period I tried a good many desperate men. I learned not to trust to appearances in forming any judgment about them. Indeed, the most dangerous and desperate have been those who were quiet in their ways and amiable in manner. It may interest you to give one of my experiences arising out of my office of prosecutor for the people—one which has always dwelt in my memory, and which I cannot shake off if I would."

I expressed a desire to hear his narrative, and my friend proceeded:

"It was before I came to the city to reside that I broke down completely from overwork. My friends thought I was in a 'decline.' My physician said I only needed a change of scene with plenty of physical exercise. The result was, I determined to visit Northern and Western Texas, and, once there, spend a couple of months in the saddle. It was the year before the breaking out of our war. Starting from Waco early in the month of April, I struck westward, having no particular plan for my journey, and no special point to reach, but governed only by the whim of the moment.

"Sometimes I made but twenty miles a day, sometimes thirty, sometimes even more. I had secured a good horse, a first-class Mexican saddle, in the holsters of which were placed a brace of revolvers, a couple of honest blankets, with the all-essential 'Texas stable'—to wit, a long rope, coiled to the saddle-bow, with which to stake out my steed, should night overtake me on the prairie, or in case I should be tempted to indulge in a *siesta* at midday.

"For the first three or four days, my route took me through many finely cultivated farms, where cotton and corn were raised in about equal quantities. After that I entered the stock-raising district, and would travel for hours without encountering a human face or sign of human habitation. The clear, dry exhilarating atmosphere soon raised my spirits to their natural tone. I felt in no sense lonely in those grand solitudes. The prairie was covered with Spring blossoms, and the waving grass looked like the sea under the force of a mild breeze.

"There were no taverns to be met with, but every house or hut I reached served my wants with alacrity, for which sometimes the offered compensation was accepted, but oftener declined. At each house it was my habit to take information for my next resting-place. In this way I was relieved from anxiety, and left free to idle away the time or push on briskly at discretion. As I advanced, the roads, if, indeed, they could be called roads, ceased altogether, and were substituted by 'trails.' This change required me to keep more on the alert as to my bearings, and to particularly notice my directions, especially where trails intersected or branched off.

"I think I had been a week on my journeying, and was beginning to find the stopping-places so few and far between, that I decided, after another day's travel, to turn more to the southward, and thence, after a while, to strike a northeasterly course, which would bring me back to Waco, my starting-point. At noon of that day, I stopped at a miserable hut, whose occupant, as he told me, was in the employ of the owner of a small sheep ranch which I had noticed some distance back. He seemed to be wretchedly poor, but his welcome was hearty; he gave my horse some corn, and I was invited to sit down to the inevitable repast of 'hog and hominy,' which in this case was not accompanied by the usual cup of coffee, and for the lack of which the wife profusely apologized. After we had finished, I asked the man where I would be likely to find a place to stop for the night. He told me if I could make twenty miles before it got to be too dark to see the trail, I should find a very comfortable spot, with plenty of corn for my horse and 'chicken fixens' for myself. I took the directions very carefully, with the added precaution of putting them on paper, for my man warned me if I failed to reach the place I should have to 'stake out' for the night. There was a ranch, he added, four or five miles nearer, about a mile to one side, but he would not advise me to stop there, not that he had anything to say against the man—nobody knew anything against him—he was queer, that was all—did not meddle or make with anybody—had a nice *section*—was raising the best sort of horses.

"I took my departure. It was nearly two o'clock. I had at least five hours, as I reckoned. I assured my good-natured entertainer that I could make the distance easily. He warned me to be careful not to lose the trail, and, in case of doubt, to always bear to the northward. Thus cautioned, I set forward. I scarcely know why, but not since I started on my journey did I feel so little inclined to push on industriously.

"I had entered a specially beautiful region. Along my path the prairie was dotted with magnificent live oak, which ornamented the landscape with such regularity that it was difficult to make myself believe the trees had not been planted there by the hand of man. To hasten over such a lovely country, when I was traveling for recreation and enjoyment, was preposterous. I had only to put my horse to his mettle for an hour and make up for lost time.

"Thus resolved, I proceeded at my leisure till, emerging from the neighborhood of the live oak, I was called at once to decide between two trails. One turned, as it appeared to me, abruptly north, the other pursued apparently, almost the line of my journey. True I had the plain direction to take a north-bearing trail in case of doubt, but in this case there could be no doubt, and I pursued what appeared plainly to be my course. I was a good deal taken aback by finding the trail bending gradually to the south; but as luck would have it, I encountered another of the sheepmen, who turned me square about and put me on the true course—to wit, the one I had purposely rejected.

"A full hour was lost by this blunder, and nothing remained for me but to push on with all the expedition possible. I now carefully scrutinized conflicting trails, and while following my instructions, felt all the time a disagreeable incertitude as to the course and the progress I was making. Sunset would soon overtake me and I knew in that latitude there was little or no twilight.

"At this juncture, reaching the summit of a swell of the prairie, I descried far off on the next summit a person, who, as I soon discovered, was riding towards me. It is a curious feeling with which we wait the approach of a traveler on the open prairie, after riding perhaps half a day without encountering a soul. Sometimes the person stops to greet you, and then follows an interchange of salutations. Sometimes there is only a slight nod and a brief good-day; sometimes—mutually suspicious—you pass your man and he passes you without the slightest sign of recognition. In this instance I awaited the meeting with the stranger with eagerness. I certainly could get some information from him about my way, so I resolved to hail him under any circumstances.

"While we descended from the summit and passed along the plain towards each other, I had an opportunity for careful inspection. As he came near I discovered a man in the prime of life, large and very strongly built, with long light hair, which was plainly visible under his wide *sombrero*. He rode a magnificent dark bay stallion, seventeen hands high, I should say. His accoutrements were in the usual style of the country. Besides his revolvers, a rifle was swung in a leathern yoke across the saddle-bow.

"By the time I had finished my inspection, and decided that there was nothing unfriendly in the appearance of the stranger, he was upon me. To my surprise, I saw he was about to pass without speaking or, indeed, noticing me in any way. I brought my horse to a sudden halt—you must know that a horseman's pace across the prairie is a walk—and speaking with some energy, I said:

"'I wish to inquire the way to Miller's ranch; am I far from it?'

"He stopped on being thus appealed to, and answered quietly, scarcely looking at me the while:

"'You are on the right track; the distance is about six miles.'

"He had already started to go on, when I exclaimed:

"'Excuse me. Is the route at all intricate? If so, will you give me some information about it?'

"He answered at once:

"'Follow this trail for a mile; you will then cross a trail bearing a little to the north; take that for two miles, when you strike a dim trail on your right; follow that for about two miles and you will come to an open trail which, in ten minutes, will bring you to the ranch.'

"With that he pushed forward without further speech, and left me to pursue my path.

"'A mile on this, another trail for two miles, and then a dim trail, then an open one, the sun just going down, and a twilight not worth a rushlight.'

"That is what I said to myself. I put my horse into a gallop and watched for the first trail and found it. Then two miles as rapidly as possible; but the night was on me. It was clear, but no moon. With the utmost caution I looked for the dim trail. It turned out that I found it and went on the right track, though I did not know it at the time. And now came the trial of patience. First, I was not certain I was on the right track; next, my progress was very slow in holding to the trail I had. Before I had gone a mile it seemed as if I had traveled three miles, and I was already on the lookout for the open trail that was to take me to the wished-for spot. At last I found one. I followed it for half a mile till I saw a bright light in the distance. Coming nearer, I was set upon by a number of dogs, whose ferocious barking at any other time might have greatly disturbed me; but believing myself at the destined haven, I pushed on to the house, when a stout negro man came out and asked me what I wanted. His tone was decent and respectful, but in no way indicative of hospitality. I asked if this was Miller's ranch. He answered promptly in the negative, and said I must go back to where I turned off; from there it was about two miles and a half. It was now dark. I rode back, picking my way as well as I could, but I knew I had missed the trail, and felt that it would be foolish to beat about the prairie. I was on the point of making for some timber near by, where I would pass the night, when I heard the tread of horse's feet, and in another moment the stranger whom I had passed some time before rode up to me.

"Checking his horse, he said:

"'You have lost your way, I see. You may as well come to my ranch for the night. I am not in the habit of taking in strangers, but I will make you welcome.'

"There was something genuine in the tone of his voice, and I accepted his offer without hesitation, and in a few minutes we were at the door of the ranch where I had previously brought up. As we dismounted, the dogs, which had assailed me so savagely, and which had not disturbed us even by a growl, rushed forward to welcome their master, snuffing suspiciously at me, but refraining from any menacing exhibitions. The stout negro man took our horses, and I was ushered into the house. It was of logs, and consisted of one large room, in which were placed, at opposite corners, two comfortable beds. Around the room were hung saddles and bridles; two or three shot-guns, some stag's horns, and various articles of a sportsman's life. In the middle of the room a table was already spread with clean linen and nice crockery.

"The owner stepped from the door to an adjoining building, where the kitchen was located, and in a few minutes an old negress, good-natured and motherly in appearance, with a bright bandana handkerchief around her head, came in with a dish of fricasseed chicken, which was accompanied by flour biscuit and griddle cakes, and strong coffee, with sugar and real cream, to which I must add fresh butter.

"I confess I ate voraciously, and I certainly had the opportunity, for my host seemed utterly averse to conversation. He did not address a word to me, except to offer the ordinary civilities of the table, and to any attempt of mine to draw him out, he answered in the briefest manner. When supper was finished, he pointed to one of the beds. 'You are, no doubt, tired and want to turn in. Take that bed, if you please. We have to rise early.' With that he went out at the open door, and I could hear him give one of his men some orders about the horses. Taking my host at his word, I undressed quickly and went to bed.

"It was then for the first time the stranger's face began to haunt me. Where had I seen it before? I *had* seen it before—of this I now felt certain—but where, when, under what circumstances? By degrees a painful feeling began to connect me with the man. Further than this memory would not aid me, and while endeavoring to force her to do her office, I fell asleep.

"I was awakened by a not unfriendly hand on my shoulder, and, opening my eyes, found it was broad daylight, and saw my host standing over me. He said breakfast was nearly ready, and told me I would find water and towels in the washroom near by. So saying, he left me. Again I tried to recall the face, and failed to do so. Again I felt a painful idea which connected me with the stranger. I lost no time in preparing for breakfast, and found my appetite not a whit weakened by the hearty supper of the night previous.

"We sat down to antelope steaks, fried sweet potatoes, biscuits, griddle cakes, and various etceteras. My host seemed completely to have changed from the individual of the previous evening. He was ready to converse on any topic—in fact, I found him exceedingly agreeable. Only there still remained associated with him the painful idea. I took occasion in the daylight, when he would not notice it, to look at him with a more careful scrutiny. He had a frank, open face, but there were lines about the mouth and across the forehead which, when he spoke with emphasis, hardened into a repulsive expression.

"We talked about Texas and its capabilities; then about his own occupation—of horse-raiser—which, he said, if properly managed, was very profitable. I told him I marveled at finding such good cheer in his ranch, and he replied that in no country was it so easy and so cheap to live well, and in no country did folks live so miserably as in Texas. 'Had you struck a stock-raiser you would have been regaled on boiled beef a good deal the worse for wear, or hog and hominy, no milk, no butter, for, though the fellow might have a thousand head of cattle on the prairie, he would be too lazy to tie up two or three cows with their calves for the sake of having either.'

"Naturally it followed to speak of my journey, which I said was undertaken to recruit my health, somewhat broken by overwork in my profession. A strange expression crossed his countenance—bitter, hard, repulsive.

"'You are from the North,' he said.

"'Yes; from the State of New York.'

"'——— County,' he added.

"'You are right,' I answered, much surprised; but how did you know that?'

"'Is not your name E—— F——?' (giving it in full), he continued, in the same hard tone.

"'Right again,' was my reply, 'and now tell me where we have met?'

"'You think, then, we have met before?' asked my host, coldly.

"'I begin to feel sure of it,' I said; 'from the first I thought your face one I had seen before.'

"'Indeed?'

"Such was the brief colloquy which had become, on his part, sharp and cold. We both rose from the table, I trying again to place the stranger. It was in vain.

"'Come,' said the other, 'I want to show you a few horses which are in the yard; then we will take a ride over the prairie, and inspect the drove.'

"We passed out towards his stables, and I had an opportunity to look at the surroundings. Everything was in good keeping and in perfect order. We examined some fine yearling colts and half a dozen horses just brought in to deliver to a purchaser. Next I admired the vegetable garden and the poultry yard. We walked down a slope towards a stream of respectable size, across which was a foot-bridge. Crossing it, my host seated himself on the trunk of an immense cottonwood tree which appeared to have been uprooted by a storm. Mechanically I sat down by him.

"He took off his hat, and, turning squarely towards me, he said:

"'Tell me, on your honor, do you not recognize me?'

"'On my honor I do not.'

"'Look again,' he said, pushing back his hair with both hands.

"'Charles F——?' I exclaimed, with sudden recollection. It was an imprudent avowal.

"The first case of importance which I was called on to try after being appointed District Attorney, was one for burglary, an aggravated affair, by a very young man, of good connections and education. I was but twenty-five, ambitious, and untiring. The prisoner was defended by able counsel, and I devoted all my energies and my talents to secure a conviction.

"I learned as I grew older that the office of public prosecutor, while it should be employed to bring the criminal to justice, should never be used to gratify the craving for success.

"The young man was convicted and sentenced to ten years' hard labor in the State's Prison. As he passed out of the court-room in custody, he said to me, in a hoarse whisper, 'I will get even with you.' Such little pleasantries are of frequent occurrence in the life of a prosecuting officer, and I paid no attention to it. In a few days the young fellow was put on board the train for Auburn, in charge of two deputies. His manner was so subdued, and he appeared so entirely resigned to his fate, that he was not handcuffed or shackled. The result was he managed to jump from the train while at full speed, as it was passing through a dense wood, and that was the last ever heard of him, until fifteen years later I found myself sitting on the same log with him on his Texas ranch, and made impulsively what I have called an imprudent avowal. It did not prove to be so, however. He heard it without any perceptible emotion.

"'It is best so,' he said. 'Had you left me while still unable to recall my face, it would probably have flashed on you at one time or another, and you might have felt it to be your duty to give information about me. I have led this life, as you now see me, honestly pursuing my way for nearly fourteen years, and I ask you to promise that you will never mention this meeting to human being.'

"'I most freely make you the promise,' I replied. 'I should not have mentioned it under any circumstances. I am not now District Attorney, so no sense of official duty weighs on me. Indeed, under no view of the case, would I seek to disturb you.'

"'I must tell the whole story, though. I shall not be satisfied unless I do,' he continued.'

"'As you like,' was my answer; 'but it is not necessary in order to strengthen my pledge to you.'

Digitized by Google

"My host, without noticing my remark, proceeded as follows:

"'I am, as you are aware, of respectable family, and was well educated in English studies. I was an only child and lost my mother early. At nineteen my father died. A very considerable property was intrusted to the care of a friend of my father's, who was executor and trustee under the will, in which all his property was left to me. This man was a rich man—he did not require my patrimony for his needs. There was no temptation of poverty pressing him, but he robbed me of the whole of it—robbed me without violating a sentence of the statute. I can see his smooth, hypocritical, oily face now as he came in to have his accounts passed in the Surrogate's office, and they were passed, leaving me, at the age of one-and-twenty, with nothing but the clothes I stood in.

"'I must tell you I was not fond of work, and leaving school after my father's death I did little toward seeking a permanent situation. The belief that I had a moderate competence was, no doubt, an injury. My habits were good, my instincts correct, but my nature was unsteady, my temper violent, at times ungovernable.

"'I felt intense hatred of the sanctimonious wretch who had devoured my heritage, which hatred ripened into bitterness toward every human being, without distinction, who was rich. Indulging in such sentiments, it was natural I should gravitate toward those who held similar views. You readily comprehend what class it was. I found there existed a set of desperate people who scouted all obligations of society, who declared that laws were made to protect the rich and oppress the poor, with jargon of that sort. It was not long before I had associated myself with some young men with the avowed object of setting all laws at defiance, and regulating, as far as we could, the inequalities between rich and poor by the strong hand. We indulged in the usual Quixotism of the 'gentlemanly' highwayman and robber. We were to despoil the rich, and in this way assist the poor. Our work should be judiciously planned, and everything done under strict system and discipline.

"'Our very first attempt proved disastrous. I was arrested while in possession of the whole booty, which my counsel, as you remember, endeavored to prove had been maliciously deposited in my quarters by an enemy. You know what followed. I was convicted, sentenced, and got away by jumping from the train. My escape had been arranged by my two coadjutors, who were not arrested. They were untiring in their efforts to secure my liberty, and everything worked exactly as it had been planned. It was in the night, and before the train could run back and put men in search of me, and then reach a telegraph station, I was twenty miles away in safe hiding.

"'You may think this catastrophe cured me of any further thought of leading a life of violence. Quite the contrary. I was all the more fascinated by it. The devotion of my associates I regarded as one of the strongest evidences of the correctness of our principles, since all were willing to peril life and liberty in behalf of them and of each other. I remained in my hiding-place several weeks, and then ventured, after proper disguises, to transfer myself to a distant locality, were I was joined by one of my confederates, the other undertaking soon to be with us.

"'It was but a few days before we planned what promised to be a very easy affair. A respectable man, connected with a railroad company, was in the habit of bringing to his house considerable sums of money when the packages arrived too late to place them in the large safe at the office. These packages he would put in his writing-desk, of which he kept the key, instead of carrying them on his person. The man was a widower with an only child, a daughter, a little girl twelve years old, far gone with consumption. It was a servant in the house who gave all the necessary information and kept us fully posted. At this time money packages would be brought home by the man at least twice a week, and it was the part of the woman who had charge of the chambers to tell us when, and to indicate a favorable opportunity for the attempt. It came at last. Two packages had been brought in and locked up in the writing-desk. The man had to go away after tea, and would not be home till late; the cook was to have her 'evening out,' and the remaining servant, who was in league with us, would take care to be in the kitchen for the short time required for our operations.

"'It was a little past nine when I entered the house and made my way up-stairs. My confederate watched outside to give any necessary warning. I walked quietly into the chamber, where I knew from a glance from the street that a light was burning. To my surprise I found it occupied. On a cot placed near the large bed, lay the little girl. She was awake, and before I was fairly in the room I heard her say 'Pa.' When she saw me she opened her eyes wide, but she did not utter a word. How could I rush up to that pale, delicate child and threaten her if she made any noise? Something I did do—I raised my finger in a way scarcely menacing, but as if I would say 'Hush!' and proceeded quietly to unlock the writing-desk and abstract the two packages, which I thrust into my breast pocket; then I locked the desk and turned and left the room.

"'This occupied a couple of minutes, but the child never took her eyes off me—and with such a look! Her long illness had given to her young, pale, thin, wasted face a matured expression of the utmost softness and refinement—angelic I must call it. The large black eyes—unnaturally large and black by contrast—followed every movement of my hands till I had secured the money. Then they regarded me with a look so sorrowful, so pitiful, so compassionate, that I felt myself to be in the presence of a superior being who knew just my state and was judging me in mercy. No being can picture how I felt.

"'I divided the booty and quitted the place before a hue and cry was raised. My confederate and I agreed to separate, each to look out for himself. I had already decided—had decided as I closed the door of that chamber and saw those eyes fixed on me in a last look.

"'The particulars of my escape would not interest you. I reached the interior of Texas, and, pushing beyond any settlement, I located on this spot, a 640-acre claim. It cost me but a hundred dollars. I undertook the business of raising horses. It was more to my taste than stock or sheep-raising. I was scarcely twenty-three when I began; I am now thirty-seven. Two years ago I sent back the last instalment, with interest, of the stolen ten thousand dollars of which my confederate had received the half.

"'Perhaps you may say it was my duty, under the new light which seemed to dawn in me, to have returned the packages and given myself up to justice. I cannot agree with you. I do not know that I can call myself a repentant man. I admit that I was a mistaken man, and that my plans for setting matters right between the rich and the poverty-stricken, by robbery and violence, were impracticable and wicked. But my views have not changed in regard to rich people. Tell me what all the denunciations of Scripture mean? Do they mean anything? 'Go to, ye rich men, weep and howl!' Does that mean anything? 'How hardly shall they who have riches enter into the kingdom of Heaven.' What are we to understand by that? Are we to make any practical application of the story of Lazarus and Dives? I tell you I believe it to be a heinous sin for a man who possesses the faculty of accumulation to increase his wealth beyond a certain amount. He should employ it to aid those struggling to live and to earn food and clothing. I do not say that I know of a way out of these evils; but I do say that the coldness, the heartlessness, the indifference of the rich as to the existing state of things, and their merciless course towards the poor and suffering, are producing a class of desperate men—robbers and burglars and thieves. Further, such a course gives birth to numerous organizations which conservative people call subversive of society, and sooner or later it will provoke a great uprising on the earth. Recollect what I say.

"'For me, I live the life of a banished man. I knew you the moment you came within hailing distance. I saw you did not recognize me, and I desired to pass you unnoticed. When I encountered you again I thought I perceived a trace of recognition in your face, and I preferred to secure your confidence than run the risk of circumstances. You know—you must know—that all these years I have felt my arrest possible at any time. I have lived and do live with the sword suspended over me. I have one ever-present and prevailing consolation—the memory of the dying girl and what I feel was her compassionate judgment of me.'

"We were both silent for a few minutes. Then my host rose. I followed him mechanically. We found the horses already saddled. Mounting, we rode in the direction of the cavvard. I expressed my admiration of the drove; then he put me on the right trail and we parted.

"I did not look back till I was about to descend the next roll of the prairie. Then I turned and saw him sitting on his horse just where I had left him. He seemed to be looking wistfully towards me, but he made no sign and I rode forward."

DECORATION DAY IN NEW YORK CITY.

FRIDAY, May 30th, was distinguished by the finest weather that could be desired for the observances of the annual tribute to the memory of the soldiers and sailors who fell in the late rebellion, in New York City and vicinity. The occasion partook more fully than usual of the features of a holiday, while the soldiery in the streets and cemeteries was certainly far in advance of previous demonstrations.

Much of the ceremonies was of a routine or settled character. Lincoln Post, No. 13, G. A. R., decorated the Lincoln statue and held appropriate services there, and the like honor was paid to Washington by the butchers of Washington Market; to Lafayette by the French Benevolent Society and the Lafayette Guard, and to General Worth by the Mexican War Veterans. Kearney Post, G. A. R. decorated the grave of their late commander in Trinity Churchyard; the officers and employés of the Post Office, nearly 800 in number, placed a floral monument by the grave of General Dix, formerly Postmaster of this city, and the monuments and graves of other prominent men were visited by organizations named after them.

While much popular interest was exhibited in the services at the monuments, statues and graves in the city, the greatest attention was paid to the grand procession. A little before ten o'clock in the morning the column began to move down Fifth Avenue to Fourteenth Street. Passing through that street it marched around the Lincoln statue, then up Broadway to Seventeenth, thence to Fourth Avenue; down that to Broadway, passing between the Washington and Lafayette statues, and down Broadway to Murray, where the military escort halted, while the Grand Army Posts continued their march to the churchyards and suburban cemeteries to decorate the graves under their special charge.

The entire procession was under the command of General Charles K. Graham, Grand Marshal, who merits high credit for the punctuality and regularity with which he carried out the formal programme.

The procession organized in nine divisions with an escort. The First Division of the National Guard, under command of Major-General Shaler, acted as the escort. It consisted of separate Troop A, Captain Karl Klein commanding; separate Troop B, Captain L. T. Baker commanding; the Fifth Regiment, Colonel Charles S. Spencer commanding; Seventh Regiment, Colonel Emmons Clark commanding; Eighth Regiment, Colonel George D. Scott commanding; Ninth Regiment, Colonel S. Oscar Ryder commanding; Eleventh Regiment, Colonel Frederick Unbekent commanding; Twelfth Regiment, Colonel S. V. R. Cruger commanding; Twenty-second Regiment, Colonel Josiah Porter commanding; Sixty-ninth Regiment, Colonel James Cavanagh commanding; Seventy-first Regiment, Colonel Richard Vose commanding; Battery B, Captain John Keim commanding; Battery K, Captain Augustus Hoebzle commanding, and the Third Cavalry, Colonel John H. Bodine commanding. Then followed the Grand Army of the Republic with Major-General Charles K. Graham as Grand Marshal. The first separate troop of cavalry, Captain J. M. Jarvis commanding, formed the headquarters guard, and immediately in their rear came the carriages containing guests. The guests were Major-General Hancock and staff, Admiral S. D. Trenchard, Commodore Nicholson, Captain S. B. Lucy, and other naval officers; Captain John Faunce, General Daniel E. Sickles, John S. Corse, Abner Doubleday, Horace Porter, John Cochrane, Martin T. McMahon, E. Merrit, Silas S. Burt, Lloyd Aspinwall, John C. Robinson, Commander-in-Chief of the Grand Army of the Republic; James McQuade, George B. Woodward, Jefferson C. Davis, Henry A. Barnum, and Silas B. Dutcher. Then came the first division of the parade proper, under General T. F. Rodenbough. It was composed of the United States Marines, a naval battalion of sailors from the *Minnesota*, Battery C, of Third United States Artillery, Mexican War Veterans, and the military Order, Loyal Legion of the United States. The Second Division, with Jno. H. Davis and Samuel G. Hayter as aides-de-camps, was made up of Phil Kearney Post No. 8, G. A. R., uniformed officers of United States Customs of the Port of New York, with color-guard of sailors from the revenue cutter Grant, the Veteran Corps Sixty-ninth Regiment, Tenth New York Volunteer Association, Fifth New York Volunteer Veteran Association, and Sumner Post No. 14, G. A. R. The Third Division, under command of George A. Travers, followed. It comprised the Turner cadets, Koltes Post No. 32, G. A. R., Veteran Singing Society, and the Thirty-ninth, Forty-first, Forty-fifth and Sixty-eighth New York Volunteer Veteran Associations. The Fourth Division, under Louis Schlamp, Jr., consisted of the Andersen Zouaves, J. Lafayette Riker Post No. 62, G. A. R., Blenker Verein Veterans, Oesterreich Singing Society, New Yorker Leidertafel, Bohemian Schützen Corps, Company H, Eleventh Regiment, Veteran Society, Pioneer Corps, Yager Company, Jackson Company 39, G. S. R., Washington Rifles. The Fifth Division, D. Sullivan, marshal, was composed of the Veteran Zouave Association, Dahlgreen Post No. 113, G. A. R., Sullivan's Battery, Cameron Post No. 79, G. A. R., George G. Meade Post No. 28, G. A. R., and the Veteran Guards. The sixth division included the Fire Department, and was under command of Charles O. Shay. The division was made of Engine Companies Nos. 1, 3, 4, 13, 15, 18, 28, and 39, and Hook and Ladder Companies Nos. 2 and 12. The American District Telegraph Company, patrol detail, and fire extinguishing apparatus, with the officials of the company, were also in this division. The Seventh division, under command of James B. Homer, was composed of Reno Post, No. 44, G. A. R., E. A. Kimball Post, No. 109, G. A. R., the Ninth New York Volunteers, Veteran Association, Veteran Association Forty-second Regiment, and W. D. Kennedy Post, No. 42, G. A. R. The eighth division, under command of Abram Duryea, comprised Batalion des Guarde Lafayette, Associazione Italiano, Guardia Colombo, Veterans of the War of 1812, Washington Continental Guard, Abraham Lincoln Post, No. 13, G. A. R., Kitching Post, No. 60, G. A. R., of Yonkers; Oliver Tilden; Post, No. 90, G. A. R., and the Skidmore Guards. The ninth division, under command of James H. Donovan, was made up of Wadsworth Post, No. 77, G. A. R., Robert Anderson Post, No. 58, G. A. R., James C. Rice Post, No. 29, G. A. R., Ellsworth Post, No. 80, G. A. R., and Farragut Post, No. 75, G. A. R.

Special memorial services were held in Trinity Church at noon, and in the Academy of Music in the evening.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Military Sports in Afghanistan.

The amusements of the British officers and soldiers during the Afghan truce are many and novel. At the camp near Jellalabad the troops have erected an amphitheatre, simply constructed by digging a few trenches in a horse-shoe form in front of a mud platform which has a low, mud wall at the back of it. The audience sit on the ledges of earth formed by the trenches. Three fires of wood burning in front of the stage answer for the footlights. This "lyric theatre" is within the artillery lines. The football match was played by the Fifty-ninth Regiment, at Khelat-i-Ghilzais, and was the first occasion on which the game has ever been attempted in Afghanistan. Every one turned out to see the fun, and even the native "Ghilzais" sent representatives, who seemed to enjoy the game as well as the music of the band in the apathetic sort of way which apparently is natural to them.

Engaging Female Servants at Adelaide, Australia.

Usually on the arrival of a ship from England at Adelaide, Australia, the single female immigrants are at once landed and conveyed to the Servants' Home in Flinders Street, at the expense of the colony. Employers of labor are then notified by advertisement in the newspapers at what time the girls will be ready to be seen and engaged. Ten o'clock A. M. is the hour fixed, but long before carriages, wagons, cabs, and other vehicles have conveyed quite a host of employers to the Home, while many others flock thither on foot. On the morning this sketch was taken thirty-two girls were engaged within the space of ten minutes. The demand is always greater than the supply.

Lord Chelmsford's Relief of Ekowe.

On March 30th much delay was occasioned at first starting by the difficulty of getting over a small watercourse which lay between a steep descent and an equally steep ascent. Wagon after wagon plunged into the slough, and stopped dead. Extra spans were harnessed on, and after a prolonged scene of confusion, during which the sun rose high in the heavens, the sprint, or watercourse, was at length overcome. Owing to this delay the advance guard did not arrive within a mile of the Amantikulu until 2 P. M. After a short visit to the drift, Lord Chelmsford decided to encamp where he was—that is, on the right bank of the Amantikulu—as the water was high, and crossing would have occupied the troops until a late hour in the night. The whole of the following day was occupied in crossing the Amantikulu. The river was high, and the stream rapid; it was consequently necessary to harness sixteen spans on to each vehicle, and in many cases twenty or twenty-five couple of oxen were attached to one wagon, around which also swarmed natives working hard, up to their waists in water. After the crossing had been accomplished, the bulk of the troops—a body of mounted infantry excepted who had been detached to burn some native kraals—halted on the side of a hill, and there remained for the rest of the day. The heat was very great. By the time the last wagon had crossed it was too late in the day to proceed further, so a laager was constructed, and the troops outspanned for the night.

The Crisis in Burmah.

Toungboo, which has been a British frontier station since 1852, is situated on the bank of the river Sittang, and is the chief town of the territory of Pegu. The ancient city was one of very great magnificence, but when it first came into British possession it consisted mainly of a few ruined pagodas, scattered over a vast quadrangle, inclosed by a massive wall and deep ditch. Since that time, however, great improvements have been made, and the wealth and importance of the place have much increased. It was to Toungboo that the ex King of Delhi was banished in 1858. The battery which has been ordered to Mandalay to act against the troops of the King of Burmah is quite unique in its equipment, being the only one of its kind in the service. The guns, small steel seven-pounders, are mounted with their carriages and wheels on the backs of elephants. The ammunition is carried in small boxes on other elephants, there being four ammunition elephants to each gun. The gun, carriage and wheels, may be carried separately by the men, in places where the jungle is dense, or when under the enemy's fire, where the elephants would be unsteady. The whole of the men may be carried on the elephants in case of a river to be forded, or a rapid movement being required, so that the battery is then almost equal to a horse-artillery battery in mobility. The guns fire a double shell, which is very effective when it bursts.

The Whitsuntide Procession at Angra, in the Island of Terceira, one of the Azores.

The Azores are, next to the Madeiras, the finest islands yet possessed by Portugal, of all her once magnificent foreign possessions. They were discovered in the fifteenth century and consist of nine islands, Terceira being the largest. The capital, Angra, is a Bishop's See and the residence of the commander of the military division of the Azores and seat of the highest court. Its population is some 12,000. On Whitsunday a peculiar procession is to be seen here, of which our illustration gives some idea. It originated in Germany in the reign of one of the Othos. A terrible famine desolated many parts of the empire, and, to draw down the mercy of God, Otho, besides assisting the needy, ordered general prayers and devotions to the Holy Ghost. These were opened with great solemnity, and the relief granted to these prayers caused the devotion to be perpetuated by annual processions in honor of the Holy Ghost, on Whitsunday. The custom extended even to these Portuguese islands off the coast of Africa, and is continued to this day. The procession commemorates its origin and object by the articles of the fruits of the earth borne by the confraternities and by the insignia of the old German Empire.

AT HOME AND ABROAD.

—AT present there are 6,000 Chinamen at work on the Texas Pacific Railroad.

—A COLLEGE for colored males is in course of erection at Meridian, Miss.

—SAVANNAH will celebrated the 100th anniversary of its siege on October 9th.

—THE third General Convention of State Railroad Commissioners will be opened at Saratoga, June 10th.

—MASSACHUSETTS spends yearly $5,000,000 for 3,130 public schools, with 310,000 pupils and 8,500 teachers.

—ON May 21st, 40,000,000 feet of logs left Connecticut Lake, Vt., the largest drive by one-half ever taken down the Connecticut River.

—IT is roughly estimated that 500,000 seals have been taken in the Newfoundland fisheries this season, giving some 100,000 cwts. of oil.

—DIPLOMACY will be well represented at Newport this Summer as the French, Austrian, Turkish and Spanish Ambassadors have rented cottages there.

—THE Emperor of Austria has consented to act as arbitrator in the dispute between Great Britain and Nicaragua, concerning some provisions in the Treaty of 1860.

—IT is the boast of Lutherans that their denomination has erected more orphan asylums in proportion to the membership than any other of the Protestant sects.

—THE next walking-match for the championship of the world will begin June 16th, in London, with Rowell, Ennis, Brown, Harding, and possibly Weston, as competitors.

—IN Ireland there are 16,000 landlords, of whom 1,242 own two-thirds of the whole country. The land is cultivated by 600,000 tenants, who occupy an average of thirty-two acres each.

—AN extra session of the Texas Legislature is called for June 10th to provide funds for the payment of the State debt and for the maintenance of the public schools. The State now owes $7,000,000.

—THE gross receipts in aid of the widows and children of the Gloucester, Mass., fishermen lost during the past Winter, now amount to $27,826, a sum adequate to meet all present necessities and provide a moderate reserve for next Winter.

—A SINGULAR proposition has been made in the Legislature of Missouri. It is to provide that legal voters who stay away from the polls three elections in succession shall be punished with forfeiture of their right to hold any public office in the State.

—THE next journey towards the North Pole, excepting that of Bennett's *Jeannette*, which will soon sail from San Francisco, is to be made in the yacht *Ya-bjorn*, which has been hired for the purpose by Sir Henry Gore. The vessel is well equipped for her adventurous cruise, and is manned by a Norwegian crew.

—THERE is no trade in Great Britain which furnishes such a curious assemblage of statistics regarding the population as that of nail-making, and particularly in the counties of Worcester and Stafford. It is shown that in the former county, while the number of men employed in the trade was 5,258, the women and girls amounted to 5,897; and that in the latter the men were 2,601, and the women 7,206. This disparity would be singular enough in any occupation which embraced both sexes; but when we think of what an occupation nail-making is these figures are really astonishing.

—JOSEPH NIMMO, JR., Chief of Statistics, announces that the excess of exports over imports during the month of April was $12,171,999, it having been in April, 1878, $25,927,386. For the ten months ended April 30th, 1879, the balance of trade was large—$241,442,823, compared with $227,042,087 in 1878. For the year ended April 30th, 1879, the balance was $272,215,770, against $221,680,013 in the year ended April 30th, 1878. A comparison of the exports and imports of gold and silver coin and bullion exhibits the following: Month ended April 30th, 1879, excess of exports, $3,450,631; month ended April 30th, 1878, excess of imports, $2,355,025. For the twelve months ended April 30th, 1879, there was an excess of exports of $5,269,623, compared with $19,331,134 in 1877-78.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXXII.

"LET me see the blister," said Amelius. Sally looked longingly at the fire. "May I warm my feet first?" she asked; "they are so cold."

In those words, she innocently deferred the discovery which, if it had been made at the moment, might have altered the whole after-course of events. Amelius only thought now of preventing her from catching cold. He sent Toff for a pair of the warmest socks that he possessed, and asked if he should put them on for her. She smiled, and shook her head, and put them on for herself.

When they had done laughing at the absurd appearance of the little feet in the large socks, they only drifted further and further away from the subject of the blistered foot. Sally remembered the terrible matron, and asked if anything had been heard of her that morning. Being told that Mrs. Payson had written, and that the doors of the institution were closed to her, she recovered her spirits, and began to wonder whether the offended authorities would let her have her clothes. Toff offered to go and make the inquiry, later in the day, suggesting the purchase of slippers and stockings, in the meantime, while Sally was having her breakfast. Amelius approved of the suggestion; and Toff set off on his errand, with one of Sally's boots for a pattern.

The morning had, by that time, advanced to ten o'clock.

Amelius stood before the fire talking, while Sally had her breakfast. Having first explained the reasons which made it impossible that she should live at the cottage in the capacity of his servant, he astonished her by announcing that he meant to undertake the superintendence of her education himself. They were to be master and pupil, while the lessons were in progress; and brother and sister at other times—and they were to see how they got on together, on this plan, without indulging in any needless anxiety about the future. Amelius believed with perfect sincerity that he had hit on the only sensible arrangement, under the circumstances; and Sally cried joyously, "Oh, how good you are to me; the happy life has come at last!"

* * * * * *

At the hour when those words passed the daughter's lips, the discovery of the conspiracy burst upon the mother in all its baseness and in all its horror.

The suspicion of her infamous employer, which had induced Mrs. Sowler to attempt to intrude herself into Phœbe's confidence, led her to make a visit of investigation at Jervy's lodgings later in the day. Informed (as Phœbe had been informed) that he was not at home, she called again some hours afterwards. By that time the landlord had discovered that Jervy's luggage had been secretly conveyed away, and that his tenant had left him, in debt for rent of the two best rooms in the house.

No longer in any doubt of what had happened, Mrs. Sowler employed the remaining hours of the evening in making inquiries after the missing man. Not a trace of him had been discovered up to eight o'clock on the next morning.

Shortly after nine o'clock—that is to say, towards the hour at which Phœbe paid her visit to Amelius—Mrs. Sowler, resolute to know the worst, made her appearance at the apartments occupied by Mrs. Farnaby.

"I wish to speak to you," she began, abruptly, "about that young man we both know of. Have you seen anything of him lately?"

Mrs. Farnaby, steadily on her guard, deferred answering the question. "Why do you want to know?" she said.

The reply was instantly ready. "Because I have reason to believe that he has bolted, with your money in his pocket."

"He has done nothing of the sort," Mrs. Farnaby rejoined.

"Has he got your money?" Mrs. Sowler persisted. "Tell me the truth, and I'll do the same by you. He has cheated me. If you're cheated, too, it's your own interest to lose no time in finding him. The police may catch him yet. *Has* he got your money?"

The woman was in earnest—in terrible earnest—her eyes and her voice both bore witness to it. She stood there the living impersonation of those doubts and fears which Mrs. Farnaby had described in her letter to Amelius. Her position, at that moment, was essentially a position of power. Mrs. Farnaby felt it in spite of herself. She acknowledged that Jervy had got the money.

"Did you send it to him, or give it to him?" Mrs. Sowler asked.

"I gave it to him."

"When?"

"Yesterday evening."

Mrs. Sowler clinched her fists, and shook them in impotent rage. "He's the biggest scoundrel living," she exclaimed, furiously; "and you're the biggest fool! Put on your bonnet and come to the police. If you get your money back again before he's spent it all don't forget it was through me."

The audacity of the woman's language roused Mrs. Farnaby. She pointed to the door. "You are an insolent creature," she said; "I have nothing more to do with you."

"You have nothing more to do with me?" Mrs. Sowler repeated. "You and the young man have settled it all between you, I suppose." She laughed scornfully. "I dare say now you expect to see him again?"

Mrs. Farnaby was irritated into answering this. "I expect to see him this morning," she said, "at ten o'clock."

"And the lost young lady with him?"

"Say nothing about my lost daughter; I won't even hear you speak of her."

Mrs. Sowler sat down. "Look at your watch," she said. "It must be nigh on ten o'clock by this time. You'll make a disturbance in the house if you try to turn me out. I mean to wait here till ten o'clock."

On the point of answering angrily, Mrs. Farnaby restrained herself. "You are trying to force a quarrel on me," she said; "you sha'n't spoil the happiest morning in my life. Wait here by yourself."

She opened the door that led into her bedchamber, and shut herself in. Perfectly impenetrable to any repulse that could be offered to her, Mrs. Sowler looked at the closed door with a sardonic smile, and waited.

The clock in the hall struck ten. Mrs. Farnaby returned again to the sitting-room, walked straight to the window and looked out.

"Any signs of him?" said Mrs. Sowler.

There were no signs of him. Mrs. Farnaby drew a chair to the window, and sat down. Her hands turned icy cold. She still looked out into the street.

"I'm going to guess what's happened," Mrs. Sowler resumed. "I'm a sociable creature, you know, and I must talk about something. About the money, now? Has the young man had his traveling expenses of you? To go to foreign parts and bring your girl back with him, eh? I guess that's how it was. You see I know him so well. And what happened, if you please, yesterday evening? Did he tell you he'd brought her back, and got her at his own place? And did he say he wouldn't let you see her till you'd paid him his reward as well as his traveling expenses? And did you forget my warning to you not to trust him? I'm a good one at guessing when I try. I see you think so yourself. Any signs of him yet?"

Mrs. Farnaby looked round from the window. Her manner was completely changed; she was nervously civil to the wretch who was torturing her. "I beg your pardon, ma'am, if I have offended you," she said faintly. "I am a little upset—I am so anxious about my poor child. Perhaps you are a mother yourself. You oughtn't to frighten me; you ought to feel for me." She paused, and put her hand to her head. "He told me yesterday evening," she went on, slowly and vacantly, "that my poor darling was at his lodgings; he said she was so worn out with the long journey from abroad that she must have a night's rest before she could come to me. I asked him to tell me where he lived and let me go to her. He said she was asleep and must not be disturbed. I promised to go in on tiptoe and only look at her; I offered him more money, double the money, to tell me where she was. He was very hard on me. He only said, wait till ten to-morrow morning—and wished me good-night. I ran out to follow him, and fell on the stairs and hurt myself. The people of the house were very kind to me." She turned her head back towards the window and looked out into the street again. "I must be patient," she said; "he's only a little late."

Mrs. Sowler rose and tapped her smartly on the shoulder. "Lies!" she burst out. "He knows no more where your daughter is than I do—and he's off with your money!"

The woman's hateful touch struck out a spark of the old fire in Mrs. Farnaby. Her natural force of character asserted itself once more. "You lie!" she rejoined. "Leave the room!"

The door was opened while she spoke. A respectable woman-servant came in with a letter. Mrs. Farnaby took it mechanically and looked at the address. Jervy's feigned handwriting was familiar to her. In the instant when she recognized it the life seemed to go out of her like an extinguished light. She stood pale and still and silent, with the unopened letter in her hand.

Watching her with malicious curiosity, Mrs. Sowler coolly possessed herself of the letter, looked at it, and recognized the writing in her turn. "Stop!" she cried, as the servant was on the point of going out. "There's no stamp on this letter. Was it brought by hand? Is the messenger waiting?"

The respectable servant showed her opinion of Mrs. Sowler plainly in her face. She replied as briefly and as ungraciously as possible: "No!"

"Man or woman?" was the next question.

"Am I to answer this person, ma'am?" said the servant, looking at Mrs. Farnaby.

"Answer me instantly," Mrs. Sowler interposed, "in Mrs. Farnaby's own interests. Don't you see she can't speak to you herself?"

"Well, then," said the servant, "it was a man."

"A man with a squint?"

"Yes."

"Which way did he go?"

"Towards the square."

Mrs. Sowler tossed the letter on the table and hurried out of the room. The servant approached Mrs. Farnaby. "You haven't opened your letter yet, ma'am," she said.

"No," said Mrs. Farnaby vacantly, "I haven't opened it yet."

"I'm afraid it's bad news, ma'am."

"Yes; I think it's bad news."

"Is there anything I can do for you?"

"No, thank you. Yes; one thing. Open my letter for me please."

It was a strange request to make. The servant wondered, and obeyed. She was a kind-hearted woman; she really felt for the poor lady; but the familiar household devil, whose name is Curiosity, and whose opportunities are innumerable, prompted her next words when she had taken the letter out of the envelope: "Shall I read it to you, ma'am?"

"No. Put it down on the table, please. I'll ring when I want you."

* * * * * *

The mother was alone—alone, with her death-warrant waiting for her on the table.

The clock down-stairs struck the half-hour after ten. She moved, for the first time since she had received the letter. Once more she went to the window and looked out. It was only for a moment. She turned away again, with a sudden contempt for herself. "What a fool I am!" she said—and took up the open letter.

She looked at it, and put it down again. "Why should I read it," she asked herself, "when I know what is in it without reading?"

Some framed woodcuts from the illustrated newspapers were hung on the walls. One of them represented a scene of rescue from shipwreck. A mother embracing her daughter, saved by the lifeboat, was among the foreground groups. The print was entitled "The Mercy of Providence." Mrs. Farnaby looked at it with a moment's steady attention. "Providence has its favorites," she said; "I am not one of them."

After thinking a little she went into her bedroom and took two papers out of her dressing-case. They were medical prescriptions.

She turned next to the chimney-piece. Two medicine-bottles were placed on it. She took one of them down—a bottle of the ordinary size, known among chemists as a six-ounce bottle. It contained a colorless liquid. The label stated the dose to be "two tablespoonsful," and bore, as usual, a number corresponding with a number placed on the prescription. She took up the prescription. It was a mixture of bi-carbonate of soda and prussic acid, intended for the relief of indigestion. She looked at the date, and was at once reminded of one of the very rare occasions on which she had required the services of a medical man. There had been a serious accident at a dinner-party given by some old friends. She had eaten sparingly of a certain dish, from which some of the other guests had suffered severely. It was discovered that the food had been cooked in an old copper saucepan. In her case the trifling result had been a disturbance of digestion, and nothing more. The doctor had prescribed accordingly. She had taken but one dose; with her healthy constitution, she despised physic. The remainder of the mixture was still in the bottle.

She considered again with herself for some minutes—then went back to the chimney-piece, and took down the second bottle.

It contained a colorless liquid also; but it was only half the size of the first bottle, and not a drop had been taken. She waited, observing the difference between the two bottles with extraordinary attention. In this case also the prescription was in her possession—but it was not the original. A line at the top stated that it was a copy made by the chemist, at the request of a customer. It bore the date of more than three years since. A morsel of paper was pinned to the prescription, containing some lines in a woman's handwriting—"With your enviable health and strength, my dear, I should have thought you were the last person in the world to want a tonic. However, here is my prescription, if you must have it. Be very careful to take the right dose, because there's poison in it." The prescription contained three ingredients, strychnine, quinine, and nitro-hydrochloric acid; and the dose was fifteen drops in water. Mrs. Farnaby lit a match, and burned the lines of her friend's writing. "As long ago as that," she reflected, watching the destruction of the paper, "I thought of killing myself. Why didn't I do it?"

The paper having been destroyed, she put back the prescription for indigestion in her dressing-case; hesitated for a moment, and opened the bedroom-window. It looked into a lonely little courtyard. She threw the dangerous contents of the second and smaller bottle out into the yard, and then put it back empty on the chimney-piece. After another moment of hesitation, she returned to the sitting-room, with the bottle of mixture, and the copied prescription for the tonic strychnine drops in her hand.

She put the bottle on the table, and advanced to the fireplace to ring the bell. Warm as the room was, she began to shiver. Did the eager life in her feel the fatal purpose that she was meditating, and shrink from it? Instead of ringing the bell, she bent over the fire, trying to warm herself.

"Other women would get relief in crying," she thought. "I wish I was like other women!"

The whole sad truth about herself was in that melancholy aspiration. No relief in tears, no merciful oblivion in a fainting-fit, for her. The terrible strength of the vital organization in this woman knew no yielding to the unutterable misery that wrung her to the soul. It roused its glorious forces to resist; it held her in a stony quiet, with a grip of iron.

She turned away from the fire, wondering at herself. "What baseness is there in me that fears death? What have I got to live for now?" The open letter on the table caught her eye. "This will do it!" she said—and snatched it up, and read it at last.

"The least I can do for you is to act like a gentleman, and spare you unnecessary suspense. You will not see me this morning at ten, for the simple reason that I really don't know (and never did know) where to find your daughter. I wish I was rich enough to return the money. Not being able to do that, I will give you a word of advice instead. The next time you confide any secrets of yours to Mr. Goldenheart, take better care that no third person hears you."

She read those atrocious lines, without any visible disturbance of the dreadful composure that possessed her. Her mind made no effort to discover the person who had listened and betrayed her. To all ordinary curiosity, to all ordinary emotions, she was morally dead already.

The one thought in her was a thought that might have occurred to a man. "If I only had my hands on his throat, how I could wring the life out of him! As it is——" Instead of pursuing the reflection, she threw the letter into the fire, and rang the bell.

"Take this at once to the nearest chemist's," she said, giving the strychnine prescription to the servant; "and, wait, please, and bring it back with you."

She opened her desk, when she was alone, and tore up the letters and papers in it. This done, she took her pen, and wrote a letter. It was addressed to Amelius.

When the servant entered the room again, bringing with her the prescription made up, the clock down-stairs struck eleven.

CHAPTER XXXIII.

TOFF returned to the cottage with the slippers and the stockings.

"What a time you have been gone!" said Amelius.

"It is not my fault, sir," Toff explained. "The stockings I obtained without difficulty. But the nearest shoe-shops in this neighborhood sold only coarse manufactures, and all too large. I had to go to my wife, and get her to take me to the right place. See!" he exclaimed, producing a pair of quilted silk slippers with blue rosettes, "here is a design that is really worthy of pretty feet. Try them on, miss."

Sally's eyes sparkled at the sight of the slippers. She rose at once, and limped away to her room. Amelius, observing that she still walked in pain, called her back. "I had forgotten the blister," he said. "Before you put on the new stockings, Sally, let me see your foot." He turned to Toff. "You're always ready with everything," he went on; "I wonder whether you have got a needle and a bit of worsted thread?"

The old Frenchman answered with an air of respectful reproach. "Knowing me, sir, as you do," he said, "could you doubt for a moment that I mend my own clothes and darn my own stockings?" He withdrew to his bedroom below, and returned with a leather roll. "When you are ready, sir!" he said, opening the roll at the table, and threading the needle, while Sally removed the sock from her left foot.

She took a chair near the window, at the suggestion of Amelius. He knelt down so as to raise her foot to his knee. "Turn a little more towards the light," he said. He took the foot in his hand, lifted it, looked at it—and suddenly let it drop back on the floor.

A cry of alarm from Sally instantly brought Toff to the window. "Oh, look!" she cried; "he's ill!" Toff lifted Amelius to a chair. "For God's sake, sir," cried the terrified old man, "what's the matter?" Amelius had turned to the strange ashy paleness which is only seen in men of his florid complexion, overwhelmed by sudden emotion. He stammered when he tried to speak. "Fetch the brandy!" said Toff, pointing to the liquor-case on the sideboard. Sally brought it instantly; the strong stimulant steadied Amelius.

"I'm sorry to have frightened you," he said, faintly. "Sally!—dear, dear little Sally, go in, and get your things on directly. You must come out with me; I'll tell you why afterwards. My God! why didn't I find this out before?" He noticed Toff, wondering and trembling. "Good old fellow! don't alarm yourself—you shall know about it, too. Go! run! get the first cab you can find!"

Left alone for a few minutes, he had time to compose himself. He did his best to take advantage of the time; he tried to prepare his mind for the coming interview with Mrs. Farnaby. "I must be careful of what I do," he thought, conscious of the overwhelming effect of the discovery on himself; "she doesn't expect *me* to bring her daughter to her."

Sally returned to him, ready to go out. She seemed to be afraid of him, when he approached her and took her hand. "Have I done anything wrong?" she asked, in her childish way. "Are you going to take me to some other Home?" The tone and look with which she put the question burst through the restraints which Amelius had imposed on himself for her sake. "My dear, dear child!" he said, "can you bear a great surprise? I'm dying to tell you the truth—and I scarcely dare do it." He took her in his arms. She trembled piteously. Instead of answering him, she reiterated her question, "Are you going to take me to some other Home?" He could endure it no longer. "This is the happiest day of your life, Sally!" he cried; "I am going to take you to your mother."

He held her close to him, and looked at her in dread of having spoken too plainly. She lifted her eyes to him slowly, in vacant fear and surprise; she burst into no expression of delight; no overwhelming emotion made her sink fainting in his arms. The sacred associations which gather round the mere name of Mother were associations unknown to her; the man who held her to him so tenderly, the hero who had pitied and saved her, was father and mother both to her simple mind. She dropped her head on his breast; her faltering voice told him that she was crying. "Will my mother take me away from you?" she asked. "Oh, do promise to bring me back with you to the cottage!"

For the moment, and the moment only, Amelius was disappointed in her. The generous sympathies in his nature guided him unerringly to the truer view. He remembered what her life had been. Inexpressible pity for her filled his heart. "Oh, my poor Sally, the time is coming when you will not think as you think now! I will do nothing to distress you. You mustn't cry—you must be happy, and loving and true to your mother." She dried her eyes. "I'll do anything you tell me," she said, "as long as you bring me back with you."

Amelius sighed, and said no more. He took her out with him gravely and silently, when the cab was announced to be ready. "Double

Digitized by Google

your fare," he said, when he gave the driver his instructions, "if you get there in a quarter of an hour." It wanted twenty-five minutes to twelve when the cab left the cottage.

At that moment, the contrast of feeling between the two could scarcely have been more strongly marked. In proportion as Amelius became more and more agitated, so Sally recovered the composure and confidence that she had lost. The first question she put to him did not relate to her mother, but to his strange behavior, when he had knelt down to look at her foot. He answered, explaining to her briefly and plainly what his conduct meant. The description of what had passed between her mother and Amelius interested and yet perplexed her. "How can she be so fond of me, without knowing anything about me for all those years?" she said. "Is my mother a lady? Don't tell her where you found me; she might be ashamed of me." She paused, and looked at Amelius anxiously. "Are you vexed about something?" she asked. "May I take hold of your hand?" Amelius gave her his hand, and Sally was satisfied.

As the cab drew up at the house, the door was opened from within. A gentleman, dressed in black, hurriedly came out, looked at Amelius, and spoke to him as he stepped from the cab to the pavement.

"I beg your pardon, sir. May I ask if you are any relative of the lady who lives in this house?"

"No relative," Amelius answered. "Only a friend, who brings good news to her."

The stranger's grave face suddenly became compassionate as well as grave. "I must speak with you before you go up-stairs," he said, lowering his voice as he looked at Sally, still seated in the cab. "You will perhaps excuse the liberty I am taking, when I tell you that I am a medical man. Come into the hall for a moment—and don't bring the young lady with you."

Amelius told Sally to wait in the cab. She saw his altered looks, and entreated him not to leave her. He promised to keep the house-door open so that she could see him, and followed the doctor into the hall.

(*To be continued.*)

THE CLAMBAKE SEASON.

THE grove attached to "Gabe" Case's well-known hostelry on Central Avenue presented a scene of unwonted animation upon the afternoon of Tuesday, the 27th ult.; an animation that attracted the unwashed of the district to the "line of rail," and caused fast trotters, 2:17's, to be jerked suddenly on their haunches to enable their respective owners to take a passing glance at what was going on under the umbrageous foliage of the limes, the elms, and—though last, not least—the shade of the wooden bower sacred to the hospitalities of the Hoboken Turtle Club. "It ain't turtle," observed an ebon-colored youth to one of a lighter shade perched on the rail; "I guess it's clams."

The ebon-colored youth's conjecture was correct. Clams were to the fore, and gallantly, for the Rhode Island Clambake Club were holding annual festival. Beneath the trees, carriages that would have excited admiring comment in Rotten Row or the Bois de Boulogne were drawn up in line, while their respective owners chatted in groups of twos and threes on the sloping sward, or solemnly repaired to Gabe's for a pre-prandial cocktail. Invisible buggies, on cobweb wheels, were packed close as sardines in a box, while one or two vehicles that might have attended the Declaration of Independence seemed to protest against the pert invasion of their lighter and showier brethren.

Tables, whose snowy napery shone super-white against the green grass, were spread under protecting branches; colored waiters, in attitudes expressive of their hands and feet being too much for them, reclined at angles of forty-five; a band discussed "Pinafore" to much amateur chorus, and hither and thither, in picturesque profusion, lay empty champagne-baskets, brandy-cases and rotund demijohns. In one favored spot in the sacred grove was raised a sort of sacrificial altar, over which presided a gentleman of Druidical aspect, attired in a blue blouse, and holding a magician's wand in the shape of a long rake. This was W. R. Babcock, the proud inventor of the Babcock sauce, the prince of clam-bakers, whose fee for cooking a bake is one hundred dollars, and, let us say, cheap at the price. The movements of this artist were watched with the deepest interest by those assembled. They stood by in solemn silence while he laid the foundation-stones and built his fire. The company consulted watches when he started it. They noted with lively satisfaction that he emptied twenty-five bushels of clams upon the red-hot hearth, followed by four bushels of oysters.

"Are they soft-shells, Bab?" demanded a gentleman of 350 lbs., in the voice of a weak fat boy.

"They ain't," was Mr. Babcock's reply; "I've been disappointed in softs; the shaft of the steamer that was bringing 'em broke down at Fort Schuyler, so I substituted hards."

"That's bad," softly sighed the 350-pounder.

The mystic ceremony proceeded amidst a breathless silence; 300 pounds of sheepshead were affectionately placed upon the oysters, together with 100 pounds of sea-bass, carefully prepared in linen cloths; then fifty pounds of tripe were added; on the top of the tripe the high priest rolled the contents of a barrel of Bermuda potatoes, mixed with a bushel of sweet potatoes. The suppressed excitement grew stronger as 100 pairs of chickens were delicately adjusted on the pyre, decorated here and there with tufts of asparagus, fifty bunches being used for the purpose, and a murmur of approbation made itself heard when three barrels containing lobsters were emptied with something akin to a crash. But the culminating point had not as yet arrived.

Six men stood by, firmly grasping the edges of a great sail-cloth, in readiness to draw it over the succulent mound, and, at this instant, four darkies approached bearing four baskets, from which they emptied, with a cheer, about three thousand wriggling, squirming, sprawling, struggling, plunging, sputtering crabs, while loud cries rent the air as the quilt was drawn, and the bake "put to bed." An expert armed with a pitchfork now approached, and with the dexterity of a haymaker of the olden time, tossed rock-weed over the *tumulus* till it stood a foot deep on the savory viands beneath.

"In fifty minutes, gentlemen," observed Mr. Babcock, as he commenced to prepare forty gallons of the sauce that bears his name. "Cupid," a well-known fish merchant of Fulton Market, attired in a snow-white blouse, now went in for his innings, and never did anxious mother watch by the slumber of a delicate infant with more eager watchfulness, more tender care. How delicately he turned up the coverlet now and then to discover how his darlings were progressing, how anxiously he felt their pulse, and tucked in the bedclothes when they indicated disarrangement. He became the observed of all observers, and when, at the expiration of the time named by Mr. Babcock, he lifted the edge of the sail-cloth and jerked one brand from the burning, in the shape of a stick of asparagus, the very heart-beats of the club and its numerous guests could have been heard high above "I'm called Little Buttercup," vainly performed by the band in the hope of diverting attention from the subject that engrossed every thought with the tenacious grasp of the octopus.

When "Cupid" declared with a grunt of satisfaction that everything was Q. Q., alias quite correct, the rush for seats became frantic. Amongst those who plunged, with whoops that would have astonished Sitting Bull, were Henry A. Gumbleton, "Falstaff" Thompson, Shed Shook, Hon. John Fox, Benson C. King, Fire Commissioner; J. Hamlin, Deputy Commissioner Public Works; Sol Hayes, J. McDermott, Dan Patterson, W. C. Conner, J. J. Kelso, Major Quincy, W. H. Van Tassel, Alderman James A. Carroll, champion crab-eater; Martin Brown, city printer; Ed Gilmore, and a host of others too numerous to mention.

"For a long hour by Shrewsbury clock," did clams, and sheepshead, and asparagus, and chickens, and lobsters, and crabs disappear, washed down by the sparkling vintage of champagne. "Falstaff" Thompson's clams opened of their own accord, and were it not that Martin Brown had partaken of luncheon in the city, he would have made a better score. Isaak Eyland accounted for 165 clams, half a sheepshead, a lobster, five crabs, and et ceteras to no end. In the unavoidable absence of the President, Mr. Sheppard F. Knapp, Mr. Hosea Perkins called the club to order, and in playful terms demanded a speech from Captain Rynders. The gallant captain responded, but the cracking of lobster shells, the opening of clams, and the popping of champagne corks completely snuffed out the light of his eloquence, while two or three gentlemen who followed were equally offered up as victims. The feast was worthy of Lucullus, and when came the breaking-up there was considerable heaviness at parting.

The Late Massacre in Burmah.

IT appears that feminine intrigue is at the root of the dreadful doings in Burmah of late. The late King named as his successor Nyoung Yan; but the daughter of the chief Queen was engaged to be married to Theebau, now only about 21, and the Queen, resolving that her son-in-law should succeed, bought over the Ministers. The King's death was, through her means, kept secret until a strong following had been secured to Theebau, who, soon after he ascended the throne (his brothers and their families were thrown into prison), took to drinking, and showed signs of hereditary madness. Fear of British interference prevented his killing his brothers, but as soon as news arrived of the reverses in Zulu, he thought his opportunity for fratricide on a large scale had come, and went to work. At first the massacre was on the old Burmese plan, head tied to ankles and a heavy blow on the back; but when Thongzai was brought to do reverence to the King, his younger brother, and professed an utter scorn for what could be done to him, he was promptly flogged to death. Henry Oke, formerly Governor of Rangoon, had his nose and mouth filled with gunpowder, a light was applied, and then he was flung into a trench to be stifled by the bodies of the succeeding victims. The daughter, aged sixteen, of Nyoung Yan (who ought to have been King) was handed over to the guard, to be subsequently pitched insensible into the trench with the others. About ninety were killed altogether.

Beaconsfield's Laural Wreath.

THE gold laural wreath intended for presentation to Lord Beaconsfield as the people's tribute to the Premier is now completed and on exhibition in London. Contributions for this purpose were limited to one penny; and as the wreath, which has been executed at cost price, is valued at £120, it represents the contributions of 58,500 persons. Four branchlets of bay, twisted in pairs, are fastened at the thicker ends by a golden tie. Every leaf, stem, stalk and berry is a carefully studied imitation of the part it represents, and the faces and under sides of the leaves being veined and worked over with a fine-pointed tool, so as to produce the appearance of the pores, the play of light and shade on surfaces so varied is very great. The models were specimens of the *Laurus nobilis*, the[] sweet-smelling bay used by the Romans for the Corona laurea. The wreath weighs rather more than twenty ounces, and the gold used is twenty-two caret—of the same fineness as a sovereign, only the alloy in the wreath is silver instead of copper. There are forty-six leaves, and on the back of each may be seen, on turning over the wreath, the names, one, two or three on each leaf, of the eighty towns in the United Kingdom that have sent contributions. As subscriptions are still coming in, it is proposed to add a stand for the wreath, an oaken casket and an illuminated address.

SCIENTIFIC INTELLIGENCE.

There was Another Eruption of Mount Etna on Sunday evening, May 25th.

The Baly Medal of the Royal College of Physicians of London has been awarded to Mr. Charles Darwin, F.R.S.

The Congress of the Social Science Association at Manchester has been fixed to take place from October 1st to 8th.

The News of the Death of the Marquis Antinori, the leader of the Italian Expedition to Central Africa, is contradicted.

A Late Dispatch from Alexandria states that two companions of the Italian explorer, the Marquis Antinori, have been made prisoners by the natives near Shoa.

One Person in 450 in Prussia is affected with insanity. A Berlin professor attributes the result largely to intemperance among the lower class, and too much forcing of early education among others.

The Carpi Prize of the Reale Academie de Lincei for 1880 (value 500 lire) will be awarded to the author of the best monograph "On the Organs and Vital Functions of Plants." Memoirs to be sent in before December 31st, 1880. The conditions are the same as in 1878.

"Akhbar," the most influential French paper in Algeria, is devoting many interesting articles to the construction of the Trans-Saharan railway from Laghouat to Timbuktu through Touat. The preliminary surveys have been executed from the Algiers-Oran line to Laghouat.

The Death is Announced of Professor Grisebach, the well-known botanist and geographer. He was born in 1814, at Hanover, and in 1841 was called as Professor of Botany to Göttingen, where he was still officiating up to his death. He contracted his illness while on a visit with his family to Italy.

A German Inventor proposes to make boots that will never wear out. He mixes with a waterproof glue a suitable quantity of clean quartz-sand, which is spread on the thin leather sole employed as a foundation. These quartz soles are said to be flexible and almost indestructible, while they enable the wearer to walk safely over slippery roads.

The Governor of Yakutsk, Eastern Siberia, has received intelligence from Professor Nordenskjöld, of the Arctic expedition, to May 2d. The Professor announced that he intended to start in the Vega for Europe by way of Behrings Straits and the Suez Canal. A telegraphic dispatch from Irkutsk reports that the Vega has since arrived in Behrings Straits.

Admiral Mackillop, who died recently in Egypt, had for eleven years held the position of Comptroller-General of Ports and Light-houses in that country, and stood high in favor with the Khédive and his people, as well as with foreigners. He made Alexandria one of the best managed harbors in the world. He had previously served in the British Navy thirty years with honor.

News from Leipzig states that the president of the Meteorological Office of that city, Baron A. von Danckelmann, has been invited by M. Sibiriakoff to take part in the expedition to the Siberian Arctic Sea, and that he has accepted the invitation, the necessary permission having been readily granted to him by the Saxon Government. The expedition was to sail on May 14th.

A New Form of Disease has become apparent in the heart of a very crowded portion of London. It is a new form of Cyprus fever, and a diagnosis of a recent malignant case shows the patient to be suffering from hallucinations and lowered vitality. The Faculty ascribe the disease to impure water, and have given it the name of dotephobia, and though it is seldom fatal, the sufferer remains but a shadow of his former self.

On Professor Pettenkofer's Advice, the German Empire has decided upon sulphurous acid as the best means of disinfection of clothing and other articles exposed to the plague. This is the ordinary gas formed by the burning of sulphur, and purifies by combining with the noxious substances and forming new compounds which are harmless. It may be doubted whether it would sufficiently penetrate heavy cloth so as to kill all germs.

The Experimental Labors in connection with the proposed tunnel under the English Channel are being continued at Sangatte, on the French side. A boring commenced last year at that point has now reached a depth of 853½ metres, or 8m. 67c. beneath the low water level of Spring tides. At this point the quantity of water amounts to 1,300 liters per minute, and the machines for pumping it out having become insufficient, they are about to be replaced by more powerful ones.

Mr. Matthews, United States Consul at Tangiers, reports a fearful account of the ravages of the typhus fever in Morocco. The deaths in the city of Morocco have been as many as 300 per day. Europeans suffer alike with the natives. A number of consuls and vice consuls have died. In former epidemics foreigners have escaped attack. The Ministers of France, England and Spain have raised a "famine relief fund." The United States Consul at Tangiers made personally a contribution of 1,200 pounds of bread.

In Making Some Excavations to widen the bed of the Tiber, the discovery has been made, in the garden of the Farnesina Palace, of an extremely elegant chamber which once formed part of a sumptuous habitation of the early times of Imperial Rome. The ceiling is of the most beautiful stucco, with figures and ornaments in relief in an excellent state of preservation. The walls are painted in the Pompeiian style. Some of the figures have very graceful features and profiles, resembling by their delicacy the celebrated *bilithes* of Attica. In the diggings in the Forum the bases of statues with inscriptions of the imperial epoch have been found.

An Unusually Warm Summer is predicted by Professor Piazzi Smyth, the Astronomer Royal for Scotland. He bases his predictions on the records of the temperature at Edinburgh as recorded during the last forty years by the earth thermometers at the Observatory of that city. These observations show, he says, that a great heat-wave comes upon the earth from without, presumably from the sun, about every eleven years, and it appears that the next heat-wave of this sort may be expected in the Summer and Autumn of this year. Professor Smyth thinks these seasons are likely to be glowingly hot, and the following Winter exceptionally mild.

Lord Carnarvon, in his recent address to the Society of Antiquaries, suggested the following undertakings as being requisite: (1) An archæological survey of Great Britain, than which nothing, he thought, could more effectually promote the preservation of prehistoric monuments, or facilitate the working of Sir John Lubbock's Bill; (2) A National Codex Diplomaticus of Charters, etc.; (3) A new edition of Dugdale's "Monasticon," or at least a complete series of the chartularies of the various abbeys, which would be a most useful work, containing as they did a mine of information on the social and economic history of Great Britain, and which, if printed *in extenso*, would be put beyond the risk of destruction by fire.

PERSONAL GOSSIP.

HOBART PASHA, Admiral of the Turkish Navy, was married in Vienna, May 10th, to Miss Rose Hore, an English girl.

QUEEN VICTORIA has already had a granite cross ten feet high erected at Balmoral Castle to the memory of the late Princess Alice.

MR. JAMES CARRIE, of the Royal Scottish Academy, and a landscape and marine painter of considerable note, died recently in Edinburgh.

GENERAL GRANT leaves Yokohama by the next steamer, about the last of June, and will reach San Francisco in the neighborhood of July 20th.

MR. WILLIAM JOHNSTON, M. P., the famous Irish Orangeman, is coming over to take part in the proceedings of the triennial council of the Canadian Orangemen in July.

IT is said in diplomatic circles in Constantinople that the Sultan has become decidedly well-disposed towards the Khedive, who now, therefore, receives encouragement from the Porte.

MR. HENRY, the inventor of the barrel and the ammunition of the famous Martini-Henry rifle, is, after the lapse of ten years, vainly seeking for adequate remuneration from the British War Office.

THE murderer of General Menzentseff, late Chief of the Russian Secret Police, is said to have been discovered in M. Turkoff, a Russian nobleman residing in Geneva. Efforts have been made to secure his extradition.

FATHER GIOVANNI, the wonderful Roman tenor, is reported to be growing wealthy through his voice. He gets a very large salary for his musical services, and sings also in society. He is getting enormously fat, and his voice appears to grow in proportion.

THE Marquis of Lorne is having two beautiful cars built for him in Troy at a cost of $15,000. One is to be used as a sitting-room, the other for smoking. Their fittings are luxurious, and they are made to run on any road. They will bring the marquis and the princess to this country.

SIGNOR PIETRO GUENTELE, who is director of the Vatican tapestries, at Rome, is about to publish in paris a work on tapestries, to appear in monthly instalments, each having eight or ten engravings and descriptive letter-press in the Italian, English, French, Spanish or German language.

MR. RASSAM, who is carrying on the work begun by the late Mr. George Smith, has just discovered at Babylon an octagonal cylinder, on the sides of which are engraved a history of the campaigns of Sennacherib against King Hezekiah. This important find is to be sent to London for safe keeping in the British Museum.

MADAME THIERS is about to present the public library at Marseilles with a splendid edition of the "Chinese Encyclopedia of the Emperor Kien Long," a work which is extremely rare, and which is only to be found in Europe at the British Museum and at the Bibliothèque Nationale at Paris. It contains fourteen volumes, with numerous illustrations.

THE Hon. George Brown, editor and proprietor of the Toronto *Globe*, who was included among the gentlemen to whom the distinction of knighthood was tendered on the occasion of the Queen's birthday, has waited on the Marquis of Lorne to express his appreciation of the high honor proposed to be conferred upon him, and asked to be excused from its acceptance.

THE International Copyright Conference will open in London on the 9th of June. Victor Hugo is expected to make the opening speech, and among the other eminent foreigners expected to be present are Señor Castelar, Turgenieff, Jules Simon, and Edmund About. The English Reception Committee consists of Mr. Froude, Mr. Trollope, Edward Jennings, M. P., and Mr. Vizetelly.

O'CONOR DON, who has introduced the Irish Education measure into the House of Commons, is forty-one years old, and member of Parliament for Roscommon County, Ireland, as was his father, who was a favorite in London fashionable society, and Lord of the Treasury under Lord John Russell's administration of 1846-51. He is a cousin of Charles O'Conor, the lawyer, of this city, whom he visited a few years ago.

THE British peers who are at present owners of race-horses, and who take an active interest in horse-racing, are the Dukes of Westminster and Hamilton, the Marquis of Hartington, the Earls of Falmouth, Rosebery, Wilton, Rosslyn, Cork, Fitzwilliam, Sefton, Strathmore, Viscount Dupplin and Lord Vivian. In 1864 the Jockey Club had as members twenty Privy Councilors, of whom seven were Cabinet Ministers, and two had been twice Prime Ministers—Derby and Palmerston.

COLONELS WOOD AND BULLER, who seem to be reaping the laurels of the Zulu campaign, are about forty. Colonel Wood is a son of the late Sir John Wood, baronet, and nephew of ex-Lord Chancellor Hatherly, better known as Vice Chancellor Sir William Page Wood. His sister, Lady Barrett-Lennard, has written some excellent novels. Colonel Buller is head of a very influential and ancient West Country family, which some thirty years ago returned five or six members to Parliament. Colonel Buller has extensive property in Devon and Cornwall.

MRS. BUTLER (Miss Elizabeth Thompson) has in the Royal Academy this year a pathetic picture of the arrival at Jellalabad of the one faint and worn survivor of an army of 16,000 men sent out to fight the Afghans in 1842. The artist says that she had had this tragic event in her mind for many years. When she was a little child she heard her father say, "There is a subject for a painter—one of the most tragic incidents in all history—and the artist who has the power to grasp it will be *the* artist of his time." And a very remarkable picture his daughter has made of it.

VICTOR HUGO, Edmund About, Alexandre Dumas, Ivan Tourgueneff, Castelar, Heiot, Zola, Mendes Leal, together with upwards of two hundred known men of letters from France, Germany, Italy, Austria, Spain, Belgium, even from the Brazils and San Salvador, are to hold a Congress on authors' rights, in London, (Eng.), this month. A strong reception committee of English men of letters has been formed to give their foreign *confrères* a hearty welcome, and make their week in London a pleasant one. Already Mr. Flower, Mayor of Stratford-on-Avon, has offered to receive and entertain the Congress in Shakespeare's birthplace.

THE decoration conferred by the Sultan upon Baroness Burdett-Coutts, in recognition of her efforts to relieve the sick and wounded, is the grand cordon of the "Chafakat," or Turkish Order of Mercy—a female Order of Knighthood—a broad white ribbon with edging of crimson and green, like the Medjidie. The Chafakat collar is a necklace of curious workmanship, with a star set in diamonds and emeralds—not embroidered, but real. Lady Layard is the only other Englishwoman who has received this handsome tribute of Turkish gratitude. In addition to the Chafakat, "A. Hamid," who writes a big, round hand, has presented Lady Burdett Coutts with a pair of remarkable vases and a carpet which made the calm and generally impassible Turkish Ambassador open his eyes with amazement.

COOKS PREPARING SUPPER FOR THE ACTORS IN THE ROYAL CHINESE THEATRE, ON WASHINGTON STREET.

THE CHINESE IN SAN FRANCISCO.

HOW THEY COOK AND EAT IN THEIR THEATRES.

GLANCING over the interesting subject of Chinese industries in California, we took a birds'-eye view last week of the laundry system in force at the Palace Hotel, San Francisco. From the Palace, on Market Street, to the basements and alleys of Chinatown is but a stone's-throw, measured by actual distance, and in Chinatown we find ourselves to-day, in the very heart of Chinese institutions, and taking in with every breath of American air the full flavor of the Orient.

There are said to be two sides to every subject, and whoever would speak intelligently on the subject of Chinese cooks and cookery must not study the subject only in a Caucasian kitchen. There the patient "China boy" moves with feline softness among the pots and pans, his white shirt shining with starch and cleanliness, his white linen stockings speckless and immaculate, and his glossy pigtail twisted up in serpentine black coils; the washing of hands is observed like a religious rite, and every culinary vessel glitters with repeated scrubbings. One eats with a serener satisfaction, who has previously looked into the kitchen where such a deity presides; but to see the reverse side of the medal, let any visitor glance behind the scenes of some native restaurant. Here, in the Royal China Theatre, is to be found such a scene as our artist presents, and here the cook is seen in his glory—mixing strange messes, stirring broth, whose unholy odors suggest the ingredients of the Shakespearean witches' cauldron, hacking at great chunks of pork and mangling the corpses of chickens—greasy, dirty, unshaven, and most horribly unsavory to every sense. All day and almost all night the business of the kitchen goes on—for there is a daily *soufflée* at every Chinese theatre, and the evening performance lasts from eight P. M. until four in the morning, and so long as the actors are busy overhead, so long the cooks in their subterranean den are preparing the feast that is always spread in the green-room. The smell of pork and rancid lard, so dear to the nostrils of the Chinaman, hangs in a visible vapor over this department, and through the gloom and the clouds of unctuous steam may be seen the forms of the presiding genii, with bristling heads, bare arms, and shirts and aprons of a complexion as dim as ever was worn by an Irish handmaiden. The restaurant is the invariable appendage to every Chinese theatre, and in the new one recently opened in Washington Street—the third which Chinatown boasts—the company is advertised to consist of ninety-two actors and six cooks.

Rats and rice, according to the prevalent notions, are the staples of a Chinaman's diet; but the principal stock in trade of the provision-dealers are skinny, dried-up chickens, ducks pressed and cured in oil, and the historic roast pig; while mysterious confections, nameless to Europeans, crowd the counters and shelves, and contribute, each one its own peculiar flavor, to the general atmosphere of Chinatown. Great jars of blue-and-white pottery, suggestive of ginger and other pungent native sweetmeats, and cases of straw matting, fresh from the flowery kingdom, and packed with unknown native delicacies, are crowded about the markets and restaurants, while a common street-sight is the aerial ascent of a score of these, by means of bamboo slings and pullies, to the upper stories of the "Hang Heong," or the "Hang Fa Low," or others of the countless eating-houses on Washington and Jackson streets.

CHINESE METHOD OF HOISTING FOOD AND OTHER ARTICLES FROM THE STREET TO THE UPPER FLOORS OF DWELLINGS.

QUEEN VICTORIA'S BIRTHDAY.

THE CELEBRATION IN MONTREAL.—RETURN OF THE THIRTEENTH REGIMENT.

THE visit of the Thirteenth Regiment, N.G.S.N.Y., to Montreal, Canada, on the occasion of the celebration of the birthday of Queen Victoria, May 24th, was an event of a good deal of interest. The reception of the regiment was characterized by the greatest heartiness and good-will; in fact, it received an ovation from the populace at every appearance. The military part of the celebration took place on Mount Royal, a mile from the city, and included a review by the Marquis and the Princess of Lorne, and a sham fight, which was witnessed by nearly the whole city population. When the Governor-General, in his tour of inspection along the line, reached the front of the Thirteenth Regiment, he made a brief speech of welcome, which was cordially received, and subsequently the Princess personally thanked Colonel Austin for bringing his regiment to participate in the celebration. In the sham fight, the Thirteenth bore a conspicuous part. One of the features of the day was the firing of the *feu de joie*. Seven cannon were fired, and the front rank of the men began firing from left to right in such rapid succession that it took only a few seconds for the line of smoke to go the half-mile of the front rank and down the half-mile again in the rear rank, to the starting-point, no two rifles being fired at once. The Thirteenth did finely in this—a manœuvre with which its members are not familiar. This having been repeated three times, the entire line gave three cheers for the Queen, and the organization marched in review past the grand stand and the Princess, who still remained on horseback.

In the evening a grand banquet was given to the officers of the Brooklyn Regiment, the Governor-General presiding. The principal speech was made by Henry Ward Beecher, the chaplain of the regiment, who spoke of the natural sympathies and ties existing between this country and Great Britain, and expressed the hope that the present amicable relations would always continue.

On Sunday Mr. Beecher preached at St. James's Street Church to an immense audience, and in the evening the regiment started on its homeward trip, receiving a most enthusiastic send-off from the populace. On reaching Hartford, Conn., on Monday, the regiment, under the escort of the First Regiment Connecticut National Guard, paraded the streets and was reviewed by Governor Andrews. It arrived in this city at nine o'clock in the evening, being received at the Grand Central Depot, where a vast crowd had assembled, by a troop of cavalry from Brooklyn and the Ninth Regiment of this city. As the regiment passed Fifth Avenue and along Broadway it was everywhere greeted with demonstrations of enthusiasm. Chaplain Beecher, who sat on his horse like a veteran, was the central figure of attraction. All the way down Fifth Avenue the sidewalks, stoops and balconies were thronged with spectators, and everybody applauded him as he rode past in his military uniform, with the white emblem of the cross showing prominently on the side of his black hat. A squad of mounted police went in advance to see that the way was perfectly clear. Then came the troop of cavalry, and following that the Ninth and Thirteenth Regiments with their splendid bands. The line of march was straight down Fifth Avenue to Fifteenth Street and thence to Broadway. Mr. Beecher took all the honors of the occasion. A great crowd followed him on each side, and, although he seldom looked to the right or the left, the applause was at times so great that he felt constrained to return the compliment either by bowing or raising his hat.

The Thirteenth Regiment, tired and footsore though its members were, looked fresh and gay as if it had just marched out of its armory for a Fourth-of-July parade. All the members of the Regiment wore badges presented to them in Montreal, consisting of a simple plaid ribbon, with the portraits of the Marquis of Lorne and the Princess Louise attached. As the red-coated band of the Thirteenth turned out of Forty-second Street into Fifth Avenue they played "God Save the Queen." A banner presented to the regiment in Montreal, with the Stars and Stripes on one side and the Union Jack on the other, was borne along with the regimental colors. On reaching Brooklyn the regiment was met at the ferry by the Twenty-third Regiment and escorted to its armory on Flatbush Avenue.

THE JOUETT-HOFF SAFETY BUOY.

THE safety-buoy invented by Captain James E. Jouett and Lieutenant-Commander William Rainbridge Hoff, of the United States Navy, is considered a very important addition to the various apparatus now in use for saving human life. It is designed particularly for the purpose of establishing communication between the ship in distress and shore of safety, when it is impracticable to reach the vessel from the shore by any of the means employed at present at the stations of the United States Life-saving Service.

The buoy consists of two water-tight compartments, seventeen inches square, connected by a strong iron frame which contains a reel on which the line is stowed. Against the forward end a strong sheet of heavy boiler iron, measuring three feet square, is securely fixed so that its corners will act as anchors and force themselves firmly in the ground on reaching the beach. When thrown overboard the buoy is driven ashore by the combined action of the wind and sea paying out a line from a reel located between the two compartments, through a sleeve in the after air-chamber.

It is expected that when a sea is too high to permit a lifeboat to be launched, or when a crew on shore are unable to get a line to a vessel in distress, this buoy will successfully make the transit; and the moment it strikes the beach it will sink deep enough in the sand to secure a good purchase when an effective communication will have been established. The line has a breaking strain of 1,000, so that the crew of a stranded vessel may reach the shore in safety by it. The buoy, stood on end, is about five feet high, and will weigh with its

CALIFORNIA.—PHASES OF CHINESE LIFE AND LABOR IN SAN FRANCISCO.—FROM SKETCHES BY H. A. OGDEN AND WALTER YEAGER.

Digitized by Google

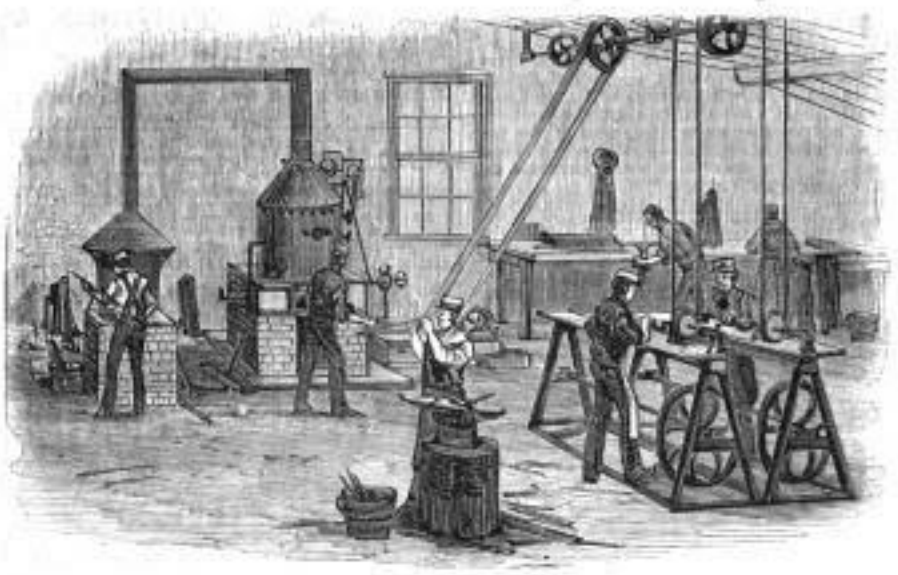
6,000 feet of line 250 pounds. It floats half submerged, and is a prominent object in the water, being painted white with a large red cross on the end. A chemical light is attached, which ignites and burns brilliantly for twenty minutes by the action of the water alone.

This invention was tested last January by a special board of naval officers, who spoke in their report in hearty praise of the apparatus.

HON. CHARLES FOSTER,

REPUBLICAN CANDIDATE FOR GOVERNOR OF OHIO.

HON. CHARLES FOSTER, nominated on May 28th as the Republican candidate for Governor of Ohio, is a representative of the best element of his party. He is honest, pure, and able. Born in Seneca County, Ohio, April 12th, 1828, and receiving an academic education, he entered upon a business life, making his first appearance as a politician in 1863, when he was elected as State Senator, but failed to obtain his seat owing to the rejection of the soldier-vote. He was elected to Congress in 1870, and re-elected in 1872. During his second term he came into notice in a wordy encounter with General Butler, getting the advantage of that combative member. Later he obtained a reputation for candor and independence by joining with William Walter Phelps in a report upon the Louisiana carpet-baggers' administration of affairs. In 1874 he again carried his district, and in 1876 he won his fourth victory. In each of these four contests the Democrats carried the district by majorities ranging from 300 to 2,000, but they were unable to defeat Mr. Foster. Under the Democratic readjustment of districts last year Mr. Foster's county was thrown into a stronger Democratic district. The Republicans of the Seventh District nominated him, but he declined, preferring to make the fight in his own district, the Eighth. He was defeated by only 1,255 plurality and less than 400 majority, although the district had given Tilden 3,740 plurality in 1876. Mr. Foster was for a long time a member of the Committee on Ways and Means, and, during the excitement which resulted in seating President Hayes, occupied a prominent place and exerted a controlling influence in the councils of his party.



OHIO.—HON. CHARLES FOSTER, REPUBLICAN NOMINEE FOR GOVERNOR.—FROM A PHOTO. BY HOTT.

LEADVILLE.

A VERY remarkable sight is Chestnut Street, Leadville, during the prevalence of a thaw. The sidewalks are thronged till locomotion save at a snail's pace is rendered impossible, since the sidewalk with its irregular planks is a sort of raft, floating high above the yellow-brown ooze—of the color and consistency of thick pea-soup—that, eighteen inches deep, incumbers the roadway. Hardy miners who will spring, like deer, from dizzy projecting rocks, recoil before this glairy, adhesive paste, and may be seen picking their steps along the jagged planks in as gingerly a manner as though they were newly-fledged belles in the loftiest of Pompadour heels. Wagons come plashing through this mixture of snow and ochre and size, the mules, for once, declining to kick up, the horses moving as if their legs were spanceled. A splash sometimes takes place—and what a scattering ensues! Men who have faced the grim red front of battle ere now fly as before a live shell, while women, uttering howls of distress, plunge into the nearest open door to avoid the utter annihilation of their finery, for be it known that the daughters of Eve bloom glowingly up here, sporting toilets copied from plates in *Frank Leslie's Lady's Magazine*. At times, desperate emergencies drive desperate people across the saffron-hued marsh, as witness the illustration. A miner, his hands in the pockets of his pilot coat, espies a bar-room, and, regardless of the treacherous marsh in front of him, plunges, Quintus Curtius-like, into the gulf and heads gallantly for the lurid light that beckons him onward. His wife, her household goods beneath her right arm, needs must follow, and clinging to her skirts their son, a youth whose pants would seem about to engulf him bodily. Poor lady! What rubbing and scrubbing, and cutting and scraping, and washing and ironing, this unhappy transit is likely to cost her! Again, two recent arrivals, reckless of consequences, make a rush for a house whereon the words "Board and Lodging" are temptingly displayed. These men have had no sleep for nights, and the idea of a bed and pillow would draw them through fire. A pair of mules have become unmanageable under a wagon laden with furniture, and in a few seconds the splashing will commence that is bound to clear an open space at each side of the street. The slush in Leadville is a specialty, and is quite on a par with the many peculiarities of this region of silver and slush.

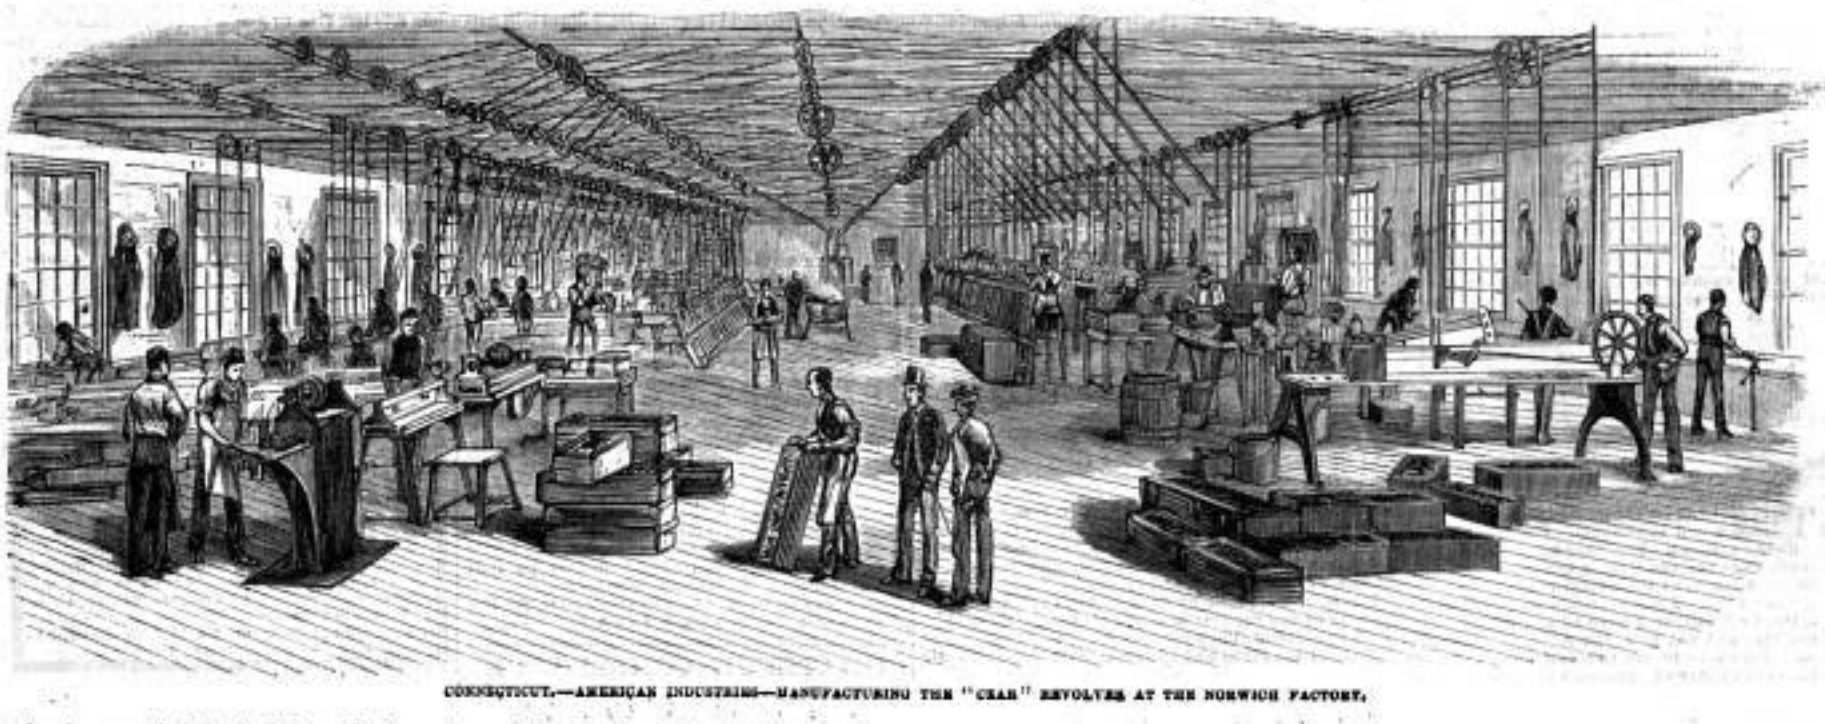
A RELIGIOUS IMPOSTOR IN RUSSIA.

THERE has been a curious trial in the Government of Saratoff, in Russia. Two peasants, named Tokareff and Kotchetkoff, were accused of obtaining money under false pretenses. Tokareff had gone from village to village stating that he was "The earthly Christ," and that Kotchetkoff was "Sabaoth"; that he (Tokareff) was inspired by the Holy Ghost, and that God had given him the power of sentencing and punishing all men on the day of judgment. His white face, surrounded by coal-black locks, his glittering black eyes, thin compressed lips, humble look, and low, harmonious manner of speaking, are stated to have produced an extraordinary impression on the villagers, who readily gave him anything he asked for to procure exemption from punishment after death. He usually demanded a horse and a load of wheat, or one hundred roubles, declaring that those who made such an "offering" to him thereby made for themselves "a ladder by which to attain eternal life and the pardon of all their sins." One of the witnesses, a wealthy peasant named Lochoff, said that Tokareff had told him his soul could not be saved unless he would sell his house, fast for nine days, and then bring him the purchase-money as an "offering." Lochoff did as he was instructed, and placed two hundred and fifty roubles, the amount of the purchase-money, on a table in front of a picture of the Virgin. Tokareff took the money, but soon afterward told Lochoff it was not sufficient, and not only induced him to make more "offerings," but even to give up his wife to be employed by Tokareff as a servant. It also appeared that three women lived with Tokareff, whom he called his "spiritual wives" and "mothers of God"; and an iron chain with the inscription, "Lord of Glory," was produced, which Tokareff said he had obtained "from an unknown person." The court acquitted Kotchetkoff, and sentenced Tokareff to repay to his dupes the money he had received from them, and to serve for fifteen months in the criminal companies of the Russian Army.

MASSACHUSETTS.—AMERICAN INDUSTRIES—MANUFACTURING THE "TRIUMPH" SHOT-GUN CANE AT BOSTON.

THE PUBLIC DEBT OF AUSTRALIA.

THE seven Australian colonies are plunging head long into debt. Their total debt now amounts to $725,000,000, which is almost four and a half times the revenue, including in it the land sales. Per head of the population, it amounts to $145. The *Saturday Review* estimates if the debt of the United Kingdom bore the same proportion to the population, it would nearly reach $5,000,000,000; in other words, it would exceed its present amount about forty per cent. Although the accumulated wealth of the United Kingdom is incomparably greater than that of the colonies, yet a debt of $5,000,000,000 would be thought enormous. New South Wales, with a population of 630,000 has a debt of $60,000,000; Victoria, with 860,000, has a debt of $100,000,000, and New Zealand—400,000—has a debt of $120,000,000. These debts have run up with startling rapidity. In 1872, the debt of the seven colonies only amounted in the aggregate to $205,000,000; now they are nearly $365,000,000. In seven years, therefore, they have increased nearly eighty per cent. This is a rate of growth far more rapid than that of either population or wealth, and, if continued, must end in serious embarrassment.



THE MANUFACTURE OF FIREARMS.

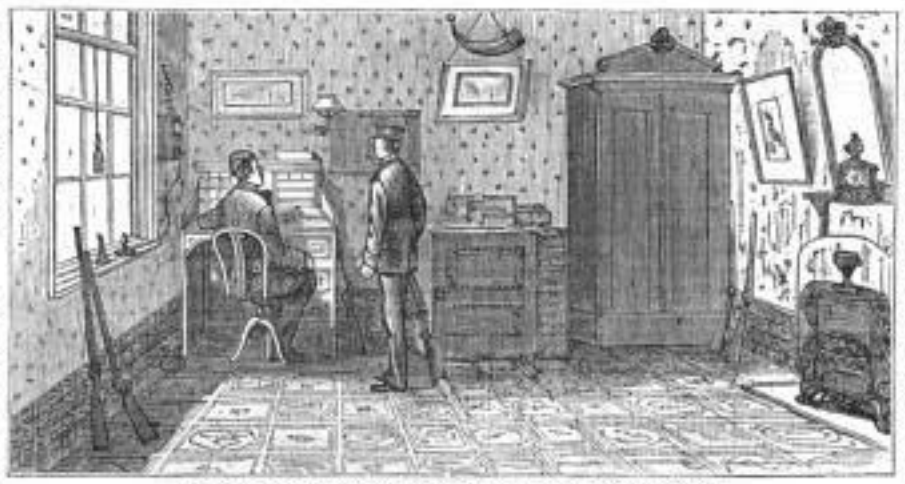
THE manufacture of firearms deservedly ranks among the most important of our American industries. From the day when the Colt revolver, with its great improvements upon antiquated devices, gained the highest award at the great London Exhibition of 1851, there has been a steady advance in the extent of this great department of business, in which the United States, by common consent, holds the pre-eminence. Among the many establishments which in this country are largely engaged in the manufacture and sale of firearms of every description, and stand as representatives of all that is best in achievement and enterprise, is the house of G. W. Turner & Ross, of Boston, Mass. The house has one of the most central and convenient—and, therefore, one of the best—locations in the "Modern Athens," namely, Dock Square, into which the tide of travel and business surges from all quarters, through the main thoroughfares of the city. One of the largest of gun-stores in New England, this establishment covers, in its various departments, many thousand square feet, and there cannot but be a general interest felt in the growth and success of such a business house.

That the firm has been able to thus attain and keep, without fear of any rival, a leading rank in the business, is due, in no small degree, to the fact that they do yearly the *heaviest advertising in the trade*, and indeed, have the reputation of being the heaviest advertisers in the United States. But, while Messrs. G. W. Turner & Ross enjoy a line of trade which carries their manufactures and their specialties into every State from Maine to California, they have not been content with American patronage alone. Their correspondents and patrons are to be found in South America as well as in Europe; and even the South Sea Islands lay levy on this firm for its manufactures, which are as unexcelled in variety as in finish and care of workmanship.

THE MANUFACTURE OF THE "CZAR" REVOLVER,

that marvelously cheap and yet extremely elegant specialty, which is sure to gain the greatest popularity, is carried on at the Norwich factory, and the accompanying view brings to the eye very vividly the busy scene in which its manufacture is conducted from stage to stage. It is only the great sale of this weapon which enables the firm to offer it at so low a figure as $2.75, for the machinery required for its production is extremely delicate and costly, and in this as in other manufactures of the kind, the expense of the purchase and maintenance of the necessary machinery is a very important factor in the total outlay. None of the revolvers ordinarily sold for $10 or $12 cost more than $3, so far as material in construction is concerned; it is the proportionate cost of machinery which makes the price so much higher. Messrs. G. W. Turner & Ross have been fortunate enough to secure the machinery necessary to produce this revolver at a merely nominal sum, not one-twentieth part of its cost; and it is because of this fact that the main expense in the manufacture of a revolver can be ignored, and so attractive a bargain as this offered to the general public at one-quarter's part of its retail price under ordinary circumstances. The "Czar" is a genuine gold-mounted revolver, made after the most approved Russian model, beautifully chased and finished; in every detail of its construction the finest material is used, and that only, while the mechanism is as

CONNECTICUT.—AMERICAN INDUSTRIES—MANUFACTURING THE "CZAR" REVOLVER AT THE NORWICH FACTORY.



Digitized by Google

delicately adjusted as in the most elegant watch. Of course the representation of the "Czar" which is given, shows only an outline view of this beautiful weapon, to which no mere description can do justice. The "Czar" must, emphatically, be seen to be appreciated. The reputation of the "Czar" has spread far and wide. Only recently Messrs. G. W. Turner & Ross received orders from two foreign houses, calling for 10,000 of these revolvers; while, within a few days, the firm has been compelled to decline several offers to purchase large amounts for export for the reason that the domestic orders which continually come in from all parts of the country could not be filled on time.

THE "TRIUMPH" SHOT-GUN CANE.

The principal manufactory of firearms by this firm is at Norwich, though there are adjunct establishments at Worcester and Rochester, N. Y. Some of the finest work of the firm, however, is done at home, in the immense repairing department at Boston, in Dock Square. Here is manufactured the famous "Triumph" shot-gun cane—the only device of its kind in the world—and prized at its true value by taxidermists the world over. This is an ordinary looking cane to outward appearance, but at the will of the owner is transformed in a moment into a breech-loading rifle or shot-gun. That it should be appreciated by the highest classes abroad—where taxidermy is much more of a fashionable pursuit than here, though it is growing constantly in popularity in America—is not at all to be wondered about. The view represents that part of the repairing department where the "Triumph" shot-gun cane is made. The firm gives employment at present to over 300 skilled workmen, often running work night and day to meet the demand for their "Czar" revolver.

Another specialty which has been popularized by this firm, and is a product of its repairing and manufacturing rooms, is the "choke-boring" of guns,

MASSACHUSETTS.—AMERICAN INDUSTRIES—THE COUNTING-ROOM.

which is itself almost a science, and which is properly done by but few firms in the world.

The great advantages of machinery can never be more conclusively shown than in the facility with which, by its agency, the most delicate and beautifully wrought of firearms are manufactured. By means of their control of the most complex and expensive gun-making machinery, the firm of G. W. Turner & Ross are able to offer to the public many most attractive novelties, which but for the tireless labor-saver could only be purchased by the rich, but now are within the reach of all.

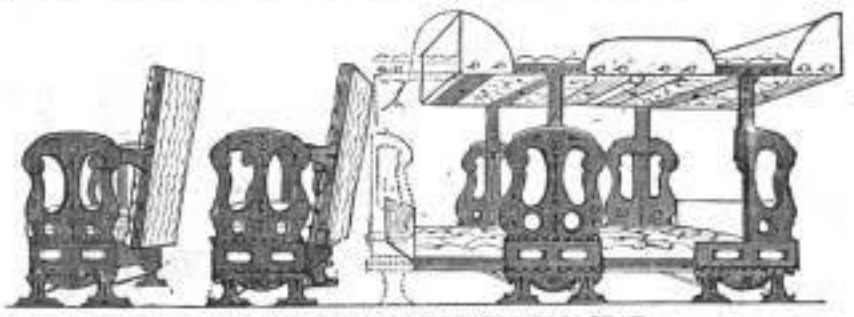
THE MAIN SALESROOM OF THE ESTABLISHMENT is carefully represented by the accompanying sketch. There is in all more than 5,000 square feet of flooring in the salesrooms, which may be said to form an armory of the most complete and interesting description. Here is an exhibition of one of the finest lines of firearms ever shown in this country. Indeed it contains everything in the line of sporting goods, from the superbly ornamented "Scott" gun, valued at $500, down to the $25 "Prairie Queen" which has attained such well-merited popularity.

Every conceivable invention and device in the shot-gun line and in military accoutrements find a representation in this magnificent stock—from the old-fashioned flint-lock furnished to the South Sea traders, up to that triumph of modern art, the Peabody-Martini rifle.

On the second floor of their establishment there is a bijou private office, fitted up with every convenience, connected by speaking-tubes with all parts of the establishment and by telephonic communication with many of the business houses of Boston. In fact, all available means have been employed for the rapid and perfect transaction of business.

It would, of course, be impossible, within the limits of an article like this, to enumerate even the most popular specialties manufactured and sold by the firm of G. W. Turner & Ross. One of the most noteworthy of their recent bargains is the "Phœnix Creedmoor" rifle—the new model—which, though sold at a merely nominal figure—$15—is quite equal, in every respect, to the most expensive "Sharp's" rifle. Its admirable workmanship, the sterling quality of steel and other material used in its manufacture, no doubt, account for the popular success which the "Phœnix Creedmoor" has obtained, and thus helped to give the firm a more extended patronage than any other house in a similar line of business.

The Western and Southern trade of this house—a trade to which it may be said, perhaps, to cater especially—is very extensive. Indeed, the orders which come in from far-off California are quite as numerous as those which are sent from Massachusetts; and, in the busy season, the line of express teams in waiting to receive the shipment destined for every State in the Union, fairly block the street



THE "CZAR."

in front of the main store. With such an extended constituency, the business of the firm is carried on principally through the mails; indeed, the number of letters received daily by this house is scarcely exceeded in any business house in the United States, and the services of three book-keepers are constantly employed in opening the letters and noting their contents. The firm's extensive business correspondence makes it necessary also to engage the services of specially-employed short-hand writers, to whom nearly all letters are dictated by members of the firm.

The most complete catalogue of firearms in the world is that issued by Messrs. G. W. Turner & Ross. It is as familiar in many Western and Southern localities as the local paper, and relied upon as one of the best of authorities in sporting matters. Several editions are published in a year—lithographed pages being used whenever the public can thereby gain a better idea of the articles offered—and hundreds of thousands of copies are circulated. The catalogue is sent free by mail to all who ask for it, and should be in the hands of every sportsman.—COM.

MASSACHUSETTS.—AMERICAN INDUSTRIES—THE MAIN SALESROOM.

THE REVERSIBLE SLEEPING-CAR SEAT.

(Patented June 11th, 1878.)

THIS seat can be converted into sleeping-berths in less time than any other in use. It is simple, neat, strong and substantial. For comfort it is excelled by none. It occupies no more space than any ordinary car-seat. The passenger can sit upright in upper or lower berth. The distance of the lower berth from the car floor is ten inches; of the upper, four feet only. The cars will, therefore, keep a better balance, as the weight is nearer the track. The day-seat is neat, and especially comfortable for leaning back. The Reversible Sleeping-car Seat has been examined by some of the most prominent railway officials, who have all pronounced it far superior to any car-seat or sleeping-car ever seen. The inventor and patentee, Mr. A. M. Smith, 72 North Fourth Street, Philadelphia, offers, to introduce the patent, to give to the two first companies that will build the seats, and run them, within a reasonable time (as he may designate), a royalty for six cars free.

PURE FRUIT SYRUPS.

During the last few years we have noticed a large and increasing demand for Fruit Syrups, out which refreshing drink could be prepared at short notice. American fruits are proverbial for fine flavor, but the flavors of many brands of syrup heretofore manufactured have been produced by essences and ethers, which are far inferior to the flavors obtained direct from the fruits. Having last season made an arrangement for a full supply of juices, we are now in a position to offer syrups of a very superior quality, prepared in our own laboratory from these and the best steam refined white sugar. They are put up in full-sized honest-bottomed bottles, each of which has our name blown in the glass, and bears a handsome label, the general style being very attractive, while the intrinsic merit of the syrups insures a permanent demand from the consumers. Our syrups will keep in any climate, and dealers only need try them to be convinced that they are the most attractive and saleable goods which they can put on their shelves.

We pack these Syrups in cases of one dozen each, Quarts or Pints as desired, assorted flavors, as follows:

Assortment No. 1 contains		Assortment No. 2 contains	
3	Bottles Raspberry,	1	Bottle Blackberry,
2	" Strawberry,	1	" Grape,
1	" Pineapple,	1	" Sarsaparilla,
3	" Lemon,	1	" Orange,
2	" Vanilla,	1	" Orgeat,
1	" Ginger,	1	" Sherbet,
		1	" Raspberry,
		1	" Strawberry,
		1	" Pineapple,
		1	" Lemon,
		1	" Vanilla,
		1	" Ginger.

Consumers who are particular about the quality of the Fruit Syrups they use will do well to note the variety of flavors we offer, and get a case to order from any first-class retail grocer. Be sure and ask for Thurber's Syrups.

H. K. & F. B. THURBER & CO., Mfrs., New York.

THAT the phonograph can "bottle up" the voice and pass it down to future ages is indeed a wonder, but is not the restoration of a lost voice more wonderful? And yet Dr. Pierce's Golden Medical Discovery speedily restores a lost voice, cures hoarseness, sore throat, bronchitis and consumption. Many ministers who had abandoned the pulpit, by reason of sore throat and general debility, have, by the use of the Discovery, been restored to perfect health and strength. Sold by druggists.

THE Vicksburg *Herald*, of May 25th, says: "The last number of FRANK LESLIE'S ILLUSTRATED NEWSPAPER contains a full page of illustrations of the late Labor Convention. One sketch gives an exterior, and another an interior, view of the Garden where the convention assembled, with the body in session. The sketches are very accurate and would be recognized at once."

USE Hop Bitters once and you will use no other medicine. Test it.

THE popularity and success of the "America" Extra Dry Champagne, introduced in this market a few years ago by Messrs. A. Werner & Co., of 308 Broadway, are something remarkable. Overcoming the objections of rivals and surviving the competition of imitators, "America" Extra Dry is now firmly established as one of the standard champagnes. The causes of this result are not far to seek. Merit wins, says the proverb, and "America" Extra Dry wins on its merits, repeatedly tested. Purity, uniform excellence and cheapness are qualities which could not fail to commend and confirm the public approval.

ALL your own fault if you remain sick or out of health, when you can get Hop Bitters.

NO HOTELS in the world can equal the leading ones in the United States. To this flattering reputation the ST. NICHOLAS of New York has largely contributed by its palatial elegance and superior skill of cuisine. Result, a house which unites the proudest traditions of the past with the most fastidious attention to the demands of the present.

OTHER odorous waters undergo many variations of aroma as they fade into insipidity, but MURRAY & LANMAN'S FLORIDA WATER passes through no such gradations. As it is when sprinkled upon the handkerchief or the garment, so it remains—delicate, refreshing, and delightful to the last.

CAUTION.—All genuine Asbestos Liquid Paints, Roofing, Boiler Coverings, Fireproof Sheathings, Coatings, Cements, etc., bear the name of H. W. JOHNS, and are manufactured only by the H. W. Johns Manufacturing Co., 87 Maiden Lane, New York, who will supply samples and descriptive price list free by mail.

Blair's Pills.—Great English Remedy for Gout and Rheumatism. All Druggists have them.

Stuttering cured by BATES'S APPLIANCES. Send for description to BATES & CO., Box 2,236, New York.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Sold only in colored tins, labeled,

JOHN HOLLAND'S Patent Record GOLD PEN
Patented Oct. 2, 1872.

Is the highest achievement in the manufacture of Gold Pens and the result of experiments for more than twenty years. The "RECORD" Pen is produced by a skillful combination of the two precious and non-corrosive metals; *16 kr. Gold* and *Platinum*, while the ordinary gold pen contains an alloy of copper, reducing its fineness without yielding that elasticity, density and steel like temper which the costly *Platinum* supplies. The "RECORD" Gold Pen *Points* are of the best *Iridium*, (Diamonds,) indestructible with fair treatment, and polished to glass like smoothness.

Steel pen writers have now every objection to gold fairly overcome, and every requirement in a Pen which will endure and not oxidize, squarely met. The "RECORD" Gold Pen is guaranteed to possess Durability, Permanency of Spring and Perfection of Point. Price, $2.50, sold by all Jewelers and Stationers in the United States. If not found order direct from *JOHN HOLLAND, Manufacturer, 19 W. 4th St., Cincinnati.*

Frank Leslie's
LADY'S JOURNAL.
The Pest and Handsomest Ladies' Paper in America.

This favorite periodical has commenced its Sixteenth Volume, and will be conducted on the same general plan which has secured for it its great popularity, and rendered it so welcome a visitor to American homes. Early and accurate reports are given, with illustrations, of the prevailing Fashions at home and abroad.

Colored and Plain Fashion Plates are imported monthly from Paris exclusively for this journal.

Elaborate Articles are also given descriptive of "What New Yorkers are Wearing."

The Literary Contents comprise brilliant Serials, attractive Short Stories, Sketches of Life, Character and Scenery, Fashion and Society Gossip, etc., etc. Its art and other miscellaneous engravings are selected with a view to variety, interest and beauty.

A charming new serial just commenced, entitled:
"CECIL'S MISTAKE; OR, QUITS,"
By the favorite author of "Ladybird's Penitence," "Madge," "A Terrible Mistake," etc.
It is a novel of rare strength and beauty, with a powerfully drawn plot and admirable dialogue and descriptive.

Published every Friday. For sale by all newsdealers. Price 10 cents per copy; annual subscription, $4, postpaid.

FRANK LESLIE'S PUBLISHING HOUSE,
53, 55 and 57 Park Place, New York.

A $10. GOLD MOUNTED REVOLVER FOR $2.75

THE CZAR
THE RUSSIAN MODEL
USES EXTRA LONG RIFLE CARTRIDGES

THIS PICTURE IS AN Exact Representation.

THE AMERICAN GENTLEMAN'S REVOLVER. The most elegant Revolver in design, shape, and finish, ever seen in the United States. The above picture can give but a faint idea of this beautiful weapon. It is made of the finest **English Steel**, positive stop Rated Cylinder (taking extra long rifle cartridges), and having an **extra long barrel.** *THE BARREL IS SIX TIMES AS LONG AS THE CYLINDER*, and is rifled as carefully and finely as a Creedmoor Rifle. **The Czar has both front and rear sights,** the front sight being shaped like the famous "Californian Sights made right," the finest muzzle sight made. **The Czar** will kill further than an ordinary Revolver will shoot; it will bring down a squirrel from out of the tallest tree; it is a dead shot at 100 yards. The Czar has a similar shaped stock to the Smith & Wesson 38 caliber, which gives the finest "GRIP" obtainable. The stock is hard rubber, finely chased and engraved. The frame and barrel are triple nickel silver plated, and the cylinder and base pin are heavily **gold plated.** It is engraved throughout by hand in the most exquisite manner; the work on the frame being so fine as to resemble **frosted silver.** The effect of the gold and silver plate and the dark engraved rubber stock is beautiful beyond description. **The Czar** is in every respect the most superb revolver that has ever been made; and there is not a gold-mounted revolver in the market for $10 that will in any way compare with it. WE GUARANTEE IT EQUAL TO A COLT OR SMITH & WESSON IN WORKMANSHIP, MATERIAL AND ACTION. Every one will remember seeing our advertisement of the Alexis Revolver, last fall. The Alexis had the most remarkable sale of any Revolver ever sold in this country—over 30,000 in three months; and at times it was a perfect impossibility to fill our orders on time. The Alexis was a bargain, but the **gold-mounted Czar** is as much finer and better everyway than the Alexis as a Winchester Rifle is better than a common Musket. The Alexis was made for a large Russian firm, who were unable to pay for them. The Czar Revolvers were a part of the same order, but were barreled for an **officer's pocket Revolver** at a much higher price. The actual retail price of the Czar Revolver was to be over ten dollars, and we offer it for $2.75. **It is the biggest bargain as well as the handsomest Revolver ever seen in America,** and we guarantee perfect satisfaction or money refunded.

PRICES. CZAR REVOLVER, rubber stock, full nickel silver plate, GOLD-MOUNTED, **$2.75;** with ivory stock, **$3.75;** with pearl stock, **$4.50.** On receipt of cash with order, we give **FREE** a box of cartridges with each Revolver. The cartridges WILL NOT be given free when the Revolver is sent C. O. D. Uses regular metallic cartridges sold everywhere. To those not living near an express office we will send the Czar Revolver by registered mail, prepaid, for 50 cents extra; when sent by mail cash in full must come with order, as we cannot send C. O. D. by mail. We will furnish, for **50 cents extra,** 40 extra cylinder; on this they have 14 shots ready for use; the cylinders can be changed in an instant. For **$1 extra,** an extra barrel, 8 inches long, elegantly rifled, for target shooting. The barrels can be changed in a few seconds, and with an 8-in. barrel the Czar is almost as good as a Rifle. The Czar loads and clips cartridges without removing the cylinder.

READ THIS CAREFULLY. *With two-cent, the same as with twenty machines or workers, the price depends.* **1st,** upon the *quantity made* (if in shipment they POSSIBLY can be made at one-half the proportionate cost of 1,000 and **2nd,** upon the *use of the machinery necessary to produce them.* It is often the case that the producing machinery of a new Revolver costs $10,000; now if only 5,000 of these Revolvers were made, $2 apiece would have to be added to the **real cost** of each Revolver to get back the cost of the machinery. There is scarcely a $10 Revolver in the market that really costs over $7, or that couldn't be sold for that sum if the cost of the machinery, patterns, &c., &c., necessary to produce it was not taken into consideration; but this of course must be, and each Revolver is taxed for its proportionate part, which is often much more than all the rest. The machinery used in the manufacture of the Czar bodies and clips cartridges without removing the cylinder. **Czar Revolver cost over $30,000,** and for the use of this machinery we pay absolutely nothing, the Revolver costing us simply for material and labor. There are about 30,000 of them all made, with the exception of the rubber stock, which we make ourselves, stamped with our own initials. This number will not last long at very short time, as it is the most tremendous bargain ever heard of in the Revolver line; a veritable **$10 Revolver** sold as stated, for **$2.75.** After this lot is exhausted, we shall continue making them to meet the demand, though the profit will be very small. WE DO NOT ASK ANYONE TO TAKE OUR WORD IN THIS MATTER; we will, when the purchaser requires it, send a Czar Revolver, C. O. D., with privilege of examination at express office, before paying bill, WITHOUT ANY MONEY IN ADVANCE. This offer places our statement **absolutely beyond disbelief.** If you doubt our assertion **then we will prove them to you,** without any risk on your part. This is neither a swindling or deceptive advertisement. If you wish to purchase a Czar Revolver and decide to send the money in advance then deposit it with your express agent and get him to write us, *guaranteeing to return the Revolver to us within three days, if not taken, free of expense to us and in as good condition as when received,* and we will forward the Revolver; of course such orders will always be filled before those sent C. O. D., which may have to wait several days, and the purchaser will have to pay the return charges on the money, which are often very heavy, and he will not get the box of cartridges which we give free when the Revolver is paid for in advance. We offer to send them C. O. D. simply to prove beyond doubt that we claim no more than the Revolver itself will have up. Out of ten thousand sent C. O. D., not one would come back, but the extra trouble to us of a purchaser sent C. O. D. is very great and we try to make it an object to send cash in advance. IF THE REVOLVER IS NOT AS REPRESENTED WE WILL REFUND THE MONEY AT ANY TIME. *Send by registered letter, Post Office money order, or bank draft, or send your money by your express agent, with which and get the Revolver and deliver it to you.* Address **G. W. TURNER & ROSS, Importers, M'f'rs, and Dealers in Fire-arms,** 15 & 17 Cook Street, Boston, Mass.

UNCLE SAM AND THE FINANCIAL QUACKS—HOW REPRESENTATIVE WOOD PROPOSES TO TREAT THEM.

"MR. FERNANDO WOOD pronounces the Warner Silver Bill a nuisance: 'What the country needs is rest. It is,' he said, 'in the condition of a convalescent patient with a vigorous constitution; when a doctor comes meddling and trying to dose such a patient, he ought to be driven out with a horsewhip.' Mr. Wood intimated that the financial quacks who are trying to dose the country with their remedies ought to be subjected to the same kind of discipline."—*Washington Dispatch to the New York Tribune.*

Important to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP is the only thing that mothers can rely upon for their children. It corrects acidity of the stomach, cures wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. During the process of teething its value is incalculable. It softens the gums, reduces inflammation and allays all pain, thereby giving rest to the child and comfort to the mother.

THE GENUINE GAFF, FLEISCHMANN & CO.'S Compressed Yeast

Bears the following Label, which is printed on Yellow Paper.

THE merits of the *Genuine "Compressed Yeast"* are undeniable. As proof of it, we refer to the host of imitations which have been offered to the public, hoping that the stolen name of

"COMPRESSED YEAST"

(which is secured TO US alone by letters patent of U. S. dated December 5th and 19th, 1876, January 9th and 16th, 1877, and March 6th, 1877,) would sell their goods by deceiving the public.

The housekeeper who once uses GAFF, FLEISCHMANN & CO.'S COMPRESSED YEAST, cannot be induced to abandon our pure extract of grain, which is a natural leaven, for a counterfeit article or a chemical compound, both of which are to be avoided if good health is a first consideration with the consumer.

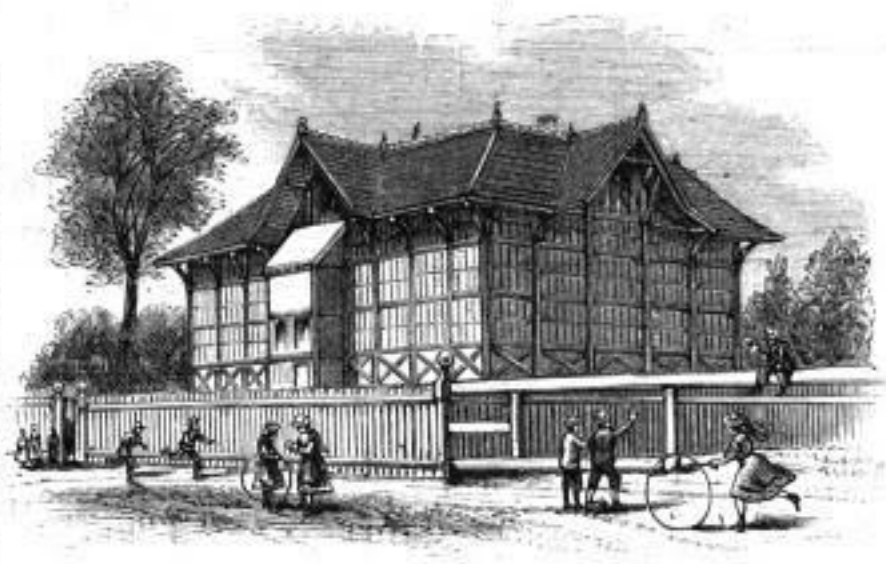
THE NURSERY AND CHILD'S HOSPITAL.

RECEPTION AT THE COUNTRY BRANCH AT WEST BRIGHTON, S. I.

THE annual reception of the Country Branch of the Nursery and Child's Hotel at Lexington Avenue and Fifty-first Street, in this city, held on May 27th, at West Brighton, S. I., was an occasion of great interest to the friends of this worthy institution. The hospital buildings, comprising a main house and a dozen or fifteen one and two-story cottages, stand on the old Dr. Watson estate, about two miles from the West Brighton Landing. The ground is high, and commands a fine view of Newark Bay and the distant hills of New Jersey. The little cottages, many of them named after those who have given money to the charity, are scattered about among the trees, and give the place the appearance of a picturesque little village. The grounds are neatly kept, and the buildings are models of tidiness. The healthfulness of the locality is shown by the fact that the mortality at the Branch is 5¾ per cent., while at the city hospital it is 15 per cent.



The Nursery and Hospital at Fifty-first Street was founded twenty-five years ago, and has justly ranked as one of the most deserving of our city charities. The Country Branch was established nine years ago, and has proved a most valuable auxiliary of the parent institution.

The reception on the 27th ultimo drew together a large number of managers and friends of the institution, among whom were Mrs. A. S. Sullivan, Mrs. Erastus Brooks, Mrs. D. G. Croly, Mrs. William M. Kingsland, Miss R. B. Hunter, Mrs. C. P. Burdett, Mrs. T. A. Craven, Mrs. B. W. Neftel, Mrs. George Ogden, Mrs. J. Riley, Miss M. R. Smith, Mrs. E. G. Tinker, Mrs. E. H. L. Townsend, Mrs. W. H. Wells, Mrs. J. H. Wright, Mrs. C. T. White, Mrs. Leonard D. White and Mrs. S. O. Vanderpoel, wife of the Health Officer of the port. The Advisory Committee was represented by Mr. Cornelius Du Bois and Hon. Erastus Brooks.

A pleasant programme had been arranged for the entertainment of the visitors. The opening exercises were held at the Home, where the Kindergarten class of sixteen girls between the ages of three and seven years gave illustrations of the Kindergarten method, after which a class of thirty older girls sang a number of pieces very sweetly, and gave recitations and readings which were warmly appreciated. Thence the visitors proceeded to the chapel, where, after further singing by the children, Hon. Erastus Brooks made a short address, congratulating the managers of the Branch on its healthfulness and its freedom from debt. He said there were on the nursery-grounds 115 adults, 22 officers and employés, and 183 children. There were also 217 children boarded out, who were under the charge of the hospital, making a total of 537 connected with the institution. Of the children, seventy-nine were under two years of age.

Every portion of the Sanitarium, as the Country Branch is called, was examined by the guests, and the fine location, the care of the children, and the vast improvement physically and morally they are there attaining, were highly commended.

The reception terminated with a lunch, and the company separated with a deepened feeling of interest in this model charity and its work.

SUMMARY OF ROUTES.

Names of Routes.	Length.	Cost.
1. The Wyse-Panama Route	45 miles and 1,986 feet.	$140,000,000.
2. The Nicaragua Route	181 miles and 2,664 feet.	180,400,000.
3. San Blas Route	34 miles and 4,426 feet.	268,000,000.
4. Atrato Napipi, or the Cupica Route.	180 miles and 1,380 feet.	206,000,000.
5. Tiati-Tolo Route	78 miles.	120,000,000.
6. Tuyra-Caquirri Route	145 miles.	130,000,000.

7. Truando Atrato Route—mainly corresponding with Route No. 4.

Should the canal be constructed as proposed, as it ultimately must be, the distance from New York to San Francisco, for ships, will be reduced by 14,000 miles; to Shanghai, 11,690 miles; to Canton, 10,900 miles; and to Calcutta, 9,000 miles. It is estimated that this diminution of the sea voyage by the use of the canal would result in a saving of at least $36,000,000 annually to the trade of the United States.

CENTRAL AMERICA.—MAP SHOWING THE WYSE PANAMA ROUTE FOR A CANAL TO CONNECT THE ATLANTIC AND PACIFIC OCEANS, ADOPTED BY THE INTERNATIONAL CONGRESS IN PARIS, TOGETHER WITH THE OTHER ROUTES DISCUSSED.

M. MENIER.

EMILE-JUSTIN MENIER, at present in his fifty-third year, has recently become best known to the American public in his position of president of the committee having in charge the prosecution of the Franco-American Treaty of Commerce, of which M. Léon Chotteau is the distinguished advocate in this country. M. Menier was born in Paris, and in early life devoted himself to scientific studies under the tuition of such *savans* as Orfila, Dumas and Pelouze, from whom he gained his comprehensive knowledge of chemistry. Afterwards he established large laboratories at St. Denis, which he freely opened for the use of students and scientific men. In 1859 he founded an annual prize of 500 francs for researches concerning medicinal drugs, and in 1864 organized a school of practical chemistry, devoting the sum of 10,000 francs to establishing courses of lectures on this subject. In the town of Noisiel, where he was brought up, M. Menier built at his own expense model schools for the entire population, and in 1875 he gave 10,000 francs to be distributed among the schoolteachers in the different departments of France who reported the largest attendance of scholars. At one time he was at the head of the most important wholesale drug and chemical business in France, located in the old Quartier du Temple, in Paris. Retiring from this, after a time, he undertook the enormous manufacture of chocolate which has given his name worldwide prominence, and which has been the source of the colossal wealth which he so generously employs. He founded his great factories, which now do a business of $5,000,000 per annum, at Noisiel, where was speedily located a thriving settlement, its pretty and convenient houses, schools, hospital, baths and other institutions having been erected by M. Menier. In 1870 he entered political life, being elected a member of the Conseil-Général of Seine-et-Marne, and recently he was returned to the Chamber of Deputies, a position which he still holds. M. Menier is a free-trader, and one of the few Frenchmen who have been nominated to membership of the celebrated Cobden Club.

M. Menier also founded a semi-monthly review, called *La Réforme Economique*, to which he has contributed articles on free-trade and taxation which have gained great celebrity. At the London Exhibition of 1862, M. Menier was Chairman on one of the International Juries; and at the Paris Exposition of 1867 he was Commissioner for the Republics of Nicaragua and Costa Rica, occupying also other honorary positions. During the Franco-Prussian War, he organized an ambulance corps, and was present during several battles, caring personally for the wounded.

M. Menier is one of the wealthiest of Frenchmen, residing in a palatial dwelling in the Parc Monceaux, in Paris, surrounded by objects of art and *curia*, of which he is a great admirer and connoisseur. Quite recently he has purchased the chateau of Noisiel for two million dollars. Besides his property in France, M. Menier owns a piece of territory in Nicaragua twenty-five miles square, and also another tract of six thousand acres on Lake Nicaragua. So admirably are his tropical estates managed by the proprietor, and so advantageous is this considered to the country where they are, that M. Menier was recently offered the post of Minister Plenipotentiary from Nicaragua to the French Republic, an honor he felt compelled to decline.

This brief sketch does its distinguished subject slight justice, though presenting him in the three-fold capacity of scientist, political economist, and public benefactor. He is a clear-headed business man, patriotic though cosmopolitan, and employs much of his immense fortune in the performance of acts of the most liberal and charitable generosity. A modern Lorenzo di Medici, he is noted for the lavish aid he dispenses to advance the progress of art and culture, while his tastes are not so lofty that he cannot also recognize the necessities of the poorer classes, and extend his munificence in their direction. The progress which has been thus far accomplished in popularizing the ideas embodied in the proposed Franco-American treaty are mainly due to the enterprise and the liberality of M. Menier, and to him chiefly will be owing the promised success of this movement, which is certain to become of such vast importance to the mercantile and manufacturing interests of these two great countries.

M. MENIER, MEMBER OF THE FRENCH ASSEMBLY, AND PRESIDENT OF THE COMMITTEE FOR THE FRANCO-AMERICAN TREATY OF COMMERCE.—FROM A PHOTOGRAPH BY WALERY.

PIERCING CENTRAL AMERICA.

THE International Congress, called to discuss a variety of projects for a ship canal across the Isthmus of Panama, met in Paris, on Thursday, May 15th, under the presidency of M. Ferdinand de Lesseps, of Suez Canal fame. Committees were designated to facilitate the discussion by considering specific points in the problem, and were organized with the following gentlemen as presidents: On *Statistics*, M. Levasseur, France; on *Economical and Commercial Relations*, Mr. Nathan Appleton, United States; on *Navigation*, M. Brock, Norway; on *Scientific Questions*, M. Daubree, France; on *Ways and Means*, M. Cerisole, Switzerland. After the election of officers, Commander Selfridge, who commanded the late United States Darien Surveying Expedition, made a three hours' speech on the results of his observations, dealing particularly with the Napipi route. An adjournment was then taken to enable the presidents of the committees to confer with their members and prepare reports on the topics assigned them. On May 17th, Admiral Le Noury, President of the Geographical Society of Paris, gave a dinner to the leading members of the Congress, when M. de Lesseps, making the principal speech, dwelt upon the five hours' discourse of Mr. Menocal in the committee while presenting the merits of the Nicaragua route

On May 19th, the second general meeting was held, when M. Fontaine read the report of the Committee on Statistics, in which he condemned all plans involving the construction of locks. He was followed by Mr. Appleton, of the Committee on Economical and Commercial Relations, who briefly reported the results of the labor of his committee, and by MM. Cerisole and Simonin. M. Reglos, a collaborateur of Lieutenant Wyse, who was indisposed, made an elaborate statement in support of the Wyse Panama route, declaring the system that distinguished it the only one favorable to maritime navigation.

Commander Selfridge was again heard on the Napipi route on the 20th, estimating the cost of cutting the canal there at $29,966,000. He was followed by Chief-Engineer Menocal, who presented plans and estimates for a ship-canal across the Isthmus by what he called the Chagres route, the work to cost $38,000,000. M. Gray, the Mexican delegate, was then heard in behalf of the Tehuantepec route. An attack being made on the estimates of the Wyse Panama scheme, a sub-committee was appointed to report upon the approximate costs of the necessary locks and tunnels.

On the 21st, this sub-committee reported that it would cost $160,000,000 to construct the canal at sea-level, with a tunnel through the mountains, but without the use of locks, exclusive of salaries. The chief address of the day was by Sir John Hawkshaw, an English engineer, who dwelt largely upon the disadvantages and positive objections to the Wyse route. In the afternoon the Committee on Technical Questions abandoned all projects except that for a canal via Nicaragua, with locks, and that for a canal to connect Simon Bay with the port of Panama.

Thursday's session was occupied by the reports of the sub-committees on Tunneling and Profile, by

ALEXANDER OF BATTENBERG, NEWLY ELECTED RULER OF BULGARIA.

an address by Mr. Appleton upon the merits of the San Blas route, by a further explanation of the Napipi route by Commander Selfridge, and an earnest speech by M. Simonin in advocacy of prompt action.

M. de Lesseps presided over the meeting of the Committee on Technique on Friday, and maintained that in the discussions preference should be given to a tide-water or level canal over all others.

No session of the Congress was held on the 24th, but several of the committees held meetings. The sub-committee on Technique having called for modifications in the plans of the Napipi and the Nicaragua routes, Commander Selfridge and Chief-Engineer Menocal were designated to prepare other plans.

At the meeting of the Committee on Technique on May 26th, the final reports of the sub-committees on Construction and Estimate for the different routes, adding to the original calculations of the engineers the cost of the modifications suggested by the several committees, were re-read.

These figures are as follows:

The Tehuantepec Route—Length, 240 kilometres (149 miles and 960 feet). Number of locks, 120. Total cost not estimated. Time occupied by a ship in passing through, 12 days.

The Nicaragua Routes—Menocal's plan: Length, 292 kilometres (181 miles and 2,664 feet.) Number of locks, 17. Expense of construction, 842,000,000 francs ($168,400,000). Time required to make the passage, 4¾ days. Blanchet's Plan: Length the same; cost of construction, 411,000,000 francs ($82,200,000).

The Panama routes—Wyse's plan (modified): Length, 73 kilometres (45 miles and 1,986 feet). Number of locks, 12. Total cost, 1,103,000,000 francs ($220,600,000). Time required for the passage, 1½ days. Kelly's San Blas route: Length, 53 kilometres (34 miles and 4,426 feet). Total cost (tunnel carefully calculated), 1,340,000,000 francs ($268,000,000). Time required for passage, one day.

The Darien route—The Atrato-Napipi: Length, 290 kilometres (180 miles and 1,380 feet). Two locks required. Total cost, 1,000,000,000 francs ($200,000,000). Time of passage, three days.

On the 27th, reports were presented by the Committees on Statistics through M. Levasseur, and on Ways and Means through M. Cerisole, both documents being of a very elaborate and valuable character.

The Committee on Technique adopted the Wyse Panama sea-level route on the 28th, after the Sub-Committee on Construction had reported the following revised estimates of the total cost: Lieutenant Wyse's modified Panama plan, with locks, 700,000,000 francs ($140,000,000); Menocal's Nicaragua plan, 900,000,000 francs ($180,000,000); The Atrato route, 1,130,000,000 francs ($200,000,000).

On May 29th, the full Congress met to take decisive action, and after disposing of several committee reports, adopted a resolution favoring the construction of the proposed canal from the Gulf of Limon to the Bay of Panama, by a vote of 17 to 8, with 16 absentees. After this action the Congress was formally closed.

By the Panama route the line of canal would commence at Navy Bay, on the Atlantic side, and, following the course of the Chagres River as far as Matachin, a distance of about twenty-six miles, whence the Obispo River would be utilized to near Paraiso, a connection would be made by means of an artificial channel between the Rio Obispo and the Rio Grande, that flows into the Pacific. There have been two plans submitted for this canal, their only difference being a slight change of direction at the western or Pacific end. The summit or highest point to be cut through on this line would be only 262 feet.

PRINCE ALEXANDER OF BATTENBERG,

THE ELECTED RULER OF BULGARIA.

ON the 29th of April the Bulgarian Assembly, composed of 250 deputies, with twenty Mohammedans amongst them, elected their new ruler at Tirnova. Three princes had been prominently brought forward as candidates for the throne of Bulgaria—Prince Waldemar of Denmark, Prince Reuss, and Prince Alexander of Battenberg. The election of the first, although supported by England, was opposed by some of the great Continental powers; the second, a man of capacity, was considered as too advanced in years. The president, Prince Dondoukoff Korsakoff, therefore declared for Prince Battenberg.

Prince Battenberg is the second son of Prince Alexander of Hesse, brother of the Empress of Russia, and was born on April 5th, 1857. His mother is the daughter of the late Count von Hauke, former Minister of War in Poland, and was created Countess of Battenberg on the occasion of her morganatic union with Prince Alexander in 1851.

Prince Alexander of Battenberg received his professional education at the Military Academy of Saxony, and entered the Hessian service as Sub-lieutenant of Dragoons in 1875. He served as volunteer with the Russian army during the late war—first in the ranks of the Eighth Regiment of Uhlans, whose honorary colonel his father is; afterwards as orderly officer in the staff of Prince Charles of Roumania during the siege of Plevna. He crossed the Balkans with General Gourko, and on all occasions showed himself a dashing, fearless, and talented cavalry officer. Soon after his return to Germany from the Russian-Turkish War, he was transferred from the Hessian Regiment of Dragoons to the Prussian Life Guards, and has ever since done garrison duty in Potsdam.

SIR GARNET WOLSELEY.

SIR GARNET WOLSELEY, who has been administrator of the Island of Cyprus ever since the Treaty of Berlin was signed, nearly a twelvemonth ago, has been called back to England to take the principal command, military and civil, in Natal and the Transvaal. He will virtually supersede Sir Bartle Frere and Lord Chelmsford, and his instructions are to make an early and honorable peace with Cetewayo, head of the warlike Zulu nation, and not to seek to extend the British colony at the Cape of Good Hope. He is to offer terms of peace if the enemy does not propose a termination of the strife.

Wolseley, like Wellington, is a native of Ireland, having been born in Dublin, in June, 1833. He has risen to his present high rank (Lieutenant-General) solely by service and merit. He won a medal of honor in the Burmese War of 1852–53, when he was only a subaltern; and subsequently achieved distinction in the Crimean War; at the siege and capture of Lucknow; in the Chinese campaign; in Canada; and in 1873-4 in the Ashantee War on the Gold Coast. Early in 1874 he was sent to Natal to administer the government of that colony and to advise upon several important points connected with the management of native affairs and the best form of defensive administration. He has the advantage, therefore, of previous knowledge—political, military and personal—of the country in which he is to hold command, probably as absolute as that of Wellington in the Peninsular War.

GENERAL SIR GARNET WOLSELEY, COMMANDER-IN-CHIEF OF THE BRITISH ARMY IN SOUTH AFRICA.

STRENGTH OF ENGLISH ROMANISTS.

EVERY little while there is a great ado raised in England over the portentous increase of Romanism. The facts do not seem to confirm these fears. The *Catholic Directory*, for 1879, states that there are in Great Britain 21 archbishops and bishops, 2,175 priests and 1,388 churches. The number of communicants is not given, but, assuming that there are 200 to a church—a good estimate—there are a little more than 2,500,000. Out of a population of 30,000,000 or more, this is not a frightful number. Of the members above given, 6 bishops, 272 priests and 264 churches are in Scotland, where the Roman Catholic hierarchy has recently received permission to be re-established.

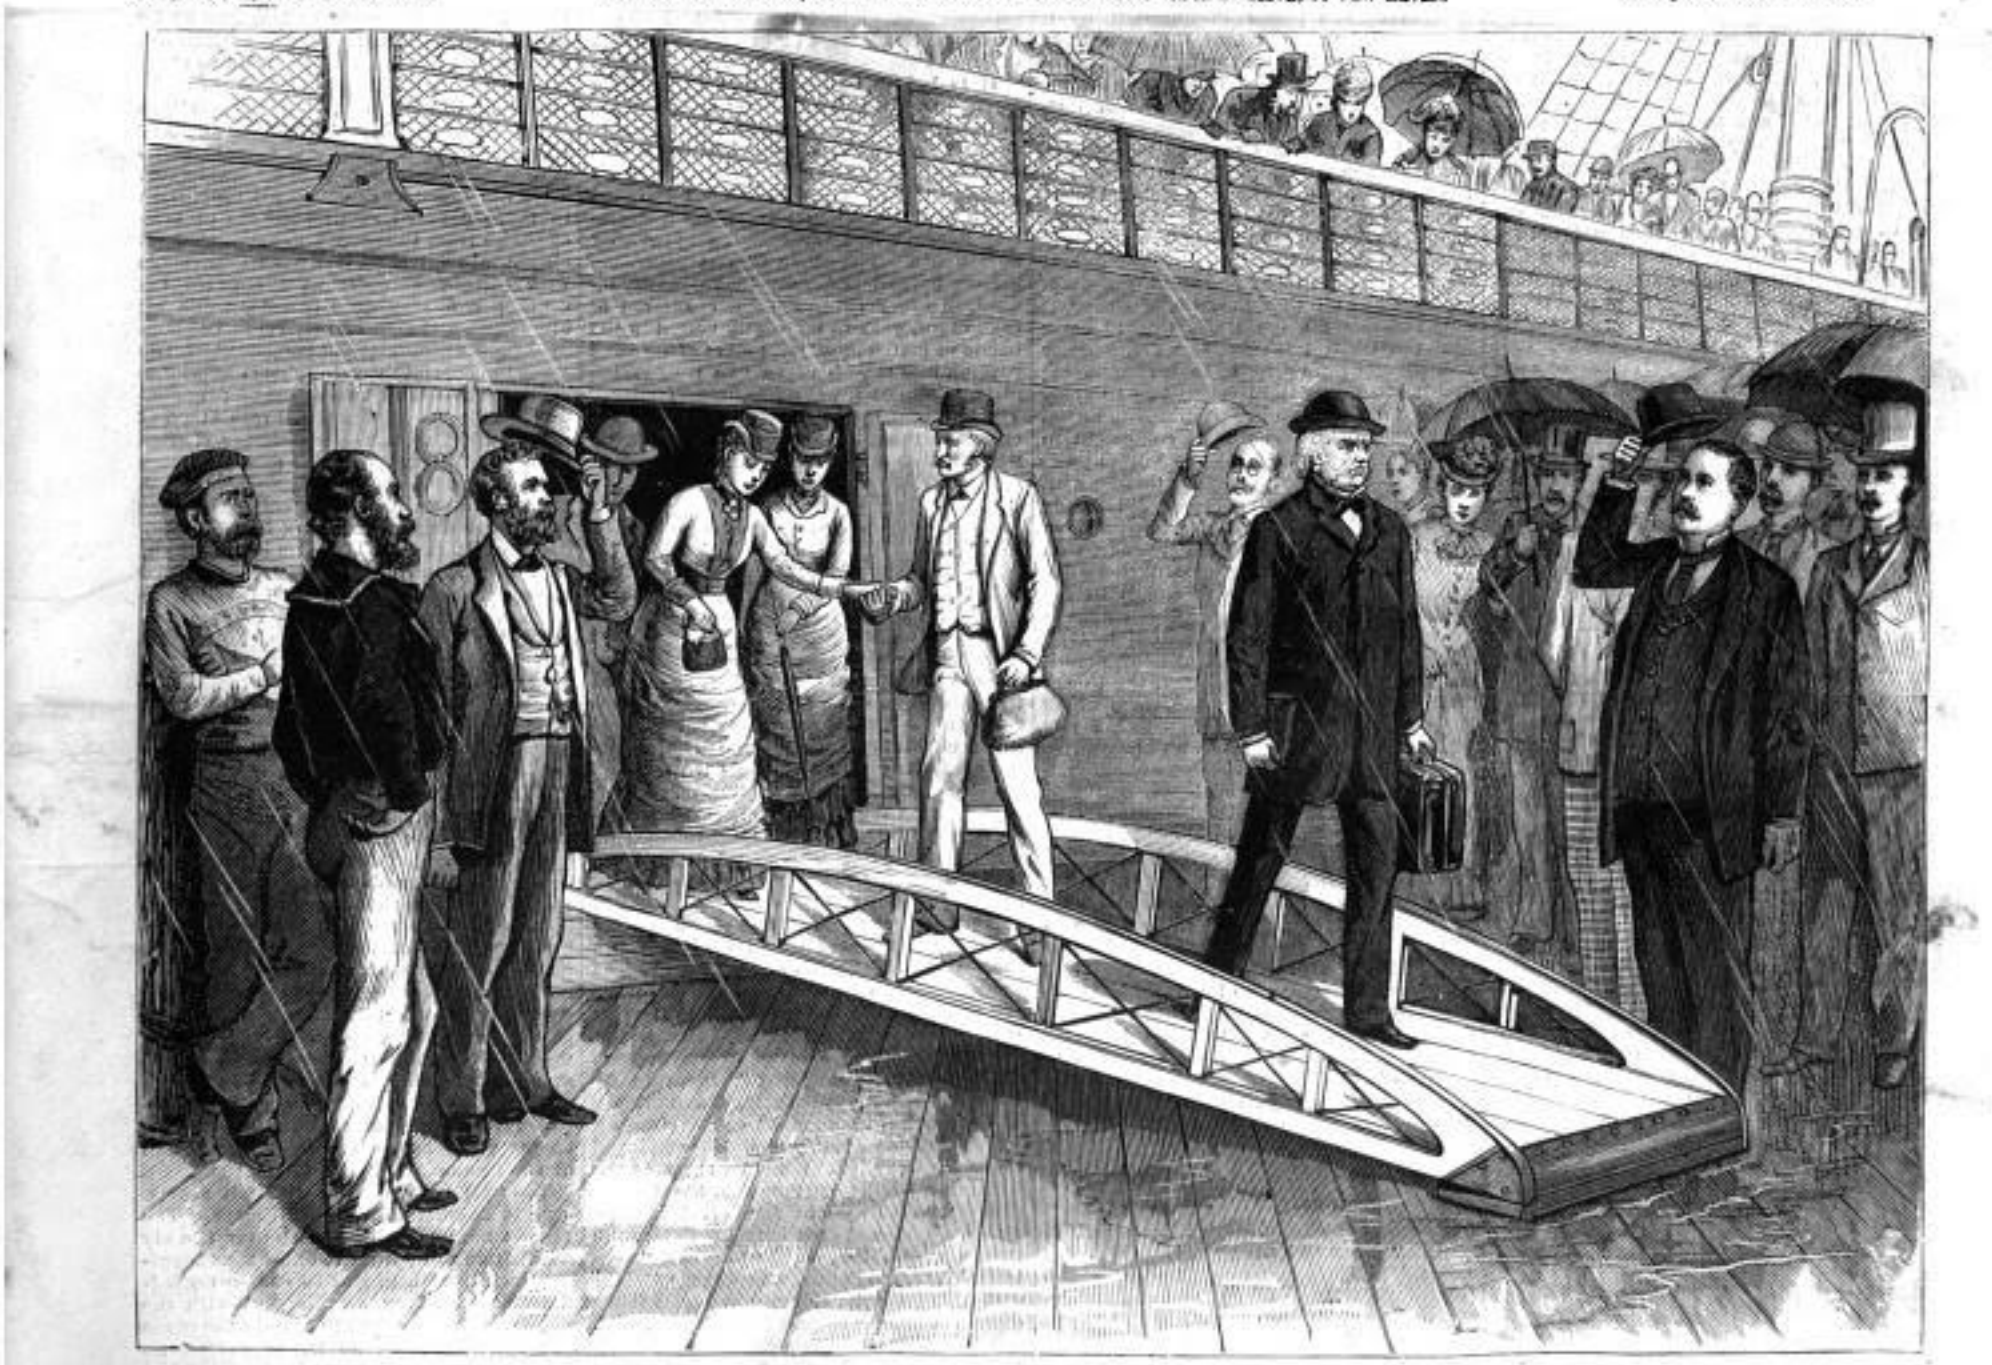
THE SULTAN'S GIFT TO GENERAL GRANT.



WHEN General Grant called upon the Sultan at Constantinople he was invited to inspect the great stud of horses in the imperial stables, and, from his well-known fondness for fine horse-flesh, it may be imagined with what interest the ex-President examined the "points" of the 1,600 pure Arab steeds. Appreciating the attention, and sympathizing with the delight, of the General, the Sultan ordered that two of the best horses should be selected from the stud as a present to his guest. The horses chosen, beautiful dapple-grays, of the Saktan race, found only in and near Bagdad, were shipped on board the British steamer *Norman Monarch* by the officers of the American Legation, and reached Canal Dock, New Haven, on Wednesday, May 28th. They are named "Djeytan" (the Panther) and "Missirli" (the One from Cairo).

The horses are consigned to General Beale, formerly United States Minister to Austria, and now of Chester, Pa., who sent Major John Lovett to New Haven to transfer them to temporary quarters in Suffolk Park, Philadelphia. During the three-days' trotting meeting there last week the horses were led out on the track by two attendants dressed in Oriental costume, and, as the animals marched past the grand stand, the large audience gave vent to lusty cheers. At the close of the races the horses were taken to General Beale's farm, near Chester. It is not yet announced whether they will remain there until General Grant's return from Europe, or be sent at once to his stables at Galena, Ill., although, as his cottage at Long Branch is being hurriedly prepared for his reception, it is quite probable the Arabians will be taken thither, for the latter part of the season at least.

They are six and seven years old, of an even height, fifteen hands high, with a coat that is singularly delicate and as soft as velvet; white, silken tail reaching to the ground; and a mane that is wavy but not long. The heads are rather small, but the faces have an intelligent expression. They have large, soft and lustrous black eyes; small, well-set, restless ears; and in the distended nostrils the finest Arabian blood is shown. They have a gentle disposition, and can be approached and petted like children.

THE PENDING POLITICAL ISSUE.

IT is announced that the caucus committee of the Democratic majority in Congress, in seeking an exit from the pending political *impasse*, have determined, if possible, to turn the strategic positions which they have thus far been unable to capture from a recalcitrant President. It is proposed to pass an Army Appropriation Bill prohibiting any expenditures for the subsistence or transportation of troops "to be used as a police-force to keep the peace at the polls"; a Bill extending the chief Legislative, Executive and Judicial appropriations of 1878 for one year from the 30th instant (with a provision for the payment of arrearages of pensions out of the $10,000,000 held for the redemption of the fractional currency); and a supplemental Judicial Bill which makes appropriations for the expenses of the United States Courts, which repeals the "test-oath," and which not only omits to make appropriations for supervisors, marshals and deputy-marshals to guard and scrutinize Congressional elections, but carefully provides that there shall be no diversion of other appropriations, or liabilities contracted, with a view to the compensation of such officers.

Supposing these Bills to be passed in the shape above indicated, and supposing them to receive the President's signature, we may say that the resulting situation will be as follows: The laws of Congress regulating elections would remain on the statute-book, but their execution would be nullified so far as relates to the "supervision" of the polls by Federal officers. We incline to think that the prohibition of troops to be employed as a "police-force," for the purpose of keeping the peace at the polls, will not encounter the objections of the President, as there is a well-recognized distinction between the use of troops to perform "police duty" and to suppress "insurrections" or rebellions"—with which latter duty the proposed Bill does not interfere. But if the effect of the caucus measures shall be to remove "the military issue" out of the pending political campaign, it is only just to say that they will accentuate and emphasize the points of difference between the two parties with regard to the supervision of national elections. The Democrats will go before the people declaring that there shall be no *paid* supervision of such elections, even when the laws provide for it. The Republicans will go before the people declaring that such supervision is not only constitutional, but that it is necessary; and that the Democrats, in evading the obligations imposed by existing statutes, have worked a partial nullification of the statutes which they were unable to repeal, and which they refuse to amend in a satisfactory manner. It seems, therefore, an appropriate occasion to review the history of opinion on a topic which, in any event, is likely to play an important part in the future politics of the country.

That omitting the question of the *power* of Congress under the Constitution to make regulations of its own and to alter those made by the States as to the conduct of Congressional elections, and confining our view to the question of *expediency* raised as to the mode and degree of its exercise, "a great deal may be said on both sides," will be apparent to the candid reader who studies the progress of thought on this subject. In this light it will be seen that it is equally idle to deny the constitutional power of the Federal Government on the conduct of Congressional elections, and to deny that the proper exercise of this power is a matter of just sensibility to the States and the people. When the Constitution was pending before the States on the question of its adoption, the conceded existence of this power was made the ground of a vehement and concerted opposition to its ratification. The enemies of the Constitution predicted that under the power of "regulating" elections for members of Congress, the Federal Government would speedily pave a way for the extinction of State independence, and for the establishment of a national consolidated Government on the ruins of "State sovereignty." The friends of the Constitution held that the allowance of this power was necessary in order to assure the perpetuity of the Government, if against nothing else, at least against the inaction of the State Legislatures, which, if this matter were remitted to their exclusive control, might doom the Federal Government to destruction by simply refusing or neglecting to choose Senators or to provide for the election of Representatives. It was admitted, however, by Madison and others, that Congress would, in all probability, never exercise this jurisdiction unless the States should make it necessary by their laches in the premises.

But not satisfied with this disclaimer, a majority of the States ratified the Constitution with an express recommendation that the Constitution should be so amended as to provide that Congress should not exercise the power of "regulating" Congressional elections except "in cases where a State shall neglect or refuse to make the regulations mentioned in the fourth section of the first article, or shall make regulations subversive of the rights of the people to a free and equal representation in Congress." It may surprise some readers to learn that Massachusetts led the way in this declaration against Federal authority over Congressional elections, and that it was in simple pursuance of her example that similar declarations were made by New Hampshire, New York, Virginia, South Carolina, Rhode Island and North Carolina, in the recommendations with which they accompanied their ratifying Acts. In point of fact, however, no such restrictive amendment was ever proposed by Congress or adopted by the States under this head; and seeing, as we do, that a majority of the States, comprising the most populous and influential in the number, had formally placed themselves on record, at the origin of the Government, against the primary exercise of this contingent power by Congress, it may have been judged that no constitutional prohibition was necessary to guard against the assumption of Federal control over Congressional elections. This seems to have been the view of Judge Story in accounting for the abstinence of Congress in the premises.

But, whatever may be the explanation, it is certain that Congress forbore to exercise this power down to the present decade in our history. And in the presence of such forbearance, and of the grounds on which it was practiced in deference to the original sensibilities of Massachusetts and her sister States, it would seem as legitimate for Democrats in 1879 to be jealous of undue Federal intrusion in National elections, as it was for Massachusetts in 1787. As it cannot be denied that the Constitution gives the power in question, so it should not be denied that the practice of the Government, down to a late day, proves that the propriety of exercising the power, or of not exercising it, is a question of time, place and circumstance.

The Democrats now propose to recur to the unbroken practice which, prior to 1870, left the regulation of Congressional elections to the exclusive control of the States. The Republicans propose, in the words of President Hayes, to demand "greater vigor both in the enactment and enforcement of laws framed for that purpose." Hence, it only remains for the Democrats to show that the Federal laws are as unnecessary now as they were prior to their enactment; and it will be for the Republicans to show that their enactment has become both necessary and proper. That it is competent to criticise the existing statutes without exposure to the charge of sympathizing with the heresy of "State supremacy," is made plain by the remark of President Hayes when he says, in his veto message, that "any oppression, any partisan partiality which experience may have shown in the working of existing laws may well engage the attention of Congress," and if instead of seeking to repeal these laws, or practically to nullify them altogether, the Democrats had proposed to amend them where they work inequality and injustice, a fair ground might have been laid for an effective contention. It *is* an abuse that under existing laws the marshals and deputy-marshals may all be of one party, and that under the administration of the laws they have sometimes been selected from partisan "strikers" and "fugiemen." If, instead of breaking their forces against the principle of all or any Federal supervision over Congressional elections, the Democrats had leveled their blows against the "oppression" and "partisan partiality" of the present statutes, they might have had some chance of carrying the country with them, provided the Republicans had been weak enough to defend what is indefensible in the unequal working of these regulations.

WHAT MANIA IS THIS?

THE trial of Miss Lilian Duer for shooting and killing Miss Ella Hearn, in the quaint and quiet little neighborhood of Pokomoke, Maryland, is exciting the attention of the whole country. And well it may, for the crime which the prisoner seems to have committed is so strange as to be really unique in the annals of jurisprudence.

The outward and obvious facts are now pretty well known; it is the facts that have been thus far concealed for which the public is on the *qui vive*. This is the way the case looks superficially: The two girls were not merely intimate friends, but inseparable companions. Miss Duer, when the shooting was done last November, was twenty-one; Miss Hearn was seventeen. A younger sister of the victim swears that the two were in each other's society every day for three years previous. Suddenly Miss Hearn evinced a disinclination to go out walking alone with her friend, and the latter was seriously angered. Next day she called on Ella and repeated her urgent request that she would accompany her to "the woods." She refused. "Do you love any man?" asked Lilian, resentfully. Ella declined to answer. Lilian renewed her urgent invitation to "go walking," but Ella declined. Then the former drew a revolver, coolly cocked it, and amid the supplications of Ella upon her knees, shot her through the head, inflicting a wound from which she died a month later. Before her death, Ella Hearn carefully stated that Lilian shot her on purpose, repeating the allegation in every form, even in presence of Lilian. On the other hand, she still showed affection for the homicide, kissing her and pulling her down over the bed, where she lay dying, and whispering to her. Lilian said at first that she "didn't know how she came to do it," but afterwards declared that it was accidental, to which plea she still clings.

Here it must be stated that Ella was rather fragile and *petite*, while her companion was large and strong, and that the latter assumed mannish airs and ways, smoking cigars, wearing clothes of peculiar pattern, tipping her hat to friends, despising feminine weaknesses and dependence, playing baseball, and jumping and exhibiting boyish ways. These characteristics have excited much comment and inquiry since the homicide.

Meantime, other elements have entered into this celebrated case. There seems to have been half-a-dozen girls in the circle of affection of which Ella and Lilian were members. These are to be called as witnesses to tell their story of this dangerous platonic attachment. One of these, a Miss Webb, has received an offer of money if she would run away or absent herself from court and refuse to testify. Scorning to be bribed, she told of the overture to Mr. Hearn, the father of the murdered girl, who met the person making the offer and would have slain him had it not been for the interference of bystanders. What is it that this girl is expected to tell? What story can be worth an attempt at bribery and a risk of death?

It is but to be added that Lilian Duer seems to show poignant grief at the death of her friend—the same grief that is usually shown over the loss of one slain, by a man or woman, on account of jealousy. Every day now the trial goes on down the east shore of Maryland, and every day the mystery deepens and the solution apparently approaches. The crime is a strange one, almost beyond parallel. Occasionally, indeed, in every land, women, enamored of each other, seek to be legally united in the bonds of matrimony, but an act of frenzied passion like this, between two respectable girls, is almost if not quite unprecedented. The question now is whether it is a new crime calling for new classification, or whether it is an old and familiar crime in masquerade.

RAILWAY DISCRIMINATIONS.

THE policy of the great railway corporations of the country, affecting as it does every public interest, is fairly a subject of criticism. Now, more than ever before, these corporations control the internal commerce of the country. They put transportation rates up and down at pleasure, and, except at competing points, burden productions by severe and discriminating charges at their own sweet wills. The volume of business, in fact, is made contingent upon the cost of transporting commodities from and to localities. This element of cost enters into the calculation of every producer from the soil, of every manufacturer, and of every man engaged in commercial pursuits. Looking to success in undertakings requiring the use of both labor and capital, each and all require that there shall be a reasonable stability in the maintenance of transportation rates, as well as a fairness in their adjustment. But under the existing state of affairs no man can be safe. Railway managers constantly interfere with his calculations, and oftener bring him evil than good.

Illustrations of the methods employed are easily supplied. Consider this: At the beginning of the past month, the freight charge on flour from St. Louis to New York was forty-six cents per barrel. Before the month closed the charge per barrel, between the same points, was down to eight cents. This latter rate resulted from sharp competition and, as may well be presumed, fell short of bringing gain to the companies engaged in the movement. But while the shippers at St. Louis profited by the cutting of rates, those of other localities sustained a corresponding injury. It cannot be otherwise than that favoritism to a few business points must prove detrimental to the interests of other trade centres. And it is equally plain that discrimination of this sort must affect the stability of business generally, and, as a consequence, impair the public prosperity.

But whatever losses the great trunk lines may incur by warring with each other at competing points, their managers take excellent care to repair such losses by exaction of heavy tribute upon the trade of other localities. They never go to war at their own expense, and, if St. Louis and Chicago become favored points, the business men of New York and other cities are obliged to make good any resulting deficit to the corporation treasuries. We are indebted to a commercial contemporary for a vast array of facts touching this very point, and affecting peculiarly the people of New York State.

The City of Rochester, on the line of the New York Central road, is a competing point. Its distance from this city, by rail, is 372 miles. While the freight-rate between Rochester and New York is 12 cents per 100 pounds, shippers at Fairport, distance 362 miles, and those at Little Falls, distance 217 miles from this city, are taxed from 21 to 28 cents per 100 pounds. Canandaigua is twenty-eight miles nearer to this city than Rochester. A Canandaigua merchant pays eight cents per 100 pounds for sugar from Rochester and 28 cents from New York. But this same sugar, be it remarked, is carried from this city to Rochester for 12 cents per 100 pounds. He can purchase his sugar in Rochester at a very small advance on New York prices, and have it carried home at a saving of quite one-quarter of the freight charge, provided the sugar had been purchased here and shipped direct to Canandaigua.

Again, the freight-rate for cheese from Elgin, in the State of Illinois, to New York, a distance of more than one thousand miles, is 30 cents per 100 pounds, but the dairymen of Delaware County, in New York State, are charged 65 cents per hundred for a distance of one hundred and sixty-five miles.

The distance from Chicago to New York *via* the Erie Railroad is nine hundred and sixty-one miles. While that corporation carried freight the whole distance from Chicago at a charge of fifteen cents per one hundred pounds, shippers of milk only fifty or sixty miles from New York, were forced to pay fifty-five cents per hundred pounds. The freight-charge equaled fully one-half the value of the milk, and, computed by distance, it cost more than fifty times as much to get it to market as it did to carry products from Chicago to New York.

The unjust policy of railway corporations is made manifest by other methods equally injurious to business. One of these methods is to discriminate in favor of large shippers. They are given rates out of all proportion to those charged small shippers of merchandise from the same localities. For instance, special contracts have been made with certain shippers at Utica for ten cents per one hundred pounds, while all others pay a charge of fifty cents per hundred on the same class of goods. At Little Falls the special rates to jobbers and large dealers have been twenty cents per hundred, while the regular table rate stood at forty-six cents. Evidence of like character against the corporations might be supplied almost *ad infinitum*.

On a recent occasion we referred to the injury accruing to New York from railway discrimination against its trade. Is it not time that the press of the metropolis should raise a united protest against the impositions constantly practiced by corporations created as common carriers, but whose managers seem to have forgotten the duties they owe to the public as its servants.

EVENTS ABROAD.

WHEN Lord Beaconsfield came into power, five years ago, the word went round that now England would have a "spirited foreign policy." Considering Beaconsfield's past, and character and party, it was an easy prediction to make, and has been fulfilled to the heart's content of the bellicose class of Britons. Beaconfield's policy has been nothing if not "foreign"; and, for the most part, it has been very expensively "spirited." No sooner has he patched up a pretty satisfactory peace with the Afghans, and retrieved, to some degree at least, the early disasters in Zululand, than a cloud-speck of quarrel arises between the two powers which, for some twenty years, have posed in the characters of the Damon and Pythias of nations.

The "foreign policy" extends, it seems, even to an embroilment with France. The French have grumbled much over the sly acquisition of Cyprus, and now are exceedingly wroth with England's course regarding Egypt, and scarcely less so with the refusal of Beaconsfield to sustain the cause of the Greeks. There is, of course, no very near prospect of war between the two

Digitized by Google

countries; but the present unpleasantness is significant as the first interruption of relations which have been, ever since the Free Trade Treaty, of the closest and friendliest nature.

A notable figure in English politics passes out of sight in Baron Lionel Rothschild, who, at the time of his death, was the head of the famous banking-house in England. Baron Lionel was the first Jew who was admitted to a seat in Parliament, which event occurred somewhat more than twenty years ago, he having been chosen by the City of London. He was a quiet, rather imposing old gentleman, a stanch Liberal, who seldom troubled the House with speeches, but won everybody's respect by his good sense and breadth of view. One of his daughters not long ago married the Earl of Rosebery, one of the most promising young statesmen and one of the most ardent sportsmen in England.

Almost simultaneously with the disappearance of Baron Lionel from the House, a still more romantic figure entered it. This was The O'Gorman Mahon, now rather elderly, but still an interesting type of the old-fashioned, pugnacious, adventurous Celtic chief. He began life as one of O'Connell's "fighting brigade," fifty years ago, and regularly shot his man at fifteen paces, on occasion. The O'Gorman Mahon was not sated by his exploits in the Old World, but came to the New, where his warlike traits won him, first, the command in chief of the Peruvian army, and then Lord High Admiral of the Chilian fleet. He is returned to Parliament by County Clare, in time to join briskly in the Home Rule fight, in which he is sure to be conspicuous.

That inveterate old revolutionist, Blanqui, is not in favor, it seems, even with the out-and-out Republican powers that now rule France. Though past seventy, the fiery old agitator is serving a term of imprisonment for active participation in the Commune eight years ago. Meanwhile, the radical electors of Bordeaux had chosen him a Deputy. Of course the radicals in the Chamber took up his cause, insisted that he should be amnestied and admitted to his seat, and threatened the Cabinet with secession unless they yielded to these demands. But M. Waddington and his colleagues stood firm, and after a hot, wordy contest, Blanqui's election as Deputy for Bordeaux was annulled by a vote of 372 to 33. The Cabinet, since this victory, has decided to be magnanimous, and will pardon the restless old man; but the amnesty law having expired, a pardon will not restore his political rights. He will never be quiet, however, until he is quieted by death.

The usually serene atmosphere of the French Academy has for some time been disturbed by a political squabble, which has much ruffled the philosophic temper of the Forty Immortals. Henri Martin, the foremost of living French historians, was chosen as the successor of M. Thiers in the Academy, and when the time came to receive him, with the usual Academic state and ceremony, it so happened that Emile Ollivier, as "director" for the year, was intrusted with the usual duty of delivering the reception address. It is the custom for the new Academician to pronounce an essay on his predecessor, and for the "director," in receiving him, to reply to it. These essays are submitted to a committee before being delivered. In the present instance, M. Martin took occasion, in his address, to inveigh severely against the Second Empire; whereupon M. Ollivier, who is not yet forgotten as the Prime Minister of Napoleon III., who tried to be "constitutional," and who went to war with Prussia with "a light heart," retorted in an indignant defense of his quondam Imperial master. The committee objected to both productions, as tending to turn the august Academy into a political bear-garden. M. Martin then agreed to strike out some passages, but Ollivier would not budge an inch, and the Academy has finally designated M. Marmier as the orator. The historian will now be formally received into the "fauteuil" vacated by the Liberator of the Territory.

In the East, matters are going as smoothly as can be expected. Prince Battenberg will soon assume the sovereignty of Bulgaria, which province is apparently growing quiet and contented; the Czar has issued a proclamation of a fatherly sort to the newly-liberated Christians of Turkey; the Russian army has begun to evacuate the territories south of the Danube; Montenegro is pleased with her acquisitions; Greece alone is discontented, continues to demand Epirus as the price of her abstention from attacking Turkey when Turkey was down, and now threatens to reopen the Eastern Question by making war on her old tyrant and foe. The Ameer of Afghanistan has gone to Cabul. After a tour of inspection throughout his kingdom he will visit the Viceroy of India.

A "very pretty scandal," as old Pepys would say, is going the rounds about Don Carlos, whilom pretender to the Spanish crown. Some time ago, one of his aides, General Boet, was charged with stealing from the Prince his most valuable jewels. General Boet is evidently no chicken-heart; he now comes out with the "true story" of the jewels, which is to the effect that Don Carlos sent him into Spain with them to sell. The General goes on to paint a portrait of Don Carlos which certainly presents him to the world in a new light. The world has hitherto thought him a devotee, a man in dead earnest, with no time or taste for mundane frivolities and seductions. But General Boet declares that Don Carlos is a rake, and that his intrigues and adventures with the fair absorb a large portion of his time. He hates his uncle Chambord, it appears, who sets spies on him; beats his wife, who was surprised to find, when he returned from America, that he had not turned Mormon; and is, in general, a disagreeable, selfish, narrow-minded scion of the Bourbons.

It is the height of the London season, and the famous "coaching clubs" are having their meets in Hyde Park and Piccadilly, with their gay and handsome turn-outs, their high-blooded horses and their noble coaching-men. The Four-in-hand Club, despite the absence in this country of its president, the genial Duke of Beaufort, made a fine display as, in presence of the Empress of Germany, the Prince and Princess of Wales, and other royalties, they set out in procession from Hyde Park on a recent sunny morning. The first night in London of the *Théâtre Français* company, Got and the marvelous Sarah Bernhardt included, was the most brilliant first night that *le pays de Shakespeare* has ever witnessed.

Victor Hugo had a fine chance to indulge his powers of sparkling and epigrammatic eloquence at the dinner in Paris to celebrate the abolition of slavery in the French colonies. He made the most of the occasion; it is wonderful how, at past three score and fifteen, this great genius preserves its fire of enthusiasm and vigor of thought. "In the nineteenth century," said he, "the white has made the black a man; in the twentieth, Europe will make of Africa a world." The poet is hale, hearty, rosy, rich and active in his old age. Almost twenty-five hundred French Communists have been amnestied, and it is said that only five hundred of the leading spirits of the revolt of 1871 will be excluded from this boon.

THE LONG BRANCH PIER.

THE great iron tubular pier at Long Branch, the first ever built on the Atlantic coast, rapidly approaches completion. The pier now projects 600 feet into the ocean, that being the length provided for in the original contract; but so well satisfied are the owners with the character of the work and the prospects of the enterprise, that they propose to extend it 200 feet beyond the point at first contemplated. The additional work will be pushed with the utmost possible dispatch. Meanwhile, heavy oak spiles have been driven along the sides of the pier for the protection of steamers in their landings, and perfect confidence is felt that these can be made with entire safety and ease. On Sunday next three steamers will carry passengers to and land them at the pier. Settees are being placed for the accommodation of visitors, who, from the elevation of the pier, and several hundred feet from the shore, can enjoy the ocean breeze and indulge in fishing, reading, or dreaming, with the most exquisite sense of exhilaration. Schools of blue fish are constantly passing under the pier; the writer, on Monday last, saw one of these schools, numbering thousands of fish, sweeping by in a great procession only three or four hundred feet from the shore—the passage occupying nearly twenty minutes. Iron stairways will be arranged for the use of excursion parties, who will thus be able to land from yachts or ordinary sailboats without the slightest inconvenience.

THE Finance Committee of the Senate is entitled to the thanks of the country for voting to postpone the consideration of the Warner Silver Bill until the regular session of Congress. By that time it is to be hoped that, through the growth of sound financial ideas, the possibility of its passage will have disappeared.

THE Pennsylvania Legislature has refused to expel the members who were reported by a select committee to have been guilty of attempted bribery, but has authorized the appointment of a committee to institute proceedings against certain outsiders who were guilty of the same offense. The consistency of this action will admit of question.

THE United States will be represented officially as well as industrially at the International Exhibitions at Sydney and Melbourne, Australia, in 1879 and 1880, Congress having passed a joint resolution providing for the appointment of Commissioners. Representative S. S. Cox, of this city, is entitled to the chief credit for securing this timely action, which is sure to be warmly appreciated by the Australians.

THE President has nominated ex-Senator Simon B. Conover as Collector of Internal Revenue for the District of Florida. The appointment is only a meagre recognition of Mr. Conover's fidelity in the support of the Administration policy in the face of enormous pressure from the "stalwarts"; but it is understood to be in accord with the preferences of the ex-Senator, whose interests in the State of his adoption are too important to justify his acceptance of any appointment which would call him elsewhere.

IN point of ability and personal character, General Thomas Ewing, the Democratic nominee for Governor of Ohio, is fully the equal of the Republican candidate. But he represents financial theories at once indefensible and unsafe, and has, moreover, been conspicuous in the reactionary movements of his party in Congress; and, for these reasons, it may be assumed that he will not be able to command the support of those Democrats who favor honest money and an upright financial policy. At the same time his nomination will invigorate the canvass on the part of the younger element of the party, with whom General Ewing is especially popular, and the issue, owing to the action of the Greenbackers in nominating a straight ticket, is made so far doubtful as to provoke from the country at large the liveliest interest in the progress of the struggle.

THE promoters of the Panama Canal project, which was rushed through the recent Congress at Paris, evidently mean to make the most of their opportunity. A company has already been organized, and subscriptions to the amount of 400,000,000 francs are invited to aid in the prosecution of the enterprise. It is stated that the company which obtained the concession from the Government of Colombia and made arrangements with the Panama Railroad will turn over their charters to the new organization. Work will begin, if M. de Lesseps carries out his present purpose, on the first of January next. It is doubtful whether the subscriptions to the stock of the company will be as liberal outside of France as they would have been had the Nicaragua route been selected. No doubt, had the Congress voted independently, that route would have been chosen.

IN the statistics presented to the nineteenth annual convention of American Brewers, recently held at St. Louis, are to be depended upon, the consumption of malt liquors is certainly increasing. The sales in this country last year, according to these figures, amounted to 9,473,361 barrels; being 313,685 barrels in excess of the highest amount ever before sold. Of the entire production, this State is credited with 3,285,498 barrels. The total number of brewers in the United States at this date is 2,830, New York having 405, and paying one-third of the total tax derived by the Government from malt liquors. Owing to the rigid enforcement of the prohibitory law in Maine, the production of these liquors in that State amounted last year to only seven barrels, but the consumption was by no means confined to this minimum quantity, the demand having been supplied from without. The total amount of capital invested in the brewing industry in the country at large is stated at $300,000,000.

AMONG other bequests of the late William Sloane, of this city, amounting to $140,000, was one of $33,500 to a number of the older employés of the house with which he was long identified—the sums varying from $1,000 to $5,000, according to the period of service of the different persons named. In making these bequests, Mr. Sloane takes occasion to declare, with a candor and conscientiousness as rare as they are beautiful, that his success in life was due quite as largely to the fidelity, well-directed efforts and intelligent interest in his business of the men who had been in his employ, as to any personal sagacity or enterprise; and we cannot doubt that this generous recognition of faithful service will be no less acceptable to those concerned than the pecuniary gifts bestowed upon them. If employers and employed could always maintain the relation of mutual interest and concern in and for one another which is here so honorably revealed, how vast would be the gain to each and to society at large!

SENATOR WADE HAMPTON has set the extremists of the Senate an example of moderation which they would do well to emulate. In a speech on Thursday last he declared that, while earnestly in favor of the repeal of the legislation put as riders upon the Appropriation Bills, he would not in any event consent to withholding appropriations for the support of the Army, or of any of the departments of the Government. He paid a high tribute to the valor and patriotism of the Army, which was alike the Army of the South and the North, and declared that he would never aid to disband or to impair its efficiency. Neither would he aid to degrade the Army from its high rank by assisting to pass legislation which would tend to make it an instrument of tyranny in the hands of any party or any Executive. He concluded by eulogizing President Hayes for withdrawing the Federal troops from South Carolina and Louisiana during the exciting days of 1877. The speech, while embodying the peculiar views of Southern men as to the rights of the States, the control of elections, etc., was in admirable temper throughout, and had it been made earlier in the pending struggle, would no doubt have exerted an important influence upon the result.

NEWS OF THE WEEK.

Domestic.

THE United States Senate has passed a Bill to repeal the test oath law.

THE House of Representatives has passed a Bill to increase the pay of letter-carriers.

REV. SAMUEL HARRIS, of Chicago, has been elected as P. E. Bishop of Michigan, in place of Bishop M'Coskry.

THE Governor of Colorado called out the State troops on June 9th, to preserve the peace between the belligerent railroad companies.

MRS. JENNIE R. SMITH and Covert D. Bennett were sentenced to death on June 9th, in Jersey City, for the murder of police officer Richard H. Smith.

ON June 9th, under a suspension of the rules, the House passed the Legislative Appropriation Bill by a vote of 188 to 22, all the negative votes being Democratic.

THE New Orleans Council has unanimously adopted a protest against the passage of the majority report on the State debt as destructive to the public credit.

THE Workingmen's Party in California have nominated a full ticket, headed by F. White, a farmer, for State officers. Denis Kearney has been re-elected President of the "party."

THE Rev. Frederick W. Geissenhainer, D.D., Lutheran, the oldest active minister in New York, died on June 2d, after a continuous pastorate of sixty-two years, aged eighty-two.

A MEETING in favor of the proposed colonization of Irish Catholics in Minnesota, was held in New York on June 4th, and a large number of subscriptions to the capital fund were received.

THE Supreme Court of Iowa has decided as valid the law prohibiting the sale of wine and beer within two miles of any municipality, where such sale has been prohibited by a vote of the people.

THE papers in the Fitz John Porter case have been sent to Congress, and a Bill restoring General Porter to his rank in the army, with pay from the date of dismissal, will probably be reported to the Senate.

TWO monuments erected to the memory of the Confederate dead at Winchester, Va., were unveiled June 6th. There was a great demonstration, United States Senator Morgan, of Alabama, being the orator of the day.

THE great lease of the elevated railroads to the Manhattan Company has been formally ratified by the managers of the latter corporation, and the work of extending the various lines will be pushed with all practicable speed.

IN the General Synod of the Reformed Church in America, held in Newark, N. J., last week, a motion to consolidate the organic boards of the church was defeated June 6th. On Saturday the members visited Coney Island in a body.

PARDEE HALL, the beautiful structure connected with Lafayette College, at Easton, Pa., was destroyed by fire on June 4th; and on the 6th, at a special meeting of the citizens, it was resolved to rebuild the Hall at once, the city contributing handsomely to the fund.

THE occupants of Fulton Market, New York, have offered to erect a large, healthful, and appropriately ornate building, to cost $300,000, at their own expense, if the Sinking Fund Commissioners will grant them a long lease of the present site on favorable terms, and joint conferences are being held.

THE ninety-eighth annual session of the Grand Lodge, F. and A. M., of the State of New York, was held last week in the Masonic Temple. General Charles Roome was unanimously elected Grand Master for the ensuing year, and James M. Austin Grand Secretary, for the twenty-seventh consecutive term, on June 5th.

THE Senate Committee on Privileges and Elections are investigating the charges of Judge Spofford, contestant of the seat of Senator Kellogg of Louisiana. One witness has testified that he personated members of the Legislature who were absent, and when their names were called, voted for Mr. Kellogg. The latter denies the truth of the statement.

DR. ALFRED C. POPE, of London, one of the most prominent homeopathic physicians of England, president of the British Homeopathic Congress, vice-president of the British Homeopathic Society and editor of the *British Monthly Homeopathic Review*, who comes to this country as a delegate to the American Homeopathic Institute to be held at Lake George, was tendered a reception by the Boston Homeopathic Medical Society and the homeopathic physicians of Massachusetts, at Boston, June 5th.

Foreign.

RUSSIA has refused to join Germany in acting on the Egyptian question.

SOLOVIEFF was hanged June 9th, for attempting to shoot the Czar of Russia.

THE elections in the Province of Ontario, May 5th, resulted in favor of the reformers.

CETYWAYO has again sought to make peace with the British, but his overtures have been rejected.

GERMANY will protest against the inhuman manner in which the war in South America is carried on.

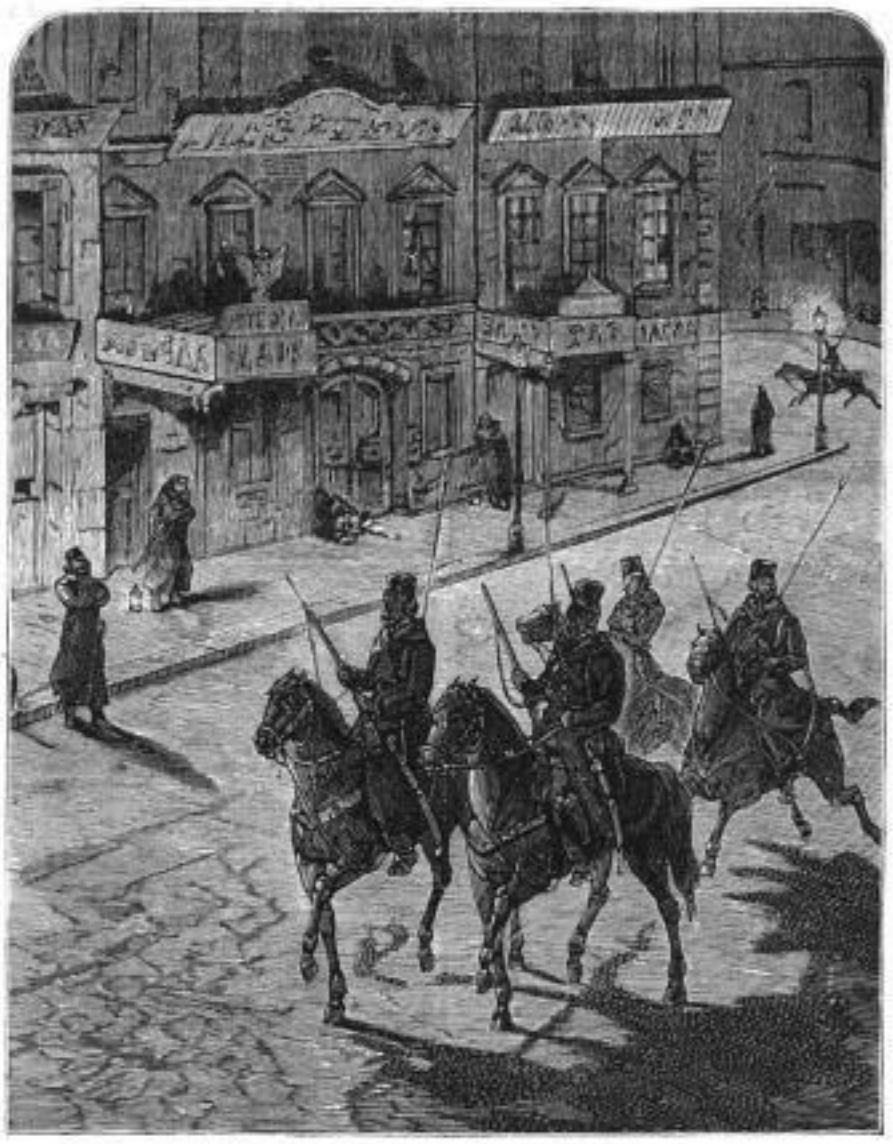
THE Australian and European Bank of Melbourne, Australia, with £500,000 of deposits, has failed.

UNITED STATES MINISTER WHITE, who has arrived at Berlin, received a cordial welcome from the German press.

THE losses to the Russian fire insurance companies by the great fires in the city of Orenburg last month amount to $1,500,000.

FRANCE and England have agreed to refrain from further active interference in Egypt, but will hold the Khedive responsible for his acts.

IN France the merchants and manufacturers are about to urge the Government to meet this country half way in promoting a Franco-American treaty.



SPAIN has demanded satisfaction from San Domingo for the shooting of two Generals at Puerto Plata who had sought the protection of the Spanish Representative.

THE swollen rivers in Italy are subsiding; the eruption at Mount Etna has likewise diminished. The sum of 500,000 francs for the relief of the sufferers by the eruption, has been voted by the Italian Chamber of Deputies.

THE Italian Internationalists who threw bombs among the crowd during a popular demonstration on the occasion of King Humbert's birthday, last November, have been sentenced, one to imprisonment for life, two for twenty, and four for nineteen years.

LOUISIANA.—ANNUAL REGATTA OF THE SOUTHERN YACHT CLUB, ON LAKE PONTCHARTRAIN, NEW ORLEANS, MAY 26TH—THE START OF THE YACHTS FROM THE NEW CLUB HOUSE.—FROM SKETCHES BY S. W. SENNETT.

REGATTA OF THE SOUTHERN YACHT CLUB AT NEW ORLEANS.

THE annual regatta of the Southern Yacht Club, which now numbers over five hundred members, took place on Monday, May 26th, on Lake Pontchartrain, New Orleans. Out of the twenty-nine yachts belonging to the club, twenty-three were entered. Two became disabled, leaving twenty-one to take the wind as the signal-gun was fired. The course was the usual triangular one, and the distance fifteen miles—differing from the previous races only in that the course was three times around the stakes (instead of twice, as formerly), which were placed one and two-thirds miles apart—the home stake in front of the boat-house, the second to the westward, and the third to the eastward.

When the race was over and all the white-winged flyers of the lake had come home, the real fun began. A fine orchestra started first the slow music of the graceful promenade, under the influence of which the invited guests partook of the hospitalities of the Southern Yacht Club, which comprised everything that was palatable in the way of ice-creams, biscuits, glaces and cakes; in fact, all those ideal gems of fancy cookery which seduce the palate without filling the stomach.

At the height of music and dancing and revelry, Commodore Emile O'Brien called the assembly to order, announcing that the distribution of prizes would be made, and introduced Captain J. O. Nixon.

COLORADO.—ON THE ROAD TO THE LEADVILLE MINES—WEBSTER STATION, ON THE DENVER, SOUTH PARK AND PACIFIC RAILROAD.—FROM A SKETCH BY E. JUMP.—SEE PAGE 270.

Jr., as the orator of the day, who had been persuaded to undertake the difficult task of distributing the prizes, with appropriate remarks, to the victors.

The first-class prize is a massive piece of plate, about one foot and one-half high and as much wide. The centre piece is a pillar of chased silver, from which project two branches supporting fruit dishes of silver, lined with gold. The pillar is surmounted by a first-class yacht, in full sail, and under an easy breeze. The yacht is of silver, plated with gold, while the sails are of frosted silver.

The second-class prize is a large flower-vase of silver, the bowl being frosted and the neck polished. Around the base and brim of the neck are bands of medallions in relief, while the handles are formed by oars and anchors oxidized.

The third-class prize is a large bowl flower-stand resting upon an elaborately-chased pedestal. The sides of the bowl are ornamented with spikes, anchors and oars, and the lining of the bowl is of gold.

The fourth-class prize, although but a small cup, is so perfect in finish as to bid fair to rival the chief prize. The circumference shows an ocean ruffled by the wind. A schooner-yacht race is taking place, one of the swift sailors having just turned the buoy, while another, the main attraction, is coming up before the wind. All the details of the picture are faithfully portrayed, even to the ocean steamer on the horizon.

Commodore E. J. O'Brien, who sailed the *Susie S.*, received the first prize; H. T. Howard, of the *Xiphias*, the second; "Joe" McNeil, captain of the *Juanita*, the third; and Samuel Gardner, of the *Olivia*, the fourth. R. Brewster, who sailed the *No-Name*, received the special prize for the class known as cabin boats.

"OMNIA VINCIT AMOR."

SPLASHED with the mud and rain of the street, Maurice stepped in quickly, as the servant opened the door, and made his way to the long drawing-room.

"Miss Vincens will be down directly, sir," said the liveried servant, politely. In spite of his shabby coat, all the servants of the house were polite to Maurice.

"I sincerely hope so!" muttered the young man to himself. "I've no time to waste on her whims to-day."

Steeping in warmth and perfume lay the room—empty, sumptuous, glimmering with bronze and gold tints, black Parisian cabinets, deep-toned velvets.

At its far end the door of a conservatory stood open. Maurice could hear water bubbling, and see walls draped and darkened by viny bloom.

The luxury of the place thrust itself on his senses to-day as it had never done before. The contrast between the world without—the world of storm and darkness and poverty—and this world within, all languor and ease and sweetness, struck him like a blow.

The black-walnut door swung back.

Miss Worth, Miss Vincens's aunt, a self-established duenna, entered first—an animated lay-figure to look after the proprieties.

Then Miss Vincens herself rustled in.

She was no beauty, heiress of wealth though she was. Maurice inwardly compared her to one of Mrs. Jarley's wax figures with the face-coloring washed off, with the nose depressed by accident—yes, verily, with a nonentity of expression, lack of color and regular facial lines. Miss Lena Vincens could be called decidedly an ugly woman.

"Did you come on foot this dreadful day?" she stammered, turning red at sight of Maurice. "I would have sent the carriage for you, only I feared you might think me—well—bold."

Maurice looked at her in a dreary, critical way.

Time and familiarity will reconcile a man with almost anything. Would they, he vaguely wondered, make the sight of Miss Vincens bearable three hundred and sixty-five days in the year? She wore a dress of stiff, lustrous silk; its rustle rasped the ears like a file. The pearls on her hands and at her throat made her look still more unfavorable by contrast. In her bosom was pinned a bunch of heliotrope; from that hour the odor of the flower was hateful to him.

"You are too kind," answered Maurice; "but I am used to long tramps, and to all sorts of weather. Have you practiced this octave?"

He took a sheet of music from a music-rack and placed it on the piano.

They were teacher and pupil.

She seated herself at the instrument, and ran her fingers over the keys.

Tum—tum—tum—she banged and blundered through the piece with difficulty. Maurice was tempted to clasp his hands to his ears to shut out the discordancy.

At sight of his contracting brows she began to pout.

"You think me very stupid, I dare say."

"True," he longed to answer; but checked himself, and said, instead, "You are very careless. You have not given the piece sufficient practice. Give it more time and attention before your next lesson."

She lifted her eyes in a slow, deprecatory way. All her movements were slow and heavy.

He was no conceited fool, this poor musician, with his shabby coat and his handsome Greek profile; but no man in his senses could see the passion in that upturned look and not understand it.

"Don't be cross with me," she murmured. "I never cared for music till you taught me. Indeed, indeed, I try very hard to please you!"

He made haste to draw her attention back to the lesson. For a mortal hour it dragged its slow length along. Aunt Worth dozed in her velvet chair. The hot air of the room, the sultry scents from the adjoining conservatory, choked and oppressed Maurice.

That woman at the piano, in her flashing dress and her dismal ugliness, filled him with a strange and peculiar fascination. He could not keep his eyes off her, and yet, from his heart, he hated to look.

"How grave you are to-day," she said at last, letting her jeweled hands slip off the keys. "I hope nothing has happened? I trust Miss Santley is well?"

"Oh, yes, quite well," he answered, starting out of an ugly reverie.

"You seem to love that sister of yours very much," rejoined Miss Vincens, in a piqued tone. "I never hear you speak of any other woman."

"I know very few others," he replied, "and none like her."

Miss Vincens rose, with a great rustle, from the piano.

"Will you come into the conservatory a moment?" she said, in her slow, monotonous way. "I've something to tell you, Mr. Santley; something that I asked papa, particularly, to let me tell you. I hope you will think it good news."

He followed her, wondering.

They passed through the glass door, entered among the odors and bloom beyond.

Twilight was already gathering. Overhead, some strange creeping plant, in a gnarled cup of twisted vine, held a fiery-red blossom, suspended like a great star.

Bronzed urns, aflame with passion-flowers, or ghostly with white lilies, made blotches of light here and there in the dusk.

The thought of a *tête-à-tête* with Miss Vincens in such a place was scarcely pleasant to Maurice; nevertheless, he followed her to the fountain, which dropped its diamond spray over a bank of violets.

She bent in her stiff, shining dress, and plucked at the purple blossoms as she talked. "Are you very, very fond of teaching music, Mr. Santley?"

"Fond? Well, not particularly," he answered, grimly.

"I am sure it must be a hard life. Have you many pupils? They are not always easy to find, where a teacher has no influence. Papa thinks he might give you a place at the works—that is, if you would accept it."

He stood like a statue, waiting for her to go on. She kept her dark face bent low over the violets.

"The superintendent is going away. You can have his situation, with increased salary—$2,000 a year, I think papa said—and—perhaps—who knows?—a future partnership. I am sure this would be better than teaching music."

Curious changes came and went in Maurice's countenance. He looked as he felt—scarcely able to believe his senses.

Why, he had never spoken a dozen words with old Vincens in his life!

"Is it possible that I understand you aright?" he said, at last, in a dazed way. "Two thousand a year—a—a future partnership?"

"Yes. I thought, for—your sister's sake, if for nothing else, you would be glad."

The blood was burning in her usually pale face. With eyes full of love she looked eagerly up at this poor musician, with his averted gaze and his perfect Greek profile—this man whom she could never hope to reach save through his poverty.

Breathless she waited for his answer.

Did he understand the full meaning of this offer—all that its acceptance would involve?

"I must ask for time to think over the matter," he said, at last, in a constrained voice.

He was looking steadfastly away from his pupil kneeling there among the violets, as if in supplication.

"Certainly," she answered, with some relief. Perhaps she had feared that he might refuse to entertain the proposition at all. "When you have decided you can tell papa—or—me," she presently said.

"A thousand thanks," said Maurice, with a labored politeness. "You are kind—most kind!"

He moved towards the door. She rustled after him, her hands full of the purple bloom she had plucked beside the fountain.

"Take these," she stammered, "will you not? For your sister; and don't think ill of me, please, and don't hate me! I try hard, very hard, to please you; but, somehow, I never succeed."

A tremendous temptation tugged at Maurice's heart.

He took the flowers, muttered a hurried good night, and, as if not daring to trust himself further, turned his back on the luxury, the odor, the splashing fountain, the dark woman with the ugly face, and out of the splendid mansion of Vincens, the great coal merchant, he rushed into the street.

Night was gathering.

The mist and smoke lay thick together over the crowded, noisy town. The streets were deep in mud and wet, and at the very first crossing Maurice unwittingly dropped Miss Vincens's violets, and trampled them into the mire.

With feverish haste he strode away from the upper and aristocratic portion of the town, and went towards its humbler districts.

"There's a great deal said and written about women marrying for money," he said to himself, as he plunged on through the foul dark streets, "but plenty of men do the same thing, I fancy. Goodness me! why was that woman made so irredeemably ugly—or, rather, why has she put this temptation before me?" He went straight on, turning over in his mind the words she had said to him in the dusk of the conservatory—thinking of her and of her father, the great coal merchant, and his fabulous wealth.

Far and wide through the great town the name of Vincens was omnipotent.

Why, the very street through which this shabby young musician was passing belonged entirely to John Vincens; and not this one only, but others.

The black cloud hanging low upon the near horizon was the smoke of the "works" where thousands and thousands of tons of black coal were stored, where hundreds of souls toiled year in and year out, and took their bread, as it were, from his hands.

Maurice stepped upon the bridge which spanned the sluggish canal.

Even that clumsy boat creeping towards him through the dark bore the same all-powerful name upon its stern. And to all his wealth he had but one heir, Lena—Lena Vincens—his only child.

Maurice leaned over the parapet of the bridge, and stared down into the inky depths below.

The reflection of the lights above floated there like under-world fires.

"Why not?" he muttered, moodily; "why not accept old Vincens's offer? Yes, and marry his daughter, whose face, contrary to the old rhyme, is not her fortune. It is plain that it must come to that if I take the situation. Well, a man might do worse, I suppose."

The canal-boat reached the bridge and passed through.

Night was creeping on space.

Presently Maurice heard a tramping on the bridge, a rattle of wheels, and, lo! a pair of thoroughbred horses, with heads held high, and quivering chests flaked with froth, and a carriage, bright with plate glass and French varnish, flashed by.

One glimpse Maurice caught of its occupant—a heavy, dark man, with a nose fearfully and wonderfully hooked, and an iron-gray beard.

"Old Vincens himself, by Jove!" muttered Maurice, staring after the equipage as it whirled away.

And he picked up his wits and started homeward.

Leaving the bridge and black canal behind him, he hurried through divers secluded byways, and came, at last, to a little cottage surrounded by a garden and a high wall.

Up a winding walk he groped his way, and entered without ceremony.

"Is that you, Maurie?" called from some unknown quarter a woman's voice, as sweet as a wren's.

"Who else could it be, little woman?" he answered, and tossed off hat and coat, and burst, like a king, into the little parlor where Lucille and tea awaited him together.

It was a delightful room in spite of its threadbare carpet and old-fashioned furniture. A nice, ruddy fire glowed in the grate.

In one corner stood a piano and a music-rack, against which leaned a violin in its case.

A tea-table, spread for two, occupied the centre of the room, and about it a small figure, supported by a crutch, was fluttering like some broken-winged bird.

"Oh, you bad boy!" she cried, at sight of Maurice; "how late you are! I dare say the tea is quite spoiled."

She was a slender, deformed creature, this sister of Maurice's, scarcely taller than a child, although she was his senior. She had little transparent hands, and a small, wan face, pinched and sharpened by physical suffering, and beautiful braids of ashy-gold hair.

"Have you just come from Miss Vincens, Maurie dear?" she asked, hanging on his arm and gazing up at him with her keen, clear eyes. "She always keeps you beyond the usual hour, I notice. How gloomy you look! You haven't commenced to despair or forgotten grandpa's motto, 'Labor omnia vincit'?"

"One minute, Lu, one question at a time," he interrupted. "I have just come from the Vincens, and have not commenced to despair, but I think I have a better motto than grandpa's."

"What is it?" she asked, eagerly.

"Instead of labor conquering all things, I have Love to conquer all things for me," he replied, gayly, and reaching down he kissed his sister's forehead, murmuring, "Omnia vincit amor."

A jolly little servant brought in the cold ham and the toast; and in the cheerful, firelight the brother and sister sat down together.

Lucille watched her big, fair-haired darling furtively.

"You bad boy," she burst out, "you eat nothing. Don't you like the toast? I browned it myself most beautifully; or has Miss Vincens been unkind to you to-day?"

He looked a little queer. He loved her with all his heart, this deformed sister. She was the one only dear and precious thing to him in the wide world. He worked for her, lived for her, pinched himself in a hundred ways to clothe her in fine garments, and give her delicate fare. And Lucille, in return, simply idolized him. He had no thought of making a confidant of Lucille; indeed, he never worried her with anything.

"Oh, no! Miss Vincens is always kind enough," he answered, dryly.

Lucille began to draw patterns on the cloth with her spoon.

"Annie was telling me some odd things about John Vincens, Maurie—things that happened before you and I ever came to this place, you know."

"Indeed!" said Maurice.

"Yes. Annie's people worked in the coal districts for years, and, of course, know all about their master's affairs."

"What can they know?"

"'Tis said that John Vincens took advantage of his brother's credulity in his faith, robbed him of his share of their father's love and respect, and, by falsehoods, induced his dying father to omit his eldest son's name entirely from the will."

He looked half-whimsical, half-pained.

"His brother—Henry Vincens—died in destitution in Italy. Two years after, and during a fit of remorse, John Vincens went there and erected a very handsome monument to his memory. When you grow famous, dear Maurie, and take me to Italy, I shall go and see this grave."

"When I grow famous? A very remote contingency, I'm afraid, little woman."

She shook her head lightly.

"Of course, it is hard for you just now, with me a dead weight on your hands——"

"That will do, Lu!"

"But fame and wealth are often mere accidents, Maurie, as likely to happen to you as another. Miss Vincens's wealth is only by accident of her birth—and she will marry some day, no doubt. Dear me! how immensely lucky the person will be on whom, as Tennyson says, her favors fall. She'll make some man happy with her wealth—some poor man, I dare say, for her father, Annie says, never crosses her will in anything. Maurie, I have a singular fancy—don't be angry—it is that Miss Vincens is—well—fond of you."

Though she regarded him keenly she could detect no change in his features. He looked very much bored with this gossip concerning the Vincens, but nothing more.

"You have a great many fancies, little woman. Did Annie put that, also, into your head?"

"Certainly not," answered Lucille; "only it seems so very likely. I find you nice; why shouldn't Miss Vincens?"

He rose abruptly from the table.

"Poor logic, Lu! Nothing more improbable. Bosh!" he burst out, roughly. "What are these Vincens to us or we to them? Talk of something else, darling, do."

He brought his violin from the corner of the room, and prepared once more to go out.

With the closing-in of night the storm had greatly increased. The sleet was lashing the windows, the wind sighing mournfully through the garden which surrounded the cottage.

Maurice struggled into a heavy overcoat.

"Oh, dear!" sighed Lucille, hopping about him on her velvet-cushioned crutch. "How dreadful that you must go out in such weather. I will wait up for you, dear, and keep the tea hot."

He kissed her, and stepped out into the night.

Maurice Santley played first violin in the orchestra of the theatre.

The gale, shrieking in and out of alleys and byways and round old echoing corners, seemed like a human voice calling to him.

So strong was the delusion that he actually stopped and listened more than once before reaching his destination.

"What ails me to-night?" muttered Maurice. "I am as full of fancies as a woman."

A combination of bright particular "stars" graced the bills, and, in spite of wind and wet, the theatre was crowded.

From his seat down there by the footlights Maurice's gaze, drawn by a magnetism which he could not withstand, wandered to the Vincens' box.

Yes, there she sat, with a magnificent opera-cloak slipping down her shoulders, and her dark arms bound by massive bracelets of dull gold.

She was leaning forward, her eyes fixed on the young musician—those passionate, tell-tale eyes—and by her side was the man of coal, the modern King Midas, John Vincens, with his gray beard and his hooked nose, his glass also leveled at the orchestra.

Father and daughter! In truth they were an ugly pair!

Two thousand a year! What a fortune it seemed to Maurice, in his poverty. Could he, ought he, to reject it? Lucille's bit of gossip rushed back to his memory.

He wished, with a hot, shamed flush, that Henry Vincens had been less confiding in his brother's integrity, for then this miserable temptation might never have assailed him.

As his uplifted gaze met Miss Vincens's a fierce heat flushed over her face. She sank back behind the curtains of the box. Maurice lowered his gaze and fixed it on his violin.

The play went on; the evening passed,—how he scarcely knew. The curtain fell on the last act. The crowd streamed out, and all was done.

As Maurice gained the street the sleet was rushing by in clouds; stabbing, too, sharp as a knife.

The pavement was coated with ice; the northeast wind cut through marrow and bone.

Maurice finally reached home. Through his dismal journey he tried to determine whether he would accept Miss Vincens's offer and all it implied, or not; but even the storm did not prevail upon his decision; he would accept his own freedom and nothing more.

The following afternoon Maurice Santley presented himself in the Vincens' drawing-room to give the heiress her usual lesson.

But now he noticed none of the sumptuous elegance of the room, made no inward contrasts between the wealth therein displayed and the poverty of his own surroundings.

The world had all changed to Maurice. He no longer envied the wealth around him, now he knew, as he supposed, how that wealth came to its possessor.

Miss Vincens entered, carelessly dressed and with dark circles round her eyes, and a general restless, anxious look; but even this he did not see.

"You must not scold me," she stammered, "if I do blunder to-day. I have passed a restless night."

"Ah! Nothing serious in the attack, I hope?" said Maurice, blind to the yearning looks with which the ugly dark heiress was regarding him.

When the lesson was done she started up from the piano, and stood catching her breath in a curious way.

"Have you thought of—of—of——?"

She could not go on. Maurice rushed to the rescue.

"Of what you said to me in the conservatory yonder—of Mr. Vincens's very kind offer? Yes."

"Well?" she cried, in a voice sharp with impatience.

"I thank him a thousand times for his generosity. I decline to take advantage of it."

She had not anticipated this answer.

She stared at him blankly.

"Decline?"

"I must, indeed. Don't think me ungrateful. It is a position for which I am altogether unfitted."

Digitized by Google

Her pale face became still whiter.

"You will take nothing from us, then—from me?" and she stuttered in her rapid speech. "You will not become my debtor because—because you hate me!"

Woefully embarrassed, Maurice could only mutter, "Hate you? Certainly not!"

"Then take the position I offer you!" the last barrier of pride giving way before the strong tide of her unhappy passion.

"Pardon me, Miss Vincens, if I cannot reconcile my judgment to such an important step!"

She stretched out her dark, ringed hands. "Not when you know my peace depends on it—my happiness? Not when I tell you that I have forgotten our relative positions—forgotten that a woman may not sue to a man, even if her heart is breaking? Not if I say——"

"Stop, Miss Vincens! Don't go on in this way! Say nothing that you will regret!" And then, anxious to cover her mortification, he added, quickly, "You are jesting. I see, at my expense. I forgive you. Let us both forget it. And now, farewell!"

He started for the door.

She rushed after him.

"Jesting!" she cried, impulsively; "no, for I love you!" The words were fairly out. She had humbled herself in vain, for the astonishment and aversion that came over Maurice Santley's handsome face were not to be mistaken.

"Miss Vincens," he answered, "from my soul I am sorry for this!"

She sank, with a mournful cry into a chair, as he passed out of the room.

Passing John Vincens in the ante-chamber, he knew from the wave of the hand as he silently bowed him out, that the father knew all.

* * * * * *

Another year, another town, another season. Instead of prosperity, despair; instead of health, disease and death everywhere; shops all closed, business completely suspended; streets and avenues entirely deserted, save here and there the hurrying of a physician to a new patient, or a messenger to the apothecary's or the undertaker's. The scourge of a warm climate had fallen with a terrible fury upon the land, hundreds were dying for want of simple attendance at the crisis of the attack, and not a few, who had everything money could procure, were passing their last hour upon mother earth.

In a secluded street, in a high four-story tenement, in a small room on the top floor, lay the strong, massive frame of a young man; at last he had succumbed to the terrible malady; in the first delirium of its attack, the woman bending over and cooling his fevered brow with a tender, caressing motion, could distinctly hear the notes of love in "Lu, darling, I'll soon come back; I'll bring wealth to keep you in ease all your life—have patience, Lu, Maurie will soon return." And then again the accents of scorn were plainly visible in the words: "Marry her—no, Lu, not to give you ease and comfort all your life—marry for gold!—ah! ah!—not one redeeming feature—not one acceptable trait, nothing save her inordinate selfishness!"

The woman started violently and murmured under her breath: "How he loves her—how he despises me—if he only knew all, he might forgive!"

The third day dawned, the delirium had fled, and the patient was conscious of renewed vitality and gaining strength; he was also conscious that a tender angel ministered to his wants.

As his sight grew strong, he saw that this angel of mercy was merely a wreck of a better self; that the whirlwind of contagion had set its indelible mark upon her countenance, had softened an insipid expression into one of tenderness and pity, and made those wondrous orbs of chestnut hue look worlds of possible love.

"To whom am I indebted for this untiring devotion to one so friendless and far from home?" he finally asked, in a somewhat feeble voice.

"The district physician said you must not talk lest the harmony of your present condition may be disturbed," she answered, evasively.

"That is not answering my question and excites my curiosity to an uncontrollable degree," he replied, with a poor attempt at a smile; "tell me all about it and I promise you I will remain docile for the rest of the day."

"You may call me Watson," she answered, shortly.

"Well, Miss Watson, will you favor me with the other particulars, please?"

"I was taken sick myself in this house, and, after a successful battle, Providence permitted me to again enter the world of the living; preparatory to my return home I made a tour of inspection. I found no one save you, and you alone—even the physician that attended the house thought that I was the last patient left. I could not leave a fellow-being so helpless, after I myself had been saved, and I remained to perform the duties that your delirium told me there was no one to fulfill."

Day followed day, the streets gradually resumed their former activity; subscriptions flowed in from every town and village in the Union; the terrible scourge was within the control of the living, and now it was only a question of funds and nourishment to fully reclaim the surviving patients.

Maurice Santley could move from room to room, and his nurse had left the house, not for good, but owing to his earnest entreaties, to return every day for a little while to relieve the monotony of his convalescence.

He was inditing a letter to Lu, telling her for the first time of his wonderful escape and to whom he owed his preservation from a terrible and lonely death, as she entered flushed with her animated exercise.

"I was just writing to my sister, Lucille, Miss Watson. I shall endeavor to return to-morrow. Before finishing my letter I have a favor to ask you. Will you allow me to take you to Lucille, that she may thank you herself for my preservation, for which I myself have not been able to full express my gratitude?"

Now, in the supreme hour of her content, Miss Watson became strangely cold. He had asked of her a favor; it mattered not by what means that asking had been brought about, it was sufficient that he had asked it and she had the power to refuse.

"I should dearly love to see your sister, Mr. Santley, but I have delayed my own return home far beyond the necessities of the occasion, owing to your solicitations. I can scarcely see how it is possible to grant you your favor."

"Let me put it another way before you finally decide," he answered gravely, while a great tenderness and gratitude filled his manner as he continued; "Miss Watson, will you, as my wife, return and share my humble home and my sister's love? Do not turn away so coldly; that I truly love you, you must certainly have divined ere this. How else could I repay my debt except by a life-long devotion?"

"Your gratitude, however great, should not lead you into a possible repentance of such a step before half that life has passed," she falteringly answered.

"My gratitude taught me to love you, I will admit; but that gratitude might die, while my love shall always remain as it is now. You must admit, from your answer, that I am not wholly a stranger to your heart." He noticed her start at this, and, moving to see her face, found it wet with tears, and those not of regret. He clasped her tenderly to him, but she tore herself away.

"You know not who I am, what I am, yet you say you want me to marry you?" she cried, impatiently.

"Yes!" he firmly replied.

"My name is Lena Watson Vincens—you know the rest," she cried, hiding her face in her hands.

"*Love conquers all things*," he answered. "Will you be my wife, Lena Watson Vincens?"

"If Lucille says yes!" she answered in his arms.

There was no doubt that Lucille would be very happy with the pair, under the circumstances, and, although the most of John Vincens's fabulous wealth had taken wings and vanished just before his death, some six months previous, there was sufficient left to keep the three in comfort, by the aid of Maurice Santley's new position, as the director of the new Academy of Music, for which he had braved the Southern scourge to obtain.

ARRIVAL OF THE DUKE OF ARGYLL AND FAMILY IN NEW YORK.

THERE was no steamer wearing a gala attire of bunting and crowded with personal friends, no screeching tug, no discordant band of music, no congregation of distinguished citizens, no fuss, parade nor ceremony, to greet the arrival on our shores of one dear to every Scotchman's heart, one whom even the *Spectator* has denominated "the greatest orator in the House of Lords." With all the air of plain travelers, whose coming and going could effect no interest, in a manner far more common-place than Americans have been accustomed to observe of late, His Grace the Duke of Argyll, his son Lord Walter Campbell, and his daughters, Lady Elizabeth Campbell and Lady Mary Campbell, each accompanied by a servant and with satchels in hand, stepped ashore from the Cunard steamer *Scythia*, at her dock, in the midst of the rain, on Tuesday afternoon, June 3rd, took a carriage and were driven direct to the Windsor Hotel. The only demonstration reported was a "hooray" from a Scotchman, so hearty that even he seemed frightened with the detonation of his voice.

As the Duke and the members of his family who accompany him stop in the United States merely for a rest on their way to and from a visit to the Marquis of Lorne and the Princess Louise, at Quebec, no public reception was arranged, and it is doubtful if the Duke finds time enough to gratify an old desire to "examine our institutions."

The passengers and baggage were landed from the main deck of the steamer on account of the high tide, the Duke leading in the debarkation of his party, as shown in the illustration. At the Windsor the apartments occupied by the Emperor and Empress of Brazil during their sojourn here in 1876, a suite on the first floor consisting of two drawing-rooms and four sleeping-rooms, had been reserved for the travelers, and on their arrival were found to be simply but tastefully decorated with flowers, hanging baskets and bouquets.

At an early hour on Wednesday morning the ducal party were driven over portions of Fifth Avenue and Broadway, and then took the 10:30 A. M. train from the Grand Central Depot for Niagara Falls, by way of the Hudson River and Central Railroad.

Just before their arrival at the Clifton House a heavy thunder-storm broke, and as they were crossing the new suspension bridge, there were continual vivid flashes of lightning which were rendered more intense by the short intervals of darkness. During the passage across the river the members of the party silently looked out into the storm and got such glimpses of the scene as the blinding lightning would allow, but when they reached the Clifton House they expressed their admiration of the wonders of which they had been witnesses. After breakfast the Duke and his family were driven across the bridge to this side of the river and visited the whirlpool. They were then driven around Goat Island and through Prospect Park, and took every variety of views of the Falls. In the afternoon they were driven over the Clark Hill Islands to the Burning Springs, crossing the two new suspension bridges, and were delighted with the scenery. The ducal party gave up the idea of descending the river, and left Niagara Falls at 4:30 P. M., Friday, in a special train on the Great Western Railway for Montreal, where they remained until Monday. Lord Walter Campbell left for New York on that day in order to sail for Europe on Wednesday. Then the remainder of the party went direct to Quebec, where apartments have been prepared for them in the Citadel, the temporary quarters of the Marquis of Lorne and the Princess Louise. They will remain the guests of the viceroy until July, and will set sail for England, at New York, on the 10th.

A Famous London Solicitor.

THE London papers record the death of a man who, probably, was the repository of more dark secrets than any man in England, save his own son. He was head of the famous Hebrew firm of solicitors, Lewis & Lewis, of Ely Place. If any one in the British Dominions can "pull a fellow through," they are the men; and albeit they take cases of the darkest complexion, they have always maintained a character for personal integrity and respectability. The gains of this firm are believed to have been, during the past twenty years, as large as those of any attorneys in London, with the exception, perhaps, of one or two firms who receive immense sums as advisers of great commercial houses and companies.

As a sample of the cases sometimes dealt with by the Messrs. Lewis, we may mention one which came within their ken some twenty-five years ago. A young Guardsman, of high aristocratic connections, was charged with a most serious offense. The family "Talkinghorn" at once saw that Lewis & Lewis were, under the circumstances, the only loophole of escape. The young man appeared before Sir Thomas Henry, then chief magistrate, under an assumed name, and Mr. George Lewis begged that the magistrate would deal summarily with the case. "If you talk all night, Mr. Lewis," said the magistrate, "it will make no difference. I shall still commit the prisoner for trial at the Central Criminal Court." He was accordingly committed. But when the case came on, not a witness was forthcoming. Messrs. Lewis's fee was $5,250. The record book of their office would, if published, convulse society.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Night Patrol of St. Petersburg.

The riots and assassinations in Russia, which culminated in the attempt on the life of the Czar, have been met by reprisals by the authorities. General Gourko, being appointed Governor of St. Petersburg, issued an order that every householder should engage a man to act as porter to guard each house during the night, so that no seditious placards might be placed upon the walls. But this order very soon became a dead-letter, for it was found that men refused to act as porters, being deterred therefrom by the threats of the Nihilists, who even defied the police, and, it is rumored, pasted their placards, on one or two occasions, on the backs of these astute officials. This order was followed by a second forbidding internal movement without permits, and a third directing all citizens to be at home by nine o'clock. The city wears the aspect of a brick camp which expects attack, the streets occupied by the porter-sentries, the inhabitants shrinking into their houses, the soldiers under arms and ready for immediate action. Certainly the organization of the conspirators seems singularly complete. Their pamphlets, placards and threats find their way to their proper destination in the most remarkable manner. They have been discovered even in official documents and Ministers' portfolios.

General Garibaldi in Italy.

General Garibaldi, having left the Island of Caprera, in consequence of continued illness, has taken up his residence in the Villa Le Lieur, at Albano, a picturesque and peaceful spot, well calculated to charm the latter days of the red-shirted hero. Upon his arrival at Rome, Garibaldi, accompanied by his son Menotti, paid a visit to King Humbert at the Royal Palace of the Quirinal. His Majesty, not wishing to subject the old soldier to the fatigue of climbing the stairs, went out into the gardens and received the caller in his carriage, General Medici appearing as escort. During the interview, Menotti Garibaldi stood uncovered beside the carriage.

The Zulu War.

On March 20th an important battle was fought by Brigadier-General Evelyn Wood, V. C., C. B., in defending his fortified camp at Kambula Hill, on the Transvaal frontier of Zululand, against a very large attacking force. This was two days after the disaster which a portion of his force, chiefly their regular cavalry, had experienced on the Ziobane Mountain. On the 29th, which was the very next day, Brigadier Wood received information that he was about to be attacked, and accordingly took steps to insure the safety of his camp, which consisted of a square wagon laager surrounded by an intrenchment of a strong profile, thus giving a double tier of fire on all sides. A short distance above, to the northwest, a small redoubt had been thrown up, in which two mountain-guns were placed. At 1:30 P. M. on the 30th the attack commenced, and was continued with great pertinacity until 5:30, when the enemy fell back in confusion. The fighting at Ginghilovo on April 2d was distinguished by the bold participation of the Naval Brigade. In fact, the seamen of H. M. S. *Boadicea*, with the Marines of H. M. S. *Shah*, with the Sixtieth Rifles, were the first engaged, opening a steady fire on the enemy as soon as they were well within range. Later on in the engagement the *Boadicea's* Gatling gun did great execution. Six Zulu warriors were found dead in a cluster thirty yards from it. Next to the Sixtieth, another party of the *Shah's* men, with one rocket tube and the Ninety-ninth Regiment facing due west, were called upon to use their rifles. It was from this front and bearing to its left (where the *Tonedee* Blue-jackets were intrenched) that the hottest attack developed itself. Ginghilovo was a camp that Lord Chelmsford had intrenched while on his march to the relief of Colonel Pearson at Ekowe.

End of the Afghan War.

The first conference between Yakoob Khan, son of the late Ameer, and Major Cavagnari, the Political Agent for the Indian Government, attached to General Sir Samuel Browne's headquarters for the arrangement of terms of peace, took place at Gundamuk, thirty or forty miles west of Jellalabad, on the road to Cabul. Our view of Gundamuk looks towards the Jugdullek Pass, from the high ground over the Morki Kheyl, with the village of Asbam Kheyl among the trees, and the bridge of the Chismeh, or spring. The rocky ridge that rises highest to the right hand is a prolongation of the Siah Koh range, which begins at Darunta, in the Jellalabad valley, and is continued to a dip where the road turns towards Jugdullek; to the left of that dip is a range connected with the Safed Koh Mountains, and beyond this range lies the plain of Cabul. From Gundamuk, Yakoob Khan advanced to Jellalabad, where he was received with signal courtesy by Sir Samuel Browne and Major Cavagnari, and the negotiations proceeded with a successful result. The half-brother of Shere Ali—namely, the Sirdar Wali Mohammed—was considered an important personage, in view of the possibility of the British not being able to come to terms with Yakoob Khan, or in the event of Yakoob Khan failing to secure his position as ruler of Afghanistan. At an interview between Wali Mohammed and Sir Samuel Browne, the General is seen seated in the armchair, listening attentively to his Afghan visitor, who is said to be a garrulous talker, but genial and pleasant; the interpreter between them is Major E. R. Conolly, of the Staff Corps, who sits on the left hand of the Sirdar, with one of the Afghans in attendance on Wali Mohammed. This uncle of Yakoob Khan is a man of fifty-five years of age, and has been much versed in political business, but has not shown any great ability or force of character.

AT HOME AND ABROAD.

—GEORGIA will issue another series of four per cent. bonds, amounting to $200,000, next Spring.

—IN CHICAGO, the Common Council has resolved not to attempt to stop the liquor traffic on Sundays.

—TWO-THIRDS of North Carolina's 1,100 convicts are leased out for work upon the railroads in the State.

—NEARLY 5,000 more persons emigrated from Germany last year than in the preceding one, the total being 46,286.

—NEVADA prohibits opium-smoking, and provides a penalty of $1,000, or an imprisonment for two years, for each offense.

—THE Swiss Federal Council desire the Chambers to impose additional duties on cigars, tobacco, coffee, chicory and spices.

—THE municipal council of Paris, considering the question of cremation, have agreed that experiments may be made at Père-la-Chaise.

—OVER $40,000 worth of imported live stock—horses, cattle, sheep and hogs—have been disposed of at the recent Spring sales in Tennessee.

—A BILL is being prepared for the French Senate and Chamber of Deputies to authorize the reduction of the term of compulsory service in the army to three years.

—THE famine in Cashmere has become so serious that the authorities are compelled to send assistance to the sufferers. Many towns and villages have already been depopulated.

—THE offensive working of the new trades-license tax, an impost which falls most harshly on the poorer classes, is leading to a general strike amongst the native workmen of Calcutta.

—THE value of articles manufactured in New Hampshire last year aggregated $96,000,000, among them being $30,568,500 worth of cotton goods, $11,709,600 of boots and shoes, and $9,222,030 of woolens.

—CAMELS have suffered severely in the Afghan campaign. Thousands have died from overwork and bad forage, and for many years the trade between India and Central Asia will be greatly crippled for want of this means of carriage.

—TEN thousand peasants from all parts of Poland attended the centenary of St. Stanislaus at Cracow a few days ago. The speakers—deputies, professors, priests, and peasants—represented Socialist and revolutionary doctrines.

—A NEW Anglo-Portuguese treaty has been concluded for the development of freedom, commerce, and civilization in Africa, and a British man-of-war has been sent to Mozambique to co-operate with the Portuguese for the suppression of the slave trade.

—BY reason of a heavy flood, the River Po, in Italy, burst its banks on June 4th, between the towns of Sermide and Revere, near Mantua, occasioning great damage. A Bill granting aid to the sufferers was immediately introduced in the Chamber of Deputies.

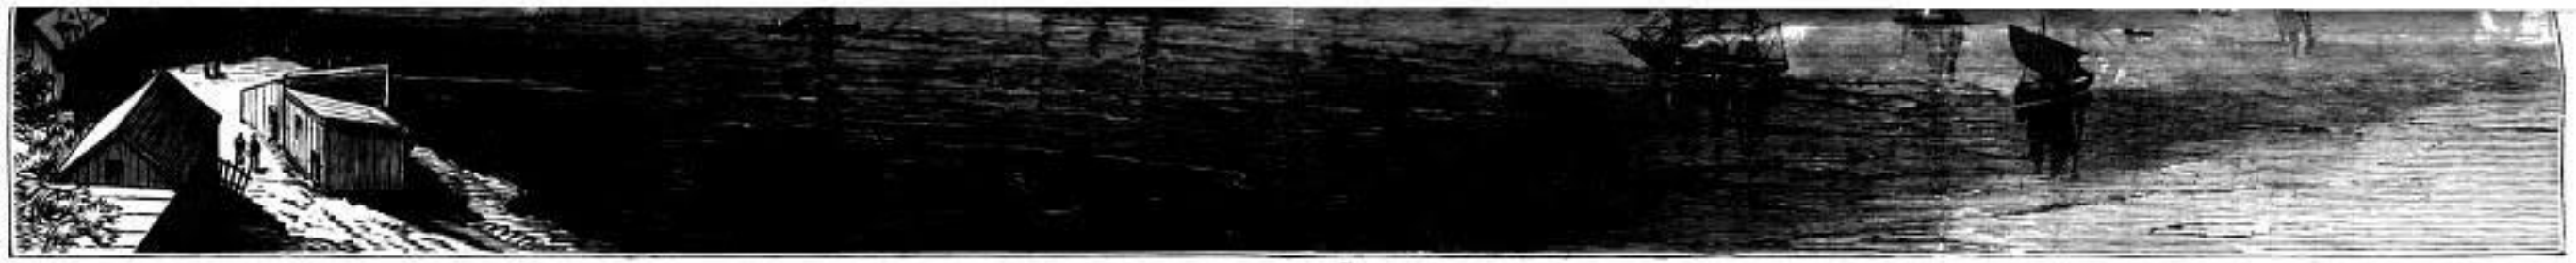
—STRONG pressure is being brought to induce the Indian Government to prohibit the great religious fairs, on the ground that they almost invariably form centres whence pestilence spreads throughout the country, and that an effective sanitary control of the masses of pilgrims assembled is almost impossible.

—TIME'S changes have seldom been as touchingly illustrated as in the cases of Laura Mitchell and Mrs. Elizabeth Rogers. The former was the slave of the latter, and, after supporting her mistress for fourteen years, paid all the expenses of the funeral when she died in Columbus, Ga., a few days ago, at the age of seventy-three.

—THE colored people of Collin County, Texas, are just now greatly exercised over an alleged wonderful apparition in the heavens. They claim to see nightly one black and two white horses coursing athwart the sky, and claim that the black one presages death to their race, and that the white ones are to furnish transportation to the home of the angels.

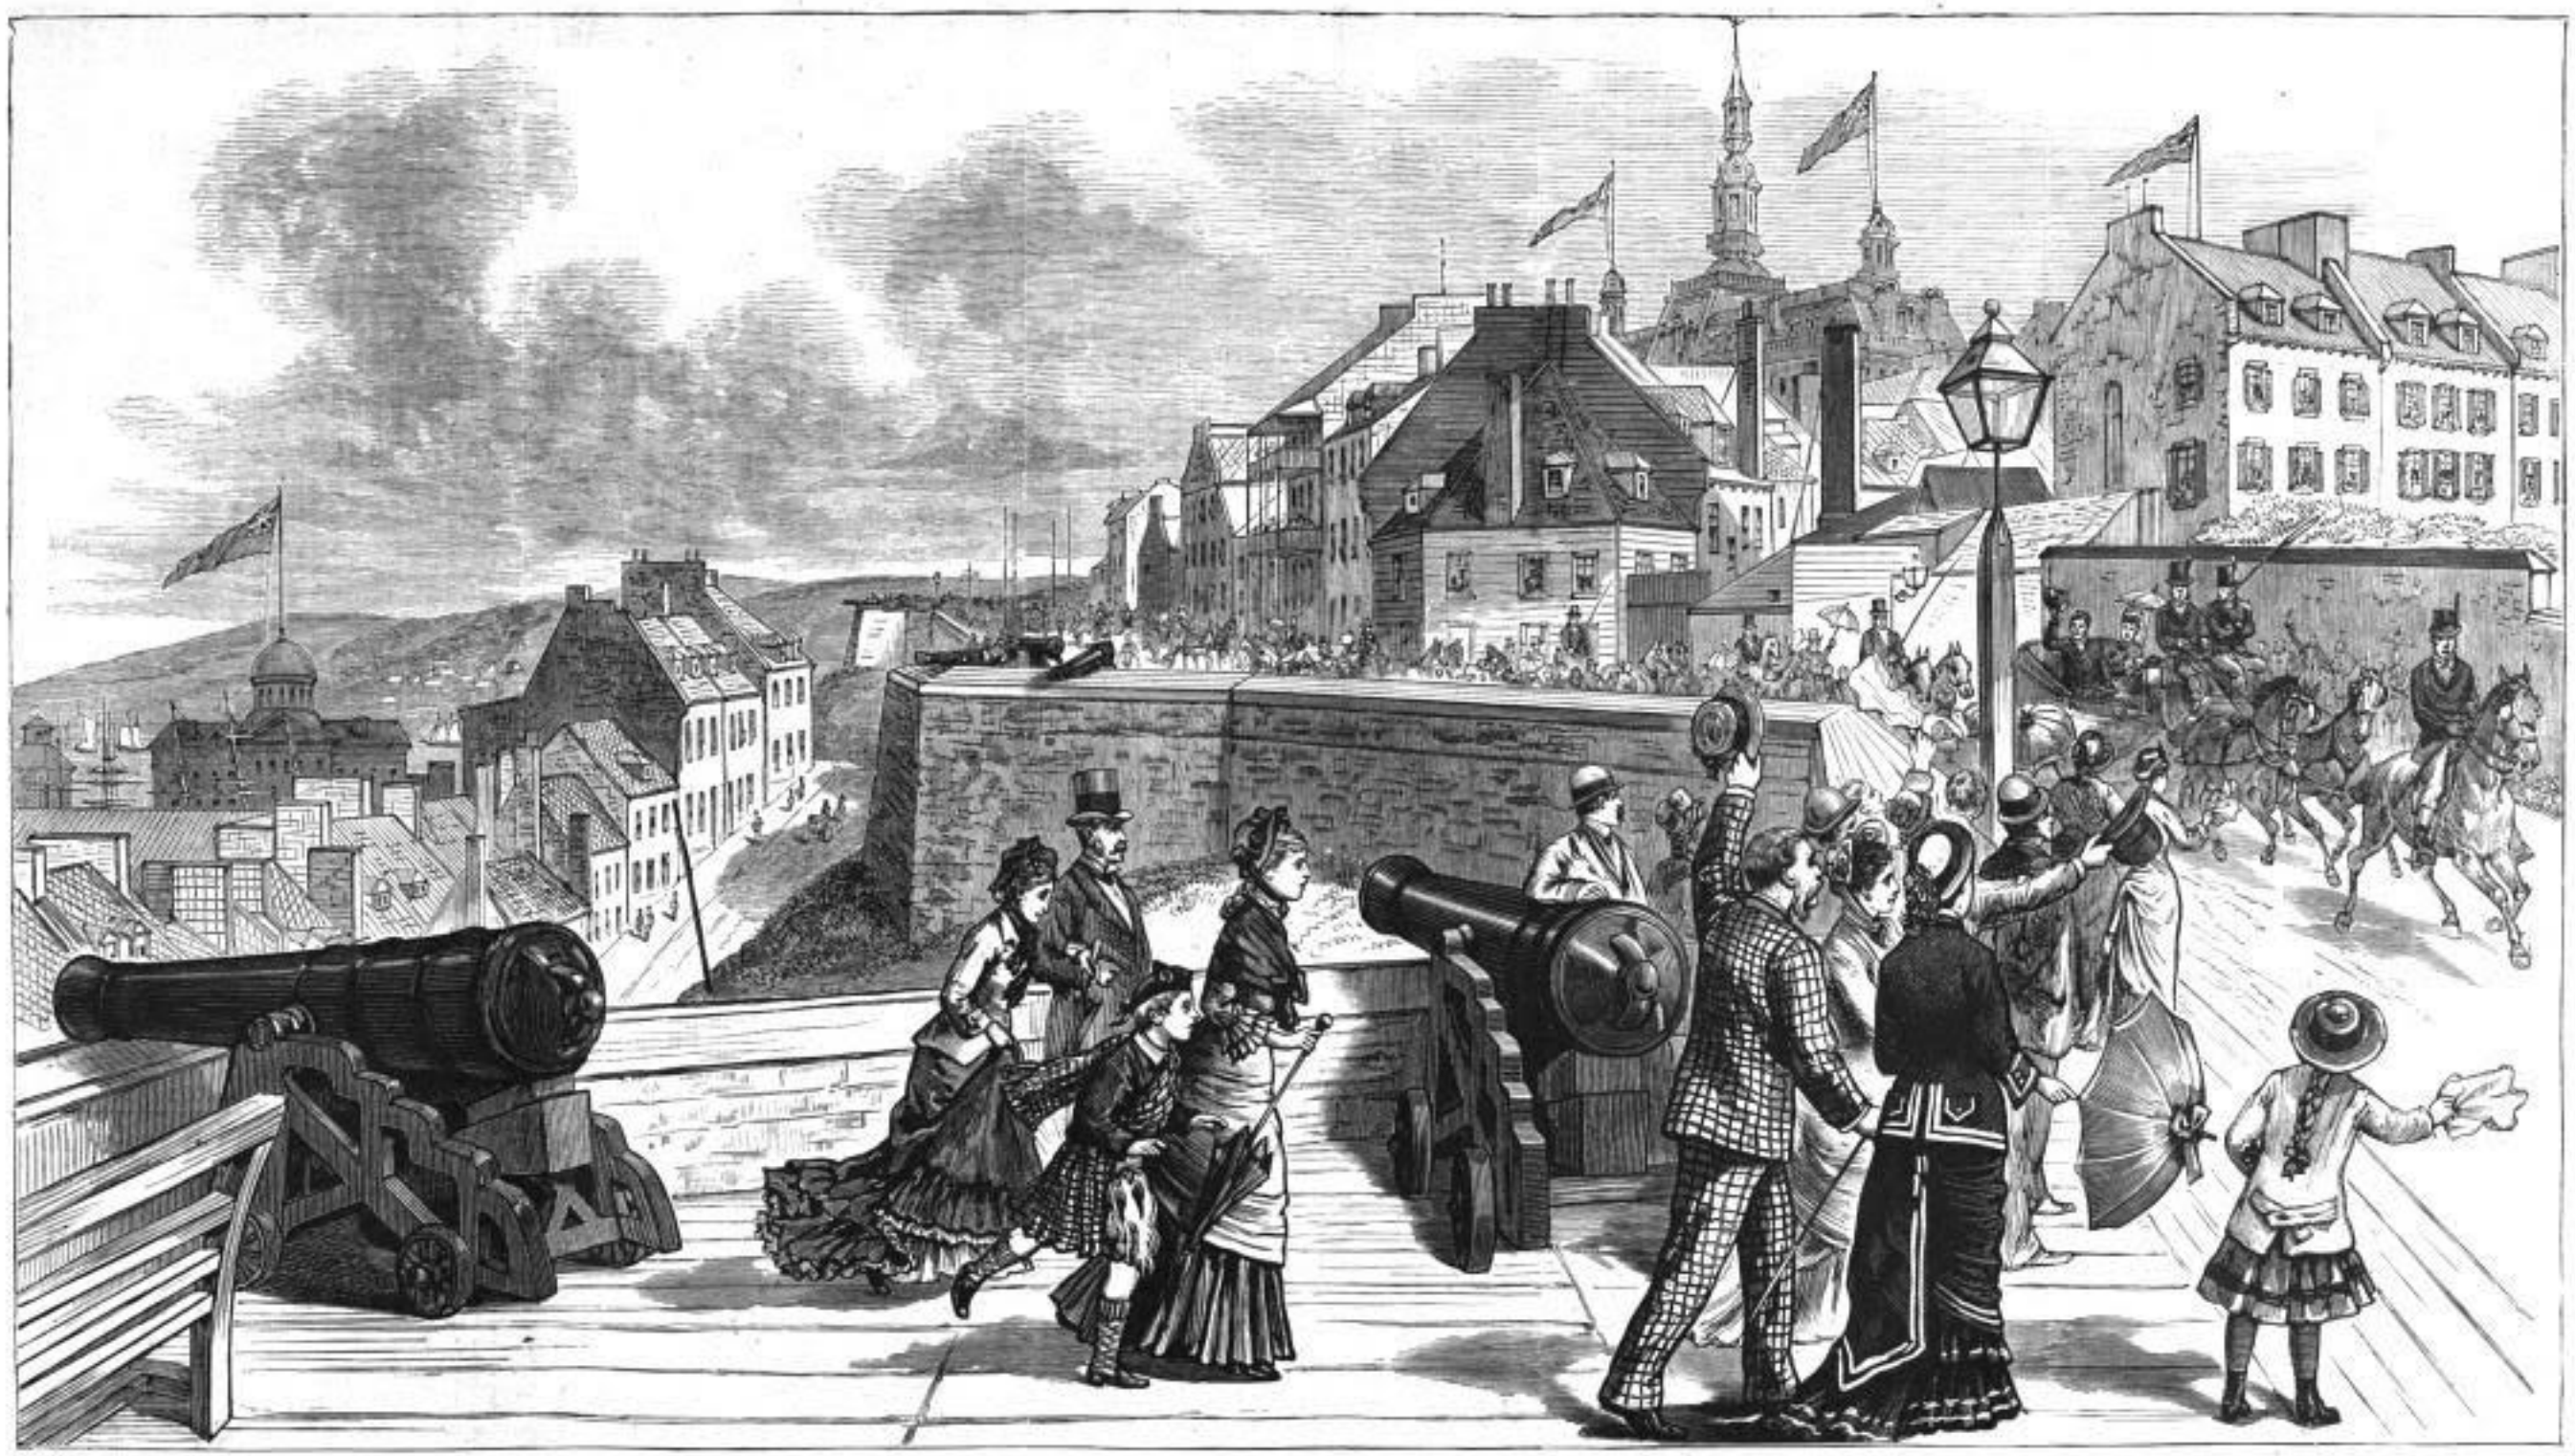
—IT has been decided to admit women to the privileges of students in the Harvard Medical School under certain restrictions, which are understood to be that women shall be instructed separate from men in all exercises in which students take an active part, such as laboratory work and recitations, and in lectures on women's diseases, anatomy and the like.

—THE latest charitable organization in London is known as the Sea-shell Mission, the active members being the boys and girls of parents able to indulge in Summer trips to the seaside. The shells are collected, labeled, done up in boxes of 200, and sent to the Homes and hospitals in London for the little sufferers who never have an opportunity for scanning across the blue waters.



—LATE intelligence from Mandalay is of a serious character. It is said that numbers of Burmese troops are going down the river. The forts near that place are being garrisoned, and much alarm is felt. An unpleasant rumor says certain females of the royal family, for whose safety the British Government stipulated, have been placed in irons and will probably be starved.

—A PROPOSITION has been submitted to the Santo Domingo Congress by President Guillermo to establish free trade with the United States, on account of the excitement that prevails because of the increase of the duty on tobacco in Germany. It is proposed to admit into Santo Domingo, duty free, all American produce, provided the United States will grant the same privilege to Santo Domingo produce.



—FRANCE is preparing for a grand military display in September, when the new flags will be distributed to her army at Vincennes. All the regiments of the active army, horse and foot, and the 145 corps of the territorial army, will be represented at the review. The number of flags originally ordered was 504, and 119 standards, but was afterwards increased by eight more for the Republican Guard, the gendarmerie, the pompiers and the marine infantry.

—ON June 4th, the Democrats of Ohio made the following nominations for State officers: For Governor—Thomas Ewing, of Lancaster County; for Lieutenant-Governor—Americus V. Rice, of Putnam County; for Treasurer—Anthony Howells, of Stark County; for Auditor—Charles Reemelin, of Hamilton County; for Judge of the Supreme Court—W. J. Gilmore, of Preble County; for Attorney-General—Isaiah Pillars, of Allen County; for Member of the Board of Public Works—Patrick O'Marah, of Cuyahoga County. The Greenbackers, on the same day, nominated for Governor—A. Saunders Pratt, of Logan County; for Lieutenant-Governor—Hugo Preyer, of Stark County; for Auditor—Andrew Ray, of Jackson County; for Treasurer—Charles Jenkins, of Mahoning County; for Supreme Judge—A. M. Jackson, of Cuyahoga County; for Attorney-General—James C. Crogan, of Hocking County; for Member of the Board of Public Works—George W. Pratt, of Hamilton County.

SEVILLE BY MOONLIGHT.

THE blue and languorous midnight falls
Upon Giralda's roseate tower,
Down on the wide, white marble halls,
Silent and slumbrous as the hour.

The air a scent of orange bides,
The alamedas bloom with balm;
Where, like a thread of silver glides
The limpid Guadalquivir's calm.

The grand cathedral prays and dreams
In moonlit quiet, grave and still;
And every solemn portal teems
With memories of the Moorish skill

Near, on the plaza, white with stars,
The indolent majos find repose;
Around them music of guitars
Blends with the fragrance of the rose.

A swart gitano loiters by;
Within his sash the knife sleeps yet—
Bright as the lustre of his eyes
Sparkles his twisted cigarette.

A whirr of fans half stills a laugh,
The velvet flash of orbs divine
Reveals fair manolas who quaff
The golden, rich Montilla wine.

While all the merry groups around,
Living to love and to forget,
Sing some mad bacchanal of sound,
Timed by the clicking castanet.

Within the steep and narrow lanes,
There in the soft and shifting shade,
Float on a song, the loves, the pains
The languors of the serenade!

And till the warm, sweet night hath flown,
The duenas doze, and gallants hope;
While from quaint balconies of stone
Dangles the tell-tale, silken rope.

Hark! through the favoring gloom I hear
The cautious tread of men that lurk—
An oath of anger shocks the ear,
I see the glitter of a dirk.

Waiting above move satined feet—
Two eyes read passion in two eyes;
There, in delicious rapture sweet,
Beauty and youth taste Paradise.

'Tis o'er—I did not care to wait
And feel the crimson rain of blood;
The clash of steel, the groans of hate
Were long since silenced by the flood

Of song and laughter, clear and loud,
From gypsies gay, who hand in hand,
A weird, grotesque and brawling crowd,
Danced a delicious saraband,

Until the moon began to wane,
And, with its suite of dreamy stars,
Sank into nothingness again,
Behind the gloom of Alcazars!

F. S. SALTERN.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXXV.—(CONTINUED).

"I AM sorry to say I have bad, very bad news for you," the doctor began. "Time is of serious importance—I must speak plainly. You have heard of mistakes made by taking the wrong bottle of medicine? The poor lady up-stairs is, I fear, in a dying state from an accident of that sort. Try to compose yourself. You may really be of use to me, if you are firm enough to take my place while I am away."

Amelius steadied himself instantly. "What I can do I will do," he answered.

The doctor looked at him. "I believe you," he said. "Now listen. In this case, a dose limited to fifteen drops has been contounded with a dose of two tablespoonsful; and the drug taken by mistake is strychnine. One grain of the poison has been known to prove fatal—she has taken three. The convulsion fits have begun. Antidotes are out of the question—the poor creature can swallow nothing. I have heard of opium as a possible means of relief, and I am going to get the instrument for injecting it under the skin. Not that I have much belief in the remedy; but I must try something. Have you courage enough to hold her if another of the convulsions comes on in my absence?"

"Will it relieve her, if I hold her?" Amelius asked.

"Certainly."

"Then I promise to do it."

"Mind! you must do it thoroughly. There are only two women up-stairs, both perfectly useless in this emergency. If she shrieks to you to be held, exert your strength—take her with a firm grasp. If you only touch her (I can't explain it, but it is so), you will make matters worse."

The servant ran down-stairs while he was speaking. "Don't leave us, sir—I'm afraid it's coming on again."

"This gentleman will help you while I am away," said the doctor. "One word more," he went on, addressing Amelius. "In the intervals between the fits she is perfectly conscious, able to listen, and even to speak. If she has any last wishes to communicate, make good use of the time. She may die of exhaustion at any moment. I will be back directly."

He hurried to the door.

"Take my cab," said Amelius, "and save time."

"But the young lady——"

"Leave her to me." He opened the cab-door and gave his hand to Sally. It was done in a moment. The doctor drove off.

Amelius saw the servant waiting for them in the hall. He spoke to Sally, telling her, considerately and gently, what he had heard, before he took her into the house. "I had such good hope for you," he said; "and it has come to this dreadful end. Have you courage to go through with it, if I take you to her bedside? You will be glad one day, my dear, to remember that you cheered your mother's last moments on earth."

Sally put her hand in his. "I will go anywhere," she said softly, "with you."

Amelius led her into the house. The servant, in pity for her youth, ventured on a word of remonstrance. "Oh, sir, you're not going to let the poor young lady see that dreadful sight up-stairs!"

"You mean well," Amelius answered, "and I thank you. If you know what I know, you would take her up-stairs, too. Show the way."

Sally looked at him in silent awe as they followed the servant together. He was not like the same man. His brows were knit; his lips were fast set; he held the girl's hand in a grip that hurt her. The latent strength of will in him—that reserved resolution so finely and firmly entwined in the natures of sensitively-organized men—was rousing itself to meet the coming trial. The doctor would have doubly believed in him, if the doctor had seen him at that moment.

They reached the first-floor landing.

Before the servant could open the drawing-room door, a shriek rang frightfully through the silence in the house. The servant drew back, and crouched trembling on the upper stairs. At the same moment the door was flung open, and another woman ran out, wild with terror. "I can't bear it!" she cried, and rushed up the stairs, blind to the presence of strangers in the panic that possessed her. Amelius entered the drawing-room with his arm round Sally, holding her up. As he placed her in a chair, the dreadful cry was renewed. He only waited to rouse and encourage her by a word and a look—and ran into the bedroom.

For an instant, and an instant only, he stood horror-struck in the presence of the poisoned woman.

The fell action of the strychnine wrung every muscle in her with the torture of convulsion. Her hands were fast clinched; her head was bent back; her body, rigid as a bar of iron, was arched upwards from the bed, resting on the two extremities of the head and the heels; the staring eyes, the dusky face, the twisted lips, the clinched teeth, were frightful to see. He faced it. After the one instant of hesitation, he faced it.

Before she could cry out again his hands were on her. The whole exertion of his strength was barely enough to keep the frenzied throbs of the convulsion, as it reached its climax, from throwing her off the bed. Through the worst of it he was still equal to the trust that had been placed in him—still faithful to the work of mercy. Little by little he felt the lessening resistance of the rigid body, as the paroxysm began to subside. He saw the ghastly stare die out of her eyes and the twisted lips relax from their dreadful grin. The tortured body sank and rested; the perspiration broke out on her face; her languid hands fell gently over on the bed. For a while the heavy eyelids closed, then opened again feebly. She looked at him. "Do you know me?" he asked, bending over her. And she answered, in a faint whisper, "Amelius!"

He knelt down by her, and kissed her hand. "Can you listen, if I tell you something?"

She breathed heavily; her bosom heaved under the suffocating oppression that weighed upon it. As he took her in his arms to raise her in the bed, Sally's voice reached him in low, imploring tones from the next room. "Oh, let me come to you! I'm so frightened here by myself."

He waited before he told her to come in, looking for a moment at the face that was resting on his breast. A gray shadow was stealing over it; a cold and clammy moisture struck a chill through him as he put his hand on her forehead. He turned towards the next room. The girl had ventured as far as the door; he beckoned to her. She came in timidly and stood by him, and looked at her mother. Amelius signed to her to take his place. "Put your arms round her," he whispered. "Oh, Sally, tell her who you are in a kiss!" The girl's tears fell fast as she pressed her lips on her mother's cheek. The dying woman looked up at her with a glance of helpless inquiry—then looked at Amelius. There was a doubt in her eyes that made his heart ache. Arranging the pillows so that she could keep her raised position in the bed, he signed to Sally to approach him, and removed the slipper from her left foot. As he took it off he looked again at the bed—looked and shuddered. In a moment more it might be too late. With his knife he ripped up the stocking, and, lifting her on the bed, put her bare foot on her mother's lap. "Your child! your child!" he cried; "I've found your own darling! For God's sake, rouse yourself! Look!"

She heard him. She lifted her feebly-declining head. She looked. She knew.

For one awful moment, the sinking, vital forces rallied, and hurled back the hold of Death. Her eyes shone radiant with the divine light of maternal love; an exulting cry of rapture burst from her. Slowly, very slowly, she bent forward, until her face rested on her daughter's foot. With a faint sigh of ecstasy she kissed it. The moments passed—and the bent head was raised no more. The last beat of the heart was a beat of joy.

CHAPTER XXXVI.

THE day had advanced to evening. A few hours of repose and solitude at the cottage had helped Amelius, in some degree, to recover his tranquillity. He was sitting in the library, with Sally for his only companion. The silence in the room was uninterrupted. On the open desk at his side lay the letter which Mrs. Farnaby had written to him on the morning of her death.

He had found the letter—with the envelope unfastened—on the floor of the bedchamber, and had fortunately secured it before the landlady and the servant had ventured back to the room. The doctor, returning a few minutes afterwards, had warned the two women that a coroner's inquest would be held in the house, and had vainly cautioned them to be careful of what they said or did in the interval. Not only the subject of the death, but a discovery which had followed, revealing the name of the ill-fated woman marked on her linen, and showing that she had used an assumed name in taking the lodgings as Mrs. Ronald, became the gossip of the neighborhood in a few hours. Under these circumstances, the catastrophe was made the subject of a paragraph in the evening journals, the name being added for the information of any surviving relatives who might be ignorant of the sad event. If the landlady had found the letter, that circumstance also would, in all probability, have formed part of the statement in the newspapers, and the secret of Mrs. Farnaby's life and death would have been revealed to the public view.

"I can trust you, and you only," she wrote to Amelius, "to fulfill the last wishes of a dying woman. You know me, and you know how I looked forward to the prospect of a happy life in retirement with my child. The one hope that I lived for has proved to be a cruel delusion. I have only this morning discovered, beyond the possibility of doubt, that I have been made the victim of wretches who have deliberately lied to me from first to last. If I had been a happier woman, I might have had other interests to sustain me under this frightful disaster. Such as I am, death is my one refuge left.

"My suicide will be known to no creature but yourself. Some years since, the idea of self-destruction—concealed under the disguise of a common mistake—presented itself to my mind. I kept the means (very simple means) by me, thinking I might end in that way after all. When you read this, I shall be at rest for ever. You will do what I have yet to ask of you, in merciful remembrance of me—I am sure of that.

"You have a long life before you, Amelius. My foolish fancy about you and my lost girl still lingers in my mind; I still think it may be just possible that you may meet with her in the course of years.

"If this does happen, I implore you, by the tenderness and pity that you once felt for me, to tell no human creature that she is my daughter; and, if John Farnaby is living at the time, I forbid you, with the authority of a dying friend, to let her see him, or to let her know even that such a person exists. Are you at a loss to account for my motives? I may make the shameful confession which will enlighten you, now I know that we shall never meet again. My child was born before my marriage; and the man who afterwards became my husband—a man of low origin, I should tell you—was the father. He had calculated on this disgraceful circumstance to force my parents to make his fortune by making me his wife. I now know (what I only vaguely suspected before), that he deliberately abandoned his child, as a likely cause of hindrance and scandal in the way of his prosperous career in life. Do you now think I am asking too much when I entreat you to never even speak to my lost darling of this unnatural wretch? As for my own fair fame, I am not thinking of myself. With Death close at my side, I think of my poor mother, and of all that she suffered and sacrificed to save me from the disgrace that I had deserved. For her sake, not for mine, keep silence to friends and enemies alike if they ask you who my girl is—with the one exception of my lawyer. Years since, I left in his care the means of making a small provision for my child, on the chance that she might live to claim it. You can show him this letter as your authority, in case of need.

"Try not to forget me, Amelius—but don't grieve about me. I go to my death as you go to your sleep when you are tired. I leave you my grateful love—you have always been good to me. There is no more to write; I hear the servant returning from the chemist's, bringing with her my release from the hard burden of life without hope. May you be happier than I have been! Good-by!"

So she parted from him for ever. But the fatal association of the unhappy woman's sorrows with the life and fortunes of Amelius was not at an end yet.

He had neither hesitation nor misgiving in resolving to show a natural respect to the wishes of the dead. Now that the miserable story of the past had been unreservedly disclosed to him, he would have felt himself bound in honor (even without instructions to guide him) to keep the discovery of the daughter a secret, for the mother's sake. With that conviction he had read the distressing letter. With that conviction he now rose to provide for the safe keeping of it under lock and key.

* * * * * *

Just as he had secured the letter in a private drawer of his desk, Toff came in with a card, and announced that a gentleman wished to see him. Amelius, looking at the card, was surprised to find on it the name of "Mr. Melton." Some lines were written on it in pencil: "I have called to speak with you on a matter of serious importance." Wondering what his middle-aged rival could want with him, Amelius instructed Toff to admit the visitor.

Sally started to her feet, with her customary distrust of strangers. "May I run away before he comes in?" she asked. "If you like," Amelius answered, quietly. She ran to the door of her room, at the moment when Toff appeared again, announcing the visitor. Mr. Melton entered just before she disappeared; he saw the flutter of her dress as the door closed behind her.

"I fear I am disturbing you?" he said, looking hard at the door.

He was perfectly dressed; his hat and gloves were models of what such things ought to be; he was melancholy and courteous; blandly distrustful of the flying skirts which he had seen at the door. When Amelius offered him a chair, he took it with a mysterious sigh; mournfully resigned to the necessity of sitting down. "I won't prolong my intrusion on you," he resumed. "You have no doubt seen the melancholy news in the evening papers?"

"I haven't seen the evening papers," Amelius answered; "what news do you mean?"

Mr. Melton leaned back in his chair, and expressed emotions of sorrow and surprise, in a perfect state of training, by gently raising his eyebrows.

"Oh dear, dear! this is very sad. I had hoped to find you in full possession of the particulars—reconciled, as we must all be, to the inscrutable ways of Providence. Permit me to break it to you as gently as possible. I came here to inquire if you had heard yet from Miss Regina. Understand my motive! there must be no misapprehension between us on *that* subject. There is a very serious necessity—pray follow me carefully—I say, a very serious necessity for my communicating immediately with Miss Regina's uncle; and I know of nobody who is likely to hear from the travelers, so soon after their departure, as yourself. You are (in a certain sense) a member of the family——"

"Stop a minute," said Amelius.

"I beg your pardon?" said Mr. Melton, politely, at a loss to understand the interruption.

"I didn't at first know what you meant," Amelius explained. "You put it, if you will forgive me for saying so, in rather a roundabout way. If you are alluding, all this time, to Mrs. Farnaby's death, I must honestly tell you that I know of it already."

The bland self-possession of Mr. Melton's face began to show signs of being ruffled. He had been in a manner deluded into exhibiting his conventionally-fluent eloquence, in the choicest modulations of his sonorous voice—and it wounded his self-esteem to be placed in a ridiculous position. "I understood you to say," he remarked, stiffly, "that you had not seen the evening newspapers."

"You are quite right," Amelius rejoined; "I have not seen them."

"Then may I inquire," Mr. Melton proceeded, "how you became informed of Mrs. Farnaby's death?"

Amelius replied with his customary frankness. "I went to call on the poor lady this morning," he said, "knowing nothing of what had happened; I met the doctor at the door; and I was present at her death."

Even Mr. Melton's carefully-trained composure was not proof against the revelation that now opened before him. He burst out with an exclamation of astonishment, like an ordinary man.

"Good heavens, what does this mean?"

Amelius took it as a question addressed to himself. "I'm sure I don't know," he said, quietly.

Mr. Melton, misunderstanding Amelius, on his side, interpreted those innocent words as an outbreak of vulgar interruption. "Pardon me," he said, coldly. "I was about to explain myself. You will presently understand my surprise. After seeing the evening paper, I went at once to make inquiries at the address mentioned. In Mr. Farnaby's absence, I felt bound to do this as his old friend. I saw the landlady, and (with her assistance) the doctor also. Both these persons spoke of a gentleman who had called that morning, accompanied by a young lady, and who had insisted on taking the young lady up-stairs with him. Until you mentioned just now that you were present at the death, I had no suspicion that you were 'the gentleman.' Surprise on my part was, I think, only natural. I could scarcely be expected to know that you were in Mrs. Farnaby's confidence about the place of her retreat. And with regard to the young lady, I am quite at a loss to understand——"

"If you understand that the people at the house told you the truth, so far as I am concerned," Amelius interposed, "I hope that will be enough. With regard to the young lady, I must beg you to excuse me for speaking plainly. I have nothing to say about her to you or to anybody."

Mr. Melton rose with the utmost dignity and the fullest possession of his vocal resources.

"Permit me to assure you," he said, with frigidly fluent politeness, "that I have no wish to force myself into your confidence. One remark I will venture to make. It is easy enough, no doubt, to keep your own secrets when you are speaking to me. You will find some difficulty, I fear, in pursuing the same course, when you are called upon to give evidence before the coroner. I presume you know that you will be summoned as a witness at the inquest?"

"I left my name and address with the doctor for that purpose," Amelius rejoined, as composedly as ever; "and I am ready to bear witness to what I saw at poor Mrs. Farnaby's bedside. But if all the coroners in England questioned me about anything else, I should say to them just what I have said to you."

Mr. Melton smiled with well-bred irony. "We shall see," he said. "In the meantime, I presume I may ask you (in the interests of the family) to send me the address on the letter as soon as you hear from Miss Regina. I have no other means of communicating with Mr. Farnaby. In respect to the melancholy event, I may add that I have undertaken to provide for the funeral, and to pay any little outstanding debts, and so forth. As Mr. Farnaby's old friend and representative——"

The conclusion of the sentence was interrupted by the appearance of Toff, with a note. "I beg your pardon, sir, the person is waiting," he said, giving the note to his master. "She says it's only a receipt to sign; the box is in the hall."

Amelius examined the inclosure. It was a

Digitized by Google

formal document, acknowledging the receipt of Sally's clothes, returned to her by the authorities at the Home. With a glance at the door of Sally's room, Amelius took a pen to sign the receipt. Mr. Melton, observing him, prepared to retire. "I am only interrupting you," he said. "You have my address on your card. Good-evening."

He passed an elderly woman, waiting in the hall. Toff, hastening before him to open the garden gate, was saluted by the gruff voice of a cabman outside. The person whom the cabman had driven to the cottage had not paid him his right fare; he wanted his money, or the person's name and address. Quietly crossing the road, Mr. Melton heard the woman's voice next; she had got her receipt, and had followed him out. In the dispute about fares and distances that ensued he heard, more than once mentioned, the name of the Home and of the locality in which it was situated.

Later in the evening, he looked in at his club; consulted a directory; and drew the obvious conclusion that he had discovered an inmate of an asylum for lost women, in the house of the man to whom Regina was engaged to be married.

The next morning's post brought to Amelius a letter from Regina. It was dated from an hotel in Paris. Her "dear uncle" had overestimated his strength. He had refused to stay and rest for the night at Calais; and he suffered so severely from the fatigue of the long journey that he had been confined to his bed since his arrival. The English physician consulted had declined to say when he would be strong enough to travel again; the constitution of the patient must have received some serious shock; he was brought very low. Having carefully reported the new medical opinion, Regina was at liberty to indulge herself, next, in expressions of affection, and to assure Amelius of her anxiety to hear from him as soon as possible. But in this case again, the "dear uncle's" convenience was still the first consideration. She reverted to Mr. Farnaby in making her excuses for a hurriedly-written letter. The poor invalid suffered from depression of spirits; his great consolation in his illness was to hear his niece read to him; he was calling for her, indeed, at that moment. The inevitable postscript warmed into a mild effusion of fondness. "How I wish you could be with us. But, alas, it cannot be!"

Amelius copied the address on the letter, and sent it to Mr. Melton immediately.

It was then the twenty-fourth day of the month. The tidal train did not leave London early on that morning, and the inquest was deferred, to suit other pressing engagements of the coroner, until the twenty-sixth. Mr. Melton decided (after his interview with Amelius) that the emergency was sufficiently serious to justify him in following his telegram to Paris. It was clearly his duty, as an old friend, to mention to Mr. Farnaby what he had discovered at the cottage, as well as what he had heard from the landlady at the lodgings; leaving the uncle to act as he thought right in the interests of the niece. Whether that course of action might not also serve the interests of Mr. Melton himself (in the character of an unsuccessful suitor for Regina's hand), Mr. Melton did not stop to inquire. Beyond his duty, it was, for the present at least, not his business to look.

That night, the two gentlemen held a private consultation at Paris; the doctor having previously certified that his patient was incapable of supporting the journey back to London, under any circumstances.

The question of the formal proceedings rendered necessary by Mrs. Farnaby's death having been discussed and disposed of, Mr. Melton next entered on the narrative which the obligations of friendship imperatively demanded from him. To his astonishment and alarm, Mr. Farnaby started up in the bed like a man panic-stricken. "Did you say," he stammered, as soon as he could speak, "you meant to make inquiries about that—that girl?"

"I certainly thought it desirable, bearing in mind Mr. Goldenheart's position in your family."

"Do nothing of the sort! Say nothing to Regina or to any living creature. Wait till I get well again—and leave me to deal with it. I am the proper person to take it in hand. Don't you see that for yourself? And, look here! there may be questions asked at the inquest. Some impudent scoundrel on the jury may want to pry into what doesn't concern him. The moment you're back in London, get a lawyer to represent us—the sharpest fellow that can be had for money. Tell him to stop all prying questions. Who the girl is, and what made that cursed young Socialist Goldenheart take her up-stairs with him—all that sort of thing has nothing to do with the manner in which my wife met her death. You understand? I look to you, Melton, to see yourself that this is done. The less said at the infernal inquest the better. In my position, it's an exposure that my enemies will make the most of, as it is. I'm too ill to go into the thing any further. No; I don't want Regina. Go to her in the sitting-room, and tell the courier to get you something to eat and drink. And, I say! for God's sake, don't be late for the Boulogne train to-morrow morning."

Left by himself, he gave full vent to his fury; he cursed Amelius with oaths that are not to be written.

He had burnt the letter which Mrs. Farnaby had written to him on leaving him for ever; but he had not burnt out of his memory the words which that letter contained. With his wife's language vividly present to his mind, he could arrive at but one conclusion, after what Mr. Melton had told him. Amelius was concerned in the discovery of his deserted daughter; Amelius had taken the girl to her dying mother's bedside. With his idiotic Socialist notions, he would be perfectly capable of owning the truth if inquiries were made. The unblemished reputation which John Farnaby had built up by the self-seeking hypocrisy of a lifetime was at the mercy of a visionary young fool, who believed that rich men were created for the benefit of the poor, and who proposed to regenerate society by reviving the obsolete morality of the Primitive Christians. Was it possible for him to come to terms with such a person as this? There was not an inch of common ground on which they could meet. He dropped back on his pillow in despair, and lay for a while frowning and biting his nails. Suddenly he sat up again in the bed, and wiped his moist forehead, and heaved a heavy breath of relief. Had his illness obscured his intelligence? How was it he had not seen at once the perfectly easy way out of the difficulty which was presented by the facts themselves? Here is a man engaged to marry my niece, who has been discovered keeping a girl at his cottage—who even had the audacity to take her up-stairs with him when he made a call on my wife. Charge him with it in plain words; break off the engagement publicly in the face of society; and, if the profligate scoundrel tries to defend himself by telling the truth, who will believe him—when the girl was seen running out of his room, and when he refused, on the question being put to him, to say who she was?

So, in ignorance of his wife's last instructions to Amelius—in equal ignorance of the compassionate silence which an honorable man preserves when a woman's reputation is at his mercy—the wretch needlessly plotted and planned to save his usurped reputation; seeing all things, as such men invariably do, through the foul light of his own inbred baseness and cruelty. He was troubled by no retributive emotions of shame or remorse, in contemplating this second sacrifice to his own interests of the daughter whom he had deserted in her infancy. If he felt any misgivings, they related wholly to himself. His head was throbbing, his tongue was dry; a dread of increasing his illness shook him suddenly. He drank some of the lemonade at his bedside, and lay down to compose himself to sleep.

It was not to be done; there was a burning in his eyeballs; there was a wild, irregular beating at his heart, which kept him awake. In some degree, at least, retribution was on the way to him already. Mr. Melton, delicately administering sympathy and consolation to Regina—whose affectionate nature felt keenly the calamity of her aunt's death—Mr. Melton making himself modestly useful by reading aloud certain devotional poems much prized by Regina, was called out of the room by the courier. "I have just looked in at Mr. Farnaby, sir," said the man, "and I am afraid he is worse."

The physician was sent for. He thought so seriously of the change in the patient that he obliged Regina to accept the services of a professed nurse. When Mr. Melton started on his return journey the next morning, he left his friend in a high fever.

(*To be continued.*)

THE VICE-ROYAL VISIT TO QUEBEC.

HIS EXCELLENCY THE MARQUIS OF LORNE and Her Royal Highness the Princess Louise reached Quebec early on the morning of Wednesday, June 4th, and made an official landing from the steamer at 10:30. Although a severe storm of rain prevailed at the time, the streets were crowded with spectators, and there was a grand display of flags and banners, not only on the shipping in the harbor, but in the city.

The Vice-royal party were received by the Mayor, and as soon as they touched the wharf, the troops forming the three guards of honor (B Battery, the Eighth Royal Rifles and the Ninth Battalion) gave a royal salute; the bands played the national anthem, and twenty-one guns were fired from the citadel. The party were immediately conveyed to the pavilion, where were assembled the City Councillors' Reception Committee and other dignitaries. The Mayor rose and read the address of welcome in behalf of the Corporation, to which the Governor-General replied in French. After this formal ceremony, the members of the Reception Committee and the City Council were then presented to His Excellency and Her Royal Highness, and the ceremony on the wharf was concluded with a presentation to the Princess, by Madame Baillargé, of a bouquet in a beautiful silver holder, the gift of the city.

At 11:30, the Vice-royal party arrived at the quarters specially prepared for them in the famous citadel which they will occupy during their visit. A guard of honor has been established at the citadel and much military activity prevails. The apartments occupied by the Marquis and the Princess have undergone but little transformation since Lord Dufferin and suite were housed there, but all the changes effected have been after plans devised by the Princess. A beautiful carpet, in one piece, which covers the drawing-room, was made in England from a painted design of Her Royal Highness. Besides the apartments reserved for the Governor-General and suite, others have been put in readiness for the father and two sisters of His Excellency—the Duke of Argyll and Lady Mary Campbell and Lady Elizabeth Campbell—who reached Quebec on Monday, June 9th, from Niagara Falls and Montreal.

The City of Quebec is composed of two towns, the lower and the upper—the lower, skirting the river, is built for the most part on piles; its quays are crowded with merchantmen and ocean steamers; the streets are narrow, close together, but lined with large, massive stores, in which are displayed the silks, velvets and fine linens, the gems, pearls and gold, of Europe and of the further East. Here, too, are the Custom Houses, the Queen's bonded warehouses and the public appraisers' offices, all of stone, and erected in the most substantial and enduring manner. The upper town is several hundred feet above the lower, is built upon a rock like the nest of an eagle, and is surrounded throughout the whole extent by a long and lofty wall bristling with cannon, and was formerly entered alone by gates. One of these, St. John's gate, is alone standing. It is the proper thing for the tourist, the moment the vessel is moored at the quay, to disembark hastily and hurry to the lofty platform of Dufferin Terrace.

The eagerness is well repaid. Behind the upper city, with its palaces and steeples, on the right hand, lie the great granite fortifications bristling with cannon; hundreds of feet below lies the lower city, its streets looking like lines of thread, its houses like the peaked tops of henroops, its carriages and horses like snails. Beyond this the great river, with its fleets of merchantmen and ocean steamers; beyond this again a broad and beautiful bay; beyond this the fair young city of Point Levi, with its domes and spires; beyond this a green-clad plain; beyond this the mountains, growing purple in the morning light. On the left the waters of the St. Charles are seen mingling with those of the St. Lawrence; further on the long and fertile valley of the St. Charles, with its cottages and mansions; the Falls of Montmorency, and the lofty heights of Beauford and the Island of Orleans; beyond this a broad and rich country, and far, far away, in the dim distance, the purple tops of the long and lofty range of the Laurentine Mountains.

SCIENTIFIC INTELLIGENCE.

Dr. Tempel, of Florence, has announced the discovery of a double nebula, observed on March 14th, near the nebula Herschel II., 32. It was at first supposed to be a faint comet.

The Farmers of Victoria, Australia, are so desirous of acquiring a knowledge of agricultural chemistry that they travel 40 or 50 miles to hear Mr. MacIvor, formerly of Anderson's College, Glasgow, Scotland, lecture on the subject.

Mr. Keith Johnson, the chief of the English expedition to Eastern Africa, has taken into his service Chuma, the old companion of Dr. Livingstone, and a man who, without doubt, will carry the explorer over many difficulties which would otherwise, perhaps, be insurmountable.

The Congress of Commercial Geography, to be held at Brussels in September, will be presided over, not by M. Hamps, but by Lieutenant-General Liagre, President of the Belgian Geographical Society and perpetual Secretary of the Belgian Academy of Sciences. M. du Fief will act as secretary.

The Italian Authorities and public are awakening to the necessity of taking steps to ameliorate the sanitary condition of Rome, where the death rate is from 35 to 36 in the 1,000 to 22 in London. Such a course is rendered the more imperative by the growing population. In 1874 it was 248,000; now it is 270,000.

News has been Received from Japan that two very rich seams of coal have just been discovered in the celebrated Takashima mines. It is estimated that they will produce fully a million tons of coal. It is also reported that active measures are being taken for throwing open to foreign commerce the ports of Tsuruga and Shimonoseki.

The New Nautical Instrument, the navisphere, has been brought to the attention of the French Academy. It indicates without calculation the names of the stars above the horizon at a given moment, with altitude and azimuth, the angle of route for going from one point to another by the arc of a great circle, and the distance between these points, etc.

A British Naval Surgeon, Dr. Beveridge, states that for foreign bodies in the throat, such as pieces of meat, etc., a simple mode of relief is to blow forcibly into the ear. This excites powerful reflex action, during which the foreign body is expelled from the trachea. The plan is so easy of execution that, if there is anything in it, it ought to be generally known and applied.

The International Congress of Americanists will be held in Brussels from September 23d to 26th, under the patronage of the King of Belgium and the presidency of the Count of Flanders. The object of the Society of Americanists is to promote a knowledge of the early history of discovery and settlement on this continent, and to collect all such facts of a prehistoric kind as may be learned from ruins of ancient structures, etc.

The Russian Grain Crops are suffering from the ravages of a small coleopterous insect which propagates with great rapidity. In 1877 a reward was offered in some localities of ten copecks for every quart of the insect collected, and 10,000,000 roubles were paid out in accordance with the proclamation. One-third of the entire wheat crop in Southern Russia is threatened. Very little is yet known of the habits or customs of the insect.

The Cricket Invasion of Algeria in 1866 cost the Government 5,000,000 francs, and 200,000 of the natives died of starvation. A single band of these animals was estimated to contain 50,000 tons of them, and the nitrogen of them to weigh 1,000. Nets have been patented in France, so that in case of another invasion this valuable manurial agent may not be lost. The crickets are caught in the angles of the nets and fall down into a pit, where they are to be treated with green vitriol.

The Latest Reports of the excavations at Olympia show that the Helot habitations to the south and southeast of the Temple of Zeus were particularly dense and extensive. Besides this, some very important additions to the sculptures of the pediment group have been found; among them the body of the centaur who steals the boy, a large portion of the recumbent old man, and an arm of one of the Lapithæ. All these are being cast in plaster, and are to be removed to Berlin shortly and fitted into their respective places.

A Leading English Paper Manufacturer is endeavoring to induce capitalists to utilize the jungles of bamboo in India and British Burmah. The young shoots of the jungle grass yield a fibre excellently adapted to paper-making, and at a cost, compared with esparto grass, in the proportion of $7.50 to $60 a ton. The latter grass comes principally from Algeria and other Barbary States, and, in addition to being unsatisfactory in quality, a sufficient quantity cannot be obtained. English paper-makers are, therefore, often driven to manufacture with wood fibre and China clay.

Herr Carl Bock, who, at the request of the late Marquis of Tweeddale, has spent eight months in exploring the highlands of Sumatra, has returned to Padang with a rich collection of natural history specimens. Among other living animals he has secured a specimen of the *Capricornis sumatrensis*, which is peculiar to the island. It is a species of mountain antelope, rarely met with, and only among the most remote and almost inaccessible peaks. Herr Bock was traveling in Lapland in the Autumn of 1877, under the 71st parallel of north latitude. The Autumn of 1878 was spent by him under the first parallel of south latitude.

Cholera has been making fearful havoc among the pilgrims returning from the Hurdwar fair, and is being spread by them through Northern India. It is asserted that between 20,000 and 30,000 hillmen from the Himalayan districts near Nynee Tal died on their homeward journey. Several cases, most of them fatal, appeared among the Fifteenth Hussars almost immediately after their arrival at Meerut from Candahar, and it is supposed that the outbreak is due to some men having traveled from Moolan in railway carriages which had been used by infected pilgrims. The disease has appeared in most cities of the Punjab, and the fear of the spread of the epidemic to Peshawur has induced the authorities to remove the greater portion of the garrison there.

PERSONAL GOSSIP.

GUZMAN BLANCO was installed as Provisional President of Venezuela on May 12th.

THE venerable Simon Cameron is engaged in running a tobacco farm at Lancaster, Pa.

W. B. RICHMOND is the name of Mr. Ruskin's successor as the Slade Professor of Fine Arts at Oxford.

GENERAL F. C. LATHROP has been renominated by acclamation as the Democratic candidate for Mayor of Baltimore.

MISS BETTIE EVARTS, one of the Secretary's daughters, a graceful, blonde young lady, is engaged to marry Mr. Edward Perkins, of Boston.

JAMES ORTON WOODRUFF, the projector of the Woodruff Scientific Expedition around the world, died in New York on June 4th, of brain-fever, induced by overwork and the failure of his costly scheme. He was thirty-nine years of age.

M. WALLON, formerly the French Minister of Public Instruction, is spoken of as a candidate for a seat in the Academy. He is often called the "Father of the Constitution," and his principal literary work is the "Life of Joan of Arc."

SENOR DON EMILIO CASTELAR has requested permission to postpone his lectures on Spanish Literature, at the Taylor and Randolph Institution, until the next term, on account of ill-health and his inability to quit the Cortes while the Cuban slavery question is under discussion.

THE Rev. Olympia Brown-Willis, pastor of the Church of the Good Shepherd at Racine, Wis., has received a vote of thanks from the church for the manner in which she has performed her duties during the last year, and an invitation to act as pastor for another year, with an increased salary.

THE Rev. Henry L. Morehouse, pastor of the East Avenue Baptist Church of Rochester, N. Y., has accepted the office of corresponding secretary of the American Baptist Home Mission Society, to which he was elected at the Saratoga meeting of the society, and entered upon his new duties.

THE ex-King of the Loo-Choo Islands, who was recently summoned to Japan, pleads illness, and has sent his eldest son, fifteen years of age, in his place. He has been received by the Mikado and ordered to await the arrival of his father in Tokio, when both will be invested with rank and title as Japanese noblemen of the highest class.

PROFESSORS GOODWIN AND GREENOUGH, of Harvard College; Professors Whitney and Carter, of Yale College; Dr. Kendrick, of Washington University; Dr. Willing, President of Columbian College, Washington, D. C.; Professor Short, of Columbia College, New York, and many others, will attend the annual session of the American Philological Association which will begin at Newport, R. I., on the 15th of June.

THE Turkish Ambassador, M. MUSURUS, is Dean of the foreign envoys accredited to London, where he has represented Turkey some forty years. He is much more an Englishman than a Turk, and one of his daughters is married to Mr. Heriot (son of an Episcopal clergyman), whose sister married Lord Wentworth, Byron's grandson. The Turkish Embassy is a very large abode in Bryanston Square, north of Hyde Park.

GENERAL JAMES SHIELDS, late United States Senator from Missouri, died suddenly at Ottumwa, Ia., on June 1st. Throughout the day he appeared in his usual health, ate a hearty supper at six o'clock, and wrote several letters; but just before retiring he complained of a pain in the chest, and soon thereafter said to his niece that he was dying, and in thirty minutes expired sitting in his chair, remaining conscious to the last. He lectured at Ottumwa on the previous Wednesday, and had remained visiting relatives.

MAJOR CAVAGNARI, the distinguished Indian officer who negotiated the terms of peace with Yakoob Khan at Gundamuk, is an Englishman by birth, his father having been a Genoese, who came to settle in London from the north of Italy after the overthrow of the French Empire. He entered the military service of the East India Company in April, 1858. For his service on the frontier he was recommended by Lord Mayo for a Companionship in the Order of the Star of India, which decoration was conferred on him on January 1st, 1877. He was last year appointed second member of Sir Neville Chamberlain's mission to Cabul.

DR. PIERRE ADOLPHE PIORRY, the eminent French medical writer, whose death has been announced, was born at Poitiers, December 21st, 1794, and received his degree of Doctor of Medicine at Paris in 1816. Progressive in his views, he did much in improving medical science and practice, and attained the position of being one of the foremost physicians in France. He held several important positions in connection with the hospitals, was a member of the Academy of Medicine and an officer of the Legion of Honor. A number of valuable medical works have been produced by his pen, and he was also given to poetical composition.

THE concessions of Governor General Aleko Pasha in not hoisting the Turkish flag and not wearing the fez cap have produced a very bad effect at Constantinopel, especially on the Sultan, who seems to attach far greater importance to these matters than his ministers. The Sultan is said to be determined to insist on the hoisting of the Turkish flag. It is said that stringent instructions to that effect have already been sent to Aleko Pasha. It is also intended to lay the case before the Powers. Aleko's conduct is considered insulting, and as a first step in a movement which in the end will render the Porte's authority altogether illusory.

GOVERNOR DREW, of Florida, has a handsomely improved farm of 60,000 acres near Ellaville, and employs four hundred men in cutting logs and sawing them into lumber. His employés live in neat cottages built by him, for which he charges no rent. He is now constructing a tramway eight miles in length into the timber, and the trees of convenient access to it will be felled and the logs conveyed by it to his mill. When the trees are exhausted on this line the tramway will be removed and run out in another direction. The lumber is taken in cars to Jacksonville, and there placed in schooners for New York, twelve or fifteen of which are loading or under way all the time. The Governor is a native of New Hampshire.

THE late William Sloane, of New York, bequeathed to the Rev. Dr. John Hall, of the Fifth Avenue Presbyterian Church, $20,000; to the Presbyterian Board of Foreign Missions, $30,000; to the Presbyterian Board of Domestic Missions, $20,000; to the Presbyterian Board of Church Sustenation, $10,000; to the Presbyterian Board of Church Extension, $10,000; to the Presbyterian Ministerial Relief Association, $10,000; to the Presbyterian Home for Aged Women, $5,000; to the American Sunday-school Union, $10,000; to the New York Tract Society, $5,000; to the Seamen's Society, $5,000; to St. Andrew's Society, $5,000; to the New York Bible Society, $20,000. A notable feature of the will is a bequest of about $35,000, divided among ten or fifteen persons who had been in his employ. Some of these were associated with him for nearly a quarter of a century. The bequests to this class of legatees range from $500 up to $5,000.

THE PLANTATION ON THE SHORES OF LAKE KILLARNEY — BUYERS MEASURING THE STANDING FRUIT.

THE PINE-APPLE TRADE IN THE BAHAMAS.

By MRS. FRANK LESLIE.

DURING our recent trip to Nassau and the Bahama Islands, the artist and I spent a very enjoyable day amongst the pines—not those odoriferous trees beneath whose turpentine shades consumptive invalids ebb their life-breath away, but in the midst of fragrant pine-apples, which we visited on their native heath, criticised in the bud, admired in the stem, and tasted in the—can. Hiring a conveyance in Nassau, we drove five miles to a picturesque plantation, situated on the shores of an exquisite sheet of water, smooth as a mirror and glittering with sun-sparks, called Lake Killarney, which, from its strong family resemblance, is evidently a near relative to those celebrated lakes over the beauties of which the American tourist so fondly loves to linger. We found the plantation quite an original and peculiar sight, the leaves, blossoms, and young fruit all brilliantly colored in green, purple, pink and yellow, each pine seated royally upon its throne of sword-like leaves, and ripening in a leisurely and arrogant fashion of its own, promising maturity about midsummer.

The overseer received us most courteously, and our tour, like that of one of Cook's, was "personally conducted." With considerable prickings, not of conscience, but of the spiky and vicious thorns bristling upon the sword-like leaves, we plunged through acres of pines, admiring the coniferous plants, now stopping to "tap" a prize specimen of a glorious orange-yellow, suggestive of golden syrup; now halting to criticise a sucking youngster, still green, but promising great things. The dealers pass through plantations much as we did, making notes of area, space, size and condition of the plants. Measurements are taken, calculations are made and entered in a book kept for that purpose; estimates are rapidly conjectured as to ripening, and agreements ratified on the spot.

The overseer of this plantation estimates that he shall cut from seventy to eighty thousand dozen pines this year, and informed us that during last season fifteen cargoes of fresh fruit, and forty thousand dozen cans of preserved pine-apples were shipped by the owner of the estate.

The fruit trade of these Islands is quite large, but carried on in a desultory and uncertain fashion; oranges, lemons, bananas, pine-apples and cocoanuts are the principal exports; the softer fruits, as sapodillos, guavas, mammées, alligator pears, soursops, Jamaica apples, grape-fruits, star apples and several other varieties, being mostly consumed at home.

The most extensive orchards are on the other islands of the group known here as the Outside Islands, and trading schooners go round from island to island, collecting their cargoes piecemeal and making separate bargains with each fruit-grower.

We boarded a sloop trading in pines, and it was as good as "Pinafore" to hear that captain sing out. Surrounded by gesticulating darkeys, picturesquely attired and in animated groups, each particular darkey having pine-apples to dispose of, and each howling at the top of his or her voice: "Dar's de pine for de money," "Here's lubbly fruit," "Take dis one, cap," "Dere's juice for ye, honey," "Growed 'em myself, cap," "Dar ain't such pines as dese on d'island," "Gib dis child a chance, cap," the captain, roaring louder than the chorus, named his lowest price, and in spite of entreaties, suggestions, denunciations, howls of scorn, expressions of contempt, and other indications of popular resentment, held on to his cder; and ere we quitted the deck of his tight little craft her hold was crammed full of the selected apples. "I guess I'll lose thirty per cent. on the voyage," observed the captain, "but you see, gents, I bought at low water from those blamed niggers."

We visited the extensive canning firm of Smith & Wicks, of Baltimore, situated on Bay Street, in Nassau, which, during the year 1878, canned 700,000 pines. This firm do a very large foreign trade, especially with England and Scotland—nor is Germany at all satisfied with the quantity they are at present enabled to send her. Their brand is the "Bahama Brand," the agents for England being A. W. Latham & Co., London, and for Germany, Schmidt, Silcox & Co., Bremen. The process of canning pines is somewhat elaborate. The ripe fruit is brought in from the surrounding plantations on donkey-carts, or it is delivered at the wharf from boats coming from the Outside Islands, the natives bearing it on their shoulders in baskets to the shore, where it is somewhat unceremoniously dumped beneath a shed. No pine-apple below a certain standard is ever taken. Tables are ranged along the wharf, at which women and girls stand in readiness to receive the fruit, which is handed to each "parer" in a basket, and with it a

FILLING CANS OF SLICED FRUIT WITH SYRUP.

WEIGHING THE CANS, WHEN FILLED AND SEALED.

tin check, good at the office for a certain stated amount. The "parers" operate on the tough-hided fruit with wondrous dexterity and marvelous rapidity. How they cut and slash and chop so swiftly without lopping off slices of their own flesh, is a marvel to the writer. They stand at the tables, each operator placing her pines in position, and in a few minutes the fruit is as innocent of cuticle as a billiard-ball. The ladies lighten their labors by that which is so dear to every daughter of Eve—gossip. Sometimes a song is introduced, while that peculiar laughter, so feebly imitated by even the best negro-delineators, rings and yaw-yaws, till the blue waves re-echo it to the glistening beach. In an adjoining shed, to which the pared pines are conveyed, is a long counter laden with the cans that are to travel from "Indus to the Pole." Behind this counter, and beside the cases of pared pines, stands a small regiment of "slicers," whose business it is to slice the fruit, and place it, when sliced, in the cans. This movement is one of extreme celerity, and again do we expect to see human fingers sent flying into the cans along with the yellow-white fruit disks. When the pines pass the "slicers," the cans, still open, are transferred to another department to be filled with syrup which is ladled into each by a dipper. This syrup is manufactured of pure rain-water, caught for the purpose in cisterns lined with hydraulic cement, and sugar of the very highest standard of quality. Two experts are continually employed in ladling the syrup from miniature vats into the cans. Now comes the process of sealing the tops of the cans. In a long, well-ventilated shed, several men stand opposite small charcoal furnaces. A number of cans are placed by assistants upon the shining counter, and as fast as is possible, consistent with effective work, the sealer dexterously manipulates the loosely topped cans with the fiery breath of the furnace rod which fastens on the tops, the solder doing the rest. The cans are then weighed and passed on to the boiling-room, an apartment in which we did not linger one second longer than it was absolutely necessary to the purpose of our visit. Enormous caldrons, half full of madly boiling water, stand imbedded in the floor; over each caldron tackle for lifting and lowering the iron vessel containing the cans. When the vessel is filled, it is lowered into the boiling water, where it remains until the air within each can becomes expanded—the space of four or five minutes; then the caldron is hoisted high and dry, and a hole punctured in the top of each can to permit the air to escape, this hole being instantly resoldered, when the cans are again lowered into the caldron, where they remain until the fruit is completely cooked. All these departments of labor, of course, require skill and system in execution. The labeling next takes place, after this the packing in cases, and then comes the shipment; the great house of

H. K. & F. B. Thurber & Co., in New York, taking a considerable portion of this year's packing. Thanks to the perfect system of canning and exporting the pine-apple, it is now within easy reach of poor as well as rich, and the wooden shanty and the brown-stone mansion can store this pigment delicacy with the assured convict on that at all times a delectable morsel may be summoned to aid in the development of the frugal meal, or in that of the lordly menu of fifteen courses.

ON THE ROAD TO LEADVILLE.

WEBSTER STATION, ON THE DENVER, SOUTH PARK AND PACIFIC RAILROAD.

THE barriers that have hitherto separated Leadville from the outer world are being rapidly removed through the agency of the iron horse, and the terrible hardships which beset the road of the earlier pilgrims to this silver shrine reduced to a minimum. No longer do seventy miles intervene between the city and the nearest railway station. No longer do the machinery for crushing mills, the wagons containing provisions, the vehicles conveying the *impedimenta* of embryo miners, toil up steep ascents indented with ruts "wide as a church door," or dare the desperate curves overhang ng startling precipices! We have changed all that, and to-day the shrill whistle of the locomotive may be heard by the thousands of toilers for wealth as they dig and delve and burrow in the bowels of the earth for that which means light and life. The station at Webster on the South Park and Pacific Railroad, which we illustrate on page 261, was the terminal point of the line, but on the 19th of May the first passenger train reached the Kenosha Summit, 10,140 feet above the sea level, the highest point yet attained by a railroad in North America. To-day the track-laying in the direction of Leadville goes on at the rate of a mile a day, and ere this journal meets the reader's eye trains conveying thousands—their hearts leaping with the greed of gold—will be puffing, snorting, and whistling into this wondrous, all-wondrous city.

Webster in its day—how easy it is to speak of the past in this rushing age—presented many *bizarre* and picturesque sights. The pine-clad bluffs, the rude station, the stages packed full as sardine-boxes, the teams, the wagons, the newly-arrived silver-seekers panting to push on at any cost and in any mode, the freight, the successful miners returning to civilization, the haggard questioners, the yelling freighters, the bustle, hurry, turmoil and excitement, and the thousand and one "bits of color."

Freighters who were charging six cents per pound from Webster to Leadville are now frozen out, and the thousands of horses and mules employed on this particular road will be transferred elsewhere. Leadville will, in the immediate future, be struck by three lines of railroad, and the experienced people say that there is silver for all who may elect to travel by them.

The Head of the Campbells.

THE Most Noble and Right Honorable George Douglas Campbell, eighth Duke of Argyll, born on the 30th of April, 1823, and the eldest son of John Douglas Henry Edward, seventh possessor of the dukedom since its creation, was but little more than twenty-three years of age when he succeeded to his long and magnificent array of titles, which include among them eight titles as baron, two as viscount, three as earl, two as marquis, and one as duke. The oldest barony, that of Campbell, dates back to 1445; the oldest earldom, that of Argyll, to 1457; the barony of Lorne dates back to 1475; but the most extraordinary accession of honors to the house of Campbell accrued in 1701, when the first of the house who wore the coronet of strawberry leaves was created at one and the same time Duke of Argyll, Marquis of Lorne and Kintyre, Earl of Campbell and Cowal, Viscount Lochow and Glenilla, and Baron Inverary, Mull, Morven and Tirey—all of the titles then and previously conferred upon the race being exclusively, however, in the peerage of Scotland. It was not until 1776 that a Duke of Argyll was enabled to take his place in the House of Lords, the duke at that time being created Baron Sundridge and Hamilton, in the peerage of Great Britain. It is as Lord Sundridge that the Duke of Argyll takes his seat in the hereditary branch of the Legislature.

The Duke of Argyll first took his seat in the Cabinet in 1852, when, as Lord Privy Seal, he became a member of the Coalition Ministry under Lord Aberdeen's premiership, and held that position until 1855, when Lord Palmerston made him Postmaster-General. He resigned with Ministers in 1858, and, upon the restoration of Lord Palmerston to power in 1859 was replaced in his former post as Lord Privy Seal, and retained it uninterruptedly until 1866. Under the premiership of Mr. Gladstone the Duke of Argyll accepted, in 1868, the office of Secretary of State for India, and held that important post until the downfall of the Liberal Government in 1874.

The Duke of Argyll is or has been a Knight of the Thistle, Privy Councilor, LL.D., F.R.S., Trustee of the British Museum, Chancellor of the University of St. Andrew's, Lord Rector of the University of Glasgow, and President of the Royal Society of Edinburgh; and in 1855 presided with conspicuous ability, at Glasgow, over the annual meeting of the British Association for the Advancement of Science.

The Duchess of Argyll, to whom the Duke was married in 1844, was Lady Elizabeth Georgiana Leveson-Gower, eldest daughter of the second Duke of Sutherland. The Duke and Duchess of Argyll have six daughters and five sons, of whom the eldest is the Marquis of Lorne, married to Her Royal Highness the Princess Louise of England on the 21st of March, 1871.

FUN.

WHAT is it the sad sea waves?

A MONARCH of the seine—the sheriff.

STRIKERS are popular in no business but base ball.

CLARA MORRIS has fallen and broken her hip. Her neck is the only thing about her now that isn't smashed up.

AN OLD SONG.—In one of the countries the other day Robert Guile and Mary Williams were married. Now is she "Mary of R. Guile"?

"YES," said Mrs. Goodington, "the place is so sequestrated that we are never annoyed by stray predestinations and people of that sort.

TIT FOR TAT.—Mamma to Hamilton, who has been put in the corner because he would not say "please": "You may come out now." *Hamilton:* 'Not till you say 'Please,' mother."

THE Department of the Interior has just bought for the Indian Bureau twenty-six tons of Royal Baking Powder. "Ha't raisin'" will be lively on the Plains this Summer.

IT is a beautiful sight to get up early in the morning and see the sun rise, but the wise man will continue to lie abed until the atmosphere is charged with the aroma of the breakfast coffee.

"WHAT will you take for twenty nights at San Francisco?" was the brief telegraphic query which some speculators dispatched to Sothern, the actor. "Brandy-and-water," was the prompt response.

WHEN a milliner becomes musical, she at least has the honesty to warn the public of it by a sign—"Fluting done here"; how different is the course of the young man who studies this instrument; he would play till he died—and make no sign.

ELDER sister to little one, who appears to take great interest in Mr. Skibbens: "Come, little pet, it is time your eyes were shut in sleep." *Little Pet:* "I think not. Mother told me to keep my eyes open when you and Mr. Skibbens were together."

IN New Zealand, as in California, the Chinaman abounds, and there too he has to resort to strategy to make good his position. It is related that in Otago, where Scotchmen are a majority of the colonists, a contract for grading a road was to be let, and the lowest bid was signed "M'Pherson." Notice was sent to the said M'Pherson to meet the board and complete the contract. In due time they met, but, behold, M'Pherson was yellow in hue and had an unmistakable pigtail! "But," gasped the president, "your name can't be M'Pherson?" "Allee lightee," cheerfully answered John; "nobody catch um contract in Otago unless the name Mac." The contract was signed.

FORTUNE'S FAVORITE.

AN INTERVIEW WITH A MAN WHO WON $15,000 IN THE LOUISIANA LOTTERY DRAWING.—SINGULAR COMBINATION OF CIRCUMSTANCES.

FORTUNE'S favors are not confined to any particular locality. So thought Mr. P. M. Spinelli, of Brownsville, Texas, when he invested his money in a ticket which drew $15,000 in the Louisiana Lottery. Mr. Spinelli is a lucky man, and it may interest our readers to be informed of the circumstances under which he added $15,000 to his cash account.

A representative of the *Picayune* called last evening upon this gentleman, who was found at the City Hotel. The reporter was ushered into the presence of a handsome man, with the dark hair and complexion of the Italian type, who was apparently in the prime of life, and in excellent health.

A cordial shake of the hand and pleasant greeting was the reception which the reporter encountered, which encouraged him to inquire as to the antecedents of the favorite of fortune. Mr. Spinelli stated that he was a native of Nice, and was forty-seven years of age.

Observing the reporter's particular inquiries as to his age, nativity, etc., Mr. Spinelli said: "I know what you are after; you wish to make a combination of numbers to correspond with the winning number. Well, that is simple enough. The number which drew the capital prize this month was 47,579. I am 47 years of age, and this is the 5th month of the year '79.

"There you have the figures—47, 5, 79." Continuing his narration in response to the interrogations propounded by the *Picayune* representative, Mr. Spinelli said he was a man of family, and by occupation a commission merchant.

In 1874 he went to California, returning to Brownsville five or six months ago. In California he speculated considerably, but did not strike any bonanzas like the Louisiana Lottery.

To use his own words: "Have always been a prosperous man and made some good speculations in California, but struck no such bonanzas as the Louisiana Lottery, which puts $15,000 into my cash account."

Mr. S. said that he had taken a ticket in the lottery drawing last November, and did not win anything, but he was amply repaid by his subsequent good fortune.

Being pressed to relate how he came to invest in the last drawing, he said: "I came across a two-dollar bill in Mexican currency, which is at a discount of twenty per cent. I thought I would not go to the trouble of changing it, and happening to notice in a New Orleans paper an advertisement of the drawing of the Louisiana Lottery, I wrote to the company inclosing the two-dollar bill. The mail boat having gone, I concluded to wait for the next steamer, and laid the letter on my table among a lot of papers. I had forgotten all about it until the day the steamer was about to leave.

"A gentleman who wished to send by the boat certain papers that I had, asked me if they were ready. In searching for them I noticed the letter I had written six or seven days before to the lottery company. I picked up the letter and mailed it.

"By the return steamer I did not get an answer, and, to tell you the truth, I thought the money was gobbled by some postmaster. But this turned out to be entirely incorrect.

"On May 13th, in the afternoon, about 3 o'clock, a telegram was received in Brownsville, stating that a certain number had won the $30,000 prize. I remarked jocosely that I had won the prize. I was standing in front of the Post Office when the mail-wagon arrived.

"As soon as the mail was distributed I went to my box and found a letter containing two half tickets. I returned to my residence and looked at the tickets in my room, after which I put them in my pocket and went down-stairs.

"As I was leaving the house a friend of mine stopped me and said that the number telegraphed was not the correct one. He showed me No. 47,579 written on his shirt-cuff, which he said was the correct number winning the capital prize.

"I looked at my ticket, and saw I had won, but I did not let everybody know it. I kept mum, and the next morning I started for New Orleans. I arrived here yesterday, and to-day I went to the office of the Lottery Company. They gave me a check for $15,000 as soon as I presented my ticket, and to-morrow morning I return to Brownsville richer by that amount.

"As I have to get up early in the morning, I will bid you good-night, and hope that you may have as good luck as I have had."

With these words Mr. Spinelli withdrew to prepare for an early start this morning.—*New Orleans Picayune, May 23d.*

BY AUTHORITY OF THE STATE.
GEN. G. T. BEAUREGARD, OF LOUISIANA,
GEN. JUBAL A. EARLY, OF VIRGINIA,

have personally arranged all details of the extraordinary Semi-Annual Drawing of the Louisiana State Lottery Company. New Orleans, Tuesday, June 17th. 11,279 prizes, amounting to $522,500, including one Capital Prize of $100,000; one Grand Prize of $50,000; one Grand Prize of $20,000, etc. Tickets, ten dollars ($10); Halves, five dollars ($5); Fifths, two dollars ($2); Tenths, one dollar (1).

Write for circulars, or send address to M. A. DAUPHIN, P. O. Box 692, New Orleans, La., or same at 319 Broadway, New York.

LOST SEVEN POUNDS IN THREE WEEKS.

ALLAN'S ANTI-FAT is a genuine medicine, and will reduce corpulency from two to five pounds per week. Purely vegetable and perfectly harmless, acting entirely on the food in the stomach, preventing the formation of fat. It is also a positive remedy for dyspepsia and rheumatism.

BOSTON, MASS., Feb. 11th, 1878.

BOTANIC MEDICINE CO., Buffalo, N. Y.:

Gentlemen—The lady alluded to lost seven pounds in three weeks, by the use of Allan's Anti-Fat.

Yours truly, SMITH, DOOLITTLE & SMITH, Wholesale Druggists.

A CLEVER contemporaneous writer instances three paramount illustrations of great executive faculty and knowledge: To lead a grand army successfully in the field; to conduct a great manufacturing establishment, and the competent management of a vast hotel. Had he descended to further detail, the ST. NICHOLAS HOTEL of New York would have been singled out. No hotel in the country has a higher and better-deserved reputation.

PARENTS, do not use vile drugs or nostrums in your families, but use pure Hop Bitters.

VISITORS to the White Mountains will find pleasant reading and valuable information in *The White Mountain Echo and Tourist's Register*, a weekly Summer paper, published during the season at Bethlehem, New Hampshire. The leading features of this paper are: A complete directory of guests in the White Mountains and on the shores of Lake Winnipesaukee; full information concerning hotels, boarding-houses, railroads, stages, mails, church-services, tourists' movements, social doings, etc., and local sketches, incidents of travel, and other pleasant Summery articles. The editor is a blind man, but he admirably succeeds in seeing just what the tourists want. The paper is neatly gotten up, and is newsy, bright and sparkling.

PHOTOGRAPHY can give us only the images of the flowers, but in MURRAY & LANMAN'S FLORIDA WATER, chemistry has preserved their aromatic essence. It is literally the bottled breath of the most fragrant products of the richest floral region in the world.

THE ANGOSTURA BITTERS have been upon the market nearly half a century, and the longer they are used the more firmly do they become grounded in popular estimation. They do not intoxicate, but tone up the nervous system, enabling the vital organs to perform their functions with the greatest efficiency. Many physicians prescribe the Angostura Bitters regularly.

GOURAUD'S ORIENTAL CREAM has been tested more than a quarter of a century by the very élite of American and continental society. While its naturalness of operation is such that the use of the cosmetic is not suspected, it is entirely certain to beautify the face and impart the evidence of refinement and culture. It meets the wants of refined ladies who require a harmless, efficient beautifier.

THE vigor of youth given to the aged and infirm by using Hop Bitters. Try it.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Sold only in soldered tins, labeled,

Dr. T. Felix Gouraud's

ORIENTAL CREAM,

Or Magical Beautifier, removes every blemish on beauty; it elicits a clear, transparent complexion, free from tan, freckles, or moth-patches. The most popular for the skin ever invented; accept no cream of similar name. Indorsement of GOURAUD'S ORIENTAL CREAM by the distinguished Dr. L. A. Sayre: A lady of the *haut ton*, a patient of Dr. Sayre, discoursing on the use of cosmetics, he remarked to the lady: "*As you ladies will use them, I recommend 'Gouraud's Oriental' as the least harmful of all the skin preparations.*'" "Praise from Sir Hubert is praise indeed." Indorsed by the fashionable world.

MME. M. B. T. GOURAUD, Sole Proprietor, 48 Bond Street, New York.

FOR SALE BY ALL DRUGGISTS AND FANCY GOODS DEALERS.

The Universally Popular Illustrated Family Journal.

Frank Leslie's

CHIMNEY CORNER.

Brilliant in its Literary and Artistic Attractions.

The CHIMNEY CORNER has maintained its superiority over all its competitors, in every department, for fourteen years past. It occupies a field which no other journal attempts to fill, and is in all respects a decidedly unique publication, appealing to all classes and all tastes.

New Serial Novels are produced in rapid succession, from the pens of such popular writers as—John Habberton, author of "Helen's Babies"; N. Robinson, author of "That Mother-in-Law of Mine." "The Junior's Daughter," etc.; Rita W. Pierce; Christian Reid; Meta Victoria Victor, author of "The Dead Secret"; M. T. Caldor; Frank Lee Benedict; J. W. De Forest; Corry Carew, author of "Belle Boddin of Bairdsden"; Prof. H. C. De Mille, and others of equal celebrity.

The Short Stories are completed in each number, and are of a domestic, humorous and sentimental character. There are agreeably instructive articles for the home circle; Biographies of Prominent Public Characters; Curiosities of Travel; Manners and Customs of Different Nations; the Marvelous in Art and Nature; Poetry; Essays; Anecdotes, etc., etc.

Each Number contains sixteen pages of reading matter, with eight pages of admirably executed illustrations.

Beautiful Steel Engravings are frequently presented to the subscribers, far exceeding in value the price of a year's subscription.

Published every Monday, and for sale by all newsdealers, price 10 cents. Annual subscription, $4. Three months, $1. Sent postpaid.

Attractive, Useful & Instructive Reading for Everybody.

Frank Leslie's
SUNDAY MAGAZINE.
CONDUCTED BY
REV. CHARLES F. DEEMS, D.D., LL.D.

OPINIONS OF THE PRESS:

"The best, cheapest and most attractive magazine ever published in this country."—*Christian Advocate, Buffalo.*

"It is capitally and profusely illustrated throughout, and contains interesting matter upon almost every conceivable subject. . . . We cordially commend the SUNDAY MAGAZINE to the favor of our readers. No publication conducted by Dr. Deems can fail to amuse, interest, instruct and improve its readers. More we cannot say."—*The Observer, Raleigh, N. C.*

". . . Contains much reading matter for a low price, each number having considerably over one hundred pages. It is very fully illustrated, and the articles are many and miscellaneous in their character. Religious matter, plenty of stories, sketches of travel and adventure, articles concerning strange nations, and curious and interesting odds and ends of all kinds, are found between its covers."—*Courier, Gt. Barrington, Mass.*

"FRANK LESLIE'S SUNDAY MAGAZINE is again in hand. The present number is up to the very high standard of all its predecessors."—*Wilmington (N. C.) Presbyterian.*

". . . It has been constantly growing in public favor, and each number has been an improvement on its predecessor. It should be introduced to every family, for the pure and healthful literature cannot fail to exercise a highly beneficial influence."—*Kansas City (Mo.) Times.*

". . . Deserves all the encomiums pronounced upon its predecessors, with the additional remark that wherein it differs from them, it is in the sense of being still nearer the mark of perfection. Profusely and elegantly illustrated, printed on fine paper, and containing the choicest matter from all available sources, it offers to the reader an investment extraordinary for his three dollars, which is the low subscription price for a year."—*Central Protestant (Greensboro, N. C.)*

The July Number Now Ready,
WITH THE FOLLOWING RICH TABLE OF CONTENTS:

Articles, Descriptive, etc.—"The Ten Primitive Persecutions" (under Nero, Domitian, Trajan and Hadrian, Marcus Aurelius, Septimius Severus, Maximilian, Decius, Valerian, Diocletian and Galerius), by Alfred H. Guernsey; 8 Illustrations. "A Chapter on Fans," by Andrew F. Gordon; Illustrated. "The Mohammedan Festival of Hossein," by H. A. Seyguera; Illustrated. "The Parsees," by Godfrey A. Hudson; Illustrated. "Quichuas, Caffres and Fijians," Illustrated. "Oporto, Portugal," Illustrated. "Sketches in Tunis," 8 Illustrations. "Around Rio de Janeiro," by Godfrey A. Hudson; Illustrated. THE
SUMMER FASHIONS
Just received from Paris, and published exclusively in
Frank Leslie's
LADY'S MAGAZINE.
THE JUNE NUMBER NOW READY,
With Accurate Descriptions of
THE NEW STYLES
Of SUMMER TOILETS, BONNETS, HATS, Etc., Etc.

The *Lyons (N. Y.) Republican*, referring to the merits of this periodical, remarks:
"FRANK LESLIE'S LADY'S MAGAZINE needs no special praise at our hands; it speaks for itself, and is a prime favorite in every household where it has ever gained a foothold. Its stories, its poetry, its sketches, its engravings, its fashions—all things about it, in fact—are first-class in their way; and, take it for all in all, we don't know of a lady's magazine in America that excels it, and few that come within cannon-shot of equaling it, in any of the departments we have mentioned. In point of cheapness it outranks them all, quality and quantity considered, its price being only $3.50 a year, postpaid."

Colored and Plain Fashion Plates are imported directly from Paris monthly exclusively for this Magazine.

The plates are beautiful impressions, colored and finished with the utmost artistic taste.

The Reports of the various changes in the styles of European toilets appear simultaneously with those in the Paris journals.
Pictures and Accurate Descriptions are also given of the
Latest American Styles of Ladies' & Children's Costumes, Hats, Bonnets, Etc., Etc.
The Literary Contents are of a varied and highly interesting character, comprising select Serial Novels and Short Stories by popular writers, Poetry, Society Gossip, Fashionable Intelligence, Anecdotes, and a Choice Miscellany embodying a fund of general information on timely subjects, etc., etc.

Published on the 15th of Every Month.
ANNUAL SUBSCRIPTION, $3.50, postpaid.

THE DEMOCRATIC PLAN FOR CATCHING THE PRESIDENTIAL BIRD.

STEPHENS (TO SUMNER COX)—"*That bird has got the best of us so far; but if we can only put a little of this salt on his tail, we may catch him, after all.*"
SUMNER—"*Not a scintilla of salt will I use: I'll catch him without, or die in the attempt.*"

Important to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP is the only thing that mothers can rely upon for their children. It corrects acidity of the stomach, cures wind colic, regulates the bowels, and gives rest, health and comfort to mother and child. During the process of teething its value is incalculable. It softens the gums, reduces inflammation and allays all pain, thereby giving rest to the child and comfort to the mother.

25 CENTS A BOTTLE.

SOMETHING NEW!

"And the leaves of the tree were for the healing of the nations."

For DYSPEPSIA, NEURALGIA, NERVOUS PROSTRATION and GENERAL DEBILITY, use

COCA BITTERS,

The Great South American Tonic,

Made from the leaves of the celebrated erythroxylon coca plant, grown in Peru and Bolivia. It is the best nerve tonic and muscular stimulant. Recommended by physicians.

SOLD by Watchmakers. By mail, 30 cents. Circulars free. J. BUSCH & Co., 38 Dey St., N. Y.

AND NOT WEAR OUT.

BAHAMA BRAND PINEAPPLES

The above Brand of Pine-apples will be found superior to any offered. Pine-apples as ordinarily packed in this country are not calculated to please the appetite of even the moderately fastidious; and the consumption of this really delicious and wholesome fruit has been much retarded by the poor quality of the great bulk of the canned article usually put upon the market. Our "Bahama Brand," on the contrary, has so rapidly grown in popular favor, the demand so largely increased, as to be a genuine surprise to those familiar with the ordinary trade in this article. The trade and consumers have only to give these goods a trial in order to verify our statements concerning quality. We keep a stock in bond, and are able to offer special inducements on foreign orders.

CAUTION.

Subscribers, in ordering our publications, should be careful to write the name of FRANK LESLIE *in full, and direct their letters to 53, 55 and 57 Park Place, New York, from which address all our publications are issued.*

"PIVOTAL" POLITICS.

THE poet Wordsworth, who was quite a notable politician in his day, never uttered a sounder maxim in prose or verse than when, writing to the Earl of Lonsdale in 1832, he held the following language: "It has ever been the habit of my mind to trust that expediency will come out of fidelity to principles, rather than to seek my principles of action in calculations of expediency." It was for want of confidence in this doctrine, that "expedience will come out of fidelity to principles," that the Democrats of Ohio, as early as the year 1868 (and largely under the lead of Senator Pendleton), began to fall away from the "hard-money" traditions which had previously been inseparable from the name of "Democracy"; but it was not until the year 1875, in the gubernatorial canvass between Mr. Allen and Mr. Hayes, that the Ohio Democrats gave in a formal adhesion to the discarded fallacies which they had hitherto made a ground of reproach against the Republican Party.

It was hoped by many that the resumption of specie payments would put an end to the mischievous agitation of schemes which look to the inflation of the currency, and it was as sharers in this hope that many Democrats, faithful to the "hard-money" principles of their party, have winked at the monetary defection of their brethren in Ohio, and in other Western and Southern States, under the persuasion that this political apostacy would be temporary in its duration, and that with the return of "hard-money" it would be easy to show that calculations of expediency combined with fidelity to principles in affirming the hereditary position of the Democracy with regard to the national currency.

The recent Democratic nominations in Ohio have sufficed to dispel this illusion, and it is for the purpose of interpreting these nominations in their relation to the politics of the future that we again bring them to the careful consideration of our readers. As party organizations are not ends in themselves, but means established for the attainment of certain ends supposed to be desired by their adherents, it follows that no mere incantation of party names can long bind together a political confederation which has ceased to retain the vital principles that previously gave it being, unity and energy.

It is the misfortune of the Democrats that they have two "pivotal" States on which their hopes in the coming Presidential canvass are suspended, and that these "pivotal" States revolve around entirely different centres and point in entirely opposite directions with regard to questions of finance and currency. One of these "pivotal" States is New York, and the other is Ohio. It is openly announced that the Democratic nominations in Ohio have been made with a view of forecasting and forestalling the Democratic Presidential platform in 1880. If Ohio shall be carried by a "sweeping majority" for General Ewing and his associates, it is said that the *entente cordiale* already concerted between the Democrats and the Greenbackers will be cemented into an organic union, and the national Democracy will see the "expediency" of trimming its sails so as to catch the same propitious breeze and ride on the same flood-tide in its effort to reach the Presidential haven where it would be. If, however, the pending campaign in Ohio shall bring defeat to the Democratic banner, it is predicted with equal frankness that New York may be installed in its ancient place as the "pivotal" State of the national Democracy, and that New York ideas on finance may extrude "the Ohio idea" from its coveted place in the Democratic platform.

The men who indulge in such computations as these seem to have forgotten that there is a moral order in the political as well as in the social and civil world, nay, that political order is an integral part of the world's social and civil order. To suppose that the great issues of a Presidential canvass can be suspended on the chances of an election in Ohio is as idle as it would be to suppose that they could be suspended on the toss of a copper. Moral considerations are not so easily eliminated from the scheme of human life, and the politicians who dream that they can juggle with moral forces, and escape the penalties attached to their violation, are as poorly versed in the teachings of history as in the maxims of moral science.

And this general truth has been emphasized by the recent political experience of the country. Weakness and disorganization have crept into the Democratic ranks precisely in proportion as the Democrats have coquetted with the Greenback and Silver fanaticisms. There was a time when this rottenness in the bones of the Republican Party made its whole head sick and its whole heart faint in the presence of the people; and it is, perhaps, more due to the fatuity of the Western and Southern Democrats, than to the robust virtue of the Republicans, that the latter have come to be comparatively sound on financial questions. The hole of this pit was dug by the Republicans, and it was not until the Democrats foolishly jumped into it that the former bethought themselves of jumping out of it by mounting on the shoulders of their rivals. It would be well for the Democrats to study a familiar fable of Æsop before they proceed to intrench themselves in the pit from which they have already helped their adversaries to escape; and it would be well for the Republicans, in surveying the hole of the pit from which they have emerged, to cleanse their skirts from all sorts and phases of the soft-money defilement. The high vantage-ground of truth and safety has not yet been occupied by the "hard-money" leaders of either party, and will not be so occupied until the enlightened statesmen of the one or the other shall open a way to the extermination of the "fiat"-money heresies in their root as well as in their branches.

WARRING UPON WOMEN.

THE Russian Government, by the severity and barbarity of its treatment of women who are suspected of participation in the Nihilist conspiracy, is rapidly alienating sympathy which it would otherwise command. Almost every mail brings accounts of the sentence of women, not infrequently of high rank, to imprisonment or death, on charges which, apparently, are investigated by the tribunals with a predetermination to convict. Certainly in the methods of trial there is a pitiless rigor which cannot be defended to our American sense of justice and fair play. In one case a lady of high rank was sentenced to be shot, and among other ladies who have been condemned to hard labor, as accomplices of a revolutionary conspiracy, are the daughters of an imperial councilor and another high official, and also of a retired staff officer, the sentence of the latter being to four years of hard labor for not having informed the police of what she knew as to the doings of certain incriminated men. Before these severe sentences were delivered, two of the accused men—one of them a German, the other a Russian subject—had been sentenced, in the same sitting, to be shot. The conduct of the accused—men and women—was, all through the trial, characterized by the utmost firmness. None of them acknowledged that they had committed anything which could be considered a crime, nor did they offer a word in palliation of their acts when called upon to do so before the judges withdrew to consider their verdict.

United States Minister Stoughton, in a recent interview with a city journalist, undertook to show that the Nihilist movement is a very inconsiderable affair, and that the Czar is a monarch of rare benevolence of disposition. We should be glad to have Mr. Stoughton explain how a ruler of humane instincts and tendencies can sanction, against ladies of refinement and culture, cruelties which the whole world would hasten to avenge if perpetrated by Cetewayo or any petty African chief. This war against women, however, is nothing new under the government of Alexander. The London *Examiner* refers to some proofs of this fact, as follows:

"The persecution under which Vjera Sassulitch suffered is one of the most terrible cases in point—unmatched, we believe, in the history of the most relentless despots of the world. As a school-girl of seventeen she had known the sister of a student who afterwards became a political exile; she was—for no other reason than having taken care of a few letters addressed to him—thrown into a bastille and kept a prisoner for two years. There was nothing to incriminate her. No attempt was made to prefer any charge against her. For a mere unfounded suspicion she had to pass one year of misery in the Litowski Prison, another in the Fortress of St. Peter and St. Paul. At last she thought she was forgotten, and might have to pass her whole life in a dungeon until the end of all troubles would come by death. Suddenly released after two years, she had scarcely returned to her broken-hearted mother when she was re-arrested and transported by gendarmes to a distant province by way of banishment. No change of dress, not even a mantle was she permitted to take with her. Had not some compassionate soul given her a fur cloak on her weary way, she might have perished from cold on the road. During nine more years she was then driven, 'moved on,' from place to place in distant provinces; the only variation in this 'infernal circle' of involuntary wanderings being an occasional re-imprisonment. The poor girl's mind was thus wrought to frenzy. Between all these sufferings of her own she heard of Trepoff's treatment of political prisoners, whom the arch-villain had knouted, whilst, with a refinement of cruelty, he enacted a pantomimic use of the instruments of torture before the female section of prisoners, as if an indiscriminate castigation of all the inmates of the dungeon were intended. The conclusion of the drama is in everybody's recollection. Trepoff fell severely wounded from a pistol-shot of Vjera Sassulitch; but twelve men good and true—almost all, without exception, titled men, public councilors, and the like—gave a verdict of 'not guilty.' For a moment, the liberated heroine was borne in triumph through the masses at St. Petersburg, then deposited in a coach so as to allow her to recover as quickly as possible, in domestic quiet, from the sufferings she had for so many years gone through. The day after she had disappeared—nobody knew whither. A secret order of the police has since been discovered, ordering her re-arrest. The judicial forms of trial were afterwards changed by an imperial ukase. Finally, trial by jury was entirely done away with for cases like those of Vjera Sassulitch, until the last possible stage in official terrorism has now been reached—namely, the establishment of courts-martial for women, to pass sentences of death on them."

THE CITY AND ITS WATER-FRONT.

DURING the closing hours of the late legislative session at Albany, a Bill was passed, entitled, "An Act relative to certain improvements in the City of New York." There is certainly nothing in this title which suggests that the Bill had a relation to the Dock Department, or to the water-front of the city, yet the measure relates to that Department and its work, and to nothing else. The remarkable fact is that it was passed without the knowledge of one at least of the Commissioners, and apparently without any understanding whatever on the part of most of those who voted for it as to its real significance and intent.

It is, perhaps, known to our readers that the Dock Commissioners are invested with power to carry on the work of dock and pier improvement along the entire water-front of the city. When the piers or the water-front do not happen to belong to the city, the Commissioners could secure such property by purchase or by process of law. It was thus contemplated that the entire water-front, when the improvements were completed, should become city property. The efforts of the Dock Commissioners have hitherto been confined chiefly to the west side of the city, and it is there alone that we are privileged to see the kind of work which is contemplated. It forms an essential part of the plan, which the Commissioners are bound to follow, that West Street should be so widened by encroaching on the river as to measure in its entire width two hundred and fifty feet. It is also an essential part of the plan that this new street or boulevard should be left free and unobstructed; that on no part of it should any building be set up. It is necessary to bear these things in mind in order to understand clearly the meaning of the proposed change. By the Bill which is now in the hands of the Governor, it is provided that any party who now owns, and can fully substantiate his claim to such ownership, on the present water-front, may, by the payment of one hundred and twenty-five dollars per running foot, secure perpetual ownership of the new wall or bulkhead in front of his former property, with fifty feet of the street extending from the water edge. It is further provided that on this fifty feet of ground he may erect sheds or stores, or any other such buildings as may be convenient or necessary. It will be seen at a glance that this introduces a radical change into the entire system and workings of the Dock Department. In some important respects it abrogates the charter under which the department exists; it certainly changes the duties of the Commissioners, and it seems, at least, to be flinging away the property of the city. Should this Bill become law, West Street will not be two hundred and fifty feet wide, free and unobstructed to the river. On the contrary, it will be only two hundred feet wide, and the new water-front will be incumbered and defaced with irregular and unseemly structures, as was the old. This, however, is not all. The entire water-front, in its improved condition, will not be the property of the city; on the contrary, large portions of it will be owned by private citizens and by certain wealthy corporations.

It might be unkind—it might be untrue—to say that the promoters of this Bill have acted from interested or selfish motives and without any regard to the welfare of the city. They have not, however, so far as we are in possession of their arguments, been able to make out a very good case for themselves. It is notorious that whatever claims the owners of the original bulkheads may have to what they call their property, they have no right to the land under water in their immediate front. That land is the property of the Dock Commissioners—a gift from the State, and it is held by them for the city. The claim set up by the original bulkhead owners to the land under water in front, and consequently to the two hundred feet which has been reclaimed from the river and filled in, has been set aside by two successive Corporation Counsels; and in the great test case, in which the Astors and the Rhinelanders and the Vanderbilts are represented, and which is still before the courts, Judge Van Brunt has already decided that "as the original grants did not provide that the present bulkhead line should always remain a water-front, the city could build in front of it." It is not wonderful, therefore, that the opponents of the Bill should denounce it as a species of wholesale robbery of the city. The ground which it is thus proposed to give away in perpetuity is worth many millions of dollars; and according to the testimony of Commissioner Vanderpoel it will be given away, if the Bill becomes law, at less than half the money which it costs to build the new bulkhead. Happily there is but little likelihood that the Governor will sign the measure. The presumption is that the matter will be allowed to drop until the next session of the Legislature. In the meantime certain reputations will suffer; and it will be strange indeed if public opinion is not so aroused as to render the enactment of so iniquitous a measure an impossibility.

EVENTS ABROAD.

FIFTY years of as happy and prosperous a wedded life as rarely falls to the lot of royal folk was celebrated with great pomp and circumstance at Berlin, on the 11th instant. The marriage of William of Prussia and Louise of Saxe-Weimar was the result of a love match; and yet, during its early years, was not without storms as well as sunshine. But time effaced the disagreements of the royal pair, and for many years now they have lived in apparently the completest conjugal harmony. What a series of great events this period has covered in the fortunes of the house of Hohenzollern! When William was but little more than a boy, the terrible disaster of Jena fell upon Germany. His proud mother then said to him, "The day will come when you will have it in your power to disperse this dark cloud and avenge the Fatherland." The time came when, sixty-five years later, at Versailles, in the palace of Germany's hereditary foes, William was proclaimed Emperor over an at last united people. The golden wedding was brilliant and imposing. Princes and princesses by the score followed in the Imperial train in the pageant which celebrated the event, and the venerable Kaiser had one more striking proof of the affection in which he is regarded by his subjects. One figure was, however, conspicuously absent. The easily-frightened Czar, who had intended to be present, was deterred by threats of assassination. He could not even honor his well-beloved uncle's *fête* for fear of losing his life. Uneasy, indeed, is the head that wears the crown of Rurick. Another untoward event was the slight put upon Bismarck by the Empress on this festal occasion. Surely it was ungracious in the Imperial lady to snub the creator of German unity on a day so auspicious, however much she may dislike him. The kind-hearted old Emperor signalized the event by granting six hundred pardons, mainly to offenders against his own person, and by giving ten thousand marks to the poor of Berlin.

Solovieff, the Nihilist who shot at the Czar, was duly hanged on the 8th, after a vain appeal for mercy. The irrepressible Blanqui, having been pardoned, made all haste to join his brother agitators in congenial Paris, and will, it is said, be re-elected Deputy by Bordeaux, in which case he will take his seat in the Assembly without opposition. It is reported that Count Andrassy will soon retire from the Chancellorship of Austro-Hungary, on account of disagreements with his colleagues and the court as to the stipulations with Turkey. Andrassy has proved himself a great statesman, and the Emperor Francis Joseph will find it difficult to replace him.

Violent scenes in the French Chamber are so frequent that the fracas between a Bonapartist and a Republican Deputy, in the debate on the prosecution of Paul de Cassagnac, which ended in downright flaticuffs, has scarcely created a ripple of sensation. Paul de Cassagnac is the perpetual marplot and *bête noir* of French politics; with his swagger, his bitter and ungoverned tongue, and his dueling propensities, he is constantly getting others and himself into a brawl. The Chamber authorized the Government to prosecute him for slandering the Republic in the *Pays*; whereupon De Cassagnac got up a "scene," and had a short passage-at-arms with Gambetta, the President. As a master of vituperation, Gambetta proved more than the insolent Bonapartist's match, and compelled him to withdraw an offensive epithet, under a threat of expulsion from the Chamber. De Cassagnac had just been disappointed in a duel on which he had set his heart, and was unusually truculent.

The "Literary Congress" opened its meeting in London on the 9th, with Victor Hugo as President. Among the English committee of reception were Blanchard Jerrold, Froude, Trollope, Leslie Stephen and Tennyson, and among those expected to be present were Turgenieff, About, Jules Simon, Leal, Belot, Mendoz, Dumas *fils*, Castelar and Malot. The Lord Mayor of London gave the congress a grand banquet at the Mansion House on the 12th, at which speeches were made by About, Frederick Thomas, Jerrold, and Ferdinand de Lesseps. Victor Hugo could not, unfortunately, be present.

Digitized by Google

M. Naquet, the radical and hunchback Deputy for Lyons, has just made an attempt to induce the French Chamber to establish the right of divorce. There is no law of divorce at present in France, but there is a law permitting "separation de corps"—that is, a separation of husband and wife, without the right to remarry. M. Naquet made a strong speech, showing that the right of divorce did exist in France from 1792 to 1816, and that the opposition of the Church was unreasonable. It is probable that he will carry his point.

The new Prince of Bulgaria had an amusing, but rather discouraging, experience of his new subjects on the day when he first received a deputation from them. This deputation of both sexes met him at Odessa, on his return from visiting the Czar at Livadia. He was welcomed with such tearful effusion and fond embracing by a crowd of fair Bulgarian schoolgirls that he did not, until after the touching interview, perceive that his gloves and pocket-handkerchief had disappeared from his pockets. As they gushed, the maidens, with an eye to the main chance, had picked the pockets of their new sovereign so deftly that the Prince never suspected it. The death of Prince William, heir apparent of the throne of the Netherlands, is an event of little significance. The Prince was not a man of conspicuous character or virtue, and his loss will scarcely be regretted in the staid land over which, had he lived, he would have ruled. His brother Alexander, a more promising young man, now becomes the heir to the throne.

Our Minister at Constantinople, Mr. Maynard, has been pleasantly hobnobbing with the Grand Turk, under that potentate's mahogany, and pretty things were said about President Hayes's affection for Turkey, and Abdul Hamid's fondness for the United States. Hon. Andrew D. White, the American Minister to Germany, was received by the Emperor with distinguished words of consideration on the occasion of his first formal interview on the golden wedding day.

Germany threatens to coerce the Khedive unless he secures his German creditors, and it is said that Russia will support her ally. This will not be pleasant news for France, who wishes to be beforehand in the coercing and securing of Egyptian cash, and has been talking very sharply to England about her backwardness in Egyptian policy. There is trouble ahead for Europe in this Egyptian muddle. The Czar and the Pope, it appears, have come to terms. The Catholic bishops in Russia will have somewhat more liberty, and the Czar will, on the other hand, have a word to say about their appointment. The slave-trade in lower Egypt is being crushed by Captain Gessi. There is no important news from Zululand; but we may look for an energetic campaign in South Africa, when Sir Garnet Wolseley, the hero of Ashantee, arrives and takes command.

A TIMELY ACT NOBLY DONE.

MISS EMMA ABBOTT did a very handsome thing in collecting, by her personal exertions, a sufficient sum of money to secure a rehearing of the case of Mrs. Smith and Covet Bennett, convicted of murder in New Jersey. There is a very general feeling that the evidence produced at the trial of these unfortunates did not justify their conviction; in fact, it is not straining the truth to say that there was no testimony whatever, outside of a certain letter which one of the defendants was betrayed into writing, and which only circumstantially and by a forced construction pointed to the possibility of their guilt, which an unprejudiced jury could have regarded as conclusive. Whatever may be the outcome of the movement for a review of the case by the Court of Errors and Appeals, all persons of humane sympathies will heartily applaud the kindly intervention which made that review possible. But what shall be said of the New Jersey law which makes an appeal to the court of last resort, in the case of life and death, impossible to the accused, unless they can raise a sum of money which, in the nature of the case, must be beyond their reach?

Miss Abbott gives a very entertaining account of her visit to Wall Street for the purpose of raising the sum needed for her purposes. She had supposed that the Bulls and Bears would prove to be very terrible, but, on the contrary, she found them to be noble-hearted, generous gentlemen, full of sympathy with herself and the cause she came to plead. We quote a few sentences from her account:

"The very first gentleman I saw was Mr. Gould—Mr. Jay Gould. He was up to his ears in business, and surrounded by all sorts of men, bothering and interrupting him, and I feared at first that I might never get in a word. But he gave me $100 without waiting for me to scarcely ask for it. I tried to explain to him about the murder and all that, but do you believe—he hadn't read a word of it—didn't know it had happened, he was so busy. Judge Hilton put down his name for $300, and told me in the kindest way how much he was interested in the case; that it was a shame that the New Jersey laws should allow life and death to depend on a few hundred dollars, and that he hoped that I would persevere and get a new trial for Mrs. Smith. 'Don't you give it up,' he said—'stick to it'; and he encouraged me so much, saying that if the poor thing needed a lawyer he would volunteer himself. The Judge was perfectly splendid! And the brokers, too, they were so kind. Mr. Charley Osborne wouldn't let me get out of the carriage, but brought me a certified check, and handed it to me at the window, telling me how much he was interested in the poor woman's case, and how he appreciated what I was doing. Mr. John D. Townsend told me that if Mrs. Smith needed a lawyer to prepare her appeal he would gladly give his services gratis."

Evidently, Wall Street is sometimes, after all, irradiated by kindly humane sympathies, and feels and recognizes that touch of nature that makes the whole world kin.

REPORTS as to the cotton crop in Texas, Tennessee, Mississippi and other States present a favorable exhibit, the average increase in acreage being about three per cent. The States named have suffered less from the negro exodus than has been supposed; but in Louisiana the loss from this cause will be quite serious. The condition of the crop is generally good.

A STRIKE of 12,000 spinners in the Fall River (Mass.) mills is threatened, the employers having refused to arbitrate existing differences. The strikers include the more conservative class of operators who have hitherto uniformly resisted this method of redressing real or imaginary evils. The indications are that the struggle, if once commenced, will be marked on both sides by an absolutely uncompromising spirit.

THE appropriation of $3,000 by Congress for the erection of a monument to mark the birthplace of George Washington, is a timely act—since, with the disappearance of the house of his parents, nothing now remains to show where the Father of his Country was born. It is to be hoped that the erection of this memorial will not require as long a period as has been consumed in the non-erection of the Monument at the National Capital.

THE twenty-fifth anniversary of the organization of the Republican Party in Massachusetts is to be celebrated on the 19th of July next with a good deal of *éclat*. If such a celebration could bring back the party to the purity and vigor of principle which characterized the earlier years of its history, it would serve a useful public purpose; but it is, perhaps, too much to expect that the decay of integrity among political parties can be arrested by antidotes supplied by the generation responsible for the disease.

THERE has been a wonderful increase in the number of Russian newspapers during the last fifteen years. Up to 1864 there were, outside of the unimportant official gazettes published in each Government, only four newspapers in the whole empire. Now there are sixty-five newspapers published in St. Petersburg alone—sixteen of which are dailies. All the journals are under more or less restraint, but a number of them exert a stimulating influence in urging and promoting internal development of the resources of the country, favoring the diffusion of education, etc.

IF it is true, as charged in the partisan newspapers, that Secretary Sherman is "figuring" for his party nomination for the Presidency, he should be taken in hand at once by Mr. Hayes. An Administration which demands of its underlings absolute abstention from partisan politics, refusing even to permit them to participate in local or other conventions, cannot afford to permit one of its Cabinet Ministers to employ his official position for the promotion of personal ambitions. The civil service is not to be "reformed" by allowing high Federal officials to manipulate State conventions, or "set up" candidates in their own rather than in the public interest.

AN effort is making by the more reputable members of the Louisiana Constitutional Convention to avert the disgrace of a formal adoption of the proposition to repudiate two-thirds (some $8,000,000) of the State debt. There have been also several popular demonstrations against it. It is gratifying to find that the people of that State are not wholly insensible to shame. Every consideration of good faith and financial integrity demands that the obligations of the State should be honestly discharged. No more disastrous blow could possibly be inflicted upon its business prosperity than to wipe out these obligations by the mere dictum of the highwayman, without any regard to law or justice.

ONE would suppose that United States Senators might find more profitable employment than indulging in indecorous personalities and spattering one another with abuse. The exhibition made last week by Senators Hill and Blaine, who seem to have nourished for years the grudge which had its origin in the House, was altogether unworthy of themselves and the body to which they belong. The country is weary of these periodical outbreaks of feuds and quarrels among individual Senators and Representatives, and, in the presence of the grave questions which await legislative consideration, it is simply an outrage upon public decency for any man to obtrude his personal animosities upon the attention of his associates.

IN a report to Congress on the Isthmus Canal project, Secretary Evarts says that "the policy of the United States on the general subject of isthmian transit is understood to have been, and to be, not to undertake the construction of a ship canal on its own account, even if the practicability of such a work at a reasonable cost were to be shown, but to secure by treaties protection to the capital of such citizens as may be disposed to embark in the enterprise." Ferdinand de Lesseps gives it as his opinion that the canal can be constructed within eight years; but however this may be, the country will doubtless reap, in the end, its full share of the untold advantages which the successful completion of the gigantic undertaking will confer on the whole world.

THE movement for the encouragement of moderation in the use of intoxicating liquors appears to be gathering strength here and elsewhere. In New York it already embraces a large number of prominent business men, and in Brooklyn it has been taken up with a good deal of enthusiasm by influential citizens. The pledges used in this movement commit the signers to abstinence from intoxicating beverages for a stipulated period, or during business hours, and prohibit the custom of "treating," which so often leads to extravagance and excess. There can be no doubt that, based as it is on common sense, and antagonizing no physical tendency, the movement will result in great good to the community—at once strengthening the sentiment against the immoderate use of intoxicants and confirming the ability of individuals to abstain altogether.

THE statement is renewed that an effort will be made by the present Congress, at the regular session, to pass a law enforcing a tax on incomes. The measure will be defended upon the ground that, on account of the Arrears of Pension Law, which will consume the surplus revenue for several years to come, it will be impossible to at all reduce the debt without increased taxation, and that the burden of general tax, raised from the people at large, being already as great as can be borne, the deficit must be made up by taxing the wealth of the country, which, in one way or another, now largely escapes taxation. It is said to be the purpose of the supporters of the scheme to make the tax a moderate one—not over two per cent—and to exempt all incomes under $2,000, it being estimated that a tax at this rate would yield $10,000,000 annually. Notwithstanding it is said that a canvass of the House shows a majority of over thirty members in favor of such a measure, we think it may be doubted whether, when the test actually comes, a sufficient number of votes can be mustered to pass a Bill so unpopular and so unnecessary.

THE scheme adopted by the Irish Catholic Colonization Society for the settlement of Irishmen in the West is based substantially upon the idea which, so far as we know, was first suggested in the columns of the ILLUSTRATED NEWSPAPER. The society proposes to provide land and houses for colonists, at first cost, in Nebraska, Dakota or Minnesota, wherever the most favorable offers and best natural advantages can be found—everything, so far as possible, to be prepared for the settler in advance. The object is not to aid the thriftless or absolutely destitute classes, but that large class of people who by thrift and energy have managed to save a few hundred dollars, but who are yet unable to bear the expense of purchasing land and removing their families to the West. There is no reason why the scheme should not succeed. Bishop Ireland of Minnesota, one of its promoters, has already established five settlements in that State, all of which are thriving and prosperous. One of them, with an area of 100,000 acres, contains 800 Catholic families; another has 210 families, with 35,000 acres in cultivation. With lives of independence and comfort placed within easy reach by this colonization movement, it can scarcely be doubted that thousands who are now herding in our large cities will embrace the opportunity which it offers to escape from surroundings altogether miserable.

THE statistics of the life insurance business in this State, as presented in the last annual report of the State Superintendent, are full of interest to insurers and the public at large—showing, as they do, very strikingly, the vast proportions which this interest has attained. The gross assets, on the 31st of December last, of the companies doing business in this State amounted to $404,079,144, of which splendid total our home companies possess $206,552,630. Exclusive of capital stock, the liabilities of the companies amounted to $339,585,626, the surplus as regards policy-holders being $64,493,518. The aggregate income during 1878 was $80,462,399, being $8,334,929 in excess of the expenditures. The amount paid for losses or to policy-holders, or their survivors, was $29,153,225, and for lapsed and surrendered polices, $17,095,994. Of course, the benefits resulting from the distribution of this vast sum in the channels of trade, to say nothing of the relief it afforded to bereaved and needy households, cannot be stated in simple figures. The companies doing business in this State, at the close of the year, had outstanding 612,843 policies, insuring $1,480,921,223. The business done in New York, as already reported, shows that 126,759 policies, insuring $329,882,456 were in force on the 31st of December last. With all the defects of the life insurance system, and the mismanagement of some of the companies, these statistics must convince the most skeptical as to its usefulness as one of the great organized beneficences of the age.

NEWS OF THE WEEK.

Domestic.

FIFTY colored emigrants for Liberia sailed from New York, June 14th.

THE 125th Commencement of Columbia College, New York, took place on June 11th.

HON. HENRY W. BLAIR has been nominated as United States Senator from New Hampshire.

FOREIGN drygoods to the value of $39,652,483 have been entered at this port since January 1st.

THE annual meeting of the National Cotton Exchange of America will occur in St. Louis, August 13th.

THE Chamber of Commerce adopted resolutions opposing the proposed reciprocity treaty with France, June 13th.

THE bust of William Gilmore Simms was unveiled, June 11th, at Charleston, S. C., with impressive ceremonies.

SEVERAL meetings of the citizens of Elizabeth, N. J., have been held to devise means of paying the vast debts of the city.

THE Special Assembly Committee on the railroad discrimination of freight charges began its sessions in this city, June 12th.

THE House has passed the Army and Judicial Appropriation Bills. They will be opposed by the Republicans in the Senate.

AMONG passengers who sailed from New York for Europe, June 14th, were Madame Marie Roze and her husband, Colonel Mapleson.

PRESIDENT HAYES will visit Fremont, Ohio, in September, remaining in the State for a month. He will remain in Washington during July and August.

LIGHTNING struck an oil-refinery at Point Breeze, Philadelphia, June 11th, and the burning oil flowing into the Schuylkill five vessels were destroyed.

THE Greenbackers of Minnesota have nominated a full ticket for State officers, headed by Ara Barton for Governor. The Prohibitionists have also nominated a full ticket.

EDWARD PARE, who was recently tried and convicted in Philadelphia of the murder of his daughter, died, June 10th, from a dose of strychnine taken in the court-room.

THE silver men in Congress are endeavoring to compel the retirement of Senator Bayard from the Chairmanship of the Finance Committee, owing to his stubborn opposition to their schemes.

THE Iowa Republican Convention, June 11th, renominated Governor Gear, Lieutenant-Governor Campbell, and C. W. Von Coelln, Superintendent of Instruction, and adopted a hard-money platform.

REMONSTRANCES against the running of trains on Sunday on the elevated railroads of New York City, have been presented to the company by a committee representing the churches located on the routes.

AT Salt Lake City, June 14th, George B. Reynolds, a bigamist, was sentenced to two years' imprisonment and $500 fine. He is the first Mormon convicted of polygamy since the passage of the Act in 1862.

INDIAN COMMISSIONER HAYT was placed on trial in Jersey City, June 11th, charged with publishing a false statement of the condition of the International Trust Company, of which he was President.

THE House of Representatives has passed a Bill giving free and equal rights to all corporations and individuals to land telegraph cables on our shores, subject to certain conditions and stipulations especially applicable to all.

ON June 11th the German Saengerfest at Chicago was opened with a procession of societies. Grand concerts were given in the new Music Hall in the evenings, and the fest closed with a monster picnic at Inwood Park on Sunday, June 15th.

THE Commercial Club of Chicago reached Boston, June 13th, on the invitation of the Commercial Club of that city, and after being shown the various points of interest, were entertained with a banquet at Horticultural Hall on the evening of the 14th.

POLICE OFFICER JOHN NUGENT, of the Eighteenth Precinct, New York, was arrested, June 13th, charged with complicity in the robbery of the Manhattan Savings Institution. He was attending the trial of John Hope, alleged to have been one of the burglars, at the time.

Foreign.

SERBIA has proposed to send a representative to Washington.

LIEUTENANT-GOVERNOR LETELLIER of Quebec is not to be dismissed.

THE Russian Government has presented its flotilla on the Danube to Bulgaria.

THE French Senate has voted in favor of the removal of the Chambers to Paris.

THE King of Burmah is reported to have been slaughtering more of his kindred.

THE insurrectionists in Sicily and Algiers are reported to have been worsted by the authorities.

M. DE LESSEPS announces that 2,000,000 francs have already been subscribed towards the Darien Canal.

MR. EVARTS sent a congratulatory message to the Emperor William on the occasion of his golden wedding.

A CONSTANTINOPLE dispatch says the Sultan has determined to sanction the reforms demanded by the people of Crete.

THE new Paris *Globe* understands that the French Government has undertaken the demonetization of silver on a vast scale.

SIGNOR CANZIO, a son-in-law of General Garibaldi, has been sentenced to one year's imprisonment for resisting the police in March last.

IN a debate in the German Reichstag on the Samoan treaty, it was announced that the Government had no intention of establishing colonies.

THE British authorities are going to break up the old Arctic exploring ship *Resolute*, and to send souvenirs of her to the President of the United States.

LORD ODO RUSSELL, the British Ambassador to Berlin, says that it is generally believed in Germany that the Government is preparing to adopt bi-metalism.

THE sculling-match for the championship of the world was won by Edward Hanlan, of Canada, on the Tyne, on June 16th, defeating the English champion, Elliott, with ease, in 21 minutes 1 second.

NEW YORK.—MAMMOTH EXCURSION OF VETERAN SOLDIERS AND SAILORS OF THE UNION ARMY TO ALPINE GROVE, ON THE HUDSON, JUNE 7TH.—THE FLOTILLA PASSING THE BATTERY. FROM A SKETCH BY OUR SPECIAL ARTIST.

LIEUTENANT W. P. CLARK, U. S. A., AND LITTLE WOLF.

THE recent capture of Little Wolf and his band of hostile Cheyennes on the Yellowstone River, near the mouth of Cabin's Creek, by Lieutenant W. P. Clark, Second Cavalry, and a detachment of his regiment, is in happy contrast to the operations against this tribe during last Fall and Winter. These unfortunate people, after a stern and relentless chase from Texas to Dakota, were at last forced to succumb, and were confined at Fort Robinson. They had suffered indescribable hardships, latterly from hunger and the severity of the weather, but were not deterred thereby from attempting to escape. Unable, and perhaps unwilling, to communicate with their pursuers, they made a desperate and hopeless struggle for liberty, and perished miserably in the sandhills of Northern Nebraska. The army deeply deplored and deprecated its instrumentality in this occurrence, to the consummation of which a series of unfortunate circumstances seemed to conspire. The whole country, indeed, was aroused by the story of this terrible ride and its tragic ending, which furnishes no mean theme for the grandest epic.

Little Wolf and his immediate retainers, however, eluded capture and escaped through the cordon of military posts and scouting detachments to the vicinity of the Yellowstone, in which country he has since played a part in "Indian Affairs" only second to that of the renowned Sitting Bull. Now come tidings of his surrender and subsequent submissive demeanor to Lieutenant Clark, which was effected by the energy and skill of that officer, no less than by the ability and ease with which he holds intercourse by means of the Indian sign-manual.

Graduated from the United States Military Academy at West Point in 1868, the principal subject of this sketch was assigned to the Second Cavalry, of which he speedily became adjutant; but tiring of the inactivity of staff duty, in 1876 he tendered the resignation of his regimental appointment and joined the troops operating in the field under General Terry, shortly after the Custer massacre. During the co-operation of these forces with those under General Crook, Lieutenant Clark became a great favorite with the latter, and at his request was transferred to his command. At Slim Buttes he exposed himself fearlessly, and his conduct elicited the highest praise. During the ensuing Winter's campaign he was placed in command of our Sioux and Arrapaho allies, and participated under Colonel Mackenzie in his destruction of an Indian village in the Big Horn Mountains. Upon his return he was given especial supervision of the Indians at Red Cloud and Spotted Tail Agencies and to his excellent judgment and popularity was greatly due our subsequent peaceful relations with these tribes. He was present at the surrender of Crazy Horse, and acted an important part in this affair. Later he brought the Sioux and Arrapaho chiefs to Washington, where he warmly but vainly seconded General Crook in remonstrating against their removal. In their march from the Agencies to the Missouri River, Lieutenant Clark accompanied and controlled the Sioux, remaining with them until Spring, when he applied for and obtained a "leave of absence," at the expiration of which, returning to his former station, his savage friends having moved South into the Department of the Platte, he was ordered to join his company then serving in the Department of Dakota, the scene of his latest exploit.

Lieutenant Clark is a young and very handsome officer. Of buoyant temperament and possessing strong personal magnetism, he became a great favorite with the Indians in his charge, of whom Little Wolf and his band at one time formed a part, and was familiarly known by them as "White Hat." Brigadier-General Terry, commanding the Department, has commended highly the energy, skill, perseverance and excellent judgment displayed by Lieutenant Clark while engaged in operations resulting in the capture of Little Wolf's band.

HON. NATHANIEL NILES, GOVERNMENT DIRECTOR OF THE UNION PACIFIC RAILROAD. FROM A PHOTOGRAPH BY LACEY.—SEE PAGE 278.

A GRAND EXCURSION OF VETERANS.

ONE of the most notable excursions ever given from this city was that of the veteran soldiers and sailors of the Union Army, and their families, to Alpine Grove, on the Hudson, June 7th, at the invitation of Hon. John H. Starin. The excursionists numbered some 5,000, for whose accommodation eight barges were provided, all gayly decorated, while the steamer *D. R. Martin* carried the more prominent guests. The *D. R. Martin* left her wharf at the foot of Courtlandt Street at eleven o'clock, followed by the tug *Black Bird*, and as soon as both vessels got into midstream, the Governor's Island Band, on board the *D. R. Martin*, struck up a stirring air, which, however, was instantly drowned in the shrill and long-continued chorus of salutes that arose from the neighboring vessels. The two vessels rounded the Battery and steamed up to and saluted the barges, which were in waiting near the Brooklyn Bridge. With banners flying, bands playing, cheers ringing from the shore, and steam-whistles screaming from innumerable vessels, the whole gayly-decked flotilla then started towards the bay under the command of General Charles K. Graham, Grand Marshal; Major John M. Cooney, Adjutant-General; Colonel Joseph Forbes, Assistant Adjutant-General, and General George Van Schaick, officer of the day. Off the Battery the barges were drawn into line two abreast, and, under the escort of several tugs, glided up the East River to the point where the United States frigate *Minnesota*, Captain S. B. Luce commanding, lay at anchor. Nearing the frigate, the *Black Bird* fired a captain's salute, and an instant later the young crew quickly manned the yards and gave three hearty cheers from their perches in the rigging, to which all the veterans on the flotilla responded with a like greeting, while the band played a national air.

LITTLE WOLF, A CHIEF OF THE HOSTILE CHEYENNES, AND HIS CAPTOR, LIEUTENANT W. P. CLARK, U.S.A.

Digitized by Google

As the barges passed the frigate, the company on board the *D. R. Martin* retired to dinner, which was spread on the main deck. General Graham proposed the health of the generous giver of the excursion. It was drunk standing. After a delightful trip past the Palisades, Alpine Grove was reached, and the party landed and spent a pleasant hour or two, admiring the beautiful scenery of the grove and the fine prospect on the river. During the stay on shore, speeches, thanking Mr. Starin, were delivered by General Graham, General Barnum, Major Willard Ballard, Corporal Tanner, and others. After dancing and promenading under the trees, the excursionists embarked once more, and the flotilla started for the city, the homeward trip being, if possible, even pleasanter and more enjoyable than the journey to the grove.

PLAIN MISS CAREW.

I SHALL never forget that happy Summer at Harpswell, a quaint old peninsular town up the Casco Bay. I don't know just how we happened to go there, but how pleased every one was with the old-fashioned houses, and the cottages built on the banks of pretty coves, and the Atlantic booming and thundering and foaming right under our windows! Dear little cottages, with piazzas and balconies and slender chimneys, and poplars bending over the roof lovingly! And strong, more substantial farm-houses, with narrow windows and tiny panes of glass; gardens filled with poppies and dahlias, and always beautiful; perfumy lilacs, meadows fresh with buttercups and clover and tall marguerites. Deep green woods, fields and fields of corn, and everywhere a great quantity of roses. And such massive, rugged rocks, and grand views from the hills overlooking the sea; and all over the island that peculiar hoarse, musical sound, called the "rote," comes in from the ocean and adds a plaintiveness to the lovely Summer days.

There are hard, white beaches, and the waves come tumbling in, roaring and shining in the morning sun, and the surf plays mad pranks with the chips and shells and bits of seaweed on the shore. There are boats moored at the stakes, and square boxes, called "cars," float beside them, but whether for ornament or use no one seemed to know. Over all is a fair blue sky and perfect golden weather.

We were a party of seven boarders at Mrs. Sennett's cottage at the head of Lowell's Cove. It was in reality a stout old house, but some romantic wanderer had named it "Pearl Cottage," and as such we knew it. It was the most beautiful spot imaginable. Had it been a veritable Eden there could have been no safter beauty than greeted us on every hand. A wide garden brightened the space between the bank and the house and filled the air with perfume. The cove was shaded by huge willows of a hundred years' growth, and many birds sang in their branches. The soft, caressing breeze tinged our cheeks with healthy color, and a July sun added a not unbecoming brownness.

Almost unconsciously we drifted into familiar, friendly intercourse, and were happy and easily pleased. Nature, in her grand moods, shames us out of our artificiality. No one reproved a loud laugh, a leap, or even a run down the level road. We were all so happy and gay and brimming over with spirits, it was simply impossible to be dignified, and curb our unruly, boisterous natures.

We were having a delightful row one evening, and returned rather late. There was a light in the sitting-room contrary to our custom, and a trunk and bag on the piazza.

"Somebody has come," cried May Derry. "Here's a man's trunk—I can tell by the canvas—and, yes, here's a card. Oh, girls! what do you think? It is that Mr. Skidmore we saw the day we went to the Neck! Isn't it splendid?"

"So it is," said May's sister. "Come here, all of you. 'Mr. E. Skidmore.' I wonder how he ever happened to come here. Won't we have a jolly time?"

"Victoria," expostulated her mother.

"Well, well, a nice-looking young man doesn't come to Harpswell every day. You haven't seen him, Miss Carew," turning to a plain, dark-faced girl. "He is immensely wealthy, and has a real gold-brown beard, and fluffy yellow hair, and blue eyes with brown spots in them, and——"

She might have gone on for an hour had not a hearty laugh from inside the room startled her.

"I beg your pardon," said a deep voice, and a tall figure appeared in the doorway, "but the description was too amusing," and again a merry laugh broke from him, in which we all joined.

"I suppose I was very rude," said Miss Derry, "but the deed is done, and I guess we'll go in and have some lunch."

"If she would only not say, 'I guess,'" whispered her mother. "It is quite plebeian."

We found Mr. Skidmore a delightful addition to our party. Of good family, wealthy, a thorough man of the world, and handsome, he had every thing in his favor. The Derrys were, to use Victoria's phraseology, "over head and ears in love with him," and the gentlemen voted him a capital fellow. He played croquet with a steady arm and never-failing stroke, rowed well, sang delicious little songs in a tender, manly voice, read aloud when it was too hot for exercise, and made himself a most attractive companion. From the first he seemed to positively dislike plain Miss Carew. In our games he avoided her noticeably, never willingly looking at or speaking to her. Did she propose an excursion, he declined to participate; did she sing sweet, old-fashioned songs we liked so much, he left the room. One evening she had crimson rosebuds in her hair, and he said crimson rosebuds were his special aversion. Once in stepping from the boat, coming from a sail, he offered his hand to assist her, and almost flung her ashore. He seemed to have taken an unaccountable antipathy to her.

One morning I was braiding my hair when there came a rap on my door, and Miss Carew asked to come in. She was dressed in a blue flannel boating suit, and a white sundown was pulled down over her face. Knots of scarlet ribbon were on her sleeves and down the front of her dress. I noticed an unusual color in the brown cheeks, and her brown eyes were moist-looking.

"You have been crying, Miss Carew," I said; "are you unhappy?"

"Not exactly unhappy, Miss Arden," she answered, in her slow, sweet, *legato* voice. "Only troubled, and rather vexed."

"Can I help you?"

"No, thank you. You are very kind, but it is nothing, after all. I came to ask if you will be good enough to let me take your umbrella? I am going to the east shore and have been stupid enough to let Miss Derry take mine."

"Certainly," I said, "and if you——"

A loud, boyish voice interrupted me.

"Now, let me in, quick! I've something to tell you, Miss Arden!" and May Derry burst into the room. "I've found out all about Miss Carew," she said, breathlessly, "and why Mr. Skidmore hates her and all. I have just—— Oh, Miss Carew!" she cried, "I didn't see you. I beg your pardon. Dear, me! I am sure, if I had known——"

"I beg you won't feel distressed. If you have 'found out all about me,' perhaps you will have the charity to enlighten Miss Arden?"

"It's nothing at all," she blurted out; "only Miss Payne came over, and said you belonged to the Carews of Jersey, and they were a bad lot—fast men and vulgar women—and I told her I didn't believe it. And then she asked Mr. Skidmore, and he said he detested a vulgar woman, and could tell in a moment if they had good birth and breeding, and—Oh, Miss Carew, I haven't made you angry, have I? Of course, I didn't really believe her."

"It is all true," said Annie Carew, quietly. "I didn't consider it necessary to tell my affairs to every one. And now, if you will get the umbrella, Miss Arden, I will go."

When we were alone, I said: "Now, May, tell me why Mr. Skidmore dislikes Miss Carew."

"I'll tell you all he said, Miss Arden. Miss Payne said there was a mystery about Miss Carew, and hinted at something rather reflecting on her character; and Mr. Skidmore said it was her family that was ruining her. Miss Payne told me afterwards that he hated Miss Carew because she had intrapped his brother into an engagement. That was two years ago, and it is all broken off now. Mr. Skidmore would not hear of it, I believe, and wrote to Miss Carew, telling her his brother would be an outcast from his family if he married her, and asked her to set him free. It seems that she didn't really care for him, but he was wild about her, and they drifted into an engagement. The whole family thoroughly disliked her, and Miss Payne said no respectable people visited them. They live in a fast set, and Miss Carew goes all about with no *chaperone* and, I believe, gets dreadfully mixed up with gossip. Mr. Skidmore would be glad never to see her again."

She stopped for sheer lack of breath, and I said, feeling a sort of scorn for a man who could so speak of a woman: "Miss Carew may be all you say, but until I know more about it, I shall treat her as I always have. And as for Miss Payne, she is a low, gossiping woman to repeat such a tale."

She stared at me in amaze.

"I had no idea you were so fond of her," she said. "Do you know, they say she is called very fascinating? I have rather pitied her because she was so plain."

"What became of Mr. Skidmore's brother?"

"Oh, I believe he married somebody else. But I must go now. You are not offended, Miss Arden?"

"No," I said, laughing; "not with such a giddy tomboy as you are."

I was surprised greatly by what May had told me. For the first time I suspected there was another nature in Annie Carew than the indolent, careless one we saw. There might dangerous fires sleep under those soft, brown eyes. There might be hidden depths under that cold exterior. And, now I thought of it, she wasn't so very plain. She had beautiful eyes, brown and clear-looking; delicate eyebrows, full red lips, and masses of soft, dusky hair. If her face was dark and thin, it was also full of character. Certainly she was not to be pitied.

I was rather fearful as to how she would treat May, but at tea-time she came in smiling, and apologizing for being so late. There was not a trace of any unpleasantness in the smooth face. She laughed a great deal, and showed me a sketch she had made; a ridiculously long-necked bird was perched on the umbrella, and in its mouth a bit of scarlet ribbon, over which it seemed puzzled. There was real expression in the small, uncanny eyes, and I laughed heartily.

"How well you sketch, Miss Carew!" said May, who was looking over my shoulder.

"Yes; that is one of my Bohemian proclivities. One learns many things like that traveling over the world without a *chaperone*."

There was no malice in the tone. It seemed merely an explanation. Mr. Skidmore looked up quickly, and then went out of the room, abruptly. Miss Carew laughed.

"Have I shocked anybody?" she asked, lightly.

"Come out on the beach," I whispered. And when we were alone, I said. "Tell me about it, Miss Carew."

It was in substance what I had heard once before that afternoon. She cared nothing for the boyish lover, and was glad to have the engagement broken, but the insolent, unjust words of Mr. Skidmore had hurt her cruelly.

"Why," she said, "I suppose he hates me as he hates no one else in the world."

"And do you dislike him?"

"Miss Arden, I despise him."

"I am very glad to hear it, believe me," and a tall figure strode past us down the beach. Miss Carew burst into a laugh.

"I have added the last straw now," she said.

After that there was not even the semblance of politeness between them. Each ignored the other's existence. We walked and talked and played croquet indolently, as before. Mr. Skidmore was always with Victoria Derry, and I was drifting into a dangerous liking for one of our company, a man with neither money nor good looks. I think we were all moderately happy, but I was alarmingly so. All through the month we were favored with fine weather. May Derry said she was "full to bursting" of pure delight. Living was a pleasure, and life a grand holiday. Once or twice we all went to Brunswick for a drive, but for the most part of the time were lying under trees, or in the warm sand, Crusoe-like, reading or thinking. All the fishermen have high tenor voices at Harpswell, and sing songs of the sea, and wear old straw hats and look picturesque. It was pleasure enough to sit on the rocks and hear their melody rising free and unrestrained, while they mended their nets. It was beautiful, too, to watch the shadows coming over the sea, and the moon rising over the tree-tops, and the hush of night falling on all the land.

One night we were out in the boat, and Mr. Price drew in the oars and let the boat drift. It happened unfortunately that Annie Carew was placed beside Mr. Skidmore, making it uncomfortable for both. I soon forgot it, however, in watching the beauty of the beach and ocean in the mellow, softened light, and drinking in the sweet, fragrant air.

"Such a scene as this brings up sleeping memories," said Mr. Skidmore. "With the glamour of this soft beauty on a man he might be forgiven for almost any rashness. I am strangely susceptible to moonlight and the fragrant Spring air. Miss Carew, won't you favor us with a song and break the spell?"

It must have affected him indeed, to cause him to speak like that, in that half-tender voice, to Annie Carew.

"I shall be happy to oblige you if you really desire it."

"Oh, yes, do sing, Miss Carew," said several voices.

She sang a little boating song, all about "waves" and "ripples" and "the sands upon the shore," and she sang it beautifully. I felt like falling in love with her, she looked so handsome, and there was a haunting pathos in the voice. Certainly Annie Carew was not a plain girl. She was a dangerously fascinating one. I realized it fully, as she sat there in the moonlight, her splendid eyes sparkling and her clear voice touching one's heartstrings so closely. Bohemian she might be; she was more beautiful in that tender, gracious mood than any woman I had ever seen.

There was silence for a moment; then Mr. Price said:

"You sing like the sirens of old, Miss Carew, if one can judge from ideas. The tears almost came, in spite of my endeavors to be manly."

She laughed softly, and Miss Derry said in an earnest way, "I do really believe I have fallen in love with her."

That made us all laugh, and the little craft was turned homewards. Mr. Skidmore walked up to the house beside me, and I asked him if he liked Miss Carew's singing.

"Yes, I did," he answered; "and I wish I could understand her real nature."

He was more polite and friendly towards her after that, and I began to hope for an established basis of good feeling between them, when an unlucky accident set them on the old path.

I was tying up a rosebush one morning, and had nearly finished when my supply of string gave out. Mr. Skidmore put his hand in his pocket and drew out a handful of different sizes of cord, when a little ribbon fluttered to the ground.

"Oh, that's Miss Carew's bow," cried May. "Miss Carew, he has had it all the time."

A flush rose to his face, as he said, in an annoyed tone: "The very fact of its being in my possession shows that I had no idea what it was."

"Oh, but you did know, Mr. Skidmore, for I told you about it the day she made the sketch. Don't you remember the bird took it in his bill from the umbrella? Where did you find it?"

"Miss Derry, I really have no idea how the thing came in my pocket. I assure you I should not have cherished it, had I known it was—a lady's property."

"Why, it is no great harm, anyway. If you like Miss Carew——"

"But I don't like Miss Carew. That is, Miss Derry, I don't like to be teased."

His face was flushed with annoyance, and I sighed as I thought of the mischief I had done. They were really getting to see each other in quite a fair light, until now all his old dislike was revived. And Annie, too, seemed to think him more disagreeable than ever, for at dinner she scarcely noticed him. In the afternoon she came to my room for a book, saying she was going to the cave on the east shore for a while.

"I'm so sorry about that ribbon," I said.

"It shows him in his true light, Miss Arden. I am glad of it, for I was just getting foolish enough to think I had been mistaken in him."

It was a sultry, oppressive air, and I was too indolent to go out, so I took "Baddeck" and a sofa for the afternoon. I read until nearly four o'clock, and then fell asleep. When I awoke it was raining furiously and was quite dark. For a moment I was too bewildered to think. Then as a heavy peal of thunder startled me I remembered Miss Carew. I went across the passage and tapped, and looked in. The room was empty. I went hurriedly down the stairs, and into the sitting-room.

"Here comes Miss Arden, looking as if she had seen a ghost," said Mrs. Derry, smiling.

"Miss Carew is out in this storm," I said, feeling as if I should faint; "and some one must go for her."

"My God! Miss Arden, what do you mean?" asked Mr. Skidmore, turning white to the lips.

"Miss Carew went to the cave this afternoon and has not returned, and I fear she has lost her way."

"It is sure death," began May, when there was a trampling of heavy feet on the piazza, and in a moment two men were in the room, and had put poor Annie Carew on the sofa. Her long hair hung wet and tangled to the floor, and the white face was death-like in its dreadful calm. In a moment I knew what it was.

"She is dead!" said some one, in a constrained, harsh voice, "and never knew how I loved her. Oh, Annie, my darling, my love." And Mr. Skidmore fell on his knees beside her and kissed the sweet lips.

One by one we stole out of the room, and left him kneeling there. The men had found her on the shore, and thought she must have fainted from fright, and had brought her home.

"Likely the lightnin' killed her," said one. "I've known such things."

I went to my room and wept bitterly. "Poor Annie Carew!" was all I could say. Poor, unhappy girl. At the thought of Mr. Skidmore my tears flowed afresh. I was scarcely surprised that he loved her. But his pride had buried his happiness.

Later in the evening May tapped at my door. She was crying softly. "Oh, Miss Arden," she said, "she wasn't dead after all. It was only a fainting fit, and she can speak now."

"And Mr. Skidmore?"

"Is in there with her, and he has been crying. I guess it's all right between them because I saw him kissing her just now."

And all the time he had been in love with plain Miss Carew.

NEW GROUNDS OF THE WESTCHESTER POLO CLUB.

THE famous Westchester Polo Club took possession of their new quarters on the parade-ground in Prospect Park, Brooklyn, on Wednesday, June 11th, and opened the season with the second annual match with a team of the Queen's County Hunt. The new playground embraces ten acres of land in the centre of the parade, and is furnished with capital stables for the fifty-one Texan ponies belonging to the club. Great satisfaction is expressed by the members with the admirable location and conveniences of the new grounds.

The game on Wednesday was called at 5 P. M., a very large audience being assembled to witness the inaugural contest. The Westchester Polo Club was represented by Messrs. August Belmont, Jr., captain; Carroll Bryce, Harry Oelrichs, Wm. Sandford and H. L. Herbert. Their colors were yellow and black. The Queens County Hunt pinned their faith to the red and dark blue costumes worn by Messrs. F. Gray Griswold, captain; Herman Oelrichs, Frank T. Iselin, Center Hitchcock, and Pierre Lorillard, Jr.

In the hour allotted for the game the Westchester team won the three goals that were played, and were, of course, the victors. During the season in Prospect Park the Westchester Club will play every Monday, Wednesday and Saturday afternoon at four o'clock, an attraction to that section of Brooklyn that cannot fail to make the Boulevard to Coney Island more popular than ever. During August and September the club will be at Newport, and all the ponies will be transferred to that locality, but it is expected that a stirring Fall season will be inaugurated in Prospect Park during the first week in October. The English team of polo-players is expected to arrive at Newport in September, by which time all the members hope to be in good practice. At least twenty-five players will be ready by that time to contest the field against their English cousins. Quite a number of new members have joined since last year, and the playing members are also more numerous than they were last Summer. In addition to playing the match with the Englishmen the Westchester County Club members anticipate another tussle with the Buffaloians, who defeated the Westchesters last year. They are in perfect trim now for their old opponents, and expect to meet them at Newport before the end of the season. It is understood that the Buffalo polo-players are also ready to enter once more into a new contest with the New Yorkers.

HON. NATHANIEL NILES,

UNION PACIFIC RAILROAD DIRECTOR.

HON. NATHANIEL NILES, who was recently appointed in the place of Charles Francis Adams, Jr., as director of the Union Pacific Railroad, is a native of Rhode Island, but for several years has been a citizen of New Jersey. He is a grandson of Judge Nathaniel Niles, of Vermont, and is not to be confounded with his uncle, Nathaniel Niles, who was United States Minister at the Courts of Sardinia and Austria.

Mr. Niles is a lawyer, having a large practice in New York, and is trustee for several large estates. In politics he is a Republican. As a representative of that party he has been several times elected to the lower House of the New Jersey Legislature, and during his last term of office he was Speaker, filling the duties of that position with marked ability and fidelity to the public interests. As a member of the House, he served on the important Committees on Railroads and on Education, and matured several useful laws. One of these, which was passed over the veto of the Governor, provides that all moneys received from the sales and rentals of the land under water, belonging to the State, shall be paid over to the Trustees of the School Fund, for the support of free public-schools, for investment as a permanent school fund. This Act has resulted in increasing the fund from half a million to between two and three million dollars, and last year diminished the State taxes some hundred thousand dollars. Another law drawn by him donates from the State Treasury a certain sum to each school district in which an equal additional sum shall be raised by voluntary contribution, for the formation of a free-school library, and donates a further sum annually thereafter upon the like condition. Under

Digitized by Google

this law, some five hundred libraries are now in existence, being the only free libraries in the State.

Mr. Niles's record as a legislator was distinguished by his sturdy independence of railroad and corporation influences. On account of his exposure of certain fraudulent railroad legislation he was sued for five millions of dollars, but he was sustained by the courts and the complaint dismissed.

Mr. Niles has been an ardent advocate of the general introduction of the metric system of weights and measures, and under a law passed by the New Jersey Legislature last Winter, sets of these are furnished to every school in that State.

Mr. Niles is in the prime and maturity of his power, being now forty-three years of age. In every respect he will prove a worthy successor to Mr. Adams in the Government Directory of the great interest committed to the charge of his associates and himself. At once able, upright, inflexible in purpose, and familiar with all the intricate legislation which governs and defines the relations of the Government and the Union Pacific Road, he will jealously guard the rights of the people while doing justice in all things to the corporation which is now more than ever a most important factor in the development of transcontinental traffic. Mr. Niles proposes to give the closest attention to the duties of his position, and, being the only Government Director in the East, where the main offices of the company are located, these duties will, of course, be especially important and onerous. We learn that the Government Directors will start on July 20th on the usual Summer inspection of the Union Pacific Line, and will be absent some six weeks.

A MYSTERIOUS CRIME IN NEW YORK.

MRS. DR. HULL FOUND SUFFOCATED AND BOUND IN HER BEDROOM.

ON Wednesday afternoon, June 11th, New York was startled by the announcement that Mrs. Jane L. De F. Hull, wife of Dr. Alonzo G. Hull, and a prominent member of the Society of Sorosis, had been found dead in bed at her residence, No. 140 West Forty-second Street, under circumstances that suggested a murder of more than usual mystery. The discovery was made by the colored cook, who, at seven o'clock in the morning, went to Mrs. Hull's bedroom to obtain money to pay the baker. Hearing no response to the knocking, the cook opened the door, and was horrified at the spectacle disclosed. Lying at full length upon her back, with her hands tied tightly across the body, and the ankles tied to the sides of the bed, with a bandage over the eyes and a heap of bedclothes about the throat and face, was the cold body of Mrs. Hull. An alarm was at once given, and Captain Williams with some of his officers took possession of the premises, and summoned the coroner. Mrs. Hull was a powerful woman, weighing some two hundred pounds, and was sixty-three years of age.

Upon his arrival, Captain Williams made an examination of the body, the apartment and the house. It was found that the deceased had not been gagged. There were an empty water-pitcher and a partially empty bottle of cologne lying on the bed. Two pillows which were crushed between her head and the wall appeared to have been roughly handled. Removing the bandage from the eyes, it was seen that the lashes as well as the hair directly over the eyes had been singed. There were fragments of the common sulphur and the parlor matches lying on the carpet, some of them with the ends well chewed. The drippings of a candle, of a different color from those she was in the habit of using, were detected on one of the sleeves of the deceased's night-dress.

The police were informed that a gold watch and chain, an English enameled ring, a five-stone diamond ring, an emerald ring, and a topaz necklace of Indian pattern, with English setting, had disappeared. There were marks on the fingers of the deceased which might indicate that the rings had been torn or bitten off. An open trunk was at the side of the bed, and a quantity of trinkets were seen scattered over a sofa at the window looking into the yard.

Coroner Woltman responded to the call of Captain Williams, and, after viewing the body, impaneled the following jury: Dr. Thomas C. Finnell, of No. 132 West Houston Street; Dr. Thomas C. Knox, of No. 58 Carmine Street; Dr. S. J. Clark, of No. 148 West Houston Street; Dr. John McIntosh, of No. 43 Sixth Avenue; F. G. Reimer, artist, of No. 719 Sixth Avenue; J. D. Kellogg, teacher, of No. 709 Sixth Avenue; G. W. Thomas, daguerreotyper, of No. 706 Sixth Avenue; R. F. Haymann, furnishing goods, of No. 697 Sixth Avenue; J. G. Cary, painter, of No. 744 Sixth Avenue, and De Witt Langley, real estate, of No. 749 Sixth Avenue. The body was removed from the bedroom to the rear parlor, where the jury viewed it, and, while a preliminary examination of the inmates of the house was being conducted by the coroner, his deputy, Dr. MacWhinnie, assisted by Dr. Finnell, made an autopsy of the body. The organs were all found to be in a normal condition, excepting that the lungs and brain were considerably congested, a result of death by suffocation. There was no evidence of strangulation or particular violence.

Learning that the deceased lady had been possessed of considerable means in the form of bonds, stock certificates and other securities, and taking into consideration the details of the case as they appeared in the hasty investigation first made, a single theory seems to have been formed by the police and public alike. It was that some parties had broken into Mrs. Hull's bedroom for the purpose of robbery, and awakening her in their search after valuables, they suffocated her with the pillows, tore the rings off her fingers, and then, fearing they had committed murder, endeavored to revive her by dashing water and cologne on her face, holding a lighted candle to her eyes to see if there was any movement, and while doing so singeing the lashes and hair in their nervousness. Being assured that life was extinct, they then tore up the sheets and bound her hands and feet, piled clothing about the throat, placed the pillows beneath her head, and withdrew from the premises.

The police scout the idea that the work was done by professional thieves, as it was too bungling, and various articles of silver were not disturbed. That the binding was done after death is believed, for the reason that Mrs. Hull would have proved a match in a struggle for one or two men; there would have been greater evidences of disorder in the room and sufficient noise to attract attention, and the body would have borne marks of the violence.

At 10:30 on Friday morning, brief funeral services were held at the residence in the presence of a very few of the most particular friends, the Rev. J. W. Bonham, of the Church of the Holy Trinity, officiating, and at the close the body was taken to Plainfield, N. J., for burial.

The best detective skill in the city has been employed in the case, and a variety of theories acted upon. The drains in the house were opened and examined in the search for the missing articles, and all pawnbrokers were notified to report any attempt to dispose of them, but at the time of writing nothing gained from these steps had been reported. A conviction settled upon many of the authorities in the latter part of the week that the murder was committed either by some inmates of the dwelling or by outside parties, aided by one or more persons thoroughly familiar with the house, its apartments, etc. Arrests by the police are hourly expected, and it is thought the coroner will resume the investigation about the middle of the present week.

An American Chapel in China Sacked.

ON Sunday, the 16th of February, a mob of over a hundred persons forcibly entered the American Methodist Chapel at Yunch'on, 140 miles south of Foochow, and violently assaulted the Christians who had gathered therein for divine worship. The catechist and congregation escaped to the magistrate's yamen, leaving the mob in possession of the chapel. The rabble immediately set to work and destroyed the seats, tables, etc. Previous to this attack the people had been called upon by the gentry to subscribe $100 cash—avowedly towards the extermination of Christianity in their district. Their *modus operandi* was to tear down the chapel in the first instance, and subsequently to destroy the houses of the Christians, thus forcibly driving them out of the place. But, happily, only part of this programme was carried out. The sufferers by the riot fled to the magistrate's yamen, where they were kindly received and promised protection.

A few days later the magistrate went in person to inspect the wrecked chapel. He immediately instituted an examination into the whole affair, and required the offenders to pay all expenses attending the repair of the chapel, to furnish medical aid to the wounded men, and to find six months' security for the lives of the persons assaulted. The man who had been most severely beaten was ordered to receive $30 as compensation, but, with rare disinterestedness, he refused to receive the money, in order that the purity of his motives in becoming a Christian should not be doubted. By this prompt action of the Yunch'un magistrate, and the unselfish conduct of the native Christians, not only has peace been restored, but also a good state of feeling between the Christians and their heathen neighbors secured, the latter for once fully understanding that Christians must not be persecuted for refusing to contribute to idolatrous purposes, and also that the higher and nobler principles which they claim to have adopted are entitled to respect and legal recognition.

Yale Senior Class Statistics.

THE statistics of the Yale Class of '79 show that of the 132 members of the class, 37 are natives of Connecticut, and the same number of New York, 8 of Pennsylvania, 6 of Illinois, 4 of Indiana, Maine, Massachusetts, New Jersey, and Wisconsin each; 3 of Missouri, 2 of Michigan and New Hampshire each, and 1 of Arkansas, California, Georgia, Iowa, Maryland, Ohio, Rhode Island, South Carolina, Vermont, Virginia, and the District of Columbia each. Four were born in foreign countries—1 in England, 1 in Prussia, and 2 in China; one being the son of a former American Consul at Macao. The total age of the class at Commencement Day will be 2,975 years 10 months 24 days; the average is 22 years 6 months 15 days and 19 hours. This makes it the oldest class, with the exception of '71 and '78, of which there is record. The tallest man is 6 feet 2 inches; the shortest 5 feet 2¾ inches; 5 members measure 6 feet. The average height is 5 feet 8 inches. The average weight is 148¾ pounds; the heaviest man weighs 192 pounds; the lightest 119 pounds. As far as can be ascertained, the choice for professions stands as follows: 49 law, 13 medicine, 9 ministry, 10 literary, 5 journalism, 14 business, 1 literature pure and undefiled, 1 opera-singer, 1 engineer, 1 barkeeper, 1 tramp. Those who drink number 94, and 80 smoke; only 5 chew; all but 12 play cards; 64 play billiards. The class is divided as to politics as follows: 94 are Republicans, 19 Independents, 16 Democrats, 2 hard money men, 1 Greenbacker, 1 Janesonite. Ninety are free-traders, and 25 protectionists. There are 25 congregationalists, 17 Episcopalians, 14 Presbyterians, 5 Methodists, 1 Conservative Unitarian, and 1 Jew. Twenty-seven are said to be engaged to be married. This class has spent while in New Haven $672,000.

Divorces in New England.

THE Vermont *Chronicle* has collected some interesting facts concerning divorce in Massachusetts, Rhode Island, Connecticut and Vermont. During the last 19 years in Massachusetts the whole number of absolute divorces has been 7,225, more than half of which were procured in the last seven years. In Rhode Island, for the nine years covered by the statistics available, there have been 1,670 divorces to 21,715 marriages. The ratio of divorces to marriages for the period is 1 to 13, with a slight increase in the later years. There is 1 divorce to about every 1,200 of its inhabitants. The divorces in that State vary from year to year, probably on account of changes in the laws.

In Connecticut the statistics cover nearly 30 years. In 1849 only 91 divorces were granted. Under the new law of that date, the number was increased more than one-third in a single year. The practice grew steadily until 1864 when 426 were granted. But from that time until the close of 1877, the number, 448 annually on the average, varied but little, the ratio to marriages being about 1 to 10.4, and 1 divorce to every 1,200 inhabitants. In Connecticut there must be one divorce to every eight Protestant marriages. A comparison made from the table of the last report of the State Librarian, giving the births, marriages, deaths, and divorces for 14 years, will show, says the *Chronicle*, unless we mistake in our calculation, that there is less variation in that State from the average annual number in the divorces than in either the births, the deaths, or the marriages. If all are collected with equal care, divorce in Connecticut is more uniform, if not more certain, than death!

Including Vermont, the ratio of divorce to marriage in the four States for the last few years is as follows: Vermont, 1 to 16; Massachusetts, 1 to 23.7; Rhode Island, 1 to 13; Connecticut, 1 to 10.4.

Taking the four States together, in the year 1877 there were granted 1,331 divorces in those States. If Maine and New Hampshire have a like record of temporary marriages, not far from 1,800 divorces are granted annually in New England. The recent change for the better in the laws of Connecticut has some effect towards improvement, which is said also to be already very noticeable in the Vermont courts.

PICTORIAL SPIRIT OF THE FOREIGN ILLUSTRATED PRESS.

Methods of Voting in Spanish Provinces.

The scene in a voting hall in Spain is somewhat quaint. The voters are, for the most part, ignorant peasants who can merely make their mark, and to whom the process of voting requires to be explained at least half a dozen times before they can be induced to put their hands to paper. They stand in solemn awe, as though in the Tribunal of the Inquisition, not a few of them muttering a *Pater* as they turn their devout glances to the *Paso*, or representation of the Crucifixion, which adorns the walls. Outside everything is animation, for your Spaniard is a fierce politician. In the ill-paved, narrow street, white in a blaze of sunlight, on the broken steps, beneath the cool vestibule, the voters stand in gesticulating groups, their picturesque garments adding wondrously to the general effect. They hold councils of war in gloomy corners, denounce the Government and its myrmidons, hint in muffled whispers at revolution, or sing the praises of their especial candidate in that gushing language which Spaniards love so well.

Incidents of the Zulu Campaign.

Our illustrations of the Zulu campaign this week require no lengthy notice. At this writing there is no news of importance from the seat of war, and, unless the Zulus make another of their astonishing dashes, it is scarcely likely there will be until after the arrival of General Sir Garnet Wolesley, the new commander-in-chief. In the meantime we continue our pictorial chronicle of the war by giving some less sanguinary sketches than have been presented of late. One represents the mode of traveling by post-cart, with six horses driven at full gallop, between Durban or Pinetown and Pietermaritzburg, the capital of Natal. General Marshall and his staff reached his present headquarters by this conveyance, which does thirty-four miles in less than three hours, changing horses every eight or ten miles, and keeping up a mad speed over hill and dale throughout the journey. The sketch of "stopping a charge" shows an arrangement of wires for entangling the enemy in case they endeavor to carry the fort by storm, which was constructed within easy rifle shot of the beleaguered position, and doubtless did much towards preventing the assaults that were hourly expected, for the Zulus, skillful as they have shown themselves to be in military science, had no knowledge of such singular means of defense, and their ignorance deterred them from making a dubious effort to find out. The view of the seven-pounder, drawn by mules and stuck in a spruit, illustrates the difficulty of moving artillery in countries unprovided with roads and bridges. In his official report Colonel Pearson refers to this trouble. Although he sent out on one occasion several extra spans of oxen to assist some commissariat wagons over the hilly country, the ground was in such a state after the incessant rain that eight of these wagons had to be abandoned.

New Model Dwellings in London.

The Victoria Dwellings Association, with limited liability, established to provide healthy and comfortable dwellings for the laboring classes, have constructed and let a portion of their new buildings in Stroud-vale, Islington, near the Metropolitan Cattle Market. On May 24th, the Right Hon. R. Assheton Cross, Secretary of State for the Home Department, laid the foundation stone of an additional block of these buildings, which are henceforth named after the Prime Minister, the Earl of Beaconsfield, who in June, 1877, opened those previously completed at Batterses. We give an illustration of these Beaconsfield Buildings, which have been erected from the designs of the architect to the Victoria Dwellings Association, Mr. Charles Barry, President of the Royal Institute of British Architects. The two blocks already finished and occupied by tenants suffice to accommodate 1,106 persons, and that which is now begun will provide for 900 more.

Travelers Overtaken by Bush-fires in Australia.

Accounts of bush-fires outline a phase of life with which the dwellers in cities are totally unacquainted. In Australia as well as on the great prairies of our Western States, they are of frequent occurrence. In the latter section they are becoming less serious by reason of the rapid opening of the country to agricultural and stock-raising enterprises; but where settlers are still exposed to a sudden flood of flame, whether in the West or in Australia, they adopt a common method of protection for their dwellings, barns and groceries. This is done by running two or three plow-furrows around the cluster of buildings, and two or three more a short distance away, and burning the strip between. Our illustration shows the method usually pursued by Australian travelers when overtaken on the plains by the flames. When they see the fire in the distance, they select a spot and burn the grass around them for a considerable distance, taking care to stamp it out, so that it does not spread. The flames then pass them unharmed, except for the smoke and heat and rush of animals to escape from slow death.

The Fetes at Marseilles.

During the early part of the month of May, Marseilles, France, held high festival in honor of what is technically termed a "Concours Regional," or a gathering of the inhabitants from the Southern departments adjacent to the mouths of the Rhone. The *fêtes* this year were especially noteworthy from the fact that whereas on former occasions the clergy have assumed the privilege of blocking up the traffic in the streets by religious processions, and the rejoicings were organized according to the orders of the Imperial or Royal ruler of the hour, the impulsive Southerners seemed to have determined that they would have a great *fête* on their own account with popular processions, which should be wholly unconnected with any religious sect. The rejoicings accordingly began on the 3d by a general illumination of all the streets and public buildings. Next day there was a review of some 100,000 troops in the Prado. One of the most interesting features of the programme was the water tournament in the Old Port, a portion of which had been cleared of all its usual crowd of shipping, and a fourth side formed by a line of barges. In the jousts the places of the knights of old were taken by men armed with blunt lances and shields, standing on narrow planks raised about ten feet above the water, and projecting the same distance astern of the eight-oared boats which supplied the places of steeds. These boats were painted in stripes of blue and white, or red and white, and it was the duty of each steersman to bring his boat near enough to that of the adversary to enable the champions to deliver their blows. Occasionally both of the jousters were able to withstand the shock, but generally one was knocked off his perch, and occasionally both were seen falling together into the not over-fragrant water of the Old Port. The next night the Old Port was lighted up by some 40,000 lanterns, and there was a procession of boats or barges adorned with lights of various colors. The remainder of the week was taken up by the opening of an agricultural show and a Fine Art Exhibition, pigeon-matches, illuminations in the Botanical Gardens, and finally a grand cavalcade on the 11th.

AT HOME AND ABROAD.

—THE Sunday liquor law is being rigidly enforced in Syracuse, N. Y.

—DURING the season at Niagara, the falls will be illumined at night by electric lights.

—UNDER its present form of Government the City of Mobile is saving $10,000 monthly.

—A STATE Convention of Prohibitionists will be held at Des Moines, Iowa, on July 4th.

—ANOTHER Russian cruiser, built at Philadelphia, the *Zabiaka*, sailed away on June 8th, ostensibly for Sitka.

—THE last census of Portugal gives the total population at 4,745,124, an increase of 401,189 in fourteen years.

—THE new dike around the Hungarian city of Szegedin is finished, and it is expected the ill-fated city will be thoroughly drained by July.

—IT is proposed in London to form an International Farmers' Union, uniting the agricultural interests of England, Ireland and Scotland.

—HEREAFTER allopathic physicians in Philadelphia will have their bills collected monthly or at the end of services in a case by a common financial agent.

—BOARDS of health are being organized extensively throughout Tennessee, and a general cleaning-up is in progress. No more yellow fever is wanted.

—UNDER the reorganization of the Russian army, just ordered by an Imperial ukase, the army will be increased by 20,000 men in time of peace, and by 130,000 in time of war.

—THE cavalry force of Germany numbers 91,000 men, that of France, 70,000. In artillery the numerical advantage is with the French, the figures being for France, 2,442 guns, and for Germany, 2,124.

—IT now appears that the schoolchildren who died so suddenly at Jacob's Mill, Va., were not poisoned by the brook, as at first supposed, but were victims of diphtheria induced by foul pools near the schoolhouse.

—ACCORDING to the new Chinese Immigration Restriction Bill, the captain of any vessel neglecting to pay $50 on each Chinese landing in the colony of New South Wales is liable to a penalty of $500 and to the forfeiture of his vessel.

—CAPTAIN WEBB, the hero of the British Channel, won the six days' swimming contest at the Lambeth Baths, London, covering a total distance of seventy-five miles. He remained in the water as long as fourteen hours at a time.

—FOR the sixth time in the last fifty years the Siberian Navy has been ordered moved. It has been located at Okhotsk, Ayan, Petropavlovsk, Nicholaevsk and Vladivostok, and is now to be established at the Bay of Olga, at an enormous expense.

—A KNOWN individual in London has got out of an action for breach-of-promise by going into liquidation, the statute giving him "a discharge of all actions of contract," and the pleading has been successfully maintained before the Court of Queen's Bench.

—THIRTY years ago the first sugar cane was planted in Natal, South Africa. At the present time there are not less than 50,000 acres under this crop in the colony, yielding sufficient sugar to enable it, after supplying its own wants, to export 150,000 cwt. annually.

—THE London *Examiner*, after asserting that "notwithstanding the rose-colored official reports and encouraging statements in Parliament, there can be no doubt that our whole police arrangements have broken down entirely," advocates the employment of women as detectives.

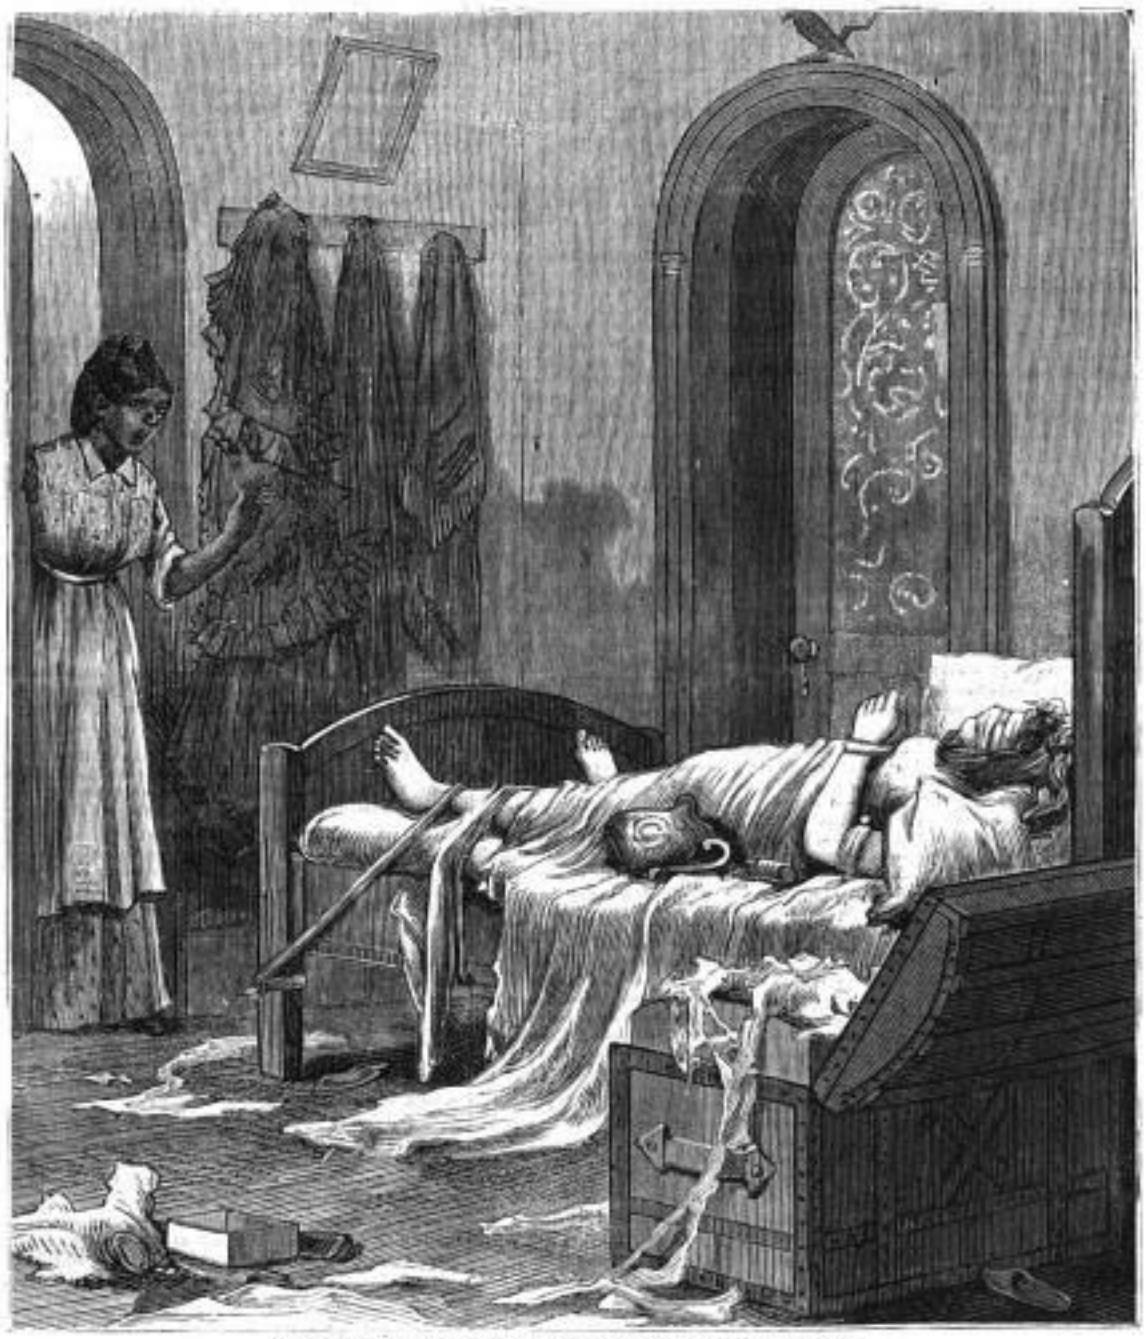
—THE five bridges over the Thames, from Lambeth Bridge on the east to Battersea Bridge on the west, were opened to the public free for the first time on Saturday, May 24th. The ceremony was performed by the Prince of Wales, and there was a considerable demonstration on the occasion.

—PINE straw, hitherto regarded as worthless, has suddenly become an article of export at Wilmington, N. C. It is said there is a factory in New York which will consume fifty tons per week, extracting from it a kind of spirit useful for medical purposes, and manufacturing the remains into paper-stock and a stuffing for mattresses.

—THERE have been dug up on a plantation in Lee County, Ga., three pictures, one an Indian chief, one a squaw, and the third a girl, on them strips of something resembling glass, and looking very much like photographic negatives, but the plates are not of glass. They were found, with some arrow-heads, in a very hard and strong clay pot.

—IN July, the latest of Herr Krupp's wonders, a forty-centimetre gun, weighing over seventy tons, and being the largest and heaviest piece of ordnance as yet ever constructed on the breech-loading system, is to be publicly tested at the Meppen range. Invitations to send representatives have been forwarded to every European Government.

—THERE are in Paris 20,000 Sisters of Charity belonging to 225 congregations, who receive and nurse the sick or instruct the young. There are also many congregations whose members tend invalids at their own homes, and some 200 religious organizations not recognized by the authorities, with 40,000 members, vowed to care for the poor and suffering.



—THE shaft of the monument to General Wool, to be erected at Troy, N. Y., will be formed from the largest block of granite ever cut in the United States, it having just been taken from the quarry at Vinalhaven, Mass. It is 50 feet long, 5½ feet square at the base, and 2½ feet square at the top. It weighs from 75 to 100 tons, and cost $1,700 to blast and convey to the workshed.

—A SINGULAR legal complication has arisen in Denton, Texas, where two men, in 1878, were found guilty of murder, but at the time were serving a thirty-years' sentence in the penitentiary. The Court of Appeals having just confirmed the second finding, the question comes up whether the men shall be brought out at once and hanged, or kept there the balance of the thirty years and then executed.

—A TELEGRAPHIC dispatch, dated Sierra Leone, May 5th, contains the following: "Governor Rowe has succeeded in hoisting the British flag at Kikonkoh, on the Searcies River. He was escorted by H.M.S. *Pioneer* and his own yacht, the *Prince of Wales*, with one hundred Kroomen and fifty armed policemen. The natives look upon the occupation as a violation of their territory. The French traders are preparing to remove their goods for fear of war.

—WE receive intelligence all the way from Sheffield, England, that the American Missionary Association has decided to accept the proposition of Mr. Arthington, of Leeds, accompanied with $15,000, to occupy a district in Central Africa which lies south of Abyssinia and north of the Victoria Nyanza. It is accessible by the Nile, and steamers can be used on the Nile and its tributaries so as to facilitate communication with different tribes. The American Missionary Association is now making an appeal for $35,000 more to start the mission. About ten missionaries will be required.

THE NEW STEAMSHIP "ARIZONA," OF THE WILLIAMS & GUION LIVERPOOL LINE, THE LARGEST OCEAN PASSENGER STEAMER IN THE WORLD.

A MAMMOTH OCEAN STEAMSHIP.

THE new steamship *Arizona*, of the Williams & Guion Liverpool Line, which arrived at this port June 8th, is in every respect a triumph of naval architecture. She was built by Messrs. Elder & Co., of Glasgow, and is the largest vessel that ever left the Clyde. Her model is one of the finest it is possible to imagine, her lines and clear sheer being those of a racing-yacht, and her four masts and two funnels, all of which have a slight rake, add an extra nautical feature to the generally graceful appearance of the ship. She is 465 feet in length, 46 feet beam, 37¼ feet depth of hold, and close on 6,000 tons burden. Her engines are the latest improvement on the compound principle, there being one high and two low pressure cylinders of an indicated horse-power of 7,000. She is propelled with a four-bladed screw 23 feet in diameter, with a pitch of 33 feet. The steam is generated by seven double-ended boilers, and the consumption of coal is estimated at about one hundred tons per day for full steaming purposes. There are on the main deck five powerful steam winches, with double-gearing steam capstan for working the anchor, etc. She is steered from the bridge by steam, and, in case of accident, is fitted up with the usual manual steering gear in a wheelhouse, protected by a strong iron turtle-back deck. There are also steam pumps and a powerful engine, by which any quantity of water can be brought to any part of the ship in a few seconds. The whole length of main deck affords a splendid promenade. There is a fine stretch of clear deck upwards of 400 feet, and it can be used in all kinds of weather, as it is protected overhead by the projecting sides of the spacious saloon-deck. In fine weather there is nothing whatever to interrupt the view seaward, while a long range of permanent seats on either side of the deck-houses will afford passengers an easy lounge.

The splendid entrance to the saloon leads from the main deck forward. The saloon has two separate entrances. The handsome smoking-room is fitted up with a number of circular white marble tables; the ceiling is painted a pure white, with panels bordered with gold, and are separated by columns surrounded with gilt-molded caps and scroll work. The lounges and settees are upholstered in crimson velvet, with oil-cloth to match. The ladies' boudoir is the most elegant apartment of the kind that could be wished for by the most fastidious of the fair sex; nothing can equal the comfort, combined with elegance, which pervades this room. From this room ladies have easy access to the saloon, and here, as on the main deck, a splendid promenade presents itself, the view being uninterrupted from stem to stern. The saloon occupies the entire breadth of the ship and is lit up by thirty-six silver-plated lamps; it is also furnished with revolving chairs, a splendid full-toned piano and a library.

The state-rooms, which are situated forward and aft the saloon, are fitted up with every consideration for the comfort of the passengers. Nothing appears to be left undone for voyagers' comfort, bath-rooms, barber's-shop, wash-basins, etc., being carefully supplied. Aft of the saloon is situated the intermediate accommodation. Nothing could exceed the care which has been bestowed upon the arrangements provided for this class of passengers. The ceiling is lofty and the cabin is flooded with light; the sleeping-berths are well-ventilated, lighted

CALIFORNIA.—DISCUSSING THE CHINESE QUESTION IN "THE FOUNTAIN" BEER VAULTS, SAN FRANCISCO.—FROM A SKETCH BY WALTER YEAGER.—SEE PAGE 283.

Digitized by Google

and lofty, and combine comfort with a degree of elegance rare in intermediate accommodation; in fact, it is not many years since this cabin would have been considered an exceptionally good saloon in some of our ocean-going steamers. The "steerage" is a vast improvement on anything of the kind hitherto provided, the berths being lofty, well lighted and ventilated. The comfort of the steerage passengers appears to have entered as much into the consideration of the builders and owners of the *Arizona* as that of the more affluent and favored class of ocean travelers. She can, if necessary, accommodate 2,000 passengers, of whom 160 can dine together in the saloon. She is commanded by Captain James Price, Sr., the oldest, most trusted and most experienced officer of the Guion Company, which company, by-the-way, has not lost a single life for the last thirty years.

On her passage from Liverpool to this port, the *Arizona* proved herself exceptionally fast, her actual time being 7 days, 11 hours and 32 minutes. On one day she made 398 miles. Her engineer claims that he can make the trip in twenty hours less than the time named, and if this statement shall be realized, the *Arizona* will take rank as the fastest ocean steamer, as well as the largest, in the world. The fastest trip ever made between Queenstown and New York was 7 days, 10 hours and 53 minutes.

THE FALLEN LEAVES.

BY WILKIE COLLINS.

CHAPTER XXXVII.

THE inquiry into the circumstances under which Mrs. Farnaby had died was held in the forenoon of the next day.

Mr. Melton surprised Amelius by calling for him and taking him to the inquest. The carriage stopped on the way and a gentleman joined them, who was introduced as Mr. Melton's legal adviser. He spoke to Amelius about the inquest, stating, as his excuse for asking certain discreet questions, that his object was to suppress any painful disclosures. On reaching the house, Mr. Melton and his lawyer said a few words to the coroner downstairs, while the jury were assembling on the floor above.

The first witness examined was the landlady.

After deposing to the date at which the late Mrs. Farnaby had hired her lodgings, and verifying the statements which had appeared in the newspapers, she was questioned about the life and habits of the deceased. She described her late lodger as a respectable lady, punctual in her payments, and quiet and orderly in her way of life; she received letters, but saw no friends. On several occasions an old woman was admitted to speak with her, and these visits seemed to be anything but agreeable to the deceased. Asked if she knew anything of the old woman, or of what had passed at the interviews described, the witness answered both questions in the negative. When the woman called, she always told the servant to announce her as "the nurse."

Mr. Melton was next examined, to prove the identity of the deceased.

He declared that he was quite unable to explain why she had left her husband's house under an assumed name. Asked if Mr. and Mrs. Farnaby had lived together on affectionate terms, he acknowledged that he had heard, at various times, of a want of harmony between them, but was not acquainted with the cause. Mr. Farnaby's high character and position in the commercial world spoke for themselves; the restraints of a gentleman guided him in his relations with his wife. The medical certificate of his illness in Paris was then put in, and Mr. Melton's examination came to an end.

The chemist who had made up the prescription was the third witness. He knew the woman who brought it to his shop to be in the service of the first witness examined—an old customer of his, and a highly-respected resident in the neighborhood. He made up all prescriptions himself in which poisons were conspicuous ingredients, and he had affixed to the bottle a slip of paper bearing the word "Poison," printed in large letters. The bottle was produced and identified, and the directions in the prescription were shown to have been accurately copied on the label.

A general sensation of interest was excited by the appearance of the next witness—the woman-servant. It was anticipated that her evidence would explain how the fatal mistake about the medicine had occurred. After replying to the formal inquiries, she proceeded as follows:

"When I answered the bell, at the time I have mentioned, I found the deceased standing at the fireplace. There was a bottle of medicine on the table, by her writing-desk. It was a much larger bottle than that which the last witness identified, and it was more than three parts full of some colorless medicine. The deceased gave me a prescription to take to the chemist's, with instructions to wait and bring back the physic. She said, 'I don't feel at all well this morning; I thought of trying some of this medicine' (pointing to the bottle by her desk)—'but I am not sure it is the right thing for me. I think I want a tonic. The prescription I have given you is a tonic.' I went out at once to our chemist and got it. I found her writing a letter when I came back, but she finished it immediately and pushed it away from her. When I put the bottle I had brought from the chemist on the table she looked at the other larger bottle which she had by her, and she said, 'You will think me very undecided. I have been doubting, since I sent you to the chemist, whether I had not better begin with this medicine here, before I try the tonic. It's a medicine for the stomach; and I fancy it's only indigestion that's the matter with me, after all.' I said, 'You eat but a poor breakfast, ma'am, this morning. It isn't for me to advise; but, as you seem to be in doubt about yourself, wouldn't it be better to send for a doctor?' She shook her head, and said she didn't want to have a doctor if she could possibly help it. 'I'll try the medicine for indigestion first,' she says, 'and, if it doesn't relieve me, we'll see what is to be done later in the day.' While we were talking, the tonic was left in its sealed paper cover, just as I had brought it from the shop. She took up the bottle containing the stomach-medicine and read the directions on it: 'Two tablespoonsful by measure-glass twice a day.' I asked if she had a measure-glass, and she said yes, and sent me to her bedroom to look for it. I couldn't find it. While I was looking I heard her cry out, and ran back to the drawing-room to see what was the matter. 'Oh!' she says, 'how clumsy I am! I've broken the bottle.' She held up the bottle of the stomach-medicine and showed it to me, broken just below the neck. 'Go back to the bedroom,' she says, 'and see if you can find an empty bottle; I don't want to waste the medicine if I can help it.' There was only one empty bottle in the bedroom, a bottle on the chimney-piece. I took it to her immediately. She gave me the broken bottle; and, while I poured the medicine into the bottle which I had found in the bedroom, she opened the paper which covered the tonic I had brought from the chemist. When I had done, and the two bottles were together on the table—the bottle that I had filled and the bottle that I had brought from the chemist—I noticed that they were both of the same size, and that both had a label pasted on them, marked 'Poison.' I said to her, 'You must take care, ma'am, you don't make any mistake, the two bottles are so exactly alike.' 'I can easily prevent that,' she says, and dipped her pen in the ink and copied the directions on the broken bottle on to the label of the bottle that I had just filled. 'There!' she said, 'now I hope your mind's at ease!' She spoke cheerfully, as if she was joking with me. And then she said, 'But where's the measure-glass?' I went back to the bedroom to look for it, and couldn't find it again. She changed all at once, upon that—she became quite angry, and walked up and down in a fume, abusing me for my stupidity. It was very unlike her. On all other occasions she was a most considerate lady. I made allowances for her. She had been very much upset earlier in the morning, when she had received a letter which she told me herself contained bad news. Yes; another person was present at the time—the same woman that my mistress told you of. The woman looked at the address on the letter, and seemed to know who it was from. I told her a squint-eyed man had brought it to the house—and she left suddenly. I don't know where she went, or the address at which she lives, or who the messenger was who brought the letter. As I have said, I made allowances for the deceased lady. I went down-stairs, without answering, and got a tumbler and a tablespoon to serve instead of the measure-glass. When I came back with the things she was still walking about in a temper. She took no notice of me. I left the room again quietly, seeing she was not in a state to be spoken to. I saw nothing more of her until we were alarmed by hearing her scream. We found the poor lady on the floor in a kind of fit. I ran out and fetched the nearest doctor. This is the whole truth, on my oath; and this is all I know about it."

The landlady was recalled at the request of the jury, and questioned again about the old woman. She could give no information. Being asked next if any letters or papers belonging to, or written by, the deceased lady had been found, she declared that, after the strictest search, nothing had been discovered but two medical prescriptions. The writing-desk was empty.

The doctor was the next witness.

He described the state in which he found the patient, on being called to the house. The symptoms were those of poisoning by strychnine. Examination of the prescriptions and the bottles (aided by the servant's information) convinced him that a fatal mistake had been made by the deceased, the nature of which he explained to the jury as he had already explained it to Amelius. Having mentioned the meeting with Amelius at the house-door, and the events which had followed, he closed his evidence by stating the result of the post-mortem examination, proving that death was caused by the poison called strychnine.

The landlady and the servant were examined again. They were first instructed to inform the jury exactly of the time that had elapsed, from the moment when the servant had left the deceased alone in the drawing-room, to the time when the screams were first heard. Having both given the same evidence, on this point, they were next asked whether any person, besides the old woman, had visited the deceased lady, or had on any pretense obtained access to her, in the interval. Both swore positively that there had not even been a knock at the house-door in the interval, and that the area-gate was locked, and the key in the possession of the landlady. This evidence placed it beyond the possibility of doubt that the deceased had herself taken the poison. The question whether she had taken it by accident was the only question left to decide, when Amelius was called as the next witness.

The lawyer retained by Mr. Melton, to watch the case on behalf of Mr. Farnaby, had hitherto not interfered. It was observed that he paid the closest attention to the inquiry at the stage which it had now reached.

Amelius was nervous from the outset. The early training in America, which had hardened him to face an audience and speak with self-possession on social and political subjects, had not prepared him for the very different ordeal of a first appearance as a witness. Having answered the customary inquiries, he was so painfully agitated in describing Mrs. Farnaby's sufferings, that the coroner suspended the examination for a few minutes, to give him time to control himself. He failed, however, to recover his composure, until the narrative part of his evidence had come to an end. When the critical questions bearing on his relations with Mrs. Farnaby began, the audience noticed that he lifted his head, and looked and spoke, for the first time, like a man with a settled resolution in him, sure of himself.

The questions proceeded:

Was he in Mrs. Farnaby's confidence, on the subject of her domestic differences with her husband? Did those differences lead to her withdrawing herself from her husband's roof? Did Mrs. Farnaby inform him of the place of her retreat? To these three questions the witness (speaking quite readily in each case) answered Yes. Asked next what the nature of the "domestic differences" had been, whether they were likely to affect Mrs. Farnaby's mind seriously, why she had passed under an assumed name, and why she had confided the troubles of her married life to a young man like himself (only introduced to her a few months since), the witness simply declined to reply to the inquiries addressed to him. "The confidence Mrs. Farnaby placed in me," he said to the coroner, "was a confidence which I gave her my word of honor to respect. When I have said that, I hope the jury will understand that I owe it to the memory of the dead to say no more."

There was a murmur of approval among the audience, instantly checked by the coroner. The foreman of the jury rose, and remarked that scruples of honor were out of place at a serious inquiry of that sort. Hearing this, the lawyer saw his opportunity, and got on his legs. "I represent the husband of the deceased lady," he said. "Mr. Goldenheart has appealed to the law of honor to justify him in keeping silence. I am astonished that there is a man to be found in this assembly who fails to sympathize with him. But as there appears to be such a person present, I ask permission, sir, to put a question to the witness. It may, or may not, satisfy the foreman of the jury; but it will certainly assist the object of the present inquiry."

The coroner, after a glance at Mr. Melton, permitted the lawyer to put his question in these terms:

"Did your knowledge of Mrs. Farnaby's domestic troubles give you any reason to apprehend that they might urge her to commit suicide?"

"Certainly not," Amelius answered. "When I called on her, on the morning of her death, I had no apprehension whatever of her committing suicide. I went to the house as the bearer of good news; and I said so to the doctor, when he first spoke to me."

The doctor confirmed this. The foreman was silenced, if not convinced. One of his brother-jurymen, however, feeling the force of example, interrupted the proceedings, by assailing Amelius with another question: "We have heard that you were accompanied by a young lady at the time you have mentioned, and that you took her up-stairs with you. We want to know what business the young lady had in the house?"

The lawyer interfered again. "I object to that question," he said. "The purpose of the inquest is to ascertain how Mrs. Farnaby met with her death. What has the young lady to do with it? The doctor's evidence has already told us that she was not in the house, until after he had been called in, and the deadly poison had begun. I appeal, sir, to the law of evidence, and to you, as the presiding authority, to enforce it. Mr. Goldenheart, who is acquainted with the circumstances of the deceased lady's life, has declared on his oath that there was nothing in those circumstances to inspire him with any apprehension of her committing suicide. The evidence of the servant at the lodgings points plainly to the conclusion (already arrived at by the medical witness), that the death was the result of a lamentable mistake, and of that alone. Is our time to be wasted in irrelevant questions, and are the feelings of the surviving relatives to be cruelly lacerated to no purpose, to satisfy the curiosity of strangers?"

A strong expression of approval from the audience followed this. The lawyer whispered to Mr. Melton, "It's all right!"

Order being restored, the coroner ruled that the juryman's question was not admissible, and that the servant's evidence (taken with the statements of the doctor and the chemist) was the only evidence for the consideration of the jury. Summing up to this effect, he recalled Amelius (at the request of the foreman) to inquire if the witness knew anything of the old woman who had been frequently alluded to in the course of the proceedings. Amelius could answer this question as honestly as he had answered the questions preceding it. He neither knew the woman's name, nor where she was to be found. The coroner inquired (with a touch of irony) if the jury wished the inquest to be adjourned under existing circumstances.

For the sake of appearances, the jury consulted together. But the luncheon-hour was approaching; the servant's evidence was undeniably clear and conclusive; the coroner, in summing up, had requested them not to forget that the deceased had lost her temper with the servant, and that an angry woman might well make a mistake which would be unlikely in her cooler moments. All these influences led the jury irrepressibly over the obstacles of obstinacy on the way to submission. After a needless delay, they returned a verdict of "death by misadventure." The secret of Mrs. Farnaby's suicide remained inviolate; the reputation of her vile husband stood as high as ever; and the future life of Amelius was from that fatal moment turned irrevocably into a new course.

CHAPTER XXXVIII.

ON the conclusion of the proceedings, Mr. Melton (having no further need of Amelius or the lawyer) drove away by himself. But he was too inveterately polite to omit making his excuses for leaving them in a hurry; he expected, he said, to find a telegram from Paris waiting at his house. Amelius only delayed his departure to ask the landlady if the day of the funeral was settled. Hearing that it was arranged for the next morning, he thanked her, and returned at once to the cottage.

Sally was waiting his arrival to complete some purchases of mourning for her unhappy mother, Toff's wife being in attendance to take care of her. She was anxious to hear how the inquest had ended. In answering her questions, Amelius was careful to warn her (if her companion made any inquiries) only to say that she had lost her mother under very sad circumstances. The two having left the cottage, he instructed Toff to let in the stranger, who was to call by previous appointment, and to close the door to every one else. In a few minutes, the expected person (a young man who gave the name of Morcroes) made his appearance, and sorely puzzled the old Frenchman. He was well dressed; his manner was quiet and self-possessed—and yet he did not look like a gentleman. In fact, he was a policeman of the higher order, in plain clothes.

Being introduced to the library, he spread out on the table some sheets of manuscript, in the handwriting of Amelius, with notes in red ink on the margin, made by himself.

"I understand, sir," he began, "that you have reasons for not bringing this case to trial in a court of law?"

"I am sorry to say," Amelius answered, "that I dare not consent to the exposure of a public trial, for the sake of persons living and dead. For the same reason I have written the account of the conspiracy with certain necessary reserves. I hope I have not placed any needless difficulties in your way?"

"Certainly not, sir. But I should wish to ask, what do you propose to do, in case I discover the people concerned in the conspiracy?"

Amelius owned, very reluctantly, that he could do nothing with the woman who had been the accomplice. "Unless," he added, "I can induce her to assist me in bringing the man to justice for other crimes which I believe him to have committed."

"Meaning the man named Jervy, sir, in this statement?"

"Yes. I have reason to believe that he has been obliged to leave the United States, after committing some serious offense——"

"I beg your pardon for interrupting you, sir. Is it serious enough to charge him with, under the treaty between the two countries?"

"I don't doubt it's serious enough. I have telegraphed to the persons who formerly employed him for the particulars. Mind this! I will stick at no sacrifice to make that scoundrel suffer for what he has done."

In those plain words Amelius revealed, as frankly as usual, the purpose that was in him. The terrible remembrances associated with Mrs. Farnaby's last moments had kindled, in his just and generous nature, a burning sense of the wrong inflicted on the poor heart-broken creature who had trusted and loved him. The unendurable thought that the wretch who had tortured her, robbed her and driven to her death had escaped with impunity, literally haunted him night and day. Eager to provide for Sally's future, he had followed Mrs. Farnaby's instructions, and had seen her lawyer privately, during the period that had elapsed between the death and the inquest. Hearing that there were formalities to be complied with, which would probably cause some delay, he had at once announced his determination to employ the interval in attempting the pursuit of Jervy. The lawyer—after vainly pointing out the serious objections to the course proposed—so far yielded to the irresistible earnestness and good faith of Amelius as to recommend him to a competent man, who could be trusted not to deceive him. The same day the man had received a written statement of the case; and he had now arrived to report the result of his first proceedings to his employer.

"One thing I want to know, before you tell me anything else," Amelius resumed. "Is my written description of the man plain enough to help you to find him?"

"It's so plain, sir, that some of the older men in our office have recognized him by it—under another name than the name you give him."

"Does that add to the difficulty of tracing him?"

"He has been a long time away from England, sir; and it's by no means easy to trace him on that account. I have been to the young woman, named Phœbe in your statement, to find out what she can tell me about him. She's ready enough, in the intervals of crying, to help us to lay our hands on the man who has deserted her. It's the old story of a fellow getting at a girl's secrets and a girl's money under pretense of marrying her. At one time she's furious with him, and at another she's ready to cry her eyes out. I got some information from her; it's not much, but it may help us. The name of the old woman, who has been the go-between in the business, is Mrs. Sowler—known to the police as an inveterate drunkard, and worse. I don't think there will be much difficulty in tracing Mrs. Sowler. As to Jervy, if the young woman is to be believed (and I think she is), there's little doubt that he has got the money from the person mentioned in my instructions here, and that he has bolted with the sum about him. Wait a bit, sir, I haven't done with my discoveries yet. I asked the young woman, of course, if she had his photograph. He's a sharp fellow; she had it, but he got it away from her, on pretense of giving her a better one, before he took himself off. Having missed this chance, I asked next if she knew where he lived last. She directed me to the place; and I have had a talk with the landlord. He tells me of a

Digitized by Google

squint-eyed man, who was a good deal about the house, doing Jervy's dirty work for him. If I am not misled by the description, I think I know the man. I have my own notion of what he's capable of doing, if he gets the chance—and I propose to begin by finding our way to him, and using him as a means of tracing Jervy. It's only right to tell you that it may take some time to do this—for which reason I have to propose, in the meanwhile, trying a shorter way to the end in view. Do you object, sir, to the expense of sending a copy of your description of Jervy to every police-station in London?"

"I object to nothing which may help us to find him. Do you think the police have got him anywhere?"

"You forget, sir, that the police have no orders to take him. What I'm speculating on is the chance that he has got the money about him—say in small bank-notes, for convenience of changing them, you know."

"Well?"

"Well, sir, the people he lives among (the squint-eyed man for instance!) don't stick at trifles. If any of them have found out that Jervy's purse is worth having——"

"You mean they would rob him?"

"And murder him, too, sir, if he tried to resist."

Amelius started to his feet. "Send round to the police-stations without losing another minute," he said. "And let me hear what the answer is, the instant you receive it."

"Suppose I get the answer late at night, sir?"

"I don't care when you get it, night or day. Dead or living, I will undertake to identify him. Here's a duplicate key of the garden-gate. Come this way, and I'll show you where my bedroom is. If we are all in bed, tap at this window—and I'll be ready for you at a moment's notice."

On that understanding Morcross left the cottage.

The day when the mortal remains of Mrs. Farnaby were laid at rest was a day of heavy rain. Mr. Melton, and two or three other old friends, were the attendants at the funeral. When the coffin was borne into the damp and reeking burial-ground, a young man and woman were the only persons, besides the sexton and his assistants, who stood by the open grave. Mr. Melton, recognizing Amelius, was at a loss to understand who is companion could be. It was impossible to suppose that he would profane that solemn ceremony by bringing to it the lost woman at the cottage. The thick black vail of the person with him hid her face from view. No visible expressions of grief escaped her. When the last sublime words of the burial service had been read, those two mourners were left, after all the others had departed, still standing together by the grave. Mr. Melton decided on mentioning the subject confidentially when he wrote to his friend in Paris. Telegrams from Regina, in reply to his telegrams from London, had informed him that Mr. Farnaby had felt the benefit of the remedies employed, and was slowly but surely on the way to recovery. Under these circumstances, it seemed likely that he would be able, in no long time, to take the right course for the protection of his niece. For the enlightenment which might, or might not, come with that time, Mr. Melton was resigned to wait, with the disciplined patience to which he had been mainly indebted for his success in life.

"Always remember your mother tenderly, my child," said Amelius, as they left the burial-ground. "She was sorely tried, poor thing, in her lifetime, and she loved you very dearly."

"Do you know anything of my father?" Sally asked, timidly. "Is he still living?"

"My dear, you will never see your father. I must be all that the kindest father and mother could have been to you, now. Oh, my my poor little girl!"

She pressed his arm to her as she held it. "Why should you pity me?" she said. "Haven't I got you?"

They passed the day together quietly at the cottage. Amelius took down some of his books, and pleased Sally by giving her his first lessons.

Soon after ten o'clock, his pupil withdrew at the usual early hour to her room. He profited by the opportunity to send for Toff, intending to warn him not to be alarmed, if he heard footsteps in the garden after they had all gone to bed. The Frenchman had barely entered the library, when he was called away by the bell at the cottage gate. Amelius, looking into the hall, discovered Morcross and signed to him impatiently to come in. The young police officer closed the door cautiously behind him. He had arrived with news that Jervy had been found.

(*To be continued.*)

THE FOUNTAIN VAULTS,

SAN FRANCISCO.

ONE of the sights of the city by the Golden Gate is the Fountain Vaults, celebrated for the Boca beer, which flows within its shades with the velocity of a foaming, subterranean stream. This beer is greatly prized by the thirsty sons of 'Frisco, whose name is legion, and at all hours of the day and far into the night the demands for Boca are simply unceasing. The vault, or rather vaults, for there are three, lie below the level of the sidewalk—three magnificently-appointed, spacious saloons, gilded, mirrored and rockled. The fountain from which they derive their name is situated in the centre of the middle vault, and in its sparkling waters numerous goldfish gayly disport themselves. Between supporting pillars hang sweet singing birds, while rare and delicately tinted flowers swing in splendid profusion in wicker baskets. The vault is a great resort for all classes. Here will be found the "big bonanza" taking the froth off his Boca beside the aspiring broker's clerk. Here the Pacific Slope operator clinks glasses with the man who plunges on "a sweet thing in China." Bankers and clerks, brokers and sky merchants, prominent mining men and "shady" customers, politicians and free-lances, all hie to the Fountain Vaults, and, through the medium of the well-beloved Boca, set little plants destined to cause Wall Street to quiver, or to pass the speeding hours in discussing men and things. The scene in the Vaults about five o'clock in the afternoon is an excessively animated one. Every table is occupied, every waiter skipping hither and thither in compliance with impatient and thirsty calls. Luncheons may be had in private apartments, and *recherché* little suppers, cooked, not *à la Chinoise*. One of the first things a new-comer is asked is, "Have you had a Boca at the Fountain Vaults?" and not to be in a position to reply in the affirmative marks the greenhorn in 'Frisco.

THE POKOMOKE MYSTERY.

THE TRIAL OF MISS DUER FOR THE ALLEGED MURDER OF HER BEST FRIEND, MISS HEARN.

THE popular interest in the Duer-Hearn tragedy increases as the trial at Snow Hill, Md., progresses. So far, there has been absolutely nothing developed in the evidence to satisfy the general curiosity or to establish a motive for the shooting. The high social standing of the two families thus unhappily brought into public notice, the remarkably warm friendship existing between the Misses Duer and Hearn previous to the death of the latter, the attempts of the victim to free herself from the influence of her alleged murderess, which was of a most unaccountable nature, the long-noted eccentricities and hoydenish deportment of Miss Duer, have combined to make this case one of the most remarkable in criminal practice. The indictment on which Miss Lillie Duer is now being tried charges that, on the 5th of November last, she deliberately shot Miss Ella Hearn, in the hallway of her parents' residence, in Pokomoke, Md., from the effects of which Ella died on the 6th of December following.

At the time of the tragedy both young ladies were about twenty years of age, pretty and attractive. They had graduated with high honors but a short time previous at the same seminary, having been roommates since they entered the institution. Among the numerous peculiarities that had been noticed in Miss Duer, were her occasional habit of donning male costume, her great fondness for pistol-practice, her reckless use of the weapon, her overbearing manner towards her companions of both sexes, and her decided masculine manners, such as smoking, boxing, climbing trees, and jumping posts and fences.

Miss Hearn was of a more quiet and retiring disposition, of a rather delicate build, and possessed of such ladylike manners as to make her welcome and appreciated in every sphere.

According to the testimony at the trial, the strange intimacy began in 1875. As the girls had been schoolmates, there were no objections raised by the Hearn family. About a year after, a feeling of revulsion seems to have settled upon Miss Hearn, caused by the incessant attentions of Miss Duer, who was in the habit of calling upon her friend almost every day. She attempted to sever their relations, but Miss Duer had obtained such control over her that this was impossible. Very frequently Miss Hearn would, in the kindliest manner, tell Miss Duer to go home and not call again, and often the only answer Miss Duer gave would be to place her arms around the other's neck and kiss her, and tell her she loved her. Miss Duer would daily try to get Miss Hearn to walk with her in the woods, or remain with her alone in the parlor. And so the acquaintance went on. The one tried to break it off for ever; the other kissed, cajoled, flattered, protested and refused to heed the timidly expressed injunctions.

In October last an incident occurred which placed Miss Hearn in mortal terror. The girls left the house together one day, and took a walk in a grove not far from Pokomoke. There they remained for some time gathering tea-berries. When starting for home, Miss Hearn went ahead, and after a short time, Miss Duer, who loitered, and was walking some distance behind, called to her to wait. She did not heed this request. It is alleged that Miss Duer then raised a pistol, and fired three times at her companion. Miss Hearn waited until Miss Duer came up, still holding the pistol in her hand. She at once took the weapon away from Miss Duer, asking her if she intended to shoot her.

"No," replied Miss Duer, "I only intended to frighten you, and make you wait for me."

Miss Hearn never walked with Miss Duer in the woods after that.

This incident Miss Hearn related to her father on her deathbed, acknowledging that she had been afraid to speak of it to any one before, fearing that if she told her father he would kill her assailant.

In the chronology of the case we now come to the 4th of November last. On that day Miss Hearn received a note from Miss Duer asking her to come to her house that evening on important business. She called, in company with her younger sister. Miss Duer tried to persuade her to go into the woods with her the next day, but she refused to go. The most complete account of what followed is found in the statement which Miss Hearn made to Mrs. George Truitt before the wound was considered dangerous, and which that lady narrated in her testimony. After speaking of her refusal to accompany Miss Duer into the woods, Miss Hearn said: "Lil got awful mad, and came up to her and said, 'Before Almighty God, Ella Hearn, if you don't go into the woods with me to-morrow I'll never ask you to go anywhere else'; next day Lil came around; she (Ella) was sewing, witness thought; she said Lil got up to leave two or three times and snatched her work out of her hand; her ma told her to go to the door with Lil; Lil started to the gate and came back again once or twice; then she came in and shut the door; went up to her (Ella) and asked her if she would take back what she had said, and attempted to kiss her; she (Ella) pushed her down and then laughed; she (Lil) said I hurt her a little, for I pushed her hard; Lil got up and went up to her again and commenced talking; she (Ella) told her to go home and leave her alone; the witness thought Ella said that Lil asked her if she loved Ella Foster better than her, and she answered, 'Yes,' and that Lil stepped back and said, 'Repeat that, and I'll kill you;' witness here said to her (Ella), 'Perhaps Lil was only trying to frighten you,' and the reply was, 'You would not say that, Mrs. Truitt, if you had seen her countenance and the rage she was in;' Ella then asked, 'Did you see the place on my arm?' witness believes she said 'place'; witness said she did; Ella raised her hand this way" (witness showed with her own hand), "and said, 'If my arm had got a little higher, perhaps it would not have killed me.'"

The shooting occurred a few moments after Miss Duer arose from her fall, the ball striking Miss Hearn in the hand, inflicting a painful though not an apparently dangerous wound. Another strange phase of the case was developed after the shooting. While Miss Hearn was sick Miss Duer exhibited much sympathy for her, and on one occasion, when she was in Mr. Hearn's house, Miss Ella called her into her room, and seemed greatly pleased at seeing her. Miss Hearn was perfectly rational at the time. Upon that occasion, it is said, she asked Miss Duer what was the matter with her, and the latter answered that she was hurt. She asked who it was that did it, and Miss Duer replied that it was herself (Miss Duer). Miss Hearn is then said to have put her arms affectionately around the young lady's neck and remarked: "Then you didn't mean to do it, Lil, did you?"

It is related that on another occasion Miss Duer went into the sick-room when the invalid was delirious and knew no one, not even her parents. She recognized Miss Duer, however, and cried out in the greatest fear for her not to shoot her again, at the same time drawing the bedclothes over her head. She told Miss Duer to go away, and would not be quiet until she left the room.

As before stated, Miss Hearn died on the 6th of December, one month and a day after the shooting. Miss Duer was arrested and entered bail for $2,000 to appear in court at Snow Hill, the county seat, at the Spring term, for the trial which is now in progress. The prosecution have brought out all the salient points in the case, and, from the evidence so far produced by the defense, it seems that the "strong point" will be that Miss Hearn died, not from the effects of the pistol-shot, but from the chloral administered by the physicians after the shooting. The court-room has been densely crowded during the early days of the trial, and the leading features of the case admitted in evidence have not created more wonder and excitement there than throughout the country.

On Friday, June 13th, the prisoner, Miss Duer, took the stand to testify in her own behalf. She detailed her acquaintance with the deceased, denied positively the shooting in the woods in October, and insisted that the shot of November, in the hallway, was discharged accidentally.

SCIENTIFIC INTELLIGENCE.

Extraordinary Finds of Gold have lately occurred in the gold-fields of Dutch and French Guiana, and are causing great excitement.

A Rich Deposit of lead and silver has just been discovered near the Thames River, New Zealand. The ore is reported to contain fifty per cent. of lead, with about two pounds worth of silver, and 9 dwt. 13 grs. of gold per ton.

A New Grass, *Ilama laxaviana*, has been imported into Ceylon from Java, and is stated to be doing well, having attained a height of eight feet in three months. It is said to contain a large amount of saccharine matter, and cattle and horses eat it freely.

In the Paris Academy, Dr. Oppolzer has been elected a Corresponding Member in the Astronomical Section in place of the late Professor Argelander, and M. Alphonse Favre in place of the late Professor Leymerie in the Section of Mineralogy.

The Professors of the Museum of Paris have presented two candidates for filling the place vacated by the death of Claude Bernard, who was professor of general physiology in the establishment. The first candidate is M. Bouben, of the Institute, and the second M. Moreau.

Of Eleven Female Candidates who presented themselves for the first examination for the degrees of London University, six were placed in the division of honors, four were declared to be entitled to exhibitions, and one was second in the whole list of candidates.

The "Electrician" says that on the 25th of April, between eleven o'clock and noon, no fewer than 215 messages, averaging thirty words each, were disposed of on a single wire—London and Birmingham—by means of the quadruplex. The number is unprecedented in the history of telegraphy.

Map of Ancient Gaul.—Preparations are being made at the St. Germain Museum in Paris for the installation of a magnificent map of ancient Gaul. It has been executed by one of the most eminent engravers of the day, and advantage has been taken of modern science to indicate the sites of the principal relics of antiquity still existing in the country.

Sir William Thomson, Professor of Natural Philosophy at Glasgow, was recently examined by the select committee of the English Parliament on the subject of the electric light, and expressed the opinion that before long the light will be used everywhere, in private houses as well as in public buildings or in the open air, and in small rooms as well as in large ones.

Dr. Edouard Bornet, of Paris, eminent for his researches on the structure and reproduction of algæ, and author of other works on that order, and Professor Heinrich Gustav Reichenbach, *fils*, Director of the Botanic Gardens, Hamburg, alike distinguished for his special knowledge of, and publications on, the Orchidaceæ, have been elected Foreign Members of the Linnean Society.

The May Number of Petermann's *Mittheilungen* gives the chief place to a long and careful article by M. Lindeman on the North Coast of Siberia between the mouths of the Lena and Behring Straits. Herr Lindeman traces the history of exploration in the region from 1630 to the present time, and follows this with a description of the coasts and islands. The article is accompanied by an excellent map in two sheets.

Dr. Bastian, who started on a scientific expedition in Persia, India, and the Eastern Archipelago in the early part of last Summer, has written from Calcutta to the Berlin Geographical Society, stating that he is about to leave that place with the view of pursuing his ethnological studies in Assam and Java. In the latter island, however, his work will have been in a great measure anticipated by that of M. Désiré Charney, the archæological explorer of Yucatan, Southern Mexico and Madagascar.

Petroleum in Alsace-Lorraine.—A new petroleum well of considerable volume was discovered recently in the bitumen mines of Pechelbronn, in Alsace Lorraine. The volume of oil was so great that in four days the André and Henri pits, united by a drift, were filled. In the first named it reached a height of thirty-six feet, and continues at that level, notwithstanding that immediate arrangements were made to draw it off. There are nine hundred yards of galleries filled with oil, and no signs of diminution in the supply.

Dr. Swan M. Burnett, of Washington, has recently made some examinations for the purpose of ascertaining whether the negro in the United States is affected with color-blindness to the same degree as the white race. He has examined 2,050 colored children, from six to eighteen years of age, in the public schools of the District of Columbia, of whom 1,359 were males and 1,691 females. Of these, twenty-two boys were color-blind (or 1.6 per cent.) and two girls (or 0.11 per cent.) The percentage of color-blindness among the whites in an aggregate of about 40,000 examinations is 3 per cent. for males, and 0.25 for females. The negro appears, therefore, to be less liable to this defect than the white race. The examinations were made in strict accordance with the plan proposed by Professor Holmgren, of Upsala, Sweden, and used so extensively in making similar examinations in Europe.

PERSONAL GOSSIP.

GIUSEPPE MANZONI has been elected Grand Master of all the Italian Masonic lodges.

COUNT BEUST of Austria, trained in early life for the pulpit, is esteemed the wittiest ambassador in Europe.

AT Professor Huxley's invitation, Mr. John Fiske has gone to London to repeat his lectures on American history, recently delivered in Boston.

MISS CATHERINE L. WOLFE, the philanthropist of New York City, with her $10,000,000, is said to be the wealthiest unmarried woman in the United States.

IN consideration of the hard times, the Prince of Wales has acquired his Cornish tenants by the announcement that he will remit twenty per cent. of their rent for three years.

PROFESSOR E. E. EDWARDS, of McKendrie College, Lebanon, Ill., has been elected president of the new agricultural college of Colorado, which it is proposed to open in September.

THE foundation-stone of the new lighthouse at Eddystone is to be laid on Saturday, June 21st, and the Duke and Duchess of Edinburgh and the sons of the Prince of Wales are to be present.

LORD LYONS, British Ambassador to France, and formerly Minister to the United States, has just been appointed by Queen Victoria as a Knight Grand Cross of the most distinguished Order of St. Michael and St. George.

THE University of Oxford is about to confer the degree of D. C. L. on Lord Dufferin, British Ambassador to Russia; the Right Hon. William Henry Smith, First Lord of the Admiralty, and Ivan Tourgeneff, the Russian novelist.

CYRUS H. MCCORMICK, of Chicago, has been elected a corresponding member of the French Academy of Science, to fill a vacancy in the Department of Rural Economy, in recognition of his long services in manufacturing and improving harvesting machinery

NINETY-FIVE of the French Senators and Deputies are Freemasons. This number includes three of the ministry, namely, Le Royer, Ferry and Tirard; four ex-ministers, namely, Gambetta, Jules Simon, Jules Favre and Cremieux, and also Victor Hugo and Louis Blanc.

THE Tyndale Memorial Committee, of which the Earl of Shaftesbury is chairman, has intrusted to Mr. J. Edgar Boehm the design and erection on the Thames Embankment of a statue of the martyr William Tyndale, who made and published the first English translation of the Bible from the original.

THE Marquis of Lorne's book is to be called "Travels in the Dominion," and will be published this season in London. It will be illustrated by the Princess Louise, with whom the Misses Montalba are now sojourning, in order that the art studies of these ladies and Her Royal Highness may be renewed.

THE Rev. J. Clement French, D.D., for thirteen years the pastor of the Central Congregational Church of Brooklyn (Rev. Dr. Scudder's), and subsequently for five years pastor of the Westminster Presbyterian Church of that city, has accepted a call to the pastorate of the Park Presbyterian Church of Newark, N. J.

DON FRANCISCO S. A. BUNTAGA, Secretary of the Chilian Legation at Washington in 1846, and Minister Plenipotentiary from 1861 to 1867, has, upon the re-establishment of diplomatic relations with this country, been appointed Minister. He reached New York on June 7th, and presented his credentials to President Hayes on the 10th.

LI-FANG-PAO, the Chinese Ambassador at Berlin, and one of the most eminent of the learned men of the Flowery Kingdom, after examining the remains of Grecian pottery of the Trojan and pre-Trojan period, has proved that the vases found in Trojan territory and buried in places lately excavated, such as those referred to by Schliemann, are really of Chinese origin.

JUDGE SHEA was conspicuous in a proscenium box at the Moore Centenary in New York, by wearing the green ribbon which accompanied the presentation to him, the Summer before last, of the freedom of the City of Cork. It is worth noting that the death of Isaac Butt, M. P., LL. D., late leader of the Irish party, leaves an American the only person living who has received the honor. Judge Shea stands alone in that respect. The dignity has been conferred only three times by that city.

MRS. HOWARD PAUL, the accomplished actress and singer, well-known in both hemispheres, died in London on June 6th. Her maiden name was Isabella Featherstone, and she was a native of Dartford, Kent, England. In addition to the character sketches in which she appeared with her husband, she has played in heavier rôles, such as *Lady Macbeth*, which she acted in Drury Lane, London, in 1869. Her last appearance in New York was at Irving Hall.

PROFESSOR ASAPH HALL, of the United States Naval Observatory, has received official notification of his election as member of the French Academy, an honor which is highly appreciated by the corps of scientists at the Observatory, and by the officers of the navy stationed at Washington. The services rendered to science by Professor Hall in his report on the transit of Venus and his celebrated discovery of the moons of Mars in 1877 are among the reasons given for his election to the Academy.

AMONG recent notable deaths are those of Commodore Foxhall A. Parker, Superintendent of the United States Naval Academy, June 10th, aged 66; the Rev. Dr. Francis E. Lawrence, Rector of the Church of the Holy Communion, New York, June 10th, aged 53; Dr. John T. Darby, Professor of Surgery in the Medical Department of the University of the City of New York, June 9th, aged 43; the Bishop of Amiens, France, June 10th; the Prince of Orange, heir-apparent to the throne of the Netherlands, at Paris, June 11th, aged 38.

MAJOR SERPA PINTO has left Alexandria, Egypt, for Marseilles, Lisbon and London. This intrepid African explorer started from Benguela, on the Atlantic Ocean, in August, 1877, and arrived at Durban, on the Indian Ocean, in April, 1879. He brings twenty charts, numberless drawings, valuable barometric, astronomic and geologic records, large collections of insects, plants, skins, etc., six volumes in manuscript full of interesting narrative, including an account of the discovery of a river two hundred miles long, flowing into the Zambesi. He has brought over twenty-eight cannibals.

THE Lord Mayor of London gave a banquet at the Mansion House, June 12th, to the members of the International Literary Conference and the delegates to the International Telegraph Conference, now in session in that city. Toasts to the Literary Congress were responded to by Messrs. Edmond About, Frederic Thomas and Blanchard Jerrold. M. Ferdinand de Lesseps, replying to a toast to the guests from abroad, expressed the hope that he would see the Panama Canal completed in eight years. Victor Hugo, President of the Congress, was unable to be present, being unavoidably detained at Paris.

NEW YORK CITY.—A NEW WAY OF PURCHASING WINES BY SAMPLE—THE BODEGA ESTABLISHED AT NO. 83 CEDAR STREET.

GENERAL THOMAS EWING.

GENERAL THOMAS EWING, the Democratic candidate for Governor of Ohio, comes of an honorable stock. He is the third son of the late Senator Thomas Ewing, himself a man of distinguished reputation, and is now within two months of fifty years of age, having been born at Lancaster, Ohio, in August, 1829. He received a liberal education, having graduated from Brown University in 1854, and from the Cincinnati Law School in 1855. One year later he removed to Leavenworth, Kansas, where, with one of his brothers, he began the practice of law, soon taking rank as the leading lawyer of the Territory. He also became a Republican leader, and was a member of the Peace Conference from Kansas in 1860. In 1861 and 1862 he was Chief-Justice of the Supreme Court of the State. In September, 1862, he organized the Eleventh Kansas Infantry, which regiment he commanded at the battles of Fort Wayne and Kane Hill. He subsequently rose to the command of a brigade, and for his gallant services received, in 1865, the rank of brigadier-general of volunteers. In 1863 and 1864 he was, at different times, in command of Kansas and Western Missouri and the St. Louis district. His services in those States were valuable to the Federal cause, and in 1865 he received the rank of brevet major-general for his gallant conduct. The war then being practically over, he resigned, and for some time practiced law at Washington. In 1873 and 1874 he was a member of the Ohio Constitutional Convention. Having left the Republican party in 1868, he was elected to the Forty-fifth Congress as a Democrat, receiving nearly 5,000 majority. He was re-elected in 1878, receiving a plurality of 434 and a majority of 213. General Ewing has taken a prominent part in Congress, and has served on several important committees, including that on Banking and Currency. In the Democratic National Convention of 1868 he was an unsuccessful candidate for Vice-President, his nomination not even being seconded by the Ohio delegation. His extreme soft money views have made him a leader of the Greenback wing of his party, but will probably alienate very many Democrats of the old school who hold to the financial doctrines of the fathers. General Ewing is a gentleman of fine address and of impressive manner as a public speaker, and in debate is a hard hitter; but with all his ability, he will scarcely be able to persuade the people of Ohio that the country can afford to reverse the financial policy to which it is now committed.

A WONDERFUL TOMB.

AMONG the points of interest visited by General Grant in India was the Taj at Agra, said to be the most striking building in that country of marvels. A correspondent, in describing this building, says: "The principle which inspires these magnificent and useless tombs is of Tartar origin. The Tartars, we are told, built their tombs in such a manner as to 'serve for places of enjoyment for themselves and their friends during their lifetime.' While the builder lives he uses the building as a house of recreation, receives his friends, gives entertainments. When he dies he is buried within the walls, and from that hour the building is abandoned. It is ever afterwards a tomb, given alone to the dead. There is something Egyptian in this idea of a house of feasting becoming a tomb; of a great prince, as he walks amid crowds of retainers and friends, knowing that the walls that resound with laughter will look down on his dust. This will account for so many of the stupendous tombs that you find in Upper India. Happily, it does not account for the Taj. If the Taj had been a Tartar idea—a house of merriment to the builder and of sorrow afterwards—it would have lost something of the poetry which adds to its beauty. The Taj is the expression of the grief of the Emperor Shah Jehan for his wife, who was known in her day as Mumtaz-i-Mabal, or the Exalted One of the Palace. She was herself of royal blood, with Persian ancestry intermingled. She was married in 1615 to Shah Jehan, then heir to the throne, and, having borne him seven children, died in 1629 in giving birth to the eighth child. Her life, therefore, was in the highest sense consecrated, for she gave it up in the fulfillment of a supreme and holy duty, in itself a consecration of womanhood. The husband brought the body of the wife and mother to these gardens and entombed it until the monument of his grief should be done. It was seventeen years before the work was finished. The cost is unknown, the best authorities rating it at more than two millions of dollars. Two millions of dollars in the time of Shah Jehan, with labor for the asking, would be worth as much as twenty millions in our day. For seventeen years 20,000 men worked on the Taj, and their wages was a daily portion of corn.

"The effect of the Taj as seen from the gate, looking down the avenue of trees, is grand. The dome and towers seem to rest in the air, and it would not surprise you if they became clouds and vanished into rain. The gardens are the perfection of horticulture, and you see here, as in no part of India that I have visited, the wealth and beauty of nature in Hindoostan. The landscape seems to be flushed with roses, with all varieties of the rose, and that most sunny and queenly of flowers seems to strew your path and bid you welcome as you saunter down the avenues and up the ascending slope that leads to the shrine of a husband's love and a mother's consecration. There is a row of fountains which throw out a spray and cool the air, and when you pass the trees and come to the door of the building its greatness comes upon you—its greatness and its beauty.

"As you enter you see a vast dome, every inch of which is enriched with inscriptions in Arabic, verses from the Koran, engraved marble, mosaics, decorations in agate and jasper. In the centre are two small tombs of white marble, modestly carved. These cover the resting-place of the Emperor and his wife, whose bodies are in the vault underneath. In other days the Turkish priests read the Koran from the gallery, and you can imagine how solemn must have been the effect of the words chanted in a priestly cadence by the echo that answers and again answers the chanting of some tune by one of the party. You may form an idea of the great size of the Taj from the figures of the measurement of the royal engineers. From the base to the top of the centre dome is 123½ feet; to the summit of the pinnacle, 243½ feet. It stands on the bank of the river Jumna, and it is said that Shah Jehan intended to build a counterpart in black marble in which his own ashes should rest. But misfortune came to Shah Jehan—ungrateful children, strife, deposition—and when he died his son felt that the Taj was large enough for both father and mother. One is almost glad that the black marble idea never germinated. The Taj, by itself alone, is unapproachable. A duplicate would have detracted from its peerless beauty."

GENERAL THOMAS EWING, DEMOCRATIC CANDIDATE FOR GOVERNOR OF OHIO. FROM A PHOTOGRAPH BY BRADY.

THE BODEGA.

A NEW WAY OF PURCHASING WINES BY SAMPLE.

WE present to our readers the picture of an establishment opened a few weeks ago in this city, at 83 Cedar Street, which, from the success already achieved, proves to have been a requirement of the day, and which is a novelty, not only in New York City, but also in the United States. It is called the Bodega, a Spanish word, exclusively used in the wine trade, but meaning store or warehouse. In Spain a merchant goes to the Bodega, where all goods are stored, and where his customers and friends may try the wine from a sample cask.

Digitized by Google

This system has been adopted by Mr. Timothy Stevens, a prominent wine importer of this city, late of Beaver Street, where for the last odd twenty years he has acted as representative for many leading European shippers.

On entering the Bodega the visitor finds on every side a large number of casks systematically arranged, each cask being duly provided with a sign giving the vintage contained in it, and also the price by the glass, bottle, gallon, half-cask and cask. In this way customers wishing to stock or replenish their cellar can do so in an intelligent and satisfactory manner, and can buy or order what they know to be exactly what they want. And, in order that this may be done with proper care and attention, a cosy little parlor and a row of tables are provided for such customers as may wish to devote to the selection of their wines the requisite time and attention.

BODEGA WINE HAMPER.

Another feature, and one which certainly is not less appreciated, is, that so-called family hampers are for sale. These are sold at merely nominal rates, and contain a full assortment of Spanish, French and other wines, a bottle of each, including sherry, port, claret, whisky and brandy. These hampers offer this advantage: that while occasion may offer when every family is glad to have such wines within immediate reach, they, too, may be tasted at home at full leisure; and whenever and as often as a particular wine meets with approbation, all that is necessary to be done is to send an order to the Bodega, specifying the number of the label attached to each bottle.

Our illustration is taken from the back of the store, leading to the extensive cellars, where the bottling is done. The vast wholesale department, the salesrooms, and offices for bookkeepers and cashiers, are situated on the second story, which is reached by the stairs in the middle of our picture, while the front part of the store is devoted to the retail business of the firm.

Raphael Diaz Albertini, the Paganini of the Future.

A youth of one-and-twenty, with dark, dreamy eyes, black sweeping lashes that paint *silhouettes* upon his pale cheeks; a mouth sweet and sad and tender as a woman's; a great white forehead surmounted by raven black hair that flows in ebon cataracts down his neck—this is Raphael Diaz Albertini, the violinist, who wrenched the first prize from twenty-three competitors at the Conservatoire in Paris in 1875; who has received golden crowns from the lovers of music, at its best, of three separate nations, and who has been decorated with the Order of Charles III. of Spain by the hands of the king. Albertini has been a musician from his birth. At four years of age he played a morceau on the violin to the accompaniment of the great *maestro* Gottschalk, although it is scarcely necessary to observe that he did not know a single note, playing exclusively by ear. At six years of age so intense was the child's love for music, and especially for the violin, that his father—himself holding first rank as an amateur violinist—had him instructed in this most difficult of all instruments; and as the years went by Raphael Albertini found a willing handmaid in genius, and a smiling mistress in art. His first success came to him in Havana, the city of his birth, when he was but ten years old, and the prediction uttered by Mr. Watson, the then musical critic of FRANK LESLIE'S LA ILUSTRACION AMERICANA, that the boy had a splendid career before him, has been wondrously verified. At the Conservatoire he was the only foreigner in a class of twenty-four, the remaining twenty-three being all French. For the crucial test he performed a "solo du 19me Concerto Kreutzer," and so superb was his handling of this intricate and almost impossible movement, that it won for him the grand prize—a distinction which can only be conferred upon those whom the gods have endowed with the divine gift of music in the soul.

Albertini practices six hours a day for pleasure, and his favorite pieces are the "Balade Polonaise," "Vieuxtemps," "Concerto, Mendelssohn," "Concerto, Beethoven," "Polonaise Wieninsky," and "Fantasie Caprice," by Vieuxtemps. He regards Vieuxtemps as the prince of violinists, and speaks of him with the burning enthusiasm of the ardent disciple. This gifted youth is now enjoying the *dolce far niente*, the luxury of doing nothing, as recommended by his physician, and the strain of intense study is for the present relaxed, but we look forward to hearing him in concert during the coming season, and we can promise those who love music at its best "a gentle hour's dalliance with sweet sound."

Too Much Sleep.

The effects of too much sleep are not less signal than those arising from its privation. The whole nervous system becomes blunted, so that the muscular energy is enfeebled, and the sensations, and moral and intellectual manifestations are obfuscated. All the bad effects of inaction become developed; the functions are exerted with less energy; the digestion is torpid, the excretions are diminished, while, in some instances, the secretion of fat accumulates to an inordinate extent. The memory is impaired, the powers of imagination are dormant, and the mind falls into a kind of hebitude, chiefly because the functions of the intellect are not sufficiently exerted, when sleep is too prolonged or too often repeated. To sleep much is not necessarily to be a good sleeper. Generally they are the poorest sleepers who remain longest in bed; *i. e.*, they awaken less refreshed than if the time of arising were earlier by an hour or two. While it is true that children and young people require more sleep than their elders, yet it should be the care of parents that over-indulgence be not permitted. Where the habit is for children to lie in bed until eight or nine in the morning, the last two hours, at least, do not bring sound, dreamless sleep, where the hour for retiring is eight or nine P. M., but are spent in "dozing," and in fact, such excess cannot fail to insure the harmful results described by the authority quoted. What is called "laziness" among children is, in very many cases, disease, and is largely due to this, as well as the other causes mentioned, that undermine the foundations of health.

FUN.

WEATHER report—Thunder.

NON-UNION MEN—Bachelors.

A COURT MARTIAL—A soldier's addresses.

WEATHER PROFIT—The gains of umbrella-sellers.

LEDGER DE MAIN—"I am not an author," said an accountant, "but I am a righter of books."

RAILWAYS are aristocratic. They teach every man to know his own station, and to stop there.

IT is said that when Hayes was a boy and played cards behind a haystack, instead of saying euchre, he would always yell "veto."

THIS is the time of the year when the boy who has accidentally changed shirts with a companion, while enjoying the surreptitious swim, tells his mother, when she discovers the swap, that the other boy's mother took a fancy to his shirt and borrowed it as a pattern to make some shirts from for her little boy.

THE women in Kansas vote at the school elections. At a recent election at Osage City one woman went up to vote, but before she got through telling the judges what a time her Willie had with the scarlet-fever when he was only two years old, it was time to close the poll, and she had forgotten to deposit her ballot.

THE S. P. C. A. apparently has no call to go to Georgia. A colored engineer on a train in that State saw a cow on the track the other day, whereupon he stopped the train, got out with a shovel in his hand, and, striking the beast on the back, yelled, "Git off dar, d'ye heah? Git off, or I'll squirt steam all over yer!"

DR. KEATE, at one time head-master of Eton College, is said to have held that there is a vital connection between the birch and the beatitudes. After reading "Blessed are the pure in heart," it is stated that he told his pupils, "Mind that it's your duty to be pure in heart. If you are not pure in heart, I'll flog you."

SI STOUGHTON, though a heavy drinker, was a kind husband and father; but Si was dead now. Shortly after that sad event, the widow was visited by a Spiritualistic friend, who had come to tell the bereaved one that she had seen his spirit. She was sure it was he. "Oh, no, it is impossible," sighed the widow sadly; "it wasn't Si's spirit: he didn't leave any."

A TRAIN boy got rather taken in on the Pennsylvania Road the other day. He distributed the usual candy and cake packages through an emigrant train, but when he came back to gather them up again the foreigners had disposed of the goodies and thrown the empty boxes out of the window. They thought it was a free lunch furnished by the conductor, and could not be got to pay for it either.

AS SOME lady visitors were going through a penitentiary under the escort of a superintendent, they came to a room in which three women were sewing. "Dear me!" one of the visitors whispered, "what vicious-looking creatures! Pray, what are they here for?" "Because they have no other home; this is our sitting-room, and they are my wife and two daughters," blandly answered the superintendent.

THE EGYPTIAN QUESTION.—*Pat* (who has come to London with a view to emigrate): "Shure, I've come about that situation ye're advertisin' f'." *Newsender* (who has put out a bulletin about the "Situation in Egypt"): "What situation d'you mean?" *Pat* (pointing to the poster): "It's this wone in Agypt I'am after!" *Newsender*: "Pooh! that's on the state of affairs——" *Pat*: "Divil a ha'porth I care whose estate it's on! bodad, I'll take it."

A SMALL boy was seen to approach stealthily the windows of the county jail at Raymond, Miss., a few days ago, and hand in through the bars something having the appearance of an immense crowbar. The police were informed of it, and a posse of men surrounded the jail, while a couple of officers proceeded to the cell to recover the weapon from the prisoner. On reaching the cell they found the prisoner quietly sitting on his stool, devouring a yard-long Bologna sausage.

SPECULATION.

SINCE the creation it is estimated that 27,000,000,000,000,000 have lived on the earth. This sum, divided by 27,864,000, the number of square miles, gives 1,314,522,086 to a square rod, and 5 to a square foot. Suppose a square rod be divided into 11 graves, each grave would contain 100 persons. But this is speculation, and of no benefit to the 1,000,000,000 people that now exist, 500,000,000 of whom are invalids, 33,000,000 dying each year. What they most want are the facts concerning Dr. Pierce's Family Medicines. For years his Golden Medical Discovery has been the standard remedy for the cure of all scrofulous, throat, and lung diseases, while for over a quarter of a century Dr. Sage's Catarrh Remedy has been unrivaled as a positive cure for catarrh. The testimony of thousands of ladies has been published, certifying that Dr. Pierce's Favorite Prescription positively cures the diseases and weaknesses peculiar to women. For full information see the People's Common Sense Medical Adviser, an illustrated work of over 900 pages, price (postpaid) $1.50. Over 100,000 copies sold. Address the author, R. V. Pierce, M.D., Buffalo, N. Y.

THE Fall River Line to Boston has enlarged its facilities to meet the popular demand, and on Monday opened the "Newport" line of steamers, with through fare either way at the low price of one dollar. Passengers by this line leave New York at 6 P. M., thirty to sixty minutes later than by any other, and reach Boston at 7:30 A. M., thus obtaining what is most desirable and afforded by no other low-fare route—a full night's rest. The *Bristol* and *Providence*, of the Fall River Line, run as usual to Fall River, with daily concerts and Sunday trips for the remainder of the season.

FLOWERS FADE AND DIE.—The rich fragrance of MURRAY & LANMAN'S FLORIDA WATER is the perfume of Nature's rarest flowers. The flowers fade and die, but their living breath—so to speak—is made perpetual in this exquisite floral water; for the handkerchief, the toilet and the bath.

As a Summer drink, healthful and invigorating, Werner's "America" Extra Dry Champagne leaves nothing to be desired. It has stood the practical test of several seasons' use, and wherever offered it has invariably found a large and increasing demand. Wines should always be pure, but if purity is ever an absolute essential, it is during the Summer, when heat attacks the vital forces, and this quality "America" Extra Dry invariably retains.

WE know Hop Bitters are above and beyond all as a nutritious tonic and curative.

ST. LOUIS, November 10th, 1877.
Messrs. J. BURNETT & Co., Boston: The relief the JONAS WHITCOMB'S ASTHMA REMEDY afforded me was perfect; I have not had a bad night since taking it. This complaint has troubled me for a long time, and I have tried many things, but in no case found any relief until your Remedy came to hand. I most cheerfully recommend it to any one troubled with Hay Fever or Asthma, for it is the only remedy ever used by me with any good effects.
Yours truly, WM. T. MASON,
Of Messrs. MASON & GORDON, Lawyers,
517½ Chestnut Street.

SPLENDID appointments and all the modern conveniences of hotel life have kept the ST. NICHOLAS of New York in all its old acknowledged supremacy. Its guests from week to week include the best known names of the country in wealth, social rank, etc. Country merchants also find this hotel the most convenient and desirable.

THAT furred tongue, bad-tasting mouth, and miserable feeling, says you need Hop Bitters.

H. W. JOHNS' ASBESTOS LIQUID PAINTS are strictly pure linseed oil paints, and contain no water. They are the best and most economical paints in the world.

Stuttering cured by BATES'S APPLIANCES. Send for description to SUMNER & Co., Box 2,236, New York.

GRATEFUL—COMFORTING.
EPPS'S COCOA.
"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.
Sold only in soldered tins, labeled,
JAMES EPPS & CO., Homœopathic Chemists, London, England.

$10 to $1,000 Invested in Wall St. Stocks makes fortunes every month. Book sent free explaining everything. Address, BAXTER & CO., Bankers, 17 Wall St., N. Y.

Beware of Counterfeits and Imitations
BOKER'S BITTERS.
The best Stomach Bitters known, containing most valuable medicinal properties in all cases of Bowel Complaints; a sure specific against Dyspepsia, Fever, Ague, etc. A fine cordial in itself, if taken pure; it is also most excellent for mixing with other cordials, wines, etc. Comparatively the cheapest Bitters in existence.

THE
SUMMER FASHIONS
Just received from Paris, and published exclusively in
Frank Leslie's
LADY'S MAGAZINE.
THE JULY NUMBER NOW READY,
With Accurate Descriptions of
THE NEW STYLES
OF SUMMER TOILETS, BONNETS, HATS, Etc., Etc.

The *Lyons (N. Y.) Republican*, referring to the merits of this periodical, remarks:

"FRANK LESLIE'S LADY'S MAGAZINE needs no special praise at our hands; it speaks for itself, and is a prime favorite in every household where it has ever gained a foothold. Its stories, its poetry, its sketches, its engravings, its fashions—all things about it, in fact—are first-class in their way; and, take it for all in all, we don't know of a lady's magazine in America that excels it, and few that come within cannon-shot of equaling it. In any of the departments we have mentioned. In point of cheapness it outranks them all, quality and quantity considered, its price being only $3.00 a year, postpaid."

Colored and Plain Fashion Plates are imported directly from Paris monthly exclusively for this Magazine.

The plates are beautiful impressions, colored and finished with the utmost artistic taste.

The Reports of the various changes in the styles of European toilets appear simultaneously with those in the Paris journals.

Pictures and Accurate Descriptions are also given of the

Latest American Styles of Ladies' & Children's Costumes, Hats, Bonnets, Etc., Etc.

The Literary Contents are of a varied and highly interesting character, comprising select Serial Novels and Short Stories by popular writers, Poetry, Society Gossip, Fashionable Intelligence, Anecdotes, and a Choice Miscellany embodying a fund of general information on timely subjects, etc., etc.

Published on the 15th of Every Month.
ANNUAL SUBSCRIPTION, $3.50, postpaid.

FRANK LESLIE'S PUBLISHING HOUSE,
53, 55 and 57 Park Place, New York.

The Cheapest and Most Comprehensive Magazine in the World!
Frank Leslie's
POPULAR MONTHLY.
A NEW VOLUME AND NEW ATTRACTIONS!

". . . Replete with portraits and praiseworthy literary efforts, this issue contains over 100 engravings and 128 pages quarto, so that for 25 cents it probably furnishes more diversity of interesting reading matter than any other periodical. . . . This publication is meeting with much favor from the reading public. The contributors are among the most talented in the country, and hence the high intellectual standard."—*Daily Leader, Bloomington, Ill.*

"Undoubtedly FRANK LESLIE'S POPULAR MONTHLY gives more and more varied material for its cost than any other magazine in the world. One hundred and twenty-eight pages, half of which are handsomely illustrated, for twenty-five cents, would certainly seem to be the finishing point of economy in reading-matter."—*N. Y. Era.*

"In the publication of periodicals of a popular character Frank Leslie has achieved a wide and well deserved reputation. The present number of this excellent monthly is one of the best, and is filled with articles some of which will suit all readers, and the others will be still more enjoyed by those whose tastes for special topics are unusually strong. There are no dull pages, and the illustrations are abundant. For pleasant and entertaining reading this magazine is unsurpassed."—*Saratogian, N. Y.*

". . . Freighted with instruction and entertaining matter, this magazine has become one of the necessities in all families where good reading is properly appreciated."—*Piedmont Press, Hickory, N. C.*

Frank Leslie's
CHIMNEY CORNER.

Brilliant in its Literary and Artistic Attractions.

The CHIMNEY CORNER has maintained its superiority over all its competitors, in every department, for fourteen years past. It occupies a field which no other journal attempts to fill, and is in all respects a decidedly unique publication, appealing to all classes and all tastes.

New Serial Novels are produced in rapid succession, from the pens of such popular writers as—John Habberton, author of "Helen's Babies"; N. Robinson, author of "That Mother-in-Law of Mine," "The Janitor's Daughter," etc.; Elia W. Peirce; Christian Reid; Metta Victoria Victor, author of "The Dead Secret"; M. T. Caldor; Frank Lee Benedict; J. W. De Forest; Corry Carew, author of "Belle Bodkin of Ballybodon"; Prof. H. C. De Mille, and others of equal celebrity.

The Short Stories are completed in each number, and are of a domestic, humorous and sentimental character. There are agreeably instructive articles for the home circle; Biographies of Prominent Public Characters; Curiosities of Travel; Manners and Customs of Different Nations; the Marvelous in Art and Nature; Poetry; Essays; Anecdotes, etc., etc.

Each Number contains sixteen pages of reading matter, with eight pages of admirably executed illustrations.

Beautiful Steel Engravings are frequently presented to the subscribers, far exceeding in value the price of a year's subscription.

Published every Monday, and for sale by all newsdealers, price 10 cents. Annual subscription, $4. Three months, $1. Sent postpaid.

FRANK LESLIE'S
ILLUSTRATED
NEWSPAPER

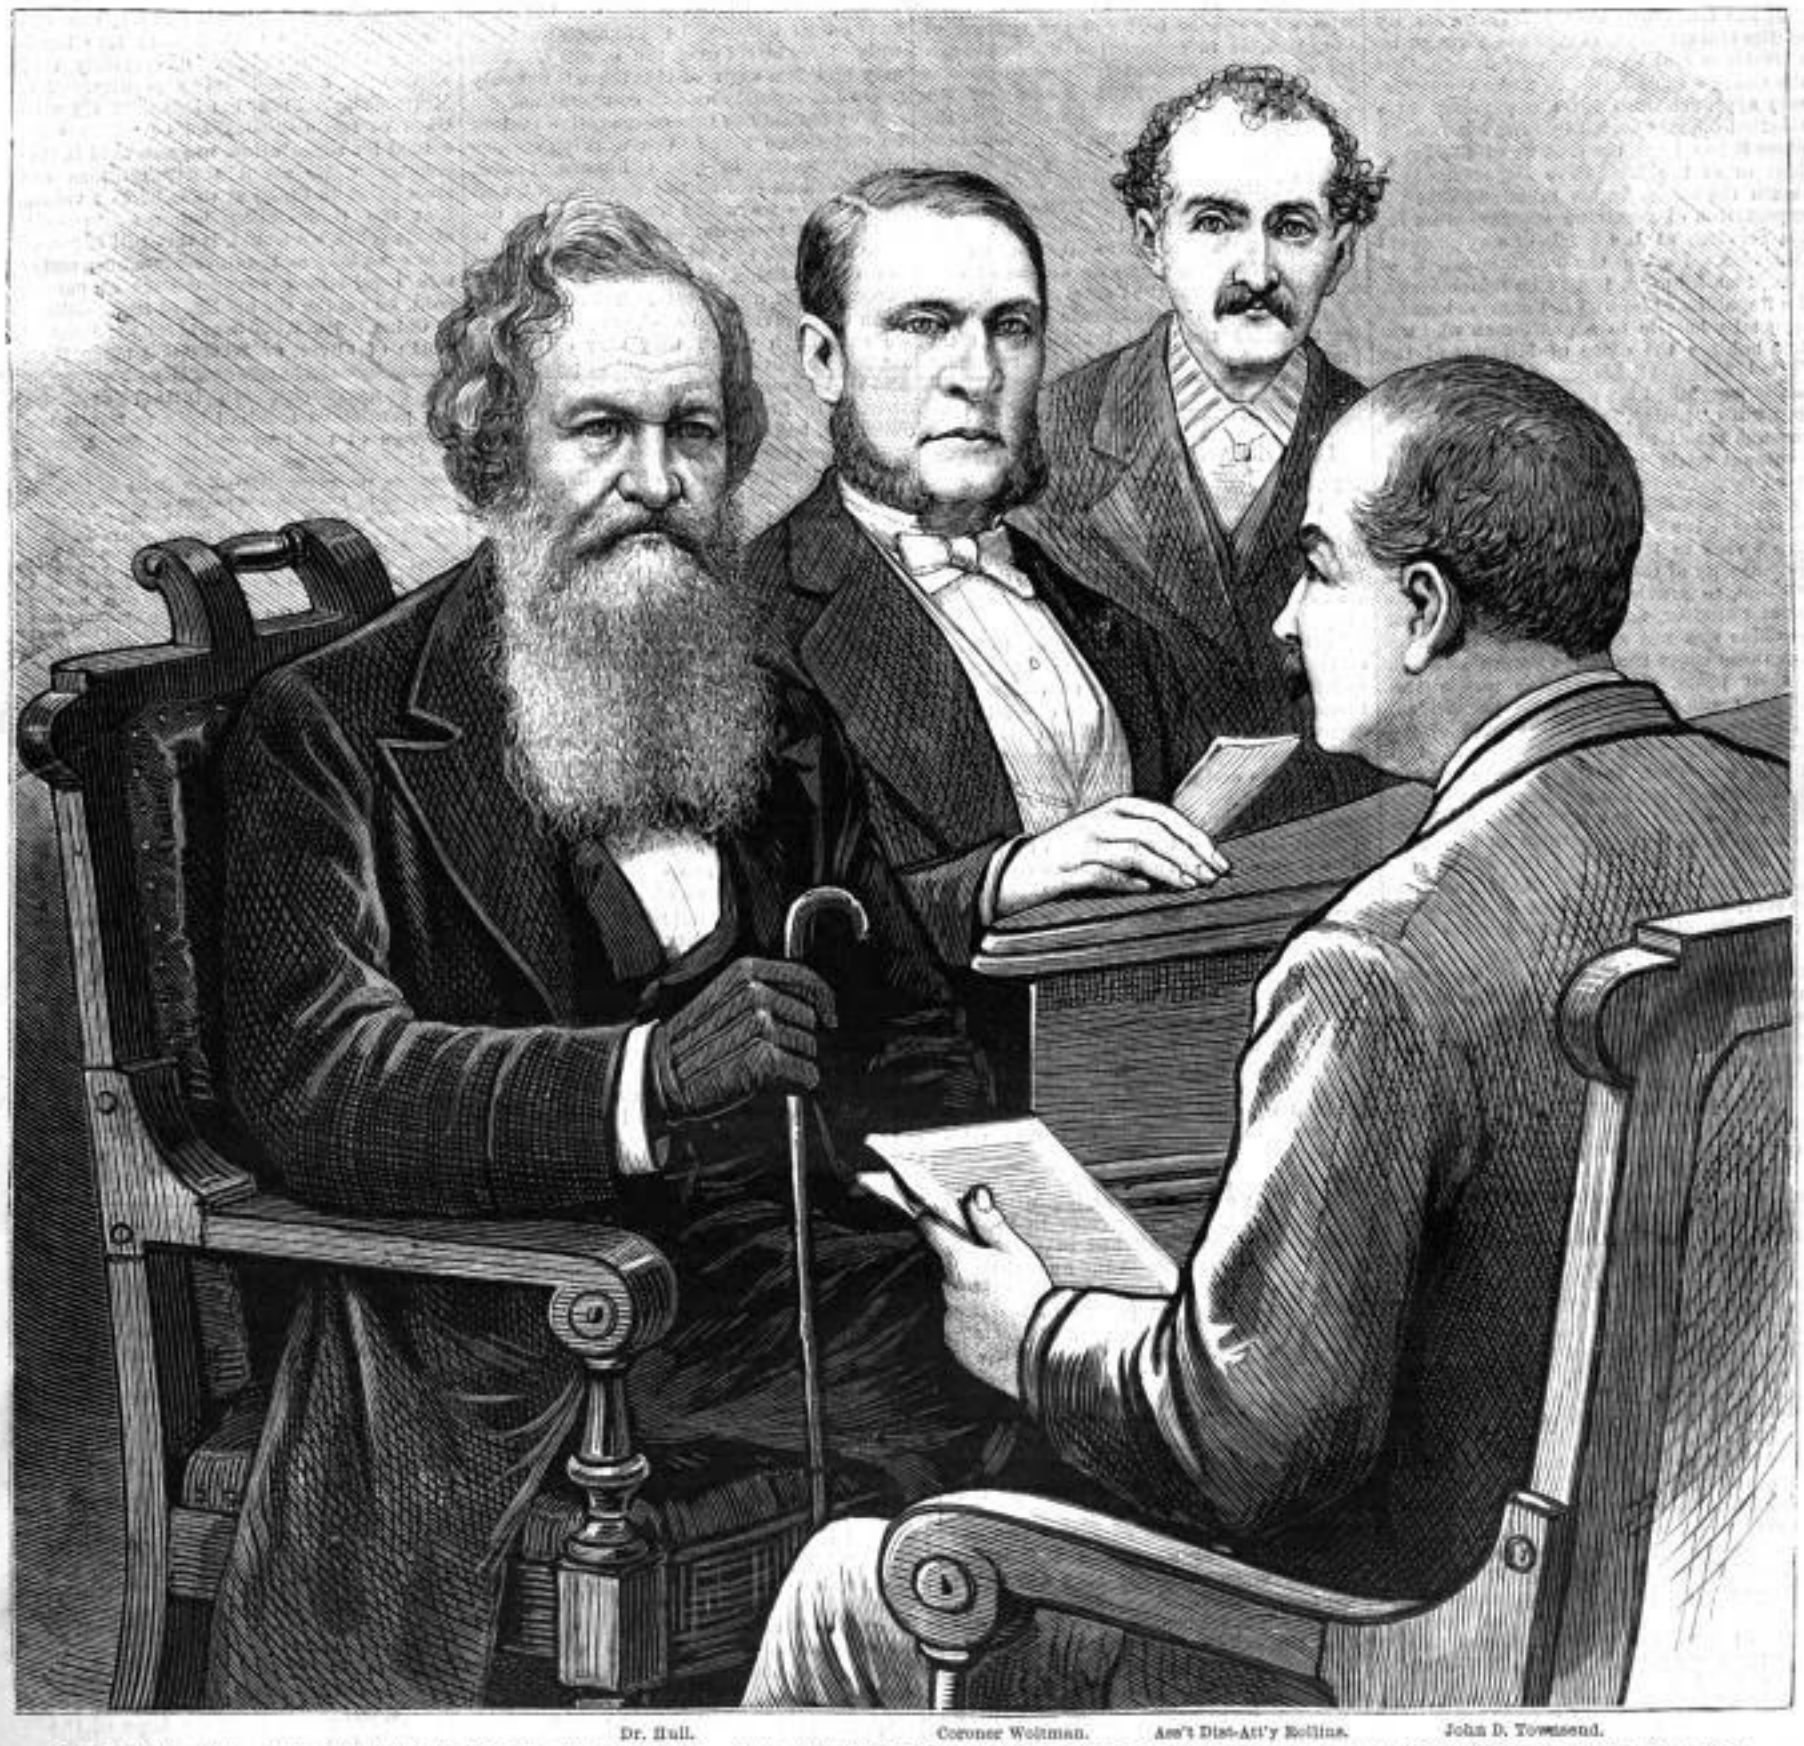
Entered according to the Act of Congress, in the year 1879, by FRANK LESLIE, in the Office of the Librarian of Congress at Washington.

No. 1,240—Vol. XLVIII.] NEW YORK, JULY 5, 1879. [PRICE 10 CENTS. $4.00 YEARLY. 13 WEEKS, $1.00

THE LATE MRS. DR. HULL.

OPENING OF THE CORONER'S INQUEST INTO THE MYSTERY.

THE jury impaneled by Coroner Woltman for an investigation into the death of Mrs. Jane L. De F. Hull, wife of Dr. Alonzo G. Hull, whose body, dead and bound to the bed, was found at the residence No. 140 West Forty-second Street, on the morning of June 11th, viewed the remains and listened to a preliminary examination of the inmates of the house that afternoon, and were then dismissed to await the further summons of the coroner. On Wednesday, June 18th, they were again called together, and an attempt was made to resume the investigation; but the capacity of the coroner's office proving inadequate for the accommodation of the jury, witnesses, and other privileged parties, an adjournment was taken to the following day, when the inquest was regularly opened in the trial-room attached to Police Headquarters.



Among the host of rumors which had prevailed for several days was one to the effect that the police had discovered both the murderer and the motive, and that this person would be produced before the coroner during the inquest. This served greatly to whet the public curiosity, and the court-room, as may be imagined, was densely crowded. However active and searching the police may have been, they suffered considerably in the estimation of an exacting public through the offer of a reward of $500 for the discovery of evidence that would lead to the arrest and conviction of the guilty person or persons, for this action was taken as a confession that the police had been completely baffled.

At 10:35 the deputy-coroner, Dr. MacWhinnie, called the roll of the jury, and after Coroner Woltman had cautioned them against the influence of newspaper criticism and conjecture, the venerable Dr. Hull was called as the first witness.

The jury sat in the inclosure near the coroner's desk, the witness-chair being placed near the foreman. On the left of Coroner Woltman sat Mr. Rollins, the Assistant District-Attorney; on his right, John D. Townsend, who had been engaged to represent Dr. Hull and the inmates of the dwelling; and a number of police officers and detectives were scattered about the room.

As Dr. Hull's name was called he walked slowly through the throng to the witness-chair. He was dressed in sober black, his hands being incased in black kid gloves. His face was pale, but his manner was self-possessed. His voice was scarcely audible to reporters or jury, and every few moments he was urged to speak louder. He would make a very brief effort to make himself heard, and would then relapse into his former indistinct utterance. His counsel, who sat immediately behind him, could not hear his testimony, and the doctor was soon asked to leave his chair and sit beside Mr. Townsend. There it was even more difficult for jury and reporters to catch what he was saying, and many of the questions had to be repeated.

(Continued on page 294.)

Dr. Hull. Coroner Woltman. Ass't Dist-Att'y Rollins. John D. Townsend.

NEW YORK CITY.—THE MYSTERIOUS DEATH OF MRS. HULL.—HER HUSBAND, DR. ALONZO G. HULL, TESTIFYING AT THE CORONER'S INQUEST, JUNE 18TH.

FRANK LESLIE'S
ILLUSTRATED NEWSPAPER,
53, 55 & 57 PARK PLACE, NEW YORK.
FRANK LESLIE, EDITOR AND PUBLISHER.

NEW YORK, JULY 5, 1879.

CAUTION.

Subscribers, in ordering our publications, should be careful to write the name of FRANK LESLIE *in full, and direct their letters to 53, 55 and 57 Park Place, New York, from which address all our publications are issued.*

THE "ISSUE" NARROWED DOWN.

AS it is the sworn duty of the President to execute and enforce the laws of the United States, and as those laws are of binding obligation upon him so long as they remain unrepealed, it is obvious that to withhold appropriations for the Federal supervision of Congressional elections, while the laws enjoining such supervision continue to stand on the statute-book, is to create a situation fraught with much embarrassment to the Executive. And in order effectually to provide for the nullification of the existing statutes under this head, the Democratic majority at Washington not only refuse all appropriations for the payment of deputy-marshals and assistant-marshals, but forbid the President to incur any "liability" for such expenditures by employing such officers in the hope of future provision for their compensation.

It has frequently occurred in the history of the Government, sometimes through inadvertence and sometimes by design, that the Congress has failed to make the necessary appropriations for the payment of a salaried officer created by law; but in such cases it has been the custom of the President or of the Executive Departments to retain the officer in his functions with the expectation of receiving compensation for his services at the hands of a subsequent Congress. During the administration of President Johnson, it may be remembered, the Republican majority in Congress became especially hostile to a gentleman who was then holding the office of Minister of the United States at Lisbon, because he had publicly signified his approval of President Johnson's "policy," and, as a punishment for such reactionary political opinions, the dominant party in Congress not only refused to make appropriations for his salary, but expressly enjoined that no unexpended balances in the Treasury should be diverted with a view to this end. In like manner the majority of Congress omitted, a year or two ago, to provide for the salary of the Naval Solicitor, under the persuasion that the office was not a necessary one; but in both these cases the officers were retained at their posts, and provision was subsequently made for their due compensation.

In view of these precedents and of the Executive usages on which they proceed, it will be seen that, in the absence of any appropriations for the payment of Federal officers, the President may continue to appoint them, or to retain them in office, so long as the laws creating the offices remain on the statute-book. It is intimated, however, that the President is averse to any Appropriation Bill which forbids him to "incur any liability" for expenses connected with the supervision of Congressional elections. It is true that prior to the next meeting of Congress an election for members of Congress will be held in the State of California alone, but it is said that to recognize the right of Congress to nullify the existing statutes with regard to that State, even as to deputy marshals, is to recognize the same right with regard to all the States, and would be pleaded as a precedent when Congress reconvenes in December next. And to recognize the right of Congress to nullify the execution of laws which it is unable to repeal and which it refuses to amend, is to introduce a new principle into the practical conduct of the Government.

The failure of Congress to make minor appropriations for the support of the Government in some of its details has frequently been winked at by the Executive, but it is no secret that President Hayes attaches great importance to the Federal supervision of Congressional elections. He expressed the opinion in one of his late veto messages that, instead of favoring a relaxation of existing laws under this head, he believed that the country demanded "greater vigor both in the enactment *and in the execution of laws framed for that purpose.*" And with this view of the Executive clearly before them, we think it is a matter of regret that the Democrats have not addressed themselves to the amendment of the laws in question. That they are not perfect in their present shape is admitted by the President when, in the same veto message already cited, he avows his readiness to concur with Congress in correcting "any oppression, any partisan partiality which experience may have shown in the working of existing laws." There is a "partisan partiality" embodied in the laws authorizing the appointment of marshals and deputy marshals to scrutinize the Congressional elections, and the administration of these laws has more than once, and in more places than one, been attended with "oppression" and scandal. The election laws should be so amended as to guard against the grievance inherent in their present state, which authorizes the appointment of certain officers belonging exclusively to a single party, while the true principle of impartiality is recognized in the case of the "supervisors" alone. The abuse of these laws in their execution redounds to the disadvantage of the Democrats, and Republicans can measure the just sensibilities of the Democrats on this score if they should suppose, for a moment, that the circumstances of the case were precisely reversed—that is, if the Democrats were in possession of the Executive authority, and had the selection of all the marshals and deputy marshals in their exclusive control. Who doubts that in this case there would be a Republican clamor against the "oppression" of these laws and the "partisan partiality" of their working?

But the Democrats forfeit the strength of their vantage-ground in the premises when, instead of seeking to amend these laws, they seek to circumvent the President in their execution—nullifying them under President Hayes, and yet leaving them on the statute-book to be enforced by a Democratic President, if haply a Democratic President should be chosen at the next Presidential election. To keep laws in a state of suspended animation, subject to revival at the will of the partisan majority who may chance to be in the control of Congress, is to change the whole character of the Government from one of *law* to one of *partisan caprice*, ruling according to the will and pleasure of a small majority in the national legislature. Since the power of the President to appoint these elective officers cannot be revoked without his consent to a repeal of the laws authorizing their appointment, and since this consent cannot be extorted from Mr. Hayes, it would seem the part of sound policy as well as of constitutional duty for the Democratic majority to propose such amendments as would at least render the laws innocuous for the purposes of evil incident to their present working and administration.

LABOR AND CO-OPERATION.

IT is amazing that the working-classes of this country persist in trying to better their condition by embarking in the service of political adventurers. They seem to be utterly incapable of learning the folly of that course. Does a designing demagogue propose to have billions of paper currency issued by national authority, or to have coined an unlimited quantity of short-weight silver dollars, or to enact laws under which Government may expend hundreds of millions in public improvements, it is the working classes only who are caught in the snare and misled to their own harm. With every passing year they are becoming more dependent upon the delusive promises of politicians and the fantasy of benefits to be secured through legislative channels.

In strong contrast with all this is the system of economics put in operation and patronized by the workingmen of England—a system which is making them self-reliant, independent, and more able to provide for themselves and families. The labor classes of that country have learned by experience that there is both power and profit in co-operation, and are pushing the system with commendable zeal. The results they have obtained by their co-operative plans are well worthy the attention of our own industrial population.

As an evidence of what may be accomplished by workingmen acting wisely in their own behalf, we may refer to the co-operative society established in Leicester, England. Two years ago the annual trade of their store was found to amount to $800,000, and the net profits to $80,000. Since 1877 the society has paid $115,000 in the shape of dividends to its members and added several thousands more to the capital stock. In addition to all this, the membership have made themselves joint proprietors of freehold property valued at more than $100,000. It is claimed on behalf of this organization that the plan pursued has enabled it to benefit many laborers, without a strike, to the extent of two and three shillings per week, and that it has alleviated more suffering than any other social organization.

According to returns made to Parliament the British co-operative societies engaged in the purchase and sale of articles of prime necessity now number 12,000. All have been highly successful, and, in a number of instances, accumulated capital varying from $50,000 to $100,000, not required for business, has been shared among the members. It was shown by these returns that sixty-five co-operative stores, possessing a paid-up capital of $780,000, and transacting an annual business of $1,250,000, had earned a yearly net profit equal to seven and one-half per cent. In addition to a large reduction on their purchases the shareholders in such societies usually receive a dividend of five per cent. on their investments.

In the Haymarket, London, there is a store belonging to the Civil Service Co-operative Society. Its business so increased as to exceed $5,000,000 per annum, and large sums of accumulated profits have been distributed among the shareholders. Although this establishment has been patronized and supported, as intended, by officers attached to the Government departments, it well serves to illustrate the benefits of co-operation. Better goods, purer articles, and cheaper rates, are among the advantages secured by the system.

The plan embraces a wholesale as well as a retail department. Two years ago the Manchester Wholesale Co-operative Society possessed a membership of 273,351. The paid-up capital amounted to $2,000,000, equal to a fraction less than $7.32 per member. This society supplies the co-operative distributing societies throughout England, maintains buyers in the several markets of the world, and transacts business in excess of $13,000,000 per annum. The net annual profit exceeds $166,000.

English co-operation is not confined to the mere supply of food and raiment to families, but extends to agriculture and manufactures, hundreds of producing societies having been formed throughout the country, particularly for the latter purpose. The results have been favorable and their success assured. Not only have they been able to maintain themselves against individual and associate competition, but they have safely weathered the financial storms which have swept over the country. This may be taken as proof that there is not only profit but security also in co-operation.

Why should not this co-operative system be introduced here? Our working classes are interested in sound finance, honest rulers and an economical government, and as to these we would not have them unmindful of their duties as citizens; but if they ever rise to a higher and more prosperous condition, materially, it must be through their own efforts. They must rely upon themselves, and co-operation opens a door through which they may enter and make themselves independent of politicians and the aggressive power of capital. They may, as in England, be their own grocers, butchers, bakers, clothiers and bankers, as well as employers, saving themselves from the extortionate charges of middlemen, and turning the profits of wholesale and retail business into their own pockets. This city needs the benefit of just such a system, and no better spot could be chosen for its introduction. Who will pioneer the way?

THE NEGRO EXODUS.

A VERY timely and sensible letter has been addressed by Governor St. John of Kansas to a colored man in Louisiana, who applied for information in reference to the advantages offered by the former State to colored emigrants. The Governor says that all representations that lands, live stock or provisions are supplied in Kansas to such emigrants are wholly unfounded; that while lands can be obtained at a very low rate, they are unimproved, and money and muscle are necessary to obtain a living from their cultivation; and that, generous as the people have shown themselves in contributing for the relief of the freedmen now in the State, "it is impossible to give aid to any very great number of destitute persons, and it is to the interest of the colored people and to the success of the movement they are engaged in now—in changing their habitation from the South to the North—to guard against flooding the country with such large numbers of those who are absolutely destitute as to render it impossible for us to provide for them." Governor St. John concludes his letter as follows:

"Impress upon your people the fact that coming to Kansas alone is not all that is necessary to success; but that here, as elsewhere, it requires industry, honesty, sobriety and the strictest economy to succeed, and that all who come here should couple with their coming a determination to demonstrate to the world that with reasonably fair opportunities the colored man cannot only sustain himself, but become prosperous and make a useful and valuable citizen. For, after all, upon the success of the colored people who are migrating North now depends to a great extent the prosperity of their race in the future. I deeply sympathize with the colored people in their present condition, as I know that they never enjoy the protection of life and property and rights of citizenship which under the Constitution and laws of our country they are justly entitled to. But I believe the time is coming that will open up a brighter day for your race."

There is one aspect of this negro exodus which has been overlooked by the Northern public, and that is the stimulus it has given to the violation of labor contracts. A letter from Mississippi to the *World* draws attention to the fact that many employers have been financially ruined by the departure of blacks who were under contract to work through the season, but who were induced by the representations of politicians, both black and white, to abandon their homes and look for fortune elsewhere.

The writer insists that none of these laborers had any cause whatever for breaking their contracts, and he adds that no one in Mississippi disputes the right of negroes to emigrate who are not under contract to stay. But he thinks that contracts should be kept by blacks as well as whites, and that the troublers and demagogues who foment discontent among the freedmen are quite as much deserving of punishment as "bulldozers" and white-leaguers. All fair-minded people will concur in the view here stated. The negro exodus, no doubt, was primarily caused by a sense of injustice and a fear of oppression among the blacks, produced by the violent intimidation of a certain class of the whites, but in its later phases it has apparently been stimulated by other than natural influences. Fortunately, however, for the labor system of the South, the emigration seems to be abating, and it is not unlikely that it will soon cease altogether. And perhaps, after all, its influence may not be wholly mischievous, especially if it shall beget among employers and employed a better understanding of their mutually dependent relations and the absolute unity of all their essential interests.

MR. MORTON ON SILVER.

REPRESENTATIVE MORTON of this city has already established a reputation as one of the ablest and most influential members of the House, especially as touching all questions of a financial or business character. His latest speech, made June 18th, was a model of compact, pitiless logic, and if it did not demolish the object at which it was aimed, namely, the Bill for recoining the trade-dollars into legal-tender dollars at par, it certainly very effectually exposed its absurdity. Mr. Morton showed that not less than six millions of trade dollars, all of which were coined for exportation, are now held in this country, while about thirty millions are circulating in China at their bullion value; that the trade-dollar being worth only ninety cents, we would, if this Bill becomes a law, so long as the Government can maintain legal-tender silver dollars at par in gold, be paying the holders of trade-dollars in China $30,000,000 in gold for $27,000,000 worth of silver, or $3,000,000 more than we can buy the same quantity of silver of our own citizens. In further exposing the pernicious results likely to follow the passage of the proposed Bill, Mr. Morton said:

"Since the remonetization of silver in 1878 the Government has coined 33,485,950 of the 'dollars of the fathers,' which it was claimed would be eagerly sought for, and how many of these dollars does the gentleman suppose were in circulation on the first day of June? One dollar for every family or party of six in the United States, a total of 7,304,915 in a country with a population of 45,000,000, leaving 26,181,045 stored in the vaults of the Treasury and carried by the Government. At the end of the next fiscal year, without any new legislation, we shall have 59,485,950 silver dollars, and, if the people have no more anxiety to secure them than heretofore, the Government will then be warehousing and carrying about 47,000,000. If the 36,000,000 of trade dollars are to be added, the appalling total on the 30th of June, 1880, will be over 80,000,000.

"Do the gentlemen who favor this measure wish to donate $3,000,000 to the holders of trade dollars in China? Do they wish, in view of the sale for gold coin since the demonetization of silver in 1873 of $1,200,000,000 of United States bonds and the reduction since 1865 of nearly $900,000,000 of principal, and $67,000,000 in the annual interest charge, to press the increased coinage of silver and hazard the credit of the Government by adding a sum to the amount of silver coin in the vaults of the Treasury which may force the Government to pay these bonds in depreciated silver or coin of less value than that which the Government received when the bonds were sold?"

Mr. Morton, in closing his admirable remarks, maintained that the true course for the Government to pursue is to stop the coinage of silver altogether and await the result of the negotiations with European Powers, for which an appropriation has been made. It is only by joint action with other nations that silver can be restored to its old steadiness of value, and a market thus provided throughout the world for our silver product. To attempt to maintain a double standard single-handed, or on any other basis than that of absolute equality, can only result in failure and disaster. The cheaper, poorer money will always drive the better out of circulation. It is to be hoped that the Senate may reject the Bill which, spite of Mr. Morton's vigorous opposition, was finally passed by the House.

PRINCE LOUIS NAPOLEON.

NEVER did a family pass through more startling alternations of brilliant fortune and crushing disaster than the Bonnpartes. Their career is the very essence of the romance, combining comedy and tragedy, of history. The sad death of the young Prince Imperial, in the bloom of youth, at once calls to mind the early taking-off of that other heir of the Napoleonic dynasty, the Duke of Reichstadt. The only child of the first Napoleon, the sole hope of the founder of the dynasty, he died of a decline at twenty-one. The heirship passed

Digitized by Google

to the nephew, Napoleon III., and now his successor is barbarously slain in a not very noble conflict with South African savages. Austerlitz was balanced by Waterloo, and Solferino by Sedan. The Tuileries was exchanged in one case for St. Helena, in the other for Chiselhurst. The extinction of the direct line by Reichstadt's death is ominously repeated by that of the young Louis Napoleon. His death is a political event of the highest importance in France. It deprives the strongest party hostile to the Republic of their main staff and hope; and is not unlikely to prove absolutely fatal to its existence.

The next heir to the Bonaparte dynasty is Prince Napoleon Jerome. He is perhaps the ablest of living Bonapartes; but he is past middle age, he has become an avowed Republican, he long ago broke with the ex-Empress and the Prince Imperial, and he is heartily detested by the mass of Imperialists. They cannot accept him as their chief, and there is no other Bonaparte to take this post. The Imperialists will most probably now be split into factions. Some will accept the Republic. Others will sway over to one of the monarchical parties. A few will espouse the cause of Napoleon Jerome. But it seems certain that the death of the young Prince, who was brave, amiable, chivalric and ambitious, and thus eminently fitted to lead an unfortunate but still hopeful cause, will postpone all chance of a Napoleonic restoration for at least a generation.

EVENTS ABROAD.

THE Khédive of Egypt, it would appear, "must go." The English and French Consuls-general have waited upon that perfidious potentate, "in full uniform," and have told him that his abdication in favor of his son, Mohamed Perofik, is a necessity. In all probability this is done with the cooperation of Austria and Germany. The Khédive has had a troublous reign. With all his faults, however, of habits and administration, he has undoubtedly made Egypt a stronger power than she was before his accession. He is a man of education, having received a thorough French polish at Paris in his youth; but is luxurious, vacillating, indifferent to his most solemn pledges, and capricious in his dealings with men and nations. His deposition is likely to be followed by grave events. It may be the germ of another European war. The new Khédive will, no doubt, be governed by the influence of English and French agents; but Egypt now becomes a sort of spoil, over which the Powers may seriously disagree - come to the point of blows.
